Subject: COVER Commission Meetings

Hi Dan,

Wanted to touch base on a couple of COVER Commission items coming up. These are both close hold items as we have not yet published our upcoming meetings in the federal register.

1. In February, the full Commission will travel to Arizona, with the original intent of visiting the Northern Arizona VA Healthcare System in Prescott for 2 day. We have decided to possibly add stops in Tucson and Phoenix during the week as well. Given your experience with Veterans issues in the state, I wanted to reach out to see if there are any groups, non-profits, public entities, or state/local level programs we should meet with/evaluate as it relates to our mission to evaluate mental healthcare services at VA. I can provide you with more info on or scope if it helps, but anything that comes to mind is worth us looking into.

2. At the end of January, the Commission will likely be in DC and looking to meet with Veterans groups, and would welcome your presence if you are available. More to follow.

Again, I do ask you to keep these items close hold while we notify our other VSO partners and publish the notice of meeting.

Thanks,

(b) (6)

Mr. Wilkie:

First let me congratulate you on your appointment to Secretary of the VA. You have a most difficult job ahead of you and correcting the many wrongs at the VA is going to take masterful leadership and I trust you are the man for the job that can get things straightened out. I wish you the utmost success in your efforts.

The reason for my email today is to encourage you to support HR299 for all of us so called Blue Water Navy Veterans. I spent the entire year of 1972 onboard the USS Kitty Hawk CVA 63. We were assigned to the Gulf of Tonkin, oftentimes called Yankee Station. I was an aviation electrician at this time and I worked on the RA5C Vigilante aircraft assigned to squadron RVAH-7. As an Aviation Electrician it was my job to correct any issue that may come up with the airplane's electrical systems to include all flight controls as well as all instrumentation and their associated systems. This oftentimes entailed crawling all over those airplanes returned from flying over Vietnam.

At issue here is were the blue Water Navy personnel affected by agent orange exposure? I don't think there is anyone today that can accurately and scientifically prove that, one way are the other. I just know that in 2007 at the age of 56 I was diagnosed with prostate cancer. I had to have it removed and the aftereffects of removal on the prostate are no fun, at all! A few years later I was diagnosed with type 2 diabetes and currently have neuropathy in both feet. I have lost all feeling in the balls of my feet.

During all the test for the prostate cancer a tumor was found on my right kidney. That was surgically removed and so far has not returned.

Now the question here is are my diseases caused by agent orange exposure? Honestly, I do not know and neither does anybody else. I do, however know that no other male member of my family has had prostate cancer or any of the other diseases I seem to have gotten.

My DD-214 states on it in plane english "Served in Vietnam" and I received a Vietnam service medal.

This policy of "Boots on the Ground" ONLY is seriously flawed in that the VA can not know if someone that had Boots on the Ground were anymore exposed to agent orange than I was sitting off the coast of Vietnam on an aircraft carrier.

It doesn't take a rocket scientist to know that anything sprayed over ground will eventually wind up in the ocean. When millions of tons of Agent Orange was sprayed over Vietnam, and given the monsoons they have their, It just make sense that the chemical would wind up in the ocean, in this the Gulf of Tonkin. I'm sure you know that ships sucked up water from the Gulf of Tonkin and desalted it and that water was used for everything you'd normally use water for. Cooking food, drinking, washing clothes

and etc. I believe it was in this manner that the Blue Water Navy were exposed to agent orange.

I apologize this is so long but i want you to understand whats happening in the real word, outside all the political moves made, meetings and discussions held and etc. It's guys like me that are dealing with the damage done to our bodies due to Agent Orange exposure. We live with this every single day of our lives.

I ask for you to support HR299 as we really and honestly need the help to cope with these diseases.

Sincerely

(b) (6)

CFR Ref ORM Recuse and Delegation of Authority.pdf

General Dunford and General Honore,

I am reaching back out to both of you as leaders and mentors as I am of military mind which VA has
triggered[and re-triggered] for over 10 months now. All I know is what the military taught me when it
comes to mission and taking care of soldiers/veterans.

I have followed your guidance [and your staff's guidance] Ref: (1) Lean forward in the fox hole, (2) follow rules, regulations and policies, and (3) report illegal activity to outside agencies (See Exhibit 4).

I even had General Shadley change his PTSD prevention meeting on 13 April to convince VA's District RA manager, (b) (6) and (b) (6) to follow the 1973 and ADA Civil Rights Act (which they refused) ([https://www.youtube.com/watch?v=\[REDACTED\]](https://www.youtube.com/watch?v=[REDACTED]) youtu). Also see 30 July 2018 ([https://www.youtube.com/watch?v=\[REDACTED\]](https://www.youtube.com/watch?v=[REDACTED])).

BLUF: When it comes to soldiers, veterans and military, I want to be part of the solution vs the problem.

However, the military has taught me to speak out against violations.

I cannot allow them (VA) to continue to hurt others who are service disabled veterans and ADA Reps (e.g. (b) (6) and (b) (6)).

General Dunford you witnessed first hand how my world class athletes and my company, E2 support Veterans through our running/coaching at the marine corps marathon, Army Ten Miler and Wounded Warrior Games.

To say nothing about how they (VA, ORM, Dr. (b) (6) and UPS) abuse my husband [who is service disabled veteran], our son, and NOW OTHERS ((b) (6) and (b) (6) is unacceptable.

My family [and I] have waited 11 months for justice. OSHA Regional said not to expect justice because everyone is involved. Whether this is a true statement or not, based on what we have experienced, everything is an illusion/game and we simply want the abuse to stop. We want to heal from this 11 month battle. We get it. Civil Rights in the US is an illusion right? All I know is, I would rather pretend to fight for civil rights overseas then fight for civil rights for my husband in our own backyard.

Either way, I want my family and I to heal. I especially dont want others (service disabled Veterans) to experience what we gone through. There has to be a better way then taking everything we have and suggesting that welfare is the best option while the perpetrators abuse their powers and wast tax dollars.

If we want justice, we need to go outside of VA and reach out to the public. OSHA said make a movie. I say, Leaders, please kindly respond to the following:

(1) General Dunford, I respectfully ask that you provide an update on how the Army is going to block Veterans Affairs ORM from locking in pre made EEOC claims in the Army's server (Exhibit 4)

(2) Danny, I respectfully ask Senator Cardin to get involve with [REDACTED] case as it is 3 months overdue for no reason. VA should have your ADA violations answers at their finger tips according to Executive order 13164. I gave you the answers in 1 day. A reasonable person might guess that VA is holding back because they dont want you to know their answers.

(3) Ashley, please ask Congressman Ruppersberger to ask VA the following: (1) Why did [REDACTED] offer to send a false investigative report to OEDCA?

(4) (b) (6) and (b) (6) please protect (b) (6) and (b) (6) from retaliation until our EEOC court case is over. Also please read the attached ORM/EEOC regulations and explain why the pre-made claims are still in the counselors report?

(5) Mr. (b) (6) please get with (b) (6) and train her on the OSHA law. Also help (b) (6) understand why you denied (b) (6) and I an OSHA assessment when this simple OSHA request is offered [and entitled] to everyone. More specifically, Mr. (b) (6) why did you deny our VA OSHA inspection when (b) (6) was in the hospital suffering from a stroke and drooped face? OSHA Regional informed us that you have an executive order that requires VA to perform their own inspection? I wonder what does it take for you to do your job? Are you waiting for someone to die? or did you not want to conduct the OSHA inspection because it would reveal (b) (6) and (b) (6) Civil Rights abuse?

(6) Dr. (b) (6) please tell us how much tax payers paid you to conduct your EEO investigation? According to your website, your company earned over \$500,000 last year. Did you earn this money as an EEO Investigator? Who trained you? We were wondering because you failed to follow 110. What regulations are you following? Why did you accept (b) (6) and (b) (6) perjured affidavits after I informed you that you have a moral obligation to stop the drama?

We are more interested in why you falsified the July affidavit? Why did you exclude Exhibit 17? Exhibit 17 is significant because it pin points VA leadership.

(7) (b) (6) you state on your letter of reprimand response that leaders should be held accountable for their actions. The penalty for lying on affidavits is up to 5 years. Do you believe that leaders should serve up to 5 years for every time they perjured themselves?

(8) (b) (6) and (b) (6) do you believe in civil rights? If so, what do you think the punishment should be for every time a leader is found guilty for civil rights violation?

(9) (b) (6) what should the punishment be for a VA ADA Officer of the Court who violated the ADA law? What about an Officer of the Court who directs scapegoats into violating rights?

(10) (b) (6) and (b) (6) you cancelled my white house hotline complaint without telling me. Did you have anything else to do with my PTSD claim being postponed in Aug? I ask because on 29 Oct, I asked (b) (6) failed to confirm your report.

(11) (b) (6) If (b) (6) did not turn in (b) (6) personnel records, medical records, dependents records, beneficiaries records to you, where did she turn them into? Why did she use your name?

(12) (b) (6) who do you really work for? Why did you disregard my 62 claims on 16 June and replace them with VA's 9 outdated claims? Why did you not recuse yourself? Why did you sign for ORM ref: transmittal letter (Volume1)?

Why are the transmittal letter not completed as per regulations (e.g., electronic, section tracking, and

etc? see 110). Why did you back date the transmittal letter from 19 Oct to 10 Oct? Why did you ignore the information about the perjured affidavits (e.g., (b) (6) (b) (6) (b) (6) (b) (6) (b) (6) (b) (6) Why as a United States Postal Rep, did you feel it was okay to commit mail fraud without fear? What are your thoughts the punishment be ref: how long should one spend behind bars for mail fraud?

(13) Dr. (b) (6) you fabricated (b) (6) medical records in VA's favor. The federal offense for actions is 5-10 years and loss of medical license. Do you agree?

(14) (b) (6) as the VA's District Reasonable Accommodation manager, you stated on 13 April 2018 (see: [https://www.youtube.com/watch?v=\(b\) \(6\)](https://www.youtube.com/watch?v=(b) (6))

and in your affidavit that you did not require additional medical records. Do you still agree with this statement?

If addition, you stated that (b) (6) repeated several times during the 13 April meeting how she had been triggered. Are you familiar with PTSD and how it causes set back for those of us who suffer from PTSD?

If so, what should be the punishment for District Reasonable Accommodation Managers who violate rights?

(15) (b) (6) and (b) (6) the penalty for medical privacy violations are 5 years. Do you agree? If, so are you prepared to serve the time behind bars? If anyone can prove perjury on your affidavits?

(16) (b) (6), the penalty for lying on affidavits is 5 years. Do you agree? What should the punishment be for someone who violates the retaliation? What should the penalty be for investigators like yourself, who fail to follow the required inspections manual, 0700?

(17) (b) (6), do you feel guilty for not contributing to the EEO process when asked in June? What should the punishment be for leadership who ignores their duty to tell the truth?

(18) Mr. Wilkie, your policies are not being followed as per what you are briefing the public. You staff is apparently keeping critical information from you. More specifically, (b) (6) and (b) (6) is cancelling out/deleting information from you and other leaders. How are you going to correct this issue? Shouldn't these individuals [and (b) (6)] be relieved or put behind bars as per regulations as their offense is a federal offense.

(19) (b) (6) as an VA Whistle Blower Rep, you have had (b) (6) information since June. What are you doing with it? What do you do when the evidence is clear regarding civil rights and safety issues? Do you work with (b) (6) She is responsible for Whistle blower inquiries.

(20) Mr. (b) (6) on 8 March, you informed me to change the doctors Clinical records. You also informed me that VA leadership was involved and bees get more with honey than vinegar. Why did the leadership want the Dr's clinical records changed? Did you lock in RA in the RAPID's system on 8 March and send it to (b) (6) If so, why could (b) (6) deny this? (b) (6) states he was informed on 30 March that RA was needed?

(21) General Shadley and (b) (6) please provide your thoughts about 13 April interactive meeting.

(22) Dr. (b) (6) please explain your thoughts about your experience with VA and (b) (6) reasonable accommodations and FMLA.

(23) Ms. (b) (6) is this a game? Do we need to go to the press? What does one need to do to get simple justice? I have cc'd the rules, regulation and policies which are not being followed. Please help me understand since this is a conflict of interest case, the case need to have been sent to OEDCA in June. Now since OEDCA gave the case to (b) (6) in June, it should have gone to an outside agency?

How are you going to endure whoever judges this case is fair as we have met conflict at every corner of the EEO process.

We want to be part of the solution vs the problem.

(b) (6)

Concern about (b) (6) and Ms (b) (6) handling this case.

Attached please find proof of how (b) (6) hid pre-made claims in the Army system and did not update it hence, why she cannot send the investigative file to ODECA.

and the receipt that ORM and ODECA should have the motion to withdrawal, hard copies and disk to review.

Again, Ms (b) (6) and Ms (b) (6) we request that (b) (6) and Ms. (b) (6) recuse themselves. We also request that you please address our concerns as this case is of public interest.

wrote:

ORM Directors, Ms (b) (6) and Ms (b) (6)

1 of 2

Our concern is OEDCA receiving our concerns vs a fraud "investigative report" and (b) (6) withdrawal memo (See Attached).

This morning, (b) (6) sent the attached email message to (b) (6) ref: sending the "Investigative Files" for a FAD.

As you know, the Investigative Files do not reflect the truth. The disk that we sent to ORM and OEDCA provides evidence OEDCA should review.

I mention our concern about (b) (6) not sending (b) (6) information to OEDCA because in June, we requested that OEDCA accept our case as per directive 110, VA should not have conducted the investigation. In addition, the Third Party, (b) (6) (Post Service) was caught using ORM's "outdated" 9 claims vs (b) (6) 62 "updated" claims (See Attached). Furthermore, your office (Ms. (b) (6)) signed for OEDCA in June (See Attached). This means, your office has control of what OEDCA reviews to include the truth.

BLUF: How do we stop wasting time and ensure that OEDCA receives (b) (6) "entire complaint file and disk vs. the INVESTIGATIVE FILES? OEDCA cannot make a decision on false facts.

Please let (b) (6) know how you are going to resolve his concern as we thought you were supposed to fill the shoes of EEOC. As of date, we have reviewed your name on most of ORM's documents to include the counselors reports, Army Secure files, emails and etc.

We look forward to your response.

V/A

(b) (6)

ADA Advocate for Wounded Warrior, Veterans and (b) (6)
How do we ensure our concerns are addressed?

As EEO directors, you should not continue to allow Ms (b) (6) and Ms (b) (6) be used as scapegoats.

Please follow 110 as you are supposed to fill the shoes of EEOC.

Again, please assure us that the false report will not be sent to ODECA.

U.S. EQUAL EMPLOYMENT OPPORTUNITY COMMISSION
Washington Field Office

(b) (6)	EEOC Case No: 570-2018-01295X
Complainant,	
v.	Agency No: VA-200C-0020-2018101982
	Administrative Judge not yet assigned
Robert L. Wilkie, Secretary for Department of Veterans Affairs	Date: November 17, 2018
Agency.	

WITHDRAWAL OF REQUEST FOR EEOC HEARING
DISSATISFACTION WITH THE EEO COMPLAINT PROCESS
NOTICE OF DEFICIENCIES IN REPORT OF INVESTIGATION AND
COMPLAINT FILE

Complainant, through his representative, hereby requests to withdraw his request for an EEOC Hearing and to request an immediate Final Agency Decision (FAD) from the Department of Veterans Affairs' Office of Employment Complaint Discrimination Adjudication pursuant 29 CFR 1614.110 (b), VA Directive 5977 and VA Handbook 5977.

Complainant, through his representative, is dissatisfied with the (1) VA, (2) ORM, (3) the U.S. Postal Services and (4) Contractor, Dr. (b) (6) processing of his EEO Complaint. On May 15, 2018, the VA's Office of Resolution Management determined this was a conflict case and they reassigned

investigation to the U.S. Postal Service on May 16, 2018. Complainant requests the VA and/or the U.S. Postal Service, as applicable, review and take action to address the complaints under the appropriate statutes, regulations, Management Directives. Please refer to enclosed DVD-ROM titled "ROI Review and Complaint 11/16/2018" for details. Specifically, please take notice of my original complaints and how VA, ORM, (b) (6) and D (b) (6) Contractor manipulated the complaints in VA's favor.

Complainant, through his representative, states there are deficiencies in the Report of Investigation and the Complaint File.

On 9-10 Oct 2018, I sent proof of VA perjured affidavits (**Exhibit 1 and Disk location: #0**) and reminded Dr. (b) (6) that she had an obligation to inform the staff. On October 22, 2018, I received the CD ROM from the U.S. Postal Service containing the Report of Investigation and the Complaint file (**Exhibit 2**).

My main concern is on August 28, 2018, I filed a Request for a Hearing under the provisions of Management Directive 110 and 29 CFR 1614.109 (**Exhibit 3**) and documents sent to EEOC after August 28, 2018 were not listed in the record (**Exhibit 4 and Disk location 1CD Boz, #1, 4-Evidence and 4-EEOC**). Other significant issue follows:

- (1) Veterans Affairs paid for the Contractor which is against regulation (**Exhibit 5**).
- (2) My 96- page Affidavit [with Exhibit 17] had been falsified (**Exhibit 6**)
- (3) Perjury (**Exhibit 13 and Disk location #0**).
- (4) Mail Fraud (**Exhibit 7**)

- (5) Agency using my affidavit answers to update the transmittal records found in Volume **(6 page FOIA Report vs 8 pages See: Exhibit 8)**
- (6) Pre-made claims not being updated then locked into an Army system **(See Disk location #0).**
- (7) Documents hidden in volume #28 to hide OSHA Safety Issues and Reasonable Accommodation Denials **(Exhibit 9).**
- (8) My 2016 RA document hidden and manipulated in (b) (6) file **(Affidavit B). This is significant because when they denied me effective** Reasonable Accommodation on 11 Jan 2018 my health went down and my disability which was manageable turned into a stroke and my deformed face in the first place **(Exhibit 10).**

I would also like to note for the record that on October 4, 2018 (one month after I removed my case from ORM to EEOC), Dr. (b) (6) submitted VA's affidavits at 9:00 am. Later that day at 5:15 pm., the Chief Administrative Judge issued a Show Cause Order demanding the Agency complete the Report of Investigation and forward the Complaint file to the Washington Field Office and serve a copy on the complainant **(Exhibit 11).**

At first glance of the Report of Investigation Report and Complaint File, I immediately discovered false facts **(See attached Disk location #0).** Also please review how ORM stored pre-made claims and an incorrect counselor's report in the Army's server **(See Disk location #0).** This issue has been reported to General Dunford, 19th Chairman Combined Joint Chief of Staff, Joe Dunford.

A thorough scrub of the Agency's Files along with recommended corrections to include more readable images are incorporated herein on the

DVD-ROM titled "ROI Review and Complaint 11/16/2018". (See: Disk Files 0# to 7) background information is found on the following tape-recorded interactive videos:

(1). [https://youtu.be/\[REDACTED\]](https://youtu.be/[REDACTED]) (RA interactive meeting 30 July 2018 with [REDACTED] and [REDACTED])

(2) [https://www.youtube.com/watch?v=\[REDACTED\]](https://www.youtube.com/watch?v=[REDACTED]) A Interactive meeting, 13 April 2018: [REDACTED] General [REDACTED] ADA Rep and mentor), [REDACTED] EO Certified and ADA Rep) and [REDACTED] (ADA Rep) and [REDACTED] Also see how the abuse has it affected our sons, [REDACTED] who is currently having a set-back dealing with the issue ([https://www.youtube.com/watch?v=\[REDACTED\]](https://www.youtube.com/watch?v=[REDACTED]) and step son, [REDACTED] request this case stay transparent as per OSHA Regional as it is case which OSHA has denied me a safety risk assessment before and while I was in the hospital due to VA's Executive Order (**Exhibit 12**). According to OSHA, VA is allowed to inspect themselves and if they decide to not conduct an OSHA inspection, they could not do anything about it. In addition, Concerns addressed about the process to ORM, VA, OEDC [REDACTED] Spin Off) are located at **Exhibit 13** and additional concerns about the Contractor is found at **Exhibit 14**.

As of date I have request assistant through my ADA representative from the following: (1) Congressmen, (2) Congresswomen, (3) Office of Special Counsel, (4) VA IG, (5) IV Whistle Blower, (6) VA ORM; (7) VA House Committee, and OSHA Local, Regional and VA OSHA (See DISK File location #0)

(7) My wife and I are service disabled Veteran. This incident has gone on for over 1 year we have uncovered too much information and want our family to heal. We humbly request for your help as this case effects the public and is of public interest.

I request **reasonable accommodations in expediting this case as it has become as health and safety issue. It has** affected my health [and my families health] emotional, physically, and financially as the overwhelming and indisputable evidence show **(See Attached Disk, Folder 1 to 6).**

On October 31, 2018, I informed the Agency's counsel that I would be reviewing the records and would be forwarding the deficiencies to her. This is the formal transmittal of those deficiencies.

SUBJECT: Referral of Complaint for Final Agency Decision – [REDACTED]
Case Number VA-200C-0020-2018101982 , Filed February 28, 2018.

1. Enclosed is the investigative file pertaining to the above referenced complaint.
Please issue a Final Agency Decision (FAD).

2. We are referring this matter to your office for a FAD because:

The complainant expressly requested to withdraw his hearing request from EEOC and requested a FAD in writing. The complainant made this request on November 17, 2018.

3. We will notify you immediately if the matter is settled, if the complainant withdraws the complaint, if the complainant files a civil action that appears to raise some or all of the matters alleged in this complaint, or if we learn that the complainant requested a hearing without notifying us of that fact.

4. Questions concerning this referral should be directed to [REDACTED] Case Manager, at (202) 461-[REDACTED]. We have advised the complainant of this referral by copy of this letter.

Sincerely,

[REDACTED]

L. [REDACTED]
VACO District Manager

Filename: #6 19 June 2018 Request to update Records without VA and ORM involvement-3.
pdf
Last Modified: Sun Nov 25 21:05:09 CST 2018

19 June 2018

Subject: Notice of Amendment of the EEO complaint for (b) (6) EEO NO, VA -20DR-0020-2018 101982. **Request to update records.**

1. This is a **conflict of interest case** that was removed from ORM to the Post Office on 16 May 2018. Request the following:

- Remove case number VA-20 DR -0020 -2018 101 82
- Add the new case number: VA -20DR-0020-2018 101982
- Submitted the new case number in the system for tracking and as per VA Handbook 5977

2. Please update the contractor's Authorization Letter. David Shulkin, Secretary was fired by the Presidents months ago (**Exhibit 3**).

3. Please review the initial, "timely [certified mail] complaints" dated 22 Feb 2016 (**Exhibit 4**) and 17 May (**Exhibit 2**).

4. As per the conflict with ORM, (b) (6) (**Exhibit 7**), the initial timely 21 each claims reflect the event occurring from 16 Dec 2016 to 21 Feb (**Exhibit 4**). These claims were certified by mail and timely (**Exhibit 4**). These items should have been updated as promised (**Exhibit 7**). Instead, ORM, Mr. (b) (6) used his 4 each example/claims (**Exhibit 6**) instead of submitting my 21 timely claims (**Exhibit 4**). Therefore, and as per VA Handbook 5977, claims that show and pattern and support the initial claim can be added.

5. Please update ORM's counseling summary to reflect the facts. In the summary, it states that the complainant refused mediation (**Exhibit 8**). This is not a fact. This needs to be updated before it goes to district court. VA refused mediation (**Exhibit 10A-10C**). More specifically and according to VA Handbook should the aggrieved person reject an agency's offer of resolution, it may result in the limitation of the Agency's payment of attorneys or subject matter expert fees or cost.

6. Please change #3, of the 17 May, 2016 Notice of Acceptance letter (**Exhibit 11**) to reflect the truth. Not all nine items were accepted by the claimant (**See Exhibit 9B**). Line #3 states that the March 30, 2018 Notice of Acceptance letter submitted by ORM, (b) (6) (**Exhibit 9A**) contained 9 events occurring from November 2017 to February 21, 2018. ORM failed to update 30 March document (**Exhibit 9B**). Concerns were submitted via certified mail on 4 April (**Exhibit 9C**).

7. Issues in the formal process was mentioned to Ms A (b) (6) on 2 April (**Exhibit 9A-C**) and never updated or mentioned in any of the Notice of Acceptance letters or provided to the ORM investigators.

8. Please update the attached May 17, 2018 Notice of Acceptance Memorandum, paragraph #4 to read: We are in receipt of your **May 9, 2018 and May 16, 2018** [vs May 14, 2018] request. The claims were submitted on 16 May, 2018 the date the case was removed from ORM/VA due to conflict of interested (**Exhibit 1**). The concern is: this document specifically states the 9 claims were accepted. This is not a fact (**Exhibit 4 and 9C**). The event should start in 2016 when the harassment started as per 5977.

9. I challenge ORM's (b) (6) claim denial, in 17 May 2018, Notice of Amendment of the EEO Complaint (**Exhibit 11**). Please re-add paragraph #4 page 2, reference: (b) (6) *Lead Management Analyst, set limits on the mediation process by refusing to remove Complaint's letter of reprimand from his personnel records before the initial mediation.* This claim should have not been removed because ORM falsified information (**Exhibit 10**). Mediation is voluntary as per 5977. During the informal phase, Mediation never happened and No confidentiality agreement was ever signed (**Exhibit 10**). VA management refused to go to mediation (**Exhibit 10C**). However, the complainant agreed to media mediation (**Exhibit 10A**). Furthermore, This complaint is a retaliation claim for challenging (b) (6) Note: ORM (b) (6) update this document after it was removed from VA ORM. She did not make the correction/update 30 March Acceptance letters, nor did she update 17 May 2018 Acceptance letter, hence why this case CANNOT return to ORM and/or VA. This claim should have never been dismissed.

As per 5977, please add the following "claims that are "like" to the claim raised in the pending complaint:

10. On or about 16 May 2018, VA/ORM gave the Post Office Manager, 9 "outdated" claim and interfered with the EEO Process in retaliation (**Exhibit 1A**).

11. On or about 17 May 2018, ORM, (b) (6) falsified the Notice of Acceptance letter (**Exhibit 11**) in retaliation and after it was removed from VA/ORM.

12. On or about 4 June, 2018, (b) (6) willfully violated the ADA law by denying the complainant **administration leave** (**Exhibit A-A1**) and in retaliation. This was done after the EEO complaint was removed from VA/ORM due to conflict of interested.

13. On or about 11 June 2018 (b) (6) and (b) (6) R District RA Coordinator willfully violated the ADA law by denying the complainant Reasonable Accommodation **"no fault" leave** (**Exhibit B**) This was done in retaliation and in an effort to burn out FMLA sick and regular leave.

14. On or about 12 June 2018, (b) (6) and Chris (b) (6) violated the ADA law by denying the complainant **RA FMLA sick leave**. This was done in retaliation and in an effort to burn out **FMLA sick and regular leave** (**Exhibit J**).

15. On or about 12 June 2018, (b) (6) and (b) (6) violated the complainant's ADA rights by denying RA **advance sick leave**. This was done in retaliation and in an effort to burn out FMLA sick and regular leave.

16. On or about 13 June 2018, (b) (6) failed to contact complainant's doctor when he willfully denied his RA request. This was done maliciously with the intent to harm.

17. On or about 17 June 2018, (b) (6) and (b) (6) willfully violated the ADA law by ignoring a board certified doctor's advice. This was done maliciously with the intent to do further harm and against the doctor's restrictions.

18. On 19 June 2018 (1) (b) (6) and (3) (b) (6) willful violated the complaints ADA rights denying by denying his ADA representative to support him while setting him up to fail in the VA building vs telework from home.

19. On 19 June 2018, (1) (b) (6) and (3) (b) (6) violated the complainants ADA rights by failing to describe how the ineffective RA (1) was better than a board certified Doctor's Restrictions and how their RA caused undue hardship.

20. On or about 29 March to date, (b) (6) and (b) (6) willfully conspired to (1) run out the complainants FMLA sick, and regular leave in an effort to cause harm and against board certified doctors restriction. This was done maliciously and with the intent to harm.

U.S. EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

**EQUAL EMPLOYMENT OPPORTUNITY
MANAGEMENT DIRECTIVE FOR
29 C.F.R. PART 1614 (EEO-MD-110),**

AS REVISED, AUGUST 5, 2015

August, 2015

EEO MD-110

Management Directive

ii

August, 2015**EEO MD-110**

**EQUAL EMPLOYMENT OPPORTUNITY COMMISSION
EQUAL EMPLOYMENT OPPORTUNITY
MANAGEMENT DIRECTIVE**

EEO MD-110**EFFECTIVE DATE: August, 5, 2015****TO THE HEADS OF FEDERAL AGENCIES**

1. **SUBJECT. FEDERAL SECTOR COMPLAINTS PROCESSING MANUAL**
2. **PURPOSE.** The purpose of this Directive is to provide federal agencies with Commission policies, procedures, and guidance relating to the processing of employment discrimination complaints governed by the Commission's regulations in 29 C.F.R. Part 1614. Federal agencies covered by 29 C.F.R. Part 1614 are responsible for developing and implementing their own equal employment programs, including alternative dispute resolution programs, and complaint processing procedures consistent with the Commission's regulations. It is the Commission's responsibility to direct and further the implementation of the policy of the government of the United States to provide equal opportunity in federal employment and to prohibit discrimination in employment because of race, color, religion, sex, national origin, age, disability, genetic information, or retaliation. Pursuant to its obligations and statutory authority, the Commission issues such rules, regulations, orders, and instructions including management directives, as it deems necessary and appropriate to carry out its responsibilities to communicate federal equal employment opportunity management policy, requirements, guidance and information to federal agencies. The Commission's instructions are directive in nature, and heads of federal agencies are responsible for prompt and effective compliance with Commission Management Directives and Bulletins. This complaint processing manual will ensure that agency personnel responsible for complaints processing are in possession of all current Commission guidance materials so that the Commission's policies, procedures, and regulations are consistently and uniformly applied government-wide. The manual consists of several chapters with subject headings identified in the table of contents. Some chapters are issued in connection with specific sections of the regulations. Other chapters include guidance and direction on topics, which we know from our experience processing complaints under previous regulations, are needed and are applicable to Part 1614. This manual will be supplemented by new and revised materials, as they are issued. The Commission's objective is for this manual to

Management Directive**iii**

4644

Page 90 of 574

August, 2015**EEO MD-110**

assist federal agency personnel in administering the discrimination complaint process.

3. **SUPERSESSION.** This directive supercedes EEO MD-110 issued November 9, 1999, and Management Bulletin MB-100-1, issued October 24, 2003.
4. **AUTHORITY.** This Directive is issued pursuant to EEOC's obligations and authority under section 717 of Title VII of the Civil Rights Act of 1964, as amended, 42 U.S.C. § 2000e-16; section 501 and 505 of the Rehabilitation Act of 1973, as amended, 29 U.S.C. §§ 791 and 794a; section 15 of the Age Discrimination in Employment Act of 1967, as amended, 29 U.S.C. §633a; section 6(d) of the Fair Labor Standards Act of 1938, as amended (the Equal Pay Act), 29 U.S.C. § 206(d); section 211 of the Genetic Information Nondiscrimination Act of 2008, 42 U.S.C. § 2000ff10; Reorganization Plan No. 1, 3 C.F.R. § 321(1078) and Executive Order 11478, 3 C.F.R. § 803 (1966-1970 Compilation) reprinted in 42 U.S.C. § 2000e note, issued in 1969 and 12106, 44 Fed. Reg. 1053 (1979).
5. **POLICY INTENT.** The policy objective of this Directive is to ensure that federal personnel responsible for processing employment discrimination complaints do so consistently and in accordance with the Commission's regulations set out at 29 C.F.R. Part 1614, and with the guidance, policies and procedures contained in this Directive and in the attached manual.
6. **APPLICABILITY AND SCOPE.** The provisions of this Directive apply to all federal agencies covered by 29 C.F.R. Part 1614.
7. **RESPONSIBILITIES.** Heads of federal agencies are responsible for ensuring that employment discrimination complaints are processed fairly, promptly, and in strict accordance with the complaint processing procedures set out in 29 C.F.R. Part 1614 and with the guidance incorporated in paragraph eight of this Directive. Since the Commission's guidance is binding in nature, federal agencies are required to comply with it.
8. **POLICIES AND PROCEDURES.** The Commission's specific policies, procedures and guidance related to the processing of federal sector employment discrimination are contained in this Complaints Processing Manual. All statements of guidance that the Commission approves become Commission guidance. Care has been taken to delineate any agency action that is suggested

**HISTORY OF THE FEDERAL SECTOR
EQUAL EMPLOYMENT OPPORTUNITY COMPLAINT PROCESS**

This section examines the history of the federal sector equal employment opportunity (EEO) complaint process. It provides an overview of the historical authority that transferred the responsibility for the federal sector EEO process from the Civil Service Commission (CSC) to the Equal Employment Opportunity Commission (EEOC or the Commission).

I. HISTORICAL AUTHORITY

The Government first recognized a policy of nondiscrimination in federal employment during the 1940s. Specifically, in July 1948, President Harry S. Truman issued the first Executive Order to declare a policy of nondiscrimination in federal employment.¹ Executive Order 9980 prohibited discrimination in federal employment on the bases of race, color, religion, or national origin.² Executive Order No. 9980, 13 Fed. Reg. 4,311 (July 28, 1948). The Order designated the head of each department to be personally responsible for insuring that employment decisions were based “solely on merit and fitness,” and it required the head of each department to designate a Fair Employment Officer to appraise department personnel actions, receive discrimination complaints, and take necessary corrective or disciplinary action. *Id.* The Fair Employment Officer’s decisions were appealable to the head of the department. *Id.* Executive Order 9980 also established a Fair Employment Board (FEB) in the CSC to advise department heads on issues related to fair employment, disseminate information relevant to fair employment programs, and coordinate department programs. *Id.* The FEB was authorized “to review decisions made by the head of any department which are appealed . . . or referred to the Board by the head of the department for advice, and to make recommendations to such head.” *Id.*

President Dwight D. Eisenhower carried forward the Government’s nondiscrimination policy when he issued Executive Order 10590, which superseded Executive Order 9980. Executive Order No. 10590, 20 Fed. Reg. 409 (Jan. 19, 1955). The Order required each department or agency head to establish procedures to provide a complainant with a fair hearing and the opportunity to appeal their case. *Id.* Executive Order 10590 re-designated the Fair Employment Officer as an Employment Policy Officer and abolished the FEB, replacing it with the

¹ In 1941, President Franklin D. Roosevelt signed Executive Order 8802, which prohibited government contractors from engaging in employment discrimination based on race, creed, color, or national origin. Executive Order No. 8802, 6 Fed. Reg. 3,109 (June 27, 1941).

² President Truman concurrently issued Executive Order 9981, which ordered desegregation of the U.S. Armed Forces. Executive Order No. 9981, 13 Fed. Reg. 4,313 (July 26, 1948).

August, 2015**EEO MD-110**

President's Committee on Government Employment Policy. Id. The Committee's authority was limited, however, to reviewing cases and rendering advisory opinions to the agency or department heads before issuance of a final agency action. Id.

In March 1961, President John F. Kennedy issued Executive Order 10925, which amended Executive Order 10590. Executive Order 10925 replaced the President's Committee on Government Employment Policy with the President's Committee on Equal Employment Opportunity.³ Executive Order No. 10925, 26 Fed. Reg. 1,977 (Mar. 8, 1961). The Order charged this new committee with studying federal employment practices and recommending additional steps to fully achieve the policy of nondiscrimination. Id. The Committee was empowered with the authority to impose sanctions for violations of the Executive Order. Id.

In September 1965, President Lyndon B. Johnson issued Executive Order 11246, which superseded Executive Order 10590 but retained the prohibition on discrimination in federal employment on the bases of race, color, creed, or national origin. Executive Order No. 11246, 30 Fed. Reg. 12,319 (Sept. 28, 1965). Notably, Executive Order 11246 returned appellate review of final agency actions to the CSC and authorized the CSC to issue regulations and orders necessary to carry out its responsibilities.⁴ Id. The Order required each department and agency head to comply with the CSC's procedures, and to establish and maintain a positive program of equal employment opportunity. Id.

In August 1969, President Richard Nixon further amended Executive Order 11246 by issuing Executive Order 11478, which required department and agency heads to "establish and maintain an affirmative program of equal employment opportunity for all civilian employees and applicants for employment." Executive Order No. 11478, 34 Fed. Reg. 12,985 (Aug. 12, 1969). President Nixon tasked the CSC with reviewing and evaluating agency programs. Id. Executive Order 11478 also required agencies to "provide access to counseling for employees who feel aggrieved and . . . encourage the resolution of employee problems on an informal basis." Id.

By 1970, despite the issuance of numerous Executive Orders addressing nondiscrimination, employment discrimination remained a significant problem in the federal government. Legislative History of the Equal Employment Opportunity Act of 1972 (U.S. Government Printing Office, Washington, D.C., H.R. 1746, Pub. L. No. 92-261, 1972 at p. 1728 [hereinafter: Legislative History (1972)]). Congress did not find the administrative procedures established by

³ Executive Order 10925 also added "creed" as a prohibited basis of discrimination and prohibited federal government contractors from discriminating on account of race. Executive Order No. 10925, 26 Fed. Reg. 1977 (Mar. 8, 1961).

⁴ Executive Order 11246 also imposed nondiscrimination requirements on contractors and subcontractors as a condition of doing business with the federal government. Executive Order No. 11246, 30 Fed. Reg. 12,319 (Sept. 28, 1965).

August, 2015**EEO MD-110**

the CSC to be effective. Id. at 82. The CSC rarely reversed agency decisions and was criticized for failing to address systemic discrimination. Id. at 82-84. In addition, testimony presented to Congress suggested that federal employees had little faith in the complaint process and often feared retaliation for challenging discriminatory employment practices. Id. at 83. Furthermore, Congress “found that inadequate remedies existed to make aggrieved persons whole,” including the unavailability of back pay as an administrative remedy and procedural obstacles potentially limiting the ability of federal employees to bring claims against the federal government, such as sovereign immunity. Id. As a result, Congress passed the Equal Employment Opportunity Act of 1972, which amended Title VII to extend its coverage to include federal employees while retaining the CSC’s role in the administrative process.⁵ Id. Additionally, Congress passed the Rehabilitation Act of 1973, which prohibited the federal government from discriminating against qualified individuals with disabilities and required federal agencies to establish affirmative action programs to provide greater employment opportunities for individuals with disabilities. Rehabilitation Act of 1973, Pub. L. No. 93-112, 87 Stat. 355 (1973).

Despite the passage of the Equal Employment Opportunity Act and the Rehabilitation Act, there were still several problems with the federal complaint/appeals process. The CSC’s procedural regulations were viewed as fundamentally biased against complainants, and the complaint process itself was difficult for individual complainants to navigate. U.S. Department of Labor, Civil Rights Center, To Eliminate Employment Discrimination (1975)). Furthermore, by the 1970s, seventeen federal agencies and departments were responsible for enforcing forty different nondiscrimination statutes and executive orders. EEOC History: 35th Anniversary: 1965 – 2000: The Law, <http://www.eeoc.gov/eeoc/history/35th/thelaw/index.html>. As a result, in 1978, President Jimmy Carter submitted two reorganization plans to Congress to eliminate duplication and conflict by placing the responsibility for coordinating all federal EEO programs exclusively with the Commission. Reorganization Plan No. 1 of 1978, 43 Fed. Reg. 19,807 (May 5, 1978); Reorganization Plan No. 2 of 1978, 43 Fed. Reg. 36,037 (Aug. 15, 1978).

President Carter issued Executive Order 12067 to implement Reorganization Plan No. 1 and transfer the functions of the Equal Employment Opportunity Coordinating Council (EEOCC) to the EEOC. Executive Order No. 12067, 43 Fed. Reg. 28,967 (Jan. 3, 1979). Executive Order 12067 delineated the Commission’s responsibility for “develop[ing] uniform standards, guidelines, and policies” for promoting and furthering equal employment opportunity without regard to race, color, religion, sex, national origin, age, or handicap. Id. Executive Order 12067 required department and agency heads to comply with the Commission’s final rules, regulations, policies, procedures, and orders. Id.

⁵ In 1974, Congress amended the Equal Pay Act (EPA) and Age Discrimination in Employment Act (ADEA) to extend coverage to the federal sector. P. Law No. 93-259, 88 Stat. 58 & 88 Stat. 74 (Apr. 8, 1974). Initially, the CSC was responsible for the enforcement of the EPA and the ADEA with respect to the federal sector. Id.

August, 2015**EEO MD-110**

After President Carter submitted his Reorganization Plans to Congress in 1978, Congress passed the Civil Service Reform Act of 1978, which abolished the CSC and distributed its functions primarily among three agencies: the EEOC; a newly established Office of Personnel Management (OPM); and the Merit Systems Protection Board (MSPB), which replaced the CSC. Civil Service Reform Act of 1978, Pub. L. No. 95-454, 92 Stat 1111 (1978). The Reorganization Plan gave the Commission responsibility over the hearings and appeals functions for certain cases involving employment discrimination. *Id.* In December 1978, President Carter issued Executive Order 12106, which transferred additional CSC functions to the Commission and amended Executive Order 11478 by adding disability and age as protected bases. Executive Order No. 12106, 44 Fed. Reg. 1,053 (Jan. 3, 1979). President Carter also issued Executive Orders 12107 implementing the Civil Service Reform Act of 1978 and Reorganization Plan No. 2. Executive Order No. 12107, 44 Fed. Reg. 1,055 (Jan. 3, 1979). In June 1979, President Carter signed Executive Order 12144, which transferred certain equal pay and age discrimination enforcement functions to the Commission. Executive Order No. 12144, 44 Fed. Reg. 37,193 (June 26, 1979).

II. The Late 1970s-1980

Prior to the Commission obtaining authority over the federal sector EEO process, the CSC had authority to issue regulations and orders with respect to the processing of federal sector EEO complaints. As a result of Executive Order 11246, the CSC issued its initial regulations pertaining to complaint processing at 5 C.F.R. Part 1613, effective April 3, 1966. 5 C.F.R. Part 713 *et seq.* These regulations provided time frames for filing complaints, required agency investigations, a hearing by an agency panel or an agency appointed hearing officer, a final decision by the agency head or a designee, and a process allowing complainants to file appeals with the CSC's Board of Appeals and Review. *Id.* After President Johnson issued Executive Order 11375, in October 1967, which prohibited discrimination in federal employment on the basis of sex, the CSC amended its regulations to require that sex discrimination complaints be processed the same as other EEO complaints. Fed. Reg. 15,631 (Nov. 10, 1967). In 1969, the CSC revised its regulations. Significant changes to the regulations included: complainants were required to participate in informal counseling prior to filing a formal complaint, and complaints examiners were prohibited from being employees of the respondent agency. *Id.* The CSC subsequently amended its regulations several times between 1972 and 1979.

When the Commission gained authority over the CSC's functions regarding federal sector employment discrimination in 1979, it decided to keep the existing process in place until a detailed study could be completed. EEOC Adoption and Amendment of Civil Service Commission Federal Employee Discrimination Complaint Regulations, 43 Fed. Reg. 60,900 (Dec. 29, 1978). Thus, the Commission adopted the CSC regulations with only minor technical changes. 43 Fed. Reg. 60,900 (Dec. 29, 1978). The regulations were moved from 5 C.F.R. Part 713 and re-designated at 29 C.F.R. Part 1613, effective Jan. 1, 1979. *Id.* at 60,901.

Management Directive

VA-18-0457-D-000107

4661

August, 2015**EEO MD-110**

In the early 1980s, the Commission amended its regulations with respect to the issue of remedies for complainants alleging discrimination in violation of the Rehabilitation Act. Specifically, in October 1981, the Commission amended its regulations to authorize back pay to applicants for federal employment who successfully proved disability discrimination in order to comply with the 1978 amendments to the Rehabilitation Act of 1973. Complaints of Handicap Discrimination in the Federal Government, 46 Fed. Reg. 51,384 (Oct. 20, 1981). The 1978 amendments provided that prevailing complainants of disability discrimination were entitled to the same remedies as those provided under Title VII. Id. The Commission's amendments deleted the provision in the regulations prohibiting back pay awards to applicants aggrieved by disability discrimination. Id.

During the mid-1980s, the Commission significantly revised its regulations governing the processing of federal sector complaints. Initially, the regulations were amended in 1985, to provide for a special panel to resolve conflicts between the MSPB and the Commission. EEOC and Merit Systems Protection Board Regulations for Special Panel Proceedings, 50 Fed. Reg. 53,897 (Dec. 27, 1985). Subpart D, "Processing Mixed Case Complaints," was amended to provide for a means to refer cases to a special panel, the organization of the special panel, and the procedures of the panel. Id. Subsequently, the Commission revised its regulations, effective November 30, 1987. 1987 Revisions to Federal Employee Discrimination Complaint Procedures, 52 Fed. Reg. 41,920 (Oct. 30, 1987). The revised regulations encompassed numerous changes including providing additional grounds for dismissing complaints, as well as providing a right of appeal for complainants alleging breach of a settlement agreement. Id. In addition, the Commission in 1987 renamed complaints examiners "Administrative Judges" (effective March 30, 1987) in order to "reflect more accurately the nature of the position." Nomenclature Change to Federal Employee Discrimination Complaint Procedures, 52 Fed. Reg. 10,085 (Mar. 30, 1987).

III. THE 1990s TO THE PRESENT

The 1990s also represented a time of significant change to the Commission's regulations governing the processing of federal sector complaints. The Commission issued revised regulations effective October 1, 1992. 57 Fed. Reg. 12,634 (Apr. 10, 1992). These revisions moved the regulations from 29 C.F.R. Part 1613 to 29 C.F.R. Part 1614. Id. Part 1614 was organized differently than the prior version of the regulations. Id. Specifically, Part 1613 contained separate subparts for each type of complaint (Title VII complaints, age complaints, mixed case complaints, etc.). Part 1614 consolidated the procedures as much as possible in an effort to avoid repetition. Id. One noteworthy change encompassed in the 1992 revisions was extending the time limit to contact an EEO Counselor from 30 days to 45 days. Id. at 12,635.

Pursuant to the recommendations of a Federal Sector Workgroup, comprised of representatives from various offices throughout the EEOC, the Commission revised its regulations again in 1999, effective November 9, 1999. 1999 Revisions to EEOC Federal Employee Discrimination

Management Directive

4662

Page 108 of 574

August, 2015**EEO MD-110**

Complaint Procedures, 64 Fed. Reg. 37,644 (July 12, 1999)(codified at 29 C.F.R. Part 1614). Some of the significant changes to the regulations included: a requirement that agencies establish an alternative dispute resolution program, providing additional grounds for dismissal, providing Commission Administrative Judges with the authority to dismiss complaints, and making Administrative Judge decisions final decisions without potential agency modification. Id. at 37,644-37,645; 37,650. In addition, the revised regulations implemented changes to the provisions governing class complaints to ensure that complaints “raising class claims are not unjustifiably denied class certification and are resolved under the appropriate legal standards consistent” with the federal courts. Id. at 37,651. Moreover, the Commission issued guidance regarding its new regulations in EEO Management Directive-110 (MD-110) (Nov. 9, 1999).

In 1992, Congress amended Section 501 of the Rehabilitation Act to adopt the employment nondiscrimination standards of the Americans with Disabilities Act (ADA). 67 Fed. Reg. 35,732 (May 21, 2002). Effective June 20, 2002, the Commission deleted from its regulations the text of its old Section 501 regulation, at 29 C.F.R. § 1614.203. Id. The new text of § 1614.203 provides, in pertinent part, that the standards used to determine whether Section 501 of the Rehabilitation Act has been violated in a complaint alleging employment discrimination shall be the standards applied under the ADA. 67 Fed. Reg. 35,735 (May 21, 2002).

In an effort to clarify its procedures on mixed case complaints, the Commission issued EEO Management Bulletin 100-1 (EEO MB 100-1) on October 24, 2003. This bulletin advises agencies to delete from their copies of EEO MD-110 Section II.B.4.d in Chapter 4. EEO-MB 100-1 (Oct. 24, 2003). This section advised agency representatives to file a motion with an MSPB Administrative Judge to consolidate matters that were not within their jurisdiction with matters that were properly before the MSPB Administrative Judge. Id. The MSPB notified the Commission that this section was improper because it constituted a request for an MSPB Administrative Judge to hear matters that may not be within the jurisdiction of the MSPB. Id.

In 2004, the process that led to the current regulatory revisions began when the Commission created a workgroup to develop consensus recommendations from the Commissioners for improvements to the federal sector EEO complaint process. The workgroup considered a number of items including testimony and submissions from a November 12, 2002, Commission meeting on federal sector reform, staff proposals, and submissions from internal and external stakeholders including the National Employment Lawyers Association and the Commission’s union. The workgroup determined that while there was no consensus among the Commissioners for large-scale revision of the federal sector EEO process, there was agreement on several discrete changes to the existing regulations that would clarify or build on the 1999 Part 1614 revisions.

Based on the workgroup’s recommendations, a Notice of Proposed Rulemaking (NPRM) was drafted that amended certain sections of 29 C.F.R. 1614. The Commission approved the draft NPRM on June 2, 2008, circulated it to federal agencies on June 4, 2008, pursuant to Executive Order 12067, and gave agencies two months to submit comments. Thirty-three (33) agencies or

Management Directive
P-vi

VA-18-0457-D-000109

4663

August, 2015**EEO MD-110**

agency components submitted comments. After coordination with the Office of Management and Budget (OMB) and the commenting agencies, the Commission formally submitted the draft NPRM to OMB for review under Executive Order 12866 on July 27, 2009.

The Commission approved the NPRM on December 9, 2009, and published it in the Federal Register on December 21, 2009. The Commission received 35 public comments: 14 from federal agencies; 6 from individuals; 5 from civil rights groups; 5 from members of the bar; and 5 from unions or other groups. The Commission issued the Final Rule, with public comments discussed in the preamble, on July 25, 2012.

The final rule contains a number of key revisions to 29 C.F.R. Part 1614:

- As part of the Commission's authority to review agency programs for compliance with Commission directives and guidelines that promote equal employment opportunity in the federal workplace, the Commission can issue notices to agencies when non-compliance is found and not corrected.
- Agencies can seek approval from the Commission to conduct pilot projects in which the complaint processing procedures vary from the requirements of Part 1614.
- A complaint that alleges that a proposal or preliminary step to taking a personnel action is discriminatory can be dismissed, unless the complainant alleges that the proposal is retaliatory.
- An agency that has not completed its investigation in a timely manner must inform the complainant in writing that the investigation is not complete, provide an estimated date of completion, and remind the complainant that s/he has a current right to request a hearing or file a lawsuit.
- An Administrative Judge's decision on the merits of a class complaint is a final decision, rather than a recommended decision, which an agency can implement or appeal.
- Agencies must submit appeals and complaint files to the Commission in a digital format, unless they can establish good cause for not doing so. Complainants are encouraged to submit digital filings.

The rule also required that the Commission provide guidance regarding the changes made by the final rule and continue to assess the federal sector EEO complaint process with a view to further improvements.

The Commission is now in the process of considering more significant changes to the federal sector complaint process than those issued in the Final Rule adopted in 2012. An Advanced Notice of Proposed Rulemaking (ANPRM) was issued in Feb. 2015 asking federal agencies,

Management Directive
P-vii

VA-18-0457-D-000110

4664

August, 2015**EEO MD-110**

employees and the public to consider how the Commission's federal sector complaint process currently works and whether wholesale revisions to the process are needed. The Commission received approximately 100 comments in response. After review of those comments, the Commission intends to issue a NPRM to amend the 1614 regulations. A final revised 1614 regulation may incorporate changes to the processing of complaints and therefore to MD-110. Nonetheless, because the 2012 Final Rule is already in effect and there is a need to provide agencies with guidance on how to implement important changes made in that rule, the Commission believes it is necessary to issue this revised MD-110.

August, 2015**EEO MD-110****CHAPTER 1****U.S. EQUAL EMPLOYMENT OPPORTUNITY COMMISSION AND AGENCY
AUTHORITY AND RESPONSIBILITY****I. EQUAL EMPLOYMENT OPPORTUNITY COMMISSION**

The Equal Employment Opportunity Commission (the Commission) enforces five federal laws that prohibit employment discrimination against applicants for federal employment, current federal employees, or former federal employees: [Title VII of the Civil Rights Act of 1964, as amended](#) (prohibiting discrimination on the basis of race, color, religion, sex, or national origin); the [Equal Pay Act of 1963](#) (prohibiting agencies from paying different wages to men and women performing equal work in the same work place); the [Age Discrimination in Employment Act of 1967, as amended](#) (prohibiting discrimination against persons age 40 or older); [Sections 501 and 505 of the Rehabilitation Act of 1973, as amended](#) (prohibiting discrimination on the basis of disability); and [Title II of the Genetic Information Nondiscrimination Act of 2008](#) (prohibiting discrimination based on genetic information).

The Commission provides leadership and guidance to federal agencies on all aspects of the federal government's equal employment opportunity program. The Commission ensures federal agency and department compliance with Commission regulations, provides technical assistance to federal agencies concerning EEO complaint adjudication, monitors and evaluates federal agencies' affirmative employment programs, develops and distributes federal sector educational materials and conducts training for stakeholders, provides guidance and assistance to our Administrative Judges who conduct hearings on EEO complaints, and adjudicates appeals from administrative decisions made by federal agencies on EEO complaints.

To carry out these duties, the Commission is authorized to issue rules, regulations, orders, and instructions governing the federal sector pursuant to Section 717(b) of Title VII of the Civil Rights Act of 1964, 42 U.S.C. § 2000e-16(b); Section 15(b) of the Age Discrimination in Employment Act of 1967, 29 U.S.C. § 633a(b); Section 505(a)(1) of the Rehabilitation Act of 1973, 29 U.S.C. § 794a(a)(1); the Genetic Information Nondiscrimination Act of 2008, 42 U.S.C. § 2000ff10; the Fair Labor Standards Act, 29 U.S.C. § 201 *et seq.*; Section 303 of the Notification and Federal Employee Antidiscrimination and Retaliation Act of 2002 (No FEAR Act), Pub. L. No. 107-174; Executive Order 12067, 43 Fed. Reg. 28,967 (June 30, 1978); and Executive Order 11478, 34 Fed. Reg. 12,985 (Aug. 8, 1969), *as amended* by Executive Order 12106 (Dec. 28, 1978). It is pursuant to these authorities that the Commission issues this Management Directive.

Management Directive**1-1**

VA-18-0457-D-000112

4666

Page 112 of 574

In furtherance of its mission, to stop and remedy unlawful employment discrimination, the Commission will from time to time review agency programs and provide guidance regarding whether they are in compliance with the Commission's rules, regulations, orders, management directives, management bulletins, and any other instructions issued by the Commission. See 29 C.F.R. § 1614.102(e). It is the intent of the Commission to assist agencies in perfecting their EEO programs and to avoid or rectify any deficiencies in their programs that prevent them from reaching the statutory mandate of being model workplaces free from unlawful discrimination.

II. FEDERAL AGENCY

In this Management Directive the term

“Federal Agency” or **“Agency,”** refers to military departments as defined in 5 U.S.C. § 102, executive agencies as defined in 5 U.S.C. § 105, the U.S. Postal Service, the Postal Regulatory Commission, the Tennessee Valley Authority, the National Oceanic and Atmospheric Administration Commissioned Corps, the Government Printing Office (except for complaints under the Rehabilitation Act), and the Smithsonian Institution. See 29 C.F.R. § 1614.103(b). The term also may include such other agencies, administrations, or bureaus (sub-components) as may be established within the above-listed that are given the authority to establish a separate unit tasked with implementing an agency program consistent with the requirements of 29 C.F.R. § 1614.102.

Federal agencies are required by statute not to engage in discrimination on the bases of race, color, religion, sex, national origin, age, disability, genetic information, or retaliation. They are also responsible for providing any reasonable accommodations throughout the EEO process for the aggrieved/complainant. A federal employee, former employee, or job applicant who believes s/he was discriminated against has a right to file a complaint with the agency's office responsible for its EEO programs. Federal agencies must offer pre-complaint counseling or EEO alternative dispute resolution (EEO ADR) to individuals who allege that they were discriminated against by the agency. If pre-complaint counseling or EEO ADR does not resolve the dispute(s), the individual can file a formal discrimination complaint with the agency's EEO office. The agency may dismiss the complaint for certain procedural reasons or conduct an investigation. At the conclusion of the investigation, the agency will issue a notice that provides the complainant with the option of either requesting a hearing before a Commission Administrative Judge or having the agency issue a final agency decision. The final agency action can be appealed to the Commission, or the complainant may file a civil action in a U.S. District Court. The authority the agency has to investigate and resolve complaints of discrimination stems from the statutory obligation that states that federal

Management Directive

1-2

VA-18-0457-D-000113

4667

Page 113 of 574

August, 2015**EEO MD-110**

agencies have the primary responsibility to ensure nondiscrimination in employment. 42 U.S.C. § 2000e-16(e).

In this Management Directive, the term

“Final Agency Action” refers to an agency’s last and final action on a complaint of employment discrimination. The final agency action may be in the form of a final agency decision, a final agency order implementing an Administrative Judge’s decision, or a final determination on a breach of settlement agreement claim.

“Final Agency Decision” refers to a decision on a complaint of discrimination made by the agency, without an Administrative Judge, that is appealable to the Commission. It includes agency decisions to dismiss or agency decisions on the merits.

“Final Agency Order” refers to a decision by an agency to implement or not implement an Administrative Judge’s decision, which is appealable to the Commission. Where the agency’s final order does not fully implement the Administrative Judge’s decision, the agency must simultaneously appeal to the Commission.

“Final Agency Determination” refers to an agency determination as to whether there was a breach of a settlement agreement that is appealable to the Commission.

In light of the significant responsibility agencies have for ensuring the integrity of the EEO process, agency programs must comply with the rules, regulations, orders, and instructions issued by the Commission to ensure that complaints of employment discrimination are resolved fairly and quickly. 29 C.F.R. § 1614.102(e) clearly sets forth both the authority of the Commission over the federal sector EEO programs and the duty of federal agencies to maintain EEO programs in a manner consistent with the mandatory directives of the Commission.

Management Directive

1-3

VA-18-0457-D-000114

4668

Page 114 of 574

III. EEO DIRECTOR'S INDEPENDENT AUTHORITY AND REPORTING RELATIONSHIPS

In this Management Directive the term

“EEO Director” - refers to the Director of the Office of Equal Employment Opportunity, Director of Civil Rights, EEO Officer, or any other title used for the position that is responsible for carrying out the responsibilities set forth in 29 C.F.R. § 1614.102(c).

A. Federal Agencies Must Appoint an EEO Director Who Shall Be Responsible for - See 29 C.F.R. § 1614.102(c):

1. implementing continuing affirmative employment programs to promote equal employment opportunity, see 29 C.F.R. § 1614.102(c)(1), and Commission issued Directives and Guidance (such as MD-715 and its Instructions) for specific information;
2. identifying and eliminating discriminatory employment practices and policies, including the counseling of individuals and the fair and impartial investigations of complaints; and
3. advising the agency head on matters related to equal employment opportunity.

B. The EEO Director Must Report Directly to the Agency Head

To ensure that federal agencies achieve their goal of being a model workplace, all managers and employees must view/consider equal employment opportunity as an integral part of the agency's strategic mission. Commission regulations require that the EEO Director “be under the immediate supervision of the agency head.” 29 C.F.R. § 1614.102(b)(4). The purpose of this requirement is to ensure that the EEO Director has the access and authority to ensure that the agency truly considers the elimination of workplace discrimination to be a fundamental aspect of the agency's mission.

Where such sub-components are authorized, the EEO Director shall be under the immediate supervision of the head of the sub-component. The sub-component EEO Director may, in the alternative, report to either the EEO Director of the parent organization or to the head of the parent organization.

In order to maintain and exercise the independent authority required of the position, the EEO Director cannot be placed under the supervision of the agency's Chief Human Capital Officer or other officials responsible for executing and

Management Directive

1-4

VA-18-0457-D-000115

4669

August, 2015**EEO MD-110**

advising on personnel actions or providing the agency with a legal defense to claims of discrimination, such as the Office of General Counsel.

By placing the EEO Director under the immediate supervision of the head of the agency, the agency underscores the importance of equal employment opportunity to the mission of each federal agency and ensures that the EEO Director is able to act with the greatest degree of independence.

This unfettered relationship allows the agency head to have a clear understanding of EEO factors when making organizational decisions. Placing the EEO Director under the authority of others within the agency may undermine the EEO Director's independence, especially where the person or entity to which the EEO Director reports is involved in, or would be affected by, the actions of the EEO Director in the performance of his/her implementation of the agency program set forth in 29 C.F.R. § 1614.102.

IV. AVOIDING CONFLICTS OF INTEREST

Federal agencies have a unique role to play in ensuring equal employment opportunity. First, every agency head has a statutory obligation to eradicate unlawful employment discrimination that may occur within the agency. This anti-discrimination responsibility is what requires federal agencies to administer a fair and impartial investigative process designed to determine the validity of complaints, as well as to employ affirmative efforts to root out discrimination and ensure equal employment opportunity. The agency head designates the Director of the Office responsible for the agency's EEO programs to carry out this obligation.

At the same time, the agency head has a fiduciary obligation to defend the agency against legal challenges brought against it (agency defensive function), including charges of discrimination. The agency head designates the General Counsel of the agency (or an agency representative) to carry out this obligation.

In this Management Directive, the term

“Agency Representative” refers to any or all agency employees, (for example Defense Counsel, agency counsel, or legal representative), whose job duties include defending the agency's personnel policies and/or actions. The term is not limited to attorneys employed in an agency's Office of General Counsel or Office of Legal Counsel. The term also includes attorneys in the Office of Human Capital and non-attorney employees whose job duties include defending the agency's personnel policies and/or actions, for example, labor relations specialists.

Management Directive

1-5

VA-18-0457-D-000116

4670

Page 116 of 574

Some may view the agency's investigative process as inherently biased because the agency accused of discrimination is the same agency that is charged with administering the EEO investigative process. Nevertheless, the statute requires that an agency comply with rules, regulations, orders and instructions which shall include the issuance of a "final action" on a complaint of discrimination, and Commission regulations establish a comprehensive system through which agencies must issue these final agency actions. Moreover, as the Commission's regulations make clear, and as this management directive reinforces, a federal agency head is obligated to protect both the integrity of the agency's EEO process and the legal interests of the agency.

It is important to reiterate that prior to the issuance of the final agency action, the agency is responsible for the fair, impartial processing and resolution of complaints of employment discrimination. Because the agency carries this responsibility of impartially processing discrimination complaints, conflicts of interest can arise when agency representatives in offices, programs, or divisions within the agency with a legal defensive role play a part in the impartial processing. This does not mean that any involvement in the EEO process by the Office of General Counsel or Office of Human Capital automatically creates a potential conflict, but instead refers to impermissible involvement in the EEO process by those employees or units of employees designated to represent the agency in adversarial proceedings. See [Complainant v. Dep't. of Defense](#), EEOC Appeal No. 0120084008 (June 6, 2014) (finding that an agency representative should not interfere with the development of the EEO investigative record by "us[ing] the power of its office to intimidate a complainant or her witnesses"); see also [Rucker v. Dep't. of the Treasury](#), EEOC Appeal No. 0120082225 (Feb. 4, 2011) (stating an agency "should be careful to avoid even the appearance that it is interfering with the EEO process."

While the information in the following sections illustrates the conflicts that may compromise the integrity of the impartial EEO complaint process, it is not intended to imply that agency representatives are a negative influence on the process. Many agency representatives provide meaningful contributions to the EEO in the workplace by educating managers and employees, consulting senior leaders with lessons learned from workplace disputes, and seeking to protect the agency by advising leadership to end a discriminatory practice as soon as it becomes apparent. This section focuses on the narrow occasions where the intersection of responsibilities creates a conflict affecting the impartiality of the complaint process.

A. Separation of EEO Complaint Program from the Agency's Personnel Function

The EEO complaint program is an integral part of the agency's "affirmative program to promote equal opportunity and to identify and eliminate discriminatory practices and policies." See 29 C.F.R. § 1614.102(a). To carry out this function in an impartial manner, the agency's personnel function must be kept separate from the EEO complaint process. The same agency official(s) responsible for executing and advising on personnel actions may not also be responsible for managing, advising, or overseeing the EEO pre-complaint or

Management Directive

1-6

VA-18-0457-D-000117

4671

August, 2015**EEO MD-110**

complaint processes. The EEO processes often scrutinize and challenge the motivations and impacts of personnel actions and decisions. In order to maintain the integrity of the EEO investigative and decision-making processes, those EEO functions must be kept separate from the personnel function.

B. Complaints That Present Potential Conflicts of Interest

1. When the Alleged Responsible Management Official Is the Head of the Agency

A conflict of interest may exist when the responsible management official alleged to have engaged in discriminatory conduct is the agency head or a member of the immediate staff of the agency head, or occupies a high-level position of influence in the agency. Real or perceived conflict may occur as a result of the undue influence that the high-level official may have over the EEO Director and other involved agency personnel. Whether this conflict is real or presents the appearance of a conflict, the matter must be addressed through procedures designed to safeguard the integrity of the EEO complaint process. For example, when an EEO complaint alleges that the agency head or a member of his/her immediate staff has engaged in discrimination, the agency head should recuse himself/herself from the decision-making process, and engage an official outside his/her chain of command to issue a final action on the case. Agencies with questions regarding unique conflict issues may contact the Office of Federal Operations (OFO) for additional guidance.

2. When the Alleged Responsible Management Official Is the EEO Director or Supervisor in the EEO Office

If an employee wishes to file a complaint alleging discrimination by the EEO Director or another supervisor in the EEO office, a real or perceived conflict may exist because the interests of the responding official would challenge the objectivity or perceived objectivity of the EEO office. This matter must be addressed through procedures designed to safeguard the integrity of the EEO complaint process. For example, when an EEO complaint alleges that the EEO Director or a member of his/her immediate staff discriminated, the EEO Director shall recuse himself/herself and retain a third party to conduct the counseling, and investigation and draft the final agency decision for the agency head to issue.

Management Directive

1-7

VA-18-0457-D-000118

4672

Page 118 of 574

C. Agencies Must Avoid Conflicts of Interest in Processing Complaints

Agencies are required to develop an impartial factual record in accordance with the instructions contained in this Management Directive. See 29 C.F.R. § 1614.108(b). Therefore, agencies must develop procedures for investigating complaints in which it is perceived that the EEO office would have an actual or perceived conflict of interest. In developing an impartial record where a conflict of interest or the appearance of a conflict exists, agencies should consider the following:

1. Formal or Informal Arrangements

Agencies should consider whether the EEO program would be best served by entering into a formal contract with a third party or whether an informal arrangement with a third party would suffice. When establishing a formal contract, many agencies enter into interagency agreements with other agencies to handle one or more of the stages in the EEO process. See Appendix A for a sample Interagency Agreement. Other agencies have developed informal arrangements with a third party, whereby the third party provides EEO services on an as-needed basis.

Agencies should consider the best source from which to obtain a third party. Agencies have reported using private contractors, parallel sub-components within a department or agency, and other federal agencies. The Commission does not endorse any particular type of third party over any other. However, agencies should ensure that the third party adheres to the applicable requirements established in this Management Directive.

2. Stages of the EEO Process

Agencies should assess the stages of the EEO complaint process at which the assistance of a third party would be most effective. Many agencies assign a third party the responsibility of providing counseling, administering EEO ADR, conducting the investigation, and/or writing the accept/dismiss letter and/or the final agency action. Pursuant to 29 C.F.R. § 1614.110(a), the agency is responsible for issuing a final order either fully implementing an Administrative Judge's decision or not fully implementing and appealing the Administrative Judge's decision; pursuant to 29 C.F.R. § 1614.110(b), the agency is responsible for taking final action by issuing a final agency decision (FAD). Although the agency must issue the final action, it may assign a third party to write the final action and review the final action before issuance.

Management Directive

1-8

VA-18-0457-D-000119

4673

August, 2015**EEO MD-110****D. Separation of EEO Complaint Program from Agency's Defensive Function**

Heads of agencies must manage the dual obligations of carrying out fair and impartial investigations of complaints that result in final agency determinations as to whether discrimination has occurred and defending the agency against claims of employment discrimination. Only through the vigilant separation of the investigative and defensive functions can this inherent tension be managed.

Ensuring a clear separation between the agency's EEO complaint program and the agency's defensive function is thus the essential underpinning of a fair and impartial investigation, enhancing the credibility of the EEO office and the integrity of the EEO complaints process.

There must be a firewall between the EEO function and the agency's defensive function. The firewall will ensure that actions taken by the agency to protect itself from legal liability will not negatively influence or affect the agency's process for determining whether discrimination has occurred and, if such discrimination did occur, for remedying it at the earliest stage possible.

It is important for the EEO Director to be provided with sufficient legal resources (either directly or through contracts) so that the legal analyses necessary for reaching final agency decisions can be made within the autonomous EEO office.

At a minimum, however, the agency representative in EEO complaints may not conduct legal sufficiency reviews of EEO matters. Legal sufficiency reviews in the EEO process involve legal analysis made by the EEO office during the processing of EEO complaints, such as acceptance/dismissal of complaints, legal theories utilized by the EEO office during investigations, and legal determinations made in final agency actions. The optimal situation is for the EEO office to have sufficient internal legal resources. However, when necessary and requested by the EEO office, legal sufficiency reviews conducted outside the EEO office must be handled by individuals that are separate and apart from the agency's defensive function.

Similarly, impartiality or the appearance of impartiality is not ensured by simply rotating agency representatives within the same office and is undermined where the agency representative's associates are assigned the legal sufficiency function in EEO cases from the representative's caseload.

Management Directive
1-9

VA-18-0457-D-000120

4674

Page 120 of 574

V. DELEGATION OF AUTHORITY TO RESOLVE DISPUTES

The agency must designate an individual to attend settlement discussions convened by a Commission Administrative Judge or to participate in EEO alternative dispute resolution (ADR) attempts. Agencies should include an official with settlement authority during all settlement discussions and at all EEO ADR meetings (Note: The agency's official with settlement authority should not be the responsible management official or agency official directly involved in the case. This is not a general prohibition on those officials from being present at appropriate settlement discussions and participating, only that they are not the officials with the settlement authority.) The probability of achieving resolution of a dispute improves significantly if the designated agency official has the authority to agree immediately to a resolution reached between the parties. If an official with settlement authority is not present at the settlement or EEO ADR negotiations, such official must be immediately accessible to the agency representative during settlement discussions or EEO ADR.

VI. EEO OFFICIALS CANNOT SERVE AS REPRESENTATIVES

EEO officials must have the confidence of the agency and its employees. It is inconsistent with their neutral roles for EEO Counselors, EEO Investigators, EEO Program Managers, or EEO Directors to represent agencies or complainants in the EEO complaint process. Therefore, persons in these positions cannot serve as representatives for complainants or for agencies in connection with the processing of discrimination complaints. See 29 C.F.R. § 1614.605(c) (disqualification of representatives for conflict of duties).

VII. SPECIAL EMPHASIS PROGRAM

The head of the agency shall designate an Equal Employment Opportunity Officer(s) and such Special Emphasis Program Managers, clerical, and administrative support as may be necessary to carry out the functions described in Part 1614 in all organizational units of the agency and at all agency installations. 29 C.F.R. § 1614.102(b)(4).

Special Emphasis Program Managers should include managers of the Program for Employees with Disabilities, the Federal Women's Program, the Hispanic Employment Program and such other programs as may be required by the Office of Personnel Management or the particular agency.

An agency head may delegate authority under this part to one or more designees. 29 C.F.R. § 1614.607.

VIII. AGENCY STATISTICAL REPORTING REQUIREMENTS FOR THE COMPLAINT PROCESS

Management Directive
1-10

VA-18-0457-D-000121

4675

Page 121 of 574

August, 2015**EEO MD-110****A. Annual Federal Equal Employment Opportunity Statistical Report of Discrimination Complaints**

The Commission requires each covered agency to use EEOC Form 462, Annual Federal Equal Employment Opportunity Statistical Report of Discrimination Complaints, to provide an annual report of the status of all pre-complaints and formal complaints processed under its EEO complaints program. See 29 C.F.R. § 1614.602(a). The Commission annually provides detailed instructions for reporting the data in an EEOC Form 462 User's Instruction Manual located on the Guidance page of the Commission's electronic document submission portal.

B. Quarterly and Fiscal Year EEO Complaint Statistics Required by Title III of the No FEAR Act

Pursuant to 29 C.F.R. § 1614.703, agencies are required to post cumulative quarterly and fiscal year EEO complaint statistics, titled "Equal Employment Opportunity Data Posted Pursuant to Title III of the Notification and Federal Employee Antidiscrimination and Retaliation Act of 2002 (No FEAR Act), Pub. L. No. 107-174," on the home page of the agency's public website. Agencies should provide a hyperlink to the statistical data entitled "No FEAR Act Data." Section 1614.704 of 29 C.F.R. sets forth the list of statistical data the agency must post. Additional information regarding No FEAR Act posting is found at <http://www.eeoc.gov/federal/directives/index.cfm>.

C. Annual Report to Congress, the Commission and the U.S. Attorney General Required by Title II of the No FEAR Act

Title II of the No FEAR Act of 2002 requires each federal agency to submit to Congress, the Commission and the Attorney General an annual report that includes the agency's fiscal year Equal Employment Opportunity complaint statistics among other requirements. More information on the No FEAR Act annual report requirements can be found in [5 C.F.R. §§ 724.301-302](#). All No FEAR Act reports should be sent to:

Chair of the Equal Employment Opportunity Commission
c/o Office of Federal Operations
Attention: No FEAR Act Report Coordinator
P.O. Box 77960
Washington, DC 20013

Management Directive**1-11**

VA-18-0457-D-000122

4676

Page 122 of 574

No FEAR Act reports may soon also be submitted electronically through the Commission's electronic document submission portal.

Other Commission reporting requirements are set forth in Management Directive 715 issued in October 2003 which is located on the Commission's website at <http://www.eeoc.gov/federal/directives/md715.cfm>.

IX. PROGRAM REVIEW PROCEDURES FOR COMPLIANCE

Agency programs will be reviewed for compliance with Commission rules, regulations, orders, Management Directives, Management Bulletins, or any other instructions issued by the Commission. Due to the variation in the requirements set forth in the above issuances the method of review may vary, depending on the requirement(s) at issue. A review may result from multiple sources: 1) monitoring agency submissions including complaint files, plans, and reports; 2) monitoring correspondence and news media for reports of agency action or non-action indicative of compliant or noncompliant activity; 3) requesting information directly from the agency; and 4) on-site visits or virtual conferences.

Pursuant to 29 C.F.R. § 1614.102(e), in cases where any of an agency's EEO programs or activities are found not to be in compliance with a Commission issuance, the agency will be notified of such non-compliance, and the agency will be given the opportunity to respond to the Commission. The agency's response should contain a statement of the agency's compliance, a plan to bring the program or activity into compliance, or a justification as to why the agency will not comply. Failure to respond or an inadequate agency response will result in escalation to the next step in this process.

A. Notice to Agency of Non-Compliance

In cases where noncompliance is discovered, the agency EEO Director or responsible Program Manager will be notified in writing of the noncompliance. The notice will include:

- 1) the requirement with which the Commission believes that the agency is not in compliance and the source of that requirement;
- 2) a statement explaining how the Commission became aware of the noncompliance;
- 3) a statement as to how the agency is not in compliance and the basis for that conclusion;

August, 2015**EEO MD-110**

- 4) a stated reasonable period of time to cure the noncompliance with recommended actions; and
- 5) a stated reasonable period of time in which the agency may establish that it is, in fact, in compliance or a stated reasonable period of time to establish a justification for the noncompliance.

B. Written Notice to Head of Federal Agency

The Chair of the Commission may issue a notice to the head of the agency whose program is noncompliant when an agency head fails to be responsive and/or where efforts to assist the agency in reaching compliance through the steps set forth in Section IX.A. The notice to the agency head will include:

- 1) the compliance requirement with which the Commission believes the agency is not complying and the source of that compliance requirement;
- 2) a statement explaining how the Commission became aware of the noncompliance;
- 3) the efforts undertaken by the Commission's Office of Federal Operations to obtain compliance;
- 4) the agency response to the Commission's efforts; and
- 5) a stated period of time within which the agency head must respond with a plan to bring the program into compliance.

C. Public Notification of Non-Compliance

Where the head of the agency fails to respond timely and in good faith with a plan that the Director of Federal Operations believes is sufficient to bring the agency program into compliance, the Chair of the Commission will publically identify the noncompliant agency and the factual bases surrounding the noncompliance.

1. The Chair will evaluate the repercussions and reach of the effect of the noncompliance on equal employment opportunity and publish or publically identify the fact of noncompliance in a manner reflective of the reach and severity of the harm.

2. Public identification may occur by using, among other means, publication in the Annual Report to Congress, a press release, posting some form of notice of noncompliance on the Commission's public website, or any other means the Chair deems appropriate.

X. PILOT PROJECTS

Unless prohibited by law or executive order, the Commission, in its discretion and for good cause shown, may grant agencies prospective variances from the complaint processing procedures prescribed in 29 C.F.R. Part 1614. Variances will permit agencies to conduct pilot projects of proposed changes to the complaint processing requirements of 29 C.F.R. Part 1614 that may later be made permanent through regulatory change. See 29 C.F.R. § 1614.102(f).

A. Request for Pilot Authority

Agencies requesting variances must submit in writing a request for pilot authority. In its written request, the agency requesting a variance must:

1. identify the specific section(s) of 29 C.F.R. Part 1614 from which it wishes to deviate and provide a summary description of what it proposes to do instead;
2. provide information clearly defining the stages in the pilot project and how matters will progress to completion within the pilot project;
3. explain the expected benefits and expected effect on the EEO complaints process of the proposed pilot project;
4. certify that the pilot project will ensure fairness and neutrality with the ultimate goal of achieving equality of employment opportunity;
5. state how the agency intends to maintain an adequate record for a potential hearing or appeal;
6. submit information demonstrating the agency's current status of operating within regulatory guidelines for complaint processing (information should include EEO Form 462 timeliness indicators, Management Directive 715 self-assessment, and any third-party evaluations, such as Commission program evaluations, Office of Inspector General evaluation reports, or Government Accountability Office reports);
7. provide a written description of the knowing and voluntary opt-in provision for participants;

Management Directive

1-14

VA-18-0457-D-000125

4679

August, 2015**EEO MD-110**

8. indicate the proposed duration of the pilot project;
9. describe the method to be used to inform agency employees and applicants of the pilot project; and
10. explain the method by which it intends to evaluate the success of the pilot project on an interim basis and at the completion of the pilot project, including identification of well-defined, clear, and measurable objectives and their connection to program objectives, the criteria for determining pilot project performance, a way to isolate the effects of the pilot project, and how data will be collected for evaluation purposes.

B. Process for Submitting, Reviewing, and Approving Pilot Projects

The Commission will annually review and evaluate requests for pilot authority. Agencies should submit their request electronically at the end of the second quarter of the fiscal year, and the Commission will make its determination by the end of the third quarter. All approved pilot projects will begin at the beginning of the next fiscal year and terminate not more than 24 months later, unless extended (see below). The process for approval of pilot authority follows:

1. The Commission announces the opening period of the request for pilot authority at the end of the second quarter of the fiscal year (March 31).
2. Agencies submit requests to the Office of Federal Operations by April 15.
3. The Office of Federal Operations reviews requests and makes recommendations (completed by May 15).
4. The Office of Federal Operations submits requests and recommendations to the Commission by May 15.
5. The Commission review, including a briefing period regarding the requests for variances and recommendations from the Office of Federal Operations, will be completed within 30 days (or by June 15).
6. The Commission votes on approval of requests for pilot authorities.
7. The Office of Federal Operations sends Commission determinations to proposing agencies.
8. Pilot projects must begin the first day of the next fiscal year (October 1).

9. The 24-month maximum time frame for pilot projects will permit agencies to accept complaints into the pilot projects for up to 24 months and allow agencies a reasonable amount of time to conclude the processing of those complaints.
10. Agencies administering pilot projects must submit quarterly reports to the Office of Federal Operations with information on the total complainants opting into the pilot project, the average age of complaints with the pilot project, and updated pilot project evaluation data. See Section X.A.10 of this Chapter.
11. Agencies administering pilot projects must submit a final evaluation report at the conclusion of the pilot project. The report must provide a detailed evaluation of the results of the pilot project and be submitted to the Commission within 90 days of the conclusion of the pilot project.

Variances will not be granted for individual cases and will usually not be granted for more than 24 months. The Director of the Office of Federal Operations for good cause shown may grant requests for extensions of variances for up to an additional 12 months. Additionally, the Director of the Office of Federal Operations may terminate an agency's pilot authority if the agency fails to comply with the requirements of the variance. Prior to termination of the pilot authority, the Director of the Office of Federal Operations will send a notice to the agency requesting information on compliance with the variance provisions.

Electronic submission of pilot authority requests must be made using email transmission of all documents to federalsectoreeo@eeoc.gov or through the Commission's electronic document submission portal.

August, 2015

EEO MD-110

CHAPTER 2

EQUAL EMPLOYMENT OPPORTUNITY PRE-COMPLAINT PROCESSING

I. INTRODUCTION

A. Counseling Generally¹

The EEO process begins when a person who believes s/he has been aggrieved meets with an EEO Counselor.² For further information on coverage under the statutes, [see Section 2.III.A.1 in “Threshold Issues” of the Commission’s Compliance Manual.](#)

In this Management Directive, the term

“EEO Counselor” refers to any agency or contracted employee who, serving as a neutral, provides an aggrieved individual with his/her rights and obligations under equal employment opportunity laws, gathers limited data and may attempt an informal resolution where ADR is not offered or accepted, pursuant to 29 C.F.R. § 1614.

The EEO Counselor provides vital information regarding the EEO process and other processes that may be available to the aggrieved individual, gathers basic information regarding the matter(s) from the aggrieved individual, and attempts to informally resolve the matter(s) if the matter does not go to the alternative dispute resolution program. The EEO Counselor plays a vital role in ensuring prompt and efficient processing of the formal complaint. This section of the Management Directive provides Commission guidance and procedures that EEO Counselors should follow when presented with individual and class claims of discrimination.

¹ Please note: there is no pre-counseling phase of the 29 C.F.R. § 1614 process.

² The Commission consistently has held that a person may satisfy the criterion of EEO Counselor contact by initiating contact with any agency official logically connected with the EEO process, even if that official is not an EEO Counselor, and by exhibiting an intent to begin the EEO process. [See Hyman v. Dep’t. of the Navy](#), EEOC Appeal No. 0120100060 (May 26, 2011); [Martell v. Dep’t. of Commerce](#), EEOC Appeal No. 0120110980 (Dec. 21, 2000); [Lodge v. Social Security Administration](#), EEOC Appeal No. 0120110847 (May 12, 2011).

All **time periods** set out in this Management Directive are stated in calendar days unless otherwise indicated. The first day counted is the day after the event from which the time period begins to run and the last day of the period shall be included unless it falls on a Saturday or Sunday or federal holiday, in which case the period shall be extended to include the next business day. All time periods are subject to waiver, estoppel, and equitable tolling. See the [Commission's Compliance Manual](#), "Threshold Issues" 915-003, Section 2-IV Timeliness for further information.

B. Full-Time EEO Counselors

Agencies should use full-time EEO Counselors whenever possible. If an agency must rely on EEO Counselors for whom EEO counseling is a collateral-duty, agencies should consider the following best practices: (1) include a timeliness component in the performance plan of the collateral-duty EEO Counselors; (2) implement an agency policy to remove collateral duties from EEO Counselors for tardiness or inferior work product; and (3) provide incentives for good performance by using on-the-spot awards, letters to supervisors, and awards presentations.³ The Commission also expects agencies to use the step-by-step guide at Appendix B to develop or refine its own counseling procedures.

C. EEO Counselor Training Requirements

Continuing education and training for employees working in federal sector EEO is vitally important to promoting the goals and objectives of equal employment opportunity. This Chapter establishes mandatory training requirements for EEO Counselors. See Section II below for mandatory training requirements.

D. EEO Counseling and Investigations

An EEO Counselor, whether agency or contracted, may not serve as an investigator in a dispute in which s/he provided counseling to the aggrieved person. The EEO Counselor's role is to provide an environment for open dialogue leading to an informal resolution prior to the filing of a complaint. The role is compromised if the EEO Counselor also serves as an investigator of the complaint, as the role of the investigator is that of a neutral fact finder who

³For more information, please review the Commission's report "[Attaining a Model Agency Program: Efficiency](#)" (2004).

August, 2015**EEO MD-110**

collects and discovers factual information concerning the claim(s) in the complaint under investigation and prepares an investigative summary.

The Commission also discourages agencies from allowing an EEO Counselor to act as an investigator in a different dispute. Combining the roles of EEO Counselor and investigator (even with regard to different disputes) can create a perception of bias and potentially confuse individuals with regard to the purpose of the counseling process. Therefore, the Commission recommends against using EEO Counselors as investigators, except as a last resort.

E. EEO Counseling and EEO ADR

Both EEO alternative dispute resolution (ADR) and EEO counseling are essential to the prompt resolution of claims of discrimination. The opportunity for informal resolution is important. EEO ADR is a term used to describe a variety of approaches to resolving conflict that differ from traditional adjudicatory methods or adversarial methods. EEO ADR provides a means of improving the efficiency of the federal EEO complaint process by attempting early and informal resolution of EEO disputes without the filing of a complaint.

When an aggrieved person seeks pre-complaint counseling, the EEO Counselor must fully inform the individual of:

1. how the agency EEO ADR program works;
2. the opportunity to participate in the program where the agency agrees to offer EEO ADR in a particular case; and
3. the right to file a formal complaint if EEO ADR does not achieve a resolution.

See Chapter 3 of this Management Directive for more detailed EEO ADR information.

II. MANDATORY EEO COUNSELOR TRAINING REQUIREMENTS

A. Minimum Requirements

To ensure quality counseling throughout the federal sector, the Commission requires that new EEO Counselors, including contract and collateral-duty EEO Counselors, receive a minimum of thirty-two (32) hours of EEO Counselor

training prior to assuming counseling duties. In addition to the training for new EEO Counselors, all EEO Counselors are required to receive at least eight (8) hours of continuing EEO Counselor training each fiscal year.

The Commission has developed training courses to satisfy these minimum requirements, and it offers them to agencies through the Commission's Revolving Fund Program on a fee-for-service basis.⁴ Agencies may also develop their own courses to satisfy this requirement as long as the training meets the minimum standards set forth by the Commission.

B. Minimum Standards for Thirty-Two-Hour Training Course

New EEO Counselors must receive at a minimum, training in the following areas before an agency assigns them to provide EEO counseling to aggrieved persons:

1. an overview of the entire EEO process set forth under 29 C.F.R. Part 1614, emphasizing important time frames in the EEO process, providing an overview of counseling class complaints, and analyzing fragmentation issues (see Chapter 5, Section III of this Management Directive for a discussion of fragmentation);
2. a review of the roles and responsibilities of an EEO Counselor, as described in this Chapter and in the appendices to this Management Directive;
3. an overview of the statutes that the Commission enforces, including [Title VII of the Civil Rights Act of 1964, as amended](#) (prohibiting discrimination on the basis of race, color, religion, sex, or national origin); the [Equal Pay Act of 1963](#) (prohibiting agencies from paying different wages to men and women performing equal work in the same work place); the [Age Discrimination in Employment Act of 1967, as amended](#) (prohibiting discrimination against persons age 40 or older); [Sections 501 and 505 of the Rehabilitation Act of 1973, as amended](#) (prohibiting discrimination against people with disabilities); and [Title II of the Genetic Information Nondiscrimination Act of 2008](#) (prohibiting discrimination based on genetic information);
4. an explanation of the theories of discrimination, including the disparate treatment, adverse impact, and reasonable accommodation theories, and

⁴ For more information about EEOC training courses, visit the Commission's website at <http://www.eeoc.gov/federal/training/index.cfm>.

August, 2015**EEO MD-110**

providing more detailed instructions concerning class actions and issues attendant to fragmentation;

5. a review of the practical development of issues through role-playing or other practices designed to have attendees practice providing EEO counseling, including the initial intake session with an aggrieved person, identifying claims, writing reports, and attempting resolution;
6. a review of other procedures available to aggrieved persons: the right to go directly to court under the Age Discrimination in Employment Act after notice to the Commission; mixed case processing issues, including the right of election; class complaints processing issues; and the negotiated grievance procedure, including the right of election;
7. an overview of the remedies available for each law, such as compensatory damages, attorney's fees, and costs available to prevailing parties; and
8. an overview of the agency's informal and formal EEO ADR processes.

C. Standards for Continuing Training Requirements

Once new EEO Counselors complete the minimum requirements, they must receive a minimum of eight hours of continuing EEO counseling training during every fiscal year thereafter. The purpose of this continuing training requirement is to keep EEO Counselors informed of developments in EEO practice, law, and guidance, as well as to enhance and develop their counseling skills. Accordingly, agencies should conduct a needs assessment to determine specific areas for training. The Commission anticipates that this training will include segments on legal and policy updates, regulatory and statutory changes, counseling skills development, and EEO ADR program updates.

III. THE ROLES AND RESPONSIBILITIES OF AN EEO COUNSELOR

When an aggrieved individual seeks EEO counseling, the EEO Counselor begins their role of educator and must ensure that the aggrieved individual understands his/her rights and responsibilities in the EEO process, including the option to participate in EEO ADR. The EEO Counselor will also perform the roles of information gatherer, and facilitator, and possibly translator, messenger, and suggestion maker as set forth below. The EEO Counselor must perform several tasks in all cases, regardless of whether the aggrieved individual ultimately participates in EEO ADR, including:

Management Directive
2-5

VA-18-0457-D-000132

4686

Page 132 of 574

EEO MD-110**August, 2015**

1. Advise the aggrieved individual about the EEO complaint process under 29 C.F.R. Part 1614. The EEO Counselor should explain the reasonable accommodations available throughout the EEO process. The EEO Counselor should explain the agency EEO ADR program, stating that the program is available to the aggrieved individual or advising whether the program will be made available. The EEO Counselor should further explain that if the EEO ADR program is available, the aggrieved individual will have to decide whether to seek pre-complaint resolution through the EEO ADR process or through the traditional EEO counseling process. In this regard, the EEO Counselor should inform the aggrieved individual about the differences between the two processes. (Educator)
2. Determine the claim(s) and basis(es) raised by the aggrieved individual. (Information gatherer)
3. Conduct a limited inquiry during the initial interview with the aggrieved individual for the purpose of determining jurisdictional questions. This includes determining whether there may be issues relating to the timeliness of the individual's EEO Counselor contact and obtaining information relating to this issue. It also includes obtaining enough information concerning the claim(s) and basis(es) so as to enable the agency to properly identify the legal claim raised if the individual files a complaint at the conclusion of the EEO counseling process. (Information gatherer)

Use of the term "initial interview" in this context is not intended to suggest that during the first meeting with the aggrieved person an EEO Counselor must obtain all of the information s/he needs to determine the claim(s) or basis(es). Nor does it mean that if the aggrieved individual decides to participate in EEO ADR, the EEO Counselor is prevented from contacting them to obtain such additional information as s/he needs for this specific purpose.

4. Seek a resolution of the dispute at the lowest possible level, unless the agency offers EEO ADR and the aggrieved individual agrees to participate in the EEO ADR program. If the dispute is resolved in counseling, the EEO Counselor must document the resolution. (Facilitator, translator, messenger, and suggestion maker)
5. Advise the aggrieved individual of his/her right to file a formal discrimination complaint if attempts to resolve the dispute through EEO counseling or EEO ADR are unsuccessful. (Educator)

Management Directive

2-6

VA-18-0457-D-000133

4687

August, 2015**EEO MD-110**

6. Prepare a report sufficient to document that the EEO Counselor undertook the required counseling actions and to resolve any jurisdictional questions that arise. (Report Writer)
7. Advise the aggrieved person that their identity will not be revealed unless the aggrieved person authorizes them to reveal it or they file a formal complaint with the agency. (Educator)

The Commission has developed a guide for EEO counseling that agencies may use in developing or refining their own procedures. (See Appendix B of this Management Directive).

IV. INITIAL INTERVIEW SESSION

A. Provide Required Written Notice

At the initial session or as soon as possible thereafter, the EEO Counselor must provide all aggrieved individuals written notice of their rights and responsibilities. 29 C.F.R. § 1614.105(b). The Commission has set forth this information in the “EEO Counselor Checklist,” in Appendix C of this Management Directive.

B. Provide Information on Other Procedures as Required

Depending upon the facts and circumstances of the case, an aggrieved person may have options other than the Part 1614 procedure available in pursuit of a discrimination claim. The individual, in some cases, may have to elect the process s/he wishes to pursue. Election options apply in age discrimination complaints, mixed case complaints, Equal Pay Act complaints, and claims where certain negotiated grievance procedures apply. In addition, procedures may be available through the Office of Special Counsel. As such, EEO Counselors must be familiar with these procedures and be able to identify such cases when the aggrieved person first seeks counseling. See Appendices D and E of this Management Directive.⁵

⁵ See Chapter 4, Section II, of this Management Directive, for additional guidance on the election process applicable to mixed case complaints.

C. Explain Statutes and Regulations

EEO Counselors must have a good working knowledge of the complaint processing regulations in Part 1614 and a sufficient familiarity with federal anti-discrimination statutes, regulations and Commission guidance that will enable them to identify bases and claims correctly. These statutes are:

1. [Title VII of the Civil Rights Act of 1964, as amended](#)

Title VII prohibits discrimination based on race, color, religion, sex, and national origin. It also prohibits reprisal or retaliation for participating in the discrimination complaint process or for opposing any employment practice that the individual reasonably and in good faith believes violates Title VII.

Title VII's prohibition against sex discrimination includes discrimination on the basis of pregnancy, sexual orientation and gender identity including transgender status.

A claim of discrimination based on sexual orientation is inherently a claim of sex discrimination. [Baldwin v. Dep't. of Transportation](#), EEOC Appeal No. 0120133080 (July 15, 2015). A claim of discrimination based on gender identity or transgender status is also a claim of sex discrimination. [Macy v. Dep't. of Justice](#), EEOC Appeal No. 0120120821 (Apr. 20, 2012). EEO Offices should therefore process such complaints under 29 C.F.R. Part 1614 as claims of sex discrimination, unless complainant specifically requests to use a different process. For additional information, see [Addressing Sexual Orientation and Gender Identity Discrimination in Federal Civilian Employment](#)

2. [Age Discrimination in Employment Act of 1967, as amended \(ADEA\)](#)

The ADEA prohibits discrimination in employment on the basis of age (40 years or older). It also prohibits retaliation against individuals exercising their rights under the statute. Unlike Title VII and the Rehabilitation Act, the ADEA allows persons claiming age discrimination to go directly to court, after giving the Commission 30 days' notice of the intent to file such an action, without utilizing an agency's administrative complaint procedures. If, however, an individual chooses to file an administrative complaint, s/he must exhaust administrative remedies before proceeding to court. As with Title VII complaints, a complainant exhausts administrative remedies 180 days after filing a formal complaint, if the

August, 2015**EEO MD-110**

agency has not taken a final action, or 180 days after filing an appeal with the Commission if the Commission has not issued a decision.

3. [Rehabilitation Act of 1973, as amended](#)

The Rehabilitation Act prohibits discrimination on the basis of mental and physical disabilities, as well as retaliation for exercising rights under the Act. The Rehabilitation Act requires that agencies make reasonable accommodations to the known physical or mental limitations of an applicant or qualified employee with a disability unless the agency can demonstrate that the accommodations would impose an undue hardship on the operation of its program. (Congress amended the Rehabilitation Act of 1973 in October 1992 to provide that the standards used to determine whether non-affirmative action employment discrimination has occurred shall be the standards applied under [Title I of the Americans with Disabilities Act](#). See § 503(b) of the Rehabilitation Act Amendments of 1992, Pub. L. No. 102-569, 106 Stat 4344 (Oct. 29, 1992); 29 U.S.C. § 791(g).) (Congress amended the Rehabilitation Act again when it issued the [Americans with Disabilities Act Amendments Act of 2008](#).) This statute broadly interprets the definition of disability by adding “major bodily functions” as a major life activity and by directing that the determination of whether an impairment substantially limits a major life activity should be determined based on the impairment’s effect in its active state (for impairments that are episodic or in remission) and should be determined without taking into account the ameliorative effects of mitigating measures, such as medication.

4. [Equal Pay Act of 1963 \(EPA\)](#)

The EPA prohibits sex-based wage discrimination. It prohibits federal agencies from paying employees of one sex lower wages than those of the opposite sex for performing substantially equal work. Substantially equal work means that the jobs require equal skills, effort, and responsibility, and that the jobs are performed under similar working conditions.⁶ The EPA also prohibits retaliation for exercising rights under the Act.

5. [Lilly Ledbetter Fair Pay Act of 2009](#)

⁶Sex-based claims of wage discrimination may also be raised under Title VII; individuals so aggrieved may thus claim violations of both statutes simultaneously. EPA complaints are processed under Part 1614. In the alternative, an EPA complainant may go directly to a court of competent jurisdiction on the EPA claim.

The [Lilly Ledbetter Fair Pay Act of 2009](#) amended Title VII of the Civil Rights Act of 1964 to provide that an individual subjected to compensation discrimination under Title VII, the Age Discrimination in Employment Act of 1967, or the Americans with Disabilities Act of 1990 may file a complaint within forty-five (45) days of any of the following:

- a. When a discriminatory compensation decision or other discriminatory practice affecting compensation is adopted;
- b. When the individual becomes subject to a discriminatory compensation decision or other discriminatory practice affecting compensation; or
- c. When the individual's compensation is affected by the application of a discriminatory compensation decision or other discriminatory practice, including each time the individual receives compensation that is based in whole or in part on such compensation decision or other practice.

The Act also has a retroactive effective date of May 28, 2007, and applies to all claims of discriminatory compensation pending on or after that date.

6. [Genetic Information Nondiscrimination Act of 2008 \(GINA\)](#)

GINA prohibits discrimination by federal agencies based on an individual's genetic information, which includes the results of genetic tests to determine whether the individual is at increased risk of acquiring a condition in the future, as well as an individual's family medical history. Specifically, the law prohibits the use of genetic information in making employment decisions, restricts the acquisition of genetic information by federal agencies, imposes strict confidentiality requirements, and prohibits retaliation against individuals who oppose actions made unlawful by GINA. The remedies available under GINA are the same as those available under Title VII and the Rehabilitation Act.

August, 2015**EEO MD-110**

7. [Commission Regulations, Guidelines, and Policy Directives](#)

The Commission has issued regulations that address the application of federal nondiscrimination law to the federal government. The regulations governing the processing of federal sector discrimination complaints are contained in Title 29 of the Code of Federal Regulations (C.F.R.), Part 1614. The regulations set out the EEO Counselor's obligations enumerated in Section II of this Chapter.

Other Commission regulations and guidelines address the substantive provisions of federal nondiscrimination law. For example, 29 C.F.R. Part 1630 sets forth Commission regulations applicable to the Rehabilitation Act. EEO Counselors should be familiar with Part 1630 in order to counsel individuals who present claims of disability discrimination.⁷ The Commission also has disseminated enforcement guidance on discrete issues and areas of nondiscrimination law, such as "[Enforcement Guidance: Vicarious Employer Liability for Unlawful Harassment by Supervisors](#)," issued June 18, 1999, and "[Revised Enforcement Guidance on Reasonable Accommodation and Undue Hardship under the Americans with Disabilities Act](#)," issued October 17, 2002. These documents and other Enforcement Guidance are available on the Commission's website at http://www.eeoc.gov/laws/guidance/enforcement_guidance.cfm in the Enforcement Guidance and Related Documents section.

⁷ The Commission has issued guidelines covering all of the substantive bases of prohibited discrimination. EEO Counselors should be familiar with 29 C.F.R. Part 1604 (Guidelines on Sex Discrimination) and Appendix to Part 1604 (Questions and Answers on the Pregnancy Discrimination Act); Part 1605 (Guidelines on Religious Discrimination); Part 1606 (Guidelines on National Origin Discrimination); Part 1620 (The Equal Pay Act); Part 1625 (the Age Discrimination in Employment Act); and Part 1635 (Guidelines on the Genetic Information Nondiscrimination Act).

V. THE LIMITED INQUIRY

Once the EEO Counselor has determined the basis(es) and claim(s) adhering to the guidance set forth below, s/he should conduct a limited inquiry. Prior to any resolution attempts, a limited inquiry should be conducted in all counseling. The purpose of the limited inquiry is to obtain information to determine jurisdictional questions if a formal complaint is filed and is performed regardless of whether the aggrieved person subsequently chooses EEO ADR. The limited inquiry also is used to obtain information for settlement purposes if the person chooses EEO counseling over EEO ADR, or does not have the right to choose between EEO counseling and EEO ADR, for example where the agency has specified in its written EEO ADR procedures that the matter is inappropriate for EEO ADR. For further information, see Chapter 3 Section III.C of this Management Directive.

While the scope of the inquiry will vary based on the complexity of the claims, the inquiry is intended to be limited and is not intended to substitute for the in-depth fact-finding required in the investigative stage of formal complaint process. The EEO Counselor must at all times control the inquiry. If the aggrieved person or agency personnel raise objections to the scope or nature of the inquiry, the EEO Counselor shall seek guidance and assistance from the EEO Director. If the EEO Counselor has problems with the inquiry, s/he should immediately notify the EEO Director.

Appendix B includes suggested methods for conducting the inquiry. This guidance may be used to supplement established procedures.

A. Determining the Claim(s)**1. Fragmentation**

The EEO Counselor plays a crucial role in the complaint process. As discussed in more detail in Chapter 5, Section III of this Management Directive, EEO Counselors must assist the aggrieved individual in articulating the claim so as to avoid fragmenting the claim. EEO Counselors must review the materials set forth in Section III of Chapter 5 and become familiar with the concept of fragmentation.

2. Identifying the claim(s)

At the initial interview, the EEO Counselor must determine what action(s) the agency has taken or is taking that causes the aggrieved person to believe s/he is the victim of discrimination. Before the EEO Counselor begins the inquiry, s/he must be certain that the claim(s) are clearly

August, 2015**EEO MD-110**

defined and the aggrieved person agrees with how the agency defines the claim(s). The EEO Counselor must also determine, based on his/her understanding of the claims, whether special procedures apply. For further information about special procedures, see Chapter 4 of this Management Directive.

If a claim is like or related to a previously filed complaint, then the complaint should be amended to include that claim when the agency can complete the development of an impartial and appropriate factual record within 360 days of when the original complaint was filed. If the claim is not like or related to a previously filed complaint, or where an impartial and appropriate record cannot be developed within 360 days of when the original complaint was filed, the claim should be processed as a separate complaint. Commission regulations require agencies to consolidate complaints for processing unless it is impossible to do so. See 29 C.F.R. § 1614.606. In a process set forth in Chapter 5, Section III.B of this Management Directive, a complainant shall be instructed to submit a letter to the agency's EEO Director or designee, describing the new incident(s) and stating that s/he wishes to amend his/her complaint to include the new incident(s). The EEO Director or designee shall review the request and determine the correct handling of the amendment in an expeditious manner.

B. Determining the Basis(es)

The aggrieved person must believe s/he has been discriminated against on the basis of race, color, sex (includes pregnancy, equal pay, gender identity, and sexual orientation) when discrimination based on, religion, national origin, age (40 and over), disability, genetic information, or in retaliation for having participated in activity protected by the various civil rights statutes. The EEO Counselor should determine if the aggrieved person believes that his/her problem is the result of discrimination on one or more of the bases.

C. When the Basis(es) Is Not Covered by the EEO Laws

If it is clear that the aggrieved person's problem does not involve a basis(es) set forth in the Commission's laws and regulations, the EEO Counselor should inform the aggrieved person and, if possible, provide him/her with the appropriate process for addressing the matter. If the aggrieved person insists that s/he wants to file a discrimination complaint, the EEO Counselor should conduct a final interview and issue the Notice of Right to File a Discrimination Complaint.

Management Directive
2-13

VA-18-0457-D-000140

4694

Under no circumstance should the EEO Counselor attempt to dissuade a person from filing a complaint.

VI. RESOLUTION

In almost all instances, informal resolution with an EEO Counselor, freely arrived at by all parties involved in the dispute, is the best outcome of a counseling action. In seeking resolution, the EEO Counselor must listen to and understand the viewpoint of both parties so that s/he is able to assist the parties in achieving resolution. The EEO Counselor's role is to facilitate resolution, not develop, or advocate specific terms of an agreement. The EEO Counselor must be careful not to inject his/her views on settlement negotiations.⁸

Appendix C includes suggested methods for seeking resolution. This guidance may be used to supplement established agency procedures.

A. Extension of Counseling for Resolution Efforts

When the aggrieved individual and an EEO Counselor engage in resolution efforts, they may decide that they need additional time to reach an agreement. If the aggrieved person consents, the EEO office may extend the counseling period an additional period up to but not exceeding 60 days. See 29 C.F.R. § 1614.105(e).

B. Resolution of the Dispute

If, during the course of the limited inquiry, the agency and the aggrieved person agree to an informal resolution of the dispute, the terms of the resolution must be reduced to writing, clearly identify the claims resolved, and be signed by both parties⁹ to help ensure they have the same understanding of the terms of the resolution. See 29 C.F.R. § 1614.603. The Commission recommends that the EEO Counselor, with the knowledge and guidance of the EEO Director, set forth the terms as agreed to by the parties (agency and the aggrieved individual) of the informal resolution in a settlement transmitted to the parties. The letter should

⁸ As noted in Appendix C, at point "B," the EEO Counselor acts as a neutral and not as an advocate for the aggrieved person or the agency. When the aggrieved person seeks advice from the EEO Counselor, the Counselor should remind him/her of the right to representation.

⁹ Please note that in the federal EEO process, the parties are the complainant and the agency. See [Bates v. Tennessee Valley Authority](#), 851 F.2d 1366, 1368 (11th Cir. 1988). The supervisor/manager who has been accused of discrimination is not a party to the EEO complaint, although he may be subject to other legal liability. Id.

August, 2015**EEO MD-110**

state clearly the terms of the informal resolution and should notify the aggrieved person of the procedures available under 29 C.F.R. § 1614.504, in the event that the agency fails to comply with the terms of the resolution. Other laws may provide requirements in settlement agreements, as for example, the [Older Worker's Benefit Protection Act of 1990](#). Appendix F in this Management Directive is a recommended format for the resolution settlement.

The EEO Counselor shall transmit a signed and dated copy of the settlement to the EEO Director. The EEO Director shall retain the copy for four years or until s/he is certain that, the agreement has been fully implemented.

C. Failure to Resolve the Dispute

The aggrieved person may not be satisfied with the agency's proposed resolution of the dispute, or the agency officials may not agree to the aggrieved person's suggestions. If informal resolution is not possible, the EEO Counselor must hold a final interview with the aggrieved person and issue the Notice of Right to File a Discrimination Complaint. No further counseling should occur.

VII. THE EEO ADR PROGRAM

A. The Choice of EEO Counseling or EEO ADR

At the initial counseling session the EEO Counselor will inquire whether the aggrieved is interested in trying to resolve the matter through the agency's EEO ADR program. If the aggrieved is interested, then within a reasonable time, the agency must decide whether to offer EEO ADR to the aggrieved person. When the agency offers EEO ADR in accordance with its EEO ADR policy/procedures, and the aggrieved agrees to participate, then the agency must provide an official with settlement authority for the EEO ADR process. See Chapter 3 of this Management Directive for more information about the EEO ADR process. If the agency offers EEO ADR, then the aggrieved person must be given a reasonable time to choose whether to pursue counseling or participate in EEO ADR. If the aggrieved person chooses to participate in EEO ADR, counseling activities must end. The EEO Counselor should resume the EEO process as specified in Section VII.B of this Chapter.

To participate in EEO ADR, the aggrieved person must sign the agency's Election Form, Agreement to Mediate, or other similar form. The EEO Counselor's Report should include the signed form.

Management Directive
2-15

VA-18-0457-D-000142

4696

Page 142 of 574

B. Role of the EEO Counselor during EEO ADR Process

When an aggrieved person chooses to participate in the EEO ADR process, the EEO Counselor cannot attempt to resolve the matter. Once the aggrieved person selects EEO ADR, the EEO Counselor must complete the intake functions of counseling (that is, obtaining the information needed to determine the basis(es), claim(s), timeliness, and desired redress) and refer the dispute for EEO ADR processing. Once those tasks are completed, the EEO Counselor should have no further involvement in resolving the matter until s/he learns the outcome of the EEO ADR process. The role of the EEO Counselor will vary depending on whether the parties successfully resolve the dispute during EEO ADR.

1. Successful EEO ADR Outcome

The EEO Counselor shall advise the aggrieved person that if the dispute is resolved during the EEO ADR process, the terms of the agreement must be in writing, clearly identify the claims resolved, and be signed by both parties. See 29 C.F.R. § 1614.603.

2. Unsuccessful EEO ADR/Aggrieved Withdraws from ADR

The EEO Counselor shall advise the aggrieved person that if EEO ADR does not resolve the dispute, or if the matter is not resolved within ninety (90) days from the initial contact with the EEO Counselor, the aggrieved person will receive a final interview and Notice of Right to File a Formal Complaint explaining how to file a formal complaint.

In addition, the EEO Counselor must prepare the EEO Counselor's Report and conduct the final interview. The report should state whether the parties attempted EEO ADR, but cannot reveal any other information about the EEO ADR attempt.

C. Completing the EEO ADR Process

If the agency offers EEO ADR in a particular case and the aggrieved person agrees to participate, the pre-complaint processing period shall be up to ninety (90) days. See 29 C.F.R. § 1614.105(f). Should the parties successfully resolve the dispute during the EEO ADR process, they must sign a written settlement agreement. See 29 C.F.R. § 1614.603. In addition, the EEO ADR program should notify the EEO Counselor of the settlement, and provide a copy of the document.

August, 2015**EEO MD-110**

If the dispute is not resolved within the 90-day period, the EEO ADR program will notify the EEO Counselor, who will issue the Notice of Right to File a Discrimination Complaint, required by 29 C.F.R. § 1614.105(d), as soon as possible, but not later than the 90th day after the individual initiates the EEO process or contacts the EEO office. See 29 C.F.R. § 1614.105(f).

VIII. FINAL INTERVIEW

During the final interview with the aggrieved person, the EEO Counselor should discuss what occurred during the EEO counseling process in terms of attempts at resolution. The EEO Counselor should provide the aggrieved with information to move the matter forward and answer any questions the aggrieved may have. The EEO Counselor must not indicate whether s/he believes the discrimination complaint has merit. Since EEO counseling inquiries are conducted informally and do not involve sworn testimony or extensive documentation, the EEO Counselor (1) cannot make findings on the claim of discrimination, and (2) should not imply to the aggrieved person that his/her interpretation of the claims of the case constitutes an official finding of the agency on the claim of discrimination. See Appendix G for a sample Notice of Right to File a Discrimination Complaint.

In addition, the EEO Counselor must provide the aggrieved person with the following information:

A. Right to Pursue the Claim through the Formal Process

If the dispute has not been resolved to the satisfaction of the aggrieved person, the EEO Counselor must tell the aggrieved person that s/he has the right to pursue the claim further through the formal complaint procedure. It is the aggrieved person, and not the EEO Counselor, who must decide whether to file a formal complaint of discrimination.

B. Requirements of the Formal Complaint

The EEO Counselor must inform the aggrieved person that the complaint:

1. Must be in writing;
2. Must be specific with regard to the claim(s) that the aggrieved person raised in EEO counseling and that the person wishes to pursue;

Management Directive
2-17

VA-18-0457-D-000144

4698

3. Must be signed by the complainant or complainant's attorney; and
4. Must be filed within **fifteen (15) calendar days** from the date s/he receives the Notice of Right to File a Discrimination Complaint. Written complaints filed by facsimile, electronic communication, hand delivery during business hours, U.S. mail (confirmation services recommended), or other third-party commercial carrier must meet the regulatory time frames. The date of the postmark, facsimile, electronic communication, hand delivery, delivery to a third-party commercial carrier or in person filing at the agency's EEO office is considered the date filed and must be within the requisite 15 days.

C. Time Frames to Complete the Final Interview

The EEO Counselor must conduct the final interview and issue the Notice of Right to File a Discrimination Complaint within 30 days of the date the aggrieved person brought the dispute to the EEO Counselor's attention. If, however, the aggrieved person consented to a written extension of time, the extension cannot exceed 60 days for counseling. If the aggrieved agreed to participate in EEO ADR, the counseling period may not exceed 90 days. If the dispute is not resolved at the end of the extended time period, the EEO Counselor must advise the aggrieved party in writing of his/her right to file a complaint.

The 30-day EEO counseling period (or as extended by agreement of the aggrieved party) commences when the aggrieved person (1) first initiates contact with any agency official logically connected with the EEO process and (2) exhibits an intent to begin the EEO process. The unavailability of an EEO Counselor to meet with the aggrieved person for a period of time after such initial contact does not toll the 30-day counseling period. Absent agreement from the aggrieved person to extend the time period, the EEO Counselor must conduct the final interview and issue the Notice of Right to File a Discrimination Complaint at the end of the 30-day period.

D. Name(s) of Person(s) Authorized to Receive Complaints

The EEO Counselor shall provide the aggrieved person with the names of persons authorized to receive complaints of discrimination. The EEO Counselor shall inform the aggrieved person (or his/her representative) that the complaint must be delivered to one of the authorized persons.

August, 2015**EEO MD-110****E. Loss of Confidentiality during Formal Process**

In accordance with 29 C.F.R. § 1614.105(b)(2)(g), the EEO Counselor should explain that unless the aggrieved authorizes or files a formal EEO complaint, the EEO Counselor will not reveal their identity. Once the complaint is filed, the complaint file, or part of it, may be shared only with those who are involved and need access to it. This includes the EEO Director, agency EEO officials, and possibly persons whom the aggrieved person has identified as being responsible for the actions that gave rise to the complaint. The complaint file is not a public document to be released outside the EEO complaint process. The identity of the aggrieved person does not remain confidential in the formal complaint process.

F. Written Notice of Right to File a Discrimination Complaint

After the final interview and not more than 30 days after the aggrieved contacted the EEO office, the written Notice of Right to File a Discrimination Complaint must be issued. The Notice must specify that an aggrieved person has **15 calendar days** after receipt of the notice of Right to File a Discrimination Complaint to file a formal complaint (including a class complaint).

The notice must also advise the aggrieved person of the appropriate official with whom to file a complaint and of complainant's duty to inform the agency immediately when the complainant retains counsel or a representative.

The EEO Counselor must advise the aggrieved individual of his/her duty to inform the agency of a change of address if s/he should move during the pendency of the EEO process and the possible consequences for not doing so.

IX. THE EEO COUNSELOR'S REPORT

When advised that an aggrieved person has filed a formal complaint, the EEO Counselor will submit a written report pursuant to 29 C.F.R. § 1614.105(c). The report will contain relevant information about the aggrieved person, jurisdiction, claims, bases, requested remedy, and the EEO Counselor's checklist, as specified in the sample EEO Counselor's Report. See Appendix H of this Management Directive. If the aggrieved person attempted to resolve the dispute via counseling or EEO ADR, the report should state that the aggrieved person chose either traditional EEO counseling or the EEO ADR program and that the dispute was not resolved through either procedure. However, the report should **not** provide a summary of the resolution attempts, nor any opinion as to whether discrimination occurred.

Management Directive
2-19

VA-18-0457-D-000146

4700

A. Time Limits

The EEO Counselor must submit to the office designated to accept formal complaints and to the aggrieved individual a copy of the EEO Counselor's Report. This must be done within **fifteen (15) days** after notification by the EEO Director or other appropriate official that a formal complaint has been filed. It is essential that the EEO Counselor maintain his/her record of counseling so that this regulatory time limit is met.

August, 2015**EEO MD-110****B. Contents of Report**

The report must include:

1. A precise description of the claim(s) and the basis(es) identified by the aggrieved individual;
2. Pertinent documents gathered during the inquiry, if any;
3. Specific information bearing on timeliness of the counseling contact;
4. An explanation for why the counseling process was untimely, if applicable; and
5. An indication as to whether an attempt was made to resolve the complaint.

The EEO Counselor should also retain a copy of the EEO Counselor's Report for availability in the event that the original EEO Counselor's Report, submitted to the office designated to accept formal complaints, is lost or misplaced. All notes, drafts and other records of counseling efforts will be maintained by the agency after counseling is completed for a period up to four years after resolution of the case.

Appendix H is a recommended format for an EEO Counselor's report.

C. Confidentiality of Negotiations for Resolution

In order to facilitate resolution attempts, all parties involved in resolution must be free to explore all avenues of relief. Offers and statements by parties made in response to resolution attempts by the EEO Counselor cannot be used against either party during the administrative EEO process if resolution attempts fail. The EEO Counselor will not report any discussions that occur during negotiations for resolution. For confidentiality of EEO ADR activities see Chapter 3, Section II.a.3 of this Management Directive.

X. COUNSELING CLASS ACTION COMPLAINTS

Occasionally, an EEO Counselor may need to provide EEO counseling to an aggrieved person or group of individuals who seek to represent a class of persons.¹⁰ A class is defined as a group of employees, former employees, or applicants who allege that they have been or are being adversely affected by an agency personnel policy or practice that discriminates against the group on the basis of their common race, color, religion, sex, national origin, age, genetic information, disability, or retaliation. See 29 C.F.R. §§ 1614.103(a) and 1614.204; see also Chapter 8 of this Management Directive for further guidance for class actions.

The aggrieved person(s) comes to the EEO Counselor as a class agent representing the group. A class inquiry must be brought to the attention of an EEO Counselor by a class agent **within forty-five (45) calendar days** of the date when the specific policy or practice adversely affected the class agent or, if a personnel action, within 45 days of the effective date of that action.

The EEO counseling requirements for class claims are the same as those for individual claims of discrimination, but the facts must be framed to meet the requirements of 29 C.F.R. § 1614.204.

It is strongly recommended that, if class allegations are raised or an individual approaches an EEO Counselor as a class agent for counseling, the EEO Counselor immediately contact the EEO Director, or designated person, for advice and guidance.

¹⁰ This need may arise in the course of counseling an individual where the EEO Counselor identifies allegations of class discrimination.

August, 2015

EEO MD-110

CHAPTER 3

ALTERNATIVE DISPUTE RESOLUTION FOR EEO MATTERS

I. INTRODUCTION

Statutes enforced by the Commission, regulations, and executive orders encourage, with very narrow, mission specific, exceptions, the use of Alternative Dispute Resolution (ADR) in resolving employment EEO disputes.¹ EEO ADR is a term used to describe a variety of approaches to resolving EEO disputes rather than traditional adjudicatory methods or adversarial methods. Examples of traditional adjudicatory methods include litigation, hearings, and agency administrative processing and appeals.

The Commission's regulations at 29 C.F.R. § 1614.102 (b)(2) require agencies to establish or make available an EEO ADR program. The EEO ADR program must be available during the pre-complaint process and the formal complaint process. The Commission regulations extend the counseling period when EEO ADR is used. See 29 C.F.R. § 1614.105(f). In the federal EEO process, the

“parties” are the agency and the aggrieved/complainant. See [Bates v. Tennessee Valley Authority](#), 851 F.2d 1366, 1368 (11th Cir. 1988). As such, the manager who was accused of discrimination does not qualify as a party because that person is not a statutorily proper defendant in the federal EEO process.

Accordingly, once the agency decides to offer EEO ADR, the accused manager has a duty to cooperate, like any witness, in the EEO ADR process, but may not be the agency official that has settlement authority.

Agencies and aggrieved individuals/complainants have realized many advantages from utilizing EEO ADR. EEO ADR offers the parties the opportunity for an early, informal resolution of disputes in a mutually satisfactory fashion. EEO ADR usually costs less and uses fewer resources than traditional administrative or adjudicative processes, particularly processes that include a hearing or litigation. Early resolution of disputes through EEO ADR can make agency resources available for mission-related programs and activities. The agency can avoid costs such as court reporters and expert witnesses. In addition, employee morale can be enhanced when agency management is viewed as open-minded and cooperative in seeking to resolve disputes through EEO ADR.

¹ Agencies may have additional responsibilities under the Alternative Dispute Resolution Act, 5 U.S.C. § 574. The EEOC does not have jurisdiction to enforce the ADRA on federal agencies.

The Commission will review an agency's program and its EEO ADR policies, upon request, for consistency with 29 C.F.R. Part 1614. For more information, please contact the Office of Federal Operations at (202) 663-4599 or OFO.EEOC@EEOC.GOV.

II. CORE PRINCIPLES OF EEO ADR

Agencies may be flexible in designing their EEO ADR programs to fit their environment and workforce, provided the programs conform to the core principles set forth below. However, the Commission believes that there are certain requirements that are absolutely necessary for the successful development of any EEO ADR program. The core principles include the concepts of fairness, flexibility, training, and evaluation. Discussed below are these concepts.

A. Fairness

Any program developed and implemented by an agency must be fair to the participants, both in perception and reality. Fairness should be manifested throughout the EEO ADR proceeding by providing, at a minimum: as much information about the EEO ADR proceeding to the parties as soon as possible; the right to be represented throughout the EEO ADR proceeding; and an opportunity to obtain legal or technical assistance during the proceeding to any party who is not represented. Fairness also requires the following elements:

1. Voluntariness

Parties must knowingly and voluntarily enter into an EEO ADR proceeding. An EEO ADR resolution can never be viewed as fair if it is involuntary. Nor can a dispute be actually and permanently resolved if the resolution is involuntary. Unless the parties have reached a resolution willingly and voluntarily, the dissatisfaction of one party could lead to conflicts within the workplace or even to charges that the resolution was coerced or reached under duress.

In addition, aggrieved parties should be assured that they are free to end the EEO ADR process at any time, and that they retain the right to proceed with the administrative EEO process if they prefer that process to EEO ADR and resolution has not been reached. Both parties should be reassured that no one can force a resolution on them, not agency management, EEO officials, or the third-party neutral. Finally, parties are more likely to approach a resolution voluntarily when they know of their right to representation at any time.

August, 2015EEO MD-110

Note: When the agency determines it to be appropriate to offer EEO ADR to an individual, there is no conflict with voluntariness when the agency requires the responsible management official to participate since s/he is not a party and is not the agency official with settlement authority. When the agency offers the individual EEO ADR and the individual agrees to participate, the parties have voluntarily entered into the EEO ADR process.

2. Neutrality

To be effective, an EEO ADR proceeding must be impartial and independent of any control by either party, in both perception and reality. Using a neutral third party as a facilitator or mediator ensures this impartiality. In this Management Directive a

“neutral” refers to a third party who has no stake in the outcome of the proceeding whose function is to assist the parties in resolving the matters at hand.

A neutral shall have no official, financial, or personal conflict of interest with respect to the issues in controversy, unless such interest is fully disclosed in writing to all parties and all parties agree that the neutral may serve. For example, s/he might be an employee of another federal agency who knows none of the parties and whose type of work differs from that of the parties. Or s/he may be an employee within the same agency as long as s/he can remain neutral regarding the outcome of the proceeding. The agency must ensure the independence and objectivity of the neutral at all times.

3. Confidentiality

Confidentiality is essential to the success of all EEO ADR proceedings. Congress recognized this fact by enhancing the confidentiality provisions contained in the [Administrative Dispute Resolution Act of 1996](#) (ADRA), specifically exempting qualifying dispute resolution communications from disclosure under the Freedom of Information Act. [See 5 U.S.C. § 574.](#) Parties who know that their EEO ADR statements and information are kept confidential will feel free to be frank and forthcoming during the proceeding, without fear that such information may later be used against them. To maintain that degree of confidentiality, there must be explicit limits placed on the dissemination of EEO ADR information. For implementation and reporting purposes, the details of a resolution can be

Management Directive

3-3

VA-18-0457-D-000152

4706

disseminated to specific offices only with a need to have that information. Neither the ADRA nor the Commission's core principles require the parties to agree that a settlement must be confidential.

Confidentiality must be maintained by the parties, by any agency employees involved in the EEO ADR proceeding and in the implementation of an EEO ADR resolution, and by any neutral third party involved in the proceeding. The Commission encourages agencies to issue clear, written policies protecting the confidentiality of what is said and done during an EEO ADR proceeding in accordance with 5 U.S.C. § 574.

4. Enforceability

Enforceability is a key principle upon which a successful EEO ADR program depends. Section 1614.504 of 29 C.F.R. provides that: "Any settlement agreement knowingly and voluntarily agreed to by the parties, reached at any stage of the complaint process, shall be binding on both parties." The regulation sets forth specific procedures for enforcing such a settlement agreement. Agreements resolving claims of employment discrimination reached through EEO ADR are enforceable through this procedure.

B. Flexibility

The EEO ADR program must be flexible enough to respond to the variety of situations individual agencies face. There is not necessarily one EEO ADR model which will work for all of an agency's programs, or all of its offices within the same program. Because agencies have different missions and cultures, they have flexibility in designing their EEO ADR programs. Agencies must also exercise flexibility in implementing the EEO ADR program. This flexibility will allow agencies to adapt to changing circumstances that could not have been anticipated or predicted at the time the program was initially implemented.

C. Training

An EEO ADR program, to be successful, will require that the agency at regular intervals provide appropriate training and education on EEO ADR to its employees, managers and supervisors, neutrals, and other persons protected under the applicable laws. See 29 C.F.R. § 1614.102(b)(3).

August, 2015**EEO MD-110**

In order to encourage the successful operation of EEO ADR throughout the agency, all managers and supervisors must receive EEO ADR training, either through an agency-conducted program or through an external source such as another federal agency or a private contractor. The EEO ADR training must include the following, at a minimum:

1. The [ADRA](#) and its amendments, with emphasis on the federal government's interest in encouraging mutual resolution of disputes and the benefits associated with utilizing ADR;
2. The Commission's regulations and Policy Guidance with respect to EEO ADR: 29 C.F.R. §§ 1614.102(b)(2), 1614.105(f), 1614.108(b), and 1614.603 (voluntary settlement attempts);
3. The operation of the EEO ADR method or methods that the agency employs;
4. Exposure to other EEO ADR methods, including interest-based mediation, if this method is not already in use by the agency; and
5. Drafting the settlement agreement, including the notice provision pursuant to 29 C.F.R. § 1614.504, where the aggrieved party believes the agency failed to comply with the terms of the settlement agreement and any other legally required notices.

D. Evaluation

An evaluation component is essential to developing and maintaining an effective EEO ADR program, and should be in place before an EEO ADR program is implemented. The evaluation will assist in determining whether the EEO ADR program has achieved its goals and will provide feedback on how the program might be made more efficient and achieve better results. Evaluations can range from analyzing the EEO ADR data on an annual basis to interviewing the EEO ADR participants about their experience in the process.

III. DEVELOPING AN EEO ADR PROGRAM

A. Written Procedures

The agency must establish written procedures detailing the operation of its EEO ADR program. The written procedures shall include, at a minimum, the following information:

1. The type or types of EEO ADR resources and techniques that the agency offers;
2. The stages of the EEO process at which EEO ADR will be offered and the appropriate agency official(s) who makes the determination to offer EEO ADR on behalf of the agency (note the responsible management official for the alleged discrimination is not the proper agency official for this decision);
3. The time frames involved in the administrative process and the EEO ADR process;
4. The source or sources of neutrals;
5. Those matters where EEO ADR is not available and the criteria the agency uses to determine when an issue is appropriate for ADR;
6. Assurance to the aggrieved party that EEO ADR is voluntary and that s/he may terminate the EEO ADR procedure at any time and return to the informal EEO process where they will be issued a Notice of Right to File a Formal Complaint or in the formal EEO process to the place where processing had ceased;
7. Assurance to the aggrieved party that its EEO ADR program is fair and that s/he has the right to representation;
8. An explanation to the aggrieved party with respect to confidentiality, neutrality, and enforceability; and
9. An assurance that the agency will make accessible an individual with settlement authority, and that no responsible management official or agency official directly involved in the case will serve as the person with settlement authority.

Management Directive

3-6

VA-18-0457-D-000155

4709

Page 155 of 574

August, 2015**EEO MD-110****B. EEO ADR throughout the EEO Process**

If a case is appropriate, agencies may offer EEO ADR at any stage of the EEO process. With that said, the Commission encourages agencies to resolve complaints of employment discrimination as early in the process as possible. See 29 C.F.R. § 1614.603.

1. EEO ADR during the Counseling Stage

Under 29 C.F.R. § 1614.102(b)(2), agencies must establish or make available an EEO ADR program during the pre-complaint process. Chapter 2 of this Management Directive provides additional guidance concerning the process of offering EEO ADR during counseling.

2. EEO ADR after the Complaint Is Filed

Under 29 C.F.R. § 1614.102(b)(2), agencies must establish or make available an EEO ADR program during the formal complaint process. The regulations also state: “Agencies are encouraged to incorporate alternative dispute resolution techniques into their investigative efforts in order to promote early resolution of complaints.” See 29 C.F.R. § 1614.108(b). As such, agencies must design their EEO ADR program to allow the parties to pursue EEO ADR techniques after various stages of the formal complaint processing period.

3. EEO ADR at the Hearing and Appellate Stages

The Commission encourages EEO ADR attempts by the Commission’s Administrative Judges prior to arranging a hearing. See Chapter 7 in this Management Directive. However, the parties may also pursue EEO ADR through the agency’s EEO ADR program. To do so, the parties must notify the hearing office prior to utilizing the agency’s EEO ADR program.

Similarly, EEO ADR may be beneficial at the appellate stage of the administrative process. At this stage, the parties should notify the Office of Federal Operations (OFO) of their interest in EEO ADR. They may utilize the agency’s EEO ADR program, or request a neutral from OFO.

C. Matters Inappropriate for EEO ADR

While the Commission contemplates that the majority of matters are appropriate for EEO ADR, the Commission recognizes that there are instances in which EEO ADR may not be appropriate or feasible. See [5 U.S.C. § 572\(b\)](#). Agencies may decline to offer EEO ADR for particular issues related to the agency's mission, such as security clearances, but not for broad issues such as promotions or performance evaluations. Agencies have discretion to determine whether a given dispute is appropriate for EEO ADR. However, agencies may not decline to offer EEO ADR to particular cases because of the bases involved (that is, race, color, religion, sex, national origin, age, disability, genetic information, or retaliation).

D. Dealing with Non-EEO Issues

Although the purpose of the EEO ADR program is to address disputes arising under statutes enforced by the Commission, the Commission has found that many workplace disputes brought to the process often include non-EEO issues. In designing their EEO ADR programs, agencies may provide sufficient latitude for the parties to raise and address both EEO and non-EEO issues (that is, issues that do not fall under the jurisdiction of EEO laws, statutes and regulations) in the resolution of their disputes. However, agencies are still responsible for any other statutory obligations they may have.

E. Choosing among EEO ADR Techniques

Agencies should carefully consider the needs of their workforce when selecting techniques and choose the technique or techniques that are most likely to result in the earliest successful resolution of workplace disputes.

The Commission does not mandate the use of a particular EEO ADR technique in an agency's EEO ADR program; however, the selected technique(s) must be used in a manner that is consistent with the core principles. Additionally, each agency's EEO ADR program shall make available to parties at a minimum one ADR technique which allows for the meaningful participation of all involved parties (such as mediation, facilitation, or settlement conferences). The EEO ADR program must not diminish an individual's right to pursue his/her claim under the 1614 process should EEO ADR not resolve the dispute. For example, an EEO ADR program may not require an individual to waive, as a prerequisite to participation, his/her right to an investigation, to a hearing, or to appeal the final decision to the Commission.

August, 2015**EEO MD-110****F. Time Frames of the EEO ADR Process**

An EEO ADR program must be designed around the time frames of the EEO regulations. For example, 29 C.F.R. § 1614.105(f) provides that if the parties agree to participate in the EEO ADR process, the pre-complaint processing period may be extended not to exceed ninety (90) days. This time frame must be met to be consistent with the regulation. If the dispute is not resolved in this time frame, the agency must advise the aggrieved person not later than the 90th day after the EEO Counselor contact of their right to file a formal complaint. However, resolution efforts may continue so long as the parties and the neutral agree.

Similarly, if an individual enters into an EEO ADR procedure after a formal complaint is filed, the time period for processing the complaint may be extended by agreement for not more than 90 days. If the dispute is not resolved, the complaint must be processed within the extended time period.

G. Representation of the Parties

Aggrieved persons have the right to representation throughout the complaint process, including during any EEO ADR process. While the purpose of EEO ADR is to allow the parties to fashion their own resolution to a dispute, it is important that any agency 'dispute resolution procedure' provide all parties the opportunity to bring a representative to the EEO ADR forum if they desire to do so. Note, EEO Officials are not eligible to represent aggrieved individuals/complainants in the EEO ADR process. See Chapter 1 Section VI of this Management Directive for more information.

H. Spin-Off Complaints

Nothing said or done during attempts to resolve the complaint through EEO ADR can be made the subject of an EEO complaint. Likewise, an agency's decision not to offer EEO ADR for a particular case, or an agency's failure to provide a neutral, cannot be made the subject of an EEO complaint.

I. Collective Bargaining Agreements and the Privacy Act

Agencies must be mindful of obligations they may have under collective bargaining agreements to discuss development of EEO ADR programs with representatives of appropriate bargaining units. Agencies must also be mindful of the prohibitions of disclosing information about individuals pursuant to the

Privacy Act. All pre- and post-complaint information is contained in a system of records subject to the Act. Unless the complaining party elects union representation or gives his/her written consent, such information, including the fact that a particular person has sought counseling or filed a complaint, cannot be disclosed to the union.

J. Recordkeeping

Pursuant to the Commission's authority set forth in 29 C.F.R. § 1614.602(a) to collect federal complaints processing data and pursuant to the agency's obligation to report EEO activity to the Commission, the Commission requires agencies to maintain a record of EEO ADR activity for annual reporting to the Commission no later than October 31 of each year. This information will be provided to the Commission on the Form 462.

K. Independent ADR Office

In this Management Directive

an “**Independent ADR Office**” refers to an office that functions independently of the traditional EEO Office. In addition to EEO disputes, an Independent ADR Office may attempt to informally resolve a variety of workplace concerns, such as, grievances, or general employee disagreements.²

The Commission encourages the implementation of an Independent ADR Office as a best practice. A primary advantage of an Independent ADR Office is that the agencies can resolve disputes that do not belong in the EEO process, which then permits the EEO staff to focus on the traditional EEO complaint process. While employees may go directly to the Independent ADR Office without first meeting with the EEO Counselor, an independent ADR office is not an office for the purpose of initiating the EEO process. As a result, during the first contact with an Independent ADR Office, the aggrieved individual must be informed of the need to contact an EEO Counselor and regulatory time frames, should they wish to protect their rights to take the matter through the traditional EEO process.

Where an agency permits ADR office employees to perform any collateral EEO duty (no matter how small or infrequent), the ADR office is no longer independent and therefore any contact by an aggrieved party with the ADR office staff will initiate the traditional EEO process, including EEO counseling and

² For more information, refer to the Commission's ADR report, entitled “[Part II – Best Practices in ADR \(FY 2003-FY 2004\)](#).”

August, 2015**EEO MD-110**

Form 462 reporting. The agency's ADR staff member must provide to the aggrieved person the same information EEO Counselors are required to provide to the aggrieved persons, meet all training requirements of an EEO Counselor, and fully carry out the EEO Counselor's roles and responsibilities. This includes providing the EEO Counselor's report to the EEO Office for issuance in a timely manner. The ninety (90) day pre-complaint processing period will begin from the first contact with the ADR office staff member. Furthermore, an EEO Counselor may not act as a neutral in a case where s/he has previously provided EEO counseling. (See Chapter 2, Section I.E of this Management Directive for guidance on the qualifications, roles, and responsibilities of an EEO Counselor).

IV. PROVIDING INFORMATION

Aggrieved persons need information about all aspects of EEO ADR in order to make an informed choice between EEO ADR and the traditional EEO complaint process. The information provided at the counseling stage largely determines whether aggrieved persons will utilize the EEO ADR process. As such, EEO ADR programs should ensure that aggrieved persons are informed of all of the various steps in the traditional EEO process before beginning the actual EEO ADR proceeding. The aggrieved persons should also learn about the benefits of resolving the EEO dispute through EEO ADR. Although an informed choice is necessary to conduct an EEO ADR proceeding, an additional value is that once aggrieved persons choose EEO ADR over other alternatives, they have made a commitment to its success.

A. Agencies Must Fully Inform Employees about the EEO Process

29 C.F.R. § 1614.105(b)(2), which covers pre-complaint processing, requires that the EEO Counselor advise the aggrieved person that s/he may choose between participation in the EEO ADR program offered by the agency and the traditional EEO counseling procedures. Before the aggrieved person makes a choice between counseling and EEO ADR, the EEO Counselor must fully inform the person about the stages of the EEO process. (See Chapter 2 of this Management Directive). The EEO Counselor also must also advise the aggrieved person about other appropriate statutory or regulatory forums, such as the Merit Systems Protection Board or a negotiated grievance process.

B. Providing Information about the EEO ADR Program

1. The EEO Counselor should provide the aggrieved person with information about the agency EEO ADR program, including, but not limited to, the following:
 - a. A definition of the term EEO “alternative dispute resolution (ADR)” – (the definitions in this Chapter can be used);
 - b. An explanation of the stages in the EEO process where EEO ADR is available;
 - c. A thorough description of the particular EEO ADR technique(s) used in the agency’s program;
 - d. A thorough description of how the program is consistent with the EEO ADR core principles in ensuring fairness (including the right to representation), which requires voluntariness, neutrality, confidentiality, and enforceability;
 - e. An explanation of procedural and substantive alternatives; and
 - f. Information regarding all of the time frames involved in the traditional EEO complaint process and the EEO ADR process.
2. Information about the agency’s EEO ADR program may be provided to the aggrieved person through discussions, memoranda, video presentations, booklets, or pamphlets. In addition, the Commission recommends that agencies issue an EEO ADR policy, which shows the agency head’s support of the EEO ADR program and encourages all employees to participate in the program.

C. Explaining the Benefits of EEO ADR

To encourage the aggrieved persons to consider participating in the EEO ADR program, they will need to understand the benefits of the EEO ADR process. The Commission recommends that the EEO ADR program prepare talking points to promote the use of EEO ADR. In particular, agencies could identify the following benefits of EEO ADR:

1. EEO ADR saves time and money, as litigation and adjudication generally costs more and can take years to reach a decision;
2. Settlement agreements do not require admissions of liability;

Management Directive
3-12

VA-18-0457-D-000161

4715

August, 2015**EEO MD-110**

3. The parties maintain considerable control over the EEO ADR process and will decide their own outcome;
4. Settlement agreements are more durable because there is buy-in from the parties;
5. EEO ADR can improve office morale and productivity by repairing the parties' relationship and avoiding the tension caused by the investigative process; and
6. Unlike decisions which are published, the terms of the settlement agreement are not routinely disclosed.

D. Informing the Employee about Filing Rights

Whether or not the aggrieved person chooses to participate in the agency's EEO ADR program, the EEO Counselor shall advise the aggrieved person of his/her rights and responsibilities in the EEO complaint process, as set forth in 29 C.F.R. § 1614.105(b).

E. Pre-EEO ADR Meeting

Once the matter is accepted into the EEO ADR program, either the neutral or a member of the EEO ADR office may hold a pre-EEO ADR meeting. The purpose of this meeting is to provide information about the EEO ADR proceeding and address preliminary matters. For example, the meeting could clarify the issues in dispute, determine the scope of authority among the participants, discuss the role of the representatives, and ask the parties to develop a list of the desired results that s/he would like to achieve through EEO ADR.

V. NEUTRALS

ADRA defines a neutral as "an individual who, with respect to an issue in controversy, functions specifically to aid the parties in resolving the controversy." [5 U.S.C. § 571\(9\)](#). The Act further states that a neutral is a:

permanent or temporary officer or employee of the Federal Government or any other individual who is acceptable to the parties to a dispute resolution proceeding. A neutral shall have no official, financial, or personal conflict

Management Directive
3-13

VA-18-0457-D-000162

4716

Page 162 of 574

of interest with respect to the issues in controversy, unless such interest is fully disclosed in writing to all parties and all parties agree that the neutral may serve.

[5 U.S.C. § 573 \(a\).](#)

A. Sources of Neutrals

EEO ADR proceedings are most successful where a neutral or impartial third party, with no vested interest in the outcome of a dispute, allows the parties themselves to attempt to resolve their dispute. An agency should also consider the aggrieved person's perception of the third party's impartiality in appointing a neutral for an EEO ADR proceeding. For the neutral to be effective, the participants in an EEO ADR program must perceive the neutral as completely impartial. The selection of neutrals must comply with the core principles of ADR articulated in Section II above.

An agency may use neutrals for its EEO ADR program, subject to their qualifications, from the following sources:

1. Other federal agencies/sub-components (through a federal neutral sharing program or other arrangement);
2. Private organizations, private contractors, bar associations, or individual volunteers; or
3. Within their own agency, provided that they are impartial and independent of any control by either party, in both perception and reality.

The Commission recommends that agencies disclose their source of neutrals to the parties. Many federal agencies offer external sources of neutrals. Federal Executive Boards (FEB) throughout the nation offer pools of neutrals who are available for federal agency EEO dispute resolution. Similarly, the Federal Mediation and Conciliation Service (FMCS) also provides neutrals throughout the country. Within the metropolitan Washington, D.C., area, the Department of Health and Human Services offers an interagency mediation program called the Sharing Neutrals Program. This program operates a pool of trained and experienced collateral-duty mediators who provide mediation services to agencies in exchange for like services to the program from the recipient agency. More information about these programs may be obtained online at the [Commission's federal sector ADR page](#).

In the event that an agency uses one of its own employees as a neutral, it must ensure the neutrality and impartiality of the neutral. If EEO Counselors and

August, 2015**EEO MD-110**

investigators are used as neutrals, the agency must ensure that they do not serve as a neutral in the same dispute in which they provided counseling or conducted an investigation. Furthermore, an agency may use EEO Counselors and investigators as neutrals if, and only if, they satisfy the minimum training requirements. Agencies should also be aware that having EEO Counselors and investigators switch roles between performing their traditional EEO duties and providing EEO ADR can be confusing to the aggrieved persons and to the EEO staff as to their role in a particular case. To avoid this confusion, agencies must clearly communicate to the aggrieved persons the function being performed by the agency employee, whether EEO counseling, investigating, or EEO ADR. To the extent possible, agencies are encouraged to designate individuals as EEO Counselors/Investigators or EEO ADR neutrals, and limit the switching of roles between the EEO and EEO ADR programs.

B. Qualifications of Neutrals

1. Training in ADR Theory and Techniques

Any person who serves as a neutral in an agency's EEO ADR program must have professional training in whatever dispute resolution technique(s) the agency utilizes in its program. The Commission will accept as sufficient such training as is generally recognized in the dispute resolution profession. For example, the Interagency Program on Sharing Neutrals administered by the Department of Health and Human Services requires the following expertise: 1) at least 20 hours of basic mediation skills training; 2) at least three co-mediations with a qualified mediator or five independent mediations and positive evaluations from a qualified trainer/evaluator; and 3) at least two references from two qualified mediators or trainer/evaluators.

2. Knowledge of EEO Law

Any person who serves as a neutral in an agency's EEO ADR program must be familiar with the following EEO laws and areas:

- a. The entire EEO process pursuant to 29 C.F.R. Part 1614, including time frames;
- b. The Civil Service Reform Act and the statutes that the Commission enforces (including Title VII of the Civil Rights Act of 1964, as amended, the Rehabilitation Act of 1973, as amended, the

Management Directive
3-15

VA-18-0457-D-000164

4718

Page 164 of 574

Americans with Disabilities Act Amendments Act of 2008, the Age Discrimination in Employment Act of 1967, as amended, the Equal Pay Act of 1963, as amended, and the Genetic Information Nondiscrimination Act of 2008);

- c. The theories of discrimination (for example, disparate treatment, adverse impact, harassment, and reasonable accommodation); and
- d. Remedies, including compensatory damages, costs, and attorney's fees.

C. Role of the Neutral

In any EEO ADR proceeding conducted under this Directive, the neutral is expected to be “neutral, honest, and to act in good faith.” The neutral must also act consistently with the ADRA and strive to ensure:

- 1. That EEO ADR proceedings are consistent with EEO law and Part 1614 regulations, including time frames;
- 2. That proceedings are fair and consistent with the core principles in this Chapter, particularly providing the parties the opportunity to be represented by any eligible person of his/her choosing throughout the proceeding (see Section III.G of this chapter for more information);
- 3. That an agency representative participating in EEO ADR has the authority and responsibility to negotiate in good faith and that a person with authority to approve or enter into a settlement agreement is accessible to the agency's representative;
- 4. That any agreement between the parties can be enforced, assist the parties in preparation of the written settlement agreement that includes the signatures of the appropriate agency representative and aggrieved person, and inform the parties of the review process the agency uses to ensure the terms of the agreement are enforceable;
- 5. Confidentiality, including destroying all written notes taken during the EEO ADR proceeding or in preparation for the proceeding; and
- 6. Neutrality, including having no conflict of interest with respect to the proceeding (for example, material or financial interest in the outcome, personal friend or co-worker of a party, supervisory official over a party),

August, 2015**EEO MD-110**

unless such interest is fully disclosed in writing to the parties and they agree that the neutral may serve.

D. Promoting Trust

Trust fosters the open and frank communication between the parties that is an essential factor in reaching a fair resolution of an EEO complaint. Once the individual has chosen EEO ADR to attempt resolution, the neutral can develop the parties' trust by:

1. Providing full information about the EEO ADR proceeding as soon as possible, including information on its impartiality, the relative merits of EEO ADR as compared with the traditional form of complaint processing, and the confidentiality of the EEO ADR process;
2. Giving the parties the opportunity to request and obtain relevant information from one another, so that they have sufficient information to make informed decisions; and
3. Explaining the safeguards that are in place to protect parties from pressures to resolve the complaint.

VI. ADR TECHNIQUES

Numerous ADR techniques are available for use by agencies in their programs. Each agency's EEO ADR program should strive to use those ADR techniques which are a best fit for their culture. While the Commission does not mandate that agencies offer any specific ADR techniques, agencies must at a minimum make available to parties one ADR technique which allows for the meaningful participation of all involved parties in the dispute. Mediation, facilitation, and settlement conferences are common ADR techniques which involve the participation of all parties to the dispute.

Techniques may be combined to provide advantageous aspects of more than one method. For example, an agency may provide coaching to one or more of the parties as a way of preparing parties for mediation. Or, an agency may provide coaching as one of the services after mediation. However, coaching alone would not be sufficient, as it does not allow for meaningful participation of all parties to the dispute. Agencies are not limited to using only one method or technique in their EEO ADR programs. They may find that using various methods in combination may also yield fruitful results and be very effective in reaching resolution. See the [Federal Workplace Conflict Management Desk Reference](#) at [ADR.gov](#) for a non-exhaustive list of ADR techniques.

Management Directive
3-17

VA-18-0457-D-000166

4720

Page 166 of 574

A. Mediation

In this Management Directive the term

“Mediation” refers to the process where a third-party neutral, who is not a decision maker, facilitates discussion between the parties to help them reach a mutually acceptable resolution.

In a mediation the neutral guides the process and determines when to meet with both parties in a joint session or individually, establishes a tone to help parties engage in meaningful discussion, and creates a safe environment for discussion.

B. Facilitation

Facilitation involves the use of techniques to improve the flow of information in a meeting between parties to a dispute. The techniques may also be applied to decision-making meetings where a specific outcome is desired (for example, resolution of a conflict or dispute). The term “facilitator” is often used interchangeably with the term “mediator,” but a facilitator does not typically become as involved as the mediator in the substantive issues. The facilitator focuses more on the communication processes involved in resolving a matter.

C. Settlement Conferences

In a settlement conference, disputing parties, their representatives, and a judge or referee hold a meeting designed to bring formal adversarial proceedings to a satisfactory close. The role of a settlement judge is similar to that of a mediator in that s/he assists the parties procedurally in negotiating an agreement.

VII. RESOLUTIONS MUST BE IN WRITING

If the agency and the aggrieved person agree to a resolution of the matter, the Commission regulations require that the terms of the resolution be in writing and signed by both parties to verify they have the same understanding of the terms of the resolution. See 29 C.F.R. § 1614.603; Chapter 12 of this Directive. The written agreement must state clearly the terms of the resolution and contain the procedures available under 29 C.F.R. § 1614.504, in the event that the agency fails to comply with the terms of the resolution. Written agreements must comply with [EEOC’s Enforcement Guidance on Non-Waivable Employee Rights under Enforced Statutes](#), wherein the Commission sets forth its position that:

Management Directive
3-18

VA-18-0457-D-000167

4721

August, 2015**EEO MD-110**

“an agency may not interfere with the protected right of employees to file a complaint or participate in any manner in an investigation, hearing, or proceeding under the laws enforced by the Commission.”

Additionally, any written agreement settling a claim under the Age Discrimination in Employment Act (ADEA) must also comply with the requirements of the Older Workers Benefit Protection Act of 1990 (OWBPA) Pub. L. No. 101- 433 (1990), the [ADEA, 29 U.S.C. § 626\(f\)](#), and the Commission’s regulations regarding Waiver of Rights and Claims under the ADEA at 29 C.F.R. Part 1625. Neither the ADRA nor the Commission’s core principles require the parties to agree that a settlement must be confidential.

The agency representative shall transmit a signed and dated copy of the resolution to the EEO Director. The EEO Director shall retain the copy in accordance with the appropriate National Archives and Records Administration schedules.

CHAPTER 4

PROCEDURES FOR RELATED PROCESSES

I. INTRODUCTION

As noted in Chapter 2, Section IV.B and Appendix D of this Management Directive, different procedures apply to certain related processes. The relationship between 29 C.F.R. Part 1614 EEO complaints, Merit Systems Protection Board (MSPB) actions, grievances filed pursuant to negotiated grievance procedures, notices of intent to sue in Age Discrimination in Employment Act (ADEA) complaints, and the alternative available in Equal Pay Act (EPA) complaints are set out more specifically here. All time frames in this Chapter are expressed in calendar days.

II. MIXED CASE COMPLAINTS AND APPEALS - 29 C.F.R. § 1614.302

A. Definitions

A “mixed case complaint” is a complaint of employment discrimination filed with a federal agency based on race, color, religion, sex, national origin, age, disability, genetic information, or reprisal related to or stemming from an action that may be appealed to the MSPB. The complaint may contain only a claim of employment discrimination or it may contain additional non-discrimination claims that the MSPB has jurisdiction to address. A “mixed case appeal” is an appeal filed directly with the MSPB that alleges that an appealable agency action was effected, in whole or in part, because of discrimination on the basis of race, color, religion, sex, national origin, disability, age, genetic information, or reprisal. There is no right to a hearing before a Commission Administrative Judge on a mixed case complaint.

B. Procedures

The Commission regulations provide for processing discrimination complaints on claims that are otherwise appealable to the MSPB. Two determinations must be made to decide if the mixed case regulations apply. First, the employee must have standing to file such an appeal with the MSPB. Second, the claim that forms the basis of the discrimination complaint must be appealable to the MSPB. For information on who can file and the actions that can be appealed to the MSPB see 5 C.F.R. § 1201.3. Note that because the MSPB does not have jurisdiction to hear non-appealable matters, complaints not containing those matters should be

Management Directive
4-1

VA-18-0457-D-000170

4724

Page 170 of 574

processed by the agency under the 1614 process and not mixed with matters that are appealable to the MSPB through amendment, consolidation or held in abeyance. See [Complainant v. Inter-American Foundation](#), EEOC Appeal No. 0120132968, (Jan. 8, 2014) (wherein the Commission essentially overturned the doctrine of inextricably intertwined). We note, however, that a proposed action merges with the decision on an appealable matter - for example, a proposed removal merges into the decision to remove. See [Wilson v. Dep't. of Veterans Affairs](#), EEOC Appeal No. 0120122103 (September 10, 2012).

1. Election to Proceed Is Required

- a. The regulations provide that a covered individual may raise claims of discrimination in a mixed case either as a direct appeal to the MSPB or as a mixed case EEO complaint with the agency, but not both. 29 C.F.R. § 1614.302(b).
- b. Whatever action the individual files first is considered an election to proceed in that forum. 29 C.F.R. § 1614.302(b). Filing a formal EEO complaint constitutes an election to proceed in the EEO forum. Contacting an EEO Counselor or receiving EEO counseling does not constitute an election.
- c. Where an aggrieved person files an MSPB appeal and timely seeks counseling, counseling may continue pursuant to 29 C.F.R. § 1614.105, at the option of the parties. In any case, counseling must be terminated with notice of rights pursuant to 29 C.F.R. §§ 1614.105(d), (e), or (f).

2. Procedures for Handling Dual Filing

- a. Where the agency does not dispute MSPB jurisdiction
 - (1) If an individual files a mixed case appeal with the MSPB before filing a mixed case complaint with the agency, and the agency does not dispute MSPB jurisdiction, the agency must thereafter dismiss any complaint on the same claim, regardless of whether the claims of discrimination are raised in the appeal to the MSPB.¹

¹ A Commission Administrative Judge may dismiss the mixed case complaint pursuant to 29 C.F.R. § 1614.109(b).

August, 2015**EEO MD-110**

- (2) The agency or the Commission's Administrative Judge must advise the complainant that s/he must bring the claims of discrimination contained in the dismissed complaint to the attention of the MSPB, pursuant to 5 C.F.R. § 1201.151, et seq.
- (3) Where an agency has not accepted a complaint for processing, that is, has disposed of the complaint on procedural grounds, the resulting final agency decision is appealable to the Commission. 29 C.F.R. § 1614.302(c)(1); [Abegglen v. Dep't. of Energy](#), EEOC Appeal No. 01966055 (Oct. 9, 1998).

b. Where the agency or the MSPB Administrative Judge questions MSPB jurisdiction

The agency shall hold the mixed case complaint in abeyance until the MSPB Administrative Judge rules on the jurisdictional issue, notify the complainant that it is doing so, and instruct him/her to bring the discrimination claim to the attention of the MSPB. During this period, all time limitations for processing or filing the complaint will be tolled. An agency decision to hold a mixed case complaint in abeyance is not appealable to the Commission. If the MSPB Administrative Judge finds that MSPB has jurisdiction over the claim, the agency shall dismiss the mixed case complaint and advise the complainant of the right to petition the Commission to review the MSPB's final decision on the discrimination issue. If the MSPB Administrative Judge finds that the MSPB does not have jurisdiction over the claim, the agency shall recommence processing of the mixed case complaint as a non-mixed case EEO complaint.

c. Where a complainant files with the agency first

If an employee first files a mixed case complaint at the agency and then files a mixed case appeal with the MSPB, the agency should advise the MSPB of the prior agency filing and request that the MSPB dismiss the appeal without prejudice.

3. Processing Where MSPB Dismisses a Mixed Case Appeal Because It Finds No Jurisdiction (That Is, the Case Is Not Mixed)

- a. If an individual files a mixed case appeal with the MSPB instead of a mixed case complaint, and the MSPB subsequently dismisses the appeal as non-jurisdictional, the agency must inform the individual that s/he may contact an EEO Counselor within forty-five (45) days to raise the discrimination claim(s) and that the filing date of the mixed case appeal will be deemed to be the date the individual initially contacted the EEO Counselor.
- b. If the individual filed the appeal after the agency issued an agency final decision on the mixed case complaint or after the agency failed to issue a final decision on the mixed case complaint within 120 days, (pursuant to 5 C.F.R. § 1201.154(b)(2)), the agency must provide the complainant with a thirty (30) day notice of right to a hearing and decision from a Commission Administrative Judge or an immediate final decision by the agency pursuant to 29 C.F.R. § 1614.108(f) and thereafter proceed as in a non-mixed case.

4. Processing Mixed Case Complaints Filed at the Agency

If an employee elects to file a mixed case complaint, the agency must process the complaint in the same manner as it would any other discrimination complaint, except:

- a. Upon completion of the investigation, the agency must notify the complainant that a final decision will be issued within forty-five (45) days without a hearing before a Commission Administrative Judge.
- b. Upon the filing of a complaint, the agency must advise the complainant that if a final decision is not issued within 120 days of the date of filing the mixed case complaint, the complainant may appeal the claim to the MSPB at any time thereafter, as specified in 5 C.F.R. §§ 1201.154(a) & (b), or may file a civil action as specified in 29 C.F.R. § 1614.310(g), but not both.
- c. Also upon the filing of a complaint, the agency must notify the complainant that if s/he is dissatisfied with the agency's final decision on the mixed case complaint, s/he may appeal the claim to the MSPB (not the Commission) within thirty (30) days of receipt of the agency's final decision pursuant to 5 C.F.R. § 1201.154(a).

Management Directive

4-4

VA-18-0457-D-000173

4727

August, 2015**EEO MD-110**

- d. Within forty-five (45) days following completion of the investigation, the agency must issue a final decision without a hearing before a Commission Administrative Judge. 29 C.F.R. § 1614.302(d)(2).
- e. Upon issuance of the agency's final decision on a mixed case complaint, the agency must advise the complainant of the right to appeal the claim to the MSPB (not the Commission) within 30 days of receipt of the notice and of the right to file a civil action as provided in 29 C.F.R. §§ 1614.310 and 1614.310(a).

III. NEGOTIATED GRIEVANCE PROCEDURES - 29 C.F.R. § 1614.301

A. Where Agency Is Covered by [5 U.S.C. § 7121\(d\)](#)

1. When an aggrieved employee is covered by a collective bargaining agreement that permits claims of discrimination to be raised in a negotiated grievance procedure, the employee must elect to file an EEO complaint or a grievance. The underlying principle is that an aggrieved employee who has a choice of forums in which to proceed cannot go forward in more than one forum (unless the employing agency is exempt from coverage of [5 U.S.C. § 7121\(d\)](#)). This is true "irrespective of whether the agency has informed the individual of the need to elect or of whether the grievance has raised an issue of discrimination." 29 C.F.R. § 1614.301(a).
2. If an employee first files a grievance and thereafter files a complaint of discrimination on the same claim, the complaint must be dismissed without prejudice to the complainant's right to proceed through the negotiated grievance procedure, including the right to appeal to the Commission from a final decision as provided in subpart D of Part 1614 (Appeals and Civil Actions). The dismissal of the complaint must advise the complainant of the obligation to raise discrimination claims in the grievance process and of the right to appeal the final grievance decision to the Commission. 29 C.F.R. § 1614.301(a).

B. Where Agency Is Not Covered by [5 U.S.C. § 7121\(d\)](#)

1. The U.S. Postal Service and the Tennessee Valley Authority are examples of two agencies not covered by [5 U.S.C. § 7121\(d\)](#). In such agencies, an aggrieved individual may file a complaint pursuant to Part 1614 and also a grievance pursuant to a collective bargaining agreement involving the same claim.
2. In such agencies, complaints filed pursuant to Part 1614 may be held in abeyance where a grievance is filed on the same claim, if written notice of the abeyance is provided.
3. Complaints may be held in abeyance until a final decision is issued on the grievance.

C. Administrative Grievance Process

There is nothing that prevents an employee from using an agency's administrative process, as opposed to a negotiated grievance process, and the EEO complaint process. See [Diefenderfer v. Dep't. of Transportation](#), EEOC Appeal No. 01980578, (Oct. 7, 1998). However, the Commission has consistently held that utilization of agency procedures, union grievances, and other remedial processes does not toll the time limit for contacting an EEO Counselor. See [Black v. Dep't. of the Interior](#), EEOC Appeal No. 0120110122 (Aug. 19, 2011).

IV. AGE DISCRIMINATION COMPLAINTS

It is incumbent upon federal agency personnel responsible for processing discrimination complaints to inform complainants or potential complainants of the following procedures available to them in pursuing an age discrimination complaint.

A. Election of Administrative Process

An aggrieved person may file an administrative age discrimination complaint with the agency pursuant to 29 C.F.R. Part 1614. If the aggrieved person elects to file an administrative complaint, s/he must exhaust administrative remedies before s/he may file a civil action in U.S. District Court. Exhaustion of administrative remedies occurs when the agency takes final action or 180 days after filing the complaint if no final action is taken. See 29 C.F.R. § 1614.201; see also Chapter 9, Sections II and III of this Management Directive.

August, 2015**EEO MD-110****B. Aggrieved May Bypass Administrative Process**

Alternatively, an aggrieved person may bypass the administrative complaint process, and file a civil action directly in U.S. District Court provided that the aggrieved person first provides the Commission with a written notice of intent to sue under the ADEA. The notice to the Commission must be filed within 180 days of the date of the alleged discriminatory action. Once a timely notice of intent to sue is filed with the Commission, the aggrieved person must wait at least thirty (30) days before filing a civil action.

C. Responsibilities Regarding Notices of Intent to Sue

The following is a statement of the procedures and a delineation of the responsibilities on the part of the aggrieved person, the Commission, and the agency with respect to the filing and processing of notices of intent to sue under the ADEA.

1. The Aggrieved Person

It is the responsibility of the aggrieved person to provide the Commission with a written notice of intent to sue within 180 days of the date of the alleged discriminatory action.

- a. Notices of intent to sue must be delivered to the Commission in one of the following ways:

hand delivered to:

Equal Employment Opportunity Commission
Office of Federal Operations
Federal Sector Programs
131 M Street, NE
Washington, DC 20507

or mailed to:

Equal Employment Opportunity Commission
Office of Federal Operations
Federal Sector Programs
P.O. Box 77960

Management Directive
4-7

VA-18-0457-D-000176

4730

Washington, DC 20013

or may soon be submitted through the Commission's electronic document submission portal or fax at (202) 663-7022.

- b. The notice of intent to sue should be dated and must contain the following information:
- (1) statement of intent to file a civil action under Section 15(d) of the Age Discrimination in Employment Act of 1967, as amended;
 - (2) name, address, and telephone number of the employee or applicant;
 - (3) name, address, and telephone number of the complainant's designated representative, if any;
 - (4) name and location of the federal agency or installation where the alleged discriminatory action occurred;
 - (5) date on which the alleged discriminatory action occurred;
 - (6) statement of the nature of the alleged discriminatory action(s); and
 - (7) signature of the complainant or the complainant's representative.

2. The Commission

- a. Upon receipt of a notice of intent to sue, the Commission will promptly notify the concerned agency (and all persons named in the notice as prospective defendants in the action, if any), in writing, of its receipt of the notice of intent to sue and will provide the agency with a copy of the notice. Commission contact with the concerned agency will normally be through the agency-headquarters-level Office of Equal Employment Opportunity or similarly designated office, as the case may be. A copy of the Commission's notification will be provided to the aggrieved person and/or his/her representative, if any. Additionally, the Commission will take any appropriate action to ensure the elimination of any unlawful practice.

Management Directive
4-8

VA-18-0457-D-000177

4731

August, 2015**EEO MD-110**

- b. Where an aggrieved person files a civil action before the agency has completed its inquiry, or before the Commission has reviewed the agency's disposition, the Commission will terminate the inquiry and will take no further action on the notice of intent to sue.

3. The Agency

Upon receipt of a notice of intent to sue, an agency must review the claim(s) of age discrimination and conduct an inquiry sufficient to determine whether there is evidence that unlawful age discrimination has occurred. Agencies may determine their method of review/inquiry and the method may vary depending on the scope and complexity of the claims. Agencies are encouraged to make good faith efforts to resolve disputes.

V. EQUAL PAY ACT COMPLAINTS

An aggrieved individual does not have to file an administrative complaint before filing a lawsuit under the Equal Pay Act (EPA). If an aggrieved individual nonetheless wants to file an administrative complaint, it will be processed like Title VII complaints under Part 1614. Complainants in EPA cases should be notified of the statute of limitations (two years or, if a willful violation is alleged, three years), which applies even if the individual files an administrative complaint, and of the right to file directly in a court of competent jurisdiction without first providing notice to the Commission or exhausting administrative remedies.

CHAPTER 5

AGENCY PROCESSING OF FORMAL COMPLAINTS

I. AGENCY SHALL ACKNOWLEDGE FORMAL COMPLAINT

Immediately upon receipt of a formal complaint of discrimination, the agency shall acknowledge receipt of the complaint in writing. The acknowledgment letter shall inform the complainant of the date on which the complaint was filed. If the complaint is mailed, the date of filing is the postmark date, not the date the agency received the complaint. Where the matter is appropriate for ADR, the agency may include a notice to that effect in its acknowledgment letter.

Commission regulations require that an EEO Counselor provide **both** the agency office designated to accept complaints and the complainant with a written report within fifteen (15) days of being advised that the complainant has filed a formal EEO complaint. 29 C.F.R. § 1614.105(c). Agencies thus should immediately notify the EEO Counselor that a complainant has filed a complaint so as to expedite the preparation and delivery of the written report.

Within a reasonable time after receipt of the written EEO Counselor report, the agency should send the complainant a second letter (commonly referred to as an "acceptance" letter), stating the claim(s) asserted and to be investigated. If the second letter's statement of the claim(s) asserted and claim(s) for investigation differs, the letter further shall explain the reasons for the difference, including whether the agency is dismissing a portion of the complaint. The agency shall advise the complainant that s/he may submit a statement to the agency concerning the agency's articulation of the claim, which shall become a part of the complaint file. (Dismissals are governed by 29 C.F.R. § 1614.107(a). Additional dismissal guidance is provided in Section IV of this Chapter of the Management Directive.) The agency shall notify the complainant of a partial dismissal by letter and further inform the complainant that there is no immediate right to appeal the partial dismissal. The agency should advise the complainant that the partial dismissal shall be reviewed either by a Commission Administrative Judge, if the complainant requests a hearing before an Administrative Judge, or by the Commission, if the complainant files an appeal of a final agency action or final agency decision. (See Section IV.C below for further discussion on the requirements of a partial dismissal.)

Unless the complainant states otherwise, copies of the acknowledgment and all subsequent actions on the complaint shall be mailed or delivered to the complainant's representative with a copy to the complainant.

II. THE AGENCY SHALL ALSO PROVIDE OTHER INFORMATION AND NOTICE OF RIGHTS

A. Agency Shall Inform the Complainant of the Agency's Obligations

1. To Investigate in a Timely Manner

The agency is required to investigate the complaint in a timely manner. The investigation must be appropriate, impartial, and completed within **180 days** of filing the complaint (as described more fully in Section V.D and in Chapter 6 of this Directive), or within the time period contained in an order from the Office of Federal Operations on an appeal from a dismissal pursuant to 29 C.F.R. § 1614.107(a). The EEO Director or designee and the complainant may agree in writing, consistent with 29 C.F.R. § 1614.108(e), to an extension of not more than **ninety (90) days**; or within the period of time set forth in 29 C.F.R. §§ 1614.108(e) or 1614.606 if there are multiple complainants with similar allegations of discrimination or complainant has filed multiple complaints which the agency has consolidated. If the agency fails to complete the investigation in 180 days, it shall issue written notice to complainant informing the complainant that it was unable to complete the investigation, the estimated date of completion, and complainant's right to file a civil action or request a hearing. See 29 C.F.R. § 1614.108(g). See Appendix K for a sample notice letter.

Agencies are required to complete investigations within the earlier of 180 days after the filing of the last complaint or 360 days after the filing of the original complaint. Regardless of amendment or consolidation of complaints, the investigation shall be complete in not more than 360 days, unless there is a written extension of not more than 90 days.

For example, if a complainant amends a complaint or files another complaint, the agency will consolidate on day 179 of the originally filed complaint, and then the investigation must be complete by the 359th day.

If the complainant wants to add another amendment on the 358th day of the investigation, the agency will have only 2 days to investigate that amendment unless the complainant agrees in writing to an extension of not more than 90 days. When no written extension exists and the agency is unable to conduct an impartial and appropriate investigation in 2 days it should not consolidate or accept the amendment rather; the agency should advise the complainant to seek counseling on the newest matter and process it as a new complaint.

Management Directive

5-2

VA-18-0457-D-000181

4735

Page 181 of 574

An investigation is deemed completed when the report of the investigation is served on the complainant in conjunction with the notice of the right to elect either a hearing before a Commission Administrative Judge or a final decision from the agency pursuant to 29 C.F.R. § 1614.108(f).

2. To Process Mixed Cases Timely

The Commission deems a mixed case complaint timely investigated in the same manner and applying the same time limitations as non-mixed cases. However, if a final decision is not issued on the mixed case complaint within **120 days** of filing, the complainant may appeal to the Merit Systems Protection Board (MSPB) at any time thereafter pursuant to MSPB regulation 5 C.F.R. § 1201.154(a) or may file a civil action as provided in 29 C.F.R. § 1614.310(g), but not both. See 29 C.F.R. § 1614.302(d)(1). The complainant is not entitled to a hearing before the Commission on a mixed case. See more instructions for processing these cases in Chapter 4 Section II.

3. Unilateral Extension for Sanitizing Classified Information

After providing notice to the complainant, the agency may unilaterally extend the time period or any period of extension for no more than thirty (30) days where it must sanitize a complaint file that may contain information classified pursuant to [Executive Order 12356](#) or successor orders as secret in the interest of national defense or foreign policy. 29 C.F.R. § 1614.108(e).

B. Agency Shall Inform Complainant of His/Her Rights

The agency shall provide every complainant in writing notice of all rights and responsibilities enumerated in Chapters 2, 3, and 4 of this Management Directive. This includes:

1. The Right to Request a Hearing

Except in mixed cases, the complainant has the right to request a hearing before a Commission Administrative Judge after **180 calendar days** from the filing of a formal complaint or after completion of the investigation, whichever comes first. 29 C.F.R. § 1614.106(e)(2). Complainants must request a hearing directly from the Commission's field office that has jurisdiction over the geographic area in which the complaint arose, as set forth in Appendix N of this Management Directive. See 29 C.F.R.

§ 1614.108(g). In an agency's written acknowledgment of receipt of a complaint or an amendment to a complaint, the agency shall advise the complainant of the Commission's office and address where a hearing request is to be sent as well as the agency office to which the copy of the request should be sent. The complainant shall certify to the Administrative Judge that s/he sent a copy of the request to the agency EEO office to the attention of the individual and at the address that the agency previously informed the complainant.

2. **The Right to Appeal**

The complainant has the right to appeal a dismissal, final action, or decision. Partial dismissals are not immediately appealable. See 29 C.F.R. §§ 1614.107(b) and 1614.401, and, Section IV.C of this Chapter for further guidance.

- a. Agencies shall inform the complainant that s/he may appeal within **thirty (30) days** of receipt of the dismissal, final action, or decision. Appeals may be mailed to:

Equal Employment Opportunity Commission
Office of Federal Operations
P.O. Box 77960
Washington D C 20013

or hand delivered to:

Equal Employment Opportunity Commission
Office of Federal Operations
Appellate Review Programs
131 M Street NE. Suite 5SW12G
Washington, DC 20507

or may be submitted through the Commission's electronic document submission portal or by fax at (202) 663-7022.

- b. Agencies shall provide the information at 29 C.F.R. § 1614.403 (a)-(f) (use of appeal form EEOC Form 573, Notice of Appeal/Petition (a copy of which is appended hereto as Appendix P); content of petition; service of copies on agency EEO Director; certification of delivery; and opposition brief schedule).
- c. With regard to a mixed case, if the complainant is dissatisfied with the agency's final decision on the mixed case complaint, the

Management Directive
5-4

VA-18-0457-D-000183

4737

complainant may appeal the matter to the MSPB, not the Commission, within 30 days of receipt of the agency's final decision.

3. **The Right to File a Civil Action**

The complainant has the right to file a civil action in a U.S. District Court on EEO discrimination claims raised in the administrative process:

- a. Within **ninety (90) days** of receipt of a final action on an individual or class complaint if no appeal has been filed;
 - b. After **180 days** from the date of filing an individual or class complaint if an appeal has not been filed and a final action has not been taken;
 - c. Within **90 days** of receipt of the Commission's final decision on appeal; or
 - d. After **180 days** from the date of the filing of an appeal with the Commission if there has been no final decision by the Commission.
4. See Appendix C of this Management Directive, which sets forth a detailed list of a complainant's rights about which the agency must advise the complainant.

III. **AGENCIES MUST AVOID FRAGMENTING EEO COMPLAINTS**

The fragmentation, or breaking up, of a complainant's legal claim during EEO complaint processing has been a significant problem in the federal sector. For complainants, fragmented processing can compromise their ability to present an integrated and coherent claim of an unlawful employment practice for which there is a remedy under the federal equal employment statutes. For agencies and the Commission, fragmented processing substantially increases case inventories and workloads when it results in the processing of related matters as separate complaints.¹

The fragmentation of EEO claims must be prevented at all levels of the complaint process, including pre-complaint EEO counseling. This section is designed to promote

¹ See [Cobb v. Dep't. of the Treasury](#), EEOC Request No. 05970077 (Mar. 13, 1997); [Toole v. Equal Employment Opportunity Commission](#), EEOC Appeal No. 01964702 (May 22, 1997).

understanding of the concept of fragmentation and to provide guidance on avoiding fragmented complaint processing.

Note that because the MSPB does not have jurisdiction to hear non-appealable matters, complaints not containing those matters should be processed by the agency under the 1614 process and not mixed with matters that are appealable to the MSPB through amendment, consolidation or held in abeyance. See [Complainant v. Inter-American Foundation](#), EEOC Appeal No. 0120132968, (Jan. 8, 2014) (wherein the Commission essentially overturned the doctrine of inextricably intertwined). We note, however, that a proposed action merges with the decision on an appealable matter - for example, a proposed removal merges into the decision to remove. See [Wilson v. Dep't. of Veterans Affairs](#), EEOC Appeal No. 0120122103 (September 10, 2012).

This section is not designed to address claims that include both a mixed and non-mixed matters. Where the complainant has or brings an amendment which contains a mixed issue (one that can be appealed directly to the MSPB), fragmentation does not occur where the agency assigns a second complaint number and processes the non-mixed matters under the 29 C.F.R. 1614 process and the mixed matters under the 5 C.F.R. 1201 process.

A. Identifying and Defining the Claim in an EEO Complaint

1. Fragmentation often occurs at the point where the agency identifies and defines the complainant's claim, most commonly during the counseling and investigative stages. A claim refers to an assertion of an unlawful employment practice or policy for which, if proven, there is a remedy under the federal equal employment statutes. Fragmentation often results from a failure to distinguish between the claim the complainant is raising and the evidence (factual information) s/he is offering in support of that claim.

Example 1

An African-American employee complains to the EEO Counselor that his supervisor is stricter about his time and attendance than with the unit's Caucasian employees. This is a legal claim of race-based disparate treatment in the terms and conditions of the complainant's employment with regard to time and attendance. In support of this claim, the complainant tells the EEO Counselor about a number of different occasions when the supervisor denied his request for annual leave or required him to use leave because he was tardy, while treating similarly situated Caucasian employees more favorably. These specific incidents should be considered the evidence supporting the complainant's claim that

the supervisor is treating him differently because of his race with regard to his time and attendance. Fragmentation would occur if each of these incidents were considered a separate claim and processed as a separate complaint.

Example 2

A female employee complains to the EEO Counselor that she is being subjected to a hostile work environment due to the ongoing sexual harassment by her male co-workers. This is the complainant's legal claim. In support of this claim, the complainant tells the EEO Counselor of specific incidents of a sexual advance, a sexual joke and a comment of a sexual nature. These individual incidents are evidence in support of the complainant's claim and should not be considered as separate claims in and of themselves.

2. Often, when an agency identifies each piece of factual evidence (usually constituting a single incident) offered by the complainant as a separate and distinct legal claim, it ignores the complainant's real underlying issue of a pattern of ongoing discrimination.² In contrast, fragmentation rarely occurs when the complainant presents a legal claim based on a single incident (such as a particular selection decision or a termination decision) rather than a series of events.

In defining a legal claim, the agency must exercise care where a series of incidents offered by a complainant initially seem different from one another.

² See, for example, [Reid v. Dep't. of Commerce](#), EEOC Request No. 05970705 (Apr. 22, 1999); [Ferguson v. Dep't. of Justice](#), EEOC Request No. 05970792 (Mar. 30, 1999); [Manalo v. Dep't. of the Navy](#), EEOC Appeal Nos. 01960764 and 01963676 (Nov. 5, 1996), request for reconsideration denied, EEOC Request No. [05970254](#) (May 29, 1998).

Example 3

A complainant tells the EEO Counselor that she believes that the agency discriminated against her when she was not selected for a GS-14 Engineer position, when she was not detailed to serve in a similar position, and when she was denied access to a particular training program. All of these seemingly different incidents are part of the same claim of a discriminatory non-selection as the complainant has alleged that the detail and the training would have enhanced her qualifications for the GS-14 Engineer position and, therefore, are relevant to the agency's failure to select her for that position.

Practice Tip: When defining a claim, two components must be identified. First, the claim must contain a factual statement of the employment practice or policy being challenged. As already discussed, it is critical that EEO Counselors, investigators, and other EEO staff members ensure that they understand the exact nature of the complainant's concerns so that the employment practice is defined broadly enough to reflect any allegation of a pattern of ongoing discrimination. Particular attention should be given to claims involving terms and conditions of employment. In Example 1 above, the employment practice being challenged is: disparate treatment in terms and conditions of employment with regard to time and attendance policies. In Example 2 above, the employment practice is: the creation of a hostile work environment because of sexual harassment. In Example 3 above, the employment practice might be defined as: management's failure to advance the complainant's career to a GS-14 position. The second component of a legal claim is the identification of the basis (because of race, color, national origin, sex, religion, reprisal, age, disability, or genetic information) for a violation of an equal employment statute.

3. **Timeliness Issues:** One of the reasons the distinction between legal claims and supporting evidence is important is because complainants frequently raise factual incidents that occur outside of the 45-day time period for contacting an EEO Counselor. In general, for a legal claim to be timely raised, at least one of the incidents the complainant cites as evidence in support of his/her claim must have occurred within the 45-day time period for contacting an EEO Counselor. (The usual exceptions should still be made. See Section IV of this Chapter on dismissals.) If the claim itself is timely raised, the question remains as to how the agency is to treat those factual incidents that the complainant cited as evidence in support of his/her claim that occurred outside the 45-day time limit.

The answer is that an agency must consider, at least as background, all relevant evidence offered in support of a timely raised legal claim, even if the evidence involves incidents that occurred outside the 45-day time limit. This is true of supporting evidence that the complainant offered during EEO counseling as well as later in the investigative stage. During the investigation, the degree to which a certain piece of proffered evidence is relevant to the legal claim will determine what sort of investigation is necessary of that particular piece of evidence. For example, in a non-selection case, a selection decision made long before the one at issue, involving different agency officials, may have little relevance to the current claim. On the other hand, if the selecting official in the most recent non-selection also failed to select the complainant for a similar position six months before, that piece of evidence may be very relevant to the complainant's claim. Investigators should not simply disregard relevant information the complainant provided in support of his/her claim as untimely raised; nor should they send the complainant back to counseling as if the supporting evidence was a new claim to be processed as a separate complaint.

With regard to the timeliness of a claim of harassment, because the incidents that make up a harassment claim collectively constitute one unlawful employment practice, the claim is actionable, as long as at least one incident that is part of the claim occurred within the filing period. Such a claim can include incidents that occurred outside the filing period that the complainant knew or should have known were actionable at the time of their occurrence. See [Bulluck v. Dep't. of Veterans Affairs](#), EEOC Appeal No. 0120114276 (Mar. 14, 2012); [Richardson v. U.S. Postal Service](#), EEOC Appeal No. 0120111122 (Feb. 1, 2012). However, the Supreme Court has held that no recovery is available for discrete acts such as hiring, firing, and promotions that fall outside the filing period, even if they are arguably related to other discriminatory acts that occur within the filing period. [National Railroad Passenger Corp. v. Morgan](#), 536 U.S. 101 (2002). See also [EEOC Compliance Manual 915.003, Section 2: "Threshold Issues,"](#) (rev. July 21, 2005). However, as the Court recognized, an employee may use the prior discrete acts as background evidence in support of a timely harassment claim.

Practice Tip: It is critical that agencies document their actions and the reasons for those actions in the record for Administrative Judge and Commission consideration later in the process. For example, if the agency's investigator decides that a certain factual incident raised by the complainant is of little relevance to his/her claim and, therefore, decides that an investigation of that incident is very minimal, the investigator

should document that decision and the reasons for it in the investigative report.

B. A Complainant May Amend a Pending Complaint

At any time prior to the agency's mailing of the notice required by 29 C.F.R. § 1614.108(f) at the conclusion of the investigation, 29 C.F.R. § 1614.106(d) permits a complainant to amend a pending EEO complaint to add claims that are like or related to those claim(s) raised in the pending complaint.³ There is no requirement that the complainant seek counseling on these new claims. See Braxton v. U.S. Postal Service, EEOC Appeal No. 0120102410 (Oct. 29, 2010). After the complainant has requested a hearing, s/he may file a motion with the Administrative Judge to amend the complaint to include claims that are like or related to those raised in the pending complaint.

This situation most frequently occurs when an alleged discriminatory incident occurs after the filing of an EEO complaint. In the past, agencies usually made these subsequent incidents the basis of a separate EEO complaint. A separate EEO complaint is not appropriate, however, if the new incident of discrimination raises a claim that is like or related to the original complaint. Rather, the original complaint should be amended to include the new incident of discrimination.

When a complainant raises a new incident of alleged discrimination during the processing of an EEO complaint, it must be determined whether this new incident:

1. provides additional evidence offered to support the existing claim, but does not raise a new claim in and of itself;
2. raises a new claim that is like or related to the claim(s) raised in the pending complaint; or
3. raises a new claim that is **not** like or related to the claim(s) raised in the pending complaint.

In order to facilitate such a determination, the complainant shall be instructed by the investigator (or any other EEO staff person with whom complainant raises the new incident) to submit a letter to the agency's EEO Director or a designee describing the new incident(s) and stating that s/he wishes to amend his/her complaint to include the new incident(s). The EEO Director or designee shall

³ Note that technical amendments to a complaint, such as changing the name of the agency head, should be handled quickly and without adding additional case processing time.

review this request, determine whether a fair and impartial investigation of the new claims can be accomplished within 360 days of the original filed complaint, and determine the correct handling of the amendment in an expeditious manner.

1. New Incident That Is Part of the Existing Claim

If the EEO Director or designee concludes that the new incident(s) provides additional evidence offered in support of the claim raised in the pending complaint, but does not raise a new claim in and of itself, then the EEO Director or designee should instruct the investigator to include the new incident in the investigation. A copy of this letter should be sent to the complainant unless they have provided notice that they have a representative. In such a case, the acknowledgment and all subsequent actions on the complaint should be mailed or delivered to complainant's representative with a copy to the complainant, unless the complainant has stated otherwise.

Example 4

During EEO counseling and in her formal complaint, an agency employee has alleged that her co-workers were harassing her because of her gender, and she cites five examples of harassment. During the investigation, she provides an initial affidavit detailing these incidents. Shortly thereafter, the employee contacts the investigator and tells him of several new incidents of gender-based harassment by these same co-workers. In this case, these new incidents are additional evidence offered by complainant in support of her pending claim of discriminatory harassment, and the investigator should be instructed to incorporate these new facts into his investigation of the pending claim. In this instance, the investigative period is not extended beyond 180 days, except with the consent of the complainant pursuant to 29 C.F.R. § 1614.108(e).

2. **New Incident That Raises a New Claim Like or Related to the Pending Claim**

While a complaint is pending, a complainant may raise a new incident of alleged discrimination that is not part of the existing claim, but may be part of a new claim that is like or related to the pending claim. In deciding if a subsequent claim is “like or related” to the original claim, a determination must be made as to whether the later incident adds to or clarifies the original claim, and/or could have reasonably been expected to grow out of the investigation of the original claim. See [Complainant v. Dep’t. of the Army](#), EEOC Appeal No. 0120142480 (Nov. 25, 2014; [Scher v. U.S. Postal Service](#), EEOC Request No. 05940702 (May 30, 1995); [Webber v. Dep’t. of Health and Human Services](#), EEOC Appeal No. 01900902 (Feb. 28, 1990).

In accordance with 29 C.F.R. § 1614.108(f) and guidance set forth in Section II(A)(1) of this Chapter, if the EEO Director or designee concludes that the new incident(s) raises a new claim, but that this new claim is like or related to the claim(s) raised in the pending complaint, the agency must amend the pending complaint to include the new claim. Accordingly, and pursuant to 29 C.F.R. § 1614.106(e), the agency shall acknowledge receipt of an amendment to a complaint in writing and inform the complainant of the date on which the amendment was filed. The EEO Director or designee should also send a copy of the letter to the EEO Investigator who is investigating the complainant’s prior complaint with instructions to include the new incident(s) in the investigation.

Example 5

An agency employee files a race discrimination complaint alleging he was not selected for a particular supervisory position, despite his belief that he was the best qualified candidate for the job. During the investigation into his complaint, the same selecting official does not select the complainant for another supervisory position. Complainant again asserts he was not selected because of his race. This new claim of a discriminatory non-selection is sufficiently like or related to the original non-selection claim that the agency should amend the original complaint to include the subsequent non-selection.

Example 6

During the investigation into her claim that the agency is discriminating against her in the terms and conditions of her employment because her supervisor denied her developmental assignments that could lead to upward mobility in the agency, the complainant informs the investigator that her supervisor just issued her a letter of warning for attendance problems. The complainant asserts that the supervisor took this action in retaliation for her complaint about the denial of development assignments. This new claim of retaliation is related to the pending claim because it grew out of the investigation into that claim. The agency should amend the original complaint to include this subsequent, but related, claim.

Example 7

An agency employee files a complaint of discrimination when his request for a hardship transfer is denied. During the investigation into his complaint, the complainant sends a letter to the EEO office stating that he has decided to resign from the agency because of the agency's failure to transfer him and the resulting stress. He further states that he is no longer seeking the transfer as a remedy to his complaint, but asserts he is entitled to a compensatory damages award instead. The EEO office should amend the original complaint to include the complainant's new like or related claim of constructive discharge.

Pursuant to 29 C.F.R. § 1614.106(e)(2), the agency is required to complete its investigation of an EEO complaint within 180 days of the filing of a complaint unless the parties agree in writing to extend the time period. If a complaint is amended, however, this deadline is adjusted so that the agency must complete its investigation within the earlier of 180 days after the last amendment to the complaint or not more than 360 days after the filing of the original complaint.

Pursuant to 29 C.F.R. § 1614.108(g) the agency is still required to issue a notice to complainant that the investigation is not complete and estimating a time in which it will be complete. A complainant retains the right to request a hearing, even in the case of an amended complaint, after 180 days have passed since the filing of the original complaint, even if the agency's investigation has not been completed. In such a case, an Administrative Judge may develop the record through discovery and the

hearing process, or utilize other means within his/her discretion to ensure that the amended complaint is properly addressed.

3. New Incident Raises Claim That Is Not Like or Related to Pending Claim

In cases where subsequent acts of alleged discrimination do not add to or clarify the original claim, and/or could not have been reasonably expected to grow out of the investigation of the original claim, the later incident should be the subject of a separate EEO complaint. In such cases, fragmented processing of an EEO complaint is not at issue because there are two distinct and unrelated legal claims being alleged.

If the EEO Director or designee concludes that the new claim raised by the complainant is **not** like or related to the claim(s) raised in the pending complaint, then the complainant must be advised in writing that s/he should seek EEO counseling on the new claim. The postmark date of the letter (from complainant requesting an amendment) to the EEO Director or designee would be the date for time computation purposes used to determine if initial counselor contact was timely under 29 C.F.R. § 1614.105(b).

Example 8

An agency employee sought EEO counseling and filed a formal complaint concerning his allegation that the agency discriminated against him in the terms and conditions of his employment by requiring that he adhere to a specific work schedule while not imposing a similar requirement on a comparative employee. During the investigation into this complaint, the complainant tells the investigator that he was recently not selected for a position in another facility and believes this occurred as a result of discrimination. In this case, the discriminatory non-selection claim is not like or related to the adherence to the work schedule claim, as it is factually distinct and cannot reasonably be said to add to or clarify the original claim.

C. Consolidation of Complaints

As noted above, a new claim that is not like or related to a previously filed complaint provides the basis for a new, and separate, complaint. The complainant must present the new, unrelated claim to an EEO Counselor and the new claim is subject to all of the regulatory case processing requirements. In order to address a

Management Directive
5-14

VA-18-0457-D-000193

4747

different fragmentation concern, 29 C.F.R. § 1614.606 requires agencies to consolidate for joint processing two or more complaints of discrimination filed by the same complainant, after appropriate notification is provided to the parties.⁴ While it is anticipated that most consolidated complaints will be investigated together, in certain circumstances, such as significant geographic distance between the sites of two complaints, consolidation does not preclude an agency from investigating each complaint separately. In all instances, however, where an individual requests a hearing, the consolidated complaints should be heard by a single Administrative Judge; or where the complainant requests a final agency decision, the agency should issue a single decision. An agency must consolidate complaints filed by the same complainant before the agency issues the notice required by 29 C.F.R. § 1614.108(f) at the conclusion of the investigation.

When a complaint has been consolidated with an earlier filed complaint, the agency must complete its investigation within the earlier of 180 days after the filing of the last complaint or not later than 360 days after the filing of the original complaint. See Section II.A.1 of this Chapter for more information on time limits. A complainant has the right to request a hearing, even in the case of consolidated complaints, after 180 days have passed since the filing of the original complaint, even if the agency's investigation is not complete. If not already consolidated, an Administrative Judge or the Commission in their discretion may consolidate two or more complaints of discrimination filed by the same complainant.

Section 1614.606 of 29 C.F.R. permits, but does not require, the consolidation of complaints filed by different complainants that consist of substantially similar allegations or allegations related to the same matter.

D. Partial Dismissals

Another method of addressing the fragmentation problem is 29 C.F.R. § 1614.107(b), which provides for no immediate right to appeal a partial dismissal of a complaint. See Section IV.C of this Chapter for a more detailed discussion of partial dismissals. Partial dismissals will be preserved and decided within the context of the rest of the complaint.

⁴ Through mandatory consolidation, the Commission seeks to address the situation where a single complainant has multiple complaints pending against an agency. Even if the complaints are unrelated, their resolution in a single proceeding may make better use of agency and Commission resources.

E. No Remands by Administrative Judges

To further avoid the fragmenting of EEO claims, Administrative Judges will not remand issues to agencies for counseling or other processing. Once a case is before an Administrative Judge, that Administrative Judge is fully responsible for processing it. Chapter 7, “Hearings,” in this Management Directive discusses more fully this provision.

F. “Spin-off” Complaints

Section 1614.107(a)(8) of 29 C.F.R. provides for the dismissal of spin-off complaints, which are complaints about the processing of existing complaints. Complaints about the processing of existing complaints should be referred to the agency official responsible for complaint processing, and/or processed as part of the original complaint, as set forth in Section IV.D of this Chapter.

G. Training

As already emphasized, the EEO Counselor and investigator have critical roles in identifying, defining, and clarifying an aggrieved employee’s legal claims. Therefore, agencies must provide all agency EEO Counselors and investigators with mandatory training in this area as well as ensure that all contract EEO Counselors and investigators have received training in this area. See Chapter 2, Section II (EEO Counselor training) and Chapter 6, Section II (investigator training) of this Management Directive.

IV. AGENCY DISMISSAL PROCESS

Circumstances under which an agency may dismiss a complaint are set forth in 29 C.F.R. § 1614.107(a). An agency’s authority to dismiss a complaint ends when a complainant requests a hearing. An agency should process dismissals expeditiously. To avoid common errors in dismissing complaints of discrimination see [EEOC, Preserving Access to the Legal System: Common Errors by Federal Agencies in Dismissing Complaints of Discrimination on Procedural Grounds](#), issued in September of 2014 on the Commission’s website.

The agency should clearly set forth its reasoning for dismissing the complaint in all dismissal decisions and include evidence in the record that supports the grounds for dismissal. For example, if the agency dismisses a claim under 29 C.F.R. § 1614.107(a)(3) because a civil action was filed by complainant, the agency should ensure that a copy of the civil complaint is included in the record.

A. Bases for Dismissals That May Exist as of the Filing of the Complaint or Develop Thereafter

1. Untimely Counseling Contact - 29 C.F.R. § 1614.107(a)(2)

- a. A claim that was not brought to the attention of an EEO Counselor in a timely manner.
- b. The complainant did not contact an EEO Counselor within **forty-five (45) days** of the discriminatory event or within **45 days** of the effective date of the personnel action, 29 C.F.R. § 1614.105(a)(1), and the complainant did not show that the 45-day contact period should be extended pursuant to 29 C.F.R. § 1614.105(a)(2). See, for example, [Ball v. U.S. Postal Service](#), EEOC Request No. 05880247 (July 6, 1988) (reasonable suspicion standard used to determine when the 45-day limitation period begins; time limit is not triggered until the complainant reasonably suspects discrimination, but before all of the facts that support the charge of discrimination have become apparent). An agency may be barred from dismissing a complaint on timeliness grounds where:
 - (1) the agency could not establish that the complainant was notified of the time limits and was otherwise aware of them, or did know and reasonably should have known that the discriminatory practice or personnel action occurred or that despite due diligence was prevented by circumstances beyond his/her control from contacting an EEO Counselor within the time limits, or for other reasons considered sufficient by the agency or the Commission; or
 - (2) the complainant contends that the claim is a part of a pattern of discrimination or establishes that there are other equitable circumstances that mitigate untimely contact. Time limits are subject to waiver, estoppel, and equitable tolling under 29 C.F.R. § 1614.604(c).

2. Untimely Filing of the Formal Complaint – 29 C.F.R. § 1614.107(a) (2)

The complainant failed to file a formal complaint within **fifteen (15) days** of his/her receipt of the EEO Counselor’s Notice of Right to File a Formal Complaint in an individual complaint, 29 C.F.R. § 1614.105(d), or in a class complaint, 29 C.F.R. § 1614.204(c). The agency has the burden of proving that the complainant received the notice and that the notice clearly informed the aggrieved person of the 15-day filing time frame. See, for example, [Paoletti v. U.S. Postal Service](#), EEOC Request No. 05950259 (Aug. 17, 1995). This time limit is also subject to waiver, estoppel, and equitable tolling under 29 C.F.R. § 1614.604(c).

3. Failure to State a Claim - 29 C.F.R. § 1614.107(a)(1)

The complainant failed to state a claim under 29 C.F.R. § 1614.103. This may include a claim that does not allege discrimination on a basis encompassed in one of the statutes applicable to federal sector employees. In determining whether a complaint states a claim, the proper inquiry is whether the conduct if true would constitute an unlawful employment practice under the EEO statutes. [Cobb v. Dep’t. of the Treasury](#), EEOC Request No. 05970077 (Mar. 13, 1997) (a complaint should not be dismissed for failure to state a claim unless it appears beyond doubt that the complainant cannot prove a set of facts in support of the claim which would entitle the complainant to relief; the trier of fact must consider all of the alleged harassing incidents and remarks and, considering them together in the light most favorable to the complainant, determine whether they are sufficient to state a claim). See also [Burlington Industries, Inc. v. Ellerth](#), 524 U.S. 742, 752-753 (1998) (referencing cases in which courts of appeals considered whether various employment actions were sufficient to state a claim under the civil rights laws). Dismissal for failure to state a claim also may be appropriate where the complainant named the improper agency. See 29 C.F.R. § 1614.106(a).

An agency shall accept a complaint from any aggrieved employee or applicant for employment who believes that s/he was discriminated against by that agency because of race, color, religion, sex, national origin, age, disabling condition, genetic information, or retaliation. The Commission has long defined an “aggrieved employee” as one who suffers a present harm or loss with respect to a term, condition, or privilege of employment for which there is a remedy. [Diaz v. Dep’t. of the Air Force](#), EEOC Request No. 05931049 (Apr. 21, 1994); see also [Wildberger v. Small Business Administration](#), EEOC Request No. 05960761 (Oct. 8, 1998). An agency is required to address EEO complaints only when filed by an individual who has suffered direct,

Management Directive
5-18

VA-18-0457-D-000197

4751

personal deprivation at the hands of the employer; the agency's act must have caused some concrete effect on the aggrieved person's employment status. [Quinones v. Dep't. of Defense](#), EEOC Request No. 05920051 (Mar. 12, 1992).

Further, it is inappropriate for an individual to use the EEO process to lodge a collateral attack against another proceeding. For example, [see Schneider v. U.S. Postal Service](#), EEOC Request No. 05A01065 (Aug. 16, 2002) (affirming agency dismissal of complaint alleging discriminatory delay in submission of worker's compensation claim as collateral attack on OWCP claim process); [Jones v. Dep't. of the Army](#), EEOC Request No. 05A00428 (Mar. 1, 2002) (affirming dismissal of complaint regarding polygraph examination as a collateral attack on the agency's internal investigation of disappearance of agency property); or [Lingad v. U.S. Postal Service](#), EEOC Request No. 05930106 (June 25, 1993) (holding that discriminatory actions taken to influence the outcome of decision rendered under the negotiated grievance procedure is outside the purview of EEO process). The proper forum to raise these kinds of issues is within the process itself. An agency should dismiss these complaints as failures to state a claim.

When an individual alleges retaliation in a complaint, they do not need to make a showing of an adverse employment action. [See Burlington Northern & Santa Fe Railway Co. v. White](#), 548 U.S. 53, 68 (2006); [EEOC Compliance Manual 915.003 Section 8-Retaliation II.D.3](#) (May 20, 1998) (any adverse treatment that is based upon a retaliatory motive and is reasonably likely to deter the charging party or others from engaging in protected activity states a claim). The significance of the act of alleged retaliation will often depend upon the particular circumstances. For example, in [Isom v. U.S. Postal Service](#), EEOC Appeal No. 0120113627 (Nov. 7, 2012), the complainant alleged that he was required to perform both forklift and jitney duties. The record revealed that other employees were required to perform either forklift or jitney duties but not both and that the supervisor involved was under pressure to discipline complainant for refusing an assignment even if the discipline was not warranted. The Commission found a viable claim of retaliation was stated and remanded the case to the agency to process.

4. Abuse of Process - 29 C.F.R. § 1614.107(a)(9)

Section 1614.107(a)(9) of 29 C.F.R. is the appropriate provision under which an agency may dismiss a complaint on the extraordinary grounds of abuse of process.

- a. Abuse of process is defined as a clear pattern of misuse of the process for ends other than that which it was designed to accomplish. See [Buren v. U.S. Postal Service](#), EEOC Request No. 05850299 (Nov. 18, 1985); [Kleinman v. U.S. Postal Service](#), EEOC Appeal No. 01943637 (September 22, 1994); [Sessoms v. U.S. Postal Service](#), EEOC Appeal No. 01973440 (June 11, 1998). The Commission has a strong policy in favor of preserving a complainant's EEO rights whenever possible. The occasions in which application of the standards are appropriate must be rare, because of the strong policy in favor of preserving a complainant's EEO rights whenever possible. See generally [Love v. Pullman](#), 404 U.S. 522 (1972); [Wrenn v. Equal Employment Opportunity Commission](#), EEOC Appeal No. 01932105 (Aug. 19, 1993). Therefore, such dismissals must be taken only in cases where there is a clear misuse or abuse of the administrative process.
- b. In order to determine whether a complaint, or a number of consolidated complaints, should be dismissed for this reason under 29 C.F.R. § 1614.107(a)(9), the agency or Administrative Judge must strictly apply the criteria established by the Commission on this issue.⁵ This requires an analysis of whether the complainant evidences an ulterior purpose to abuse or misuse the EEO process. Agencies are cautioned that numerous complaint filings alone is not a sufficient basis for determining that there has been an abuse of the process. However, multiple filings on the same issues, lack of specificity in the allegations, and the filing of complaints on allegations previously raised, may be considered in deciding whether a complainant has engaged in a pattern of abuse of the EEO process. All pending complaints from a complainant which satisfy these criteria should be consolidated for dismissal under this section.
- c. Cases in which the Commission has found an abuse of the EEO process include those where, upon review of the complainant's

⁵ The Commission retains the authority on appeal to protect its administrative processes from abuse by either party.

record, including the number and types of complaints filed, the Commission has concluded that the complainant has pursued a scheme involving the misuse and misapplication of the EEO process for an end other than that which it was designed to accomplish.

- (1) For example, in reviewing a complainant's prior complaints, the Commission has found abuse of process where the complainant presented similar or identical allegations, evidencing a pattern of initiating the complaint process whenever the agency did anything that dissatisfied the complainant. [Hooks v. U.S. Postal Service](#), EEOC Appeal No. 01953852 (Nov. 28, 1995).
- (2) The Commission has also found abuse of process when the complainant presented similar or identical allegations related to the complainant's dissatisfaction with the EEO process itself. [Goatcher v. U.S. Postal Service](#), EEOC Request No. 05950557 (Oct. 18, 1996). The complainant in [Goatcher](#) filed numerous complaints concerning the agency's purported denial of access to sufficient equipment and storage for EEO claims, denial of official time for such claims, inadequate EEO counseling, agency monitoring of time spent in the EEO process, and failure to maintain her anonymity during EEO counseling.
- (3) In [Sessoms v. U.S. Postal Service](#), EEOC Appeal No. 01973440 (June 11, 1998), the Commission noted that the appellant was experienced in the EEO process, but that he pursued a clear pattern of abuse of the EEO process by filing numerous frivolous complaints. The Commission noted, "A definite pattern of initiating the complaint machinery with respect to any matter with which appellant was dissatisfied has developed . . . clearly has amounted to an abuse of process." See also [Kessinger v. U.S. Postal Service](#), EEOC Appeal No. 01976399 (June 8, 1999) (clear pattern of abuse from multiple filings, totaling over 160 complaints and 150 appeals, many of which were duplicate complaints of earlier, dismissed filings; the Commission found the complainant's actions an intentional effort to clog the agency's in-house administrative machinery); [Stoyanov v. Dep't. of the Navy](#), EEOC Appeal Nos. 0120113142, 0120113817, and 0120114019 (Dec. 6, 2011) (clear pattern of abuse from multiple filings many of which concerned

Management Directive
5-21

VA-18-0457-D-000200

4754

selections for positions for which complainant was not eligible to apply).

- d. The Commission has stressed in such cases that a party cannot be permitted to utilize the EEO process to circumvent other administrative processes; nor can individuals be permitted to overburden the EEO system, which is designed to protect individuals from discriminatory practices.

Example 1

The complainant originally filed a complaint of discrimination in non-selection for promotion. Subsequently, he repeatedly filed complaints of reprisal, alleging that the agency was denying him official time to prepare EEO complaints, denying him the use of facilities and storage space for his EEO materials, providing improper EEO counseling, and unfairly keeping tabs on the amount of official time he was spending on his EEO complaints. Many of the allegations in these complaints were vague, and raised allegations previously raised in earlier complaints. In fact, he had on several occasions copied a previous complaint on which he would write a new date in order to file new complaint. Over the course of several months, he filed a total of 25 complaints in this manner. The agency could consolidate the subsequent complaints and dismiss them under 29 C.F.R. § 1614.107(a) for abuse of process. The complainant had demonstrated a pattern of abuse of the process, involving multiple complaints containing identical or similar allegations. (See, for example, [Kessinger v. U.S. Postal Service](#), EEOC Appeal No. 01976399 (June 8, 1999); [Story v. U.S. Postal Service](#), EEOC Request No. 05970083 (May 22, 1998).)

Example 2

The complainant originally filed a complaint of discrimination in non-selection for promotion. Subsequently she filed a total of 15 complaints, many alleging specific and distinct acts of reprisal for her prior EEO activity. Based on the number of complaints alone, the agency attempted to dismiss them all for abuse of process.

Management Directive
5-22

VA-18-0457-D-000201

4755

There was insufficient evidence to dismiss the complaints for abuse of process. Evidence of numerous complaint filings, in and of itself, is not a sufficient basis for determining that there has been an abuse of the process. In this case, there was no evidence that the complainant's ulterior purpose was to abuse the EEO process, or that she was misusing the process for ends other than that which it was designed to accomplish. It may be appropriate, however, for the agency to consolidate the individual complaints for processing. (See, for example, [Manley v. Dep't. of the Air Force](#), EEOC Appeal No. 01975901 (May 29, 1998); and [Donnelly v. Dep't. of Energy](#), EEOC Appeal No. 01972171 (Nov. 17, 1997) for decisions rejecting agency contentions of abuse of process.)

5. States the Same Claim - 29 C.F.R. §1614.107(a)(1)

The complaint states the same claim that is pending before or had been decided by the agency or Commission except in those cases where a class action complaint is pending.⁶ The Commission has interpreted this regulation to require that the complaint must set forth the "identical matters" raised in a previous complaint filed by the same complainant, in order for the subsequent complaint to be rejected. [Terhune v. U.S. Postal Service](#), EEOC Request No. 05950907 (July 18, 1997); [Russell v. Dep't. of the Army](#), EEOC Request No. 05910613 (Aug. 1, 1991) (interpreting 29 C.F.R. § 1613.215(a)(1), the predecessor of 29 C.F.R. § 1614.107(a)(1)).

6. Complainant Files a Civil Action - 29 C.F.R. § 1614.107(a)(3)

The complainant files a civil action concerning the same allegation, at least **one hundred eighty (180) days** after s/he filed his/her administrative complaint. The requirement in 29 C.F.R. § 1614.409 that the civil action shall be dismissed only if it was filed pursuant to 29 C.F.R. § 1614.408 evidences the intent of the Commission to restrict the dismissals of EEO complaints for filing a civil action to those civil actions which were brought under the statutes enforced by the Commission. Where a complainant has not filed a civil action pursuant to the specific statutes listed in 29 C.F.R. § 1614.408, the complaint may not be dismissed

⁶ In that case, an individual complaint will be subsumed under the class complaint. See Chapter 8 Section III of this Management Directive for detailed information on when a case should be subsumed.

pursuant to 29 C.F.R. § 1614.107(a)(3). See [Krumholz v. Dep't. of Veterans Affairs](#), EEOC Appeal No. 01934799 (Dec. 15, 1993), aff'd, EEOC Request No. [05940346](#) (Oct. 21, 1994).

7. Issue Has Been Decided - 29 C.F.R. § 1614.107(a)(3)

The same issue has been decided by a court of competent jurisdiction and the complainant was a party to the lawsuit. Commission regulations mandate dismissal of the EEO complaint under these circumstances so as to prevent a complainant from simultaneously pursuing both administrative and judicial remedies on the same matters, wasting resources, and creating the potential for inconsistent or conflicting decisions. [Stromgren v. Dep't. of Veterans Affairs](#), EEOC Request No. 05891079 (May 7, 1990); [Sandy v. Dep't. of Justice](#), EEOC Appeal No. 01893513 (Oct. 19, 1989). The proper inquiry to determine whether dismissal is warranted is whether the issues in the EEO complaint and the civil action are the same, that is, whether the acts of alleged discrimination are identical. [Bellow v. U.S. Postal Service](#), EEOC Request No. 05890913 (Nov. 27, 1989). The factual allegations and not the bases or the precise relief requested should be the crux of the legal analysis.

8. Allegation Raised in Negotiated Grievance Proceeding - 29 C.F.R. § 1614.107(a)(4)

The complainant has raised the allegation in a negotiated grievance procedure that permits allegations of discrimination, indicating an election to pursue a non-EEO process. Section 1614.301(a) of 29 C.F.R. provides that “a person wishing to file a complaint or a grievance on a matter of alleged employment discrimination must elect to raise the matter under either part 1614 or the negotiated grievance procedure, but not both.” This subsection also provides that an election to proceed under 1614 is indicated by the “filing of a written complaint,” while an election to proceed under a negotiated grievance procedure is indicated by the “filing of a timely written grievance.” See [Casey v. Dep't. of Veterans Affairs](#), EEOC Appeal No. 01944605 (Aug. 9, 1995).⁷ The withdrawal of a

⁷ An agency cannot deny a complainant his statutory and regulatory right to file an EEO complaint because the union exercised its right to file its own grievance pursuant to the terms of a Collective Bargaining Agreement. See [Callahan v. Dep't. of the Interior](#), EEOC Appeal No. 0120110309 (Jan. 5, 2012) (complainant stated that the union filed a grievance without his knowledge and there was no evidence in the record that complainant was involved in filing the grievance); see also [Cate v. Dep't. of the Army](#), EEOC Appeal No. 0120110083 (Nov. 21, 2011).

grievance does not abrogate its effect for purposes of an election. [Bracket v. Dep't. of the Air Force](#), EEOC Request No. 05910383 (Aug. 8, 1991).

9. Appeal Made to MSPB - 29 C.F.R. § 1614.107(a)(4)

The complainant has elected to appeal the claim to the Merit Systems Protection Board, rather than file a mixed case complaint under 29 C.F.R. § 1614.302.

10. Complaint Alleges a Preliminary Step - 29 C.F.R. § 1614.107(a)(5)

The complaint alleges that a proposal to take or a preliminary step in taking a personnel action is discriminatory. This provision requires the dismissal of complaints that allege discrimination “in any preliminary steps that do not, without further action, affect the person: for example, progress reviews or improvement periods that are not a part of any official file on the employee.” 57 Fed. Reg. 12,643 (Apr. 10, 1992); *see*, for example, [McAlhaney v. U.S. Postal Service](#), EEOC Request No. 05940949 (July 7, 1995). However, if the complaint alleges that a proposal to take or a preliminary step in taking a personnel action is retaliatory, the complaint should not be dismissed because a proposed action could be considered adverse treatment in the context of reprisal if it is reasonably likely to deter protected activity.⁸ *See* [Brown v. Dep't. of Defense](#), EEOC Appeal No. 0120103139 (Dec. 8, 2010) (complainant’s claim that the agency discriminated against him when it placed him on a performance improvement plan stated a viable claim of retaliation). In addition, if the individual alleges that the preliminary step was part of a pattern of harassing the individual for a prohibited reason, the complaint cannot be dismissed under this section because the preliminary step has already affected the employee. *See*, for example, [Noone v. Central Intelligence Agency](#), EEOC Request No. 05940422 (Jan. 23, 1995); *see also* [Bennett v. U.S. Postal Service](#), EEOC Appeal No. 0120111470 (Jan. 5, 2012).

11. Complaint is Moot - 29 C.F.R. § 1614.107(a)(5)

A complaint may be dismissed as moot where there is no reasonable expectation that the alleged violation will recur, and interim relief or

⁸ Dismissal of allegedly retaliatory proposals and other preliminary steps may be appropriate under 29 C.F.R. § 1614.107(a)(1) if the alleged retaliatory actions are not “materially adverse,” that is, would not dissuade a reasonable employee in complainant’s circumstances from engaging in protected activity. *See* [Burlington Northern & Santa Fe Railway Co. v. White](#), 548 U.S. 53, 68 (2006).

events have completely and irrevocably eradicated the effects of the alleged violation. See [Wildberger v. Small Business Administration](#), EEOC Request No. 05960761 (Oct. 8, 1998), (citing [County of Los Angeles v. Davis](#), 440 U.S. 625 (1979)). When such circumstances exist, no relief is available, and there is no need for a determination of the rights of the parties. The Commission has also held, however, that where a complainant has made a timely request for compensatory damages, an agency must address the issue of compensatory damages before it can dismiss a complaint for mootness. See, for example, [Salazar v. Dep't. of Justice](#), EEOC Request No. 05930316 (Feb. 9, 1994).⁹

12. Dissatisfaction with the Processing of a Complaint - 29 C.F.R. § 1614.107(a)(8)

The complaint alleges dissatisfaction with the processing of a previously filed complaint. See discussion in Section IV.D of this Chapter of the Management Directive.

B. Dismissals that Generally Occur after the Agency Accepts the Complaint Based on Complainant's Actions or Inactions

1. The Complainant Cannot Be Located - 29 C.F.R. § 1614.107(a)(6)

The regulations permit dismissal where the complainant cannot be located. The provision requires that the agency make reasonable efforts to locate the complainant and inform the complainant that s/he must respond to the agency's notice of proposed dismissal within **fifteen (15) days** sent to his/her last known address. A matter may not be "dismissed" under this section until after the complaint has been filed. See [Clairborne v. Dep't. of the Air Force](#), EEOC Appeal No. 01972713 (Mar. 19, 1998).

2. The Complainant Failed to Respond or Proceed in a Timely Fashion - 29 C.F.R. § 1614.107(a)(7)

⁹ A different situation is presented where an agency unilaterally and unconditionally promises in writing to provide the full and complete remedy as defined by the Administrative Judge. Although the complaint is "moot" in the sense that the guarantee of complete relief completely and irrevocably eradicates the effects of the alleged violation, the Administrative Judge will not dismiss the complaint as moot, but will issue an order determining the appropriate remedy. The purpose of this requirement is to ensure that the complainant will be able to seek enforcement of the agency's agreement to provide full relief should the agency fail to do so. See Chapter 7, Section III.D.15 of this Management Directive.

The regulations permit dismissal where the complainant has failed to respond to a written “request to provide relevant information or to otherwise proceed” within **15 days** of receipt, provided that the request contained notice of the proposed dismissal and further provided that there is otherwise insufficient available information to adjudicate the claim. The regulation further states that an agency may not dismiss on this basis where the record includes sufficient information to issue a decision. See [Delancy v. U.S. Postal Service](#), EEOC Appeal No. 0120111686 (Mar. 13, 2012). The Commission also has held that the regulation is applicable only in cases where there is a clear record of delay or contumacious conduct by the complainant. See [Martinez v. U.S. Postal Service](#), EEOC Appeal No. 0120113028 (Nov. 2, 2011) (dismissal of complaint for failure to cooperate was improper where there was insufficient evidence to support a conclusion that complainant purposely engaged in delay or contumacious conduct, and there was sufficient information in the record to have permitted the agency to continue the investigation, including extensive information as to the alleged discriminatory action and the responsible officials).

C. Processing of Partially Dismissed Complaints

There is no immediate right to appeal a partial dismissal of a complaint. Where an agency believes that some but not all of the claims in a complaint should be dismissed for the reasons contained in 29 C.F.R. § 1614.107(a), the agency must notify the complainant in writing of its determination, set forth its rationale for that determination, and notify the complainant that the allegations will not be investigated. The agency must place a copy of the notice in the investigative file. The agency should advise the complainant that an Administrative Judge shall review its dismissal determination if s/he requests a hearing on the remainder of the complaint, but the complainant may not appeal the dismissal until a final action is taken by the agency on the remainder of the complaint. See 29 C.F.R. § 1614.107(b).

1. Where a Hearing Is Requested

If the complainant requests a hearing from an Administrative Judge, the Administrative Judge will evaluate the agency’s reasons for believing that a portion of the complaint met the standards for dismissal before holding the hearing. If the Administrative Judge believes that all or part of the agency’s reasons are not well taken, the entire complaint or all of the portions not meeting the standards for dismissal will continue in the hearing process. The parties may conduct discovery to develop the record for all portions of the complaint continuing in the hearing process. The

Administrative Judge's decision on the partial dismissal will become part of the Administrative Judge's final decision on the complaint and may be appealed by either party after final action is taken on the complaint.

2. Where a Final Decision by the Agency Is Requested

Where a complainant requests a final decision by the agency without a hearing, the agency will issue a decision addressing all claims in the complaint, including its rationale for dismissing claims, if any, and its findings on the merits of the remainder of the complaint. The complainant may appeal the agency's decision, including any partial dismissals, to the Commission.

Agency decisions shall include the following:

- a. findings of fact and conclusions of law on the merits of each issue in the complaint;
- b. appropriate remedies and relief in accordance with subpart E of part 1614 when discrimination is found;
- c. notice of right to appeal to the Commission (with EEOC Form 573, Notice of Appeal/Petition attached), unless the complaint involves a mixed case, where the agency should provide notice of right to appeal to the MSPB (not the Commission) within thirty (30) days of receipt of the agency final decision;
- d. notice of right to file a civil action in a U.S. District Court;
- e. the name of the proper defendant in any such lawsuit; and
- f. the applicable time limits for appeals and lawsuits.

D. Allegations of Dissatisfaction Regarding Processing of Pending Complaints

1. If a complainant is dissatisfied with the processing of his/her pending complaint, whether or not it alleges prohibited discrimination as a basis for dissatisfaction, including that agency counsel/representatives improperly interfered during the investigation of the complaint, s/he should be referred to the agency official responsible for the quality of complaints processing. Agency officials should earnestly attempt to resolve dissatisfaction with the complaints process as early and expeditiously as possible.

Management Directive
5-28

VA-18-0457-D-000207

4761

2. The agency official responsible for the quality of complaints processing must add a record of the complainant's concerns and any actions the agency took to resolve the concerns, to the complaint file maintained on the underlying complaint. If no action was taken, the file must contain an explanation of the agency's reason(s) for not taking any action.
3. A complainant must always raise his/her concerns first with the agency, in the above manner. However, in cases where the complainant's concerns have not been resolved informally with the agency, the complainant may present those concerns to the Commission at either of the following stages of processing:
 - a. Where the complainant has requested a hearing, to the Commission's Administrative Judge when the complaint is under the jurisdiction of the Administrative Judge; or
 - b. Where the complainant has not requested a hearing, to the Commission's Office of Federal Operations (OFO) on appeal.

A complainant must raise any dissatisfaction with the processing of his/her complaint before the Administrative Judge issues a decision on that complaint, the agency takes final action on the complaint, or either the Administrative Judge or the agency dismisses the complaint. The complainant has the burden of showing improper processing. No concerns regarding improper processing raised after a decision will be accepted by the agency, the Administrative Judge, or OFO.

Where the Administrative Judge or OFO finds that an agency has improperly processed the original complaint and that such improper processing has had a material effect on the processing of the original complaint, the Administrative Judge or OFO may impose sanctions on the agency as deemed appropriate. For example, where the complainant asserts that the agency's investigation of the complaint was improper, the Administrative Judge may determine whether the complainant has properly characterized the investigation and whether the agency's failure properly to investigate the complaint had a material effect on the processing of the complaint. Or, for example, where the complainant asserts that agency counsel or representatives improperly directed, or interfered with, the investigation of the complaint, the Administrative Judge may determine whether the Agency did, in fact, interfere in the investigation, and whether such interference so undermined the neutrality of the investigation that it materially affected the processing of the complaint. If the Administrative Judge finds that the processing of the

complainant's complaint was materially affected by the agency's actions, the Administrative Judge shall issue an appropriate order addressing the deficiencies in the investigation. If the Administrative Judge finds that although the agency's actions were inconsistent with its requirements under the 29 C.F.R. Part 1614 regulations, but had no material effect on the processing of the complaint, the Administrative Judge, in the exercise of his/her discretion, may suggest that the complainant submit a letter to the following Commission office for consideration regarding the agency's conduct:

Equal Employment Opportunity Commission
Office of Federal Operations
Federal Sector Programs
131 M Street, NE
Washington, DC 20507

Electronic submission may be made using email transmission of documents to federalsectoreeo@eoc.gov or by using the Commission's electronic document submission portal.

Where the complainant contends that an agency improperly denied him/her official time and the Administrative Judge or OFO finds in the complainant's favor, the Administrative Judge or OFO may order the agency to restore such personal leave as the complainant may have used in lieu of official time.

V. CONDUCTING THE INVESTIGATION

A. Agency Retains Responsibility

Agencies are responsible for conducting an appropriate investigation of complaints filed against them. An agency may contract out an investigation or may arrange for another agency to conduct the investigation, but the agency remains responsible for the content and timeliness of the investigation.

B. Investigations Must Be Timely Completed

Investigations must be completed within **180 days**¹⁰ of filing a complaint or within the time period contained in an order from the Office of Federal

¹⁰ If the complaint is a mixed case, the investigation must be finished within 120 days. MSPB

Operations to investigate a complaint following an appeal from a dismissal, unless the EEO Director or designee and the complainant agree in writing to an extension of not more than an additional **ninety (90) days**. Where a complaint has been amended or consolidated with another complaint, the investigation must be completed within the earlier of 180 days after the filing of the last complaint or not later than 360 days after the filing of the original complaint. A complainant has the right to file a civil action or request a hearing, even in the case of consolidated complaints, after 180 days have passed since the filing of the original complaint, even if the agency's investigation has not been completed.

Agencies are required to complete investigations within the earlier of 180 days after filing last complaint or 360 days after the filing of the original complaint. Regardless of amendment of or consolidation of complaints, the investigation shall be complete in not more than 360 days.

For example, if a complainant amends a complaint or files another complaint the agency will consolidate on day 179 of the originally filed complaint, and then the investigation must be complete by the 359th day.

If the complainant wants to add another amendment on the 358th day of the investigation, the agency will have only 2 days to investigate that amendment. If the agency is unable to conduct an impartial and appropriate investigation in 2 days it should not consolidate or accept the amendment; rather, the agency should advise the complainant to seek counseling on the newest matter and process it as a new complaint.

C. Failure to Complete Investigation within Time Limit

If the investigation is not completed within the 180-day time limit, the agency must send a notice to complainant informing him/her that the investigation is not complete, providing an estimated date by which it will be complete and explaining that s/he has a right to request a hearing from a Commission Administrative Judge or to file a civil action in the appropriate U.S. District Court. The notice must be in writing, must describe the hearing process including some explanation of discovery and burdens of proof, and must acknowledge that its issuance does not bar complainant from seeking sanctions. A sample notice is provided at Appendix K.

regulation 5 C.F.R. § 1201.154(b)(2).

D. What Must Be Done for an Investigation to Be Considered Appropriate

A timely completed investigation means that within the applicable time period the agency must complete several actions:

1. The complaint must be appropriately investigated in a manner consistent with Chapter 6 of this Management Directive. An appropriate factual record is one that allows a reasonable fact finder to draw conclusions as to whether discrimination occurred.
2. Copies of the investigative file, including a summary of the investigation must be provided to the complainant(s)¹¹; and
3. The agency must give complainant a notice of his/her right to request a hearing (if it is not a mixed case), within 30 days from receipt of the investigative file, , or of the right to request a final action by the agency pursuant to 29 C.F.R. § 1614.110.

VI. FINAL ACTIONS

There are two types of final actions by agencies. One is a final action by an agency following a decision by an Administrative Judge. The other is a final action in all other circumstances.

A. Final Action by Agency Following an Administrative Judge's Decision

When an Administrative Judge issues a decision under 29 C.F.R. §§ 1614.109 (b), (g), or (i), or § 1614.204(d)(7), the agency shall take final action on the complaint by issuing an order **within forty (40) days** of the date of its receipt of the Administrative Judge's decision. The agency's final order shall inform the complainant as to whether the agency will fully implement that decision. The term "fully implement" means that the agency adopts without modification the decision of the Administrative Judge. The agency's final order shall further inform the complainant of his/her right to file an appeal with the Commission, the right to file a civil action in a U.S. District Court, the name of the proper defendant in such appeal or civil action, and the applicable time limits for such appeals or civil actions. If the agency's final order does not fully implement the decision of the Administrative Judge, the agency shall file an appeal with the Commission in accordance with 29 C.F.R. § 1614.403, appending a copy of its

¹¹ See Chapter 6 of this Management Directive for the nature and content of an investigative summary.

appeal to the final order, simultaneously with its issuance of a decision to the complainant. A copy of EEOC Form 573, Notice of Appeal/Petition - Complainant, shall be attached to the final order.

When an Administrative Judge issues a decision under 29 C.F.R. § 1614.204(j), the agency shall take final action on the complaint by issuing an order **within sixty (60) days** of the date of its receipt of the Administrative Judge's decision. The agency's final order shall inform the class agent as to whether the agency will fully implement that decision. The term "fully implement" means that the agency adopts without modification the decision of the Administrative Judge. The agency's final order further shall inform the class agent of his/her right to file an appeal with the Commission, the right to file a civil action in a U.S. District Court, the name of the proper defendant in such appeal or civil action, and the applicable time limits for such appeals or civil actions. If the agency's final order does not fully implement the decision of the Administrative Judge, the agency shall file an appeal with the Commission in accordance with 29 C.F.R. § 1614.403, appending a copy of its appeal to the final order, simultaneously with its issuance of a decision to the class agent. A copy of EEOC Form 573, Notice of Appeal/Petition, shall be attached to the final order.

B. Final Actions in All Other Circumstances

When an agency dismisses an entire complaint under 29 C.F.R. § 1614.107(a), receives a request for an immediate final decision, or does not receive a reply to the notice issued under 29 C.F.R. § 1614.108(f), the agency will take final action by issuing a final decision. The final decision consists of findings by the agency on the merits of each claim in the complaint, or, as appropriate, the rationale for dismissing any claims in the complaint and, when discrimination is found, appropriate remedies, and relief in accordance with subpart E of Part 1614. The agency will issue the final decision within sixty (60) days of receiving notification that a complainant has requested an immediate final decision from the agency, or within 60 days of the end of the thirty (30)-day period for the complainant to request a hearing or an immediate final decision where the complainant has not requested a hearing or a decision. The final decision shall contain notice of the right to appeal the final action to the Commission, the right to file a civil action in a U.S. District Court, the name of the proper defendant in any such lawsuit, and the applicable time limits for appeals and lawsuits. A copy of EEOC Form 573, Notice of Appeal/Petition, shall be attached to the final decision/determination.

August, 2015**EEO MD-110**

CHAPTER 6 DEVELOPMENT OF IMPARTIAL AND APPROPRIATE FACTUAL RECORDS

I. INTRODUCTION

Section 1614.108(b) of Title 29 C.F.R. requires that “the agency shall develop an impartial and appropriate factual record upon which to make findings on the claims raised by the written complaint.” An appropriate factual record is one that allows a reasonable fact finder to draw conclusions as to whether discrimination occurred. Pursuant to that regulation, this Chapter prescribes the Equal Employment Opportunity Commission’s standards for impartiality and appropriateness in factual findings on formal complaints of discrimination. Further, because continuing education and training for employees working in federal EEO is vitally important, this Chapter also establishes a mandatory minimum training requirement for all investigators, including contract and collateral-duty investigators.

This Chapter is intended to ensure that federal agencies consistently develop sound factual bases for findings on claims raised in equal employment opportunity complaints while retaining the maximum flexibility in the use of fact-finding techniques and in the use of established dispute resolution plans. This Management Directive is not intended as an exhaustive guide for conducting investigations, but represents the standard that the Commission expects in an investigation.

II. MINIMUM TRAINING REQUIREMENTS FOR ALL INVESTIGATORS

All new EEO Investigators, including contract and collateral-duty investigators, must have completed at least thirty-two (32) hours of investigator training before conducting investigations. In addition to the training requirement for new investigators, all investigators are required to receive at least eight hours of continuing investigator training every fiscal year. The Commission has developed training courses to satisfy this requirement and offers them to agencies through its Revolving Fund Program on a fee-for-service basis. Agencies may also develop their own courses to satisfy this requirement or contract with others to provide training, as long as the training meets the standards provided below.

Management Directive
6-1

VA-18-0457-D-000214

4768

Page 214 of 574

A. Standards for New Investigator Training Requirement

The agency should provide training on the following:

1. An overview of the entire EEO process pursuant to 29 C.F.R. Part 1614. This segment must emphasize important time frames in the EEO process, including relevant time frames for investigation.
2. The role and responsibility of an EEO Investigator, as described in this Management Directive.
3. A thorough presentation of the relevant statutes, including Title VII of the Civil Rights Act of 1964, as amended (includes the Pregnancy Act of 1978), the Rehabilitation Act of 1973, as amended, the Americans with Disabilities Act, as amended, the Age Discrimination in Employment Act of 1967, as amended, the Equal Pay Act of 1963, as amended, and Title II of the Genetic Information Nondiscrimination Act of 2008, 42 U.S.C. § 2000ff et seq. This module must explain the theories of discrimination relevant to these statutes, including disparate treatment, adverse impact, and reasonable accommodation theories. This module must provide detailed instruction concerning issues attendant to fragmentation. See Chapter 5, Section III of this Management Directive.
4. Case management issues, including information on practical techniques concerning the timely investigation of complaints.
5. Remedies, including compensatory damages, attorney's fees, and costs. This module must provide investigators with practical information on how to gather relevant information in cases where remedies, attorney's fees, and costs are at issue.
6. Investigative techniques, such as the gathering and analysis of evidence. Participants should be provided with an opportunity to get practical, hands-on experience during this module on topics such as interviewing witnesses, making credibility determinations, and the gathering and reviewing of documentary and electronic evidence. Participants should be provided with case studies to work with so that investigative skills can be effectively developed.

August, 2015**EEO MD-110****B. Standards for Continuing Investigator Training**

The continuing eight hours of investigator training every fiscal year is intended to keep EEO Investigators informed of developments in EEO practice, law, and guidance, as well as to enhance and develop investigatory skills. Agencies are encouraged to conduct a needs assessment to determine specific investigative staff training needs. The Commission anticipates that these eight hours of continuing investigator training will include segments on legal and policy updates, regulatory and statutory changes, and investigative skills development.

III. RESPONSIBILITIES**A. Director of Equal Employment Opportunity**

The Director of Equal Employment Opportunity shall ensure that 1) all new investigators receive at least thirty-two (32) hours of introductory investigator training before conducting investigations and that all investigators receive at least eight hours of continuing investigator training every year; 2) the claim(s) in a complaint are thoroughly investigated; 3) all employees of the agency cooperate in the investigation; and 4) witness testimony is given under oath or affirmation and without a promise that the agency will keep the testimony or information provided confidential. See 29 C.F.R. § 1614.102(c)(5).

The EEO Director will also ensure that individual complaints are properly and thoroughly investigated and that all final actions are issued in a timely manner in accordance with 29 C.F.R. § 1614.110. The EEO Director also must ensure that there is no conflict of interest or appearance of conflict of interest in the investigation of complaints. See Chapter 1 Section 4 of this Management Directive for more information.

B. Equal Employment Opportunity Investigator

The Equal Employment Opportunity Investigator is a person officially designated and authorized to conduct inquiries into claims raised in EEO complaints. The authorization includes the authority to administer oaths and to require employees to furnish testimony under oath or affirmation without a promise of confidentiality. The investigator does not make or recommend a finding of discrimination.

A new investigator must have received, at a minimum, thirty-two (32) hours of investigator training before s/he conducts an investigation; experienced investigators must receive eight hours of training every fiscal year thereafter.

C. Complainant

The complainant must cooperate in the investigation and keep the agency informed of his/her current address. If an agency is unable to locate the complainant, the agency may dismiss the complaint, provided that reasonable efforts have been made to locate the complainant and the complainant has not responded within fifteen (15) days of the notice of proposed dismissal. 29 C.F.R. § 1614.107(a)(6).

Where the agency has provided the complainant with a written request to provide relevant information or otherwise proceed with the complaint, coupled with a 15-day notice of proposed dismissal, a failure to respond could result in dismissal of the complaint. See 29 C.F.R. § 1614.107(a)(7); Chapter 5, Section IV.B.1 of this Management Directive.

IV. INVESTIGATION

An investigation of a formal complaint of discrimination is an official review or inquiry, by persons authorized to conduct such review or inquiry, into claims raised in an EEO complaint.

The investigative process is non-adversarial. That means that the investigator is obligated to collect evidence regardless of the parties' positions with respect to the items of evidence.

A copy of the complaint shall be provided to the investigator prior to the commencement of the investigation.

Models for the analysis of common types of discrimination cases appear at Appendix J to this Management Directive.

A. Methods of Investigation

Investigative inquiries may be made using a variety of fact-finding models, such as the interview or the fact-finding conference, and a variety of devices, such as requests for information, position statements, exchange of letters or memoranda,

August, 2015**EEO MD-110**

interrogatories, and affidavits. The inquiry/review process may also incorporate some of the features of a dispute resolution plan.

B. Purpose of the Investigation

The purpose of the investigation is 1) to gather facts upon which a reasonable fact finder may draw conclusions as to whether an agency subject to coverage under the statutes that the Commission enforces in the federal sector has violated a provision of any of those statutes; and 2) if a violation is found, to have a sufficient factual basis from which to fashion an appropriate remedy.¹

C. General Investigative Requirements

The investigation shall include a thorough review of the circumstances under which the alleged discrimination occurred; the treatment of members of the complainant's group as compared with the treatment of other similarly situated employees, if any;² and any policies and/or practices that may constitute or appear to constitute discrimination, even though they have not been expressly cited by the complainant.

¹ The Commission enforces: (1) Section 717 of Title VII of the Civil Rights Act of 1964, as amended, 42 U.S.C. § 2000e-16; (2) Sections 501 and 505 of the Rehabilitation Act of 1973, as amended, 29 U.S.C. §§ 791 and 794a; (3) Section 15 of the Age Discrimination in Employment Act of 1967, as amended, 29 U.S.C. § 633a; (4) the Equal Pay Act, Section 6(d) of the Fair Labor Standards Act of 1938, as amended, 29 U.S.C. § 296(d); and (5) Title II of the Genetic Information Nondiscrimination Act of 2008, 42 U.S.C. § 2000ff et seq.

² Investigators are reminded that even where the complainant is unable to provide comparative data and the investigator similarly cannot obtain any such information, the investigator still must determine whether there is other evidence that may establish unlawful discrimination. In O'Connor v. Consolidated Coin Caterers Corp., 517 U.S. 308 (1996), the Supreme Court ruled that comparative evidence is not an essential element of a prima facie case of discrimination, but the complainant must come forward with sufficient evidence to create an inference of discrimination; that is, enough evidence that, if not rebutted, would support an inference that the agency's actions resulted from discrimination. Furnco Construction Co. v. Waters, 438 U.S. 567, 576 (1978). The Commission has issued enforcement guidance on O'Connor, entitled "EEOC Enforcement Guidance on O'Connor v. Consolidated Coin Caterers Corp.," (September 18, 1996), which is available on the Commission's website at http://www.eeoc.gov/laws/guidance/enforcement_guidance.cfm, in the "Enforcement Guidance and Related Documents" section.

D. Failure to Complete Investigation within Time Limit

Agencies are required to complete investigations within the earlier of 180 days after the filing of the last complaint or 360 days after the filing of the original complaint. Regardless of amendment of or consolidation of complaints, the investigation shall be complete in not more than 360 days, unless there is a written extension of not more than 90 days.

For example, if a complainant amends a complaint or files another complaint the agency will consolidate on day 179 of the originally filed complaint, then the investigation must be complete by the 359th day.

If the complainant wants to add another amendment on the 358th day of the investigation, the agency will have only 2 days to investigate that amendment unless the complainant agrees in writing to an extension of not more than 90 days. When no written extension exists and the agency is unable to conduct an impartial and appropriate investigation in 2 days it should not consolidate or accept the amendment rather, the agency should advise the complainant to seek counseling on the newest matter and process it as a new complaint.

See Chapter 5, Section V.C of this Management Directive regarding an agency's failure to complete the investigation in a timely manner.

V. THE ROLE OF THE INVESTIGATOR**A. Collecting and Discovering Factual Information**

The role of the investigator is to collect and to discover factual information concerning the claim(s) in the complaint under investigation and to prepare an investigative summary.

B. Variety of Methods Available

The investigator may accomplish his/her mission in a variety of ways. The investigator may function as:

1. a presiding official at a fact-finding conference;
2. an examiner responsible for developing material evidence;

August, 2015EEO MD-110

3. an issuer of requests for information in the form of requests for the production of documents, interrogatories, and affidavits;
4. a face-to-face interviewer in on-site visits; and/or,
5. any other role so long as appropriate investigative techniques/methods are utilized.

C. Investigator Must Be Unbiased and Objective

In whatever the mix of fact-finding activity selected for a particular case, the investigator must be and must maintain the appearance of being unbiased, objective, and thorough. S/he must be neutral in his/her approach to factual development. The investigator is not an advocate for any of the parties or interests and should refrain from developing allegiances to them. In addition, the following rules must be observed:

1. The person assigned to investigate shall not occupy a position in the agency that is directly or indirectly under the jurisdiction of the head of that part of the agency in which the complaint arose.
2. The investigator, if a contract investigator, shall not have been hired by or be obligated to the person(s) involved in the claims giving rise to the complaint. For example, where the contract monitor of EEO investigation contracts is alleged to have been involved in discriminatory activity, the use of the usual contract investigator would create an apparent bias because there is at best the appearance that the contract investigator could not be impartial.
3. An agency is prohibited, in some situations, from using its own immediate investigative resources, even though the investigation of discrimination complaints in the federal service is primarily an agency function and responsibility. In such cases the agency shall use alternatives, such as contract investigators or other outside sources. See Chapter I, Section IV of this Management Directive for additional information regarding conflict of interest cases. Such situations include, but are not limited to:
 - a. Particularly sensitive cases involving high-level officials (for example, complainant is an immediate subordinate of the head of the agency and the head of the agency is alleged to have taken discriminatory action).

Management Directive

6-7

VA-18-0457-D-000220

4774

- b. Potential conflict of interest (for example, complainant is an employee in the EEO office and names the EEO Director as the person taking the wrongful action).
- c. A small agency unable to carry out an unexpected EEO workload (for example, an agency with fewer than 450 employees, has a staff of part-time or ad hoc EEO Investigators, and is unable to absorb an additional investigative caseload).

D. Investigator Must Be Thorough

This means identifying and obtaining all relevant evidence from all sources regardless of how it may affect the outcome. Investigators need not expend the same amount of investigatory effort on each case, however. The proper scope of an investigation is dictated by the facts at issue. Investigators should not take a cookie-cutter, one-size-fits-all approach, as that wastes resources and delays resolution of the complaint. The investigation and the amount of effort expended should be appropriate to determine the claims raised by the complaint. An appropriate investigation is one that allows a reasonable fact finder to draw conclusions as to whether discrimination occurred.

An investigator should ensure that his/her questions are answered by a witness with personal knowledge of the facts rather than by a party's representative. The investigator need not concern himself/herself with balancing the amount of evidence supporting the complainant as compared with the amount of evidence supporting the agency. To ensure a balanced record, it is necessary only to exhaust those sources likely to support the complainant and the respondent. An investigation conducted in this manner might reveal that there is ample evidence to support the complainant's claims and no evidence to support the agency's version of the facts, or vice versa. Nevertheless, this investigation would be thorough. The best type of investigations allow for complainant to provide rebuttal evidence with sufficient time for the investigator to address any issues raised within the regulatory time frames.

August, 2015EEO MD-110

VI. EVIDENCE

A. Quality of Evidence

Evidence will be gathered from the complainant, witnesses, and other sources. In order to support findings and, ultimately, decisions, this evidence should be material to the complaint, relevant to the issue(s) raised in the complaint, and as reliable as possible.

1. Material Evidence

Evidence is material when it relates to one or more of the issues raised in the complaint or raised by the agency's answer to it. To determine whether evidence is material, one must look to the claims of discriminatory conduct and resultant harm contained in the complaint and the agency's answers to the claims. If the evidence relates to one or more of those claims, then it relates to the issues presented in the complaint, and it is material.

2. Relevant Evidence

Evidence is relevant if it tends to prove or disprove a material issue raised by a complaint. Relevancy and materiality are often used interchangeably. Generally, relevance is the more important concept in an investigation. If evidence is not relevant, whether it is material is of little consequence. A test of relevance is to ask, "What does this evidence tend to prove?" If the answer is that it tends to prove or disprove a proposition that is related to the complaint, then the evidence is relevant.

3. Reliable Evidence

Evidence is reliable if it is dependable or trustworthy. Evidence should not be ignored because it is of questionable reliability. Such evidence may lead to evidence that is reliable.

Some factors to consider in determining whether testimony is reliable are: whether the witness's testimony is based on his/her own experience and personal knowledge, or based on rumor, hearsay, or innuendo; whether the testimony is a statement of fact or is merely a conclusion; and whether witnesses have an interest in the outcome of the complaint, or are otherwise biased.

Some factors to consider in determining whether documents are reliable are: whether they were prepared in response to the investigation or whether they are maintained in the ordinary course of business; whether they are obtained from the custodian of records or the author of the document; and whether the documents are signed and/or dated.

The federal rules of evidence were designed to set limits on the reliability of documents and testimony entered in evidence in court. Such formal rules will not be strictly applied in the collection of evidence for the investigation of federal equal employment opportunity complaints. Such rules may be used, however, as a guide in assessing the evidentiary weight to be given particular items of evidence.

B. Types of Evidence

There are many types of evidence which can be obtained on the issues raised in an equal employment complaint. The three basic types of evidence are direct evidence, circumstantial evidence, and statistical evidence.

1. Direct Evidence

Direct evidence is evidence that proves a fact without resort to inference or presumption. Black's Law Dictionary (9th ed. 2009). For example, in the morning the ground is covered with snow. If you looked out the window the night before and saw it snowing then, you have direct evidence that it snowed during the night. You need not draw any inference to reach the factual conclusion that it snowed during the night.

Direct evidence is relevant in cases involving disparate treatment where the question is whether the employer intentionally treated employees differently because of a protected factor. It is also relevant in cases involving the effect of policies where the question is whether the policy disparately treats all employees in the protected class.

Direct evidence is rare. The statement, "I would never hire you for that job because you are a woman," is direct evidence of discrimination on the basis of sex in hiring, but would not be direct evidence if the issue involved a performance appraisal, for example.

Agencies must take care to distinguish between direct evidence of bias and direct evidence of discrimination. Direct evidence of bias may be strong but circumstantial evidence of discrimination in a particular case. For

August, 2015EEO MD-110

example, the statement, “I would never hire a woman for that job,” is direct evidence of bias, as not directed towards any specific person. See [Heim v. State of Utah](#), 8 F.3d 1541, 1546 (10th Cir. 1993). In contrast, a statement to a complainant that you “may be getting too old to understand the store’s new computer programs” was deemed direct evidence of discrimination in [Wright v. Southland Corp.](#), 187 F.3d 1287, 1304 (11th Cir. 1999) because it was directed at a specific person.

2. Circumstantial Evidence

Circumstantial evidence is evidence based on inference. [Black’s Law Dictionary](#) (9th ed. 2009). In other words, the fact finder must draw an inference from the evidence to reach a factual conclusion.

For example, if you looked out the window at night and the ground was bare, but when you look out the window the next morning, there is snow on the ground, the snow on the ground is circumstantial evidence that it snowed during the night. From the presence of snow on the ground, you reasonably may infer that it snowed during the night. You have drawn an inference to reach the factual conclusion that it snowed during the night.

There are different types of circumstantial evidence. For example, comparative evidence must be sought in every case alleging disparity in treatment on a basis protected by a law enforced by the Commission. Comparative evidence is evidence regarding how similarly situated persons outside of the complainant’s protected groups were treated.

In general, similarly situated means that the persons who are being compared are so situated that it is reasonable to expect that they would receive the same treatment as the complainant in the context of a particular employment decision. It is important to remember that individuals may be similarly situated for one employment decision, but not for another. For example, a female GS-4 clerk-typist may be similarly situated to a male GS-7 paralegal in a discrimination case involving the approval of annual leave where the same rules are applied to both employees by the same supervisor or where both are in the same unit or subject to the same chain of command. The investigator would be obligated to find out whether there were persons, not named by the complainant but similarly situated, whose treatment could be compared to the complainant’s treatment.³ Both

³ While comparative evidence is important, it is not always available, and an investigator may be able to obtain other evidence of discrimination. So while the investigator should make an effort to obtain comparative evidence, s/he also should make an effort to determine whether there may be other evidence

the complainant and the responding management official should provide a list of comparators for the challenged action.

Other types of circumstantial evidence may include general statements indicative of bias (see the example in “Direct Evidence,” above), conduct (for example, a selecting official repeatedly has selected only males for job vacancies, despite the availability of best-qualified female candidates), or environment (for example, an absence of Hispanics in the workplace despite their availability in the relevant labor force). Circumstantial evidence may overlap with statistical evidence.

3. Statistical Evidence

Statistical evidence or a survey of the general environment may be conducted as appropriate. For example, this evidence may be probative when claims involve the comparative treatment of groups, as in a claim of a pattern or practice of discrimination, or the adverse effect of an agency policy or practice.

C. Sources of Evidence

1. The Complainant

The complaint will generally provide the initial information concerning the bases, issues, and incidents that gave rise to the complaint of discrimination. The complaint may also indicate the reason, if any was given, for any adverse employment decision. Additional background and detailed information must be obtained from the complainant and recorded through written questions and answers (interrogatories), recorded interviews (using handwritten notes or verbatim transcription), an exchange of letters or memoranda, or a fact-finding conference. This information should include medical documentation, where necessary. Witness testimony intended to be made a part of the complaint file should be made under oath or affirmation or penalty of perjury.

Volume II of the Commission’s Compliance Manual will assist in developing inquiries. That volume contains substantive topics arranged in sections. Most sections contain advice on what questions to ask when certain issues are raised. The Commission’s Compliance Manual is

equally probative of discrimination.

August, 2015**EEO MD-110**

published commercially and is available at many libraries and at the Commission's district, area, and field offices. In addition, newly issued sections of the Compliance Manual and Commission policy guidance on issues such as reprisal, definition of disability, reasonable accommodation, and sexual harassment are available on the Commission's website at: <http://www.eeoc.gov/laws/guidance/compliance.cfm>.

2. The Agency

Information from the agency may be obtained initially through a request for information. Consult the agency EEO Director for instructions concerning to whom to direct the request.

Follow-up information should be obtained in a variety of ways, including further requests, affidavits, interrogatories, or a fact-finding conference.

In most instances, the individual who initiated or enforced the decision or engaged in the action about which the complaint was filed should be interviewed early in the investigation. His/her reasons for the action will often open other avenues to explore.

For this reason, a management official's explanation of a challenged action should be detailed and specific. In a non-selection type case, stating the person selected was better qualified or a better fit for the position is insufficient standing alone. Interview notes and any explanation should include a narrative as to why the management official believes the selectee was a better candidate.

3. Witnesses

Witnesses can be identified by asking the complainant, the official involved in the alleged discriminatory action, or other obvious witnesses if they are aware of other persons who might have information related to the complaint. Witnesses need not be employees at the respondent agency.

- a. The EEO staff may be of some assistance in discovering other witnesses, but they should rarely be witnesses themselves. Their information will usually be hearsay and their participation as witnesses would compromise their objectivity. Information should be obtained from its primary source.
- b. Witness bias should be noted when it is discovered. The following should be noted: 1) favorable feelings toward a party based on a

Management Directive
6-13

VA-18-0457-D-000226

4780

mutual alliance, family ties, or close friendship; 2) hostility to a party, because of a past disagreement; and 3) self-interest in the outcome of the complaint are some indicators of potential bias. The indicators should be made a part of the record, and efforts should be made to corroborate the testimony. The weight accorded the evidence by the fact finder adduced from such witnesses will be governed by the degree to which it can be determined that the bias colored the testimony.

4. Documentary Evidence

All relevant documents should be obtained. The complainant, the supervisor, the manager who took the personnel action, or the personnel office of the agency may be sources to help identify relevant documents.

Statistical evidence usually can be obtained through the EEO Office or the personnel office of the agency.

D. Evidence on the Question of Remedies

The investigator should gather evidence that will allow for an appropriate remedy to be fashioned. This essentially means that a determination of the parameters of relief should be made and the appropriate inquiries developed. Agencies should be aware that, during the investigative process, they need to address evidence that may be used in connection with framing remedies. Evidence on the question of remedies may include evidence of a complainant's interim earnings or subsequent promotions (in a discharge or non-promotion case), compensatory damages, or other mitigating factors. For a source of information concerning compensatory damages, see [Enforcement Guidance; Compensatory and Punitive Damages Available under § 102 of the Civil Rights Act of 1991](#), N-915.002 (July 14, 1992).⁴

⁴ The Commission prepared this Enforcement Guidance for use in both public and private EEO litigation. The discussion in the Enforcement Guidance concerning punitive damages does not apply to federal sector EEO.

August, 2015EEO MD-110

VII. WITNESSES AND REPRESENTATIVES IN THE FEDERAL EEO PROCESS

The procedures outlined here relate specifically to the processing of individual complaints of discrimination under 29 C.F.R. § 1614.108. The principles reflected in these procedures, however, should also guide the processing of class complaints of discrimination under 29 C.F.R. § 1614.204.

A. Disclosure of Investigative Material to Witnesses

1. To the Complainant

The complainant must receive a copy of the complaint file and a transcript of the hearing, if a hearing is held. The complainant should be given the opportunity to receive a copy of the complaint file and hearing transcript in an electronic format as an alternative to the paper files/documents. The complainant should receive the same copy of the complaint file as the agency counsel does and where a hearing was requested as the Administrative Judge does.

2. To Other Witnesses

During the investigation, the investigator may disclose information and documents to a witness who is a federal employee where the investigator determines that the disclosure of the information or documents is necessary to obtain information from the witness, for example, to explain the claims in a complaint or to explain a manager's articulated reason for an action in order to develop evidence bearing on that reason. Explanations of a witness' credibility are helpful, and the investigator should include observations on credibility without making a final conclusion as to credibility.

B. Travel Expenses**1. Witness Employed by the Federal Government**

Section 1614.605(f) of 29 C.F.R. requires that a witness be in an official duty status when his/her presence is required or authorized by agency or Commission officials in connection with a complaint. A witness is entitled to travel expenses. If a witness is employed at an agency other than the one against which the complaint is brought and must travel to provide the attestation or testimony, the witness is entitled to reimbursement for travel expenses. The current employing agency of a federal employee must initially authorize and pay the employee's travel expenses and is entitled to reimbursement from the responding agency, which is ultimately responsible for the cost of the employee's travel. [John Booth - Travel Expenses of Witness - Agency Responsible](#), File: B-235845, 69 Comp. Gen. 310 (1990). An agency would not be responsible for paying the travel expenses of non-federal witnesses.

2. Complainant or Applicant Not Employed by Federal Government

The agency is not responsible, however, for paying the travel expenses of a complainant or applicant who is not employed by the federal government. Although the complainant who, for purposes of his/her complaint is a witness, may once have been employed by the agency against whom s/he complains, the termination of the employment status with the federal government also terminates any federal obligation to pay travel expenses associated with prosecution of the complaint. [Expenses of Outside Applicant Complainant to Travel to Agency EEO Hearing](#), File: B-202845, 61 Comp. Gen. 654 (1982).

C. Official Time

Section 1614.605 of 29 C.F.R. provides that individuals/complainants are entitled to a representative of their choice during the administrative EEO pre-complaint counseling and at all stages of the administrative EEO complaint process. Both the complainant and the representative, if they are employees of the agency where the complaint arose and was filed, are entitled to a reasonable amount of official time to present the complaint and to respond to agency requests for information, if otherwise on duty. 29 C.F.R. § 1614.605(b). Former employees of an agency who initiate the EEO process concerning an adverse action relating to their prior employment with the agency are employees within the meaning of 29 C.F.R. § 1614.605, and their representatives, if they are current employees of the agency,

August, 2015EEO MD-110

are entitled to official time. Witnesses who are federal employees, regardless of whether they are employed by the respondent agency or some other federal agency, shall be in a duty status when their presence is authorized or required by Commission or agency officials in connection with the complaint.

1. Reasonable Amount of Official Time

“Reasonable” is defined as whatever is appropriate, under the particular circumstances of the complaint, in order to allow a complete presentation of the relevant information associated with the complaint and to respond to agency requests for information. The actual number of hours to which complainant and his/her representative are entitled will vary, depending on the nature and complexity of the complaint and considering the mission of the agency and the agency’s need to have its employees available to perform their normal duties on a regular basis. The complainant and the agency should arrive at a mutual understanding as to the amount of official time to be used prior to the complainant’s use of such time. Time spent commuting to and from home should not be included in official time computations because all employees are required to commute to and from their federal employment on their own time.

2. Meeting and Hearing Time

Most of the time spent by complainants and their representatives during the processing of a typical complaint is spent in meetings and hearings with agency officials or with the Commission Administrative Judges. Whatever time is spent in such meetings and hearings is automatically deemed reasonable. Both the complainant and the representative are to be granted official time for the duration of such meetings or hearings and are in a duty status regardless of their tour of duty. If a complainant or representative has already worked a full week and must attend a hearing or meeting on an off day, that complainant or representative is entitled to official time, which may require that the agency pay overtime. The complainant should notify the agency of the meeting and hearing schedule as soon as possible.

3. Preparation Time

Since presentation of a complaint involves preparation for meetings and hearings, as well as attendance at such meetings, conferences, and hearings, complainants and their representatives are also afforded a reasonable amount of official time, as defined above, to prepare for meetings and hearings. They are also to be afforded a reasonable amount of official time to prepare the formal complaint and any appeals that may be filed with the Commission, even though no meetings or hearings are involved. However, because investigations are conducted by agency or Commission personnel, the regulation does not envision large amounts of official time for preparation purposes. Consequently, “reasonable,” with respect to preparation time (as opposed to time actually spent in meetings and hearings), is generally defined in terms of hours, not in terms of days, weeks, or months. Again, what is reasonable depends on the individual circumstances of each complaint. See [Murry v. General Services Administration](#), EEOC Appeal No. 0120093069 (July 26, 2012).

4. Aggregate Time Spent on EEO Matters by Representative

The Commission considers it reasonable for agencies to expect their employees to spend most of their time doing the work for which they are employed. Therefore, an agency may restrict the overall hours of official time afforded to a representative, for both preparation purposes and for attendance at meetings and hearings, to a certain percentage of that representative’s duty hours in any given month, quarter, or year. Such overall restrictions would depend on the nature of the position occupied by the representative, the relationship of that position to the mission of the agency, and the degree of hardship imposed on the mission of the agency by the representative’s absence from his/her normal duties. The amount of official time to be afforded to an employee for representational activities will vary with the circumstances.

Moreover, 29 C.F.R. § 1614.605(c) provides that in cases where the representation of a complainant or agency would conflict with the official or collateral duties of the representative, the Commission or the agency may, after giving the representative an opportunity to respond, disqualify the representative. At all times, the complainant is responsible for proceeding with the complaint, regardless of whether s/he has a designated representative.

The Commission does not require agencies to provide official time to employee representatives who are representing complainants in cases

Management Directive
6-18

VA-18-0457-D-000231

4785

August, 2015**EEO MD-110**

against other federal agencies. However, the Commission encourages agencies to provide such official time.

5. Requesting Official Time

The agency must establish a process for deciding how much official time it will provide a complainant. Agencies further must inform complainants, their representatives, and others who may need official time, such as witnesses, of the process and how to claim or request official time.

6. Denial of Official Time

If the agency denies a request for official time, either in whole or in part, the agency must include a written statement in the complaint file noting the reasons for the denial. If the agency's denial of official time is made before the complaint is filed, the agency shall provide the complainant with a written explanation for the denial, which it will include in the complaint file if the complainant subsequently files a complaint. Where a request for official time is denied in whole or part while an Administrative Judge is presiding over the matter, a copy of the agency's denial of official time with the requisite explanation should be provided to the Administrative Judge when provided to the requestor.

D. Duty Status/Tour of Duty

For purposes of these regulations, "duty status" means the complainant's or representative's normal hours of work.

It is expected that the agency will, to the extent practical, schedule meetings during the complainant's normal working hours and that agency officials shall provide official time for complainants and representatives to attend such meetings and hearings.

If meetings, conferences, and hearings are scheduled outside of the complainant's or the representative's normal work hours, agencies should adjust or rearrange the complainant's or representative's work schedule to coincide with such meetings or hearings, or grant compensatory time or official time to allow an approximately equivalent time off during normal hours of work. The selection of the appropriate method for making the complainant or representative available in any individual circumstance shall be within the discretion of the agency.

Management Directive
6-19

VA-18-0457-D-000232

4786

Any reasons for an agency's denial of official time should be fully documented and made a part of the complaint file, and if an Administrative Judge is presiding over the matter at the time of the request, then it should be provided to the Administrative Judge at the same time as it is provided to the requestor.

Witnesses, who are federal employees, regardless of their tour of duty and whether they are employed by the respondent agency or another federal agency, must be in a duty status when their presence is authorized or required by Commission or agency officials in connection with a complaint.

E. Use of Government Property

The complainant's or complainant's non-attorney representative's use of government property (copiers, telephones, word processors, computers, internet, printers, and email) must be authorized prior to their use by the agency and must not cause undue disruption of agency operations.

VIII. COMPLAINT FILE

A. Contents of the Complaint File

The complaint file must include all various documents and information acquired during the fact-finding under this Directive. The complaint file will be assembled as an electronic document, unless the agency has demonstrated good cause as to why the agency cannot produce a digital copy of the file, in which case a paper file may be submitted. While cost alone does not constitute good cause why an agency cannot submit files in a digital format, OFO will consider facts such as undue cost, undue burden, national security concerns, and other reasonable bases. The complaint file must contain all documents pertinent to the complaint, and be in the form and format as provided in Appendix L, as demonstrated in the sample complaint file available on the Commission's website at www.eeoc.gov/federal/.

B. Complaint Files Should Not Include

The complaint file should not include confidential documentation concerning the substance of attempts to resolve the complaint during informal counseling or during any alternative dispute resolution procedure.

August, 2015**EEO MD-110****C. Redactions**

Agencies should not place non-relevant information in complaint files. Where names, social security numbers, home addresses, and any other personal identifying information are not relevant, that information should be redacted before the document containing them is included in the complaint file. Relevant information that should not be redacted includes management and/or comparative employees'/applicants' names. Once a document is included in the complaint file, the complainant has a right to the entire file. All parties including the agency representative, the complainant and his/her counsel, and the Administrative Judge should all have the same complaint file, either without redactions or containing the same redactions.⁵

D. Features of the Complaint File

The digital complaint file shall have the following features:

1. File should be image over text or run through OCR text recognition such that it is a searchable document.
2. It should contain digital bookmarks identifying key documents, exhibits, and sections of the file as specified below. Bookmarks should be labeled in a manner that clearly identifies the key documents, (for example, EEO Counselor's Report, rather than generic labels) within each identified section.⁶
3. It should contain a typed summary of the investigation signed and dated by the investigator and containing a discussion and analysis of the evidence. See Section IX of this Chapter.

E. Organization of the Complaint File

Agencies should organize complaint files in the following manner, with digital bookmarks specifically identifying the section and key documents therein.

⁵ Except for Memorandums of Understandings (MOUs) currently in place for national security purposes, any previous information from the Commission's offices regarding redactions, upon which agencies are relying to redact complaint files, is hereby obsolete.

⁶ Where an agency has shown good cause as to why it cannot submit the complaint file in a digital format and received an exception letter to file a paper file, the agency should substitute the word "tab" for "section" in the below guidance.

EEO MD-110**August, 2015**

Title Page - should contain at a minimum the information set forth in the sample at Appendix L.

Section 1 - should contain the formal complaint (bookmarked) and documents submitted by the complainant.

Section 2 - should contain the EEO Counselor's report (bookmarked) and all documents generated in the informal process pursuant to 29 C.F.R. § 1614.105(c). Included here should be the notice of right to file a complaint (bookmarked) pursuant to 29 C.F.R. § 1614.105(d).

Section 3 - should contain the agency's notice of claims to be investigated (bookmarked) pursuant to Section IV.A.1 of this Chapter. Copies of any other documents bearing on delineation of the claims to be investigated should also be included. Documents pertaining to the partial dismissal of claim(s) (bookmarked) and/or the notice of late investigation should be included in this tab.

Section 4 - should contain documented attempts at resolution; including any settlement agreement reached on any aspect of the complaint (bookmarked); however, documentation should not include the substance of such attempts.

Section 5 - should contain any documentation of appellate activity and any decisions affecting the processing of the complaint if any (bookmarked).

Section 6 - should contain the summary of investigation/summary analysis of the facts (bookmarked). The summary should cite to exhibits and evidence (bookmarked) and be signed and dated by the investigator.

Section 7 - should contain the investigative evidence and documents in a logical order. The notice of incomplete investigation pursuant to 29 C.F.R. § 1614.108(g), if one was issued, should be included.

Section 8 - (if applicable) should contain all pre-hearing submissions, including those relevant to summary judgment, and all discovery documentation, and motions, orders, exhibits (bookmarked), and transcripts (bookmarked).

Management Directive
6-22

VA-18-0457-D-000235

4789

August, 2015**EEO MD-110**

Section 9 - (if applicable) should contain all submissions from an administrative hearing, including motions, exhibits (bookmarked), and transcripts (bookmarked).

Section 10 - (if applicable) should contain the decision(s) of the Commission's Administrative Judge (bookmarked).

Section 11 - should contain the Final Agency Action (bookmarked) and any documentation related to service on the parties.

Section 12 - should contain any miscellaneous material.

If an agency has submitted a digital complaint file to a Commission Administrative Judge documents added after the original complaint file was compiled may be submitted in a separate PDF file that must contain a title page and bookmarks to the applicable sections of the original file where the documents belong.

F. Availability of Complaint Files

The complainant and his/her representative shall be entitled to one copy each of the complaint file and investigative summary either at the time that the investigation is completed or when the agency sends the complainant the notice required by 29 C.F.R. § 1614.108(f), whichever is earlier. The complainant and his/her representative should be given the option to receive these documents in a digital and/or paper medium.

G. Disposition of Complaint Files

1. Effective December 8, 1998, the National Archives and Records Administration (NARA) revised [General Records Schedule \(GRS\) 1, Item 25, titled Equal Employment Opportunity Records](#), provides:

Management Directive
6-23

VA-18-0457-D-000236

4790

Page 236 of 574

Equal Employment Opportunity Records.

a. Official Discrimination Complaint Files.

Originating agency's file containing complaints with related correspondence, reports, exhibits, withdrawal notices, copies of decisions, records of hearings and meetings, and other records. Cases resolved within the agency, by the Commission, or by a U.S. Court.⁷

Authorized Disposition

Destroy four years after resolution of case.

2. The agency originating the equal employment opportunity case will retain the original ("official") file during the appeals process and send only duplicate copies of documents to the Commission for use in the appeal. The agency sending the duplicates will certify that the file contains everything that is in the original.
3. The Commission will create documents relating to the appeal, but will file such documents apart from the materials sent by the originating agency. After resolution of the appeal, the Commission will destroy all duplicate materials, but will retain the appeals documentation for four years. The originating agency will retain the original file for four years after resolution of the case. The Commission will retain the appeals documentation and will answer Freedom of Information Act requests on the appeals file. The Commission will maintain the security of documents as required by Federal Statutes and Executive Orders.
4. The originating agency will be responsible for retiring the original case file to the Federal Records Center, and answering Freedom of Information Act requests on the original file. Requests for disclosure, which the Commission determines are requests for the agency's complaint file, will be forwarded to the agency for a response.
5. Further information concerning the disposition of records under this section may be obtained by reviewing [NARA GRS 1](#), which is available on the NARA website at www.nara.gov or by contacting:

⁷ See Section VIII of this Chapter for a description of the documents contained in the complaint file. This schedule applies regardless of whether case files are in paper or electronic format.

IX. THE INVESTIGATIVE SUMMARY

The investigative summary is a narrative document that succinctly states the issues and delineates the evidence addressing both sides of each issue in the case. The summary should state facts (supported in the complaint file) sufficient to sustain a conclusion(s). The summary should cite to evidence and the exhibits collected.

X. COMPLAINANTS' OPPORTUNITY TO REVIEW THE INVESTIGATIVE FILE

Within the appropriate time frame for finishing an investigation under 29 C.F.R. § 1614.108(e), and prior to issuance of the notice required by 29 C.F.R. § 1614.108(f), agencies are encouraged to allow complainants and their designated representatives an opportunity to examine the investigative file and to notify the agency, in writing, of any perceived deficiencies in the investigation prior to transferring the case to the Commission for a hearing or prior to taking a final action without a hearing. A copy of the complainant's notification to the agency of perceived deficiencies must be included in the investigative file together with a written description by the agency of the corrective action taken.

If the agency agrees with alleged deficiencies in the investigation as identified by the complainant, the agency must immediately correct them. If the investigation period has ended or is about to end, the agency should request agreement from the complainant to extend the investigation period pursuant to 29 C.F.R. § 1614.108(e). If the agency does not agree with the complainant's claimed deficiencies in the investigative file, the agency will prepare a statement explaining the rationale for the disagreement and include it in the investigative file along with the complainant's notice of claimed deficiencies.

When the agency affords the complainant the opportunity to review the draft report of investigation, it should also afford the agency representative the same option.

Management Directive
6-25

VA-18-0457-D-000238

4792

Page 238 of 574

XI. SANCTIONS FOR FAILURE TO COOPERATE DURING THE INVESTIGATION

Agencies and complainants each have a duty to cooperate with the investigator during the investigation. See 29 C.F.R. § 1614.108(c)(1). Pursuant to 29 C.F.R. § 1614.108(c)(3), a party to a complaint - the complainant as well as the agency - may be subject to sanctions where it fails without good cause shown to respond fully and in a timely fashion to a request of the investigator for documents, records, comparative data, statistics, affidavits, or the attendance of witnesses. The investigator shall make a note in the investigative file concerning the party's failure without good cause shown to comply with a request for information or the attendance of witnesses, and the decision maker (Administrative Judge during the hearing process or the agency where the complainant requests a final agency decision) or the Commission on appeal may, in appropriate circumstances:

1. draw an adverse inference that the requested information, or the testimony of the requested witness, would have reflected unfavorably on the party refusing to provide the requested information;
2. consider the matters to which the requested information or testimony pertains to be established in favor of the opposing party;
3. exclude other evidence offered by the party failing to produce the requested information or witness;
4. issue a decision fully or partially in favor of the opposing party; or
5. take such other actions as it deems appropriate.

An investigator should inform the party from which it seeks documents, records, comparative data, statistics, affidavits, or the attendance of witnesses that failure to comply with the request may lead to the imposition of sanctions from the decision maker or the Commission on appeal. An investigator may, in an initial request for information or the attendance of witnesses, advise the party that, absent good cause shown, the party has a duty to respond fully and in a timely fashion to the investigator's request and that failure to do so may result in the imposition of the sanctions set forth at 29 C.F.R. § 1614.108(c)(3). Where the investigator does not so inform the party upon making the request, s/he may advise the party upon the party's failure to comply with the request. If the investigator properly advised the party that a failure to comply with the request may result in the sanctions set forth at 29 C.F.R. § 1614.108(c)(3), the decision maker or Commission on appeal may impose such sanctions upon receipt and review of the complaint/appeal file.

August, 2015

EEO MD-110

XII. SANCTIONS FOR FAILURE TO DEVELOP AN IMPARTIAL AND APPROPRIATE FACTUAL RECORD

Section 1614.108(b) of 29 C.F.R. requires that an agency develop an impartial and appropriate factual record upon which to make findings on the claims raised in the written complaint. The Commission's regulations explain that an appropriate factual record is one that allows a reasonable fact finder to draw conclusions as to whether discrimination occurred." 29 C.F.R. § 1614.108(b). The Commission's Administrative Judges and the Office of Federal Operations have the authority to issue sanctions against an agency for its failure to develop an impartial and appropriate factual record in appropriate circumstances.⁸

Where it is clear that the agency failed to develop an impartial and appropriate factual record, an Administrative Judge may exercise his/her discretion to issue sanctions. In such circumstances, the sanctions listed in 29 C.F.R. § 1614.109(f)(3) are available. See [Petersel v. U.S. Postal Service](#), EEOC Appeal No. 0720060075 (Oct. 30, 2008)(Administrative Judge properly drew an adverse inference against the agency when the investigative report failed to include any comparative data on other employees); [Royal v. Dep't. of Veterans Affairs](#), EEOC Appeal No. 0720070045 (September 25, 2009)(finding that the agency's delay in completing the investigation within the 180-day regulatory period is no small noncompliance matter and warrants a sanction). Even when an agency eventually completes the investigation during the hearing stage an Administrative Judge may issue sanctions in appropriate circumstances.⁹

Before an Administrative Judge may sanction an agency for failing to develop an impartial and appropriate factual record, the Administrative Judge must issue an order to

⁸ The Commission recognizes that agencies will not always meet their regulatory burden to conduct such comprehensive investigations, such as when amendments to complaints or consolidation of complaints occur late in the process. It is the Commission's intent that where a hearing is properly requested and where there has been no investigation or there is an incomplete or inadequate investigation, the record in the case shall be developed under the supervision of the Administrative Judge assigned to the case. See, for example, [Menoken v. Social Security Administration](#), EEOC Appeal No. 01A32052 (Jan. 3, 2005); but see also [Cox v. Social Security Administration](#), EEOC Appeal No. 0720050055 (Dec. 24, 2009) (finding that the purpose of discovery in the hearing process is to perfect the record, but it is not a substitute for an appropriate investigation; moreover, not every complainant chooses the option of requesting a hearing).

¹⁰ See [Myvett v. Court Services & Offender Supervision Agency](#), EEOC Appeal No. 0120103671 (Feb. 8, 2011), request for reconsideration denied, EEOC Request No. [0520110349](#) (Nov. 21, 2011) (upholding Administrative Judge's sanctions where agency submitted complaint file without a report of investigation and almost nine months later submitted a report of investigation to the Administrative Judge after failing to reply to two Orders to Complete the Investigation).

the agency or request the documents, records, comparative data, statistics, or affidavits. 29 C.F.R. § 1614.109(f)(3). Such order or request shall make clear that sanctions may be imposed and the type of sanction that could be imposed for failure to comply with the order unless the agency can show good cause for that failure. See [Rountree v. Dep't. of the Treasury](#), EEOC Appeal No. 07A00015 (July 17, 2001). The notice to show cause to the agency may, in appropriate circumstances, provide the agency with an opportunity to take such action as the Administrative Judge deems necessary to correct the deficiencies in the record. This may include curing the defects in the investigation caused by improper interference by the agency's general counsel, if possible; and/or disqualifying counsel from continuing to represent the agency before the Commission. The Administrative Judge also shall provide the agency with a reasonable period of time within which to take the action that the Administrative Judge has deemed necessary. Only on the failure of the agency to comply with the Administrative Judge's order or request and the notice to show cause may the Administrative Judge impose a sanction or the sanctions identified in the order or request.¹⁰

XIII. OFFER OF RESOLUTION

The Commission encourages the resolution of complaints at all times in the complaint process through a variety of settlement mechanisms. Section 1614.109(c) of 29 C.F.R. provides for one of these mechanisms by permitting agencies to make an "offer of resolution" to complainants. The Commission believes that this provision will provide incentive for agencies and complainants to resolve complaints and that it will conserve agency resources where settlement reasonably should occur. If a complainant does not accept an offer of resolution made in accordance with the requirements of 29 C.F.R. § 1614.109(c) and subsequently obtains less relief than had been offered, the complainant's attorney's fees will be limited, as described below. It should be emphasized that the offer of resolution is only one mechanism by which complaints may be settled.

A. Elements of the Offer

An offer of resolution made pursuant to 29 C.F.R. § 1614.109(c) can be made to a complainant who is represented by an attorney at any time after the filing of a formal

¹⁰ Where an agency did not complete an investigation of late-filed amendments to complaints or late-consolidated complaints because the complainant either requested a hearing before the full investigatory period ended or the amendments and consolidation occurred late in the process, sanctions for inadequate records would be inappropriate. Sanctions only would be appropriate where a party subsequently fails to comply with an order or request of the Administrative Judge that puts the party on notice of the type of sanction that may be imposed for noncompliance.

August, 2015**EEO MD-110**

complaint until thirty (30) days before a hearing. If, however, the complainant is not represented by an attorney, an offer of resolution cannot be made before the case is assigned to an Administrative Judge for a hearing. (These time and representation provisions apply only to offers of resolution and do not restrict the parties from discussing settlement or engaging in an alternate dispute resolution process in an effort to resolve an EEO complaint.)

Complainants have 30 days from receipt of an offer of resolution to consider the offer and decide whether to accept it. Offers of resolution must be in writing and must explain to the complainant the possible consequences of failing to accept the offer. The agency's offer, to be acceptable, must include attorney's fees and costs, and must specify any non-monetary relief. The agency may offer a lump sum payment that includes all forms of monetary liability, including attorney's fees and costs, or the payment may itemize the amounts and types of monetary relief being offered. Complainant's acceptance of the offer must also be in writing. Upon acceptance, the complaint is settled in full and processing ceases.

If a complainant decides not to accept the offer, the agency takes no immediate action, and the complaint continues to be processed normally. After the hearing is completed, if the Administrative Judge (or the Commission on appeal) concludes that discrimination has occurred, but provides for less relief than the amount offered by the agency earlier in its offer of resolution, then the agency may use complainant's decision not to accept its offer of resolution to argue for a reduction in its obligation to pay complainant's attorney's fees. In general, if a complainant fails to accept a properly made offer, and the relief ordered on the complaint is not more favorable than the offer, then the complainant will not receive payment from the agency for attorney's fees or costs incurred after the expiration of the 30-day acceptance period.

It should be noted, however, that an exception to this general rule exists where the interests of justice would not be served. An example of an appropriate use of the interests of justice exception is where the complainant received an offer of resolution, but was informed by a responsible agency official that the agency would not comply in good faith with the offer (for example, would unreasonably delay implementation of the relief offered). If the complainant did not accept the offer for that reason, and then obtained less relief than was obtained in the offer, it would be unjust to deny attorney's fees and costs.

A complainant's failure to accept an offer of resolution does not preclude the agency from making other offers of resolution or either party from seeking to negotiate a settlement of the complaint at any time.

When comparing the relief offered in an offer of resolution with that actually obtained, the Commission intends that non-monetary as well as monetary relief be considered.

Management Directive
6-29

VA-18-0457-D-000242

4796

Page 242 of 574

Although a comparison of non-monetary relief may be inexact and difficult in some cases, non-monetary relief can be significant and cannot be overlooked. Attorney's fees and costs incurred after the offer of resolution may not be included in the amount actually obtained for comparison purposes. For guidance, parties may wish to refer to court cases deciding issues involving an offer of judgment made pursuant to Rule 68 of the Federal Rules of Civil Procedure. See, for example, [Marek v. Chesney](#), 473 U.S. 1 (1985). While not identical, the Commission's offer of resolution provision was modeled on the Rule 68 offer of judgment process.

B. Model Language for the Offer

The preamble to the Commission's regulations noted that this Management Directive would include model language for agency use in extending offers of resolutions:

This offer of resolution is made in full satisfaction of the claims of employment discrimination that you have made against [name of agency] in [identify the complaint by number or other clear and unambiguous designation]. This offer includes all of the monetary and/or non-monetary relief to which you are entitled, including attorney's fees and costs.

[For complainants who are not represented by counsel include this paragraph:]

Your acceptance of this offer must be made in writing and postmarked or received in this office **within thirty (30) days** of your receipt of the offer. If you accept this offer, please indicate your acceptance on the enclosed original offer by signing on the line appearing above your name and include the date of your acceptance on the line appearing adjacent to your name. You should send or deliver your acceptance of the offer to the undersigned at the address specified below.

[For complainants represented by counsel, substitute the following paragraph:]

The complainant's acceptance of this offer must be made in writing and postmarked or received in this office **within thirty (30) days** of **your** receipt of the offer. If the complainant accepts this offer, please indicate **your** acceptance on the enclosed original offer by signing on the line appearing above your name and include the date of your acceptance on the line appearing adjacent

Management Directive

4797

Page 243 of 574

August, 2015**EEO MD-110**

to your name. Please also obtain the signature of the complainant, which should be placed on the line appearing above [his/her] name and include the date of [his/her] acceptance on the line appearing adjacent to [his/her] name. This offer will not be deemed to have been accepted without the signature of both you and the complainant. You should send or deliver your acceptance of the offer to the undersigned at the address specified below.

[The following paragraphs must be included in offers sent to ALL complainants:]

If you do not accept this offer of resolution and the relief that you are eventually awarded by the Administrative Judge, or the Equal Employment Opportunity Commission on appeal, is less than the amount offered, you will not receive payment for the attorney's fees or costs that you incur after the expiration of the 30-day acceptance period for this offer. The only exception to this rule is where the Administrative Judge or Commission rules that the interests of justice require that you receive your full attorney's fees and costs.

EEO MD-110

CHAPTER 7 HEARINGS

I. INTRODUCTION

The hearing is an adjudicatory proceeding that completes the process of developing a full and appropriate record. A hearing provides the parties with a fair and reasonable opportunity to explain and supplement the record and, in appropriate instances, to examine and cross-examine witnesses. Hearings are governed by 29 C.F.R. § 1614.109.¹ An Administrative Judge from the Commission adjudicates claims of discrimination and issues decisions. Unless the agency issues a final order within forty (40) days of receipt of the Administrative Judge's decision in a non-class action pursuant to 29 C.F.R. § 1614.110(a), the Administrative Judge's decision becomes the final action of the agency. A complainant may appeal an agency's final action or dismissal of a complaint. An agency may appeal as provided in 29 C.F.R. § 1614.110(a). 29 C.F.R. §§ 1614.401(a) & (b).

Section 1614.108(f) of 29 C.F.R. generally provides, among other things, that within 180 days from the complainant's filing of his/her complaint, an agency shall provide the complainant with a copy of the investigative file and shall notify the complainant that within thirty (30) days of the complainant's receipt of the investigative file that the complainant has the right to request a hearing and decision from an Administrative Judge or a final agency decision from the agency.² Regardless of whether the investigation is complete, the agency's duty to send this notice and the complainant's right to receive it are not dependent on the agency's completion of the investigation.

If the agency does not send the notice required in 29 C.F.R. § 1614.108(f) within the applicable time limits, it must send a notice informing the complainant that it has not yet finished the investigation and providing an estimate as to when the investigation will be completed. See 29 C.F.R. § 1614.108(g). The notice should notify the complainant that they do not have to wait for the investigation to be completed and may request a hearing or file a civil action in an appropriate U.S. District Court. Further, the notice will contain information regarding the hearing process.

¹ Additional information regarding hearings and the hearing process can be found in the [U.S. Equal Opportunity Commission's Handbook for Administrative Judges](#), July 1, 2002.

² Section 1614.108(f) of 29 C.F.R. specifically provides that the agency has a duty to send the notice within 180 days of the filing of the complaint or, where a complaint has been amended, the earlier of 180 days from the date of the last amendment or 360 days from the filing of the first complaint, whichever is earlier; within a time period set forth in an order from the Commission; or within any period of extension provided under 29 C.F.R. § 1614.108(e).

A complainant must submit the hearing request directly to the Commission's district or field office having jurisdiction over the geographic area in which the complaint arose, as set forth in Appendix N of this Management Directive, and provide a copy of the request to the agency. See 29 C.F.R. § 1614.108(h). (The Commission has prepared a hearing request form that agencies may provide to complainants for their use in requesting a hearing, which advises complainants that they are to send a copy of the request to the agency. See Appendix M.) Upon receipt of the request for a hearing, the Commission's district or field office will assign the case to an Administrative Judge who will issue Orders/Notices as appropriate to the case and provide the parties with a Commission Hearings Unit No. or docket number, and if the agency did not receive a copy of the complainant's request for a hearing, will require that the agency forward a copy of the complaint file within fifteen (15) days.

In an agency's written acknowledgment of receipt of a complaint or an amendment to a complaint, the agency shall advise the complainant of the Commission's office and address where a hearing request is to be sent as well as the agency office to which the copy of the request should be sent. In the absence of the required notice from the agency, the complainant may request a hearing at any time after 180 days have elapsed from the filing of the complaint by submitting his/her written hearing request directly to the appropriate Commission district or field office indicated in the agency's acknowledgment letter. 29 C.F.R. § 1614.108(h). In the case of accepted class complaints, a Commission Administrative Judge will, pursuant to 29 C.F.R. § 1614.204(h), conduct a hearing on the complaint in accordance with 29 C.F.R. §§ 1614.109(a) - (f).

Generally, an Administrative Judge will conduct a hearing on the merits of a complaint unless: 1) the parties mutually resolve the complaint and the hearing request is withdrawn; 2) the hearing request is otherwise voluntarily withdrawn; 3) the Administrative Judge dismisses the complaint; or 4) the Administrative Judge determines that material facts are not in genuine dispute and issues an order limiting the scope of the hearing or issues a decision without a hearing pursuant to 29 C.F.R. § 1614.109(g). The Administrative Judge will issue a decision on a complaint and shall order appropriate remedies and relief when discrimination has been found within 180 days of his/her receipt of the complaint file from the agency, unless the Administrative Judge makes a written determination that, in his/her discretion, good cause exists for extending the time for issuing a decision. 29 C.F.R. § 1614.109(i).³

³ A decision issued within 180 days may include a finding of discrimination, an order that the agency provide relief, and pay the complainant's attorney's fees. The Administrative Judge then would issue a second decision subsequent to the end of this 180-day period concerning the quantum of relief and attorney's fees. In this situation, the agency's 40-day period for taking final action on the Administrative Judge's decision and determining whether it will implement the decision begins on its receipt of the second decision and the hearing file. 29 C.F.R. § 1614.110(a).

August, 2015**EEO MD-110**

II. THE ROLE OF THE AGENCY AT THE HEARING STAGE

A. Forward Complaint File to the Commission

Within fifteen (15) days of its receipt of a copy of the complainant's request for a hearing sent to a Commission district or field office, the agency shall send a copy of the complaint file, including the investigative file, to the district or field office. The agency also shall send a copy of the complaint and investigative file(s) to the complainant and his/her representative, if it has not previously done so. The complaint file sent to the complainant or his/her representative must be identical to the complaint file sent to the Commission's district or field office. See Chapter 6, Section VIII of this directive for more information regarding the complaint file. The complainant and his/her representative shall be given the option of receiving these documents in paper or digital format.

B. Hearing Room and Production of Witnesses

The agency is responsible for arranging for an appropriately sized room in which to hold the hearing and must ensure that all approved witnesses who are federal employees are notified of the date and time of the hearing and the approximate time that their presence will be required. This includes making space available with appropriate virtual conferencing equipment for hearings and/or other proceedings as required by the Administrative Judge. The agency is responsible for ensuring the appearance and travel arrangements to the hearing site of approved witnesses who are federal employees. Note: the Administrative Judge may order the agency to provide any reasonable accommodations for parties, witnesses, or representatives appearing before the Commission as well as any required foreign language interpreters.

C. Hearings Are Closed to the Public

Access to the hearing room and the record of the hearing shall be restricted in accordance with the Commission's regulation. See 29 C.F.R. § 1614.109(e).

D. Verbatim Hearing Transcripts and Court Reporters

The agency shall arrange and pay for a verbatim transcript (provided in electronic format for the Administrative Judge and the complainant, unless otherwise requested) of the hearing proceedings pursuant to 29 C.F.R. § 1614.109(h)

Management Directive

7-3

VA-18-0457-D-000248

4802

Page 248 of 574

regardless of whether the Administrative Judge issues a decision. All exhibits submitted to the Administrative Judge and admitted into evidence shall become a part of the complaint file and at the discretion of the Administrative Judge may be referred to the court reporter to be appended to the transcript. Agencies should instruct reporters with whom they contract to submit bills to the agency. The Administrative Judge may require the court reporter to submit the original and all copies (usually two) of the transcript to the Administrative Judge, who can provide verification of transcript receipt and the number of pages in the transcript. Contracts with court reporting firms must require delivery of the transcript to the Administrative Judge within a customary time frame determined by the court reporting firm within the jurisdiction, not to exceed twenty-one (21) days unless the Administrative Judge requires delivery of the transcript by a certain date after the close of the hearing. If the Administrative Judge identifies a problem with timely delivery of the transcript or any other difficulty, s/he should contact the agency directly to resolve the dispute. The agency shall take any steps necessary to ensure that the transcript is provided as expeditiously as possible. Absent a specific memorandum of understanding with the Commission, the agency may not use employees of that agency to transcribe the proceedings.

As a matter of information, the General Services Administration maintains a list of court reporters available to agencies in the [GSA eLibrary](#).

E. The Site of the Hearing

Appendix N of the Management Directive is a list of the addresses of the Commission district and field offices, their geographic jurisdictions, and where federal employees and applicants should send hearing requests. Hearing requests are sent to the district office having jurisdiction over the agency facility where the complaint arose. In an agency's written acknowledgment of a complaint or an amendment to a complaint, the agency must advise the complainant of the Commission office and its address where a request for a hearing shall be sent. Where two or more complaints have been consolidated and the Commission district or field offices identified in the agency's complaint acknowledgment letter differ, the office identified in the last filed complaint will govern the location of the office to which the hearing request shall be made. Should the agency's organizational component where the complaint arose not fall within one of the geographical jurisdictions shown in Appendix N, the agency should contact the following office for guidance:

Management Directive
7-4

VA-18-0457-D-000249

4803

August, 2015**EEO MD-110**

Equal Employment Opportunity Commission
 Office of Field Programs
 Attention: Hearings Coordinator
 131 M Street, NE.
 Washington, DC 20507

Email at: info@eeoc.gov

Upon receipt of a hearing request, the Administrative Judge assigned to hear the complaint will determine the site of the hearing. Within his/her discretion, the Administrative Judge is authorized to conduct the hearing in the Commission district or field office, in a Commission area or local office, at the agency's organizational component where the complaint arose or at such other location or by virtual conference as s/he may determine appropriate within a local commuting distance from the agency's component unless otherwise agreed to by the parties. In determining the hearing site, the Administrative Judge should consider factors such as the location of the parties; the location of the Commission district, area, and local offices; the number and location of witnesses; the location of records; travel distances for the Administrative Judge, the parties, and witnesses; travel costs; the availability of sources of transportation; and other factors as may be appropriate including the availability of appropriate virtual conferencing equipment.

Similarly, where an Administrative Judge is considering whether the hearing should be held by video conferencing, there are a number of factors that should be considered before electing to proceed. These factors include the availability and proximity to the participants of the video-conferencing facilities;⁴ the adequacy of the available video-conferencing facilities, including any technological issues; the cost to the respondent agency (if any) balanced against the savings in travel time for all parties and the Administrative Judge; the number of expected participants; and the objections of the parties, if any. Should a party object to conducting the hearing by video conference, the Administrative Judge will document for the record both the nature of the objection and his/her ruling on the objection,

⁴ "Proximity" in this instance refers to whether the facility is within reasonable commuting distance for the hearing participants. The Commission notes, however, that considerations of proximity will generally exclude the use of video conferencing when all participants and the Administrative Judge are located within commuting distance of an appropriate location for an in-person hearing. But cf. Louthen v. U.S. Postal Service, EEOC Appeal No. 01A44521 (May 17, 2006) (telephone hearing inappropriate where, inter alia, all participants including the Administrative Judge were present in same city on hearing date).

including the reasons therefore.⁵ See [Allen v. U.S. Postal Service](#), EEOC Appeal No. 01A51259 (Aug. 21, 2006).

If the Administrative Judge sets a hearing by video conference or a hearing site that is outside the local commuting area of the agency's organizational component where the complaint arose, the agency must bear all reasonable video-conferencing costs if any, or travel expenses of complainants, their authorized representatives, agency representatives, and all witnesses approved by the Administrative Judge, except that an agency does not have the authority to pay the travel expenses of the complainant or the complainant's witnesses or representatives if they are not federal employees.

F. Request for Change in Venue

Should either party desire that a hearing be held within the jurisdictional area of another Commission district office, it must submit a request, in writing, to the other party and to the Administrative Judge assigned to the case in the appropriate Commission district or field office having jurisdiction over the agency's organizational component where the complaint arose. In its request, the party must set out, in detail, its reasons and justification for the requested change. The other party may have an opportunity to respond to the change in venue. The Administrative Judge will rule on the request only after the directors of the concerned Commission district offices or their designees have conferred on the matter.

G. Agency Costs

The agency's obligation is limited to those costs that are legally payable in advance by the agency. See [Expenses of Outside Applicant/Complainant to Travel to Agency EEO Hearing](#), File: B-202845, 61 Comp. Gen. 654 (1982). See also [John Booth--Travel Expenses of Witness -- Agency Responsible](#), File: B-235845, 69 Comp. Gen. 310 (1990).

⁵ In this regard, the Commission contemplates that the Administrative Judge will provide the parties advance notice of his/her intention to proceed by video conference, allowing opportunity for the parties to object prior to the time the hearing is convened. Objections to video conference raised on appeal will be reviewed by the Commission under the abuse of discretion standard, on a case-by-case basis. See [Louthen](#), EEOC Appeal No. 01A44521.

August, 2015**EEO MD-110****III. THE ROLE OF THE ADMINISTRATIVE JUDGE**

Once an Administrative Judge is appointed, the Administrative Judge has full responsibility for the adjudication of the complaint. 29 C.F.R. § 1614.109(a). The agency cannot dismiss a case that has been referred to the Commission for a hearing. 29 C.F.R. § 1614.107(a).

A. Administrative Judge's Review of the Record

An Administrative Judge shall review the record developed by the agency and determine whether additional documentation is necessary. If a determination is made that additional documentation is necessary, the Administrative Judge may order the appropriate party to produce the additional documentation.

If after reviewing the file, the Administrative Judge determines that the investigation is inadequate due to the agency's failure to complete the investigation within the time limits set forth in 29 C.F.R. § 1614.108(e), or the agency has not cooperated in the discovery process as required by 29 C.F.R. § 1614.109(f)(3), the Administrative Judge may take the following actions:

1. Subject the agency to adverse inference findings in favor of the complainant;
2. Consider the issues to which the requested information or testimony pertains to be favorable to the complainant;
3. Exclude other evidence offered by the agency;
4. Permit the complainant to obtain a summary disposition in his/her favor (that is, default judgment) on some or all of the issues without a hearing; or
5. Take other action deemed appropriate, including, but not limited to, requiring the agency to pay any costs incurred by the complainant in taking depositions or in conducting any other form of discovery.

The Commission has the authority to issue sanctions in the administrative hearing process because it was granted, through statute, the power to issue such rules and regulations that it deems necessary to enforce the prohibition on employment discrimination. See [Waller v. Dep't. of Transportation](#), EEOC Appeal No. 0720030069 (May 25, 2007), [request for reconsideration denied](#), EEOC Request No. 0520070689 (Feb. 26, 2009). In this respect, the Commission has determined "that delegating to its Administrative Judges the authority to issue sanctions

Management Directive

7-7

VA-18-0457-D-000252

4806

Page 252 of 574

against agencies, and complainants, is necessary and is an appropriate remedy which effectuates the policies of the Commission.” Id.

However, before an Administrative Judge may sanction an agency for failing to develop an impartial and appropriate factual record or for not cooperating in the discovery process, the Administrative Judge must issue an order to the agency or request the documents, records, comparative data, statistics, or affidavits. 29 C.F.R. § 1614.109(f)(3). Such order or request shall make clear that sanctions may be imposed and the type of sanction that could be imposed for failure to comply with the order unless the agency can show good cause for that failure. See [Rountree v. Dep’t. of the Treasury](#), Appeal No. 07A00015 (July 17, 2001). In appropriate circumstances, the order or request may provide the agency with an opportunity to take such action as the Administrative Judge deems necessary to correct the deficiencies in the record within a specified reasonable period of time. Only on the failure of the agency to comply with the Administrative Judge’s order or request and the notice to show cause may the Administrative Judge impose a sanction or the sanctions identified in the order or request.

B. Developing the Record in Complaints with Inadequate Records

Section 1614.108(h) of 29 C.F.R. authorizes a complainant to request a hearing before an Administrative Judge where the respondent agency has not completed the investigation within the required time limit and where the complainant has not agreed in writing with the agency to extend the time for completing the investigation.⁶ This provision reflects the Commission’s intent that complainants be permitted to move their cases forward in the complaint process where an agency has not complied with the regulation by completing a timely investigation. Further, it is the Commission’s intent that where a hearing is properly requested and where there has been no investigation or there is an incomplete or inadequate investigation, the record in the case shall be developed under the supervision of the Administrative Judge assigned to the case. The record can be developed through the parties’ use of discovery and/or through the Administrative Judge’s orders for the production of documents and witnesses.

⁶ Where an agency did not complete an investigation of late-filed amendments to complaints or late-consolidated complaints because the complainant either requested a hearing before the full investigatory period ended or the amendments and consolidation occurred late in the process, sanctions for inadequate records would be inappropriate. Sanctions only would be appropriate where a party subsequently fails to comply with an order or request of the Administrative Judge that puts the party on notice of the type of sanction that may be imposed for noncompliance.

August, 2015**EEO MD-110**

Section 1614.109(a) of 29 C.F.R. provides that upon appointment, the Administrative Judge will assume full responsibility for adjudication of the complaint, including overseeing the development of the record. The Commission intends that the Administrative Judge will take complete control of the case once a hearing is requested. Administrative Judges will preside over any necessary supplementation of the record in the hearing process without resort to remands of complaints to agencies for additional investigations. If an Administrative Judge determines that there is an incomplete or inadequate investigation, s/he may, however, issue an order directing the agency to complete its investigation within a specified period of time set forth in the order or directing that the agency show cause for its failure to complete the investigation within the 180-day period.

Where an agency has not completed a timely investigation or has prepared an inadequate investigation, the Administrative Judge may issue an order on his/her own initiative or upon request by either party requiring a party to produce documents, records, comparative data, statistics, or the attendance of witnesses. Such order or request shall make clear that sanctions may be imposed and the type of sanction that could be imposed for failure to comply with the order within the specified time set forth in the order without good cause shown.⁷ See, for example, [Rountree v. Dep't. of the Treasury](#), EEOC Appeal No. 07A00015 (July 17, 2001). Where the agency or complainant fails without good cause shown to respond fully and in a timely fashion to the Administrative Judge's order and/or the party has not otherwise cooperated in the discovery process, the Administrative Judge may impose sanctions pursuant to 29 C.F.R. § 1614.109(f)(3).⁸ A showing that the noncomplying party acted in bad faith is

⁷ Where the Administrative Judge's order or request does not put a party on notice that it could be sanctioned for noncompliance or does not put the party on notice of the type of sanction that the Administrative Judge intends to impose, the Administrative Judge must issue a separate notice to show cause to the party for an explanation as to why the sanction should not be imposed and provide an opportunity to cure the noncompliance before imposing the sanction. This rule applies in all instances where the Administrative Judge intends to impose a sanction on a party for a failure to comply with an order or request that does not make clear what sanction(s) may be imposed for noncompliance.

⁸ See for example, [Johnson v. Dep't. of the Air Force](#), EEOC Appeal No. 0120090115 (May 6, 2010), request for reconsideration denied, EEOC Request [0520100394](#) (July 30, 2010)(OFO affirmed Administrative Judge's dismissal of complainant's request for a hearing as a sanction for the failure to respond to discovery requests); [Cox v. Social Security Administration](#), EEOC Appeal No. 0720050055 (Dec. 24, 2009)(OFO affirmed Administrative Judge's default judgment against the agency based upon the Administrative Judge's finding that the agency failed to: adequately develop the factual record prior to hearing; respond to the complainant's initial request for admissions and subsequent written discovery requests; comply with the Administrative Judge's Order to Produce witnesses for depositions and timely

not required. See [Kramer v. Dep't. of Justice](#), EEO Appeal No. 07A10108 (September 11, 2003), request for reconsideration denied, EEOC Request No. [05A40050](#) (Dec. 8, 2003); [Cornell v. Dep't. of Veterans Affairs](#), EEOC Appeal No. 01974476 (Nov. 24, 1998). Additionally, the Administrative Judge may, as a result of a discovery order issued pursuant to 29 C.F.R. § 1614.109(f)(3)(v), require the agency to bear the costs for the complainant to obtain depositions or any other discovery because the agency has failed to complete its investigation timely as required by 29 C.F.R. § 1614.108(e) or has failed to investigate the allegations adequately pursuant to Chapter 6 of this Management Directive.⁹ See also Section IV.F of this Chapter.

If either party is requested by the Administrative Judge to produce additional documents, that party shall also furnish a copy of those documents to the opposing party at the time they are submitted to the Administrative Judge.

C. Dismissal of Complaint by Administrative Judge

The Administrative Judge may dismiss complaints within his/her jurisdiction pursuant to 29 C.F.R. § 1614.107(a) on his/her own initiative, after notice to the parties, or upon an agency's motion to dismiss a complaint. (See 29 C.F.R. § 1614.109(b) and Chapter 5, Section IV of this Management Directive.) Before dismissing a complaint, the Administrative Judge must ensure that the claim has not been fragmented inappropriately into more than one complaint. A series of subsequent events or instances involving the same claim should not be treated as separate complaints, but should be added to and treated as part of the first claim. See Chapter 5, Section III of this Management Directive for an extended discussion on fragmentation.

D. Administrative Judge's Authority

The Administrative Judge has full responsibility for the adjudication of the complaint, which includes, but is not limited to, the following:

1. Issue decisions on complaints.

respond to the Administrative Judge's Order to Show Cause why a default judgment should not be entered against the agency).

⁹ See for example, [Waller v. Dep't. of Transportation](#), EEOC Appeal No. 0720030069 (May 25, 2007), (finding that Administrative Judges may award attorney's fees and costs as a sanction against federal agencies for the violation of an Administrative Judge's Order and that awarding attorney's fees and costs as a sanction ensures the integrity and efficiency of the administrative process).

August, 2015**EEO MD-110**

2. Administer oaths.
3. Regulate the conduct of hearings.
4. Limit the number of witnesses so as to exclude irrelevant and repetitious evidence.
5. Order discovery or the production of documents and witnesses by serving orders on both parties.

The Administrative Judge has independent authority under 29 C.F.R. § 1614.109(f) to order the production of information, documents, records, comparative data, statistics, affidavits, or the attendance of witnesses.

6. Issue protective orders not to disclose information.
7. Exclude any person who is disruptive from the hearing or who is a witness so that s/he cannot hear the testimony of other witnesses.¹⁰
8. Issue summary judgment (decisions without a hearing) if there are no genuine issues of material fact in dispute.
9. Limit the hearing to the issues in dispute.
10. Impose appropriate sanctions on parties who fail to comply with orders or requests.

The Administrative Judge has the authority to impose sanctions on a party if s/he fails to comply without good cause with orders or requests. See 29 C.F.R. § 1614.109(f)(3). In addition, the Administrative Judge may impose sanctions where a party fails to appear or be prepared for a conference (for example, for status or settlement discussions) or hearing pursuant to an order of the

¹⁰ The Administrative Judge may apply Rule 615 of the Federal Rules of Evidence to the exclusion of witnesses:

At the request of a party the court shall order witnesses excluded so that they cannot hear the testimony of other witnesses, and it may make the order of its own motion. This rule does not authorize exclusion of (1) a party who is a natural person, or (2) an officer or employee of a party which is not a natural person designated as its representative by its attorney, or (3) a person whose presence is shown by a party to be essential to the presentation of the party's cause, or (4) a person authorized by statute to be present.

Administrative Judge.¹¹ Sanctions may be imposed on the agency for failure to produce an approved witness who is a federal employee.¹² Sanctions may be imposed for failure to comply with orders to compel, requests for information, documents, or admissions where the information is solely in the control of that party.¹³ Similarly, if a party fails to provide an adequate explanation for the failure to respond fully and in a timely manner to a request and the information is solely in the control of that party, the Administrative Judge may impose sanctions.¹⁴ Sanctions for failing to comply with the orders or requests discussed above include, but are not limited to, the authority to:

- (a) draw an adverse inference that the requested information would have reflected unfavorably on the party refusing to provide the requested information;
- (b) consider the issues to which the requested information pertains to be established in favor of the opposing party;
- (c) exclude other evidence offered by the party failing to produce the requested information;
- (d) enter a decision fully or partially in favor of the opposing party; and
- (e) take such other actions as appropriate.¹⁵

¹¹ See for example, [Council v. Dep't. of Veterans Affairs](#), EEOC Appeal No. 0120080321 (Apr. 9, 2010)(OFO affirmed the Administrative Judge's dismissal of complainant's request for a hearing as a sanction for her failure to prosecute her case when she failed to timely submit a previously ordered Pre-Hearing Statement or otherwise proceed with her complaint).

¹² See also [LeBlanc v. U.S. Postal Service](#), EEOC Appeal No. 01981419 (May 5, 1999)(upholding sanctions against an agency for its failure to even attempt to produce a former employee for hearing).

¹³ See for example, [Johnson v. Dep't. of the Air Force](#), EEOC Appeal No. 0120090115 (May 6, 2010) (OFO affirmed Administrative Judge's dismissal of complainant's request for a hearing as a sanction for the failure to respond to discovery requests).

¹⁴ See for example, [Johnson](#), (OFO upheld the Administrative Judge's dismissal of complainant's hearing request, stating that when the complainant responded to the Administrative Judge's order to show cause, he did not explain his failure to respond to discovery as he was ordered to do, but instead argued the merits of his case).

¹⁵ See Section III.D of this Chapter in this Management Directive, for a discussion of placing a party on notice that sanctions may be imposed before ordering their imposition. However, see also [Council v. Dep't. of Veterans Affairs](#), EEOC Appeal No. 0120080321 (Apr. 9, 2010) in which OFO

August, 2015**EEO MD-110**

11. Calculate compensatory damage awards.

Before holding a hearing, the Administrative Judge may require the complainant, after receipt of an agency motion or otherwise, to declare whether or not s/he is seeking compensatory damages as relief for the discrimination or retaliation alleged in the complaint, and to proffer or produce evidence demonstrating entitlement to compensatory damages. If a complainant fails to proffer or produce such evidence, the Administrative Judge may, in his/her discretion, deem the claim for damages to be waived.

Where the complainant has claimed compensatory damages and where the Administrative Judge determines, on the merits of the complaint, entitlement to compensatory damages because of intentional discrimination or retaliation, the Administrative Judge will calculate the amount of compensatory damages to be awarded by the respondent agency. In complaints where compensatory damages have been claimed and a hearing is held, the Administrative Judge may, in his/her discretion, develop the record on the compensatory damages claim during the hearing on the merits of the complaint or may bifurcate the proceeding and develop the record on the compensatory damages claim after a finding of discrimination.

12. Order a medical examination.

Administrative Judges have the authority to order, in very limited circumstances, as detailed below, that a complainant undergo a medical examination on motion of the agency. A request by the agency that a complainant undergo a medical examination must notify the complainant, the complainant's representative, and the Administrative Judge, of the proposed time, place, manner, conditions, and scope of the examination and the person or persons by whom it is to be made. The Administrative Judge must approve all such requests.

In making a determination of whether to order a medical examination, an Administrative Judge may be guided by the principles and cases arising under Rule 35 of the Federal Rules of Civil Procedure governing the physical and mental examinations of persons. The burden of proof in

upheld the Administrative Judge's dismissal of the complainant's hearing request even when an order to show cause had not been issued, pointing out that when the Administrative Judge issued the Acknowledgement and Order it advised the parties that failure to follow Orders may result in sanctions pursuant to 29 C.F.R. 1614.109(f)(3).

Management Directive
7-13

VA-18-0457-D-000258

4812

supporting a request for such an examination requires an affirmative showing that each condition as to which examination is sought is genuinely in controversy and that good cause exists for ordering each particular examination. Such requests must be narrowly tailored to elicit only the evidence necessary to develop the record with regard to the specific issue.

The agency requesting the examination has the burden of proving that the examination is reasonably necessary. For example, merely showing that the complainant has made a claim for compensatory damages is not sufficient to meet the agency's burden of proof. In determining whether such a request is reasonable, the Administrative Judge will consider: whether the complainant has asserted a claim for compensatory damages sufficient to place his/her mental or physical condition in controversy; and whether the request is made for good cause shown, that is, that the examination is reasonably necessary to determine the existence and extent of an asserted injury. The Commission has held that evidence from a health care professional is not a mandatory prerequisite to establishing entitlement to compensatory damages. [Sinnott v. Dep't. of Defense](#), EEOC Appeal No. 01952872 (September 19, 1996); [Lawrence v. U.S. Postal Service](#), EEOC Appeal No. 01952288 (1996); [Carpenter v. Dep't. of Agriculture](#), EEOC Appeal No. 01945652 (July 17, 1995). A complainant's own testimony, along with the circumstances of a particular case, may suffice to sustain the complainant's burden in this regard. Therefore, independent medical examinations will not be appropriate in every case in which a claim for compensatory damages is made. See "Requests for Private Information Should Be Limited" at Section IV.B.4 in this Chapter of this Management Directive for more information.

Some factors to be considered in determining whether an agency has shown that a complainant has asserted a claim for damages sufficient to place his/her mental or physical condition in controversy include: 1) the type and extent of mental or physical harm claimed; 2) whether the harm alleged is ongoing or is merely a past harm with no current effects on the complainant; 3) whether the complainant has offered expert testimony concerning the nature and/or extent of the alleged harm or intends to offer such testimony; and 4) whether the complainant has sufficiently asserted a connection between the asserted harm and the alleged discrimination sufficient to establish a causal relationship between the harm and the alleged discrimination.

Some factors to be considered in determining whether an agency requesting a mental or physical examination has shown good cause for

August, 2015**EEO MD-110**

such examination include: 1) the nature and severity of the alleged harm and the likelihood that the requested examination will elicit relevant evidence as to the existence and/or extent of the alleged harm; 2) whether there is already sufficient evidence in the record as to the nature and extent of the asserted harm; and 3) whether the information sought could be obtained through other less intrusive discovery techniques, such as interrogatories, depositions, or requests for the production of witnesses or documents.

Even where the above criteria may have been satisfied by the agency requesting the examination, the decision to order such examination at the hearing stage is solely within the discretion of the Administrative Judge.

Upon receipt of a request from the agency for a medical examination, the complainant may file a motion for a protective order, stating objections to the request or order. See Section IV.D.2.b of this Chapter. The decision to order such examination at the hearing stage remains solely within the discretion of the Administrative Judge.

13. Calculate and award the amount of attorney's fees or costs.

Where a party is represented by an attorney, an Administrative Judge is authorized to award a complainant reasonable attorney's fees and costs (including expert witness fees) incurred in the processing of a complaint where the Administrative Judge issues a decision finding discrimination in violation of Title VII and/or the Rehabilitation Act, the Administrative Judge issues an order sanctioning the agency, or where the award of attorney's fees or costs may otherwise be appropriate and authorized. Any award of attorney's fees or costs shall be paid by the respondent agency. Where the Administrative Judge determines that a complainant is entitled to an award of attorney's fees or costs, the Administrative Judge will calculate the amount of such award in accordance with 29 C.F.R. § 1614.501(e)(2)(ii)(B) and Chapter 11 of this Management Directive.

When the Administrative Judge determines an entitlement to attorney's fees or costs, the complainant's attorney must submit a verified statement of attorney's fees (including expert witness fees) and other costs, as appropriate, to the Administrative Judge within thirty (30) days of receipt of the decision, unless otherwise directed, and must submit a copy of the statement to the agency. A statement of attorney's fees and costs must be accompanied by an affidavit executed by the attorney of record itemizing the attorney's charges for legal services. The agency may respond to a statement of attorney's fees and costs within thirty (30) days of its receipt.

Management Directive
7-15

VA-18-0457-D-000260

4814

The verified statement, accompanying affidavit, and any agency response shall be made a part of the complaint file. The Administrative Judge will issue a decision determining the amount of attorney's fees and costs due within sixty (60) days of receipt of the statement and affidavit.

14. Engage the parties or encourage the parties to engage in settlement discussions.

The Administrative Judge may engage the parties in discussion aimed at reaching a settlement agreement or may allow the parties such time as they may need to discuss settlement. The Administrative Judge further may hold a hearing in abeyance to allow the parties to engage in alternate forms of dispute resolution. (For a more detailed discussion of alternative dispute resolution, see Chapter 3 of this Management Directive.)

15. Issue an order determining full relief.

Administrative Judges shall issue an order awarding full relief where the agency unilaterally and unconditionally promises in writing to provide the full and complete remedy as defined by the Administrative Judge. To permit him/her to determine the appropriate remedy for the complaint, the Administrative Judge may require the parties to submit statements of full relief, may receive evidence including testimony, and/or require oral argument. After issuing the order and a determination of the appropriate remedy, the Administrative Judge shall return the hearing file to the agency, which shall have forty (40) days to take final action. 29 C.F.R. § 1614.110(a). Once the agency takes final action, the complainant will have thirty days within which to file an appeal. 29 C.F.R. § 1614.402(a). If the agency fails to provide the full and complete remedy as promised, the complainant may seek compliance from the agency and, failing that, file an appeal with the Commission. See 29 C.F.R. § 1614.504(a); see also [Miller v. Dep't. of the Treasury](#), EEOC Request No. 05980345 (July 20, 1998); [Perlingiero v. Dep't. of the Navy](#), EEOC Appeal No. 01941176 (Feb. 24, 1995); [Poirrier v. Dep't. of Veterans Affairs](#), EEOC Appeal No. 01933308 (May 5, 1994).

August, 2015EEO MD-110

16. Hold a hearing in abeyance.

An Administrative Judge may hold a hearing in abeyance in the event that a party is unable to proceed with the hearing for reasons such as illness, military assignment, or other good cause shown.

E. Summary Judgment (Decisions without a Hearing)

1. On Motion of a Party

A party who believes that some or all material facts are not in genuine dispute may file a motion for summary judgment with the Administrative Judge at least fifteen (15) days prior to the hearing, or at such earlier time as required by the Administrative Judge. The Administrative Judge may, in the acknowledgment order, specify a date for filing such a motion and provide for extending that time in certain circumstances. A copy of any such motion shall be served on the opposing party.

The opposing party will have 15 days from the receipt of the statement in which to file any opposition to the statement.

After considering the request and the opposing submission, if any, the Administrative Judge may deny the request, order that discovery be permitted on the facts involved, limit the hearing to the issues remaining in dispute (if any), issue a decision without a hearing, or make such other rulings as are appropriate.

2. On Administrative Judge's Determination

If the Administrative Judge determines that some or all of the material facts are not in genuine dispute, s/he may, after giving notice to the parties and providing them an opportunity to respond within 15 days of receipt of the notice, issue an order limiting the scope of the hearing or issue a summary judgment decision without conducting a hearing.

3. Oral Argument or Testimony on Summary Judgment Motion

At his/her discretion, the Administrative Judge may provide notice requiring the parties to appear and present oral argument or testimony on a motion for summary judgment.

4. Legal Standard for the Use of Summary Judgment

Summary judgment is proper when “material facts are not in genuine dispute.” 29 C.F.R. § 1614.109(g). Only a dispute over facts that are truly material to the outcome of the case should preclude summary judgment. [Anderson v. Liberty Lobby, Inc.](#), 477 U.S. 242, 248 (1986) (only disputes over facts that might affect the outcome of the suit under the governing law, and not irrelevant or unnecessary factual disputes, will preclude the entry of summary judgment). For example, when a complainant is unable to set forth facts necessary to establish one essential element of a prima facie case, a dispute over facts necessary to prove another element of the case would not be material to the outcome. [Celotex v. Catrett](#), 477 U.S. 317, 322-323 (1986).

Moreover, a mere recitation that there is a factual dispute is insufficient. The party opposing summary judgment must identify the disputed facts in the record with specificity or demonstrate that there is a dispute by producing affidavits or records that tend to disprove the facts asserted by the moving party. In addition, the non-moving party must explain how the facts in dispute are material under the legal principles applicable to the case. 29 C.F.R. § 1614.109(g)(2); [Celotex](#), 477 U.S. at 322-324; [Patton v. U.S. Postal Service](#), EEOC Request No. 05930055 (July 1, 1993) (summary judgment proper where complainant made only a general pleading that his job performance was good but set forth no specific facts regarding his performance and identified no specific inadequacies in the investigation).

F. **Transmittal of the Decision and Hearing Record**

At the conclusion of the hearing stage the Administrative Judge shall send to the parties (the agency representative, the agency EEO Director or EEO Office, the complainant, and the complainant’s representative) copies of the record produced at the hearing stage of the process, including the transcript of the hearing, if any, as well as the decision.

The Administrative Judge may, when necessary, release the transcript prior to the issuance of the decision, for example, when the transcript is needed to prepare a post-hearing brief or to prepare for a hearing on relief.

The Administrative Judge may issue a decision from the bench after the conclusion of the hearing, in lieu of issuing a written decision.

August, 2015EEO MD-110

IV. DISCOVERY

A. Introduction

1. General

The purpose of discovery is to enable a party to obtain relevant information for preparation of the party's case. Both parties are entitled to reasonable development of evidence on issues raised in the complaint, and the Administrative Judge may limit the quantity and timing of discovery.

A reasonable amount of official time shall be allowed to prepare requests for discovery and to respond to discovery requests. (See Chapter 6, Section VII.C of this Management Directive.)

2. Avoidance of Delay

The discovery instructions that follow are intended to provide a simple method of discovery. They will be interpreted and applied so as to avoid delay and to facilitate adjudication of the case. The parties are expected to initiate and complete needed discovery with a minimum of intervention by the Commission's Administrative Judge. The parties are further expected to use discovery judiciously for its intended purpose only.

B. Right to Seek Discovery

1. Notice of Right to Seek Discovery

The Administrative Judge shall send the parties an acknowledgment order advising the parties that they may commence discovery. It is the Commission's policy that the parties are entitled, pursuant to 29 C.F.R. § 1614.109(b), to the reasonable development of evidence on the issues raised in the complaint.

2. Discovery Is Designed to Supplement the Record

It is anticipated that discovery will ordinarily involve supplementing the existing record. There may be situations in which the record does not have to be supplemented.

3. Discovery Time Frames Will Be Strictly Regarded

Discovery must be completed by such time ordered by the Administrative Judge. Parties may request to extend the time for discovery beyond the time limit set. The Administrative Judge may modify the time frame for completing discovery either by extending it or by curtailing it as the Administrative Judge may determine. To be considered, any request for extension must be made prior to the expiration of the time limit by motion and accompanied with a proposed order and shall state whether the opposing party agrees or objects to the motion or order.

4. Requests for Private Information Should Be Limited

Agency requests for the medical records of complainants should only occur to establish or challenge disability status or the right to reasonable accommodation in Rehabilitation Act cases, or when a complainant is asserting a claim for compensatory damages and has sought medical treatment for one or more stress-related conditions. In such instances, agency requests for medical records shall be narrowly tailored to the condition(s) and temporal scope at issue. As discussed in detail in Chapter 11, Section VII, complainants are not required to prove compensatory damages through medical records or other expert evidence. See [Lawrence v. U.S. Postal Service](#), EEOC Appeal No. 01952288 (Apr. 18, 1996) (citing [Carle v. Dep't. of the Navy](#), EEOC Appeal No. 01922369 (Jan. 5, 1993)).

Where a complainant is pro se, agencies must request the Administrative Judge's prior permission before making requests for medical information, and the Administrative Judge shall advise the parties of this provision at the initial status conference. The Administrative Judge shall also explain that a complainant should contact the Administrative Judge to request a protective order if the complainant believes agency counsel is seeking overly broad or intrusive medical records through discovery requests.

Similarly, agency requests for wage information should only occur when the complainant is making a back pay claim and has received compensation for subsequent employment. Agencies are not authorized and must request prior permission from the Administrative Judge before making requests for production of a complainant's tax records except with respect to W-2 (earned income) and Schedule C (profit or loss) documents.

August, 2015EEO MD-110**C. Methods of Discovery****1. Evidence may be developed using a variety of methods, including:****a. Interrogatories**

Absent specific authorization from the Administrative Judge, a party may submit no more than one set of interrogatories and a set of interrogatories shall not exceed thirty (30) in number including all discrete subparts.

b. Depositions

Generally the party requesting depositions will pay for them. A failure to appear at a properly scheduled deposition may result in the non-appearing party bearing the cost of the missed session. Agencies must make federal employees available for depositions and such depositions shall be taken on official time. The agency may be liable for costs incurred if such persons are not made available on the clock for depositions or other discovery or if such persons fail to appear.

c. Stipulations

Stipulations are strongly encouraged.

d. Requests for Admissions

Absent specific authorization from the Administrative Judge, a request for admissions shall not exceed 30 in number including all discrete subparts. This limit does not apply, however, to admissions relating to the authenticity or genuineness of documents.

e. Requests for the Production of Documents

Absent specific authorization from the Administrative Judge, requests must be specific, identifying the document or types of documents requested. A set of document requests shall not exceed 30 in number including all discrete subparts.

Management Directive
7-21

VA-18-0457-D-000266

4820

Page 266 of 574

2. **Where possible, more informal methods of discovery should be employed**

In many instances, discovery should proceed on an informal basis, including unrecorded meetings and conference calls designed to exchange information. For example, if a primary purpose of discovery is to determine the scope and content of a material witness's testimony, it may be sufficient that there be a meeting scheduled with the witness and that the discovery be conducted on an informal basis. If that method proves unsatisfactory, a more formal method of discovery may be used.

When information gathering and hearing preparation takes place outside the scope of formal discovery, agencies may not restrict access to non-management employees who voluntarily cooperate with informal discovery.

- a. The parties may agree that a witness be made available for questioning without the production of a transcript or tape recording where the purpose is to discover the availability of other evidence, either documentary or testimonial.
- b. The parties may agree to the questioning of witnesses using a tape-recording device, provided that any such tape will not be accepted in evidence without authentication. Such authentication can be presumed where the opposing party is provided a copy of the tape at the close of the discovery session and it is identical to the tape proffered in evidence.

D. Discovery Procedures

1. **Commencing Discovery**

a. **Requests for authorization to commence**

Unless the Administrative Judge requires that a party request authorization to commence discovery, parties may begin discovery upon receipt of the Administrative Judge's acknowledgment order.

If the Administrative Judge requires that a party request authorization to commence discovery, the request must state the method(s) and scope of discovery requested and its relevance to the issue(s) in the complaint.

August, 2015EEO MD-110b. Exchange of requests

Upon receipt of the Administrative Judge's authorization to begin discovery or acknowledgment order that does not require the parties to seek authorization, the parties must, within twenty (20) calendar days or such period of time ordered by the Administrative Judge, exchange initial requests for discovery. If a party does not submit an initial discovery request to opposing party within that period, the Administrative Judge may determine that the party has waived its right to pursue discovery.

The parties must cooperate with each other in honoring requests for relevant, non-repetitive documentary and testimonial evidence. The parties shall not use any form of discovery or discovery scheduling for harassment, for unjustified delay, to increase litigation expenses, or for any improper purpose. The Administrative Judge will resolve discovery disputes only after the parties have made a good faith effort to resolve the dispute.

(1) Where to address discovery

Requests for discovery should be addressed to the agency representative, complainant, and complainant's representative of record, and not to the Administrative Judge, unless requested by the Administrative Judge. Where a party addresses a request for discovery to the Administrative Judge, the Administrative Judge may, at his/her discretion, return the request to the party submitting the discovery request with instructions to serve it on the appropriate party, or may forward the request to the appropriate party. Where a party inappropriately submits a discovery request to the Administrative Judge, the required time frame for submitting the request to the appropriate party will not stop running unless the Administrative Judge rules otherwise. Copies of discovery requests should not be provided to the Administrative Judge unless a motion to compel or a response to a motion to compel is being filed or if otherwise directed by the Administrative Judge.

(2) Criteria for requests

The request should be: 1) as specific as possible and 2) reasonably calculated to discover non-repetitive, material evidence.

2. Response to Discovery Request

Unless otherwise ordered, the opposing party/representative must serve his/her response to the request for discovery within thirty (30) calendar days from the date of service of the request. If service of the request was by mail, the opposing party/representative may add five days to the date that the response is due. A response means:

- a. Compliance with the request - voluntary cooperation with discovery requests is encouraged;
- b. Written opposition to the request/motion for a protective order - such opposition shall set forth a basis for finding that the request is irrelevant, overburdening, repetitious, or privileged;
- c. Written agreement or stipulation obviating the request - stipulations of fact are favored as a means of resolving discovery issues;
- e. Request for extension of time - extension of time to comply or to produce a written agreement shall not exceed 15 calendar days.

3. Failure to Respond to Request for Discovery

- a. Failure to fully respond to a request for discovery within 30 calendar days of receipt of the request, or as otherwise ordered by the Administrative Judge, shall form the basis for a motion to compel discovery, provided the parties have made a good faith effort to resolve the dispute. Parties engaging in good faith settlement efforts may request an extension from the Administrative Judge.
- b. A motion to compel must be filed within ten (10) calendar days after the expiration date for responding to a request for discovery, or as otherwise ordered by the Administrative Judge. When filing a motion, the moving party must certify that s/he conferred with the opposing party, or made a good faith effort to do so, to attempt

August, 2015EEO MD-110

to resolve the discovery dispute. See [Fed. R. Civ. P. 37\(a\)\(1\)](#); [Apex Oil Co. v. Belcher Co.](#), 855 F.2d 1009, 1020 (2d Cir. 1988) (failure to confer in good faith over discovery disputes multiplied the proceedings and justified sanctions).

- c. A motion to compel compliance with a request for discovery must be addressed to the Administrative Judge and the moving party must certify that a copy was served on the opposing party.
- d. Any statement in opposition to the motion must be filed within ten (10) calendar days of service of the motion and the responding party must certify that a copy was served on the moving party.
- e. A party's failure to raise an objection to a discovery request within the time period to respond to it may be determined by the Administrative Judge to be a waiver of that party's ability to object to the request at a later date.

4. Administrative Judges Will Rule Expeditiously on Discovery Issues

Following the filing of an opposition, if any, to the motion to compel discovery, the Administrative Judge will rule expeditiously on the request for discovery. In the alternative, the Administrative Judge may, in the interest of expediting the hearing, order that the document(s), witness(es), or other evidence at issue be produced at the hearing. Where the Administrative Judge finds that the request for discovery that is the subject of the motion to compel is irrelevant, overburdening, repetitious, or privileged, the Administrative Judge will deny the motion to compel and may, upon the request of the party opposing the motion to compel, or upon the Administrative Judge's own initiative, issue such protective orders as the Administrative Judge determines appropriate.

Management Directive
7-25

VA-18-0457-D-000270

4824

Page 270 of 574

5. Administrative Judge's Orders to Comply

- a. In considering a motion to compel compliance, the Administrative Judge will consider whether the following factors apply:
 - (1) the discovery is calculated to produce or lead to the production of material evidence that is not repetitious of facts or documents already in the complaint file,
 - (2) the discovery does not concern privileged or restricted information, and
 - (3) the discovery is not overly burdensome.
- b. Where a motion to compel discovery is approved, in whole or in part, the Administrative Judge shall issue a written order to comply with the request. The parties shall have 15 calendar days or such other time period ordered by the Administrative Judge to comply with a discovery order.

6. Failure to Respond or Comply with Administrative Judge's Order May Result in Sanctions

A failure to respond or follow an order to comply with a request for discovery may result in sanctions. See Section III.D.10 of this Chapter.

E. **Failure to Request Discovery Implies Waiver of Subsequent Requests for Documents**

It is the intention of the Commission that the parties utilize the informal or formal discovery procedures provided for in this Chapter to develop the record in the complaint or that the record be developed to the extent necessary through the Administrative Judge's orders for documents, information, and witnesses. Under previous Commission guidance, the failure to request discovery did not imply a waiver of the opportunity of the parties to make requests for documents and witnesses at the hearing. Allowing parties this opportunity at the time of the hearing, regardless of whether the discovery process was invoked, is not consistent with sound administrative economy and with the expeditious processing of complaints. Accordingly, where a party has not timely requested discovery or has not otherwise timely requested that the Administrative Judge order the opposing party to produce documents, the party's request for documents for the first time at the time of the hearing, or at a pre-hearing conference held just

August, 2015**EEO MD-110**

prior to the hearing, will be disallowed unless the Administrative Judge, in his/her discretion, rules otherwise.

F. Cost of Discovery

The parties shall initially bear their own costs with regard to discovery, unless the Administrative Judge requires the agency to bear the costs for the complainant to obtain depositions or any other discovery because the agency has failed to complete its investigation timely as required by 29 C.F.R. § 1614.108(e) or has failed to investigate the allegations adequately pursuant to Chapter 6 of this Management Directive.

V. EXCLUSION AND DISQUALIFICATION

All participants in the EEO hearing process have a duty to maintain the decorum required for a fair and orderly proceeding and to obey orders of the Administrative Judge. Any person who engages in improper behavior or contumacious conduct (as defined in Section V.A.3 of this Chapter) at any time subsequent to the docketing of a complaint for a hearing is subject to sanction. Section 1614.109(e) of 29 C.F.R. provides that persons may be excluded from the hearing for contumacious conduct or misbehavior that obstructs the hearing. It further provides that if the complainant's or agency's representative engages in misconduct or refuses to obey an order of the Administrative Judge, the Commission may suspend or disqualify the representative from future hearings, refer the matter to an appropriate licensing authority, or both.

A. Exclusion from a Hearing

An Administrative Judge has the power to regulate the conduct of a hearing and to exclude any person from a hearing for contumacious conduct or misbehavior that obstructs the hearing. See 29 C.F.R. § 1614.109(e). The Administrative Judge may exclude any disruptive person, including the complainant, an agency official, or a representative, including agency or complainant counsel. This sanction generally applies to conduct occurring in the Administrative Judge's presence at any point during the hearing process, including prehearing proceedings and teleconferences as well as the hearing itself. It also applies to a representative's refusal to obey orders of the Administrative Judge. The exclusion bars the individual, for the duration of the hearing process, from further participation in the case in which the misconduct occurs. (In contrast, a disqualification of a representative applies to future hearings. The procedure for disqualification is in Section V.B below.)

Management Directive
7-27

VA-18-0457-D-000272

4826

Page 272 of 574

The authority of an Administrative Judge to impose an exclusion under 29 C.F.R. § 1614.109(e) derives from the judicial doctrine of the “inherent powers” of the forum. For example, courts have certain implied powers that are necessary to the exercise of all others. [Chambers v. NASCO, Inc.](#), 501 U.S. 32 (1991). “Courts of justice are universally acknowledged to be vested, by their very creation, with power to impose silence, respect, and decorum, in their presence, and submission to their lawful mandates.” *Id.* at 43 (quoting [Anderson v. Dunn](#), 19 U.S. 224 (Wheat.) 227 (1821)). “These powers are ‘governed not by rule or statute but by the control necessarily vested in courts to manage their own affairs so as to achieve the orderly and expeditious disposition of cases.’” *Id.* (quoting [Link v. Wabash R. Co.](#), 370 U.S. 626, 630-31 (1962)).

Inherent powers must be exercised with restraint and discretion. *Id.* In considering the imposition of sanctions, Administrative Judges must take steps to ensure fairness to the parties and the effectiveness of the sanction in furthering the orderly conclusion of the hearing process. Sanctions should be proportional to the nature and degree of the improper conduct. Administrative Judges may look to rules of ethics, common law, statutes, and case law to determine the propriety and nature of a sanction. With respect to sanctions against a representative, the Administrative Judge should be mindful that a party to the EEO process is entitled to be represented by an individual of that party’s choice, and the representative is expected to be an advocate for the party’s interests. Nonetheless, by virtue of their position, all representatives also have a particular responsibility to respect the order and authority of the EEO process. See subsection 4 below.

1. Relationship to other sanctions

In addition to exclusion under 29 C.F.R. § 1614.109(e) for misconduct, other sanctions may be imposed for failure to obey orders of an Administrative Judge. Section 1614.109(f)(3) of 29 C.F.R. provides that when the complainant, the agency, or its employees fail without good cause shown to respond fully and in timely fashion to an order of an Administrative Judge, or requests for the investigative file, for documents, records, comparative data, statistics, affidavits, or the attendance of witnesses, the Administrative Judge shall impose sanctions in appropriate circumstances.

Sanctions under 29 C.F.R. § 1614.109(f) may be evidentiary, monetary, or both. The failure of a party to produce evidence or obey an order may support the drawing of an adverse inference about a matter in dispute, the exclusion of other evidence offered by that party, or a decision on the merits in favor of the other party. Monetary sanctions include attorney’s fees and the costs of discovery. See 29 C.F.R. § 1614.109(f)(3).

August, 2015EEO MD-110

2. Preventive measures

To lessen the need for resort to exclusion or other sanctions, Administrative Judges may instruct the parties in the initial order and/or at the outset of the hearing to maintain professional conduct and speech. The parties should be informed that engaging in improper conduct or failing to comply with orders of the Administrative Judge or Commission regulations may result in sanctions under 29 C.F.R. § 1614.109. Giving such a warning is within the Administrative Judge's discretion however. Any asserted failure to advise the parties of the potential for sanctions does not limit the Administrative Judge's authority to impose a sanction.

3. General standard for exclusion

A person's conduct is contumacious when it is "willfully stubborn and disobedient." Black's Law Dictionary (6th ed. 1990). Contumacious behavior or disruptive conduct may include any unprofessional or disrespectful behavior; degrading, insulting, or threatening verbal remarks or conduct; the use of profanity; or conduct engaged in for the purpose of improperly delaying the hearing.¹⁶ A finding of contumacious conduct or disruptive behavior may be based on a series of disruptive incidents, a pattern of acts, or a single sufficiently obstructive episode.¹⁷ Normally, any pattern should be manifest within a single case. However, the Administrative Judge may take into consideration other improper conduct engaged in by the individual on any previous occasion before that judge, if

¹⁶ In [Bradley v. U.S. Postal Service](#), EEOC Appeal Nos. 01952244, 01963827 (September 18, 1996), the Commission rejected the complainant's contention that he was denied a fair hearing because the Administrative Judge had complainant and his representative escorted from the hearing room under guard and terminated the hearing. The Commission found that complainant's representative "engaged in contumacious conduct of the worst kind: asking questions which the witnesses could not comprehend, then berating the witnesses for failing to answer; repeatedly testifying rather than asking questions; vociferously arguing on the record with the agency representative and the Administrative Judge; defying the authority of the Administrative Judge with regard to evidentiary rulings and the conduct of the hearing; and threatening the Administrative Judge over an evidentiary ruling." Misconduct does not have to rise to this level to be subject to sanction. Any one of the types of misconduct noted in [Bradley](#) would alone be sufficient.

¹⁷ See [In re Chaplain](#), 621 F.2d 1272, 1276 (4th Cir. 1980) ("contempt of court may be found based on the cumulative impact of a series of actions, no one of which standing alone would be sufficient: 'It is only necessary that a contumacious act be 'a volitional [one] done by one who knows or should reasonably be aware that his conduct is wrongful.'") (citations omitted).

the Administrative Judge had clearly described the misconduct for the record in the earlier proceeding or the misconduct is otherwise clearly apparent from the record.

In addition, there may be situations in which a decision to exclude a person may take into consideration prior misconduct before a different Administrative Judge or the Commission. For example, in the first instance of misconduct, the Administrative Judge, in his/her discretion and as part of the sanction, may publicize the sanction to other Administrative Judges or require the sanctioned individual to disclose the sanction to other Administrative Judges. This should be done in appropriate circumstances, taking into account the nature and degree of the misconduct. If the sanctioned individual engages in further improper conduct in a subsequent hearing before the same or a different Administrative Judge, the prior sanction should be considered in determining whether to exclude the individual from the subsequent hearing. To that end, the Administrative Judge also may ask an individual, on the record, to disclose whether or not s/he ever had previously been sanctioned in any way before the Commission.

4. Standard for exclusion of representative

Representatives may also be excluded for refusal to follow the orders of an Administrative Judge or other improper conduct, in addition to “contumacious conduct or misbehavior that obstructs the hearing.” Representatives have a special duty to maintain the dignity of the EEO process and to preserve the order and authority of the EEO forum and must act accordingly.

If a party’s representative engages in repetitive misconduct or conduct justifying exclusion, the Commission also will consider imposing a suspension or disqualification through the procedure described in Section B below. If the representative is an attorney, s/he also may be referred to the appropriate bar association for disciplinary action as provided in Section C below.

5. Procedure for exclusion

Unless the improper conduct is so egregious as to compromise the order required for a fair and orderly proceeding, the Administrative Judge normally should first warn the offending person to stop the conduct. The warning should give notice that if the conduct continues, the person will be excluded from the hearing.

August, 2015**EEO MD-110**

When imposing the sanction, the Administrative Judge must ensure that the record includes a clear and specific description of the nature of the misconduct. The record must include the particular details of what the person said or did, rather than a conclusory characterization.¹⁸ The Administrative Judge may place the information on the record through a statement at the hearing or, if the misconduct occurred in a teleconference or other proceeding without a court reporter, by inclusion in a prehearing conference memorandum or order or through a written statement provided to the individual. Any gestures or actions that would not be apparent from the hearing transcript should be clearly described for the record. If the person used profanity or other improper or threatening language before the Administrative Judge while off the record or at a proceeding that is not being transcribed, the Administrative Judge should relate the particular language used in a statement on the record or other written statement made a part of the record.

An Administrative Judge's decision to exclude a person from a hearing is final. There is no right to an interlocutory appeal of an exclusion decision. A party may raise the issue as part of an appeal of the final order on the case when the party asserts it has been deprived the opportunity for a fair hearing.

If the complainant engages in obstructive misconduct or contumacious conduct, the Administrative Judge should warn the complainant as described above and consider recessing the hearing for a short time to restore order. If the complainant's misconduct is extreme or persistent, the Administrative Judge may, pursuant to 29 C.F.R. §§ 1614.109(b) and 1614.107(a)(7), dismiss the case for failure to cooperate or issue a decision if the record is sufficient to permit adjudication. 29 C.F.R. § 1614.109(g).

If the complainant's representative is excluded, the complainant should be given the option of proceeding without his/her representative. If the agency's representative is excluded, the Administrative Judge must notify the agency of the exclusion. In either case, the Administrative Judge may, in his/her discretion, continue the hearing to allow time for the designation of a new representative or, in appropriate circumstances, terminate the

¹⁸ For example, the description might state that the party's representative, despite a warning to remain at his seat, "repeatedly rose out of his chair, walked around the hearing room, and pointed his finger close to the witness's face while berating the witness in a loud voice and cutting short the witness's answers, making the following statements to the witness:"

hearing, and decide the case based on the record if the record is sufficient to permit adjudication.

The Administrative Judge also may impose an evidentiary sanction against either party as provided in 29 C.F.R. § 1614.109(f)(3). For example, when misconduct has prevented or hindered the development of evidence, the Administrative Judge may draw an adverse inference; consider the matter to be established in favor of the opposing party; exclude other evidence; or issue a decision fully or partially in favor of the opposing party. See 29 C.F.R. § 1614.109(f)(3). The standard for imposing such a sanction must be the same for both complainants and agencies. A sanction should be proportional to the level of the misconduct and reflect the degree to which the misconduct has impeded a full and fair hearing.

B. Disqualification of a Representative from Future Hearings

1. Standard for suspension and disqualification¹⁹

In the case of repeated or flagrant improper conduct by a representative, the Administrative Judge or the Commission may take further action. Section 1614.109(e) of 29 C.F.R. provides that the Commission, after notice and an opportunity to be heard, may suspend or disqualify from representing complainants or agencies in future Commission hearings any representative who refuses to follow the Administrative Judge's orders or otherwise engages in improper conduct. These provisions apply not only to conduct at the hearing stage of the case but also to all other actions taken by a representative in the course of an EEO proceeding, including the appeal. A disqualification applies to future representation of a party before the Commission, at both the hearing and appellate stages.

2. Procedure for suspension and disqualification

Before suspension or disqualification from future hearings, the representative must be given:

¹⁹ In addition to disqualification under 29 C.F.R. § 1614.109(e) for misconduct, the term “disqualification” is also used when the representation of a complainant or agency would conflict with the official or collateral duties of the representative. Under 29 C.F.R. § 1614.605(c), in that circumstance, the Commission or the agency may, after giving the representative an opportunity to respond, disqualify the representative. In contrast to disqualification for misconduct, a disqualification for conflict of interest under 29 C.F.R. § 1614.605(c) applies only to the particular case. Parties shall disclose and reasonably attempt to avoid all conflicts of interest.

August, 2015**EEO MD-110**

- a. notice of the specific conduct that is the basis for the proposed disqualification;
- b. notice of the proposed sanction; and
- c. the opportunity to be heard.

A show cause order accomplishes this notice. The show cause order must describe in detail the incident(s) constituting the grounds for suspension or disqualification,²⁰ describe the proposed sanction, and give the representative a period of time in which to explain in writing why s/he should not be suspended or disqualified.

For improper conduct or a refusal to follow orders at the hearing stage, the Administrative Judge will issue the show cause order and certify the matter to the Director, Office of Federal Operations, for a determination. In addition, the Administrative Judge may, separately or simultaneously, issue an order excluding the representative from the hearing process in the case at bar, in accordance with the provisions discussed above. If the representative is an attorney, referral to the appropriate bar association normally should be considered as well, pursuant to Section C below.

For improper conduct during the appeal, the Office of Federal Operations will issue the show cause order. In all cases, the representative must submit his/her response to the Director of the Office of Federal Operations. The Director or his/her designee will issue a final order, which is not appealable.

An order suspending or disqualifying a representative from future hearings must specify the time period the penalty will be in effect, which must be commensurate with the severity of the conduct.

When the Administrative Judge or the Commission proposes to suspend or disqualify the agency's representative, a copy of the show cause order and subsequent decision must be provided to the agency's EEO Director.

²⁰ The conduct must be described with specificity and detail, as explained in Section A. 5 above with respect to exclusion.

C. Referral of Attorney Representatives to Bar Association

Section 1614.109(e) of 29 C.F.R. provides that the Administrative Judge or the Commission may refer to the disciplinary committee of the appropriate bar association any attorney who refuses to follow the orders of an Administrative Judge or who otherwise engages in improper conduct. This may be done independently of, or in conjunction with, any proposed or final exclusion, suspension, or disqualification.

August, 2015EEO MD-110

CHAPTER 8

COMPLAINTS OF CLASS DISCRIMINATION IN THE FEDERAL GOVERNMENT

I. INTRODUCTION

Section 1614.204 of Title 29 C.F.R. provides for processing class complaints of discrimination. A class is defined as a group of employees, former employees, or applicants who are alleged to have been adversely affected by an agency personnel policy or practice which discriminates against the group on the basis of their common race, color, religion, sex, national origin, age, genetic information, or disability. A class complaint is a written complaint of discrimination filed on behalf of the class by the agent of the class, alleging that the class is so numerous that a consolidated complaint by the members of the class is impractical, that there are questions of fact common to the class, that the claims of the agent of the class are typical of the claims of the class, and that the agent of the class and, if represented, the representative will fairly and adequately protect the interests of the class.

The regulatory requirements for class complaints at 29 C.F.R. § 1614.204 provide a structure different from that for individual complaints. For class complaints, there is a four-stage process. The first stage is the establishment of a class complaint. At this stage, the class agent is required to seek counseling from an agency EEO Counselor and file a complaint. The second stage is a determination from a Commission Administrative Judge, subject to agency final action, implementing or appealing the Administrative Judge's decision on class certification. The third stage, assuming that the complaint has been certified as a class action, involves a final decision from an Administrative Judge on the merits of the class complaint. The agency can either fully implement or appeal. If the agency appeals the Administrative Judge's final decision, it only has to appeal the parts of the decision that it is contesting. The fourth stage, where there has been a finding of class-based discrimination, is the determination of the claims for relief of the individual class members.

II. PRE-CERTIFICATION PROCEDURES

A. Pre-Complaint Processing

Section 1614.204(b) of 29 C.F.R. provides that, as with an individual complainant, an employee who seeks to represent a class of employees must seek counseling and undergo pre-complaint processing in accordance with 29 C.F.R. § 1614.105 and Chapter 2 of this Management Directive, with one exception, discussed below. Section 1614.105(a)(1) of 29 C.F.R. requires that an employee must seek counseling within forty-five (45) days of the discriminatory event. The

agency shall extend the 45-day time limit when the individual shows that s/he was not notified of the time limits and was not aware of them, that s/he did not know and reasonably should not have known that the discriminatory practice or personnel action occurred, that despite due diligence s/he was prevented by circumstances beyond his/her control from contacting the EEO Counselor within the time limits, or for other reasons considered sufficient by the agency or the Commission. See 29 C.F.R. § 1614.105(a)(2). The time period may be waived by the agency and is subject to estoppel and equitable tolling. See 29 C.F.R. § 1614.604(c). If the complaint is not resolved on the thirtieth (30th) day following initial EEO counseling, the EEO Counselor must give the agent written notice that s/he has **fifteen (15) days** from receipt of the notice to file a formal complaint. 29 C.F.R. § 1614.204(c)(2).

The counseling period may be extended up to an additional **sixty (60) days** if, prior to the expiration of the 30-day period, the aggrieved person agrees with the agency in writing to postpone the final interview.

The one exception to the mandatory counseling prerequisite allows a complainant to move for class certification at any reasonable point in the process when it becomes apparent that there are class implications to the claim raised in an individual complaint. 29 C.F.R. § 1614.204(b).¹ The Commission intends that “reasonable point in the process” be interpreted to allow a complainant to seek class certification when s/he knows or suspects that the complaint has class implications, that is, the complaint potentially involves questions of law or fact common to a class and the complainant’s claim is typical of that of the class. Undue delay in moving for certification will lead to denial of the class certification by the Administrative Judge. If a complainant moves for class certification after completing the pre-complaint process contained in 29 C.F.R. § 1614.105, no additional counseling is required. See 29 C.F.R. § 1614.204(b). Instead, the agency or the Administrative Judge, as appropriate, must advise the complainant of his/her rights and responsibilities as the class agent.

B. Filing and Presentation of the Class Complaint

As with an individual complaint, a class complaint must be filed with the agency that allegedly discriminated against the putative class. 29 C.F.R. § 1614.106(a). A class complaint must be signed by the class agent (the complainant) or a class representative and must identify the policy or practice adversely affecting the

¹ The term “move” in this context means that the complainant must make his/her intention to process the complaint as a class action clear. A complainant may make his/her intention clear through a letter, a formal motion, or any means that effectively informs the agency or Administrative Judge of the complainant’s intent to pursue a class action.

August, 2015**EEO MD-110**

class as well as the specific action or policy affecting the class agent. 29 C.F.R. § 1614.204(c)(1).

Within thirty (30) days of an agency's receipt of a class complaint, including the agency's receipt of the class complaint during its investigation of the aggrieved person's individual complaint, an agency must designate an agency representative and forward the complaint, along with a copy of the EEO Counselor's Report and any other relevant information about the complaint, to the Commission. 29 C.F.R. § 1614.204(d)(1). When **any** complaint is filed, an agency must take care to preserve any and all evidence with potential relevance to the class complaint. This is a continuing obligation that begins as soon as the complaint is filed, even before the class has been certified, and continues throughout the processing of the complaint.

The agency must forward the class complaint to the Commission district office having jurisdiction over the agency facility where the complaint arose. Appendix N to this Management Directive is a list of the addresses of the Commission district and field offices, their geographic jurisdictions, and where federal employees and applicants should submit hearing requests.

Should the agency's organizational component where the complaint arose not fall within one of the geographical jurisdictions shown, the agency should contact the following office for guidance:

Equal Employment Opportunity Commission
Office of Field Programs
Attn: Hearings Coordinator
131 M Street, NE
Washington, DC 20507

Email at: info@eeoc.gov

III. INDIVIDUAL COMPLAINTS FILED ON BASES AND ISSUES IDENTICAL TO CLASS COMPLAINTS

When a complainant who is a potential member of a class action files an individual complaint between the time a class complaint is filed and a final certification decision is issued, the agency must determine whether there are claims in the individual complaint that are identical to those that are presented in the class complaint. If the agency determines that claims in the individual and class complaints are identical, then the agency shall issue a written decision notifying the complainant that the portion of the complaint raising claims identical to the class complaint will

EEO MD-110**August, 2015**

be held in abeyance during the pendency of the decision to accept or reject the class complaint.² The agency decision shall notify the complainant of his/her right to appeal the abeyance determination to the Commission.³ The agency decision must also contain, at a minimum, a description of the individual claims at issue; a description of the class complaint with the definition of the putative class; the class complaint counseling report; and the status of the class action, including the Commission field office to which the class complaint has been sent for a determination on certification, if applicable.

If, however, the agency finds that the claim in the individual complaint is not identical to the class claim then the individual complaint shall continue to be processed by the agency.

The Administrative Judge may dismiss a class complaint, or any portion, because it does not meet the prerequisites for certification or for any of the procedural grounds listed in §1614.107. If a potential class complaint is dismissed by the Administrative Judge, the Agency's final order adopting the dismissal shall include notification to the class agent(s) that his/her complaint will be processed as an individual complaint, or that the individual complaint is also dismissed in accordance with §1614.107. In addition, **within forty (40) days** of receipt of an Administrative Judge's decision dismissing a putative class complaint the agency shall issue an acknowledgment of receipt of an individual complaint as required by 29 C.F.R. §1614.106(e) and process each individual complaint that was held in abeyance because of the class complaint.

If a class complaint is certified, all individual complaints that raise claims identical to the definition of the class claim(s) shall be subsumed within the class complaint. When the class claim proceeds to a hearing on the merits, the subsumed individual claim(s) may be presented during the liability stage by the class agent, or at the remedy stage by the individual complainant. If class-wide discrimination is **not found**, the agency shall process each individual claim that was subsumed into the class complaint. See 29 C.F.R. §1614.204(1)(2).

- (a) For an individual claim to be subsumed in an accepted class complaint, it must be identical in all respects to the class claim(s), including the issue and basis of discrimination alleged. When an individual complaint raises multiple claims, only those claims that are identical to those raised in the class complaint will be subsumed in it. The non-identical claims in the individual complaint shall be processed separately under the individual complaint process.

² As a point of clarification, claims that are held prior to class certification are stated to be held in "abeyance" and claims that are referenced as being "subsumed" are claims that become part of the class action following class certification. When an individual complaint raises multiple claims, only those claims that are identical to those in the class complaint with respect to basis and issue are properly held in abeyance or subsumed. The non-identical claims in the individual complaint shall be processed separately by the agency under the individual complaint process.

³ See [Roos v. U.S. Postal Service](#), EEOC Request No. 05920101 (Feb. 13, 1992).

August, 2015**EEO MD-110**

(b) When an agency makes a decision not to process an individual claim because it is identical to and subsumed by an accepted class complaint, it shall issue a decision advising the individual complainant of his/her right to appeal to OFO for a ruling on whether the individual claim should be subsumed in the accepted class claim(s). The agency decision must also contain, at a minimum, a description of the individual complaint at issue and a description of the certified class complaint and underlying certification decision(s).

IV. CERTIFICATION OR DISMISSAL - 29 C.F.R. § 1614.204(d)

The Commission will assign an Administrative Judge (or in some limited circumstances a complaints examiner from another agency may be assigned) to issue a decision on certification of the complaint. 29 C.F.R. § 1614.204(d).

A. Class Complaint Criteria

A class complaint will be dismissed if:

1. The complaint does not meet all of the prerequisites of a class complaint under 29 C.F.R. § 1614.204(a)(2) (that is, numerosity, commonality, typicality, and adequacy of representation);
2. The claims lack specificity and detail pursuant to 29 C.F.R. § 1614.204(d)(4);
3. The complaint meets any of the criteria for dismissal pursuant to 29 C.F.R. § 1614.107(a), "Dismissals of Complaints."

The Administrative Judge shall deny class certification when the complainant has unduly delayed in moving for certification. See 29 C.F.R. § 1614.204(b).

B. Developing the Evidence for Purpose of Certification Determination

The Administrative Judge may direct the complainant or agency to submit additional information relevant to the issue of certification. See 29 C.F.R. § 1614.204(d)(1).

V. CERTIFICATION DECISION - 29 C.F.R. § 1614.204(d)(7)

A. Administrative Judge Issues Decision on Certification

The Administrative Judge shall issue a decision on whether to certify or dismiss a class complaint. When appropriate, the Administrative Judge may decide to certify a class conditionally, for a reasonable period of time, until a complainant finds representation. For example, if the record on a class complaint satisfies the numerosity, typicality, and commonality requirements for class certification, the Administrative Judge may “conditionally” certify the class for a reasonable period of time so that the class agent may secure adequate representation. Administrative Judges should refer complainants to any attorney referral systems that may be operating in the Commission district offices or other attorney referral services for assistance in obtaining adequate legal representation.

Even after a class is certified, the Administrative Judge remains free to modify the certification order or dismiss the class complaint in light of subsequent developments. See [General Telephone Co. v. Falcon](#), 457 U.S. 147, 160 (1982). The Administrative Judge has the authority, in response to a party’s motion or on his/her own motion, to redefine a class, subdivide it, or dismiss it if the Administrative Judge determines that there is no longer a basis for the complaint to proceed as a class complaint. [Hines v. Dep’t. of the Air Force](#), EEOC Request No. 05940917 (Jan. 29, 1996).

B. Transmittal of Decision

The Administrative Judge shall transmit his/her decision to accept or dismiss a class complaint to the agency and the agent. The agency shall take final action by issuing a final order within forty (40) days of receipt of the Administrative Judge’s decision. The final order shall notify the agent whether the agency will implement the decision of the Administrative Judge. If the final order does not fully implement the decision of the Administrative Judge, the agency shall simultaneously appeal the Administrative Judge’s decision in accordance with 29 C.F.R. § 1614.403 and append a copy of the appeal to the final order. The Commission has prepared a form that agencies may use to file appeals with the Commission. A copy of that form is attached as Appendix O.

If the decision is to accept (certify) the class complaint, Commission regulations require the agency to notify all class members. 29 C.F.R. § 1614.204(e)(1). The agency must use all reasonable means to notify all class members of the acceptance of the complaint within 15 days of receipt of the Administrative Judge’s decision or within a reasonable time frame specified by the Administrative Judge. (See Section VI.A, below.)

August, 2015**EEO MD-110**

An Administrative Judge's decision to dismiss the class complaint at the certification stage will inform the agent that the complaint is being filed on that date as an individual complaint and will be processed under subpart A, that the complaint is also dismissed as an individual complaint in accordance with 29 C.F.R. § 1614.107(a), or, in the case of a complaint forwarded to the Administrative Judge during the agency's investigation of the complaint, that the complaint is being returned to the agency and will continue from the point that processing ceased with the referral of the complaint to the Administrative Judge.

C. Right to Appeal the Administrative Judge's Decision

The Administrative Judge's decision whether to accept or dismiss the class complaint is subject to final agency action. The Administrative Judge shall transmit his/her decision to the agency, with a copy to the complainant and the complainant's representative, if any. The agency has forty (40) days from receipt of the Administrative Judge's decision to take final action by issuing a final order informing the complainant as to whether the agency will fully implement the decision. If the agency informs the complainant that it does not intend to fully implement the decision, the agency must simultaneously file an appeal with the Commission and append a copy of the appeal to the final order served on the complainant. The agency may use the form appended hereto as Appendix O to file its appeal with the Commission. The complainant will have thirty (30) days from receipt of the final order to file an appeal and the agency shall provide the complainant with a copy of EEOC Form 573, Notice of Appeal/Petition - Complainant (Appendix P).

VI. NOTIFICATION - 29 C.F.R. § 1614.204(e)

A. Timing and Method of the Notice

Within **fifteen (15) calendar days** of the agency's receipt of the Administrative Judge's decision certifying a class complaint or such time frame specified by the Administrative Judge, the agency shall use reasonable means, such as hand delivery, mailing to the last known address, or distribution (such as through inter-office mail or email) to notify all class members of the certification of the class complaint. An agency may file a motion with the Administrative Judge seeking a stay in the distribution of the notice for the purpose of determining whether it will fully implement or appeal the Administrative Judge's decision.

The "reasonable means" used by agencies for notification should be those most likely to provide an opportunity for class members to know about the complaint. Conspicuous posting on bulletin boards to which all potential class members have easy access may constitute adequate notice in some situations.

B. Content of the Notice

The notice must contain:

1. the name of the agency or organizational segment, its location, and the date of acceptance of the complaint;
2. the definition of the class and a description of the issues accepted;
3. an explanation of the binding nature of the decision or resolution of the complaint on class members;
4. the name, address, and telephone number of the class representative; and
5. a copy of the Administrative Judge's decision certifying the class.

C. Individuals May Not Opt Out

The class members may not “opt out” of the defined class; however, they do not have to participate in the class or file a claim for individual relief. All class members will have the opportunity to object to any proposed settlement and to file claims for individual relief if discrimination is found.

D. Settlement Notice

All class members must receive notice of any settlement or decision on the class complaint whether or not they participated in the action. See Section VII of this Chapter.

VII. DEVELOPING THE EVIDENCE - 29 C.F.R. § 1614.204(f)**A. The Process of Developing the Evidence**

The Administrative Judge shall advise both parties that they will have at least sixty (60) days to develop evidence. 29 C.F.R. § 1614.204(f)(1). They can do this in the same manner as in individual cases, that is, through interrogatories, depositions, requests for admissions, stipulations, or production of documents. The parties may object to production on the grounds that the information sought is irrelevant, overly burdensome, repetitious, or privileged. The Administrative Judge has the authority to impose sanctions on a party if that party fails to comply without good cause with rulings on requests for information, documents, or

August, 2015**EEO MD-110**

admissions. An adverse inference may be appropriate where the information is solely in the control of that party. Similarly, if a party fails to provide an adequate explanation for the failure to respond fully and in a timely manner to a request, the Administrative Judge may impose sanctions. Adverse inferences are appropriate when the information is solely in the control of that party. These sanctions include, but are not limited to, the authority to:

1. draw an adverse inference that the requested information would have reflected unfavorably on the party refusing to provide the requested information;
2. consider the issues to which the requested information pertains to be established in favor of the opposing party;
3. exclude other evidence offered by the party failing to produce the requested information; and/or
4. recommend that a decision be entered in favor of the opposing party.⁴

B. Use of Agency Resources and Facilities by Class Agent

The class agent and his/her non-attorney representative should be permitted reasonable access to and/or use of agency facilities (copiers, telephones, computers, internet, fax machines, email, printers, etc.) for preparation of the case as long as there is no undue disruption of agency operations. The class agent and/or non-attorney representative may not use agency resources and facilities in the preparation of the class case without obtaining the prior approval of the designated agency official.

⁴ The Administrative Judge's order to the parties should make clear what sanctions or other actions may be imposed for a failure to comply with the order within the time set forth therein. Where an order did not put a party on notice that it could be sanctioned for a noncompliance or did not put the party on notice of the type of sanction that the Administrative Judge now seeks to impose, the Administrative Judge must issue a notice to show cause to the party for an explanation why the sanction should not be imposed and provide an opportunity to cure the noncompliance before imposing the sanction.

VIII. RESOLUTION - 29 C.F.R. § 1614.204(g)**A. Resolution by the Parties**

The complaint may be resolved by agreement of the agency and the agent at any time pursuant to the notice and approval procedure contained in 29 C.F.R. § 1614.204(g)(4).

B. Notice of Proposed Resolution

If a resolution is proposed, notice must be given to all class members in the same manner as the notification of certification of the class was given. The notice must include a copy of the proposed resolution, set out the relief, if any, that the agency will grant, and inform the class members that the resolution will bind all members of the class. The notice must also inform class members of the right to submit objections to the settlement. The notice further must inform the parties of the name and address of the Administrative Judge assigned to the complaint.

The agency shall provide the Administrative Judge with a copy of the proposed resolution and the notice sent to the parties.

C. Administrative Judge Shall Review Resolution

1. The Administrative Judge shall review and issue a decision concerning the fairness, adequacy, and reasonableness of the proposed resolution. Within **thirty (30) days** of the date of a class member's receipt of the notice of proposed resolution, the class member may file a petition with the Administrative Judge noting objections to the settlement if the petitioner (class member) believes that the settlement benefits only the class agent or is otherwise not fair, adequate, and reasonable to the class as a whole. The Administrative Judge will review the proposed resolution after the expiration of the 30-day period allowed for petitions and consider any petitions received. If the judge determines that the resolution is not fair, adequate, and reasonable, s/he will vacate the proposed resolution and may replace the class agent with the petitioner or other class member who is eligible to serve as class agent.
2. An Administrative Judge's decision that a resolution is not fair, adequate, and reasonable vacates the agreement between the class agent and the agency. The decision must inform the class agent, the petitioner, class members, and the agency of the right to appeal the decision to the Commission. The decision must include a copy of EEOC Form 573,

August, 2015**EEO MD-110**

Notice of Appeal/Petition (Appendix P). The agency may use the separate form at Appendix O for filing its appeal with the Commission.

3. An Administrative Judge's decision that a resolution is fair, adequate, and reasonable binds all members of the class. The decision must inform the petitioner of the right to appeal the decision to the Commission. The decision must include a copy of EEOC Form 573, Notice of Appeal/Petition (Appendix P).

IX. HEARING - 29 C.F.R. §§ 1614.204(h) and (i)

A. Hearing Procedures

Hearing procedures in certified class complaints are the same as those applied to hearings in individual complaints of discrimination and are set out in 29 C.F.R. § 1614.109.

B. Site of the Class Hearing

The Administrative Judge assigned to hear the certified class complaint will, upon expiration of the period allowed for preparation of the class case, set a date for a hearing and determine the site of the hearing. Within his/her discretion, the Administrative Judge is authorized to conduct the hearing in the Commission district office, in a Commission area or local office, at the agency's organizational component where the complaint arose, or at such other location as s/he may determine appropriate. In determining the hearing site, the Administrative Judge should consider factors such as the location of the parties; the location of the Commission district, area, and local offices; the number and location of witnesses; the location of records; travel distances for the Administrative Judge, the parties, and witnesses; travel costs; the availability of sources of transportation; and other factors as may be appropriate.

Should an agency desire that a hearing be held at a location within the jurisdictional area of another Commission district office, it must submit a request, in writing, to the Commission office that determined the class certification issue. In its request, the agency must identify the location of the desired place of hearing and must set out, in detail, its reasons and justification for the requested change. The Administrative Judge will rule on the request only after the directors of the concerned Commission district offices have conferred on the matter.

C. Travel Expenses

If the Administrative Judge sets a hearing site that is outside the local commuting area of the agency's organizational component where the complaint arose, the agency must bear all reasonable travel and per diem expenses of class agents, their authorized representatives, agency representatives, and all witnesses approved by the Administrative Judge, except that an agency does not have the authority to pay the travel expenses of complainant's witnesses who are not federal employees.

The agency's obligation is limited to those costs which are legally payable in advance by the agency. See [Expenses of Outside Applicant/Complainant to Travel to Agency EEO Hearing](#), File: B-202845, 61 Comp. Gen. 654 (1982); see also [John Booth \(Travel Expenses of Witness \(Agency Responsible](#), File: B-235845, 69 Comp. Gen. 310 (1990).

D. Official Time for Agency Employees

Any employee testifying at a hearing is entitled to official time for the time s/he spends testifying as well as a reasonable amount of time for travel to and from the hearing. The class agent and agent's representative, if employees of the agency where the complaint arose and was filed, are entitled to official time for actual time spent at the hearing and for a reasonable amount of time spent preparing for the hearing.

An agency may permit its employees to use official time in preparing and presenting a class complaint which arose in another agency.

X. ADMINISTRATIVE JUDGE'S DECISION ON THE MERITS OF THE CLASS COMPLAINT

The Administrative Judge shall transmit his/her decision on the complaint to the parties. If there is a finding of discrimination, the decision shall include systemic relief for the class, and any individual relief, where appropriate, with regard to the personnel action or policy that gave rise to the complaint. The decision shall be sent to the agency together with the entire record, including the transcript.

If the Administrative Judge finds no class relief appropriate, s/he shall determine if any finding of individual discrimination is warranted and, if so, shall issue a decision on the appropriate relief to be provided by the agency. 29 C.F.R. § 1614.204(i).

August, 2015EEO MD-110**XI. AGENCY FINAL ACTIONS - 29 C.F.R. §§ 1614.204(j) and (k)****A. Action on Administrative Judge's Decision**

Within sixty (60) days of receipt of the Administrative Judge's decision, the agency must issue a final order either fully implementing or simultaneously appealing the Administrative Judge's decision. If the agency does not issue the final order within sixty (60) days of receipt of the Administrative Judge's decision, the Administrative Judge's decision becomes the final action of the agency. 29 C.F.R. § 1614.204(j)(2).

The agency must transmit its final order to the class agent within five days of the expiration of the 60-day period.

B. Agency Final Action Requirements

The agency's final order on a class complaint must be in writing; notify the class agent whether the agency will fully implement the decision of the Administrative Judge; and contain a notice of the right to appeal to the Equal Employment Opportunity Commission, the right to file a civil action, and the applicable time limits. If the final order does not fully implement the decision of the Administrative Judge, the agency shall simultaneously file an appeal in accordance with 29 C.F.R. § 1614.403 and append a copy of the appeal to the final order. See 29 C.F.R. § 1614.204(j)(1).

C. Binding Nature of Agency Final Action Implementing Administrative Judge's Decision

The final agency action implementing the Administrative Judge's decision finding discrimination will be binding on all members of the class and on the agency. A final agency action implementing the Administrative Judge's decision finding no discrimination is not binding on a class member's individual complaint. Class members may not "opt out" of the class action while it is pending. See Section V.C of this Chapter.

D. Notification of Agency Final Action

The agency shall notify class members and the class representative of its final action through the same media employed to give notice of the existence of the class complaint. The notice, where appropriate, shall include information concerning the rights of class members to seek individual relief and of the procedures to be followed. Notice shall be given by the agency within ten (10) days of the transmittal of its final action to the agent.

XII. RELIEF FOR INDIVIDUAL CLASS MEMBERS - 29 C.F.R. § 1614.204(i)**A. Claims for Individual Relief by Class Members Where Discrimination Is Found**

Where a finding of discrimination against a class is made, there is a presumption of discrimination as to each member of the class. The agency has the burden of proving by clear and convincing evidence that a class member is not entitled to relief. See 29 C.F.R. § 1614.204(i)(3).

Within thirty (30) days of receipt of notification of the final agency action implementing the Administrative Judge's decision, a class member who believes that s/he is entitled to individual relief must file a written claim with the head of the agency, or with the agency's EEO Director.

The claim must include a specific, detailed showing that:

1. The claimant is a class member who was affected by the discriminatory policy or practice; and
2. The discriminatory action occurred within the period of time for which the Administrative Judge found class-wide discrimination in his/her decision.

B. Timing of Agency Decision on Individual Claims for Relief

Within **ninety (90) calendar days** of receiving an individual claim, the agency must issue a final decision on that claim. The agency's final decision must include a notice of the right to file an appeal or a civil action within the applicable time limits. The decision must include a copy of EEOC Form 573, Notice of Appeal/Petition (Appendix P).

August, 2015EEO MD-110**C. Oversight of Individual Claims for Relief**

1. Where an Administrative Judge finds that the agency discriminated against the class, the Administrative Judge should include in his/her order a provision that establishes a mechanism for review of individual claims pursuant to 29 C.F.R. § 1614.204(l)(3). Under that section, a class member must file a claim with the agency within thirty (30) days of his/her receipt of notification from the agency of its final order and the agency must issue a final order within ninety (90) days of its receipt of the claim. That section further provides that Administrative Judges retain jurisdiction over the complaint in order to resolve any disputed claims of class members and may hold hearings or otherwise supplement the record on a claim filed by a class member.
2. To implement this section, an Administrative Judge's order should advise the agency to inform him/her in writing within sixty (60) days of the agency's receipt of a claim from a class member that it intends to dispute the class member's claim, and provide a copy of such notice to the class member. Once the agency informs the Administrative Judge and the class member of its intent to dispute the class member's claim, the Administrative Judge will issue an order tolling the 90-day period within which the agency is required to issue a decision on the class member's claim.
3. The Administrative Judge's order will advise the agency to provide a statement in support of its decision to dispute the class member's claim and any supporting evidence within fifteen (15) days of the agency's receipt of the Administrative Judge's order, providing a copy of any such submission to the class member. The class member will have 15 days from the date of service of the agency's submission to respond to the agency's submission and may file a statement and documents in support of his/her claim, providing a copy of any such submission to the agency. If service of the submission was by mail, the class member may add three days to the date that the response is due. The Administrative Judge has the discretion to enlarge the 15-day period at the written request of either party or on his/her own motion. If a party seeks an enlargement of the 15-day period, that party must provide a copy of its written request to the other party.
4. The Administrative Judge thereafter may determine whether s/he needs additional information or should hold a hearing in order to further develop the record regarding the class member's claim. At the conclusion of fact finding, the Administrative Judge will issue a decision concerning the class member's claim and forward the decision to the class member and

the agency. The decision will advise the agency that the 90-day period for issuing a final order on the claim will resume upon its receipt of the Administrative Judge's decision. The agency must issue a final order regarding the class member's claim within the 90-day period. If the agency does not issue the final order within the 90-day period, the Administrative Judge's decision will become the final order of the agency.

5. The agency's final action on a class member's claim must inform the class member of the right to appeal the decision to the Office of Federal Operations or to file a civil action, and it must include EEOC Form 573, Notice of Appeal/Petition (Appendix P).

D. Limits on the Duration of a Finding of Class-Wide Discrimination

The agency or the Commission may find class-wide discrimination and order remedial action for any policy or practice in existence within forty-five (45) days of the class agent's initial contact with the EEO Counselor. Relief may be ordered for the time the policy or practice was in effect. Under the pattern of discrimination theory, incidents occurring earlier than 45 days before contact with the EEO Counselor must also be remedied provided the initial contact with the EEO Counselor was timely and the earlier incidents were part of the same continuing policy or practice found to have been discriminatory. Where contact with the EEO Counselor is timely as to one of the events comprising the continuing violation, then the counseling contact is timely as to the entire violation. See 29 C.F.R. § 1614.204(l)(3). This 45-day time period does not limit the two-year time period for which back pay can be recovered by a class member.

E. Where Class-Wide Discrimination Is Not Found

The agency shall, **within sixty (60) calendar days** of issuance of the final decision, acknowledge receipt of an individual complaint as required in 29 C.F.R. § 1614.106(d) and process in accordance with the provisions of subpart A each individual complaint that was subsumed into the class complaint.

If it is found that the class agent or any other member of the class is a victim of discrimination, the relief provisions of 29 C.F.R. § 1614.501 shall apply.

August, 2015EEO MD-110

XIII. REPRISAL

Federal employees who are agents, claimants, representatives of agents or claimants, witnesses, or agency officials having responsibility for processing class complaints may file individual discrimination complaints if they believe they have been subjected to restraint, interference, coercion, or reprisal because of their involvement in the presentation and/or processing of a class complaint. EEO counseling must precede the filing of such complaints.

Retaliation claims can be the subject of class actions where the plaintiffs establish a general practice of retaliation against employees who oppose discriminatory practices or exercise rights protected under Title VII. See, [Holsey v. Armour & Co.](#), 743 F.2d 199, 216-217 (4th Cir. 1984), cert denied, 470 U.S. 1028 (1985). The Commission has held that reprisal is an appropriate basis for a class when there is a showing that specific reprisal actions were taken against a group of people for challenging agency policies, or where reprisal was routinely visited on the class members. See [Levitoff v. Dep't. of Agriculture](#), EEOC Appeal No. 01913685 (Mar. 17, 1992), request to reopen denied, EEOC Request No. [05920601](#) (Sept. 10, 1992); as cited in [Powell, et. al. v. Dep't. of the Navy](#), EEOC Appeal No. 01974349 (Aug. 2, 2000).

August, 2015

EEO MD-110

CHAPTER 9 APPEALS TO THE COMMISSION

I. INTRODUCTION

Sections 1614.401(a)-(e) of 29 C.F.R. identify those entitled to file appeals to the Commission. 29 C.F.R. § 1614.402(a) provides that appeals to the Commission must be filed by complainant **within thirty (30) days**¹ of receipt of an agency's final action - that is, a dismissal, final agency decision (FAD), final order, or final determination. If an attorney of record represents the complainant, the 30-day time limit shall begin to run from the date of receipt by the attorney of the agency's final action. If an agency determines not to implement the decision of an Administrative Judge either in full or in part, it must notify the complainant of its determination in a final order issued **within forty (40) days** of its receipt of the Administrative Judge's decision and it must simultaneously file an appeal with the Commission, in a digital format acceptable to the Commission, absent a good showing why the agency cannot submit digital records. See Chapter 6, Section VIII for more information on what constitutes good cause shown. The complainant may file an appeal with the Commission in either a digital format acceptable to the Commission or by mail. For information regarding appeals submissions see Section IV of this Chapter.

The complainant shall furnish a copy of the appeal to the agency at the same time it is filed with the Commission. In or attached to the appeal to the Commission, the complainant must certify the date and method by which service was made on the agency.

The individual complainant should use EEOC Form 573, Notice of Appeal/Petition. A copy of the Form is attached as Appendix P to this Management Directive. The agency shall attach a copy of EEOC Form 573 to all final actions and dismissals of equal employment complaints. The Commission has prepared a separate form that agencies may use to file appeals with the Commission. A copy of that form is attached as Appendix O.

¹ All time limits stated in this Management Directive are in calendar days. The time limits in Part 1614 are subject to waiver, estoppels, and equitable tolling. 29 C.F.R. § 1614.604(c). For further guidance, see [EEOC Compliance Manual](#), Section 2 "Threshold Issues," IV-D, Timeliness.

II. ADVISING THE PARTIES OF THEIR APPEAL RIGHTS

A. Rights Following Administrative Judge Issuance of a Decision

1. Merits/Class Certification Cases

- a. In a decision on the merits of a non-class complaint or concerning the issue of certification of a class action, the Administrative Judge shall advise the parties that the agency has forty (40) days from the date of its receipt of the Administrative Judge's decision to review the decision and to take final action on the decision by issuing a final order. The 40-day period within which the agency must take final action does not commence until the Administrative Judge issues an order advising the agency that the decision of the Administrative Judge is the final decision and that the agency must take final action within 40 days of its receipt thereof. Where an Administrative Judge issues a decision finding discrimination, the 40-day period will not commence until the Administrative Judge issues a final decision regarding remedies and attorney's fees.²
- b. In a decision on the merits of a class complaint, the Administrative Judge shall advise the parties that the agency has sixty (60) days from the date of its receipt of the Administrative Judge's decision to review the decision and to take final action on the decision by issuing a final order. The 60-day period within which the agency must take final action does not commence until the Administrative Judge issues an order advising the agency that the decision of the Administrative Judge is the final decision and that the agency must take final action within 60 days of its receipt thereof.³
- c. The Administrative Judge should inform the complainant of the following:

² If service of the Administrative Judge's decision was by mail without the use of certified mail/return receipt, the agency may add five days to the date that the final action is due. This rule, adding five days to the date of service, shall apply in all instances where the party being served has the right to take an action within a period of time following such service, except where the serving party uses certified mail/return receipt and can establish the date of actual receipt.

³ Due to the potential complexity of class complaints that proceed through litigation, the 60-day period is intended to provide agencies adequate time to review the Administrative Judge's decision on liability and relief.

August, 2015EEO MD-110

- (1) where the agency's final action/final order advises the complainant that the agency accepts the Administrative Judge's decision, the agency will advise the complainant that s/he has thirty (30) days from the date the complainant receives the agency's final order to file an appeal of the final order.
- (2) the agency's failure to take final action by issuing a final order within this 40- or 60-day review period will be deemed acceptance of the Administrative Judge's decision;
- (3) the complainant's 30-day period for filing an appeal of the agency's final order/Administrative Judge's decision begins at the conclusion of the agency's 40- or 60-day review period;
- (4) where the agency's final action/final order advises the complainant that the agency has determined not to fully implement the Administrative Judge's decision, the agency must file an appeal of the Administrative Judge's decision simultaneously with notifying the complainant of its determination (providing the complainant with a copy of the appeal) and advise the complainant of his/her right to file a separate appeal of the Administrative Judge's decision within 30 days of the complainant's receipt of the agency's final order.

2. Procedural Dismissal

When the Administrative Judge issues a procedural dismissal, s/he must advise the complainant that the complainant will have the right to file an appeal of the agency's final order within 30 days of the complainant's receipt thereof.

3. Class Action Settlement Agreements

A petition to vacate a resolution may be filed with the Administrative Judge asserting that the resolution favors only the class agent or is not fair, adequate, and reasonable to the class as a whole. An Administrative Judge's decision that a class action settlement agreement is fair, adequate, and reasonable binds all members of the class. The decision must inform the petitioner of the right to appeal the decision to the Commission. The decision must include a copy of EEOC Form 573, Notice of Appeal/Petition.

An Administrative Judge's decision that a resolution is not fair, adequate, and reasonable vacates the agreement between the class agent and the agency. The decision must inform the class agent, the petitioner, class members, and the agency, of the right to appeal the decision to the Commission. The decision must include a copy of EEOC Form 573, Notice of Appeal/Petition (Appendix P). The agency may use the separate form at Appendix O for filing its appeal with the Commission.

B. Agency Final Action

1. Agency Final Action

An agency final action involves agency issuance of a final order to the complainant. The final order informs the complainant whether the agency will fully implement the decision of the Administrative Judge and contains notice of the complainant's right to appeal to the Commission. The term "fully implement" means that the agency adopts without modification the decision of the Administrative Judge. If the agency's final order advises the complainant that the agency will not fully implement the decision of the Administrative Judge, the agency must file an appeal of the decision with the Commission simultaneously with issuing the final order to the complainant. In this way, an agency will take final action on a complaint referred to an Administrative Judge by issuing a final order, but it will not be provided with the opportunity of introducing new evidence or writing a new decision in the case. The agency may use the form attached hereto as Appendix O to file its appeal with the Commission. Whether the agency's final order advises the complainant that the agency will or will not fully implement the Administrative Judge's decision, the agency must provide the complainant with a copy of EEOC Form 573, Notice of Appeal/Petition (Appendix P).

2. Notice of Rights

a. Full Implementation

Where the agency issues a final order in which it agrees to fully implement the Administrative Judge's decision, the order must inform the complainant that s/he has the right to file an appeal of the Administrative Judge's decision and agency's final order.

The agency further must inform the complainant that s/he must file an appeal within 30 days of his/her receipt of the agency's final order and the agency must provide the complainant with a copy of EEOC Form 573, Notice of Appeal/Petition (Appendix P).

August, 2015**EEO MD-110****b. Less than Full Implementation**

Where the agency issues a final order through which it informs the complainant that it does not intend to fully implement the Administrative Judge's final decision, the agency's final order must inform the complainant that the agency, simultaneously with the issuance of its final order to the complainant, has filed an appeal of the Administrative Judge's decision with the Commission. The agency may use the form appended hereto at Appendix O to file its appeal with the Commission.

The agency must provide the complainant with a copy of the appeal. The final order further must inform the complainant of the following:

(1) the complainant may file a separate appeal of the agency's final order;

(2) the Commission, as a general rule and in the absence of a separate appeal from the complainant, will review only the agency's decision not to fully implement the Administrative Judge's decision; and

(3) if the complainant contends that the Administrative Judge erred either in any rulings made during the pendency of the action or in the decision, the complainant must file a separate appeal from the agency's final order to challenge such errors.

The final order must inform the complainant that any such appeal must be filed within 30 days of the complainant's receipt of the final order, and the agency must provide the complainant with a copy of EEOC Form 573, Notice of Appeal/Petition (Appendix P).

C. Agency Final Decision

In any case where the agency issues a final decision (for example, where the complainant elects to have the agency issue a final decision following completion of the investigation), the agency must inform the complainant of his/her right to file an appeal with the Commission and provide the complainant with a copy of EEOC Form 573, Notice of Appeal/Petition (Appendix P). The agency further must inform the complainant that any such appeal must be filed within 30 days of complainant's receipt of the agency's final decision.

D. Agency Procedural Decision

Where the agency issues a decision dismissing a complaint in its entirety pursuant to 29 C.F.R. § 1614.107(a), the agency must inform the complainant of his/her right to file an appeal with the Commission and provide the complainant with a copy of EEOC Form 573, Notice of Appeal/Petition (Appendix P). The agency further must inform the complainant that any such appeal must be filed within 30 days of complainant's receipt of the agency's dismissal decision.

E. Mixed Case Complaints

The agency must advise the complainant that s/he may appeal a final agency decision on a mixed case complaint by filing the appeal with the **Merit Systems Protection Board (not the Commission)**. The agency further must inform the complainant that any such appeal must be filed within 30 days of his/her receipt of the agency's decision. For a fuller discussion concerning the processing of mixed cases, see Chapter 4, Section II of this Management Directive.

III. PERSONS WHO MAY APPEAL

The Commission's regulations governing appeals to the Commission are located at subpart D of 29 C.F.R. Part 1614. Section 1614.401 of 29 C.F.R. sets out who may appeal to the Commission when an issue of employment discrimination is raised either alone or in connection with a grievance, settlement, or a Merit Systems Protection Board (MSPB) claim.

A. A Complainant May Appeal

1. An agency's dismissal of or final action on a complaint.⁴

⁴ An agency's final action on a complaint may include either 1) a dismissal, see 29 C.F.R. § 1614.107(a); 2) a final order from the agency stating whether it will fully implement the decision of the Administrative Judge, see 29 C.F.R. § 1614.110(a); 3) a final agency decision on the merits of the complaint where the complainant requested an immediate final decision pursuant to 29 C.F.R. § 1614.108(f); or 4) an agency's final determination on its alleged noncompliance with a settlement agreement in accordance with 29 C.F.R. § 1614.504. See 29 C.F.R. § 1614.110(b). The regulations further provide that the agency must file an appeal with the Commission at the same time it serves the final order on the complainant following receipt of a decision from an Administrative Judge where it does not intend to fully implement the decision. The agency's filing of an appeal of an Administrative Judge's decision that it does not intend to fully implement will result in the Commission's review of the agency's decision not to fully implement the Administrative Judge's decision. The complainant need not file a separate appeal to have the Commission review the agency's actions. Where, however, the complainant contends that the Administrative Judge erred either in any rulings made during the pendency of the action

August, 2015**EEO MD-110****B. An Agency Must Appeal**

1. If it determines not to fully implement an Administrative Judge's decision to dismiss or on the merits of a complaint, in an appeal filed simultaneously with the final order served on the complainant.⁵
2. If it determines, in a class complaint, not to fully implement an Administrative Judge's certification decision or a decision on the merits, in an appeal filed simultaneously with the final order served on the agent.

The agency may use the form appended hereto at Appendix O to file its appeal with the Commission.

C. An Agency May Appeal

An Administrative Judge's decision to vacate a proposed resolution of a class complaint on the grounds that it is not fair, adequate, and reasonable to the class as a whole. The agency may use the form appended hereto at Appendix O to file its appeal with the Commission

D. A Class Agent May Appeal

1. An Administrative Judge's decision accepting or dismissing all or part of a class complaint.⁶

or in the decision, the complainant would need to file an appeal from the agency's final order to challenge such errors.

If an agency fails to take any action during the 40-day period, the Administrative Judge's decision would be deemed ratified and the complainant would be entitled to file an appeal of the Administrative Judge's decision as ratified after the expiration of the 40-day period. The agency would not be permitted to cross-appeal or challenge any aspect of the Administrative Judge's decision in this situation.

⁵ If the agency issues a final order to the complainant stating that it does not intend to fully implement the decision of the Administrative Judge but fails to file an appeal, the agency's final order has no effect on the Administrative Judge's decision. If the agency fails properly to issue a final order and file an appeal simultaneously with the issuance of the order, the Administrative Judge's decision will be deemed ratified by the agency upon the expiration of the agency's 40-day period for accepting or not accepting the Administrative Judge's decision.

⁶ Included is a dismissal of a complaint that does not meet the prerequisites of a class complaint as enumerated in 29 C.F.R. § 1614.204(a)(2) where the decision to dismiss informs the class agent that the complaint is being filed as an individual complaint. The Office of Federal Operations, Appellate Review Programs, will provide expedited consideration (within 90 days of receipt of appeal) of class complaints that are dismissed for failure to meet the prerequisites of a class complaint. See 29 C.F.R. § 1614.405(b).

2. An agency final action on the merits of the complaint.
3. An Administrative Judge's decision to vacate a proposed resolution of a class complaint on the grounds that it is not fair, adequate, and reasonable to the class as a whole.⁷
4. An agency's alleged noncompliance with a settlement agreement in accordance with 29 C.F.R. § 1614.504.

E. A Class Member or Petitioner May Appeal

1. An Administrative Judge's decision finding a proposed resolution fair, adequate, and reasonable to the class as a whole if the class member filed a petition to vacate the resolution; or finding that the petitioner is not a member of the class and did not have standing to challenge the resolution.
2. An Administrative Judge's decision that a proposed resolution is not fair, adequate and reasonable to the class as a whole.⁸
3. An agency's final action on a claim for individual relief under a class complaint.
4. An agency's alleged noncompliance with a resolution in accordance with 29 C.F.R. § 1614.504.

F. A Grievant May Appeal

1. A final decision of the agency.
2. A final decision of the arbitrator.

⁷ See 29 C.F.R. § 1614.204(g)(4). A petition to vacate a resolution may be filed with the Administrative Judge asserting that the resolution favors only the class agent or is not fair, adequate, and reasonable to the class as a whole. The petitioner may file an appeal with the Commission if the Administrative Judge finds the resolution fair, adequate, and reasonable to the class as a whole. If the Administrative Judge finds the agreement not fair, adequate, and reasonable, the class agent, class members, and the agency may file an appeal.

⁸ As noted above, where the Administrative Judge finds the agreement not fair, adequate, and reasonable, the class agent, class members, and the agency may file an appeal. If the Administrative Judge finds that the agreement is fair, adequate, and reasonable, only the petitioner may file an appeal.

August, 2015EEO MD-110

3. A final decision of the Federal Labor Relations Authority (FLRA) on the grievance.
4. **Exception:** A grievant may not appeal under subpart D of Part 1614, when the dispute initially raised in the negotiated grievance procedure is:
 - a. still ongoing in that process,
 - b. in arbitration,
 - c. before the FLRA,
 - d. appealable to the Merit Systems Protection Board (MSPB), or
 - e. if 5 U.S.C. § 7121(d) is inapplicable to the involved agency.

IV. FILING THE APPEAL AND RESPONSE

A. How to Appeal

1. The complainant, agent, grievant or individual class claimant (hereinafter appellant) must file an appeal by mailing the appeal to:

Equal Employment Opportunity Commission
 Office of Federal Operations
 P.O. Box 77960
 Washington, DC 20013
 Fax: (202) 663-7022

As an alternative the appeal may be submitted through facsimile or the Commission's electronic document submission portal.

The complainant should use EEOC Form 573, Notice of Appeal/Petition – Complainant (Appendix P) and should indicate what is being appealed.

2. Unless it has shown good cause why it is unable to do so,⁹ the agency must file an appeal with the Commission in digital format, either by using the Commission's electronic document submission portal or by some other approved method. See 29 C.F.R. § 1614.403(g). The agency may file its

⁹ For a showing of good cause the agency must submit a written request to the Director of the Office of Federal Operations identifying why they cannot meet the digital filing requirements and when they expect to be able to meet the digital filing requirements.

appeal by using the form appended hereto at Appendix O to file its appeal with the Commission and/or by providing the Commission with a copy of the order it sends to the complainant.

3. Where an agency files an appeal simultaneously with providing the complainant with a final order indicating that it does not intend to fully implement the decision of the Administrative Judge, the complainant need not file a separate appeal as a prerequisite to Commission review of the propriety of the agency's decision not to implement the Administrative Judge's decision. If, however, the complainant believes that other issues presented in his/her complaint and addressed by the Administrative Judge were wrongly decided, or if the complainant believes that the Administrative Judge's decision contained errors, the complainant should file an appeal from the agency's final order in order to ensure that the Commission will address these issues as well. Although the Commission has the right to review all of the issues in a complaint on appeal, it also has the discretion not to do so and may focus only on the issues specifically raised on appeal.

B. Service of Notice of Appeal

The complainant on appeal shall furnish a copy of the appeal to the agency at the same time it is filed with the Commission. In or attached to the appeal to the Commission, the complainant must certify the date and method by which service was made on the agency.

The agency must certify to the Commission that it has provided the complainant with a copy of the order in which it advised the complainant that it did not intend to fully implement the Administrative Judge's decision, that it informed the complainant of his/her right to file an appeal of its decision and provided the complainant with information as to how s/he may file an appeal, and that it provided the complainant with a copy of EEOC Form 573, Notice of Appeal/Petition (Appendix P).

C. Appeal Will Be Acknowledged

OFO will docket and acknowledge in writing the receipt of an appeal. Where both the agency and the complainant file appeals based on the same complaint following the agency's issuance of an order stating that it does not intend to fully implement the decision of the Administrative Judge, the Commission shall consolidate the appeals under a single Commission Appeal No. and consider both appeals simultaneously.

August, 2015**EEO MD-110****D. Dismissal of Appeal**

If a party files an appeal beyond the applicable time limits, the Commission may dismiss the appeal. The agency should advise the complainant in its dismissal decision or final order that if s/he files his/her appeal beyond the thirty (30)-day period set forth in the Commission's regulations, s/he should provide an explanation as to why his/her appeal should be accepted despite its untimeliness. If the complainant cannot explain why his/her untimeliness should be excused in accordance with 29 C.F.R. § 1614.604, the Commission may dismiss the appeal as untimely.

E. Briefs and Supporting Documents

The complainant may file a brief or statement in support of his/her appeal with the Office of Federal Operations. The optional brief or statement must be filed within thirty (30) days of filing the notice of appeal and a copy of it must be sent to the other party.

The agency may file a brief or statement in support of its final action. The brief or statement must be filed within twenty (20) days of filing its appeal, and in accordance with 29 C.F.R. § 1614.403(g), must be filed in a digital format acceptable to the Commission (see Appendix L).

F. Statements in Opposition to an Appeal

Any statement or brief in opposition to an appeal must be submitted to OFO and served on the opposing party within thirty (30) days of receipt of the statement or brief supporting the appeal. Where both the complainant and the agency file appeals and briefs or statements in support of their appeals, both parties may file statements in opposition to the appeal of the other party. If no brief or statement supporting the appeal is filed, the party opposing the appeal must file its opposition within sixty (60) days of the receipt of the appeal.

G. Submission of Case File

Absent notice from the Commission that it has the case file from the hearing on the same matter, the agency must submit the complaint file to OFO within thirty (30) days of notification that the complainant has filed an appeal or within thirty (30) days of submission of an appeal by the agency. If the complaint was adjudicated by an Administrative Judge, the complaint file must include copies of all documents issued by or served on the Administrative Judge, including, but not limited to, all correspondence to and from the Administrative Judge, orders from

the Administrative Judge, and motions and briefs of the parties. Agencies should develop internal procedures that will ensure the prompt submission of complaint files upon a determination not to fully implement an Administrative Judge's decision or notice that a complainant has filed an appeal.

The agency must submit appeals and complete complaint case file(s) to the Commission's Office of Federal Operations in a digital format unless they can show good cause for not doing so. Complainants and their representative(s), if applicable, are strongly encouraged to file all documents in a digital format. See, 29 C.F.R. §1614.403(g). All documents may be uploaded to the Commission's electronic document submission portal. If a CD is used, it is preferred that all documents be provided in a PDF format.

The electronic complaint file must at a minimum have the following features:

- Electronic bookmarks corresponding to the file index and section dividers of the paper file, if a paper file was created;
- Sequentially numbered pages starting with the first page of the file. **All pages** in the report of investigation must be accounted for in the page numbering of the document, including the cover page and any administrative documents, in order for the numbers in the paper file to match precisely the numbers in the electronic file. An individual entering page number 150 into Adobe Acrobat should come to the exact same page as an individual turning to page 150 of the paper file. Administrative documents added after the paper file was compiled may be submitted in a separate PDF file.

H. Signatures on Electronic Documents

It is the Commission's policy to support, encourage, and in the case of agency submissions on appeal, mandate the use of digital documents in lieu of paper for documentation sent to the Commission specifically under the authority of 29 C.F.R. § 1614.403(g). A digital document used by a person, agency, or other entity shall have the same force and effect as those documents not produced by electronic means.

In support of the policy, the Commission considers electronic signatures on such submissions as having the same force and effect as signatures and records produced by hand or other non-electronic means. "Electronic signature" means any digital symbol, sound, or process attached to or logically associated with a digital record and executed or adopted by a person with the intent to sign the record. The Commission will accept an array of digital objects to serve as an

August, 2015EEO MD-110

electronic signature. These objects can range from keyboarded characters (for example, “/s/Jane Doe”), a graphical image of a handwritten signature, or an authenticated process that creates an electronic signature. An electronic signature is considered attached to or logically associated with a digital record if the electronic signature is linked to the record during transmission and storage.

V. APPELLATE PROCEDURE

A. Where Record Is Complete

Where the record is complete, OFO shall issue a decision in accordance with 29 C.F.R. § 1614.405.

B. Where Record Requires Supplementation

While the Commission retains the right to supplement the record on appeal, it is intended that this right will be exercised only in rare instances to avoid a miscarriage of justice.

1. Where the record requires supplementation, OFO may require additional information from one or both of the parties. OFO may supplement the record by an exchange of letters, memoranda, or investigation. Each party shall provide copies of such supplemental information to the other party at the time it is submitted to OFO.
2. Where the record is so incomplete as to require remand to the agency in order to complete the investigation, the Commission shall designate a time period between **thirty (30) and ninety (90) days** within which the agency must complete the investigation. During the period of remand, the appeal will be held in abeyance and the complaint will be monitored by OFO. Upon completion of the investigation, the agency must provide the complainant with a copy of its supplemental record and findings and return the completed record to OFO. The complainant may, **within fifteen (15) days** of receipt of the supplemental record, submit a statement concerning the supplemental record to OFO. Upon receipt by OFO, the supplemental record will be included in the appeal file and the appeal will be processed appropriately.

C. Sanctions

Absent good cause shown, there is no legitimate basis for either party to an appeal to fail to comply with the appellate procedures in 29 C.F.R. § 1614.404 or to fail to respond fully and in a timely fashion to a request for information. Accordingly, where either party to an appeal fails to comply with the appellate procedures in 29 C.F.R. § 1614.404 or fails to respond fully and in a timely fashion to requests for information, without good cause shown, OFO shall, in appropriate circumstances, impose any of the following sanctions:

1. draw an adverse inference that the requested information would have reflected unfavorably on the party refusing to provide the requested information;¹⁰
2. consider the matters to which the requested information or testimony pertains to be established in favor of the opposing party;
3. issue a decision fully or partially in favor of the opposing party; or
4. take such other actions as appropriate.

See 29 C.F.R. § 1614.404(c). OFO will aggressively utilize sanctions if parties fail, without good cause shown, to comply with the appellate procedures or to respond fully and timely to information requests.¹¹ Sanctions may be used to effectuate the policies of the Commission by both deterring the non-complying party from similar conduct in the future and by providing an equitable remedy to the opposing party.

Before OFO issues sanctions on either party to an appeal, it will provide the party with a notice to show cause why the sanctions identified in the notice should not be imposed. The notice to show cause will identify the specific conduct that is the

¹⁰ See for example, [Smith v. Dep't. of Transportation \(Federal Aviation Administration\)](#), EEOC DOC 0320080085, (Mar. 21, 2012) (finding that because the agency failed to comply with OFO's explicit order to produce comparative evidence, the agency was subject to sanctions for its noncompliance, including the drawing of an adverse inference that the requested comparative evidence would have reflected unfavorably on the agency).

¹¹ The Commission has exercised its inherent authority to enforce its Part 1614 regulations by ordering sanctions in response to various violations. See for example, [Vu v. Social Security Administration](#), EEOC Appeal No. 0120072632 (Jan. 20, 2011)(finding that the agency was subject to sanctions for its failure to submit the complete complaint file); [DaCosta v. Dep't. of Education](#), EEOC Appeal No. 01995992 (Feb. 25, 2000)(Commission issued sanction against agency for failure to complete timely investigation).

August, 2015EEO MD-110

basis for the finding of noncompliance and will describe the proposed sanction(s) to be imposed. The notice to show cause will further provide the non-complying party with an opportunity to cure its noncompliance within a reasonable period of time, to be noted in the order. If the party fails to cure its noncompliance or to otherwise show good cause why sanctions should not be imposed, OFO shall impose the sanctions identified in its notice.¹²

D. Appeals Decisions Are Final

An appellate decision issued under 29 C.F.R. § 1614.405(a) is final pursuant to 29 C.F.R. § 1614.407 unless a timely request for reconsideration is filed by a party to the case. A party may request reconsideration **within thirty (30) days** of receipt of a decision of the Commission, which the Commission in its discretion may grant, if the party demonstrates that 1) the appellate decision involved a clearly erroneous interpretation of material fact or law, or 2) the decision will have a substantial impact on the policies, practices, or operations of the agency. See 29 C.F.R. § 1614.405(c); Section VII of this Chapter.

¹² Sanctions usually will be contained in the decision of the Commission on appeal. If the sanction is contained in a separate order and not the decision on the appeal, the sanction is not immediately reviewable. Once OFO issues a decision on an appeal, the sanctioned party may request reconsideration pursuant to 29 C.F.R. § 1614.405(c). If the sanction is issued while a matter is pending review under 29 C.F.R. § 1614.405(c) or is contained in a 29 C.F.R. § 1614.405(c) decision, there is no administrative review available.

VI. STANDARDS OF REVIEW ON APPEAL

Generally, standards of review delineate the nature of the inquiry on appeal by establishing the extent to which the reviewing body will substitute its own judgment for that of the prior decision-maker. The Commission has essentially employed a de novo standard of review in issuing appeals decisions since it took over the federal sector EEO function from the Civil Service Commission pursuant to Reorganization Plan No. 1 of 1978.

The decision on an appeal from an agency's dismissal or final action shall be based on a de novo review, except that the review of the factual findings in a decision by an Administrative Judge issued pursuant to 29 C.F.R. § 1614.109(i) and 29 C.F.R. § 1614.204(i) shall be based on a substantial evidence standard of review. This Section of the Management Directive will ensure a degree of uniformity and predictability in assessing case development and in processing appeals.

A. Review of Final Decisions Issued by the Agency

Appeals of final decisions or actions issued by agencies, duly filed pursuant to 29 C.F.R. § 1614.401(a), (d), or (e) will be considered by the Commission in the following manner:

1. Agency dismissals pursuant to 29 C.F.R. § 1614.107 and final decisions on the merits of individual complaints pursuant to 29 C.F.R. § 1614.110(b) shall be reviewed de novo.
2. The de novo standard requires that the Commission examine the record without regard to the factual and legal determinations of the previous decision maker. On appeal the Commission will review the documents, statements, and testimony of record, including any timely and relevant submissions of the parties, and the Commission will issue its decision based on the Commission's own assessment of the record and its interpretation of the law.
3. As a general rule, no new evidence will be considered on appeal unless there is an affirmative showing that the evidence was not reasonably available prior to or during the investigation or during the hearing process. The Commission may request supplementation of the record. See 29 C.F.R. § 1614.404(b).
4. Following de novo review, the Commission will issue decisions on the appeals of decisions issued pursuant to 29 C.F.R. § 1614.110(b) based on a preponderance of the evidence.

August, 2015EEO MD-110

5. Where appropriate, and after the requisite analysis, the Commission may adopt the findings and conclusions of the final decision issued by the agency. Such an adoption does not short-cut the review process, but merely serves to expedite communication of the result of the review.

B. Review of Decisions Issued by Administrative Judges

The Commission shall consider an appeal by either an agency or a complainant following a final action based on a decision from an Administrative Judge issued pursuant to 29 C.F.R. § 1614.109(g) (summary judgment decisions), 29 C.F.R. § 1614.109(i) (decisions on individual complaints), and 29 C.F.R. §§ 1614.204(d) and (i) (decisions on class complaints), duly filed pursuant to 29 C.F.R. § 1614.401 et seq., in the following manner:

1. The review of the post-hearing factual findings in an Administrative Judge's decision shall be based on a substantial evidence standard of review. In [Universal Camera Corp. v. National Labor Relations Board](#), 340 U.S. 474, 477 (1951), the Supreme Court noted that substantial evidence "is more than a mere scintilla. It means such relevant evidence as a reasonable mind might accept as adequate to support a conclusion. . . . It 'must do more than create a suspicion of the existence of the fact to be established. [I]t must be enough to justify, if the trial were to a jury, a refusal to direct a verdict when the conclusion sought to be drawn from it is one of fact for the jury.'" [Citations omitted.]
2. Applying the substantial evidence review standard, the Commission will give deference to an Administrative Judge's post-hearing factual findings based on evidence in the record. Factual determinations will be distinguished from legal determinations, and the Administrative Judge's factual determinations will be given deference. For example, a credibility determination of an Administrative Judge based on the demeanor or tone of voice of a witness will be accepted unless documents or other objective evidence so contradicts the testimony of the witness or the testimony of the witness otherwise so lacks in credibility that a reasonable fact finder would not credit it.
3. A finding of discriminatory intent will be treated as a factual finding subject to the substantial evidence review standard. See [Pullman-Standard Co. v. Swint](#), 456 U.S. 273, 293 (1982).

4. Legal determinations will be reviewed de novo on appeal.
 - a. Legal determinations in decisions, whether made by an Administrative Judge or by the agency, will be reviewed using a de novo standard. There will be no presumption that the previous decision-maker was correct in his/her interpretation or application of the law.
 - b. An Administrative Judge's decision to issue a decision without a hearing pursuant to 29 C.F.R. § 1614.109(g) will be reviewed de novo. The substantial evidence standard of review will apply only to decisions rendered following a hearing and will not apply to decisions issued on summary judgment or to decisions issued without a hearing with the consent of the parties.
5. As a general rule, no new evidence will be considered on appeal unless there is an affirmative showing that the evidence was not reasonably available prior to or during the hearing. The Commission may request supplementation of the record. See 29 C.F.R. § 1614.404(b).

C. The Responsibility of the Parties

1. On appeal, the burden is squarely on the party challenging the Administrative Judge's decision to demonstrate that the Administrative Judge's factual determinations are not supported by substantial evidence. This burden does not exist in a de novo review. The appeals statements of the parties, both supporting and opposing the Administrative Judge's decision, are vital in focusing the inquiry on appeal so that it can be determined whether the Administrative Judge's factual determinations are supported by substantial evidence.
2. In an appropriate case, and in instances where a party fails to submit a statement or brief in support of his/her appeal, the Commission may issue a summary decision.

VII. RECONSIDERATION

A. Reconsideration Is Not an Appeal

A request for reconsideration is not a second appeal to the Commission. A party may request reconsideration within **thirty (30) days** of receipt of a Commission decision. The Commission, in its discretion, may grant the request if the party demonstrates that:

August, 2015EEO MD-110

1. The appellate decision involved a clearly erroneous interpretation of material fact or law; or
2. The decision will have a substantial impact on the policies, practices, or operations of the agency. 29 C.F.R. §§ 1614.405(c)(1) & (2).

The Commission reserves the right to reopen any decision on its own motion. See Parnell v. Dep't. of Veterans' Affairs, EEOC Request No. 0520100031 (Dec. 7, 2009).

B. Reconsideration Procedures

1. Requests for reconsideration and any supporting statement or brief must be filed with the Office of Federal Operations (OFO) **within thirty (30) days** of receipt of a decision of the Commission and a statement or brief in opposition to a request for reconsideration must be filed **within twenty (20) days** of receipt of another party's timely request for reconsideration. OFO will accept statements or briefs in support of the request from complainants by fax transmittal, provided they are no more than ten (10) pages long. Agency briefs must be submitted in an approved digital format. The request must also include proof of service on the opposing party.
2. The requesting party must submit any supporting documents or brief at the time the request is filed. The burden is on the requesting party to make a substantial showing that its request meets one of the two prerequisites for a granting of reconsideration.
3. The opposing party shall have **20 days** from receipt of another party's timely request for reconsideration in which to submit any brief or statement in opposition. Such brief or statement must be served on the requesting party and proof of service must be included with the submission to OFO. OFO will accept briefs or statements in opposition to the request from complainants by fax transmittal, provided they are no more than 10 pages long. Agency briefs must be submitted in an approved digital format.
4. Failure to provide a proof of service or to submit comments within the prescribed time frame will result in the denial of the request, or the option not to consider the party's untimely statement or brief.

C. Reconsideration Decision Is Final

The Commission's decision on a request for reconsideration is final, and there is no further right by either party to request reconsideration. If the decision remands the complaint for further agency consideration, the parties retain the rights of appeal and reconsideration with respect to any subsequent decision.

VIII. REMEDIES**A. An Agency Shall Provide Full Relief after a Finding of Discrimination**

When the agency or the Commission finds that the agency has discriminated against an applicant or employee, the agency shall provide an appropriate remedy as explained in 29 C.F.R. Part 1614, subpart E.

B. Clear and Convincing Standard Needed to Limit Relief; Duty to Cure Discrimination Remains

1. When an Administrative Judge, agency, or the Commission finds that discrimination existed, but also finds by clear and convincing evidence that the agency would have made the same employment decision even absent the discrimination, the agency shall nevertheless take all steps necessary to eliminate the discriminatory practice and ensure that it does not recur.
2. Back pay, computed in the manner prescribed by 5 C.F.R. § 550.805, shall be awarded from the date the individual would have entered on duty, assumed the duties of the position at issue, or not been removed from the position unless clear and convincing evidence indicates that the applicant or employee would not have been selected for, placed into, or removed from the position even absent discrimination. The complainant has the obligation to mitigate damages.

C. Relief in Individual Cases

A discussion of the relief available in individual cases is set forth in Chapter 11 of this Management Directive.

August, 2015**EEO MD-110****D. Relief in Class Cases**

A discussion of the relief available in class cases is set forth in Chapter 8, Section XI, of this Management Directive.

IX. COMPLIANCE**A. Relief Ordered in a Decision on Appeal**

1. Compliance with Orders of the Equal Employment Opportunity Commission in final federal appeals decisions is mandatory. Section 717(b) of Title VII, 42 U.S.C. § 2000e-16(b) provides that the Commission shall have authority to enforce prohibitions against discrimination in the federal government “through appropriate remedies, including reinstatement or hiring of employees with or without back pay as will effectuate the policies of this section and shall issue rules, regulations, orders and instructions as it deems necessary and appropriate to carry out its responsibilities.”
2. The ordered relief shall be provided in full not later than one hundred twenty (120) days after receipt of the final decision unless otherwise ordered in the decision. A decision is considered final when it is issued. The 120-day period includes the 30-day period in which the complainant can file a request for reconsideration, as well as the 90-day period in which the complainant can file a civil action.
3. A complainant may petition OFO to seek enforcement of a Commission Order. 29 C.F.R. § 1614.503(a). The petition shall be submitted to OFO and shall set forth the basis for the complainant's assertion that the agency is not complying with the decision. If a petition is docketed acknowledgment letters will be sent to both parties identifying the new docket number and advising them of the right to submit a brief or to comment on the issue(s) in dispute.
4. Where the Director of OFO is unable to obtain satisfactory compliance with the final decision, the Director shall submit appropriate findings and recommendations for enforcement to the Commission pursuant to 29 C.F.R. § 1614.503(d). Among other things, the Commission may certify the matter to the Office of Special Counsel pursuant to a memorandum of understanding. See 29 C.F.R. § 1614.503(f) or issue a notice to show cause for noncompliance to the head of an agency that has failed to comply with a Commission order pursuant to 29 C.F.R. § 1614.503(e).

5. Where the Commission has determined that an agency is not complying with a prior decision and wishes to complete administrative efforts, the Commission shall notify the complainant of his/her right to seek judicial review of the agency's refusal to order the relief or commence a de novo proceeding. See 29 C.F.R. § 1614.503(g).

B. Interim Relief

1. Interim relief where the agency files a request for reconsideration of a decision regarding removal, separation, or suspension continuing beyond the date of the request for reconsideration:
 - a. When the agency requests reconsideration and the case involves removal, separation, or suspension continuing beyond the date of the request for reconsideration, and when the decision orders retroactive restoration, the agency shall comply with the decision to the extent of the temporary or conditional restoration of the employee to duty status in the position specified by the Commission, pending the outcome of the agency's request for reconsideration. 29 C.F.R. § 1614.502(b).
 - b. The agency must notify the complainant that his/her restoration is temporary or conditional at the same time it seeks reconsideration. Failure of the agency to provide notification will result in the dismissal of the agency's request. 29 C.F.R. § 1614.502(b)(3).
 - c. When the agency seeks reconsideration of a decision that included an award of payments of amounts owed, the agency may delay such payment provided it advises the complainant of its delay and further informs the complainant that it will pay interest on any award ultimately determined to be owed to the complainant. 29 C.F.R. § 1614.502(b)(2).
2. Interim relief where an agency appeals from a decision of an Administrative Judge in a case involving separation, or suspension continuing beyond the date of the appeal, and when the Administrative Judge's decision orders retroactive restoration:
 - a. The agency shall comply with the decision to the extent of the temporary or conditional restoration of the employee to duty status in the position specified in the decision, pending the outcome of the agency appeal. The employee may decline the offer of interim relief. 29 C.F.R. § 1614.505(a)(1).

August, 2015**EEO MD-110**

- b. An agency may decline to return a complainant to his/her place of employment if it determines that the return or presence of the complainant will be unduly disruptive to the work environment. However, the agency must provide prospective pay and benefits. 29 C.F.R. § 1614.505(a)(5).
- c. An agency also may delay the payment of other amounts, exclusive of pay and benefits, when it files an appeal of an Administrative Judge's decision. If an agency declines to make such payments, it will be required to pay interest on these amounts from the date of the decision until payment is made if the outcome of the appeal requires the agency to make the payment. 29 C.F.R. § 1614.505(a)(3).
- d. An agency must inform the Commission and the complainant in writing that it will delay making required payments at the same time that it files its appeal that it will delay making the payments of any amounts owed pending resolution of the appeal. See 29 C.F.R. § 1614.505(a)(4). If an agency fails to inform either the complainant or the Commission and fails further to make the payments required by the decision being appealed, the Commission will dismiss the appeal. The complainant must file a request for dismissal with the Commission within twenty-five (25) days of the date of service of the agency's appeal and provide the agency with a copy of the request. The agency will have fifteen (15) days from receipt of the complainant's request to file a response. 29 C.F.R. § 1614.505(b).

C. Sanctions

- 1. There is no legitimate basis for delay in complying with a Commission order, particularly in those cases where the Commission has ordered relief after a finding of discrimination.
- 2. OFO will aggressively utilize sanctions if the agency fails to implement the relief ordered.
- 3. OFO may recommend that the Commission take enforcement action where an agency does not comply with a Commission order, or, as directed by the Commission, refer the matter to another appropriate agency. See 29 C.F.R. § 1614.503(d). The Commission may issue a show cause notice to the head of the federal agency that is in noncompliance or refer the matter to the Office of Special Counsel for enforcement action. See 29 C.F.R. §§ 1614.503(e) and (f).

4. OFO may issue a notice to the complainant that the administrative process for securing compliance has been exhausted. See 29 C.F.R. § 1614.503(g). Such a notice will inform the complainant of the right to file a civil action for enforcement of the Commission decision and to seek judicial review of the agency's refusal to implement the relief ordered by the Commission, or of the right to commence proceedings pursuant to the appropriate statute.
5. An OFO notice to the complainant advising that the administrative process for securing compliance has been exhausted may be issued after the Commission determines an agency is not complying with a prior decision, when an agency fails or refuses to submit a report of compliance required by the Commission, or upon receipt of a request from the complainant. In determining whether to issue such a notice, OFO will consider such factors as whether the agency is making reasonable efforts to comply with the Commission order or, if the notice is requested by the complainant, whether the complainant has legal representation to secure enforcement in court. After issuing such a notice, the Commission ordinarily will terminate its administrative processing of the complaint. Processing will continue, however, if the Director of OFO determines that continued processing would effectuate the purposes of the laws enforced by the Commission.

D. Priority Consideration for Cases Remanded for Investigation

Agencies should give priority to cases remanded for an investigation if this is necessary to comply with the time frames contained in a Commission order. OFO will issue sanctions against agencies when it determines that agencies are not making reasonable efforts to comply with a Commission order to investigate a complaint.

E. Remand of Dismissed Claims

Where a complainant's appeal includes a dismissed claim that the Administrative Judge has affirmed but that OFO reverses either on appeal or on reconsideration, OFO shall remand the dismissed claim to the Administrative Judge for further processing in accordance with 29 C.F.R. § 1614.109. Where a complainant appeals from an agency final decision that includes a dismissed claim that OFO reverses, OFO shall remand the dismissed claim to the agency and include an order directing the agency to process the matter in accordance with 29 C.F.R. § 1614.108, except that OFO may order the completion of the investigation within a time period shorter than 180 days.

August, 2015**EEO MD-110****F. Complainant May File an Appeal Alleging a Breach of a Settlement Agreement**

Where a complainant files an appeal alleging a breach of a settlement agreement and the Commission determines that the agreement was breached, the complainant may request enforcement of the settlement agreement or may request reinstatement of the underlying complaint at the point at which the processing of the complaint was stopped. See Chapter 10, Section II (A)(3) for more information about settlement agreement appeals. Where a complaint is reinstated for further processing, both the agency and the complainant would be returned to the status quo ante at the time that the parties entered into the settlement agreement, which would require the complainant to return any benefits received pursuant to the agreement. See [Christensen v. Dep't. of Homeland Security](#), EEOC Appeal No. 0120081918 (September 17, 2008) (citing [Armour v. Dep't. of Defense](#), EEOC Appeal No. 01965593 (June 24, 1997)).

G. Complainant May Appeal to the Commission for Enforcement of an Agency Final Action

A complainant may file an appeal with the Commission for enforcement of an agency's final action through which the agency has accepted the decision of an Administrative Judge. 29 C.F.R. §§ 1614.504(a) - (c). The complainant first must notify the agency's EEO Director of the agency's alleged noncompliance with the final action within thirty (30) days of when the complainant knew or should have become aware of the agency's noncompliance. If the agency has not responded to the complainant's notice within thirty-five (35) days, the complainant may file an appeal with the Commission. If the agency has responded to the complainant's notice before the complainant files an appeal with the Commission, the complainant must file an appeal within 30 days of his/her receipt of the agency's response.

H. Compliance Reports Required by Commission Appellate Decisions Containing Orders for Corrective Action

The implementation paragraph found in Commission appellate decision orders provides that a compliance report shall be submitted within thirty (30) calendar days of the completion of all ordered corrective action.

The compliance report must contain 1) supporting documentation for all ordered corrective action, and 2) evidence that copies of all submissions in support of compliance were sent to the complainant. See Appendix Q for a Quick Reference Chart describing the documentation required to satisfy compliance with the most common orders found in the Commission appellate decisions.

Compliance reports, like all other agency submissions on appeal, must be submitted in a digital format acceptable to the Commission (see Appendix L) unless an agency has shown good cause why they are unable to submit in a digital format. Submissions may be made using the Commission's electronic submission portal, or by copying the digital file onto a CD and submitted to:

(The designated Compliance Officer)
Office of Federal Operations
Equal Employment Opportunity Commission
Post Office Box 77960
Washington, DC 20013

All submissions must reference the compliance docket number assigned to the compliance action.

X. CIVIL ACTIONS

Filing a civil action terminates Commission processing of an appeal. See 29 C.F.R. § 1614.409.

XI. NOTICE REQUIREMENTS

Agencies are required to notify complainants of their rights to appeal to the Commission and to file a civil action within the specified limitations periods. Agencies must also notify complainants of their statutory right to request court appointment of counsel for representation in connection with the filing of civil actions, which arise from Title VII, GINA, and the Rehabilitation Act. See [Hilliard v. Volcker](#), 659 F.2d 1125 (D.C. Cir. 1981). Therefore, agencies subject to 29 C.F.R. Part 1614 are required to include the appropriate language in every decision on complaints which allege discrimination. Sample language is provided in Chapter 10, Section IV of this Management Directive.

August, 2015**EEO MD-110**

CHAPTER 10 ADMINISTRATIVE APPEALS, CIVIL ACTIONS, AND APPOINTMENT OF COUNSEL

I. INTRODUCTION

Aggrieved persons must be made aware of administrative and civil action time limitations which potentially may bar an aggrieved person's ability to file appeals and civil actions. All time periods set out in this Management Directive are stated in calendar days unless otherwise indicated. The first day counted is the day after the event from which the time period begins to run and the last day of the period shall be included unless it falls on a Saturday or Sunday or federal holiday, in which case the period shall be extended to include the next business day. All time periods are subject to waiver, estoppel and equitable tolling.

All parties should be aware that attorney's fees may be awarded at the administrative level and beyond under Title VII of the Civil Rights Act of 1964 (see 42 U.S.C. § 2000e-16), Title II of the Genetic Information Nondiscrimination Act of 2008, (42 U.S.C. § 2000ff), and the Rehabilitation Act of 1973, (see 29 U.S.C. § 791), but that attorney's fees are not available at the administrative level under the Age Discrimination in Employment Act, (29 U.S.C. § 633a) or the Equal Pay Act, (29 U.S.C. § 206(d)).

Finally, the agency must advise complainants that they can request that a U.S. District Court appoint counsel for them after they file suit in that court.

II. ADMINISTRATIVE APPEALS

A. Time Limits for Appeals to the Commission - 29 C.F.R. § 1614.402

The following time limits apply for filing an appeal to the Commission:

1. Appeals limits for complainant's appeal of an agency's final action on or dismissal of individual complaints of discrimination: Within thirty (30) days of receipt of the dismissal or final action. See 29 C.F.R. § 1614.401(a).
2. Appeals limits for decisions on class complaints of discrimination under 29 C.F.R. § 1614.402(a):
 - a. a class agent or an agency may appeal an Administrative Judge's decision accepting or dismissing all or part of a class complaint; a class agent may appeal a final action on a class complaint; a class

member may appeal a final action on a claim for individual relief under a class complaint; and

- b. a class member, a class agent, or an agency may appeal a final decision on a petition pursuant to 29 C.F.R. § 1614.204(g)(4). See 29 C.F.R. § 1614.401(c). Appeals filed by class agents or class members described in 29 C.F.R. § 1614.401(c) must be filed within thirty (30) days of receipt of the final action or final decision on a petition pursuant to 29 C.F.R. § 1614.204(g)(4). Appeals filed by agencies on an Administrative Judge's decision accepting or dismissing all or part of a class complaint must be filed within (30) days of receipt of the hearing file and decision. Appeals filed by agencies on an Administrative Judge's decision on the merits of a class complaint must be filed within sixty (60) days of receipt of the hearing file and decision.
3. Appeals limits for allegations of noncompliance with a settlement agreement or an Administrative Judge's decision that has not been appealed to the Commission or been the subject of a civil action under 29 C.F.R. § 1614.504:
 - a. Within thirty (30) days of the complainant's receipt of an agency's determination on an allegation of noncompliance.
 - b. Thirty-five (35) days after the complainant serves the agency with an allegation of noncompliance, if the agency has not issued a determination.

Notice to the EEO Director of noncompliance is a prerequisite to the filing of an appeal alleging breach of a settlement agreement.¹

4. Appeals limits on final grievance decisions in employment discrimination claims where 5 U.S.C. § 7121(d) applies to the agency: Within 30 days of receipt of the final decision of an agency, an arbitrator, or the Federal Labor Relations Authority when employment discrimination was raised.

¹ As a prerequisite to the agency determination, 29 C.F.R. § 1614.504(a) provides :

If the complainant believes that the agency has failed to comply with the terms of a settlement agreement or final decision, the complainant shall notify the EEO Director, in writing, of the alleged noncompliance within 30 days of when the complainant knew or should have known of the alleged noncompliance.

August, 2015EEO MD-110

5. Limits on petitions for consideration of final decisions of the MSPB on mixed case appeals and mixed case complaints (5 C.F.R. § 1201.151 et seq. and 5 U.S.C. § 7702):²
 - a. Within 30 days of receipt of the final MSPB decision.
 - b. Within 30 days after the decision of a MSPB field office becomes final.
6. Appeals limits for an agency's appeal if the agency's final order following a decision by an Administrative Judge does not fully implement the decision of the Administrative Judge:
 - a. Within forty (40) days of receipt of the Administrative Judge's decision.
 - b. Under 29 C.F.R. § 1614.401(b), an agency is required to file an appeal to the Commission if the agency's final order does not fully implement the decision of the Administrative Judge. The Commission's use of the word "may" in 29 C.F.R. § 1614.401(b) is not inconsistent with this requirement. The agency has the option to appeal if it is not satisfied with the Administrative Judge's decision. If the agency chooses not to appeal, however, it must fully implement the Administrative Judge's decision. In other words, when the agency decides whether it will fully implement the Administrative Judges' decision, it is also deciding whether to appeal; a decision to fully implement means that it is not appealing while a decision not to fully implement means that it is appealing.

B. Appeals to the Commission Regarding Compliance with Settlement Agreements and Final Action - 29 C.F.R. § 1614.504(a)

In addition to providing for appeals to the Commission by complainants alleging breach of a settlement agreement, 29 C.F.R. § 1614.504(a) provides that a complainant may file an appeal alleging agency noncompliance with a final action through which the agency has accepted the decision of an Administrative Judge. The complainant first must present his/her allegations of noncompliance to the EEO Director. The complainant thereafter may appeal:

² The Commission will only accept petitions for review of final MSPB decisions.

1. Within thirty (30) days of the complainant's receipt of an agency's determination on the allegation of noncompliance; or
2. Thirty-five (35) days after the complainant serves the agency with the allegation of noncompliance, if the agency has not issued a determination.

C. Petitions to Consider MSPB Decisions

A petition to the Commission to consider a final MSPB decision on a mixed case appeal or on the appeal of a final decision on a mixed case complaint, under 29 C.F.R. § 1614.303 and 29 C.F.R. § 1614.304, must be in writing and must include:

1. The name and address of the petitioner and of petitioner's representative (if any);
2. A statement of the reasons why the decision of the MSPB is alleged to be incorrect, only with regard to the issues of discrimination based on race, color, religion, sex, national origin, age, disability or genetic information;
3. A copy of the decision issued by the MSPB; and
4. The signature of the petitioner or representative, if any. See Chapter IX Section IV.H of this management directive for information on electronic signatures.

D. Appeal to MSPB on Mixed Case Complaint

At the time the agency issues its final decision on a mixed case complaint the agency shall advise the complainant of the right to appeal the decision to the MSPB (not the Commission) within thirty (30) days of receipt of the agency's final decision provided at 29 C.F.R. § 1614.302(d)(3).

III. CIVIL ACTIONS

A. Time Limits for Civil Actions

1. Title VII, Age Discrimination in Employment Act, the Genetic Information Nondiscrimination Act, Rehabilitation Act - 29 C.F.R. § 1614.407.

August, 2015**EEO MD-110**

A complainant who has filed a non-mixed individual complaint, an agent who has filed a class complaint, or a claimant who has filed a claim for individual relief in a class action complaint may file a civil action in an appropriate U.S. District Court:

- a. Within ninety (90) days of receipt of an agency's final action on an individual complaint, or final decision on a class complaint, if no appeal has been filed.
- b. After 180 days from the date of filing an individual or class complaint if no appeal has been filed and no final action on an individual complaint or no final decision on a class complaint has been issued.
- c. Within 90 days after receipt of the Commission's final decision on appeal.
- d. After 180 days from the date of filing an appeal with the Commission if there has been no final decision by the Commission.

2. The Equal Pay Act - 29 C.F.R. § 1614.408

Regardless of whether the individual complainant pursued any administrative complaint processing, a complainant may file a civil action in a court of competent jurisdiction within two years or, if the violation is willful, within three years of the date of the alleged violation of the Equal Pay Act. Recovery of back wages is limited to two years prior to the date of filing suit, or to three years if the violation is willful; liquidated damages in an amount equal to lost back wages may also be awarded. The filing of an administrative complaint does not toll the time for filing a civil action.

B. Termination of the Commission Processing

Filing a timely civil action under any of these statutes terminates Commission processing of an appeal. See 29 C.F.R. § 1614.409. If a civil action is filed after an appeal has also been filed, the parties are requested to notify the Commission of this event in writing.

C. Mixed Case Complaints

The Civil Rights Act of 1991 did not extend the time limit for filing a civil action in mixed case complaints. See 29 C.F.R. § 1614.310, which sets forth the statutory rights to file a civil action in mixed case complaints.

IV. NOTICE OF COMPLAINANT'S RIGHT TO REQUEST COURT APPOINTMENT OF COUNSEL AND STATEMENT OF RIGHT TO APPEAL

Consistent with the court's holding in [Hilliard v. Volcker](#), 659 F.2d 1125 (D.C. Cir. 1981), it is the Commission's policy to require all federal agencies subject to the Management Directive to inform complainants, in writing, of their statutory right to request court appointment of counsel for representation in connection with the filing of civil actions that arise under Title VII, the Genetic Information Nondiscrimination Act, and the Rehabilitation Act.

In [Hilliard](#), the court held that agencies must inform complainants unsuccessful in the administrative process that, in the event they file a civil action, the court has discretionary authority to appoint counsel for them. A litigant who fails to request counsel should not be penalized because an agency has been remiss in its duty to inform the complainant of the court's authority.

Therefore, all federal agencies subject to 29 C.F.R. Part 1614 **must** include the following language in **every** final action or final decision on complaints which allege discrimination of race, color, religion, sex, national origin, age, disability, genetic information, and/or retaliation:

Within 30 days of your receipt of the final action or final decision (as appropriate), you have the right to appeal this final action or final decision to:

Equal Employment Opportunity Commission
Office of Federal Operations
P.O. Box 77960
Washington, DC 20013

You also have the right to file a civil action in an appropriate U.S. District Court. If you choose to file a civil action, you may do so

- within 90 days of receipt of this final action or final decision (as appropriate) if no appeal has been filed, or

August, 2015EEO MD-110

- within 90 days after receipt of the EEOC's final decision on appeal, or
- after 180 days from the date of filing an appeal with the Commission if there has been no final decision by the Commission.

You must name the person who is the official agency head or department head as the defendant. Agency or department means the national organization, and not just the local office, facility, or department in which you might work. Do not name just the agency or department. In your case, you must name _____ as the defendant. [The Administrative Judge or agency must supply the name of the proper person.] You must also state the official title of the agency head or department head. Failure to provide the name or official title of the agency head or department head may result in dismissal of your case.

If you decide to file a civil action, under Title VII or under the Rehabilitation Act, and if you do not have or cannot afford the services of an attorney, you may request that the Court appoint an attorney to represent you and that the Court permit you to file the action without payment of fees, costs, or other security. **The grant or denial of the request is within the sole discretion of the Court.** Filing a request for an attorney does not extend your time in which to file a civil action. Both the request and the civil action MUST BE FILED WITHIN NINETY (90) CALENDAR DAYS of the date you receive the final action or final decision (as appropriate) from the agency or the Commission.

CHAPTER 11 REMEDIES

I. INTRODUCTION

In federal EEO law, there is a strong presumption that a complainant who prevails in whole or in part on a claim of discrimination is entitled to full relief which places him/her in the position s/he would have been in absent the agency's discriminatory conduct. See [Albermarle Paper Co. v. Moody](#), 422 U.S. 405, 418-419 (1975).

This Chapter of the Management Directive sets forth guidance for use by agencies and persons seeking remedial relief in a variety of areas, including: back pay, front pay, attorney's fees and costs, awards of compensatory damages, and other forms of equitable relief. This guidance applies only to the federal sector administrative process.

II. NON-DISCRIMINATORY PLACEMENT

When an agency or the Commission finds that an employee of the agency was discriminated against, the agency shall provide the individual with non-discriminatory placement into the position s/he would have occupied absent the discrimination. For cases in which the employee is not selected for a position or promotion due to discrimination, this would include an offer of placement into the position sought, or a substantially equivalent position. See [Carson v. Dep't. of Justice](#), EEOC Appeal No. 0120100078 (Feb. 16, 2012).

The offer should be made retroactive to the date of the selection in question. The individual should receive all step or pay increases and monetary benefits associated with the position. See [Stewart v. Dep't. of Homeland Security](#), EEOC Request No. 0520070124 (Nov. 14, 2011). A "substantially equivalent position" is a position within the same commuting area. [Bakken v. Dep't. of Transportation](#), EEOC Appeal No. 0120093529 (Aug. 8, 2011).

When the relief ordered includes the offer of a position or a promotion, the offer shall be made to the complainant in writing, providing the complainant fifteen (15) days from receipt of the offer to notify the agency of the acceptance or rejection. Failure to respond within the 15-day time limit shall be construed as a declination. Any back pay liability shall cease to accrue with either the actual placement of the complainant into the position in question, or with the date the offer was declined.

In cases involving a discriminatory termination, the agency should offer to reinstate the complainant to his/her former position retroactive to the date of the termination. See [Oni v. Dep't. of the Treasury](#), EEOC Appeal No. 0720100015 (Oct. 11, 2011). The complainant should also receive all applicable benefits and step or pay increases.

In some cases, there is evidence that discrimination was one of multiple motivating factors for an employment action. In these “mixed motive” cases, the agency does not have to offer complainant the position sought if it can demonstrate by clear and convincing evidence that it would have taken the same action even absent the discrimination. See [Montante v. Dep’t. of Transportation](#), EEOC Appeal No. 0120110240 (Nov. 9, 2011), [request for reconsideration denied](#), EEOC Request No. 0520120259 (June 8, 2012). If the agency is able to make this demonstration, the complainant is not entitled to personal relief such as reinstatement, hiring, or promotion. The complainant may still be entitled to declaratory relief, injunctive relief, and/or attorneys’ fees and costs. Id.

When an individual accepts an offer of employment as a remedy for discrimination, s/he shall be deemed to have performed service for the agency during the period he would have served but for the discrimination for all purposes except for meeting service requirements for completion of a required probationary or trial period.

III. BACK PAY

A. Back Pay Issues

When an agency or the Commission finds that an employee of the agency was discriminated against, the agency shall provide the individual with non-discriminatory placement into the position s/he would have occupied absent the discrimination, with back pay computed in the manner prescribed by 5 C.F.R. § 550.805. See 29 C.F.R. § 1614.501(c)(1). The purpose of a back pay award is to restore to the complainant the income he would have otherwise earned but for the discrimination. See [Albemarle Paper Co. v. Moody](#), 422 U.S. at 418-419 (1975); [Davis v. U.S. Postal Service](#), EEOC Petition No. 04900010 (Nov. 29, 1990). A number of discriminatory personnel actions can generate back pay. The most common actions generating back pay are: removals, suspensions, denials of promotions, and failure to hire.

Interest on back pay shall be included in the back pay computation. The back pay computation should also include any applicable step increases or pay differentials. See [Morrow v. U.S. Postal Service](#), EEOC Appeal No. 0720070058 (Nov. 13, 2009) (ordering the agency to provide complainant with a back pay award which included interest, overtime, and night pay differential). Under Title VII, GINA, and the Rehabilitation Act, back pay is limited to two years prior to the date the discrimination complaint was filed.

B. Determining Gross Back Pay

Back pay includes all forms of compensation and reflects fluctuations in working time, overtime rates, penalty overtime, Sunday premium and night work, changing rates of pay, transfers, promotions, and privileges of employment. The Commission also construes “benefits” broadly to include annual leave, sick leave, health insurance, and retirement contributions. [Vereb v. Dep’t. of Justice](#), EEOC Petition No. 04980008 (Feb. 26, 1999); [Holly v. U.S. Postal Service](#), EEOC Petition No. 04A50003 (Nov. 2, 2005).

[T]he Commission recognizes that precise measurement cannot always be used to remedy the wrong inflicted, and therefore, the computation of back pay awards inherently involves some speculation. [Hanns v. U.S. Postal Service](#), EEOC Petition No. 04960030 (September 18, 1997). The Commission has held that uncertainties involved in a back pay determination should be resolved against the agency that has already been found to have committed acts of discrimination. *Id.* See also [Davis v. U.S. Postal Service](#), EEOC Petition No. 04900010 (Nov. 29, 1990); and [Besemer v. U.S. Postal Service](#), EEOC Petition No. 04890005 (Dec. 14, 1989).

C. Overtime or Premium Pay as a Component of Back Pay

Back pay will be required to cover any overtime or premium pay that would have been worked absent discrimination. The parties often disagree over whether overtime would have been worked and to what extent overtime could have been earned. The overtime component of a back pay award should generally be calculated based upon the average amount of overtime worked by similarly situated employees. [Haines v. U.S. Postal Service](#), EEOC Petition No. 04A50018 (Nov. 23, 2005); [Holly v. U.S. Postal Service](#), EEOC Petition No. 04A50003 (Nov. 2, 2005). If the position is unique, such that a comparison with a similarly situated employee is not possible, the agency should calculate overtime based on the actual overtime worked by the person who was selected for the position. See, for example, [Bowman v. U.S. Postal Service](#), EEOC Appeal No. 0120112333 (Oct. 3, 2011), [request for reconsideration denied](#), EEOC Request No. [0520120091](#) (Mar. 16, 2012).

D. Retirement Deductions and Back Pay

The Commission has held that make whole relief requires the agency to make retroactive tax-deferred contributions to the complainant’s retirement account for the relevant period. To the extent complainant would have received agency contributions to a retirement fund as a component of her salary, she is entitled to have her retirement benefits adjusted as part of her back pay award, including sums which the account would have earned during the relevant period. The

agency should provide its calculations of the amount of contributions to the agency's retirement system that both it and complainant would have made during her absence, as well as the earnings which would have accrued. See [Kretschmar v. Dep't. of the Navy](#), EEOC Petition No. 04A40044 (Mar. 25, 2005).

E. Interim Earnings Deducted from Back Pay

If the complainant lost a job or did not receive a position due to discrimination, the complainant has the responsibility of mitigating the harm by looking for other work. [Ghannam v. Agency for International Development](#), EEOC Appeal No. 01990574 (June 22, 2004). Wages earned by the employee while separated from the agency are commonly called "interim wages." The agency should deduct the interim wages earned by the complainant from the amount of back pay owed to the complainant as provided for in Title VII. [42 U.S.C. § 2000e \(5\)\(g\)](#). If the agency believes that the complainant did not do enough to mitigate lost wages, it must prove so by a preponderance of the evidence. See [McNeil v. U.S. Postal Service](#), EEOC Request No. 05960436 (Dec. 9, 1999).

However, income that the complainant could have earned while still holding the position at the agency should not be subtracted or offset from back pay. "Moonlight" employment is employment that the employee could have engaged in even while federally employed. See 5 C.F.R. § 550.805(e)(1). See [Paulk v. U.S. Postal Service](#), EEOC Petition No. 04A10026 (Oct. 4, 2001) (Commission found that petitioner's overtime earnings were earned from his working 65-80 hours per week in a position he acquired during the period subsequent to his termination from the agency, and thus petitioner could not have held both the supplemental job and the job he lost because of discrimination, and therefore, the agency properly offset these earnings from complainant's back pay award).

F. Worker's Compensation Benefits May Be Partially Deductible from Back Pay

A Federal Employees' Compensation Act (FECA) award is meant to compensate for lost wages and/or reparation for physical injury. A claim of back pay against a Federal agency during the same time period covered by a FECA claim would have the potential for a double recovery of back pay. Any portion of a FECA award attributable to lost wages during the back pay period in a discrimination finding will be deducted from the back pay award. The portion of the FECA award that is paid as reparation for physical injuries is not related to wages earned and should not be deducted.

If the agency contends that receipt of workers' compensation would result in double recovery, the agency must determine what portion of the FECA benefits, if any, applied to back pay, leave and other benefits, and what portion of

complainant's FECA benefits applied to reparation for physical injuries. See Ulloa v. U.S. Postal Service, EEOC Petition No. 04A30025 (Aug. 3, 2004).

G. Availability for Work – Prerequisite for Receipt of Back Pay

The applicable regulations provide that the amount of back pay awarded shall be reduced by the amounts earnable with reasonable diligence by the person discriminated against. Thus, the complainant has a duty to mitigate or lessen damages by making a reasonable good faith effort to find other employment. This means that the complainant must seek a substantially equivalent position, that is, a position that affords virtually identical compensation, job responsibilities, working conditions, status, and promotional opportunities as the position he was discriminatorily denied. See Knott v. U.S. Postal Service, EEOC Appeal No. 0720100049 (July 5, 2010).

As a general rule, a complainant must be ready, willing, and able to work during the period of back pay recovery in order to receive back pay. The Commission has stated that if an agency can present persuasive evidence that complainant was not able to work during the back pay period, back pay would not be awarded; however, the agency has the burden of proof. Morman v. Dep't. of Defense (Defense Commissary Agency), EEOC Petition No. 04A10006 (July 31, 2002). The back pay regulation 5 C.F.R. § 550.805(c) provides that periods of unavailability may not be included in the back pay period unless such periods of time are the result of an illness or injury related to an unjustified or unwarranted personnel action. When a complainant receives workers' compensation due to an agency's failure to provide reasonable accommodation, this does not preclude a back pay award. The receipt of workers' compensation benefits does not indicate that a person was unable to work during the back pay period. See McClendon v. U.S. Postal Service, EEOC Petition No. 04960013 (May 22, 1997).

H. Unemployment Compensation Not Deducted from Back Pay – the Collateral Source Rule

Unemployment compensation is an interim source of income, but it is a collateral source in the sense that it comes from the state – not the federal employer. An employer cannot set off or mitigate its damages through a collateral source – in this case the state's payment of unemployment compensation even though the employer might have contributed to the source.

When a back payment is made where unemployment had been received, in theory the unemployment compensation represents an overpayment from the state and is due to the state. See Morra-Morrison v. U.S. Postal Service, EEOC Petition No. 04980023 (June 2, 1999). This process of recoupment is generally a matter between the complainant and the state.

I. Tax Consequences of a Lump Sum Payment of Back Pay

The Commission has recognized that an agency is liable for any increased tax liability resulting from receipt of a lump sum of back pay in a single tax year. When an individual receives back pay as a lump sum payment, s/he is entitled to a tax offset payment for the tax year in which she received the payment. Additionally, the individual will have the burden of establishing the amount of his/her increased federal income tax liability to the agency. See [Mohar v. U.S. Postal Service](#), EEOC Appeal No. 0720100019 (Aug. 29, 2011); [Teresita Lorenzo v. Dep't. of Defense Education Activity](#), EEOC Petition No. 01A61644 (September 29, 2005); [Warren Goetze v. Dep't. of the Navy](#), EEO Appeal No. 01991530 (Aug. 23, 2001).

J. Liquidated Damages (ADEA and EPA only)

Liquidated damages in Fair Labor Standards Act cases are generally monetary awards equal to, and in addition to, the back pay due to the complainant when a violation is found to be willful or in reckless disregard of the statutes.

In Equal Pay Act cases, willfulness is not a required factor for liquidated damages. Such damages are available for a violation of the EPA unless the agency can prove that it acted in “good faith” and reasonably believed that its actions did not violate the EPA. A finding of willfulness under the EPA, however, may extend the limitations period on back pay from two (2) years to three (3) years.

Since an EPA claim may also be brought as a sex-based wage discrimination claim under Title VII, compensatory damages may also be available if the claim is brought under both statutes.

While liquidated damages for willful violations of the ADEA are available in the private sector under 29 U.S.C. Sec. 626(b), they are not available under the federal sector provisions at Sec. 633a (b). See [Jacobson v. Shalala](#), EEO Request No. 05930689, (June 2, 1994); [Falks v. Rubin](#), EEOC Request No. 05960250, (September 6, 1996); [Amaro v. Potter](#), EEOC Appeal No. 0120020929, (May 29, 2003).

K. Restoration of Leave

Where there has been a finding of discrimination, the complainant is entitled to back pay for time lost from work during the applicable periods, as well as the restoration of any leave used because of the agency’s discriminatory actions. [Cox v. Social Security Administration](#), EEOC Appeal No. 0720050055 (Dec. 24, 2009). For example, the restoration of leave taken for purposes of avoiding or

recovering from a discriminatory hostile work environment is a valid component of equitable relief. See [Burton v. Dep't. of Justice](#), EEOC Appeal No. 0720090046 (June 9, 2011); see also [Lamb v. Social Security Administration](#), EEOC Appeal No. 0120103232 (Mar. 21, 2012) (leave restoration ordered where denial of reasonable accommodation resulted in leave usage); [Complainant v. Dep't. of Defense](#), EEOC Appeal No. 0120084008 (June 6, 2014) (leave restoration ordered where leave used in lieu of improperly denied official time).

IV. FRONT PAY

Front pay is an equitable remedy that compensates an individual when reinstatement is not possible in certain limited circumstances. The Commission has held that front pay may be awarded in lieu of reinstatement when: (1) no position is available; (2) a subsequent working relationship between the parties would be antagonistic; or (3) the employer has a record of long-term resistance to anti-discrimination efforts. [Brinkley v. U.S. Postal Service](#), EEOC Request No. 05980429 (Aug. 12, 1999). The fact that front pay is awarded in lieu of reinstatement implies that the complainant is able to work but cannot do so because of circumstances external to the complainant. See [Cook v. U.S. Postal Service](#), EEOC Appeal No. 01950027 (July 17, 1998).

The Commission has held that front pay is an equitable remedy to be awarded for a reasonable future period required for the victim of discrimination to reestablish his rightful place in the job market. See [Deidra Brown-Fleming v. Dep't. of Justice](#), EEOC Petition No. 0420080016 (Oct. 28, 2010).

V. OTHER FORMS OF EQUITABLE RELIEF

As appropriate, the agency shall also:

1. Cancel an unwarranted personnel action and restore the employee to the status s/he occupied prior to the discrimination;
2. Expunge any adverse materials relating to the discriminatory employment practice from the agency's records;¹ and

¹ See [Sipriano v. Dep't. of Homeland Security](#), EEOC Appeal No. 0120103167 (Jan. 20, 2011), request for reconsideration denied, EEOC Request No. [0520110313](#) (May 12, 2011) (ordering the agency to expunge all documentation relating to a discriminatory termination from complainant's records); [Farrington v. Dep't. of Homeland Security](#), EEOC Appeal No. 0720090011 (Jan. 19, 2011), request for reconsideration denied, EEOC Request No. [0520110295](#) (May 12, 2011) (ordering the agency to expunge evaluation reports and documents referencing a discriminatory investigation).

3. Provide the individual with a full opportunity to participate in the employee benefit that was denied - for example, training, preferential work assignments, or overtime scheduling.²

When the finding of discrimination involves a performance appraisal, the appropriate relief should include raising the rating to that which the individual would have received absent the discrimination. [McKenzie v. Dep't. of Justice](#), EEOC Appeal No. 0120100034 (July 7, 2011); [Hairston v. Dep't. of Education](#), EEOC Appeal No. 0120071308 (Apr. 15, 2010). In addition, the individual is entitled to all benefits and awards that s/he would have received if she had achieved the higher performance appraisal rating. [Cook v. Dep't. of Labor](#), EEOC Appeal No. 0720080045 (Feb. 22, 2010).

It is also appropriate to order training for agency personnel found to have engaged in discrimination, and to consider taking disciplinary action against those officials who engaged in the discrimination.³ See [James v. Dep't. of Agriculture](#), EEOC Appeal No. 0120073831 (September 22, 2009), request for reconsideration denied, EEOC Request No. [0520100086](#) (Mar. 22, 2010) (ordering the agency to provide the Selecting Official who discriminated against complainant 16 hours of EEO training and to consider taking disciplinary action against the official). The Commission does not consider training to be “discipline.” See [Morrow v. U.S. Postal Service](#), EEOC Appeal No. 0720070058 (Nov. 13, 2009).

For example, in [Burton v. Dep't. of Justice](#), EEOC Appeal No. 0720090046 (June 9, 2011), one of the responsible management officials found to have engaged in unlawful discrimination and retaliation was a high-level management official who set the leadership tone for the entire facility, and, thus, requiring five hours of EEO training for all facility management and supervisory staff was appropriate. See also [Kitson v. Dep't. of Justice](#), EEOC Appeal No. 0720100052 (Feb. 15, 2011), request for reconsideration denied, EEOC Request No. [0520110312](#) (June 10, 2011) (ordering the agency to provide training for upper-level employees at an agency facility following a finding of discriminatory non-selection); [Wagner v. Dep't. of Transportation](#), EEOC Appeal No. 0120103125 (Dec. 1, 2010) (ordering the agency to provide EEO training to all employees at an agency facility following a finding that agency managers and employees subjected complainant to a hostile work environment).

The Commission has also found that, in cases involving discriminatory policies or practices, the appropriate relief includes ordering the agency to “cease and desist” from adhering to that policy or practice. For example, in [Smith v. Dep't. of the Navy](#), EEOC

² See 29 C.F.R. § 1614.501(c).

³ In fact, the Commission strongly urges that agencies include consideration of disciplinary action in all agency orders on findings of intentional discrimination. In certain circumstances, training may be ordered for additional agency managers and staff.

Appeal No. 0120082983 (Feb. 16, 2010), request for reconsideration denied, EEOC Request No. [0520100287](#) (July 9, 2010), the Commission ordered the agency to cease and desist from requiring that all contact with EEO Counselors be arranged by management officials.

Following a finding of discrimination, the agency should take steps to ensure that the same type of action does not recur. In Cheeks v. Dep't. of the Army, EEOC Appeal No. 0120091345 (Feb. 1, 2012), the agency was found to have engaged in racial harassment. The agency was ordered to take all necessary steps to ensure that complainant had no contact with the supervisor responsible for the harassment, as well as to provide complainant with a designated management official to whom he could report any subsequent acts of harassment. See also Ighile v. Dep't. of Justice, EEOC Appeal No. 0720110010 (Apr. 13, 2012) (ordering the agency to cease and desist from all hostile conduct directed to complainant, and take appropriate action to ensure that his co-workers cease and desist from any hostile conduct).

VI. ATTORNEY'S FEES AND COSTS

A. Introduction

Attorney's fees and costs shall be awarded in accordance with 29 C.F.R. § 1614.501(e).

In federal EEO law, there is a strong presumption that a complainant who prevails in whole or in part on a claim of discrimination is entitled to an award of attorney's fees and costs. More specifically, complainants who prevail on claims alleging discrimination in violation of Title VII of the Civil Rights Act of 1964, as amended, and the Rehabilitation Act of 1973, as amended, are presumptively entitled to an award of attorney's fees and costs, unless special circumstances render such an award unjust. 29 C.F.R. § 1614.501(e)(1). (Complainants prevailing on claims under the Age Discrimination in Employment Act of 1967, as amended, and the Equal Pay Act of 1963, as amended, are not entitled to attorney's fees at the administrative level.) Only where a Title VII, GINA, or Rehabilitation Act complainant rejects an offer of resolution made in accordance with 29 C.F.R. § 1614.109(c) and does not obtain more relief than the agency had offered, or in the rarest of other circumstances, might an agency limit or deny an award of fees.

B. Determination of Prevailing Party Status

1. A "prevailing party," within the meaning of Section 706(k) of Title VII, 42 U.S.C. § 2000e-5(k), is a complainant who has succeeded on any significant issue that achieved some of the benefit the complainant sought in filing the complaint. Texas State Teachers Ass'n v. Garland I.S.D., 489

U.S. 782 (1989). The Commission has relied on a two-part test set forth in [Miller v. Staats](#), 706 F.2d 336 (D.C. Cir. 1983), for determining whether a complainant is a prevailing party. [Baldwin v. Dep't. of Health & Human Services](#), EEOC Request No. 05910016 (Apr. 12, 1991). To satisfy the first part of the test, the complainant must have substantially received the relief sought. *Id.* To satisfy the second part of the test, there must be a determination that the complaint was a catalyst motivating the agency to provide the relief. *Id.* (citing [Miller](#), 706 F.2d at 341). A purely technical or *de minimis* success is insufficient to confer “prevailing party” status. [Texas State Teachers Ass’n](#), at 792.

2. The touchstone is whether the actual relief on the merits materially alters the legal relationship between the parties by modifying the agency’s behavior in a way that directly benefits the complainant. [Farrar v. Hobby](#), 506 U.S. 103 (1992); [Bragg v. Dep’t. of the Navy](#), EEOC Appeal No. 01945699 (Mar. 7, 1996). Even an award of nominal monetary damages may be sufficient to meet this standard. [Farrar](#). Monetary relief is not required; non-monetary relief such as reinstatement or a higher performance rating is sufficient. *Id.*
3. An attorney who represents himself is not entitled to an award of fees. [Kay v. Ehrler](#), 499 U.S. 432 (1991). Neither a non-attorney nor a federal employee (including attorneys) who represents a complainant is entitled to an award of fees. 29 C.F.R. § 1614.501(e)(1)(iii).

C. Presumption of Entitlement

1. A prevailing complainant is presumptively entitled to fees and costs unless special circumstances render such an award unjust. 29 C.F.R. § 1614.501(e)(1)(i); [New York Gaslight Club, Inc. v. Carey](#), 447 U.S. 54 (1983); [Thomas v. Dep’t. of State](#), EEOC Appeal No. 01932717 (June 10, 1994). Special circumstances should be construed narrowly. The following arguments are not sufficient to show special circumstances:
 - a. the complainant did not need an attorney;
 - b. the complainant’s attorney worked for a public interest organization;
 - c. the complainant’s attorney accepted the case *pro bono*;
 - d. the complainant’s attorney was paid from some private fee agreement;
 - e. the complainant was able to pay the costs of the case;

- f. the agency acted in good faith;
- g. the agency took prompt action in remedying the discrimination;
- h. the financial burden of any fee would fall to the taxpayers;
- i. the agency has limited funds.

See [Blanchard v. Bergeron](#), 489 U.S. 87 (1989); [Roe v. Cheyenne Mountain Conference Resort, Inc.](#), 124 F.3d 1221 (10th Cir. 1997); [Jones v. Wilkinson](#), 800 F.2d 989 (10th Cir. 1986); [Fields v. City of Tarpon Springs](#), 721 F.2d 318 (11th Cir. 1983); [Copeland v. Marshall](#), 641 F.2d 880 (D.C. Cir. 1980); see also [Wise v. Dep't. of Veterans Affairs](#), EEOC Request No. 05920056 (Apr. 1, 1992).

2. Agencies are not required to pay for attorney's fees for services rendered during the pre-complaint process unless an Administrative Judge issues a decision finding discrimination, the agency issues a final order that does not implement the decision, and the Commission upholds the Administrative Judge's decision on appeal. If the agency agrees to fully implement the Administrative Judge's decision, it cannot be compelled to pay attorney's fees for fees incurred during the pre-complaint process, except that fees may be recovered for a reasonable period of time for services performed in reaching the decision whether to represent the complainant. 29 C.F.R. § 1614.501(e)(1)(iv). The agency and the complainant can agree, however, that the agency will pay attorney's fees for pre-complaint process representation. Id.
3. No attorney's fees may be awarded under the Age Discrimination in Employment Act, see [Coomes v. Social Security Administration](#), EEOC Appeal No. 0720120010 (Oct. 12, 2012), or Equal Pay Act, see [Jacobsen v. Dep't. of the Navy](#), EEOC Appeal Nos. 0720100046 and 0720100047 (September 7, 2012), for services performed at the administrative level. [Lowenstein v. Baldridge](#), 38 Fair Empl. Prac. Cas. (BNA) 466 (D.D.C. 1985); 29 C.F.R. § 1614.501(e)(1).

D. Awards to Prevailing Parties in Negotiated Settlements

1. A complainant who prevails through a negotiated settlement is entitled to attorney's fees and costs under the same standards as any other prevailing party. [Maher v. Gagne](#), 448 U.S. 122 (1980); [Copeland v. Marshall](#), 641 F.2d 880 (D.C. Cir. 1980); [EEOC v. Madison Community Unit Sch. Dist. 12](#), 818 F.2d 577 (7th Cir. 1987); [Cerny v. Dep't. of the Navy](#), EEOC Request No. 05930899 (Oct. 19, 1994). A settlement agreement that fails, however, to preserve the issue of fees and costs will operate as an implicit waiver of fees and costs. [Wakefield v. Matthews](#), 852 F.2d 482 (9th Cir. 1988); [Elmore v. Shuler](#), 787 F.2d 601 (D.C. Cir. 1986). The Commission strongly encourages parties to resolve fee and cost issues by negotiated settlement.⁴
2. The Administrative Judge will not review a negotiated fee agreement for fairness or reasonableness, except in class cases. [Foster v. Boise-Cascade, Inc.](#), 577 F.2d 335 (5th Cir.) (per curiam), *reh'g denied*, 581 F.2d 267 (5th Cir. 1978); [Jones v. Amalgamated Warbasse Houses, Inc.](#), 721 F.2d 881 (2d Cir. 1983), *cert. denied*, 466 U.S. 944 (1984). In class cases, the Administrative Judge should review the agreement to ensure that the negotiated fee is fair and reasonable to all parties.

E. Awards of Costs and Fees for Expert and Non-Lawyer Services

1. A prevailing complainant is entitled to recovery of his/her costs. Costs include those costs authorized by 28 U.S.C. § 1920. 29 C.F.R. § 1614.501(e)(2)(ii)(C). These include: witness fees; transcript costs; and printing and copying costs. In addition, reasonable out-of-pocket expenses may include all costs incurred by the attorney that are normally charged to a fee-paying client in the normal course of providing representation. [Hafiz v. Dep't. of Defense](#), EEOC Petition No. 04960021 (July 11, 1997). These costs may include such items as mileage, postage, telephone calls, and photocopying.
2. A prevailing complainant is entitled to expert fees as part of recoverable attorney's fees. 42 U.S.C. § 1988. The fee is not limited to per diem expenditures, but includes all expenses incurred in connection with the

⁴ Where the parties enter into a settlement agreement that provides for but does not quantify the amount of attorney's fees and costs, the attorney should submit his/her statement of fees and costs and supporting documentation to the agency for determination of the amount due. The agency should issue a decision on fees within 60 days of receipt of the statement and supporting documentation. *See* 29 C.F.R. § 1614.501(e)(2)(ii)(A). If the complainant disputes the amount awarded, s/he may file an appeal with the Commission.

retention of an expert. Id. Recovery is generally limited to testifying experts, but fees may be awarded for non-testifying experts if the complainant can show that the expert's services were reasonably necessary to the case.

3. A prevailing complainant is entitled to compensation for the work of law clerks, paralegals, and law students under the supervision of members of the bar, at market rates, 29 C.F.R. § 1614.501(e)(1)(iii), but not for clerical services. [Missouri v. Jenkins](#), 491 U.S. 274 (1989).
4. Reasonable costs incurred directly by a prevailing complainant (for example, one who is unrepresented or who is represented by a non-lawyer) are compensable. Hafiz, supra. Costs must be proved in the same manner as fees are, and the complainant must provide documentation, such as bills or receipts.
5. Witness fees shall be awarded in accordance with 28 U.S.C. § 1821, except that no award shall be made for a federal employee who is in a duty status when made available as a witness. 29 C.F.R. § 1614.501(e)(2)(iii).

F. Computation of Attorney's Fees

1. Attorney's fees will be computed by determining the "lodestar." The "lodestar" is the number of hours reasonably expended multiplied by a reasonable hourly rate. [Hensley v. Eckerhart](#), 461 U.S. 424, 434 (1983). By regulation, the Commission uses the same basis for calculating the amount of attorney's fees. 29 C.F.R. § 1614.501(e)(2)(ii)(B).
 - a. All hours reasonably spent in processing the complaint are compensable. Fees shall be paid for services performed by an attorney after the filing of a written complaint, provided that the attorney provides reasonable notice of representation to the agency, Administrative Judge, or Commission, except that fees are allowable for a reasonable period of time prior to the notification of representation for any services performed in reaching a determination to represent the complainant. 29 C.F.R. § 1614.501(e)(1)(iv).
 - b. Fees for services rendered during the pre-complaint process may be awarded only under the circumstances set forth above in Section III.B. See 29 C.F.R. § 1614.501(e)(1)(iv).
 - c. An attorney is eligible for work performed at the appeals stage for an award of fees, provided the complainant prevails at this stage.

- d. The number of hours should not include excessive, redundant, or otherwise unnecessary hours. [Hensley](#), 461 U.S. at 434; [Bernard v. Dep't. of Veterans Affairs](#), EEOC Appeal No. 01966861 (July 17, 1998). The presence of multiple counsel at hearing or deposition may be considered duplicative in certain situations, such as where one or more counsel had little or no participation or where the presence of multiple counsel served to delay or prolong the hearing or deposition. [Hodge v. Dep't. of Transportation](#), EEOC Request No. 05920057 (Apr. 23, 1992). The presence of multiple counsel is not necessarily duplicative, however, and is often justifiable. Time spent on clearly meritless arguments or motions, and time spent on unnecessarily uncooperative or contentious conduct may be deducted. [Luciano v. Olsten Corp.](#), 109 F.3d 111 (2d Cir. 1997); [Clanton v. Allied Chemical Corp.](#), 416 F. Supp. 39 (E.D. Va. 1976).
- e. A reasonable hourly rate is a rate based on “prevailing market rates in the relevant community” for attorneys of similar experience in similar cases. [Cooley v. Dep't. of Veterans Affairs](#), EEOC Request No. 05960748 (July 30, 1998) (quoting [Blum v. Stenson](#), 465 U.S. 886 (1984)). A higher rate for time spent at hearing may be reasonable if trial work would command a higher rate under prevailing community standards. Where multiple attorneys have worked on the case, the rate for each attorney should be determined separately. The limits on hourly rates contained in the Equal Access to Justice Act are not applicable.
- f. The applicable rate for fee awards to public interest attorneys is the prevailing hourly rate for the community in general. [Hodge v. Dep't. of Transportation](#), EEOC Request No. 05920057 (Apr. 23, 1992). In [Save Our Cumberland Mountains, Inc. v. Hodel](#), 857 F.2d 1516 (D.C. Cir. 1988), the court held that the prevailing market rate should also be used to determine fee awards to private, for-profit attorneys who represent certain clients at reduced rates, which reflect “non-economic” goals. See also [Cooley v. Dep't. of Veterans Administration](#), EEOC Request No. 05960748 (July 30, 1998); [Hatfield v. Dep't. of the Navy](#), EEOC Appeal No. 01892909 (Dec. 12, 1989).
- g. The hours spent on unsuccessful claims should be excluded in considering the amount of a reasonable fee only where the unsuccessful claims are distinct in all respects from the successful claims. [Hensley v. Eckerhart](#), 461 U.S. 424 (1983).

- h. The degree of success is an important factor in calculating an award of attorney's fees. [Farrar v. Hobby](#), 506 U.S. 103 (1992). In determining the degree of success, the relief obtained (including both monetary and equitable relief) should be considered in light of the complainant's goals. [City of Riverside v. Rivera](#), 477 U.S. 561 (1986); [Cullins v. Georgia Department of Transportation](#), 29 F.3d 1489 (1994). Where the complainant achieved only limited success, the complainant should receive only the amount of fees that is reasonable in relation to the results obtained. [Hensley v. Eckerhart](#), 461 U.S. 424 (1983); [Cerny v. Dep't. of the Navy](#), EEOC Request No. 05930899 (Oct. 19, 1994). However, a reasonable fee may not be determined by mathematical formula based on monetary relief obtained. [Riverside](#) at 563; [Cullins](#) at 1493. The determination of the degree of success should be made on a case-by-case basis. In many cases, an award of equitable relief only or a small award of monetary damages may reflect a high degree of success. Failure to obtain the maximum damages allowable or a large monetary award generally does not reflect limited success.
2. There is a strong presumption that the lodestar represents the reasonable fee. 29 C.F.R. § 1614.501(e)(2)(ii)(B). In limited circumstances, the lodestar figure may be adjusted upward or downward, taking into account the degree of success, the quality of representation, and long delay caused by the agency. The lodestar may be adjusted only under the circumstances described in this subpart.
- a. An award of attorney's fees may be enhanced in cases of exceptional success. The complainant must show that such an enhancement is necessary to determine a reasonable fee. [City of Burlington v. Dague](#), 505 U.S. 557 (1992). Conversely, a fee award may be reduced in cases of limited success. [Texas State Teachers Ass'n v. Garland I.S.D.](#), 489 U.S. 782 (1989). However, there is no requirement that fee awards be proportional to the amount of monetary damages awarded. [City of Riverside v. Rivera](#), 477 U.S. 561 (1986).
 - b. An award of attorney's fees may be enhanced where the quality of representation is exceptional. [McKenzie v. Kennickell](#), 875 F.2d 330 (D.C. Cir. 1989). Conversely, the award of attorney's fees may be reduced where the quality of representation was poor, the attorney's conduct resulted in undue delay or obstruction of the process, or where settlement likely could have been reached much earlier but for the attorney's conduct. [Lanasa v. City of New](#)

Orleans, 619 F. Supp. 39 (E.D. La. 1985); Barrett v. Kalinowski, 458 F. Supp. 689 (M.D. Pa. 1978).

- c. The lodestar may not be enhanced to compensate for the risk of non-payment, risk of losing the case, or difficulty finding counsel. City of Burlington v. Dague, 505 U.S. 557 (1992).
 - d. A lodestar may be adjusted to compensate for a long delay where the delay is caused by the agency. Pennsylvania v. Delaware Valley Citizens' Council, 483 U.S. 711 (1987).
 - e. If the Administrative Judge or agency determines that an adjustment to the lodestar is appropriate, the Administrative Judge or agency may calculate the adjustment by either adding or subtracting a lump sum from the lodestar figure or by adding or subtracting a percentage of the lodestar. The Administrative Judge or agency has discretion to determine the amount of the adjustment. Normally, the adjustment should be no more or less than 75% of the lodestar figure. The Administrative Judge or agency must provide a detailed written explanation of why the adjustment was made, and what factors supported the adjustment. Coutin v. Young & Rubicam Puerto Rico, Inc., 124 F.3d 331 (1st Cir. 1997).
 - f. The party seeking to adjust the lodestar, either up or down, has the burden of justifying the deviation. Copeland v. Marshall, 641 F.2d 880, 892 (D.C. Cir. 1980); Brown v. Dep't. of Commerce, EEOC Appeal No. 01944999 (May 17, 1996).
3. Where a complainant rejects an offer of resolution and the final decision is not more favorable than the offer, attorney's fees and costs incurred after the expiration of the thirty (30)-day acceptance period are not compensable. 29 C.F.R. § 1614.109(c)(3). This regulation further provides that an Administrative Judge may award attorney's fees and costs despite the complainant's failure to accept an offer of resolution where "the interests of justice would not be served" by a denial of fees. An example of when fees would be appropriate is where the complainant received an offer of resolution, but was informed by a responsible agency official that the agency would not comply in good faith with the offer (for example, would unreasonably delay implementation of the relief offered). A complainant who rejected the offer for that reason, and who obtained less relief than was contained in the offer of resolution, would not be denied attorney's fees in this situation.

G. Contents of Fee Application and Procedure for Determination

1. When the decision-making authority, that is, the agency, an Administrative Judge, or the Commission, issues a decision finding discrimination, the decision normally should provide, under the standards set forth above, for the complainant's entitlement to attorney's fees and costs. The complainant's attorney then must submit a verified statement of attorney's fees (including expert witness fees) and other costs, as appropriate, to the agency or Administrative Judge within thirty (30) days of receipt of the decision and must submit a copy of the statement to the agency. 29 C.F.R. § 1614.501(e)(2)(i).⁵

A statement of attorney's fees and costs must be accompanied by an affidavit executed by the attorney of record itemizing the attorney's charges for legal services. A verified statement of fees and costs shall include the following:

- a. a list of services rendered itemized by date, number of hours, detailed summary of the task, rate, and attorney's name;
- b. documentary evidence of reasonableness of hours, such as contemporaneous time records, billing records, or a reasonably accurate substantial reconstruction of time records;
- c. documentary evidence of reasonableness of rate, such as an affidavit stating that the requested rate is the attorney's normal billing rate, a detailed affidavit of another attorney in the community familiar with prevailing community rates for attorneys of comparable experience and expertise, a resume, a list of cases handled, or a list of comparable cases where a similar rate was accepted; and
- d. documentation of costs.

[National Ass'n of Concerned Veterans v. Secretary of Defense](#), 675 F.2d 1319 (D.C. Cir. 1982). A fee award may be reduced for failure to provide adequate documentation. If seeking an adjustment to the lodestar figure, the fee application shall clearly identify the specific circumstances of the case that support the requested adjustment. Id.

⁵ Where the Commission finds discrimination in a case in which the agency takes final action under 29 C.F.R. § 1614.110(a), the Commission will remand the case to the Administrative Judge for a determination of attorney's fees. Where the decision on appeal originates from a case handled exclusively by the agency (that is, where the complainant elected a final agency decision under 29 C.F.R. § 1614.110(b)), the Commission will remand the case to the agency for a determination of attorney's fees.

2. The agency may respond to the statement of fees and costs within 30 days of its receipt. If the agency contests the fee request, it must provide equally detailed documentation in support of its arguments. Id.
3. Discovery into the reasonableness of the hours or rate is permissible, but discouraged. The Administrative Judge has discretion to grant or deny permission to conduct discovery by interrogatory or document request.
4. The Administrative Judge or agency will issue a decision determining the amount of attorney's fees or costs due within 60 days of receipt of the statement and affidavit. 29 C.F.R. § 1614.501(e)(2)(ii)(A). The decision should provide a written explanation of any award of fees and costs, including, as appropriate, findings of fact, analysis, and legal conclusions. 29 C.F.R. § 1614.501(e)(2)(ii)(A). The decision must include a notice of right to appeal to the Commission.
5. The Commission encourages the parties to resolve fee and cost issues by negotiated settlement during the 30-day period for filing a fee petition. The Administrative Judge will not review a negotiated fee agreement for fairness or reasonableness, except in class cases.
6. If the Administrative Judge decides to bifurcate the liability and damages determinations in a case, the decision on liability should provide for entitlement to attorney's fees and the subsequent decision on damages should also include the determination of the amount of the award of fees and costs. The complainant's attorney should be directed to submit the statement of fees and costs within 30 days of receipt of the decision finding liability. The attorney may submit a supplemental petition for fees incurred during the damages phase of the case.

H. Miscellaneous Issues

1. An Administrative Judge may award interim fees pendente lite⁶ where the complainant has prevailed on an important non-procedural allegation of discrimination in the course of the case. [Hanrahan v. Hampton](#), 446 U.S. 754 (1980); [Trout v. Garrett](#), 891 F.2d 332 (D.C. Cir. 1989). However, interim awards should be granted only under special circumstances, such as where a complainant's attorney has invested substantial time and resources into a case over a long period of time.

⁶ Pendente lite is Latin for awaiting the litigation (lawsuit). It is applied to court orders (such as temporary child support) which are in effect until the case is tried, or rights that cannot be enforced until the lawsuit is over.

2. A prevailing complainant is entitled to an award of fees for time spent on a fee claim including time spent defending the award on appeal. [Southeast Legal Defense Group v. Adams](#), 657 F.2d 1118 (9th Cir. 1981); [Lund v. Affleck](#), 587 F.2d 75 (1st Cir. 1978). However, the Administrative Judge may reduce or eliminate fees for time spent on litigating the fee award where fee claims are exorbitant or the time devoted to preparing a fee claim is excessive. [Gagne v. Maher](#), 594 F.2d 336 (2d Cir. 1979), *aff'd*, [448 U.S. 122](#) (1980). A reasonableness standard applies. [Black v. Dep't. of the Army](#), EEOC Request No. 05960390 (Dec. 9, 1998).
3. Even absent a finding of discrimination, the Administrative Judge has authority to impose attorney's fees and costs as an appropriate sanction for refusal to obey discovery or other orders. 29 C.F.R. § 1614.109(f)(3)(v). For example, a complainant may be entitled to attorney's fees when the agency fails without good cause shown to respond to discovery requests, [Shine v. U.S. Postal Service](#), EEOC Appeal No. 01972201 (Dec. 12, 1998), or falsifies documents or testimony, [Wichy v. Dep't. of the Air Force](#), EEOC Appeal No. 01962972 (September 25, 1998). Fees and costs may be awarded for work associated with efforts to secure discovery compliance, even when the complainant does not prevail on the merits. [Stull v. Dep't. of Justice](#), EEOC Appeal No. 01942827 (June 15, 1995).
4. Attorney's fees are available for work pursuing claim for damages. [Rivera v. National Aeronautics & Space Administration](#), EEOC Appeal No. 0120111416 (July 19, 2011).

VII. COMPENSATORY DAMAGES

Compensatory damages are awarded to compensate a complaining party for losses or suffering inflicted due to the discriminatory act or conduct. See *Carey v. Piphus* 435 U.S. 247, 254 (1978)(purpose of damages is to “compensate persons for injuries caused by the deprivation of constitutional rights”). Compensatory damages “may be had for any proximate consequences which can be established with requisite certainty.” 22 Am Jur 2d Damages § 45 (1965) Compensatory damages include damages for past pecuniary loss (out-of-pocket loss), future pecuniary loss, and nonpecuniary loss (emotional harm). See [Goetze v. Dep’t. of the Navy](#), EEOC Appeal No. 01991530 (Aug. 23, 2001).

A. Entitlement to Seek Compensatory Damages

1. Pursuant to Section 102(a) of the Civil Rights Act of 1991, a complainant who establishes his/her claim of unlawful discrimination may receive, in addition to equitable remedies, compensatory damages for past and future pecuniary losses (that is, out of pocket expenses) and non-pecuniary losses (for example, pain and suffering, mental anguish). 42 U.S.C. § 1981a(b)(3). For an employer with more than 500 employees, the limit of liability for future pecuniary and non-pecuniary damages is \$300,000. Id. Complainants prevailing on claims under the Age Discrimination in Employment Act of 1967, as amended, and the Equal Pay Act of 1963, as amended, are not entitled to compensatory damages at the administrative level.
2. Under Section 102 of the Civil Rights Act of 1991, compensatory damages may be awarded for past pecuniary losses, future pecuniary losses, and non-pecuniary losses that are directly or proximately caused by the agency’s discriminatory conduct. However, Section 102 prohibits such awards for an employment practice that is unlawful because of its disparate impact. [Compensatory and Punitive Damages Available under Section 102 of the Civil Rights Act of 1991](#) (July 14, 1992).
3. However, Section 102 also provides that an agency is not liable for compensatory damages in cases of disability discrimination where the agency demonstrates that it made a good faith effort to accommodate the complainant’s disability.

An agency can demonstrate a good faith effort by proving that it consulted with the individual with a disability and attempted to identify and make a reasonable accommodation. [Schauer v. Social Security Administration](#), EEOC Appeal No. 01970854 (July 12, 2001); compare [Luellen v. U.S. Postal Service](#), EEOC Appeal No. 01951340 (Dec. 23, 1996) (agency demonstrated good faith effort where it consulted with complainant and

her physicians in attempting to identify a reasonable accommodation, despite the fact that these efforts were not sufficient to afford complainant a reasonable accommodation); [Morris v. Dep't. of Defense](#), EEOC Appeal No. 01962984 (Oct. 1, 1998) (agency did not make a good faith effort to identify and provide a reasonable accommodation for complainant where it did not make any attempt to find an available office position for complainant in spite of his repeated requests.).

4. The Commission may set out the amount of compensatory damages to be awarded by the respondent agency in its decisions. Alternatively, the Commission may remand the matter to the agency for a determination of the amount of compensatory damages.

B. Legal Principles

1. Non-Pecuniary Damages

Non-pecuniary damages are losses that are not subject to precise quantification including emotional pain and injury to character, professional standing, and reputation. Compensatory damages are awarded to compensate for losses or suffering inflicted due to discrimination. Punitive damages are not available against the federal government.

The particulars of what relief may be awarded, and what proof is necessary to obtain that relief, are set forth in detail in the Commission Notice No. 915.002, [Compensatory and Punitive Damages Available under Section 102 of the Civil Rights Act of 1991](#) (July 14, 1992). Briefly stated, the complainant must submit evidence to show that the agency's discriminatory conduct directly or proximately caused the losses for which damages are sought. *Id.* at 11-12, 14; [Rivera v. Dep't. of the Navy](#), EEOC Appeal No. 01934157 (July 22, 1994).

The amount awarded should reflect the extent to which the agency's discriminatory action directly or proximately caused harm to the complainant and the extent to which other factors may have played a part. [The Commission Notice No. 915.002, Compensatory and Punitive Damages Available Under Section 102 of the Civil Rights Act of 1991](#) (July 14, 1992) at 11-12. The amount of non-pecuniary damages should also reflect the nature and severity of the harm to the complainant, and the duration or expected duration of the harm. *Id.* at 14.

In [Carle v. Dep't. of the Navy](#), the Commission explained that "objective evidence" of non-pecuniary damages could include a statement by the complainant explaining how s/he was affected by the discrimination. EEOC Appeal No. [01922369](#) (Jan. 5, 1993). Non-pecuniary damages must be limited to

the sums necessary to compensate the injured party for the actual harm and should take into account the severity of the harm and the length of the time the injured party has suffered from the harm. [Carpenter v. Dep't. of Agriculture](#), EEOC Appeal No. 01945652 (July 17, 1995).

Objective evidence of compensatory damages can include statements from complainant concerning his emotional pain or suffering, inconvenience, mental anguish, loss of enjoyment of life, injury to professional standing, injury to character or reputation, injury to credit standing, loss of health, and any other non-pecuniary losses that are incurred as a result of the discriminatory conduct. *Id.* Statements from others including family members, friends, health care providers, or other EEO Counselors (including clergy) could address the outward manifestations or physical consequences of emotional distress, including sleeplessness, anxiety, stress, depression, marital strain, humiliation, emotional distress, loss of self-esteem, excessive fatigue, significant weight loss or gain, or a nervous breakdown. *Id.* Complainant's own testimony, along with the circumstances of a particular case, can suffice to sustain his burden in this regard. *Id.* The more inherently degrading or humiliating the defendant's action is, the more reasonable it is to infer that a person would suffer humiliation or distress from that action. *Id.*

Evidence from a health care provider or other expert is not a mandatory prerequisite for recovery of compensatory damages for emotional harm. See [Lawrence v. U.S. Postal Service](#), EEOC Appeal No. 01952288 (Apr. 18, 1996) (citing [Carle v. Dep't. of the Navy](#), EEOC Appeal No. 01922369 (Jan.. 5, 1993)). The absence of supporting evidence, however, may affect the amount of damages appropriate in specific cases. *Id.*

Non-pecuniary damages must be limited to compensation for the actual harm suffered as a result of the agency's discriminatory actions. See [Carter v. Duncan-Huggans, Ltd.](#), 727 F.2d 1225 (D.C. Cir. 1994); [The Commission Notice No. 915.002, Compensatory and Punitive Damages Available Under Section 102 of the Civil Rights Act of 1991](#) (July 14, 1992) at 13. A proper award should take into account the severity of the harm and the length of time that the injured party suffered the harm. See [Carpenter](#), *supra*. Additionally, the amount of the award should not be "monstrously excessive" standing alone, should not be the product of passion or prejudice, and should be consistent with the amount awarded in similar cases. See [Jackson v. U.S. Postal Service](#), EEOC Appeal No. 01972555 (Apr. 15, 1999), citing [Cygnar v. City of Chicago](#), 865 F. 2d 827, 848 (7th Cir. 1989). Finally, we note that in determining non-pecuniary compensatory damages, the Commission has also taken into consideration the nature of the agency's discriminatory actions. See [Utt v. U.S. Postal Service](#), EEOC Appeal No. 0720070001 (Mar. 26, 2009); [Brown-Fleming v. Dep't. of Justice](#), EEOC Appeal No. 0120082667 (Oct. 28, 2010).

2. Past Pecuniary Damages

Compensatory damages may be awarded for pecuniary losses that are directly or proximately caused by the agency's discriminatory conduct. See [The Commission Notice No. 915.002, Compensatory and Punitive Damages Available under Section 102 of the Civil Rights Act of 1991](#) (July 14, 1992) at 8. Pecuniary losses are out-of-pocket expenses incurred as a result of the agency's unlawful action, including job-hunting expenses, moving expenses, medical expenses, psychiatric expenses, physical therapy expenses, and other quantifiable out-of-pocket expenses. *Id.* Past pecuniary losses are losses incurred prior to the resolution of a complaint through a finding of discrimination, or a voluntary settlement. *Id.* at 8-9.

In a claim for pecuniary compensatory damages, complainant must demonstrate, through appropriate evidence and documentation, the harm suffered as a result of the agency's discriminatory action. [Rivera v. Dep't. of the Navy](#), EEOC Appeal No. 01934156 (July 22, 1994); [The Commission Notice No. 915.002, Compensatory and Punitive Damages Available Under Section 102 of the Civil Rights Act of 1991](#) (July 14, 1992), at 11-12, 14; [Carpenter v. Dep't. of Agriculture](#), EEOC Appeal No. 01945652 (July 17, 1995). Objective evidence in support of a claim for pecuniary damages includes documentation showing actual out-of-pocket expenses with an explanation of the expenditure. See [The Commission Notice No. 915.002, Compensatory and Punitive Damages Available Under Section 102 of the Civil Rights Act of 1991](#) (July 14, 1992) at 11-12; [Carle v. Dep't. of the Navy](#), EEOC Appeal No. 01922369 (Jan. 5, 1993). The agency is only responsible for those damages that are clearly shown to be caused by the agency's discriminatory conduct. *Id.* To recover damages, the complainant must prove that the employer's discriminatory actions were the cause of the pecuniary loss. [The Commission Notice No. 915.002, Compensatory and Punitive Damages Available Under Section 102 of the Civil Rights Act of 1991](#) (July 14, 1992) at 8.

3. Future Pecuniary Damages

Future pecuniary losses are losses that are likely to occur after resolution of a complaint. See [Compensatory and Punitive Damages Available under Section 102 of the Civil Rights Act of 1991](#), the Commission Notice No. 915.002 at 9 .

An award for the loss of future earning potential considers the effect that complainant's injury will have on her ability in the future to earn a salary comparable with what she earned before the injury. [Brinkley v. U.S. Postal Service](#), EEOC Request No. 05980429 (Aug. 12, 1999) citing [McKnight v. General Motors Corp.](#), 973 F.2d 1366, 1370 (7th Cir. 1992). Where complainant has shown that her future earning power has been diminished as a result of the agency's discrimination, the Commission has awarded future pecuniary damages for the loss of future earning capacity. See [Morrison v. U.S. Postal Service](#),

EEOC Appeal No. 07A50003 (Apr. 18, 2006) (citing [Brinkley](#), *supra*); [Hernandez v. U.S. Postal Service](#), EEOC Appeal No. 07A30005 (July 16, 2004). Proof of entitlement to loss of future earning capacity involves evidence suggesting that the individual's injuries have narrowed the range of economic opportunities available to her. [Carpenter v. Dep't. of Agriculture](#), EEOC Appeal No. 01945652 (July 17, 1995). Generally, the party seeking compensation for loss of earning capacity needs to provide evidence which demonstrates with reasonable certainty or reasonable probability that the loss has been sustained. *Id.*, (citing [Annotation, Evidence of Impaired Earnings Capacity](#), 18 A.L.R. 3d 88, 92 (1968)). Such evidence need not prove that the injured party will, in the near future, earn less than she did previously, but that “[her] injury has caused a diminution in [her] ability to earn a living.” [Carpenter](#), *supra*, (citing [Gorniak v. Nat’l R.R. Passenger Corp.](#), 889 F.2d 481, 484 (3d Cir. 1989)).

CHAPTER 12 SETTLEMENT AUTHORITY

I. INTRODUCTION

Public policy favors the amicable settlement of disputes. It is clear that this policy in favor of settlement of disputes applies particularly to employment discrimination cases. See, for example, [Sears Roebuck & Co. v. Equal Employment Opportunity Comm.](#), 581 F.2d 941 (D.C. Cir. 1978); [Shaw v. Library of Congress](#), 479 F. Supp. 945 (D.D.C. 1979). Agencies are encouraged to seek resolution of EEO complaints through settlement at any time during the administrative or judicial process. Agencies and EEO complainants should be creative in considering settlement terms. In this Chapter, we discuss the authority for settlements of EEO disputes and various options for those settlements.

II. AUTHORITY

Title VII of the Civil Rights Act of 1964 expressly encourages the settlement of employment discrimination disputes without litigation. Courts have consistently encouraged the settlement of discrimination claims and have upheld those settlements when challenged. See, for example, [Occidental Life Insurance Co. v. Equal Employment Opportunity Comm.](#), 432 U.S. 355 (1977); [Alexander v. Gardner-Denver Co.](#), 415 U.S. 36 (1974).

The Supreme Court held in [Chandler v. Roudebush](#), 425 U.S. 840 (1976), that federal employees have the same rights under the employment discrimination statutes as private sector employees, thus recognizing the right of federal employees to enter into voluntary settlements with federal agencies. As a result, Section 717 of Title VII of the Civil Rights Act of 1964 authorizes agencies to fashion settlements of EEO disputes in resolution of such claims. The same analysis applies to disputes brought under Section 501 or 505 of the Rehabilitation Act of 1973, Section 15 of the Age Discrimination in Employment Act of 1967, and the Equal Pay Act. See [Matter of Albert D. Parker](#), 64 Comp. Gen. 349 (1985).

Conciliation and voluntary settlement are critical to efforts to eradicate employment discrimination, both in the public and private sectors. The legislative history of Section 717 of Title VII is unequivocal in stressing that the broadest latitude exists in determining the appropriate remedy for achieving this end.¹

¹ [1. S. Rep. No. 92-415](#), 92nd Cong., 1st Sess. 15 (1971), reprinted in Senate Comm. on Labor and Public Welfare, 92nd Cong., 2d Sess., [Legislative History of the Equal Employment Opportunity Act of 1972](#), at 424 (Comm. Print 1972).

The Equal Employment Opportunity Commission's strong support for settlement attempts at all stages of the EEO complaint process is codified in 29 C.F.R. § 1614.603, which states, "Each agency shall make reasonable efforts to voluntarily settle complaints of discrimination as early as possible in, and throughout, the administrative processing of complaints, including the pre-complaint counseling stage."² Settlement agreements entered into voluntarily and knowingly by the parties are binding on the parties. Settlements may not involve waiver of remedies for future violations. Settlements of age discrimination complaints must also comply with the requirements of the Older Workers Benefits Protection Act, 29 U.S.C. § 626, involving waivers of claims. That is, a waiver in settlement of an age discrimination complaint must be knowing and voluntary.³

The Department of Justice's Office of Legal Counsel has affirmed the broad authority of agencies to settle EEO disputes by applying remedies a court could order if the case were to go to trial. In an opinion interpreting the authority of an agency to settle a Title VII class complaint, the Department's Office of Legal Counsel advised that a complainant can obtain in settlement whatever the agency concludes, in light of the facts and recognizing the inherent uncertainty of litigation, that a court could order as relief in that case if it were to go to trial. In the case it reviewed, which alleged discrimination in classification decisions, the Office of Legal Counsel determined that the agency could agree not to reclassify positions of specific employees downward because a court could enjoin reclassification of the positions of those employees if the court found some cognizable danger of recurrent violation. The Office of Legal Counsel found the proposed settlement valid under Title VII, even though the Office of Personnel Management contended that the agency's authority to reclassify pursuant to applicable statutes, rules, and regulations cannot be superseded by settlement.

The relief provided by an agency to settle an EEO dispute cannot be greater than the relief a court could order if that particular dispute were to go to trial. For example, assume that a GS-9 employee files an EEO complaint alleging discrimination in the denial of a promotion to the level of a GS-11. If the employee has met the time-in-grade and any other job-related requirements, it is appropriate to offer in settlement a retroactive promotion to GS-11. It would not be appropriate, however, to propose a promotion to a GS-12 position for which the employee has not met the requirements. However, if an individual was denied promotion to a GS-11 position and one or more

² One of the mechanisms for settling complaints is the offer of resolution, which is set forth in 29 C.F.R. § 1614.109(c). Offers of resolution are not, however, the only way to settle complaints; they are a particular method, which, in certain circumstances, can limit an agency's liability for attorney's fees and costs.

³ Section (f)(2) of the OWBPA in conjunction with Sections (f)(1)(A) through (E) set forth the minimum standards. A settlement agreement is knowing and voluntary when the complainant is given a reasonable period of time to consider the settlement agreement, and the waiver is worded in a reasonably understandable way, specifically refers to rights or claims under the ADEA, and does not waive future rights. In addition, the settlement agreement must provide something of value in exchange for the waiver and must advise the complainant to consult with an attorney before signing the agreement.

individuals who got the promotion at that time were subsequently promoted to GS-12 based on a career ladder, then it may be appropriate to offer a GS-12 position in settlement of the complaint.

On the other hand, parties are encouraged to be creative in resolving an employment dispute and may agree to settle a complaint for relief that may be different than that which a court might order, as long as it is no greater than what a court might order. For example, an agency may settle a complaint involving the termination of an employee by agreeing to pay for or provide outplacement services to help the former employee find a new job, provided that the cost of the outplacement services does not exceed the total monetary relief a court could order if the complainant were to prevail in the case. In another example, an agency could agree to reassign a complainant to a different supervisor or office in a settlement of a complaint, alleging discriminatory failure to promote, where the complainant and the supervisor who made the promotion decision do not get along.

III. TITLE VII AUTHORITY INDEPENDENT OF BACK PAY ACT

The Comptroller General of the United States has considered objections to settlements of EEO disputes in a number of cases. In these decisions, the Comptroller General has confirmed the authority of agencies to enter into settlements of EEO claims and considered ancillary questions about settlements.

In one of these decisions, the Comptroller General affirmed that Title VII contains authority for remedying employment discrimination and this authority is independent of the authority contained in the Back Pay Act to provide back pay only where a finding has been made of “an unwarranted and unjustified personnel action.” 5 U.S.C. § 5596. “The connection between Title VII and the Back Pay Act arises only because the Commission has provided in its regulations on remedial actions that when discrimination is found, an award of back pay under Title VII is to be computed in the same manner as under the Back Pay Act regulations.” [Equal Employment Opportunity Commission, Informal Settlement of Discrimination Complaints](#), 62 Comp. Gen. 239, 242 (1983). The authority to award back pay is derived from Title VII; the regulations borrow the formula for calculating the amount of back pay owed from the Back Pay Act.

The independent Title VII authority to settle EEO claims is significant because, unlike the Back Pay Act, Section 717 of Title VII does not limit awards of back pay to situations where there has been a finding of an unjustified or unwarranted personnel action. Thus, there is no impediment to an award of back pay as part of a settlement without a finding of discrimination.

When evaluating the risk of litigation versus the cost of settlement, agencies should include the cost of a federal retirement annuity in their consideration, if an annuity would

become payable immediately. This reflects the actual cost to the government of the proposed settlement and should be considered when deciding whether the settlement is in the interest of the government. This calculation may lead an agency to explore alternative solutions, such as purchasing a private annuity. The purchase of a private annuity may not be desirable in all instances, but can be considered as a possible alternative. Following are some examples that reflect this calculation:

1. An employee at a GS-14, step 10, separates at age 50 with 25 years of service. His only annuity eligibility is for a deferred annuity at age 62. The present value of this deferred benefit (when the employee is age 50) is \$259,992. If, under the terms of a settlement agreement, his separation is changed to an involuntary separation (thus entitling him to an immediate discontinued service retirement benefit), the value of the benefit is \$691,546. Thus, the cost to the government resulting from the settlement is the difference, or an additional \$431,554.
2. An employee at a GS-14, step 10, separates at age 55 with 30 years of service, and therefore is eligible for an immediate annuity. The value of this annuity is \$843,800. If, in settlement, she is retroactively promoted to a GS-15, step 10, for three years, the value of her annuity becomes \$992,669. This means the settlement costs the government an additional \$148,869 in retirement annuities.
3. An employee at GS-14, step 10, separates at age 56 with 30 years of service and is eligible for an immediate annuity valued at \$825,588. If, pursuant to a settlement, he is retroactively considered a law enforcement officer for 20 years of his federal career, the value of his retirement benefit becomes \$1,027,344. Thus, the settlement adds \$201,756 to the government's cost of his retirement.
4. An employee at a GS-14, step 10, separates at age 50 with 25 years of service. When the employee is 55, the value of her deferred annuity payable at age 62 is \$364,653. If the employee is returned to the agency's rolls for five years, enabling her to retire immediately, her retirement benefit has a value of \$1,044,361. This settlement would add \$679,708 to the government's costs.
5. In settlement, the level of a GS-12, step 10, employee is retroactively changed to GS-14, step 10, for a period of three years. Assuming that she is entitled to an immediate annuity, the value of her retirement benefit is raised from \$582,132 to \$817,945. Thus, the additional cost to the government of this settlement is \$235,813.

IV. NO FINDING OF DISCRIMINATION NECESSARY FOR SETTLEMENTS

It has long been the practice in both the private sector and the federal sector for

employers and agencies to enter into settlements that contain cash payments where there has been neither a finding of discrimination, either judicially or administratively, nor an admission by the employer or agency of any wrongdoing.

The Comptroller General has supported these settlements, stating “it is beyond question that an agency has the general authority to informally settle a discrimination complaint and to award back pay with a retroactive promotion or reinstatement in an informal settlement without a specific finding of discrimination.” [Equal Employment Opportunity Commission, Informal Settlement of Discrimination Complaints](#), 62 Comp. Gen. 239, 242 (1983).

V. CASH AWARDS WITHOUT CORRESPONDING PERSONNEL ACTIONS

Settlements of EEO disputes may contain monetary payments that are independent of any personnel action, provided that the monetary payment does not exceed the amount of back pay, attorney’s fees,⁴ costs, or damages⁵ the employee would have been entitled to in the case if discrimination had been actually found.

The Comptroller General has considered settlements of EEO disputes comprised of monetary payments unconnected to personnel actions on at least two occasions and held that they were authorized and appropriate:

[W]e conclude that Federal agencies have the authority in informally settling discrimination complaints filed under Title VII of the Civil Rights Act of 1964, as amended, to make awards of backpay, attorney’s fees, or costs, without a corresponding personnel action and without a finding of discrimination, provided that the amount of the award agreed upon must be related to backpay and may not exceed the maximum amount that would be recoverable under Title VII if a finding of discrimination were made.

Id. at 244; [Matter of Albert D. Parker](#), 64 Comp. Gen. 349 (1985).

VI. PERSONNEL ACTIONS WITH LUMP SUM PAYMENTS

An agency may informally settle an EEO complaint by providing a lump sum payment as

⁴ Attorney’s fees are not available during the administrative process of complaints brought under the Age Discrimination in Employment Act or the Equal Pay Act.

⁵ The Commission has the authority to award compensatory damages during the administrative process. [Gibson v. West](#), 527 U.S. 212 (1999). Agencies, therefore, are authorized to pay compensatory damages in a settlement during the administrative process. Compensatory damages should be calculated separately from back pay, other benefits, and fees and are limited to no more than \$300,000.

a retroactive personnel action in lieu of back pay. As long as the settlement does not exceed the relief to which the complainant would be entitled if a finding of discrimination had been made, it is authorized.

If the settlement provides for a retroactive personnel action, all appropriate contributions to the retirement funds must be made. Settlements may resolve claims actually made and also claims that could be made, provided that the factual predicate for the claims that could be made has occurred. For example, an agency may settle a complainant's formal complaint, alleging failure to promote and include relief for the complainant's retaliation claim, which has not been raised, except in the settlement discussions.

Since the Civil Rights Act of 1991 provided for award of compensatory damages in appropriate cases, settlements often provide for one lump sum amount covering monetary relief, even when there is a personnel action involved as well. In these cases, parties can agree to an overall figure in the settlement that represents damages, back pay, and attorney's fees. That figure can reflect the maximum amount a court could award, and need not be limited to an amount that the agency believes a complainant can prove in court. The settlement agreement does not need to contain a separate breakdown of the lump sum showing individual amounts of back pay, damages, and fees. The lump sum agreed to by the parties can be equal to or less than the total amount of back pay, damages, and fees that would be awarded if a finding of discrimination were made. A lump sum cannot, under any circumstances, exceed the amount that the agency concludes, in light of the facts and recognizing the inherent uncertainty of litigation, a court could award if a lawsuit were brought.

If a lump sum settlement is intended to award enhanced retirement benefits as part of its terms, the rates of basic pay or grade and step deemed to be received by the complainant, and the periods during which each rate of pay was received, must be specified in the settlement terms. OPM advises that if this specific information is not set out in the settlement document, the terms of the settlement will not be included in the calculation of the complainant's retirement benefits.

VII. IMPLEMENTING SETTLEMENT AGREEMENTS

There may be some instances where a proposed informal settlement appears to be at odds with normal personnel procedure or practice contained in regulations implementing Title 5 of the United States Code or processing guidance of the Office of Personnel Management. Such situations could arise where Office of Personnel Management regulations or guidance foresee personnel actions taken in the normal course of business and do not generally discuss personnel actions taken pursuant to court order or a settlement. Title VII provides authority to enter into settlements of EEO complaints,⁶

⁶ As noted earlier in this Chapter, the same analysis applies to EEO complaints filed under the Rehabilitation Act of 1973, the Age Discrimination in Employment Act of 1967, and the Equal Pay Act of 1963.

and, likewise, Title VII provides authority for agencies to effectuate the terms of those settlements.

Chapter 32, Section 6(b) of OPM's [Guide to Processing Personnel Actions](#) describes the procedure for documenting personnel actions taken as the result of a settlement agreement, court order, or Commission or MSPB decision. The purpose of this procedure is to protect the privacy of the employee.

Rather than including personal and irrelevant settlement information on the employee's SF-50, the SF-50 may be processed with the computer code "HAM." ("HAM" is a computer code that prints on the SF-50 a citation to 5 C.F.R. § 250.101.) If an agency's computer system does not permit the use of the citation "HAM," then the SF-50 may cite to 5 C.F.R. § 250.101. This section of the Code of Federal Regulations indicates that the personnel action is processed under an appropriate legal authority.

Appendix A MD-110

**APPENDIX A EEO-MD-110
INTERAGENCY AGREEMENT
BETWEEN
THE U.S. [NON CONFLICT AGENCY]
AND
THE U.S. [AGENCY]**

A. Purpose, Authority, and Scope

The U.S. [Non Conflict AGENCY (hereinafter “NC Agency”) and the U.S. [AGENCY] (hereinafter “agency”) hereby agree that, in accordance with the terms of this Interagency Agreement (hereinafter “Agreement”) and the Economy Act, 31 U.S.C. § 1535, the NC agency shall assume responsibility for investigating the following Equal Employment Opportunity (EEO) complaint filed with the agency:

[Complainant] v. [AGENCY] [Case No.]

Through this interagency acquisition, the agency is obtaining needed investigative services from the NC agency on a reimbursable basis.

B. Responsibilities of the NC Agency

With respect to the matters identified in Part A of this Agreement, and pursuant to 29 C.F.R. § 1614.607, the agency herein officially delegates authority to the NC agency as follows:

1. The NC agency shall investigate the complaint in accordance with 29 C.F.R. § 1614.108(b)-(e).
2. The NC agency shall prepare an investigative file and an investigative summary.
3. Upon conclusion of the investigation, the NC agency shall forward the investigative file to the agency to continue processing in accordance with 29 C.F.R. Part 1614.

Appendix A EEO MD-110**August, 2015****C. Responsibilities of Agency**

With respect to the complaint identified under Part A of this Agreement, the agency agrees to assume the following responsibilities:

1. The agency shall transmit the complaint file to the NC agency for investigation within seven calendar days of the date that this Agreement is signed by the NC agency and received by the agency by fax or mail, whichever is earlier.
2. The agency shall cooperate fully with the NC agency staff assigned to the investigation of the complaint covered by this Agreement. This cooperation shall include, but not be limited to, the following:
 - a. making agency officials and employees available for interviews, conferences, and statements under oath with the NC agency at times and places designated by the NC agency, including any employees deemed by the NC agency to be witnesses necessary to furnish information pertinent to the complaint. This includes the obligation to provide official time to these employees and to pay their necessary travel expenses;
 - b. promptly responding to any written or oral requests for information received from the NC agency;
 - c. designating and making available an agency official who is authorized to discuss and enter into a voluntary settlement of the complaint; and
 - d. ensuring that the agency representative:
 - i. not request, or be provided with, any EEO complaint record document during the investigation;
 - ii. not be present when the investigator meets with a witness or a potential witness, except at the express request of the witness. Agency representatives may inform witnesses that they have the right to have an agency representative present when they meet with the investigator; and
 - iii. not speak to witnesses concerning their testimony prior to or during the investigation unless the contact with the agency representative was initiated by the witness.
3. Upon receipt of the investigative file from the NC agency, the agency will notify the complainant in accordance with 29 C.F.R. § 1614.108(f).

August, 2015**Appendix A MD-110**

- a. The agency will reimburse the NC agency, as provided below and in accordance with Parts D and E of this Agreement, actual costs associated with the NC agency's investigation, to include the following:
 - i. Reimbursement to the NC agency for all time spent by the assigned NC agency personnel to investigate the complaint and prepare the investigative file;
 - ii. Reimbursement to the NC agency for all time spent by the NC agency clerical personnel for clerical work related to the investigation of the complaint and preparation of the investigative file; and
 - iii. Reimbursement to the NC agency of standard rate factor (28%) of the salary rates reimbursed in Sections (i) and (ii), above, for benefits and other costs associated with the administration of this Agreement.
- b. The agency will pay, as provided below and in accordance with Parts D and E of this Agreement the following costs:
 - i. Payment for all air, hotel, per diem, and other travel expenses as authorized by the Federal Travel Regulations for travel by the NC agency personnel required to investigate the complaint;
 - ii. Payment for all costs for the services of a qualified court reporter (not an agency employee) to take verbatim affidavits or statements and prepare transcripts in connection with any investigative proceeding;
 - iii. Payment for all copying services of a commercial vendor determined to be necessary to reproduce the investigative file; and
 - iv. Payment for all other actual costs agreed to by agency prior to incurrence of the cost, as may be necessary to the NC agency's investigation of the complaint.

D. NC Agency's Right to Determine Investigative Method

The NC agency reserves the right to determine the investigative techniques and procedures to be utilized in the investigation of the complaint identified in Part A of this Agreement. In the event that the NC agency elects to have verbatim affidavits or statements of the witnesses made at fact-finding conferences or other investigative

Appendix A EEO MD-110**August, 2015**

proceedings, the agency agrees, subject to a ten (10) working day advance request by the NC agency to take all necessary steps to procure the services of a qualified court reporter to transcribe investigative proceedings and to prepare transcripts of those proceedings. **The NC agency shall not arrange and provide court reporter services on a reimbursable basis.** All arrangements shall be made by the agency and all bills for transcription services and transcripts shall be sent directly to the agency. Such bills shall not be sent to the NC agency.

The agency is responsible for ensuring that a requested court reporter is available on the day and at the time and location specified by the NC agency. The original transcript of any proceeding and any copies ordered shall be sent directly to the NC agency within the time frame deemed necessary by the NC agency, but not later than **ten calendar days** from the date of the investigative proceeding.

E. Procedure for Reimbursement

1. Upon completion of the investigation, the NC agency shall present to the agency an itemized billing statement of the costs and expenses and the total hours expended by the assigned NC agency personnel for services related to the investigation of the complaint pursuant to Part C. 4. a. of this Agreement.

As appropriate, the itemized billing statement shall include a standard rate factor for employee benefits and administration (28%, as provided in Part C. 4. a. of this Agreement). The time expended by the assigned NC agency personnel investigating the complaint shall include time spent in a travel status and for other time spent on the investigation either during or after normal duty hours.

The statement shall also include a recitation of the total dollar amount to be reimbursed to the NC agency by the agency. Such amount shall be calculated by multiplying the total hours expended by the official hourly rate of the assigned NC agency personnel based on the individual's official grade and step and in accordance with the applicable federal pay schedule.

Upon presentation of the itemized billing statement, collection shall be effected by the NC agency via the U.S. Treasury's intra-governmental payment and collection system (IPAC) using the following agency accounting data:

Agency Location Code: _____
 Appropriation Code: _____
 DUNS/BPN Number: _____

Collection shall be made no later than **thirty calendar days** of the billing. The NC agency's liaison regarding billing is [Name], [phone number]. The agency's

August, 2015

Appendix A MD-110

liaison regarding this Agreement is _____,
 _____ [please insert name, phone number].

2. In the event that the complaint is settled, withdrawn by the complainant, or canceled by the agency prior to the NC agency's completion of the investigation, the NC agency shall present the agency an itemized billing statement for all hours expended by the assigned NC agency personnel up to such time as the complaint is settled, withdrawn, or canceled and costs incurred by the NC agency.

3. Travel expenses relating to the investigation shall be paid by the agency at General Schedule Administration rates as travel is performed. **Travel shall not be arranged and paid for by the NC agency on a reimbursable basis.** When the agency's designated contact person for the complaint is notified by the NC agency that travel arrangements are necessary with respect to the investigation of the complaint, the contact person shall arrange or cause to be arranged all round-trip travel arrangements to include all airline scheduling and tickets, lodging accommodations at the destination and authorized per diem.

Prior to travel, the agency shall deliver the necessary airline tickets (either by paper or notification of availability of electronic ticket), confirmation of lodging arrangements, and any travel advance as authorized by the Federal Travel Regulations to the designated NC agency personnel. Upon completion of the travel, the NC agency shall present the agency with the necessary information and documents for the agency to prepare a travel claim for the signature of the personnel investigating the complaint. The agency shall promptly process and settle such travel claims.

F. Agreement Effective Date, Term Modification, and Termination

This Agreement will become effective when signed by both the agency and the NC agency and will remain in effect until completion of the investigation and final payment of costs as set forth herein is made by the agency, the complaint is settled, withdrawn by the complainant or cancelled by the agency and final payment of costs as set forth herein is made by the agency. The NC agency and the agency may modify this Agreement by written consent. The NC agency or the agency may terminate this Agreement by giving 30 days advance written notice to the other.

Should a disagreement arise on the interpretation of the provisions of this agreement, or amendments and/or revisions thereto, that cannot be resolved at the operating level, the area(s) of disagreement shall be stated in writing by each party and presented to the other party for consideration. If agreement on interpretation is not reached within thirty (30) days, the parties shall forward the written presentation of the disagreement to respective higher officials for appropriate resolution.

APPENDIX B EEO-MD-110 EEO COUNSELING TECHNIQUES

This attachment can be used to develop or refine counseling techniques when traditional counseling is selected. Below are suggested methods to follow in each step of the counseling process.

EEO counseling consists of the following steps:

1. Preparing for the effort
2. Holding discussions
3. Assessing the situation
4. Determining appropriate resolution technique(s)
5. Using informal resolution technique(s)

In reviewing each step, the EEO Counselor must remember that each informal resolution situation will be different and each EEO Counselor will have his/her own style. There will probably be times when the EEO Counselor will need to make modifications to fit the situation.

A. Meeting with the Aggrieved Person

1. Initial Actions

- a. Upon contact by an aggrieved person, the EEO Counselor should record the date and set an appointment for the initial counseling session to discuss the dispute. Before the initial meeting, the EEO Counselor should advise the aggrieved person of his/her right to be accompanied, advised, and represented by a representative at any stage in the complaint process, including the counseling stage, and explain the reasonable accommodation(s) available throughout the EEO process.

Also, the EEO Counselor must advise the aggrieved person that the aggrieved person will remain anonymous during counseling unless s/he chooses not to remain anonymous. 29 C.F.R. § 1614.105(g).

- b. The EEO Counselor should begin the initial meeting with the aggrieved person by explaining the role of the EEO Counselor. The EEO Counselor should then give him/her an opportunity to explain the problem. The EEO Counselor should create an atmosphere which is open to good communication and dialogue.
- c. The EEO Counselor should listen attentively in order to get an understanding of the issues involved (the facts as the aggrieved person sees them and the action(s) alleged to be discriminatory). Once the aggrieved person has had the opportunity to relate the dispute fully, the EEO Counselor will be in a better position to define the claims(s) and

basis(es) involved, determine if the problem comes under the purview of the anti-discrimination laws, and determine if special procedures apply.

- d. The EEO Counselor should find out if the aggrieved person tried to resolve the problem or brought the problem to the agency's attention before seeking counseling and, if so, how. Part of the problem might be that s/he did not use the appropriate mechanisms to handle the problem prior to seeking counseling and, if properly handled, the problem may be easily resolved.
- e. The EEO Counselor should ask the aggrieved person whether s/he is willing to meet with agency officials.
- f. If the dispute is to be handled under Part 1614, the EEO Counselor should provide the aggrieved person with an overview of informal counseling and the discrimination complaint process under Part 1614, including required notifications and time frames, and answer any questions s/he may have about counseling and the complaint process.
- g. If a dispute involves employment discrimination and the aggrieved person chooses to have his/her case processed by the agency, the EEO Counselor must provide counseling, regardless of whether the EEO Counselor believes the case has merit.

2. Disputes Not Involving Discrimination

After listening to and asking questions of the aggrieved person, it may become apparent that s/he is not alleging discrimination on one or more of the bases protected by the anti-discrimination laws. For example, a person may allege that s/he was the target of reprisal for union activities. In the absence of facts to show that the union activities are related to participation in protected EEO activities or related to opposing discriminatory practices, the EEO Counselor can offer other alternatives for redress.

3. Disputes Involving Prohibited Discrimination

When the dispute involves an allegation of discrimination, the EEO Counselor should proceed with the initial counseling session and do the following:

- a. Determine whether special procedures apply (i.e., mixed case, negotiated grievance procedure, or age). Also, advise the aggrieved individual how the agency's EEO alternative dispute resolution (ADR) process works in counseling and of the aggrieved person's option to choose EEO ADR during the counseling stage of the process where the agency agrees to offer EEO ADR in the particular case.

- b. Find out as many specifics as possible concerning the individual's reasons for believing discrimination has occurred.
- c. Ask the aggrieved person what it would take, in his/her view, to resolve the problem. For example: The aggrieved person alleges race discrimination in an agency's selection of trainees for a computer training program. The EEO Counselor should determine what the aggrieved person will accept to resolve the problem. Suppose the aggrieved person will accept being placed at the top of the agency's waiting list for the next available opening. The EEO Counselor may be able to resolve this dispute by presenting the offer to agency officials as a first step. If the agency agrees, the EEO Counselor has avoided the need to formulate a resolution strategy.

Learning early on exactly what it is that the aggrieved person is seeking may well provide the basis for a prompt resolution and save everyone time.

- d. Make sure the aggrieved person understands that s/he cannot be forced to agree to any proposed solutions or to reach an agreement with the agency and that s/he may file a formal complaint.
- e. Conclude the initial EEO counseling session by making sure that the procedural requirements of 29 C.F.R. Part 1614 were followed and that enough information was obtained to attempt resolution.

B. Meeting with Agency Officials

- 1. Explain the aggrieved person's allegations and summarize the reasons or facts s/he gave for believing there has been discrimination. The aggrieved person's name can be used only if anonymity has been waived in writing.
- 2. Explain or answer any questions about EEO counseling and the federal complaint process. Emphasize that the EEO Counselor's role is to attempt to resolve a dispute. If counseling is successful and resolution is reached, then the need to file a formal complaint is avoided.
- 3. Give the agency an opportunity to present its position on the matters raised by the aggrieved person and ask agency officials to suggest ways the problem might be resolved.
- 4. Try to get a sense of the relationship between the aggrieved person and the responding agency official (assuming the aggrieved person did not request anonymity). Is the relationship hostile, perhaps because of past dealings? Is the agency official interested in meeting with the aggrieved person?

5. Make sure that agency officials understand that the agency cannot be forced to enter into an agreement as a result of EEO counseling.

C. **Considering Factors in Situation**

The EEO Counselor's approach to a given situation will depend on several factors, including the following:

1. Nature of the alleged discriminatory acts and characteristics of the dispute between the parties.
2. Relationship between the aggrieved person and the agency.
3. Whether the EEO Counselor must gather facts beyond those provided by the aggrieved person and the agency.
4. Acceptance by the aggrieved person and the agency of various resolution techniques.
5. The EEO Counselor's willingness to participate in various resolution techniques.

D. **Conducting the Inquiry**

1. **Focus on the Issue(s) and Basis(es)**

The EEO Counselor may be required to interview witnesses and review agency records. An inquiry into an EEO dispute begins when the EEO Counselor attempts to gather information following the initial meeting with the aggrieved person. Upon completion of this initial meeting with the aggrieved person, the claim(s) raised should be clearly defined and the basis(es), *i.e.*, race, color, sex (including equal pay, pregnancy, transgender, and sex stereotypes), religion, national origin, age, reprisal, genetic information, and/or disability, identified. The EEO Counselor should keep in mind that the aggrieved person is best able to assist in defining the issue(s) since s/he is an involved party. The EEO Counselor should not conclude an initial interview with the aggrieved party without a clear understanding of the issue(s) and basis(es).

The direction the inquiry will take depends upon the EEO Counselor's understanding of the issue(s) and basis(es). If the issue(s) involves a personnel action, it will be necessary to identify the action with as much specificity as possible. For example, if the aggrieved person alleges discrimination in a promotion action, the EEO Counselor must at least determine the position applied for, and whether the aggrieved person was qualified, was on the list of best qualified candidates, was interviewed, and whether a selection was made. This information will help to focus the inquiry on the specific portion of the personnel action at issue. The EEO Counselor must include dates to ensure that the dispute

was raised in a timely manner. For those issues that involve actions other than personnel actions documented by an SF-50, the data gathering approach is the same, but gathering information can be more difficult.

2. Data Gathering from Witnesses and Agency Records

- a. Once the claims(s) and basis(es) are defined, the EEO Counselor will need to determine if it is necessary to gather information from sources other than the aggrieved person and agency representative in order to attempt resolution. Potential sources of information could include witnesses and written documentation or records.

If the EEO Counselor determines that witness interviews are necessary, s/he should attempt to interview witnesses who have direct knowledge of a particular situation. The EEO Counselor should limit witness interviews to those persons who can provide information that will help the EEO Counselor better understand the dispute so that resolution can be attempted. Sometimes witness interviews will be the only source of information other than information obtained from the aggrieved person and the agency. Such disputes would include allegations of harassment, either sexual or otherwise, or situations where the issue raised is one of inappropriate conduct or treatment based on a prohibited reason.

- b. Early in the process, the EEO Counselor must determine what documents control the action taken; *i.e.*, whether there is a written agency procedure that must be followed in certain situations. For example, if the issue involves a promotion action, the EEO Counselor should decide if it is necessary to review the applicable promotion plan and, if so, determine where the plan is maintained. The EEO Counselor may be able to obtain needed information from official personnel folders, supervisors' working files, or wherever the personnel action is maintained, such as a promotion folder. By making inquiries, the EEO Counselor will soon learn where such documents are kept and who maintains the records.

When looking at individual records, the EEO Counselor should keep in mind that his/her role is to achieve informal resolution at the lowest possible level, so the number of records reviewed should be kept to a minimum. Only records of the aggrieved person and of those who allegedly received different, more favorable treatment should be examined in an effort to achieve informal resolution.

The EEO Counselor's first contact may be at the personnel office, but the EEO Counselor may determine other sources for obtaining needed documents.

For situations which EEO Counselors encounter often, the following types of issues will require review of certain records:

- (1) Promotion - The promotion folder should include the vacancy announcement, job description, ranking/rating factors, and SF- 171 or applications of at least the aggrieved person and the selectee. The EEO Counselor should notify the personnel office that an EEO inquiry was made concerning a promotion action. The EEO Counselor should request that documents relating to the promotion action, which might ordinarily be destroyed, be retained while the inquiry is pending.
- (2) Time and Attendance - Agency regulations/orders on time and attendance, time and attendance records of the aggrieved person and person(s) the aggrieved person is comparing himself/herself to, and how each is treated.
- (3) Training - Agency procedures for requesting and recommending training, any forms required, and training approved or denied with reason(s).
- (4) Appraisal/Rating - Agency regulations/orders on system implementation and administration, elements and standards, performance requirements, rating of the aggrieved person, and ratings prepared by same rating and/or reviewing official of similarly situated employees.

- c. In reviewing documentation, the EEO Counselor should copy only documents needed in the discussions that will follow the initial inquiry. Notes should be kept, but the identity of comparators should not be revealed to the aggrieved person. Review of documents should be restricted to those that relate to the issue(s) raised by the aggrieved person and are necessary to resolve the concerns informally at the lowest possible level.

EEO counseling will often involve the use of various techniques to bring about early resolution. For example, it may include:

- (1) Holding separate meetings, followed by joint meetings, and then telephone contact to work out details of an agreement;
- (2) Holding a joint meeting to set forth the facts as both sides see them, followed by separate meetings with the parties in which the various possibilities for resolution are explored; or
- (3) Conducting a conference call or separate telephone calls to the

parties during which the dispute is resolved. Care should be taken to protect anonymity unless waived.

E. Developing a Resolution Strategy for 30-Day Counseling Period

1. Joint Meetings (An aggrieved person must agree to a joint meeting)

a. Advantages:

- (1) Gives the aggrieved person and the agency an opportunity to present the facts as each sees them and to clarify points of confusion or misunderstanding.
- (2) Gives the parties an opportunity to explore directly with each other the means for resolving issues underlying the problems.
- (3) Helps the parties establish a more constructive working relationship by getting a better understanding of each other's concerns.
- (4) Enables the parties to "shake hands" on any agreements reached and to work together to put them in writing.
- (5) Allows the EEO Counselor better control of the process, making sure that the parties treat each other as equals and that threats or coercion are not used.

b. Disadvantages:

- (1) Risks a blow-up, a hardening of positions, and increased antagonism.
- (2) May require the parties to call a recess to explore changes in position with others (e.g., counsel).
- (3) May be difficult to schedule.
- (4) Can be costly when the parties are in different locations.

c. The EEO Counselor Should Use This Approach When:

- (1) The parties' positions are based on different facts or different perceptions of the same facts.
- (2) The parties have not had an opportunity to talk with each other or would like a way to reopen discussions.

- (3) The EEO Counselor is confident that s/he will be able to control the joint meeting.

2. Separate Meetings

a. Advantages:

- (1) Allows the EEO Counselor to learn more about the parties' specific concerns and priorities.
- (2) Allows the EEO Counselor to explore alternatives.
- (3) Allows the parties to ask questions they do not want to ask in front of the other party.
- (4) Prevents the possibility of intimidation.
- (5) May be easier to schedule than a joint meeting.

b. Disadvantages:

- (1) May lead the parties to wonder what the EEO Counselor is saying to the other side.
- (2) Unless the resolution reached through separate meetings is re-stated in a joint meeting or through a conference call, the parties do not have the opportunity to talk with each other to make sure each has the same interpretation of the agreement. It is easier for the parties to blame the EEO Counselor for any future misunderstanding about the resolution.
- (3) May put the EEO Counselor in the position of having to pass messages back and forth between parties. Misunderstanding of the messages may occur in their transmission.

c. The EEO Counselor Should Use This Approach When:

- (1) The parties' hostility and antagonism can get in the way of substantive discussions.
- (2) The EEO Counselor needs a better understanding of issues and priorities to be able to control a subsequent joint meeting.
- (3) The EEO Counselor needs to help one or both parties be realistic about possible solutions.

- (4) Scheduling is a problem.
- (5) The parties do not have a current relationship.
- (6) One party is afraid to meet with the other.

3. **Telephone Communication**

a. **Advantages:**

- (1) May be easier to schedule and quicker than joint meetings.
- (2) Less costly.
- (3) For advantages of conference calls, refer to advantages of joint meetings.
- (4) For advantages of separate calls, refer to advantages of separate meetings.

b. **Disadvantages:**

- (1) Impersonal communication resulting from the inability to see how the person is responding to what is said. Harder to gain the rapport needed to explore issues and alternatives.
- (2) For disadvantages of conference calls, refer to disadvantages of joint meetings. Note: It may be easier to hang up the telephone than leave a meeting chaired by an EEO Counselor.
- (3) For disadvantages of separate calls, refer to disadvantages of separate meetings.

c. **The EEO Counselor Should Use This Approach When:**

- (1) The parties are in different locales and are not logistically able to meet face to face.
- (2) The issues are comparatively easy to deal with, such as those based on a misunderstanding or incorrect information.
- (3) The EEO Counselor needs more information to determine if counseling is productive, and scheduling a meeting for this purpose is too time-consuming.

4. Attempting Resolution

When the EEO Counselor has a good grasp of the issues involved and has decided on which EEO counseling technique to use, s/he is ready to attempt resolution. Resolution of an EEO problem means that the aggrieved person and the agency come to terms with a problem and agree on a solution. The EEO Counselor should generally concentrate on resolving individual cases independently; but, when appropriate, the EEO Counselor should ask for assistance from the EEO Director in reaching a solution or correcting a problem. When asking the EEO Director for help, the EEO Counselor should relate what s/he has learned in the inquiry (using the aggrieved person's name only if s/he has given permission) and be prepared to recommend specific action.

There is no set formula for a EEO Counselor to follow in attempting a resolution using the techniques described. The EEO Counselor can attempt resolution by talking with the parties separately or together. The EEO Counselor can talk with them together only if the aggrieved person has given permission; otherwise, they must be spoken with separately.

The following subsections highlight barriers faced when attempting resolution and provide guidance on how to attempt resolution using the EEO counseling techniques of joint meetings, separate meetings, and telephone communication.

5. Obstacles to Informal Resolution

In order to resolve an EEO dispute, the agency and the aggrieved person must agree on a solution. However, only the agency has the authority to resolve an EEO dispute. Like most situations involving two parties, the EEO Counselor can expect obstacles to resolution of EEO disputes. These obstacles can be put up by both parties. The challenge is to overcome these obstacles and work out a solution.

Sometimes obstacles can be overcome by bringing the parties together and having them candidly discuss their attitude toward working out a solution. Other times, obstacles can be lessened by helping the parties explore possible outcomes if the dispute is escalated to the formal complaint level. However, the EEO Counselor must recognize that not all obstacles can be overcome and attempts at resolution should end when it is apparent that the parties are unable to come to an agreement.

a. Some agency obstacles are listed below:

- (1) "There was no discrimination so nothing should be done."
- (2) "The decision at issue was correctly made, procedures were correct, and nothing should be done for the aggrieved person."

- (3) “Resolution will encourage frivolous complaints.”
- (4) “Subordinates and supervisors will lose respect for a manager who settles rather than fights.”
- b. Aggrieved persons may also impose obstacles to successful resolutions of problems. Such obstacles may include:
 - (1) “Discrimination must be punished.”
 - (2) “My manager must be disciplined.”
 - (3) “My manager must apologize.”
 - (4) “No remedy is sufficient.”
 - (5) “The agency must pay punitive damages.”¹

F. Attempting Resolution Using the Joint Meeting Technique

This subsection outlines the steps and activities involved in arranging and conducting joint meetings. The EEO Counselor should make sure the aggrieved person has consented to joint meetings with the agency before arranging a joint meeting.

1. Arranging a Joint EEO Counseling Session

- a. The EEO Counselor should select a location convenient for both parties.
- b. The EEO Counselor should arrange a date and time convenient to both parties, but as soon as possible.
- c. If there does not seem to be a mutually acceptable time for the parties to meet, consider the following questions:
 - (1) Is there a suitable and feasible alternative to the joint meeting? If so, the EEO Counselor should use it.
 - (2) Does the scheduling problem appear to be real, or does it appear to be a delaying tactic?

¹Under the Civil Rights Act of 1991, punitive damages are not available against a federal employer.

- (3) If the scheduling problem appears to be real, how do the parties feel about postponing the meeting? Would a request for an extension make resolution within 30 days impossible?
 - (4) If the scheduling problem is more of a delaying tactic and if there is no suitable alternative to a joint meeting, the EEO Counselor should terminate counseling.
- d. The EEO Counselor should determine who will be attending the meeting and let all parties know who will be present.
- e. The EEO Counselor should let the parties know the way the meeting will be run and suggest ways the parties can prepare for the meeting. Each party should understand that the EEO Counselor chairs the meeting but will not take a position on the merits of either party's position or the merits of any proposed solutions made by the parties, and that the EEO Counselor will not make decisions for the parties.
- f. The EEO Counselor should explain that the purpose of the meeting is to provide each party with an opportunity to present the facts and problems as each sees them, to clarify the issues, to establish points of agreement and disagreement, and to explore the possibility of some form of voluntary resolution acceptable to both parties.
- g. The EEO Counselor should suggest that the parties review the facts of the case as they know them and think about what it would take to resolve the problem as they see it.
- h. The EEO Counselor should point out the confidentiality of discussions to both parties.
- i. If, at the last minute, one of the parties calls to cancel, the EEO Counselor should try to determine if the reason is legitimate. If it appears it is, the EEO Counselor should reschedule the meeting as quickly as possible. If rescheduling becomes a problem, an alternative to the joint meeting **should** be explored. If there is a question about the reason for cancellation or if a party cancels more than one meeting, the EEO Counselor should decide whether informal resolution efforts should be terminated.

2. Conducting a Joint EEO Counseling Session

The EEO Counselor should:

- a. Start the meeting on time.

- b. Make sure everyone at the table knows everyone else and the reason each person is there.
- c. Set the tone and establish ground rules. This is the time to restate the purpose of the meeting, the EEO Counselor's role, and the role and responsibility of the parties.
- d. Work with the parties toward resolution.
- e. Prepare to handle the unexpected.
 - (1) If one party does not appear for the meeting, the EEO Counselor should find out why. Discuss the issues involved with the party who does appear. Try to get a sense of what it would take to resolve the dispute. See if the party is interested in continuing EEO counseling and is willing to reschedule the meeting.
 - (2) If one of the parties is about to break off discussions and leave in a huff, the EEO Counselor should try to calm the parties down and do the following:
 - Help both parties save face by getting them to put aside emotions and address the problem.
 - Talk to the parties separately, if necessary.
 - Not dwell on the incident if discussions resume, but remind the parties that a resolution does not have to be achieved and that it is okay to agree to disagree and to end informal resolution. The EEO Counselor can explain to the parties that a decision to end informal resolution efforts should be a conscious, deliberate one, not one simply made in a moment of anger.
- f. If one of the parties accuses the EEO Counselor of bias and asks the EEO Counselor to leave, the EEO Counselor should leave provided the other party is willing to continue the meeting without the EEO Counselor. If the other party is not willing to continue, the meeting should be adjourned.
 - (1) Later, if appropriate, the EEO Counselor can clarify what happened and try to regain acceptance.
 - (2) Apologize for any misconceptions that might have been created.
 - (3) Decide whether to terminate EEO counseling.

3. Ending the Joint EEO Counseling Session

A joint EEO counseling session can end in one of the following ways:

- a. With a resolution. The EEO Counselor should explain that s/he will draw up a written agreement to be signed by both parties.
- b. Without resolution but with an agreement to keep trying. The EEO Counselor should explain that she will arrange the next meeting. Keep in mind the requirement, pursuant to 29 C.F.R. § 1614.105(d), to conduct the final interview no later than the 30th day of initial contact by the aggrieved person, unless the aggrieved person and the EEO Director (or his delegate) agrees in writing to postpone the final interview. 29 C.F.R. § 1614.105(e).
- c. Without a resolution and with a decision to end EEO counseling. The EEO Counselor should explain to the aggrieved person that s/he will set up a final counseling session at which time the EEO Counselor will explain the next steps.

The EEO Counselor should make sure that each party agrees on the way the meeting is ending.

G. Attempting Resolution Using the Separate Meeting Technique

1. What Should Be Done Up Front

Separate EEO counseling sessions with each party can be used in place of or to supplement joint meetings. If separate meetings are to be used, the parties should know:

- a. That the EEO Counselor will be meeting separately with the parties.
- b. The purpose of the meetings.
- c. That what is said in the meetings is intended to be confidential.
- d. That the EEO Counselor will not serve as an advisor to the parties or comment directly on the substance of a proposal.

2. Handling Special Situations

The following paragraphs describe situations which may occur in separate meetings and suggest ways each situation might be handled.

- a. The agency concedes directly or indirectly that there may be some merit to what the aggrieved person sees as a problem.
 - (1) The EEO Counselor can explore alternative solutions to the problem, for example, suggesting that the agency consult with appropriate officials to review the dispute and merits with a view towards possible resolution. The EEO Counselor should consult with his/her EEO Director to discuss the dispute before a suggestion is made to the agency to consult with legal counsel.
 - (2) The EEO Counselor must be careful not to prejudge a case because a formal investigation may not find the situation to be as the parties described it.
 - (3) The EEO Counselor may assist the agency and the aggrieved person in reaching an acceptable resolution of the dispute.
- b. The aggrieved person concedes directly or indirectly that there may be no merit to the allegations. (S/he thinks that there was unfair treatment, but it may not have been in violation of the anti-discrimination laws and regulations.) In such a case, the EEO Counselor can examine alternative solutions to the problem.
- c. The parties may ask the EEO Counselor for his/her opinion regarding the strength of the allegation. The EEO Counselor should:
 - (1) Inform the parties that s/he cannot comment on the strength or weakness of a given situation.
 - (2) Let the parties judge the strength and weakness of an allegation.

H. Attempting Resolution Using Telephone Communication

The general procedures outlined for joint and separate meetings also apply to telephone conference calls and separate telephone calls to each party. However, at the start of the conversation the EEO Counselor should:

- 1. Ask if anyone else is on the line.
- 2. Remind parties that recording the conversation is prohibited.

APPENDIX C EEO-MD-110 EEO COUNSELOR CHECKLIST

At the initial counseling session, EEO Counselors must advise individuals in writing of their rights and responsibilities. At a minimum those rights include the following:

- a. The right to anonymity.
- b. The right to representation throughout the complaint process including the counseling stage. The EEO Counselor should make clear to the aggrieved person that the EEO Counselor is not an advocate for either the aggrieved person or the agency, but acts strictly as a neutral in the EEO process.
- c. The right to choose between the agency's EEO alternative dispute resolution (ADR) process or EEO counseling, where the agency agrees to offer EEO ADR in the particular case, and information about each procedure.
- d. The possible election requirement between a negotiated grievance procedure and the EEO complaint procedure. See Chapter 4, Section III of this Management Directive.
- e. The election requirement in the event that the claim at issue is appealable to the Merit Systems Protection Board (MSPB), i.e., the dispute is a mixed case. See Chapter 4, Section II of this Management Directive.
- f. The requirement that the aggrieved person file a complaint within 15 calendar days of receipt of the EEO Counselor's Notice of Right to File a Formal Complaint in the event s/he wishes to file a formal complaint at the conclusion of counseling or EEO ADR.
- g. The right to file a notice of intent to sue when age is alleged as a basis for discrimination and of the right to file a lawsuit under the ADEA instead of an administrative complaint of age discrimination, pursuant to § 1614.201(a).
- h. The right to go directly to a court of competent jurisdiction on claims of sex-based wage discrimination under the Equal Pay Act even though such claims are also cognizable under Title VII.¹

¹ Sex-based claims of wage discrimination may also be raised under Title VII; individuals so aggrieved may thus claim violations of both statutes simultaneously. Equal Pay Act complaints may be processed administratively under Part 1614. In the alternative, a complainant in the EPA claim may go directly to a court of competent jurisdiction.

- i. The right to request a hearing before a Commission Administrative Judge, except in a mixed case, after 180 calendar days from the filing of a formal complaint or after completion of the investigation, whichever comes first.
- j. The right to an immediate final decision after an investigation by the agency in accordance with § 1614.108(f).
- k. The right to go to U.S. District Court 180 calendar days after filing a formal complaint or 180 days after filing an appeal.
- l. The duty to mitigate damages, for example, that interim earnings or amounts that could be earned by the individual with reasonable diligence generally must be deducted from an award of back pay.
- m. The duty to keep the agency and the Commission informed of his/her current mailing address and to serve copies of appeal papers on the agency.
- n. Where counseling is selected, the right to receive in writing within 30 calendar days of the first counseling contact (unless the aggrieved person agrees in writing to an extension) a notice terminating counseling and informing the aggrieved of:
 - (1) the right to file a formal individual or class complaint within 15 calendar days of receipt of the notice,
 - (2) the appropriate official with whom to file a formal complaint, and
 - (3) the complainant's duty to immediately inform the agency if the complainant retains counsel or a representative. Any extension of the counseling period may not exceed an additional sixty (60) calendar days.
- o. Where the aggrieved person agrees to participate in an established EEO ADR program, the written notice terminating the counseling period will be issued upon completion of the dispute resolution process or within ninety (90) calendar days of the first contact with the EEO Counselor, whichever is earlier.
- p. That only those claims raised at the counseling stage or claims that are like or related to those that were raised may be the subject of a formal complaint, and how to amend a complaint after it has been filed.

August, 2015**Appendix C EEO MD-110**

- q. The identity and address of the Commission field office to which a request for a hearing must be sent in the event that the aggrieved person files a formal complaint and requests a hearing pursuant to 29 C.F.R. § 1614.108(g).
- r. The name and address of the agency official to whom the aggrieved person must send a copy of the request for a hearing. The EEO Counselor should advise the aggrieved person of his/her duty to certify to the Administrative Judge that s/he provided the agency with a copy of a request for a hearing. See also Chapter 7, Section I of this Management Directive.
- s. The time frames in the complaint process.
- t. The class complaint procedures and the responsibilities of a class agent, if the aggrieved person informs the EEO Counselor that s/he wishes to file a class complaint. See Chapter 8, Section II of this Management Directive.
- u. That rejection of an agency's offer of resolution made pursuant to 29 C.F.R. § 1614.109(c) may result in the limitation of the agency's payment of attorney's fees or costs. See Chapter 6, Section XIII of this Management Directive.
- v. That the agency must consolidate two or more complaints filed by the same complainant after appropriate notice to the complainant. See 29 C.F.R. § 1614.606. The EEO Counselor should advise the complainant that when a complaint has been consolidated with one or more earlier complaints, the agency shall complete its investigation within the earlier of 180 days after the filing of the last complaint or 360 days of the filing of the first complaint and that the complainant may request a hearing before a Commission Administrative Judge at any time after 180 days of the filing of the first complaint.
- w. The proper contact to request any needed reasonable accommodations to navigate the EEO process.

APPENDIX D EEO-MD-110 INFORMATION ON OTHER PROCEDURES

A. Negotiated Grievance Procedures in Collective Bargaining Agreements

1. Aggrieved Person Makes Election

At the initial counseling session, the EEO Counselor must inform the aggrieved person of the possible applicability of the election of remedies provisions from the Civil Service Reform Act of 1978, 5 U.S.C. § 7121(d), concerning negotiated grievance procedures.

- a. In order for an aggrieved person to be covered under 5 U.S.C. § 7121(d), both of the following conditions must be met:
 - (1) S/he must be employed in a federal agency subject to the provisions of 5 U.S.C. § 7121(d); and
 - (2) S/he must be covered by a collective bargaining agreement at the agency where the grievance arises. The agreement must also permit allegations of discrimination to be raised in the negotiated grievance procedure.
- b. If these conditions are met, then the EEO Counselor must inform the aggrieved person that 5 U.S.C. § 7121(d) applies. This means that the aggrieved person must be informed of the requirement that s/he choose one (not both) of the following:
 - (1) a right to have his/her allegations of discrimination addressed in the negotiated grievance procedure of the collective bargaining agreement with a caution that the opportunity to raise allegations of discrimination will be lost if not raised in the grievance process; or
 - (2) a right to have his/her allegations of discrimination addressed under 29 C.F.R. Part 1614.
 - (3) An election to proceed under Part 1614 is indicated only by the filing of a formal complaint, in writing. Use of the pre-complaint process does not constitute an election to proceed under Part 1614.
 - (4) Allegations of discrimination that are raised by employees not covered by 5 U.S.C. § 7121(d) are to be processed as EEO complaints under Part 1614 regardless of whether they are also pursuing a grievance on the same claim (for example, a five-day

suspension from work) under a collective bargaining agreement not covered by 5 U.S.C. § 7121(d).¹

- (a) Under § 1614.301(c), the complaint may be held in abeyance while the grievance on the same claim is processed. The abeyance shall terminate without further notice upon the issuance of a final decision on the grievance. The complaint may be held in abeyance only if the aggrieved is provided written notice of the abeyance.
- (b) The notice of abeyance shall state that the abeyance is instituted pursuant to 29 C.F.R. § 1614.301(c) and that time limits for processing the complaint contained in 29 C.F.R. § 1614.106 and for appeal to the Commission contained in 29 C.F.R. § 1614.402 will also be held in abeyance until fifteen (15) days following the issuance of the final decision on the grievance.
- (c) If the EEO complaint is held in abeyance, the time limits for processing are tolled until a final decision is rendered in the grievance process.

2. Election Is Final

- a. Pursuant to 29 C.F.R. § 1614.301, EEO Counselors are required to inform an aggrieved person that once s/he decides which forum s/he will use the negotiated grievance procedure in a collective bargaining agreement covered by 5 U.S.C. § 7121(d) or Part 1614 the aggrieved person is precluded from using the other forum to address the same claim. This preclusion holds regardless of whether discrimination is actually raised. For example, if an aggrieved person elects to have a dispute involving a claim of discrimination addressed under the terms of a collective bargaining agreement by filing a grievance, s/he could not also file a formal complaint of discrimination under Part 1614 on the same claim. This bar to a subsequent formal EEO complaint would hold true even if the complainant failed to raise the discrimination claim in the grievance, as long as the grievance process could have addressed the discrimination allegations.
- b. If an agency issues a decision rejecting the grievance either because the individual is not covered by the collective bargaining agreement, the collective bargaining agreement does not contain a provision that allows allegations of discrimination to be raised in the grievance process, or the

¹Employees of the U.S. Postal Service, the Postal Regulatory Commission, and the Tennessee Valley Authority are not subject to 5 U.S.C. § 7121(d).

grievance was untimely filed, the agency shall include appeal rights to the Commission. The case shall be processed as a complaint under Part 1614. 29 C.F.R. § 1614.301(b).

3. Appeals

Unless the grievance is a mixed case, the complainant has the right to appeal a final decision on his/her grievance that contains a discrimination allegation to the Commission as provided in subpart D of 29 C.F.R. Part 1614. If the grievance is a mixed case, the complainant has the right to appeal to MSPB.

B. Mixed Cases

1. MSPB Mixed Case Complaints and Appeals

In addition to negotiated grievance procedures, an aggrieved person may present an allegation that constitutes a mixed case. A mixed case is one which alleges discrimination in connection with a claim which is also appealable to the MSPB. Two criteria determine whether a case is a mixed case.

- a. The employee has standing to file an appeal to the MSPB; and
- b. The allegations which form the basis of the discrimination complaint can be appealed to the MSPB.

For information on who can file and the actions that can be appealed to the MSPB, see 5 C.F.R. § 1201.3.

2. Choosing a Forum

If both criteria for a mixed case are met, the EEO Counselor must notify an aggrieved person that s/he must choose the forum in which s/he wishes to proceed. Where a negotiated grievance can also be filed, the EEO Counselor must explain that the aggrieved person must choose to proceed in one of three forums: the MSPB appeal process, the internal EEO process, or the negotiated grievance process (see Section A.1 above).

- a. The EEO Counselor is initially responsible for identifying mixed cases and for advising aggrieved persons of their right to pursue the claim as a mixed case complaint or as a mixed case appeal. The EEO Counselor must identify mixed cases early in order to ensure that aggrieved persons are fully informed of their complaint processing options.
- b. An aggrieved person may choose to raise allegations of discrimination in a mixed case either as an appeal to the MSPB (“mixed case appeal”) or as a discrimination complaint with the agency under 29 C.F.R. Part 1614

(“mixed case complaint”) but not both. Whichever action the employee files first is considered an election to proceed in that forum.

- c. An election to proceed under 29 C.F.R. Part 1614 is made when the aggrieved person files a formal complaint in writing. Use of the EEO counseling process is not an election to proceed under Part 1614.
- d. If an employee chooses to file an appeal with the MSPB on a mixed case, the agency must thereafter dismiss any subsequently filed complaint on the same claim, regardless of whether the allegations of discrimination are raised in the appeal to the MSPB. Upon dismissal, the agency must advise the employee to raise the allegations of discrimination in connection with his/her appeal to the MSPB.
- e. Where the agency disputes MSPB jurisdiction, (for timeliness, coverage, or any other reason), the agency shall notify the complainant that it is holding the mixed case complaint in abeyance until the MSPB Administrative Judge rules on the jurisdictional issue. During this period, all time limitations for processing or filing will be tolled. An agency decision to hold a mixed case complaint in abeyance is not appealable to the Commission.

If the MSPB Administrative Judge finds that the MSPB has jurisdiction over the claim, the agency shall dismiss the mixed case complaint under 29 C.F.R. § 1614.107(a)(4).

- f. If the employee elects to file a mixed case complaint under Part 1614, the agency must process the complaint in a manner substantially similar to any other discrimination complaint, except that the employee is not entitled to a hearing before a Commission Administrative Judge. An aggrieved person’s appeal rights will be to the MSPB, not the Commission. Following a final decision from the MSPB, an aggrieved person may petition the Commission to consider that decision as it pertains to the allegations of discrimination.

3. Constructive Discharge

A discriminatory constructive discharge occurs when the employer discriminatorily creates working conditions that are so difficult, unpleasant, or intolerable that a reasonable person in the aggrieved person’s position would feel compelled to resign. In other words, the aggrieved person is essentially forced to resign under circumstances where the resignation is tantamount to the employer’s termination or discharge of the employee.

Similarly, in coerced or involuntary retirement cases, the aggrieved person alleges that s/he was essentially forced to retire, for example, because of age, and the

August, 2015Appendix D EEO MD-110

retirement decision was not voluntary. Discriminatory coercion or involuntary retirement allegations are, if supported, tantamount to the employer discharging the employee.

a. MSPB dismissal may “unmix” a case

An employee with MSPB appeal rights who alleges that s/he was constructively discharged or coerced into retirement because of discrimination should be advised to file a mixed case complaint or a mixed case appeal. Where the merits of the claim of discrimination cannot be reached for lack of jurisdiction, the case will be considered no longer mixed.

b. An unmixed appeal–referral to counseling

If an aggrieved person files a mixed case appeal with the MSPB and the MSPB dismisses the appeal for lack of jurisdiction, the agency shall promptly notify the individual in writing of the right to contact an EEO Counselor within forty-five (45) days of receipt of this notice and to file an EEO complaint, subject to 29 C.F.R. § 1614.107. The complaint will be processed as a non-mixed case. See 29 C.F.R. § 1614.302(b).

c. A complainant in a case that becomes an “unmixed” complaint after completion of the agency’s investigation and subject to the notice set forth at 29 C.F.R. § 1614.108(f) need not be referred back to EEO counseling and the 29 C.F.R. § 1614.108(f) notice should be issued.

d. When a mixed case complaint is “unmixed” by a finding by the MSPB of no jurisdiction, the individual has a right to elect between a hearing before a Commission Administrative Judge or an immediate final decision. See 29 C.F.R. § 1614.302(b).

C. **Age Discrimination in Employment Act Complaints**

When a person contacts an EEO Counselor with a complaint of age discrimination, the EEO Counselor must make the person aware of two important options:

1. The person may choose to file a formal complaint under 29 C.F.R. Part 1614; or
2. The person may bypass the administrative complaint process in Part 1614 and file a civil action directly in an appropriate U.S. District Court after first giving the Commission not less than thirty (30) days notice of intent to file such action. Such notice must be filed within 180 days after the date of the alleged discrimination. The notice may be mailed to the Commission Headquarters at the following address:

Appendix D EEO MD-110**August, 2015**

Equal Employment Opportunity Commission
 Office of Federal Operations
 Federal Sector Programs
 P.O. Box 77960
 Washington, DC 20013

hand delivered to:

Equal Employment Opportunity Commission
 Office of Federal Operations
 Federal Sector Programs
 131 M Street N.E.
 Suite 5SW12G
 Washington, DC 20507

or sent by facsimile to:

(202) 663-7022

3. Because it is not clear which statute of limitations applies, an aggrieved person choosing to bypass the administrative process should initiate the civil action as soon as possible after the expiration of the 30-day waiting period that follows the notice of intent to sue.

D. Equal Pay Act

1. When a person contacts an EEO Counselor with a complaint of wage-based sex discrimination, the EEO Counselor should advise the person that s/he may file a civil action in a U.S. District Court within two years, or three years if the violation is willful, of the date of the alleged violation, regardless of whether s/he has pursued an administrative action against the agency. The EEO Counselor further should advise the person that the filing of an EEO complaint under Part 1614 alleging a violation of the EPA does not toll the time for filing a civil action.
2. The EEO Counselor further should advise the person that if s/he seeks to allege a violation of Title VII's prohibition against sex discrimination based on the same allegation, s/he must raise the Title VII allegation in the administrative process even if s/he files a civil action on the EPA allegation.
3. The EEO Counselor also should advise the person that notwithstanding the two/three-year limitations period applicable to the current action under the EPA, in order to present an administrative EPA claim, the aggrieved person must contact an EEO Counselor within forty-five (45) days of the date the aggrieved person becomes aware of or reasonably suspects a violation of the EPA.

E. Discrimination Based on Marital Status, Political Affiliation, Status as a Parent**1. Laws Enforced By the Commission -**

Discrimination based on an individual's status as a parent (prohibited under Executive Order 13152) is not a covered basis under the laws enforced by the Commission. However, there are circumstances where discrimination against caregivers may give rise to sex discrimination under Title VII or disability discrimination under the ADA. See [Enforcement Guidance: Unlawful Disparate Treatment of Workers with Caregiving Responsibilities](#).

Federal government employees may file claims of discrimination under the Part 1614 EEO process on any of the bases covered under the laws the Commission enforces, and/or may also utilize additional complaint procedures provided by their agency or described below.

2. **Civil Service Reform Act** - The Civil Service Reform Act of 1978 (CSRA), as amended, also protects federal government applicants and employees from discrimination in personnel actions (see [“Prohibited Personnel Practices”](#)) based on race, color, sex, religion, national origin, age, disability, marital status, political affiliation, or on conduct which does not adversely affect the performance of the applicant or employee -- which can include sexual orientation or transgender (gender identity) status. The [Office of Special Counsel \(OSC\)](#), and the [Merit Systems Protection Board \(MSPB\)](#), enforce the prohibitions against federal employment discrimination codified in the CSRA. For more information, see [Addressing Sexual Orientation and Gender Identity Discrimination in Federal Civilian Employment](#) and OPM’s [Guidance Regarding the Employment of Transgender Individuals in the Federal Workplace](#) and OSC’s [Prohibited Personnel Practices and How to File a Complaint](#).
3. **Executive Orders** - Additionally, federal agencies retain procedures for making complaints of discrimination on any bases prohibited by Executive Orders.

For Example,

Executive Order 13152 states that “status as a parent” refers to the status of an individual who, with respect to an individual who is under the age of 18 or who is 18 or older but is incapable of self-care because of a physical or mental disability, is: a biological parent, an adoptive parent, a foster parent, a stepparent, a custodian of a legal ward, in loco parentis over such individual, or actively seeking legal custody or adoption of such an individual. The Executive Order authorized OPM to develop guidance on the provisions of the Order.

APPENDIX E EEO-MD-110
(SAMPLE)
NOTICE OF POSSIBLE APPLICABILITY OF
5 U.S.C. § 7121(d) TO ALLEGED DISCRIMINATORY ACTION
(29 C.F.R. PART 1614)

Section 1614.105 of the regulations of the U.S. Equal Employment Opportunity Commission requires that upon an aggrieved person's initial contact with the Equal Employment Opportunity (EEO) Counselor, or as soon thereafter as possible, the EEO Counselor shall inform each aggrieved person of the possible applicability of 5 U.S.C. § 7121(d) to the alleged discriminatory action which caused the aggrieved person to seek EEO pre-complaint counseling. Further, the EEO Counselor must communicate to the aggrieved person the substance of 29 C.F.R. § 1614.301 concerning the election of remedies.

Section 1614.301 (Relationship to Negotiated Grievance Procedure) provides as follows:

- (a) When a person is employed by an agency subject to 5 U.S.C. § 7121(d) and is covered by a collective bargaining agreement that permits claims of discrimination to be raised in a negotiated grievance procedure, a person wishing to file a complaint or a grievance on a claim of alleged employment discrimination must elect to raise the claim under either Part 1614 or the negotiated grievance procedure, but not both. An election to proceed under this part is indicated only by the filing of a written complaint; use of the pre-complaint process as described in 29 C.F.R. § 1614.105 does not constitute an election for purposes of this section. An aggrieved employee who files a complaint under this part may not thereafter file a grievance on the same claim. An election to proceed under a negotiated grievance procedure is indicated by the filing of a timely written grievance. An aggrieved employee who files a grievance with an agency whose negotiated agreement permits the acceptance of grievances which allege discrimination may not thereafter file a complaint on the same claim under Part 1614 regardless of whether the agency has informed the individual of the need to elect or of whether the grievance has raised an issue of discrimination. Any such complaint filed after a grievance has been filed on the same claim shall be dismissed without prejudice to the complainant's right to proceed through the negotiated grievance procedure, including the right to appeal to the Commission from a final decision as provided in subpart D of this part. The notice of final action dismissing such a complaint shall advise the complainant of the obligation to raise discrimination in the grievance process and of the right to appeal the final grievance decision to the Commission.
- (b) When a person is not covered by a collective bargaining agreement that permits claims of discrimination to be raised in a negotiated grievance procedure, claims of discrimination shall be processed as complaints under this part.
- (c) When a person is employed by an agency not subject to 5 U.S.C. § 7121(d) and is covered by a negotiated grievance procedure, claims of discrimination shall be

Appendix E EEO-MD-110**August, 2015**

processed as complaints under this part, except that the time limits for processing the complaint contained in 29 C.F.R. § 1614.106 and for appeal to the Commission contained in § 1614.402 may be held in abeyance during processing of a grievance covering the same claim as the complaint if the agency notifies the complainant in writing that the complaint will be held in abeyance pursuant to this section.

Accordingly, if you are alleging discrimination on the grounds of race, color, religion, sex, national origin, age, disability, genetic information and/or reprisal and if you wish to pursue the claim, you must make an election to pursue it either as a complaint with your agency under 29 C.F.R. Part 1614 or in a negotiated grievance procedure, if the following conditions apply:

1. You are an employee of a federal agency subject to the provisions of 5 U.S.C. § 7121(d), and
2. You are covered by a collective bargaining agreement which permits claims of discrimination to be raised in a negotiated grievance procedure.

If those two conditions apply to you, then you must elect one or the other procedure but not both. An election is made as follows:

1. By filing a grievance in writing (whether or not the grievance has raised a claim of discrimination), or
2. By filing a written formal EEO complaint with your agency under Part 1614. Use of the pre-complaint process (counseling) under 29 C.F.R. § 1614.105 does not constitute an election.

If you have further questions concerning the possible applicability of 5 U.S.C. § 7121(d) to you, you should immediately contact a representative of the employee organization which has a negotiated agreement with your agency or ask the EEO Counselor for further information and assistance.

August, 2015Appendix F EEO MD-110

APPENDIX F EEO-MD-110 SAMPLE RESOLUTION AGREEMENT

Aggrieved Person's Name
Aggrieved Person's Address

RE: Resolution of EEO Dispute

Dear [Aggrieved Person]:

This refers to the dispute which you first discussed with me on [DATE] when you alleged discrimination because of [IDENTIFY BASIS OF DISCRIMINATION] when on [IDENTIFY DATE OF ALLEGED DISCRIMINATORY EVENT] the following occurred: [IDENTIFY ALLEGED]_____.

_____ The purpose of this letter is to set out the terms of the informal resolution.

[INSERT TERMS OF RESOLUTION]_____
_____.

If you believe the agency has not complied with the terms of the informal resolution, you may, under 29 C.F.R. § 1614.504, notify the Director of Equal Employment Opportunity in writing within 30 days of the date of the alleged violation, requesting that the terms of the informal agreement be specifically implemented. Alternatively, you may request that the claim be reinstated for further processing from the point processing ceased.

The agency has signed the terms of the resolution as indicated by the signature of the agency official. Your signature and date below will verify your receipt of this letter and will signify your agreement with the terms of the informal resolution of this dispute as set out above. Enclosed is a duplicate copy of this letter. Please date and sign the original and the copy in the spaces provided and return the copy to me for inclusion in the counseling file. I will send a signed copy to the agency. You may keep the original.

Sincerely,

EEO Counselor

Date:

Agency Official

Date:

Aggrieved Person

Date:

Note: Be sure any agreement is put through the proper channels to ensure the agreement is enforceable and any other rights are also written in the agreement.

August, 2015Appendix G EEO MD-110

APPENDIX G EEO-MD-110
NOTICE OF RIGHT TO FILE A DISCRIMINATION COMPLAINT
(SAMPLE)

SUBJECT: Notice of Right to File a Discrimination Complaint

FROM: EEO Counselor

DATE:

TO: (Name of Person Counseled)

This is to inform you that because the dispute you brought to my attention has not been resolved to your satisfaction, you are now entitled to file an individual or class-based discrimination complaint based on race, color, religion, sex, national origin, physical or mental disability, age, genetic information, and/or reprisal. If you file a complaint, it must be in writing, signed, and filed within fifteen (15) calendar days after receipt of this notice, with any of the following officials authorized to receive discrimination complaints:

- Field Installation Head
(Provide name and address)
- Agency Director of Equal Employment Opportunity
(Provide name and address)
- Agency Head
(Provide name, title, and address)
- Other Official(s) as designated by the Agency, for example, an agency Equal Employment Opportunity Officer, the Hispanic Program Coordinator, the Disability Program Coordinator, or the Federal Women's Program Coordinator
[Provide name(s) and address(es)]

A complaint shall be deemed timely if it is received or postmarked before the expiration of the 15-day filing period, or in the absence of a legible postmark, if it is received by mail within five days of the expiration of the filing period.

If you file your complaint with one of the officials listed above (other than the EEO Director), it will be sent to the activity's EEO Director for processing. Therefore, if you choose to file your complaint with any of the other officials listed above, be sure to provide a copy of your complaint to the EEO Director to ensure prompt processing of your complaint.

Management Directive
App. G-1

Appendix G EEO MD-110**August, 2015**

The complaint must be specific and contain only those issues either specifically discussed with me or issues that are like or related to the issues that you discussed with me. It must also state whether you have filed a grievance under a negotiated grievance procedure or an appeal to the Merit Systems Protection Board on the same claims.

If you retain an attorney or any other person to represent you, you or your representative must immediately notify the EEO Director, in writing. You and/or your representative will receive a written acknowledgment of your discrimination complaint from the appropriate agency official.

If you file a complaint, you should name _____ (The EEO Counselor should provide the name and title of the agency head or department head. Agency or department means the national organization, and not just the local office, facility, or department in which the aggrieved person might work.)

(Signature Block)
EEO Counselor

NOTE:

A copy of this notice must be provided to the EEO Director with the EEO Counselor's Report and will be made a part of the complaint file.

You may contact _____ (provide name and contact information) if a reasonable accommodation is needed to navigate the EEO process.

- 1) Membership in protected group
- 2) Complainant treated differently from similarly situated employees not in protected group
 - a) Were compared employees in same chain of command as complainant?
 - b) Were compared employees in same work unit as complainant?

OR

In the absence of comparative evidence, is there other evidence that indicates that the agency's actions may have been motivated by discrimination?¹

OR

Is there direct evidence that shows discriminatory intent?

REBUTTAL

What did the agency say was the reason for its treatment of complainant and the compared employees/applicants? How did the agency respond to other evidence, if any, of discrimination?

PRETEXT

Is there direct or circumstantial evidence that the agency's reason for its treatment of complainant is pretextual?

¹In this model and in the models set forth below, keep in mind the Supreme Court's decision in O'Connor v. Consolidated Coin Caterer's Corp., 517 U.S. 308 (1996), in which the Court ruled that comparative evidence is not an essential element of a prima facie case of discrimination. In the absence of such evidence, the complainant must come forward with other evidence sufficient to create an inference of discrimination.

APPENDIX J-5 EEO-MD-110

**MODEL FOR ANALYSIS
DISABILITY--REASONABLE ACCOMMODATION**

PRIMA FACIE CASE -- Where Complainant Alleges a Failure to Provide a Reasonable Accommodation:

- 1) Does complainant have a physical or mental impairment (for example, deafness; blindness; partially or completely missing limbs or mobility impairments requiring the use of a wheel chair; intellectual disability (formerly termed mental retardation); autism; cerebral palsy; major depressive disorder; bipolar disorder; post-traumatic stress disorder; obsessive compulsive disorder; schizophrenia; cancer; diabetes; epilepsy; HIV infection; multiple sclerosis; and muscular dystrophy) that is readily observable or where there is medical documentation of the impairment?
- 2) Does this impairment, when active and not taking into account any mitigating measures employed by the complainant, substantially limit complainant's ability to perform a major life activity (for example, caring for one's self, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning, and working) or substantially limits a major bodily function? If not readily observable then provide evidence on the activities affected, how they are affected, and the degree to which they are affected (can't do the activity at all, can only do the activity with assistive devices or equipment, can only do the activity for a limited period of time, *etc.*). The question of whether an individual meets the definition of disability under 29 C.F.R. § 1630.(c)(4) should not demand extensive analysis.
- 3) Does the agency know of the complainant's disability?
- 4) Is the complainant otherwise qualified (that is, does the complainant, with or without accommodation, meet the education, skills, and experience requirements of the job)?
- 5) What are the essential functions, (for example, the outcomes that must be achieved by a person in that position, not the methods by which those outcomes are typically achieved) of the complainant's job?
- 6) Did complainant request accommodation? What accommodation, if any, did the complainant suggest?
- 7) What action did the agency take to identify possible accommodation or attempt accommodation? Did the agency make an individualized assessment of the complainant,

Management Directive
App. J-5

Appendix J EEO-MD-110

August, 2015

comparing his/her qualifications and limitations with the job requirements? What actions did the agency take to consider the complainant's suggested accommodations?

- 8) If an accommodation has been identified, will this accommodation enable complainant to perform the essential functions of the job, that is, is it effective?
- 9) Did the agency provide an accommodation?
- 10) If the agency did not provide an accommodation, what reason has the agency given for its refusal?
- 11) If the agency contends that a particular accommodation would impose an undue hardship on its operations, are these reasons sufficient to establish an undue hardship defense given:
 - a) the overall size of the agency's program (the number of employees, number and type of facilities and size of budget);
 - b) the type of agency operation (composition and structure of work force);
 - c) the nature and net cost of accommodation.

Management Directive
App. J-6

August, 2015

**MODEL FOR ANALYSIS
DISABILITY--DISPARATE TREATMENT**

PRIMA FACIE CASE -- Where Complainant Alleges Disparate Treatment

- 1) Does complainant have a physical or mental impairment (for example, deafness; blindness; partially or completely missing limbs or mobility impairments requiring the use of a wheel chair; intellectual disability (formerly termed mental retardation); autism; cerebral palsy; major depressive disorder; bipolar disorder; post-traumatic stress disorder; obsessive compulsive disorder; schizophrenia; cancer; diabetes; epilepsy; HIV infection; multiple sclerosis; and muscular dystrophy) that is readily observable or where there is medical documentation of the impairment?
- 2) Does this impairment, when active and not taking into account any mitigating measures employed by the complainant substantially limit complainant's ability to perform a major life activity (for example, caring for one's self, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning, and working) or substantially limits a major bodily function? If not readily observable then provide evidence on the activities affected, how they are affected, and the degree to which they are affected (can't do the activity at all, can only do the activity with assistive devices or equipment, can only do the activity for a limited period of time, etc.). The question of whether an individual meets the definition of disability under 29 C.F.R. § 1630.(c)(4) should not demand extensive analysis.
- 3) Does complainant have a record or history of a substantially limiting impairment (from which complainant may have recovered in whole or in part)?

OR

Was complainant regarded as having such an impairment (whether or not the complainant has an impairment or a substantially limiting impairment)?

- 4) Does the agency know of complainant's disability?
- 5) Is complainant qualified to perform the essential functions of the job with or without reasonable accommodation:
 - a. Is complainant otherwise qualified (that is, does the complainant, with or without accommodation, meet the educational and experience requirements of the job)?

Management Directive
App. J-7

Appendix J EEO-MD-110

**MODEL FOR ANALYSIS
RELIGIOUS ACCOMMODATION**

PRIMA FACIE CASE

- 1) Does complainant hold a religious belief which conflicts with employment requirements? (Note: only in the rarest of cases, where the evidence appears very clear that the complainant does not sincerely hold the religious belief or does not sincerely engage in the religious practices that may need an accommodation should an investigator challenge the sincerity of the belief or practice.)
- 2) Has complainant informed his/her superior of a conflict?
- 3) Has complainant been penalized for failing to comply with employment requirements?

REBUTTAL

- 1) Belief or practice not of religious nature.
- 2) Agency could not accommodate without undue hardship.

DUTY TO ACCOMMODATE -- RELIGIOUS COMPENSATORY TIME

To allow employees to work additional hours (overtime, compensatory time) to make up for the time required by their personal religious belief (Pub. L. No. 95-390, 5 U.S.C. § 5550a, “Compensatory Time Off for Religious Observances”).

APPENDIX K EEO-MD-110
NOTICE OF INCOMPLETE INVESTIGATION
(SAMPLE)

Subject: Notice of Incomplete Investigation

FROM: [EEO Director]

DATE: [Insert]

TO: [Complainant/Complainant's Representative]

This Notice is to inform you that the investigation of [Agency Complaint No(s)] has not been completed within the 180-day time frame. Therefore, at this time, you have the right to request a hearing before a Commission Administrative Judge or to file a civil action in an appropriate U.S. District Court. You should send your request for a hearing before a Commission Administrative Judge to [insert correct address for the Commission District Office]. If you choose to file a civil action, that action should be styled [Complainant v. Agency Head]. You may also petition the U.S. District Court to appoint an attorney and to authorize commencement of the civil action without payment of fees, costs, or security. Whether your request is granted or denied is within the sole discretion of the U. S. District Judge.

Should you elect to request a hearing or file a civil action, you may have the opportunity to engage in discovery. Discovery is a pre-hearing and pre-trial device you can use to obtain facts and information from the agency. Tools of discovery include, but are not limited to, depositions, interrogatories, requests for production of documents, and requests for admissions. You are required to prove your case by a preponderance of the evidence which means the evidence of discrimination must be of greater weight than the evidence of non-discrimination.

In the alternative, you may wait until the investigation is complete, at which time, you will receive notice of the right to request a hearing before a Commission Administrative Judge or to request an immediate final agency decision. The estimated date of completion for the investigation is [insert date]. If you choose to wait for the investigation to be completed, you need not take any action at this time. The issuance of this Notice does not operate to waive your right to seek sanctions against the Agency for failing to complete the investigation within the required regulatory time frame.

General Requirements

Adobe image over text (searchable portable document format (PDF) – To preserve document integrity while simultaneously providing additional functionality, the Commission requires that all agency submissions – whether for a hearing as directed from an EEOC Administrative Judge, or on appeal pursuant to 29 C.F.R. § 1614.403(g) – be in searchable PDF format. Searchable PDF documents still look like a copy of the scanned/converted document, but behind the image Adobe performs optical character recognition (OCR) to identify the letters, words, and numbers that are present in the image. This functionality allows someone to search for particular words or

Management Directive

App. L-1

VA-18-0457-D-000422

Appendix L EEO MD-110**August, 2015**

terms in the PDF document, and to copy and paste verbatim language from the PDF document into a word processing document.

Saving or converting word processing documents to PDF automatically results in a searchable PDF document. For those documents that are scanned, typically there is a setting on the scanner that changes the output to searchable PDF. An image-only PDF document can also be converted to searchable PDF. See http://blogs.adobe.com/acrobat/acrobat_ocr_make_your_scanned/.

Digital bookmarks – Digital submissions comprised of multiple documents (for example, Reports of Investigation, Administrative Complaint Files, briefs/motions containing exhibits, etc.) must contain hyperlinked bookmarks for relevant/important documents therein. The bookmarks must be named in a manner that describes what the document is (for example, “EEO Counselor’s Report,” “Formal Complaint,” “Exhibit A – 2014 Performance Evaluation,” etc.), rather than a generic tab or table of contents designation. While more detailed bookmarking is always appreciated, the following documents (if applicable) must be bookmarked:

- Formal Complaint
- EEO Counselor’s Report
- Notice of Right to File a Complaint
- Notice of Claims to be Investigated
- Agency’s Partial Dismissal of Claims
- Settlement Agreements
- Prior Appellate Activity
- Report of Investigation Summary
- Exhibits/Evidence in the Report of Investigation
- Notice of Incomplete Investigation
- Pre-Hearing Submissions (including motions, orders, exhibits, and transcripts)
- Hearing Submissions (including motions, orders, exhibits, and transcripts)
- Administrative Judge’s Decision
- Final Agency Decision or Final Order

For instructions on how to add bookmarks to a PDF document, see <https://acrobatusers.com/tutorials/how-do-i-add-bookmarks-to-a-pdf-document>.

Consolidated Submissions on Appeal – Submissions on appeal to the Office of Federal Operations should be consolidated into as few PDF files as possible, mindful of the size restrictions imposed by the Commission’s document submission portal. If a file exceeds the size limitation, it may be divided into multiple files, but there should be as few as possible.

For instructions on how to consolidate multiple PDF files, see <http://www.adobe.com/video/feature-detail/acrobat/axi/merge-pdf-files-into-one->

PRIVACY ACT STATEMENT ON REVERSE SIDE.

EEOC Form 573 REV 2/09
PRIVACY ACT STATEMENT

(This form is covered by the Privacy Act of 1974. Public Law 93-597. Authority for requesting the personal data and the use thereof are given below)

- 1. FORM NUMBER/TITLE/DATE:** EEOC Form 573, Notice of Appeal/Petition, February 2009
- 2. AUTHORITY:** 42 U.S.C. § 2000e-16
- 3. PRINCIPAL PURPOSE:** The purpose of this questionnaire is to solicit information to enable the Commission to properly and effectively adjudicate appeals filed by federal employees, former federal employees, and applicants for federal employment.
- 4. ROUTINE USES:** Information provided on this form may be disclosed to: (a) appropriate federal, state, or local agencies when relevant to civil, criminal, or regulatory investigations or proceedings; (b) a Congressional office in response to an inquiry from that office at your request; and (c) a bar association or disciplinary board investigating complaints against attorneys representing parties before the Commission. Decisions of the Commission are final administrative decisions, and, as such, are available to the public under the provisions of the Freedom of Information Act. Some information may also be used in depersonalized form as a database for statistical purposes.
- 5. WHETHER DISCLOSURE IS MANDATORY OR VOLUNTARY AND EFFECT ON INDIVIDUAL FOR NOT PROVIDING INFORMATION:** Since your appeal is a voluntary action, you are not required to provide any personal information in connection with it. However, failure to supply the Commission with the requested information could hinder timely processing of your case, or even result in the rejection or dismissal of your appeal.

You may send your appeal to:

The Equal Employment Opportunity Commission
Office of Federal Operations
P.O. Box 77960
Washington, DC 20013

Fax it to (202) 663-7022 or submit it through the Commission's electronic submission portal.

TYPE OF ORDER OR EVENT	DOCUMENTATION REQUIRED
Breach of Settlement or Noncompliance with a Final Agency Action (Remand – reinstatement / processing or specific performance of agreement/FAD)	For reinstatement at the point processing ceased - <u>see</u> documentation required for “ Remand [of a] previously dismissed complaint,” For an order of specific performance, submit proof that specific performance was completed.
Civil Action Terminations	A complete copy of the civil action complaint demonstrating that it was filed in a federal court and that it covers the same issues as the compliance matter.
Compensatory Damages (Remand for determination)	FAD determining complainant’s entitlement or non-entitlement to compensatory damages, with appeal rights to the Commission/OFO.
Compensatory Damages (Orders to pay)	Evidence of payment - Copies of any cancelled checks issued; a copy of a print screen showing an electronic funds transfer; or a narrative statement by an appropriate agency official of total monies paid. An appropriate agency official must be one to know with reasonable certainty that the payment was made. Documentation must include total monies paid, to whom, and when.
Disciplinary Action Consideration of	Documentation of oral or written counseling or a copy of any written notice of reprimand, suspension, or other action taken against any of the identified responsible management officials or statement of reason for not taking action. Note: The Commission does not consider training as a form of disciplinary action.
Final Agency Decision (FAD)	Copy of the FAD with appropriate appeal rights.
Personnel Actions (for example Reinstatement, Promotion, Hiring, Reassignment)	Copy of Standard Forms (SF) 50, or comparable notice of official action.
Petition for Enforcement (Terminating compliance)	A petition for enforcement may be requested by a complainant when s/he believes that the Commission’s Order has not been followed. The Compliance Officer will attempt to resolve the matter and may exercise appropriate discretion in having the matter docketed. Compliance will be suspended if the issue is critical to the remaining action(s) and the petition for enforcement is docketed.

**Department of Veterans Affairs
Washington, DC 20420**

**VA Directive 5977
Transmittal Sheet
May 5, 2011**

**EQUAL EMPLOYMENT OPPORTUNITY
DISCRIMINATION COMPLAINTS PROCESS**

- 1. REASON FOR ISSUE:** To revise the Department of Veterans Affairs (VA) Equal Employment Opportunity (EEO) Discrimination Complaints policy.
- 2. SUMMARY OF CONTENTS/MAJOR CHANGES:** 38 United States Code 516, as enacted in Title I, Public Law 105-114, 105th Congress, November 21, 1997, directs the Secretary to provide that the employment discrimination complaint resolution system be established and administered in a fair, objective manner that encourages timely and fair resolution. As a result in 1997 the Office of Resolution Management (ORM) was established. Since its establishment ORM's mission has expanded to a more proactive role in prevention and early resolution of workplace disputes. In 2007 the Secretary transferred management and oversight of the Department's Workplace Alternative Dispute Resolution program to ORM. In addition, ORM augmented its senior management structure and realigned its field operations to improve its organizational performance. Additionally, while Federal law and Equal Employment Opportunity Commission regulations do not cover sexual orientation as a protected basis, the VA has established new procedures for processing complaints of discrimination based on sexual orientation. This directive sets forth revised policies and responsibilities for the processing of EEO discrimination complaints.
- 3. RESPONSIBLE OFFICE:** The Office of the Deputy Assistant Secretary for Resolution Management (08) is responsible for this Directive.
- 4. RELATED HANDBOOKS:** VA Handbook 5977, EEO Discrimination Complaint Procedures.
- 5. RESCISSIONS:** VA Directive 5977, EEO Discrimination Complaints Process, February 7, 2007.

VA Directive 5977

DISCRIMINATION COMPLAINTS

1. PURPOSE. This directive revises Department of Veterans Affairs (VA) policy for processing Equal Employment Opportunity (EEO) complaints of discrimination. It implements Federal law and regulations of the Equal Employment Opportunity Commission (EEOC) at part 1614, title 29, Code of Federal Regulations (C.F.R.), which prohibits discrimination based on race, color, religion, gender (sex), national origin, age (40 years and over), physical or mental disability, and/or reprisal for filing a complaint of discrimination, participating in the EEO process or having opposed prohibited discrimination. Executive Order 13087 prohibits discrimination based upon sexual orientation in the competitive service of the civilian workforce. While Federal law and EEOC regulations do not cover sexual orientation as a protected basis, the VA has established new procedures for processing complaints of discrimination based on sexual orientation. In addition, on November 9, 2010, EEOC promulgated regulation 29 C.F.R. §1635, which implements Title II of the Genetic Information Nondiscrimination Act of 2008 (GINA). Title II of GINA prohibits the use of genetic information in making decisions related to any terms, conditions, or privileges of employment (e.g., hiring, firing, and opportunities for advancement); restricts employers and other entities from requesting, requiring, or purchasing genetic information, with limited exceptions; generally requires employers to keep any genetic information they have about applicants or employees confidential; and prohibits retaliation. Genetic information is a covered basis under the jurisdiction of EEOC. This policy applies to all VA employees, applicants for employment, and former employees.

2. POLICY

a. VA employees, applicants for employment, and former employees shall not be discriminated against based on race, color, religion, gender (sex), national origin, age (40 years and over), physical or mental disability, sexual orientation, genetic information, and/or reprisal for filing a complaint of discrimination, participating in the EEO process, or having opposed prohibited discrimination. Harassment based on the above categories is also prohibited.

b. VA employees, applicants for employment, and former employees will be afforded the right to file a complaint of discrimination under the provisions set out in 29 C.F.R. §1614 and §1615 as it relates to GINA.

c. VA employees, applicants for employment, and former employees will be afforded the right to file a complaint of discrimination based upon sexual orientation as set forth in the Secretary's Policy Statement dated May 13, 2010.

d. The Office of Resolution Management (ORM) will provide timely and quality EEO complaint processing services to all complainants. Complaints will be processed promptly with integrity, trust and impartiality throughout the counseling, investigation, and resolution of EEO complaints.

e. Complainants, their representatives, witnesses, and other participants in the EEO process shall be free from restraint, interference, coercion, discrimination, and reprisal at all stages in

VA Directive 5977**May 5, 2011**

the presentation and processing of a discrimination complaint, including the pre-complaint counseling stage. Allegations of reprisal in discrimination complaints, like EEO complaints themselves, should be brought to the attention of a VA ORM EEO counselor. Retaliation for whistleblowing may be reported to the United States Office of Special Counsel (OSC). Refer to VA Handbook 5977, Discrimination Complaints for information regarding other grievance and administrative processes.

f. Complaints will be resolved at the earliest possible stage. Early resolution of complaints is encouraged to achieve better employee relations, cut administrative costs, and it avoids prolonged litigation. ORM will actively seek to assist in resolving EEO disputes at the lowest level possible by explaining and offering alternative dispute resolution (ADR). If the parties agree to ADR, they will be referred to the ADR coordinator.

g. This Directive does not affect the rights that are granted to unions that have exclusive recognition in the VA. Further, this Directive is not intended to affect the rights of an employee to file:

- (1) A discrimination complaint under this directive.
- (2) A grievance under a negotiated procedure.
- (3) An appeal under the appellate provisions of the Merit Systems Protection Board (MSPB) regulations.
- (4) A complaint with the OSC.
- (5) A complaint with the OIG.
- (6) An action under any other administrative procedure.

h. Sufficient resources in personnel and funds should be made available to ensure the success of VA's EEO Discrimination Complaint Program.

3. RESPONSIBILITIES

a. **Human Resources and Administration (HR&A).** The Assistant Secretary for HR&A (AS/HRA) is designated the Director EEO for VA, and is the principal advisor to the Secretary on EEO policies, programs, and plans. The AS/HRA reports directly to the Secretary.

b. **Office of Resolution Management (ORM).** The complaint resolution process is administered through the Veterans Affairs Central Office (VACO), Deputy Assistant Secretary for Resolution Management (DAS/RM), Associate Deputy Assistant Secretary for Resolution Management (ADAS/RM), District Directors (DD), Executive Operations Director and field offices throughout the country. Each field office has the following positions: Regional EEO Officer/Field Manager, administrative officer, case managers, team leaders, EEO investigators, EEO counselors, investigator/case managers (C2), and program assistants. This group of

May 5, 2011

VA Directive 5977

subject-matter-experts provides seamless and comprehensive EEO complaint processing services.

(1) **Mission.** The ORM's mission is to promote a discrimination-free work environment focused on serving veterans by preventing, resolving, and processing workplace disputes in a timely and effective manner.

(2) **Functional Independence.** Pursuant to 38 U.S.C. §§512 and 516 the DAS/RM has authority to implement and manage the EEOC regulatory requirements and procedures in this Directive and related Handbook 5977.

(3) **Functions.** ORM manages the informal and formal EEO complaint process. All functions performed by ORM are guided by EEOC regulatory requirements with the exception of sexual orientation complaints. Sexual orientation complaints are processed in accordance with the Secretary's Policy Statement dated May 13, 2010. These discrimination complaint processing services include:

(a) Conducting informal counseling during the informal complaint process to try and resolve allegations of discrimination.

(b) Acknowledging receipt of formal complaints of discrimination.

(c) Issuing procedural determinations concerning discrimination complaints.

(d) Managing the EEO investigation process including compensatory damages investigations.

(e) Releasing the investigative file and advisement of complainant's right to proceed in the administrative process. This may include forwarding the investigative files to EEOC for a hearing or to the Office of Employment Discrimination Complaint Adjudication (OEDCA) for a Final Agency Decision (FAD).

(f) Monitoring compliance with OEDCA's or EEOC's decisions. The DAS/RM will notify the appropriate Department official when facilities and/or organizational components resist or fail to comply with these decisions.

(g) Issuing decisions on allegations regarding breach of settlement agreements.

(h) Issuing decisions on claims of dissatisfaction with the processing of an individual's EEO complaint.

(i) Promoting early resolution through the ADR Program.

(j) Recommending to the Assistant Secretary for HR&A the need for a rapid response team on matters solely related to alleged egregious acts of discrimination in which a senior level manager is the responding management official.

VA Directive 5977**May 5, 2011**

(k) Providing Congress with mandated quarterly and annual reports on discrimination complaints filed against senior VA managers. This report is required by 38 U.S.C. §516, which codifies Title I of Public Law 105-114, Veterans' Benefits Act of 1997, dated November 21, 1997.

(l) Posting quarterly statistical data as required by Title III, Section 202 of Public Law 107-174, Notification and Federal Employee Anti-discrimination and Retaliation Act of 2002, dated May 15, 2002 (the NO FEAR Act of 2002), codified at 5 U.S.C. §2301 note.

(m) Providing Congress a mandated Annual No Fear Act Report as required by Title II, Section 203 of the NO FEAR Act of 2002.

(4) **Commitment.** ORM will encourage employees, supervisors, and union officials to use ADR to help resolve workplace disputes as early as feasible, to the maximum extent practicable, in an appropriate and cost-effective manner, and at the lowest organizational level. ORM employees will explain the ADR process. If the parties agree to ADR, they will be referred to an ADR coordinator. ORM supports VA's goal of creating and maintaining a high-performing workforce.

(5) **Conflicts of Interest.** In order for ORM to ensure fairness, integrity, and trust in the processing of EEO complaints, the following procedures to address ex-parte communication and conflicts of interest must be followed. These procedures apply during and after the discrimination complaint process.

(a) When an ORM employee believes that he/she has, or may have, a conflict of interest in an assigned case(s), or otherwise believes that there are facts or circumstances that might create the appearance of a conflict, the employee will immediately report the matter to the Regional EEO Officer/Field Manager or their supervisor. The Regional EEO Officer/Field Manager or supervisor will inquire into the matter and determine whether the case(s) in question should be reassigned to another employee.

(b) If the aggrieved person identifies a perceived conflict of interest concerning the processing of the complaint or any alleged conflict of interest, this matter must be referred to the Regional EEO Officer/Field Manager or supervisor for appropriate disposition.

(c) If a conflict of interest is discovered after the issuance of a counselor's report, report of investigation, or procedural determination, the Regional EEO Officer/Field Manager will investigate the matter, and take appropriate action, which may include rescission of the report or determination. When appropriate, disciplinary action will be taken.

(d) If the complainant or agency representative creates a conflict of interest with his or her official or collateral duties, the Regional EEO Officer/Field Manager will give the representative notice of the possible conflict and afford the individual an opportunity to respond. The Regional EEO Officer/Field Manager will investigate the matter, including the arguments of interested parties, and forward all documentation to the jurisdictional (DD who will issue a decision on the matter.

May 5, 2011

VA Directive 5977

(e) If an ORM employee initiates a complaint of discrimination, OEDCA will assume responsibility for the complaint. Counseling and investigation will be conducted by a contractor.

(6) **Customer Service/Due Professional Care Standards.** ORM is committed to providing quality customer service. ORM employees will have a thorough knowledge of the applicable laws, regulations, directives, and handbooks related to the processing of EEO complaints. ORM employees will conduct themselves in a highly professional manner at all times and will avoid the appearance of compromising the integrity of the EEO complaint process. Employees shall avoid personal involvement with aggrieved persons, complainants, responsible management officials, witnesses, representatives, or any other participant in the EEO complaint process. Any conduct of an ORM employee that is believed to be inappropriate should be reported, in writing, to the ORM Regional EEO Officer/Field Manager or supervisor. They will investigate the matter and take corrective and/or disciplinary action where appropriate. ORM employees will provide the best possible service to VA and its employees. ORM employees will comply with all applicable Ethics in Government regulations and ensure that their conduct is consistent with ORM's Due Professional Care Standards. This requires high standards of honesty, objectivity, diligence, and loyalty. ORM employees will apply competent skills, exercise sound judgment and exhibit professional demeanor in performing their duties. The exercise of due professional care requires independence, professional proficiency, planning, and quality outcome. ORM's Customer Service/Professionalism Standards require that ORM staff will:

(a) Provide accurate and timely information to employees, applicants and former employees, witnesses, designated representatives, as well as responding management officials as to their rights and responsibilities in regard to the EEO process.

(b) Listen to, understand and document concerns of employment discrimination on the part of employees, applicants and former employees.

(c) Guarantee anonymity during the EEO counseling stage, unless a waiver of anonymity is secured.

(d) Provide timely notices to involved parties throughout the EEO complaint process.

(e) Process EEO complaints in a fair, objective and timely manner.

(f) Provide procedural determinations of all EEO complaints in accordance with 29 C.F.R. §1614.

(g) Conduct thorough and competent investigations of all EEO complaints.

(h) Treat all customers with dignity.

(i) Assist and try to resolve all complaints of employment discrimination at the lowest possible level.

VA Directive 5977**May 5, 2011**

(j) Keep employees, applicants, former employees and designated representatives advised of the status of their complaint by adequately communicating with them.

(k) Maintain confidentiality of information in accordance with applicable privacy and security laws, regulations, directives, and handbooks.

(7) ORM Principal Roles.

(a) **Deputy Assistant Secretary for Resolution Management (DAS/RM).** The DAS/RM serves as the principal advisor to the Assistant Secretary for Human Resources and Administration (AS/HRA) regarding the EEO complaint process in the VA. The DAS/RM has been delegated authority to supervise and control the operation of the administrative EEO discrimination complaint processing system within the VA. Pursuant to 38 U.S.C. §516, 38 U.S.C. §512, and 38 C.F.R. Parts 2 and 15, the DAS/RM exercises exclusive authority to establish and modify discrimination complaint processing procedures. The DAS/RM's responsibilities are:

1. Administering the VA's discrimination complaint process in a manner that ensures prompt, equitable, and efficient processing of discrimination complaints.
2. Formulating and implementing department-wide policies and procedures to ensure the integrity, effectiveness, and impartiality of the complaint system.
3. Ensuring sufficient resources are allocated to achieve ORM's objectives.
4. Working closely with VA officials in resolving EEO complaint issues and raising awareness of management responsibility in this area.
5. Providing technical assistance and guidance to management and employees on all aspects of EEO complaint processing and recommending solutions to matters giving rise to discrimination complaints.
6. Utilizing departmental data to conduct special studies, research, and analysis to enhance the EEO complaint program.
7. Administering VA's Alternative Dispute Resolution program.
8. Formulating and implementing organizational wide ADR policies and procedures.
9. Providing executive leadership over ORM, its offices, and employees.

(b) **Associate Deputy Assistant Secretary for Resolution Management (ADAS/RM).** The ADAS/RM serves as the principal advisor to DAS/RM in formulating and implementing department-wide policies and procedures to ensure the integrity, effectiveness, and impartiality of the complaint processing system and the ADR program. Other responsibilities are:

May 5, 2011

VA Directive 5977

1. Developing VA's resolution management's programs initiatives in accordance with EEOC regulations and maintaining the control of administrative EEO discrimination complaint processing within the VA.

2. Providing direct oversight over the senior management team which is comprised of the Executive Operations Director, ADR Director, Eastern Operations Director and Western Operations Director.

3. Supervising the effectiveness of the complaint processing system, providing technical guidance and program management advice to the agency and to ORM management.

4. Overseeing the development and implementation of procedures, standards, and guidelines related to complaint processing.

5. Assuming all duties and authorities of the DAS in an acting capacity when necessary.

(c) **District Directors (DDs).** ORM has offices in various locations throughout the United States responsible for a full range of EEO services for the VA. To effectively manage field operations, two regions (east and west) are managed by the DDs. The Eastern DD provides leadership and technical guidance to the counselor, investigator and case manager national team leaders (NTL). The Western DD provides leadership and oversight to the Centralized Investigations Division (CID). Other responsibilities are:

1. Serving as the principal advisors to DAS/RM and ADAS/RM in formulating and implementing department-wide policies and procedures to ensure the integrity, effectiveness, and impartiality of EEO complaint processing.

2. Managing ORM's field operations and providing leadership, oversight and direction to ORM's Regional EEO Officers/Field Managers. The two regions have three field offices each and a host of satellite offices.

3. Determining ORM field operations program goals and objectives including identification of field program requirements and monitoring of accomplishments.

4. Monitoring the workload of field operations and advising the DAS and ADAS on staffing needs to assure the effectiveness of the complaint processing system.

5. Providing technical guidance and program management advice to the administrations and ORM management.

6. Assisting in the development and implementation of procedures, standards, and guidelines related to complaint processing and the development of training for EEO counselors, EEO investigators, and EEO case managers.

7. Providing direction based on ORM's mission and strategic plan.

VA Directive 5977**May 5, 2011**

(d) **Regional EEO Officer/Field Manager.** The Regional EEO Officer/Field Manager is responsible for the full scope of EEO complaint processing and operations within the assigned geographical area and reports directly to the respective DD. The Regional EEO Officer/Field Manager is responsible for:

1. Formulating and directing organizational operations and serving as the principal ORM spokesperson in his/her service area.
2. Working closely with VA field facility management officials in raising awareness of their responsibilities and facilitating achievement of the objectives of the discrimination complaint program.
3. Ensuring sufficient resources are allocated to achieve ORM's objectives within his/her jurisdiction and supervising ORM personnel assigned to their geographical area.
4. Ensuring that all EEO complaints are processed in accordance with applicable laws, regulations, directives, and handbooks.
5. Reviewing and signing procedural determinations regarding the acceptability of EEO complaints for further processing.
6. Ensuring that all employees receive the appropriate level of training required by EEOC regulations.
7. Briefing employees on OPC's Annual and Semi-Annual Spin-Off Reports.
8. Taking prompt and appropriate corrective action to address any program or individual deficiencies that impact the processing of EEO complaints.
9. Creating and maintaining an effective work environment that supports teamwork, is free of discrimination, and promotes diversity.
10. Assigning EEO investigations to individual investigators after receiving notification of assignments from the CID.
11. Ensuring timely compliance with all EEOC and OEDCA remands.

(e) **Administrative Officer (AO).** AO serves as a non-supervisory assistant to the Regional EEO Officer/Field Manager with the exception that they supervise the duties and responsibilities of the Program Assistants. The AOs are responsible for:

1. Serving as a technical office advisor and quality control officer for complaint processing.
2. Providing daily oversight and direction to ensure the smooth processing and quality assurance of the field office operations.

May 5, 2011

VA Directive 5977

3. Assigning and reviewing work products, and providing technical assistance to field office staff.
4. Reviewing and evaluating procedural decisions and forwarding them to the Regional EEO Officer/Field Manager.
5. Serving as Acting Field Manager in the absence of the Regional EEO Officer/Field Manager.
6. Performing the duties of a case manager.

(f) **National Team Leaders (NTL).** The NTL for counselors, investigators, and case managers are key elements in ensuring standardization of the EEO complaint process. The NTLs are responsible for:

1. Maintaining consistent application of procedures.
2. Conducting regular meetings with their respective discipline team leads or designated representatives to discuss any procedural or policy changes that have or will take effect, any issues and/or areas of concern related to specific processes, and other items related to the effective and efficient processing of EEO complaints.
3. Interacting with the DDs, CID, Regional EEO Officers/Field Managers, AOs, team leaders and case managers, to ensure standardization of EEO complaint processing procedures.
4. Coordinating with the OPC Chief, Quality Assurance (QA) Manager, Learning Resources Chief, their respective DDs, and other key officials to develop policies, procedures, or guidelines for processing EEO complaints.
5. Ensuring a seamless transition of complaint processing responsibilities between each discipline.
6. Consulting with EEOC, OEDCA, and the VA Office of General Counsel (OGC) to ensure the VA is in compliance with established case law and regulations.
7. Serving on task forces and committees impacting the complaint process.

(a) **Counselor National Team Leader (NTL).** The Counselor NTL serves as the technical expert for EEO counseling and is responsible for the oversight of the quality and timeliness of the informal counseling process. Other responsibilities are:

(b) **Case Manager National Team Leader (NTL).** The Case Manager NTL serves as the technical expert and advisor for formal complaint processing and is responsible for oversight of the technical aspects of case manager activities.

VA Directive 5977**May 5, 2011**

(c) **Investigator National Team Leader (NTL).** The Investigator NTL serves as the technical expert for EEO investigations and is responsible for oversight of the technical aspects of the investigative process.

(g) **Counselor Team Leader (TL).** The Counselor TL assigns work, provides technical assistance and guidance to the counselors under their jurisdiction. The Counselor TL is responsible for mentoring, coaching, facilitating, consensus-building and providing technical support to counselors. The Counselor TL is also responsible for reviewing each counseling report to insure it is prepared in accordance with standards and regulatory requirements.

(h) **EEO Counselor.** The EEO Counselor is responsible for providing counseling services. These services are:

1. Providing information to the complainant.
2. Collecting sufficient information to frame the claim(s) and basis(es).
3. Gathering information and affording both the aggrieved person and VA an opportunity to achieve an informal and mutually acceptable resolution of the complaint.
4. Conducting a limited inquiry for the purpose of jurisdictional questions.
5. Seeking resolution of disputes at the lowest possible level.
6. Educating and explaining the benefits of the ADR process.
7. Advising aggrieved individuals of other forums where they can pursue their concerns, i.e., OSC, the negotiated grievance process, MSPB, etc.
8. Preparing administrative files and counselor reports for every complaint counseled.

(i) **Case Manager.** The Case Manager has major oversight responsibilities for the processing of formal complaints of discrimination in a specified geographical location. The case manager is responsible for:

1. Acknowledging receipt of formal complaints, preparing procedural decisions, releasing investigation files, issuing the advisement of rights letter to complainants, and responding to correspondence and EEOC hearing requests.
2. Reviewing, researching, analyzing, and preparing complex, and technically sound procedural determinations, final agency decisions regarding the dismissal of EEO complaints.
3. Ensuring that procedural requirements are met and supported with relevant case law and precedents.
4. Serving as the principal point of contact for an assigned geographical area.

May 5, 2011

VA Directive 5977

5. Serving as back-up and handling overflow assignments from the counselor and investigator team leaders.

6. Providing technical assistance and mentoring to counselors, investigators, and other staff, in the absence of team leaders.

7. Ensuring the completeness and accuracy of all data entered into the Complaints Automated Tracking System (CATS).

8. Communicating regularly with management officials, EEO Managers and employees.

9. Resolving issues relating to processing complaints of discrimination.

(j) **Investigator Team Leader (TL).** The Investigator TL is responsible for providing support and guidance to the investigators under their jurisdiction. The Investigator TL is responsible for mentoring new investigators. The Investigator TL is responsible for reviewing each investigation prior to its release to insure the investigation has been completed according to standards and regulatory requirements.

(k) **EEO Investigator.** The EEO Investigator is responsible for investigating accepted claims of prohibited employment discrimination including:

1. Taking statements from witnesses under oath.

2. Gathering pertinent documents and records, and conducting whatever inquiry is necessary.

3. Collecting various data and information sources to obtain, analyze, and present facts.

4. Resolving discrepancies by conducting additional fact-finding, additional witness testimony, and reviewing additional documents.

5. Compiling an investigative file and preparing an investigative report, summarizing all relevant facts so a decision-maker can determine the relative likelihood that unlawful discrimination did or did not occur as alleged.

(l) **Investigator-Case Manager (C-2).** The Investigator-Case Manager (C-2) performs a combination of case manager and investigator duties as identified in paragraph (7)(i) and (7)(k) above. This position is designed to seamlessly adapt to workload fluctuations.

(m) **EEO Program Assistant.** The EEO program assistant provides administrative support to the Regional EEO Officer/Field Manager and field office staff. Duties include tracking and mailing correspondence, monitoring fund control points, and travel expenses, greeting visitors, answering the telephone and distributing mail. Program assistants are also responsible for

VA Directive 5977**May 5, 2011**

distributing and monitoring correspondence to ensure appropriate distribution and timely action.

(n) **Centralized Investigations Division Manager (CID).** The CID manager facilitates timely assignment and completion of investigations. They work with ORM Regional EEO Officers/Field Managers in assigning cases pending investigation in ORM's national inventory to ORM investigators. The CID manager also reviews and approves contract investigations for release. The CID provides oversight to the Defense Logistics Agency, Document Services who reproduces, digitizes and distributes investigative files.

(o) **Document Management Specialists (DMS).** The DMS provides assistance to the CID Manager in the triaging and assigning of cases to investigators. The DMS monitors and tracks responses to initial document requests made by ORM case managers.

(p) **Alternative Dispute Resolution (ADR) Director.** The ADR Director advises the DAS/RM, the Deputy Dispute Resolution Specialist (DRS) for Workplace ADR, on VA's nation-wide Workplace ADR program. The ADR Director is responsible for:

1. Developing VA-wide policy and overseeing VA organizations' policy and efforts to manage conflict and resolve workplace disputes.
2. Collaborating with and advising VA organizations and stakeholders, such as Human Resources, OGC, and VA employee national and local labor unions, in designing, developing, and implementing ADR programs department-wide.
3. Representing VA on interagency work groups and committees.
4. Coordinating department-wide training on conflict management and ADR.
5. Tracking, monitoring, and reporting the quantity and quality of VA's Workplace ADR activities.
6. Identifying key issues affecting the use of ADR, assessing participation in ADR, cost savings, timeliness, satisfaction, and providing regular reports to the DAS/RM and appropriate VA officials on key ADR metrics.

(q) **Executive Operations (EO) Director.** The EO Director is responsible for oversight of five programs that provide support to ORM field offices to improve the organizational performance of ORM. The support programs include OPC, QA, External Affairs, Organizational Climate Assessment Program and Customer Service. The EO Director is responsible for:

1. Formulating and implementing organizational wide policies and procedures related to complaint processing.

May 5, 2011

VA Directive 5977

2. Issuing department-wide policies and procedures to ensure the integrity, effectiveness, and impartiality of the complaint processing system.
3. Overseeing of customer service satisfaction surveys.
4. Developing policy and procedural guidance related to the Privacy Act and the Freedom of Information Act.
5. Maintaining of the discrimination complaints tracking system.
6. Providing oversight of organizational climate assessment program activities which measures employee satisfaction in the workplace.

(r) **Organizational Climate Assessment Program (OCAP) Manager.** The OCAP Manager is responsible for ORM's Organizational Climate Assessment Program and assists the VA in early resolution and complaint prevention. The OCAP Manager measures employee satisfaction in the workplace by conducting surveys, focus groups, interviews, review of complaints, grievances, human resource and EEO data. The OCAP Manager identifies significant systemic patterns, trends and problems in the work environment and provides the DAS/RM an Assessment Report, which is distributed and used by appropriate VA officials to improve VA's work environment.

(s) **Office of Policy and Compliance (OPC) Chief.** The OPC Chief has responsibility for developing policies and procedures for processing complaints of discrimination. Other responsibilities are:

1. Issuing VA and ORM Directives, Handbooks, and Bulletins to ensure that policies and procedures for processing EEO complaints meet the requirements of the law and regulations. All policies, procedures, or guidelines for processing EEO complaints are coordinated with QA, Learning Resources Chief, the DDs, NTLs, and other key officials.
2. Providing technical guidance ORM-wide to preserve the integrity of the EEO complaint processing system.
3. Preparing mandated quarterly and annual Senior Manager Reports and the Annual No Fear Act Report.
4. Monitoring agency compliance with OEDCA, EEOC decisions and EEO settlement agreements.
5. Evaluating OEDCA and EEOC remand decisions to discern patterns or trends and providing guidance to ORM Field Offices.
6. Rendering decisions on breach of settlement agreement claims and claims of dissatisfaction with the processing of EEO complaints.

VA Directive 5977**May 5, 2011**

- 7. Supervising compensatory damage investigations.
- 8. Conducting preliminary inquiries into age discrimination claims when a notice of intent to sue has been served on the agency.
- 9. Responding to all Congressional inquiries, Secretary inquiries and controlled correspondences related to EEO matters.

(t) **Directive Management Officer (DMO).** The DMO develops, controls, reviews, publishes, distributes and maintains ORM directives, handbooks and policies with oversight by the OPC Chief. The DMO provides advice and assistance to ORM personnel on developing, coordinating, reviewing, approving, and maintaining a Document Management System (DMS).

(u) **Internal Complaints EEO Manager.** The Internal Complaints EEO Manager serves as principal advisor to the ADAS/RM on all ORM EEO related matters. This includes managing the processing of complaints filed by ORM employees. Other responsibilities are:

- 1. Coordinating with the OEDCA Point of Contact to ensure that all ORM internal complaints are processed in accordance with EEOC regulations, the ORM Internal Complaints SOP, and the Memorandum of Understanding between ORM and OEDCA.
- 2. Receiving initial contact information from ORM employees, former employees and applicants for employment.
- 3. Forwarding initial contact information to the OEDCA POC for assignment to a contractor.
- 4. Entering internal complaint data into the applicable data fields and screens and scanning all relevant complaint documents into CATS.
- 5. Providing the ADAS/RM and DDs with a monthly status report of all ORM internal complaints.
- 6. Coordinating with the ADR Director, complainants, management officials, and other necessary parties to facilitate ADR participation.
- 7. Monitoring compliance with ORM settlement agreements and orders from OEDCA and the EEOC Office of Federal Operations.

(v) **Quality Assurance (QA) Manager.** The QA Manager is responsible for ORM's Quality Assurance Program, Data Management, and CATS. The QA Manager is responsible for:

- 1. Establishing assessment guidelines for reviewing and documenting compliance with applicable laws and regulations regarding the processing of EEO complaints.
- 2. Evaluating each field office to ensure complaints are processed in accordance with EEOC and ORM guidelines.

May 5, 2011

VA Directive 5977

3. Developing and reporting on key reporting mechanisms to the DAS/RM, ADAS, key management officials in ORM, internal VA customers, and EEOC.

4. Providing the EO Director with necessary reports, evaluations, and/or trend data regarding ORM compliance with applicable laws and regulations governing the processing of EEO complaints.

5. Overseeing CATS and its daily operation of the system which includes making modifications for improvement and maintaining quality control over operation of the system.

(w) **Customer Service Manager.** The Customer Service Manager is responsible for tracking, reviewing, analyzing, and monitoring internal and external customer satisfaction throughout ORM. The data collection process includes quantitative and qualitative data gathering processes and is utilized to gather information from VA employees that participate in the EEO complaints process, EEO Managers, VA Senior Managers, OEDCA, OGC (to include the Office of Regional Counsel), EEOC and other management officials who may provide responses during the EEO complaint process. Other responsibilities are:

1. Evaluating workload statistics, customer service surveys and focus group's outcomes to define ORM's internal and external customer service goals and performance standards. This evaluation may be targeted towards a specific region, field facility or situation.

2. Developing detailed plans, goals, and objectives for short and long-range implementation and administration of a complete, comprehensive, and consistent internal and external Customer Service Program.

3. Providing the DAS/RM a customer service assessment report, which is distributed to appropriate VA officials.

4. Providing EEO policy guidance, advisory assistance, and support to VA managers in the development of strategic planning for applying customer service principles to core business areas.

5. Ensuring reliability, creditability, and validity that improves job satisfaction for all ORM employees and improves customer satisfaction levels for all ORM stakeholders.

(x) **External Affairs Officer.** The External Affairs Officer serves as the agency liaison to the Department of Justice for external complaints filed with the agency under Title VI of the Civil Rights Act of 1964 and other similar statutes, such as Title IX of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973 and various Presidential Executive Orders. The External Affairs Officer is responsible for:

1. Serving as ORM's Freedom of Information Act and Privacy Act Officer.

VA Directive 5977**May 5, 2011**

2. Advising the DAS and ADAS on public affairs issues relating to the media and special interest group contacts.

3. Providing guidance to ORM employees regarding The Freedom of Information Act under 5 U.S.C. §552, as amended by Public Law Number 104-231, 110 Statute 3048.

4. Assisting the DAS and ADAS/RM with presentation and development of speeches.

5. Coordinating the publication and dissemination of ORM's annual report and newsletter.

(y) **ORM Ombudsman.** Under charter by the DAS/RM, ORM's Ombudsman is responsible for:

1. Providing confidential advice and assistance to ORM managers and staff concerning workplace issues affecting employee productivity, job satisfaction or related processes or policies.

2. Formulating recommendations to ORM officials concerning workplace processes and policies affecting employee satisfaction and morale.

3. Providing, and collaborating with the ADR Director to provide, ADR services to VA organizations or employees requesting assistance with workplace issues and making recommendations on resolving such issues.

4. Providing, with the consent of the DAS/RM; ombudsman services under memorandum of understanding to VA organizations requesting such services.

5. Serving as a member of the ADR Council.

6. Performing other collateral duties in ORM not inconsistent with the Ombudsman's duties as requested.

(z) **Budget Officer.** The Budget Officer manages the budget operations for ORM in Headquarters and field operations areas. The primary responsibilities include budget formulation, execution, justification and presentation. The Budget Officer serves as ORM's Publications Control Officer. The Budget Officer will review, ensure adequate funding is available, approve, and order all printing and publications for ORM.

(aa) **Human Resource (HR) Manager.** The HR Manager serves as the principal advisor to the DAS/RM and ADAS/RM, and other ORM supervisors and managers on all human resources related matters, including employee relations matters. The HR Manager is the Position Management Coordinator for ORM. This includes coordinating with the Central Business Office, Workforce Management and VA Central Office in executing personnel actions and activities as it relates to position management, classification, and recruitment and placement activities. The HR Manager is responsible for ensuring policies and procedures are in place to ensure consistency in HR Programs.

May 5, 2011

VA Directive 5977

(bb) **Information and Technology (IT) Manager.** The IT Manager serves as technical advisor to the DAS on IT issues affecting ORM. The IT Manager plans, evaluates, develops, operates and maintains ORM's automated voice, video teleconferencing, and IT systems. The IT Manager provides technical oversight, formulates policy on IT systems and develops effective, timely, cost-efficient and innovative program plans and operating systems. The IT Manager evaluates the effectiveness of ORM's IT administrative policies, procedures, management practices, and recommends appropriate adjustments or alternative methods. The IT Manager keeps the DAS/RM, ADAS/RM, and other ORM supervisors and managers advised of significant IT activities impacting ORM and coordinates with Headquarters.

(cc) **Learning Resources Chief.** Learning Resources Chief serves as VA's and ORM's key official for all national EEO training programs that focus on the EEO complaint resolution process. The Learning Resources Chief responsibilities are:

1. Administering EEO training programs.
2. Developing project plans.
3. Analyzing learning needs of EEO professionals.
4. Designing course curriculum.
5. Developing training content and product marketing plans.
6. Implementing training initiatives to include, mandatory EEOC training.
7. Evaluating EEO training initiatives and programs.

c. Office of Employment Discrimination Complaints Adjudication (OEDCA)

(1) Issues FADs for individual, class action, and sexual orientation complaints, that do not go to EEOC for hearing.

(2) Issues FADs on compensatory damages and attorney fees, in consultation with OGC concerning the reasonableness of an attorney's hourly rate for the geographic location involved.

(3) Issues FADs, to include breach of settlement claims where the complainant is an ORM employee, and other cases where complaint processing efficiency will be best served by OEDCA.

(4) Issues final agency actions, within forty (40) calendar days of receipt of an EEOC hearing decision.

(5) Initiates follow-up reviews for possible disciplinary action in sustained intentional discrimination and retaliation complaints.

VA Directive 5977**May 5, 2011**

(6) Remands complaints to ORM for supplemental investigation and, where administratively appropriate, remands complaints for procedural decisions.

(7) Issues the procedural decision on complaints of discrimination filed by ORM employees when bases for dismissal may exist in whole or in part.

d. Office of General Counsel (OGC). The OGC assists the Secretary and the AS/HRA in conducting reviews of cases where there has been a finding of discrimination. The OGC represents VA at EEOC hearings, in administrative appeals of final agency decisions or orders and requests for reconsideration of EEOC decisions. The OGC assists the United States Attorney in defending lawsuits filed against the VA and advises VA officials on EEO related matters and issues formal opinions relating to the VA's EEO program. The OGC consults with OEDCA concerning the reasonableness of an attorney's hourly rate for cases where there is a finding of discrimination and the payment of attorney fees has been granted.

e. Office of Inspector General (OIG). As specified in the Memorandum of Understanding dated August 22, 2006, with OGC, OIG may serve as the VA representative where an EEO complaint has been filed by an applicant for employment and current and former OIG employees. These responsibilities are:

(1) Assisting the Secretary and the AS/HRA in conducting reviews of cases where there has been a finding of discrimination.

(2) Representing the VA at EEOC hearings, administrative appeals of final agency decisions or final actions, and requests for reconsideration of EEOC decisions.

(3) Assisting the United States Attorney in defending lawsuits filed against the VA.

(4) Advising VA officials on EEO related matters.

(5) Consulting with OEDCA regarding award of attorney's fees.

f. Under Secretaries, Assistant Secretaries, and Other Key Officials. Under Secretaries, Assistant Secretaries, and Other Key Officials are responsible for eliminating discriminatory policies and practices, and maintaining a discrimination-free workplace. They are responsible for:

(1) Taking an active role to resolve EEO complaints and workplace disputes.

(2) Publicizing and permanently posting on official bulletin boards, the name, telephone number, and location of the regional ORM Field Office and the time limits for contacting an EEO counselor, Union, and MSPB with allegations of prohibited discrimination.

(3) Ensuring compliance with orders issued by the OEDCA, EEOC, and EEO related cases from the MSPB, Labor Arbitrators, and the Federal Labor Relations Authority (FLRA).

May 5, 2011

VA Directive 5977

(4) Appointing an EEO manager should be consistent with the needs and availability of resources. This could be on a full-time, part-time or collateral duty basis, as appropriate.

(5) Implementing an ADR program in accordance with VA Directive 5978, Alternative Dispute Resolution.

(6) Establishing policies that facilitate the appropriate use of ADR, especially mediation, to help resolve EEO complaints and workplace disputes and designate an ADR coordinator to manage the ADR program.

g. EEO Manager. The role of the EEO manager is vital in support of ORM's mission. It is important for a person to be designated to serve in this capacity. In any case where an EEO Manager believes that he/she has, or may have, a conflict of interest with, or otherwise believes that there are facts or circumstances that might create the appearance of a conflict, the employee will immediately report the matter to their supervisor. The EEO Manager is responsible for:

(1) Providing assistance in efforts to resolve claims during the informal stage, and after the filing of formal complaints of discrimination.

(2) Obtaining facility assistance to ORM during EEO complaint processing.

(3) Coordinate EEOC hearing activities with Regional Counsel.

(4) Monitoring compliance with all settlement agreements and orders issued by the OEDCA, EEOC, and EEO related cases from the MSPB, Labor Arbitrators, and the FLRA.

(5) Notifying management if compliance falters.

(6) Coordinating with ORM's OPC Chief and appropriate management officials to bring compliance actions to closure.

h. Alternative Dispute Resolution (ADR) Coordinator. ADR coordinators are located throughout the VA and are responsible for the daily operation of ADR programs under their jurisdiction and collaborating with affected offices in providing effective ADR services and processes.

i. Dispute Resolution Specialist (DRS). The AS/HRA is the DRS for VA. The DRS is appointed pursuant to the Administrative Dispute Resolution Act (ADRA), the VA DRS is the senior official within the VA responsible for the development and implementation of the VA's ADR program.

j. Management Officials and Supervisors. Managers and supervisors will provide equal opportunity to all employees within their operations by promoting an environment free of discrimination. They will not reprise against, coerce, restrain or interfere with an employee's

VA Directive 5977**May 5, 2011**

rights to use the EEO complaint process; and will cooperate with EEO officials and administrative judges by providing, upon request, information in connection with the processing of an administrative complaint.

k. **Employees.** Employees at all levels are responsible for providing support to the overall equal employment program as appropriate in the performance of their official duties. They will treat all individuals in a fair and equitable manner without discrimination. They will cooperate with EEO officials and administrative judges by providing, upon request, information in connection with the administrative processing of an EEO complaint.

**Department of Veterans Affairs
Washington, DC 20420**

**VA Handbook 5977
Transmittal Sheet
February 7, 2007**

**EQUAL EMPLOYMENT OPPORTUNITY
DISCRIMINATION COMPLAINTS PROCESS**

1. REASON FOR ISSUE: This handbook establishes the Department of Veterans Affairs (VA) Equal Employment Opportunity (EEO) discrimination complaint procedures as described in VA Directive 5977, EEO Discrimination Complaints.

2. SUMMARY OF CONTENTS/MAJOR CHANGES:

a. This handbook introduces procedures for carrying out the VA's EEO discrimination complaint processing requirements contained in various Federal laws and regulations of the Equal Employment Opportunity Commission (EEOC) at part 1614, title 29, Code of Federal Regulations (CFR), that prohibit discrimination based on race, color, religion, gender (sex), national origin, age (40 years and over), physical or mental disability, and/or reprisal. This handbook will be revised to reflect changes made by the EEOC in its regulations and/or through the issuance of new or revised directives. This handbook applies to processing discrimination complaints for VA employees, applicants for employment and former employees.

b. VA regulations, guides, bulletins and memoranda published over the years and used by VA to process EEO complaints of discrimination as required by Public Law 105-114.

c. This handbook identifies responsibilities for processing Equal Employment Opportunity (EEO) complaints of discrimination filed by VA employees, former employees and applicants for employment who believe that they have been subjected to employment discrimination.

d. Procedures for insuring that complaints of discrimination are either resolved at the earliest possible stage; or processed promptly and impartially, without restraint, interference, coercion, discrimination and/or reprisal is set forth in this handbook.

3. RESPONSIBLE OFFICE: The Office of Resolution Management (ORM), Deputy Assistant Secretary (DAS) is responsible for the material contained in this Handbook.

4. RELATED DIRECTIVE: VA Directive 5977, Discrimination Complaints.

5. RESCISSIONS: Portions of VA Manual MP-7, Equal Opportunity in the Department of Veterans Affairs, Part I, Internal Equal Employment Opportunity Program, Chapter 1, EEO General Provisions and Internal EEO Program and all of Chapter 3, Discrimination Complaints, December 14, 1984.

CHAPTER 1 - INTRODUCTION

1. PURPOSE. This handbook establishes Department of Veterans Affairs (VA) procedures for processing Equal Employment Opportunity (EEO) complaints of discrimination. These procedures apply to all VA employees, applicants for employment and former VA employees.

2. BACKGROUND

a. Several anti-discrimination statutes prohibit workplace discrimination in the Federal government. They include Section 717 of Title VII of the Civil Rights Act of 1964, as amended, which prohibits discrimination based upon race, color, national origin, gender (sex), and religion; Section 501 of the Rehabilitation Act of 1973, which prohibits discrimination based upon disability; Section 15 of the Age Discrimination in Employment Act (ADEA), which prohibits discrimination based upon age (40 years and over); and the Equal Pay Act which prohibits gender (sex) based wage discrimination. These statutes provide the basis for the implementation of EEO programs designed to eliminate prohibited discrimination and to make whole, employees who have been victimized by discrimination.

b. The Equal Employment Opportunity Commission (EEOC) under Reorganization Plan No. 1 of 1978 was given responsibility for and supervision of EEO programs within the Federal government. Through regulations found at 29 CFR §1614, and Management Directive 110, the EEOC has published policy and the framework for an EEO complaint resolution process that provides a foundation upon which Federal agency programs must be based. EEOC directives establish requirements for all aspects of a complaint resolution process including EEO counseling, complaint acceptability activities, complaint investigation and ultimately through hearings and appellate decisions, the standards by which the existence or nonexistence of discrimination may be determined. While the substantive protections for applicants and Federal employees are the same as those for all other workers, the procedures differ from the procedures that govern the private sector.

c. Within the VA, the EEO complaint resolution process was established through a combination of administrative reorganization and statutory direction. 38 USC 516 directs the Secretary to provide that the employment discrimination complaint resolution system be established and administered in a fair, objective manner that encourages timely and fair resolution. To meet these objectives, a 1997 administrative reorganization produced the Office of Resolution Management (ORM), which is managed and directed by the Deputy Assistant Secretary (DAS) for Resolution Management (RM).

d. The following chapters of this handbook provide VA procedures for processing EEO complaints of discrimination. Appendix E contains a diagram of the EEO discrimination complaint process and the time-frames associated with various stages of the process.

February 7, 2007

VA Handbook 5977

CHAPTER 2 – THE INFORMAL PRE-COMPLAINT EEO COUNSELING PROCESS

1. THE INFORMAL PRE-COMPLAINT EEO COUNSELING PROCESS. The discrimination complaint process is divided into two stages: the Pre-complaint (Informal EEO Counseling) Process, and the Formal Complaint Process. The purpose of the pre-complaint process is to gather information and afford both the aggrieved person and VA an opportunity to achieve an informal and mutually acceptable resolution of the matter. EEO counseling is a regulatory prerequisite to filing a formal complaint of discrimination and the employee, under any circumstances, cannot waive it.

2. INITIAL CONTACT. An aggrieved person who believes that he/she has been discriminated against on the basis of race, color, religion, gender (sex), national origin, age, disability or reprisal and intends to invoke the EEO complaint process, must consult an ORM EEO counselor prior to filing a complaint. The EEO counselor contact must be within 45 days of the date of occurrence of the alleged discriminatory event, or if a personnel action, within 45 days of the effective date of a personnel action. An aggrieved may contact an ORM EEO counselor in person at their local ORM office, or by calling ORM's toll free telephone number at: 1-888-RES-EEO1 (1-888-737-3361), or for the hearing impaired contact ORM via TTY/TDD – 1-888-626-9008. Counseling is a centralized ORM function; therefore, the aggrieved person is not allowed to select an EEO counselor of his/her choice. However, under certain circumstances, the aggrieved may request the appointment of another EEO counselor. The decision will be made at the discretion of the Regional EEO Officer/Field Manager. This usually occurs when there is, or appears to be, a conflict of interest.

a. Waiver of 45-day contact. EEOC regulations permit, under certain circumstances, the tolling or waiver of the 45-day contact requirement where untimely contact has occurred. Generally, forgiveness of the requirement will be granted where the VA cannot establish that it provided actual or constructive notice (e.g., via the posting of ORM posters throughout a facility) of the time limits to an individual; where the individual did not know or reasonably should not have known that discrimination occurred; where, despite due diligence, the individual was prevented from contacting a counselor due to circumstances beyond the individual's control, or for reasons considered sufficient by the agency.

b. Obtaining General Information. During initial contact, the following preliminary information is solicited from the aggrieved person to complete an Initial Referral Form: (a) date of contact; (b) name; (c) VA facility involved in the alleged discriminatory act and whether the caller is an employee, former employee of the facility, or an applicant for employment; (d) position title and grade; (e) telephone number where the individual can be reached; (f) home telephone number and address; (g) name, address, and telephone number of the individuals representative; (h) claim and basis(es) for the initial contact. The referral form is assigned to an EEO counselor for further processing. EEO counseling begins immediately or not later than two (2) business days from the initial contact. In emergency situations or if an EEO counselor is not available, an Intake Specialist will speak with the aggrieved person to secure the basic preliminary information. The date the aggrieved person contacts ORM, is considered the initial contact date.

3. RIGHTS AND RESPONSIBILITIES. The initial interview between an aggrieved person and the EEO counselor shall be arranged as soon as possible after initial contact. At the initial interview with the aggrieved person, the EEO counselor reviews all rights and responsibilities with the aggrieved verbally, and in writing. The EEO counselor will discuss the following information with the aggrieved:

a. **Anonymity.** The aggrieved person has a right to remain anonymous. If the aggrieved person elects to waive his/her right to anonymity, the counselor will obtain the waiver of anonymity in writing. The aggrieved person is informed that he/she can only remain anonymous during the informal counseling stage and that anonymity does not continue once a formal complaint has been filed.

b. **Representation.** The aggrieved person is entitled to representation during the EEO process. The aggrieved party may select anyone to represent them, as long as his/her representative's position with the VA does not present a conflict of interest. The EEO counselor may not be the complainant's representative. The aggrieved person must provide in writing the name, title, address and telephone number of any representative (attorney or non-attorney) he/she designates to represent him/her in this matter. If a representative or attorney is designated, all documents pertaining to the EEO complaint will be submitted directly to the representative or attorney with a copy to the aggrieved person.

c. **Alternative Dispute Resolution.** The aggrieved person is advised that the claim(s) may be addressed through the agency's Alternative Dispute Resolution (ADR) program or EEO counseling, but not both. The EEO counselor will explain that ADR is available during the informal and formal complaint process. The aggrieved person is informed that he/she, as well as the agency's participation in ADR is voluntary and if they agree to participate in mediation, the counseling period may be extended up to but not more than 90 calendar days from the initial contact date. The EEO counselor explains to the aggrieved that if they participate in ADR they will have to exercise an election option, and decide whether to continue pre-complaint resolution through the ADR process or through the traditional counseling process. The EEO counselor will explain the differences between the two options. If the aggrieved and management do not agree to ADR, the EEO counselor will assist the parties to facilitate resolution of the dispute as part of his or her counseling duties. If the aggrieved and management agree to participate in the ADR process, the EEO counselor will assist with the coordination of ADR. See item 13 for Information about the ADR process.

d. **Bargaining Unit Employee.** Bargaining unit employees have the right to file a grievance on issue(s) through a negotiated grievance procedure that accepts issues of discrimination. However, they may not file both an EEO complaint and a grievance on the same matter(s). Whichever the aggrieved person files first, a formal EEO complaint or step 1 grievance will be considered an election to proceed in that forum. A Bargaining unit employee may also seek redress through other administrative processes. Appendix C contains Other Grievance and Administrative Processes.

February 7, 2007

VA Handbook 5977

e. Non-Bargaining Unit Employee. Non-Bargaining unit employees may not file a negotiated grievance, they may seek redress through other administrative processes. Appendix C contains Other Grievance and Administrative Processes.

f. Merit Systems Protection Board (MSPB). An aggrieved person may file an EEO complaint or an MSPB appeal, but not both on the same matter(s). Whichever is filed first (a formal EEO complaint or an MSPB appeal) will be considered an election to proceed in that forum.

g. Termination of Counseling. Within thirty (30) days of the aggrieved person's first contact with an EEO counselor, they have the right to receive a written notice terminating counseling and informing them of the right to file a formal complaint (unless prior written consent has extended the time period). The aggrieved person also has the right, at the conclusion of counseling, to file a formal complaint within fifteen (15) calendar days of receipt of the written Notice of Right to File a Discrimination Complaint.

h. Age Discrimination. An aggrieved person, who is age 40 years or older, may file an age based EEO discrimination complaint, or a civil lawsuit in Federal District Court. If the aggrieved person files a lawsuit in Federal District Court, without filing a formal EEO complaint, the lawsuit will terminate the processing of the EEO discrimination complaint. If, the complainant chooses to file an EEO discrimination complaint, he/she must complete the EEO discrimination process. If the complainant chooses to file a lawsuit he/she must first notify the EEOC of the intent to sue, at least 30 calendar days before the filing of the lawsuit at: 1801 L Street, NW, Washington, DC, 20507. Lawsuits must be filed within 180 calendar days of the date of the alleged discriminatory act.

i. Equal Pay Act/Sex-based Wage Discrimination. If an aggrieved person is complaining about sex-based wage discrimination (being paid less than a person of the opposite sex, even though they are doing equal work), they may file a formal EEO complaint under the discrimination complaint process, and/or a lawsuit in Federal District Court, pursuant to the Equal Pay Act. The civil action must be filed within a court of competent jurisdiction within two years, or, if the violation is willful, within three years of the date of the alleged violation of the Equal Pay Act. The filing of an EEO discrimination complaint does not toll the time for filing a civil action. Recovery on back wages is limited to two years prior to the date of filing suit, or to three years if the violation is willful; liquidated damages in an amount equal to lost back wages may also be awarded. An aggrieved individual may file an EEO discrimination complaint, and may file directly in a court of competent jurisdiction without first providing notice to the EEOC or exhausting the EEO discrimination complaint process. Filing of a lawsuit will terminate processing of the EEO discrimination complaint.

j. Right to Request Final Agency Decision (FAD) or a Hearing. If an aggrieved person files a formal EEO complaint and it is accepted, they have the right to request an immediate FAD from VA, or a hearing before an EEOC Administrative Judge, after 180 days has passed from the date they file a formal complaint, or after completion of the investigation, whichever comes first. If a complainant requests a FAD, their request should be addressed to the ORM Regional EEO Officer. If a complainant requests an EEOC hearing, their request should be

addressed to the local EEOC District Office, with a copy to the ORM Regional EEO Officer.

k. Right to File a Lawsuit in Federal District Court. A complainant has the right to file a lawsuit in Federal District Court at any time after 180 calendar days has passed from the date the formal complaint was filed or up to ninety (90) calendar days after receipt of a FAD from VA.

l. Right to File An Appeal. A complainant has the right to file an appeal of a FAD to EEOC within thirty (30) calendar days of receipt of the FAD. Even if a complainant chooses to appeal a FAD to EEOC, they will still have the right to file a lawsuit in Federal District Court at any time after 180 calendar days has passed from the date of filing of such an appeal, or up to ninety (90) calendar days after receiving an appellate decision from EEOC Office of Federal Operations. Special circumstances regarding the right to file a lawsuit in Federal District Court exist for Age and Equal Pay Act/Sex-based Wage Discrimination. Please refer to item 3(g) and 3 (h) of this chapter.

m. Class Action Complaint. If an aggrieved person believes that other individuals, similarly situated to them, have suffered from the same kind of discrimination, they may have the right to file a class action complaint. A class action complaint must allege that an individual has been individually harmed by a VA personnel management policy or practice that has similarly harmed numerous other class members. The aggrieved person must also allege that there are questions of fact that are common to, and typical of, the claims of the class. EEOC requires that a qualified class agent represent the class. The representative must be fair and adequately protect the interest of the class.

n. Cooperation. An aggrieved individual has the responsibility to cooperate with VA during the processing of a complaint. If an aggrieved person files a formal EEO complaint, he/she must keep the VA informed of a current address; retrieve certified and over night mail associated with the complaint, and cooperate with the investigator. If an aggrieved person files an appeal with EEOC, they must provide the ORM Regional EEO office copies of the appeal.

o. Back pay. If a complaint involves back pay, the complainant has a duty to mitigate damages by actively seeking and/or retaining employment. Interim earnings or amounts, which could be earned by a complainant with reasonable diligence, generally will be deducted from back pay.

p. Consolidation of Two or More Complaints. If a person has filed two or more complaints, and the Notice of Advisement of Rights was not issued, ORM is required to consolidate them after appropriate notice. When a complaint has been consolidated with one or more earlier complaints, ORM shall complete the investigation within 180 days after the filing of the last complaint or within 360 days of the filing of the first complaint. If the complainant requested a hearing, the EEOC Administrative Judge may consolidate multiple complaints.

q. Additional Issues. An aggrieved person must limit any formal EEO complaint to the matters discussed with the EEO counselor, or to like or related matters. If an individual wishes

February 7, 2007

VA Handbook 5977

to amend a previously filed complaint, only matters that are like or related to the claim(s) in the pending complaint may be added. In order to protect an individual's rights, an aggrieved person should discuss all claims with the EEO counselor before they file a formal EEO complaint.

r. Agency Offer of Resolution. If an aggrieved person rejects an agency offer of resolution made pursuant to 29 CFR §1614.109(c), it may result in the limitation of the Agency's payment of attorney fees or costs.

s. Claims Outside the EEO Forum. For a complaint filed on the basis of sexual orientation, genetic information, parental status, political affiliation or any other forum falling outside of the EEO process, the aggrieved person should contact their local human resource department for guidance. Some of the alternative procedures for processing these types of complaints are as follows: an appeal to MSPB, a grievance under a negotiated grievance procedure, agency grievance procedures, a complaint filed with the Office of Special Counsel (OSC), or a complaint filed with the Office of the Inspector General (OIG). Appendix C contains Other Grievance and Administrative Processes.

4. NOTIFICATION TO UNDER SECRETARIES/FACILITY DIRECTORS. The EEO counselor forwards to the Under Secretary, Assistant Secretary, Facility Director, and Other Key Official the Notice of Counseling letter to inform him/her that an employee has contacted ORM for EEO counseling. This letter contains specific information concerning the claim(s) raised, the basis(es) of the claim(s), the organizational unit in which the complaint arose, the resolution sought, and the person named as the Responding Management Official (RMO). In cases where the aggrieved person does not waive anonymity, the information ORM will release is limited to protect this right. Under Secretaries/Facility Directors are responsible for notifying ORM if the aggrieved person has filed an MSPB appeal or a grievance through a negotiated grievance procedure on the same matter that has been brought to counseling. This information is crucial in determining acceptability should a formal complaint be filed on the matter or claim being counseled.

5. IDENTIFYING THE CLAIM(S). In an attempt to resolve the entire workplace dispute, the EEO counselor obtains relevant information regarding the claim(s), basis(es), and supporting evidence from the aggrieved person. When the claims and supporting evidence are identified, the sum total of that information may be helpful in the informal resolution of the matter by focusing the parties on the major areas of conflict or disagreement. In the event that informal resolution is not obtained, this information may be used during the formal complaint process to render a proper procedural decision to accept or dismiss the formal complaint in whole or in part.

6. IDENTIFYING THE REMEDY/CORRECTIVE ACTION. The EEO counselor identifies what remedy/corrective action the aggrieved person seeks.

7. IDENTIFYING RESPONDING MANAGEMENT OFFICIALS RMO(S) AND WITNESSES. When possible, the counselor will identify the Responding Management Official (RMO) as well as other witnesses to the events at issue.

8. CORRELATION OF DISCRIMINATION. The EEO counselor requests the aggrieved person to provide reason(s) he/she believes the action was motivated by prohibited employment discrimination.

9. RIGHTS SPECIFIC TO EEO BASIS(ES). In cases involving age and the Equal Pay Act, the EEO counselor provides the aggrieved person verbally and in writing of his/her rights related to these bases.

10. PROCEDURES FOR RELATED PROCESSES. During the EEO interview, the EEO counselor explains jurisdictional issues.

a. For claims that may also be filed through a negotiated grievance procedure or appealed to the Merit Systems Protection Board (MSPB), the counselor provides the aggrieved person verbally and in writing his/her rights related to these processes. For claims related to the various Executive Orders and other related processes, the counselor advises the aggrieved individual of the appropriate forum. Appendix C contains additional information regarding Other Grievance and Administrative Processes.

b. For claims that the agency has violated or has not performed a specific term(s) of a settlement agreement, the counselor does not initiate counseling on the breach allegation. The Regional EEO Officer or designee notifies the aggrieved person in writing, of the process to address his/her allegation that the agency breached the settlement agreement.

11. INFORMAL INTERVIEW. During the informal interview, the EEO counselor schedules interviews with the RMO, the aggrieved person, and the witnesses. This is necessary not only to develop information to aid in informal resolution or acceptability determinations, but also to provide valuable information for the investigator, if a formal complaint is filed. An EEO counselor will determine whether the case warrants an on-site interview by considering the type, number, and complexity of claims, in consultation with the ORM Regional EEO Officer or designee, after collecting the above information. If an on-site visit is appropriate, the counselor may contact the facility EEO/Diversity Program Manager/Liaison/Specialist for assistance with pertinent logistical arrangements, such as a private office with a telephone, to conduct the counseling. An EEO counselor will interview the aggrieved person, witnesses, and the RMO(s) and gather pertinent documentation and/or statistical data.

a. The counselor will interview witnesses and the RMO(s) that the aggrieved person identifies as having information about the alleged discrimination. The RMO's and witnesses are entitled to representation during the EEO process. An RMO or witness may select anyone to represent them, as long as his/her representative's position with the VA does not present a conflict of interest. Interviews will be limited to those individuals with relevant information concerning the claim(s) raised. Individuals identified by the aggrieved person and/or RMO who would provide unduly repetitious information may not be interviewed. However, the counselor will note their names in the counselor's report as having been named as witnesses and the reason(s) they were not interviewed.

February 7, 2007

VA Handbook 5977

b. The counselor will inform the RMO of all claims against him/her; advise him/her of their rights and responsibilities; and allow the RMO to respond to each claim, suggest witnesses and documents, offer underlying reasons the aggrieved individual filed the complaint, and suggest possible resolution of the claim(s).

c. The counselor will obtain and review copies of all pertinent documentation and/or statistical data.

12. RESOLUTION. The primary focus of EEO counseling shall be informal resolution of the dispute. In this regard, all parties to the dispute shall cooperate with the EEO counselor in reaching an acceptable solution to the problem by considering all possible alternatives. If the matter cannot be resolved at the lower levels (i.e. first or second level supervisor), the EEO counselor is authorized to bring the matter to the attention of the Under Secretaries, Assistant Secretaries, and Other Key Officials and the local ORM Field Office Manager for appropriate assistance. If settlement is likely, the aggrieved person and the facility will negotiate and prepare a written settlement agreement. All resolutions must be in the form of a written settlement agreement, signed by the aggrieved person and the Under Secretaries, Assistant Secretaries, and Other Key Officials or designee and must identify the claim(s) being settled and the EEO case number. A copy of the settlement agreement must be provided to ORM for inclusion in the administrative file. It is advised that Regional Counsels review settlement agreements prior to the agency signing the agreement. Examples of Settlement Agreements and Settlement Agreement Tips can be found on ORM's website at <http://vaww.va.gov/orm>.

13. ELECTION OF ADR. If ADR is agreed upon, the EEO counselor must obtain and complete the information needed to determine the bases, claims, and timeliness before referring the dispute to ADR. If ADR is elected the pre-complaint processing period will be extended up to 90 calendar days. Upon agreement to ADR, the EEO counselor is responsible for the following information:

a. **Mediation Agreement.** The counselor obtains an agreement to mediate which is signed by both parties. After the agreement is signed, the election to proceed through ADR becomes the final election of choice. The counselor informs the complainant that since they elected ADR they will only gather enough information on the basis(es) and claim(s) to assist the agency in making a procedural decision in the event an ADR resolution is not reached. A prototype of a mediation agreement can be found on ORM's website at <http://vaww.va.gov/orm>.

b. **ADR Extensions.** If efforts to resolve the complaint extend beyond the 90-day period allowed by EEOC regulations, the EEO counselor will issue the required Notice of Right to File a Complaint by the 90th day. While mediation continues, the aggrieved may file a formal EEO complaint within 15 days of receipt of the notice.

c. **Resolution through ADR process.** If the dispute is resolved during ADR, the EEO counselor will document the resolution by including a copy of any written settlement agreement with the EEO Counselor's Report.

d. **Conclusion of ADR Process.** If resolution is not achieved during ADR, at the conclusion of ADR or by the 90th day, the counselor will schedule a final interview. During the final interview the counselor will review the claim(s) and basis(es) and issue a Notice of Right to File a Discrimination Complaint.

e. **Counselor's Report.** If resolution is not achieved during ADR, the EEO counselor will prepare an administrative file, which includes a counselor's report, pertinent correspondence, and documents obtained during informal counseling. This must be completed within 10 calendar days after the issuance of the Notice of Right to File a Discrimination Complaint.

14. EXTENSION DURING COUNSELING. Prior to the end of the 30-day counseling period, the aggrieved person may agree in writing to postpone the final interview and extend the counseling period for an additional period of no more than 60 calendar days. Extensions require approval of the ORM Regional EEO Officer or designee.

15. FINAL INTERVIEW. The EEO counselor conducts a final interview with the aggrieved person, in which he/she reviews all of the information obtained by the counselor during the pre-complaint phase. The counselor advises the aggrieved person that he/she must limit any resulting formal complaint to those matters discussed during counseling.

16. NOTICE OF RIGHT TO FILE A DISCRIMINATION COMPLAINT. Each EEO counseling contact shall be closed by the 30th day from initial contact with ORM, except where there is a signed, written extension, settlement agreement or agreement to participate in ADR. The EEO counselor will provide the aggrieved a Notice of Right to File a Discrimination Complaint along with a VA Form 4939, Complaint of Employment Discrimination. The aggrieved person must be asked to sign an acknowledgement of receipt at the bottom of a copy of the notice. The EEO counselor must send the notice to the aggrieved person by overnight or certified mail, return receipt requested. A return receipt or other evidence of receipt must be made part of the EEO counseling record. The EEO counselor may offer to assist the aggrieved person in filling out the VA Form 4939, Complaint of Discrimination. However, such assistance must be limited to the procedural aspects of how to fill out the form. The formal complaint must be filed within 15 calendar days of receipt of the Notice of Right to File a Discrimination Complaint. VA Form 4939 can be accessed electronically at <http://vaww.va.gov/orm/4939Rev11-99.pdf>

17. COUNSELOR'S REPORT AND ADMINISTRATIVE FILE. At the end of informal counseling, the counselor must prepare an administrative file which must include a counselor's report, pertinent correspondence and documents obtained during informal counseling. This must be completed for every contact within ten (10) calendar days after the issuance of the Notice of Right to File a Discrimination Complaint.

18. SUBSEQUENT AMENDMENT OF COMPLAINTS OF DISCRIMINATION. When it is determined during the initial interview that an aggrieved person has a pending related complaint in the process and the Notice of Advise of Rights has not been issued, the EEO counselor does not initiate counseling but follows these steps:

February 7, 2007

VA Handbook 5977

a. Verifies the existence of an active complaint and its current status in the Web Based Tracking System.

b. Explains the process to amend an existing complaint and informs the aggrieved person that he/she will receive written guidance on how to request an amendment on an existing complaint.

c. Prepares a Subsequent Event and/or Instances letter for signature of the Regional EEO Officer. The letter instructs the aggrieved person to submit a written description of the new incident(s) and request to amend the existing complaint.

d. Upon receipt of the written description of the new incident(s), the intake specialist determines whether the new incident(s):

(1) Provide(s) additional evidence offered to support the existing claim(s), but does not raise a new claim in and of itself;

(2) Raise(s) a new claim that is *like* or related to the claim(s) raised in the pending complaint; or

(3) Raise(s) a new claim that is *not like* or related to the claim(s) raised in the pending complaint.

e. If the new claim is *like* or related to the claim(s) raised in the pending complaint, the new incident(s) will be amended into the existing complaint and EEO counseling is not required.

f. If the new claim is *not like* or related to the claim(s) raised in the pending complaint, an EEO counselor will contact the aggrieved person within two days of the intake specialist's decision and proceed with counseling the new claim. The date of the initial contact will be based on the original date the aggrieved person contacted ORM.

February 7, 2007

VA Handbook 5977

CHAPTER 3 - THE FORMAL DISCRIMINATION COMPLAINT PROCESS

1. THE FORMAL DISCRIMINATION COMPLAINT PROCESS. VA employees, former employees, and applicants for employment are afforded the right to file a complaint of discrimination in accordance with the provisions of EEOC regulations on claims of discrimination. If the complainant chooses to file a formal complaint, the second phase of the complaint process begins. There are two types of formal complaints of discrimination that can be filed: an individual complaint and a class complaint. When a complainant files a formal complaint of discrimination, steps are initiated to advise the complainant of his/her rights and responsibilities during the formal complaint process. The individual formal complaint process includes the following major procedures: Acknowledgment, Procedural Decision, Investigation, Hearing or FAD, and EEOC Appeal. The following is a summary of the tasks that are performed in all cases:

2. ACKNOWLEDGMENT. Upon receipt of a formal EEO complaint, the following tasks are accomplished to acknowledge receipt:

a. Establish the official filing date. If mailed, the complaint shall be deemed filed on the date it is postmarked. In the absence of a legible postmark, the complaint will be deemed timely filed if received by an ORM official within 5-calendar days of the expiration of the filing period. If delivered in person or telefaxed, the complaint shall be deemed filed on the date it is received.

b. Issue a Notice of Receipt of Discrimination Complaint to the complainant, or the complainant's representative with a copy to the complainant, within 15 calendar days of being advised that the complainant has filed a formal complaint.

c. Issue a Notice of Receipt of Discrimination Complaint to the Under Secretary, Assistant Secretary, Facility Director, and other Key Official. Appended to the acknowledgment letter is a copy of the formal complaint. When the Under Secretary, Assistant Secretary, Facility Director, and other Key Official is named as the RMO, the notice will be sent to the next higher organizational element.

3. PROCEDURAL DECISION. The designated intake specialist reviews the formal complaint to determine if it is acceptable for investigation and makes a recommended procedural decision to the ORM Regional EEO Officer. The intake specialist will either accept or dismiss the complaint in whole or in part.

a. Acceptance Review.

(1) The intake specialist applies the following criteria in accordance with EEOC regulations to determine if the complaint is acceptable for further processing. If additional information is needed to answer these questions, the intake specialist requests the information from the complainant or the Under Secretary, Assistant Secretary, Facility Director, and other Key Official, as appropriate. Upon receipt the complainant/facility has 15 calendar days to provide the information. After the intake specialist receives the response, or after the allotted time has

expired, he or she proceed with the acceptability determination. The acceptance process is not the stage to determine whether there is any merit to the complaint. If all of the following questions are answered “yes”, then the complaint is acceptable for investigation.

(a) Did the complainant contact an EEO counselor within 45 calendar days of the event in dispute?

(b) Did the complainant file a formal complaint within 15 calendar days of receipt of the Notice of Right to File a Discrimination Complaint?

(c) Did the complaint specify each event in dispute and when it occurred?

(d) Does the complainant allege discrimination because of race, color, religion, gender (sex), national origin, age (40 years and over), disability, or reprisal?

(e) Does the complaint state a claim against VA for which a remedy is available?

(f) Is the complaint unique (i.e., not duplicative of another EEO complaint, an appeal to MSPB, or a negotiated grievance)?

(2) If the procedural decision results in the acceptance of the complaint, the ORM Regional EEO Officer transmits an Acceptance of EEO Complaint letter, which notifies the complainant that the complaint has been accepted for investigation and describes the specific claim(s) being accepted. This letter determines and controls what claims will be investigated. Therefore, it is critical that there be an agreement with the complainant on the formulation and statement of the accepted claims. If the complainant believes the accepted claims are improperly formulated, incomplete, or incorrect, they have 7-calendar days, after receipt of the acceptance letter, to notify the ORM Field Office in writing of the disagreement. Upon receipt of the written statement, the ORM Field Office will address the disagreement in writing and include the complainant's statement in the official record. This process is intended to reasonably assure that the proper claims are investigated to avoid the necessity of a supplemental investigation or the risk of sanctions imposed by an EEOC Administrative Judge. A copy of the acceptance letter is transmitted to the Under Secretary, Assistant Secretary, Facility Director, and Other Key Official, along with a Document List. The Document List details the evidentiary documents to be gathered and submitted for inclusion in the investigative file.

b. Dismissal resulting in a Final Agency Decision (FAD). If the procedural decision results in a FAD, dismissing the entire complaint, the complainant is notified of the reason for the dismissal and provided appeal rights. If, on appeal, the EEOC agrees with the ORM decision, there is no further processing of the complaint. If EEOC disagrees with the ORM decision to dismiss, the complaint will be accepted and processed in the same manner as other complaints. The EEOC has established a number of circumstances under which an agency may dismiss a complaint. A summary of the various reasons for dismissal follows:

February 7, 2007

VA Handbook 5977

(1) **Failure to State a Claim.** A complainant must demonstrate that the matter regarded as discriminatory has resulted in harm. If the complainant cannot show some harm with regard to a term, condition, or privilege of employment, the complaint may be dismissed.

(2) **Same Claim Pending or Decided by the Agency or EEOC.** A complainant may not raise the same matter over and over. If the claim has been accepted in a prior complaint that is either pending or decided, the duplicate complaint may be dismissed. In order to dismiss, the claim must not be merely similar, it must be identical.

(3) **Failure to Comply with Applicable Time Limits.** If a complainant fails to raise a claim with an EEO counselor within the 45-day limitation, the claim is untimely raised and may be dismissed unless it is part of a pattern of harassing events, or there is a satisfactory explanation for the untimely contact. When counseling has been concluded and a complainant is issued a notice of right to file a complaint, the formal complaint must be filed within 15 calendar days of receipt of the notice. If it is filed beyond 15 calendar days, the complaint shall be dismissed unless there is an acceptable reason offered for the untimely filing.

(4) **Uncounseled Matters.** If the complaint contains matters not raised with the EEO counselor, they may be dismissed, unless they are like or related to matters that were raised. The test for being "like or related" is whether the uncounseled matter adds to, clarifies, or would reasonably arise in the investigation of the counseled matters. If the test is met, the uncounseled matters will be accepted.

(5) **A Matter Raised in Civil Litigation.** If a complainant chooses to file a judicial complaint over the same matter raised in the EEO discrimination complaint and more that 180 days have passed since the EEO discrimination complaint was filed and the complaint has not been adjudicated, the EEO discrimination complaint may be dismissed. Note: Complainants alleging a violation of the Equal Pay Act (EPA), sex-based wage discrimination may file a civil action in Federal District Court at any time. Please see Chapter 4, item 16 (d) of this document for additional information on EPA complaints.

(6) **Negotiated Grievance Procedure and MSPB Appeal.** If a complainant first files a grievance under the negotiated grievance procedure or MSPB Appeal, and later files a formal complaint, the complaint may be dismissed based upon the complainant's election of another forum. The underlying public policy for both the grievance and MSPB dismissal authority is based upon the premise that a person should not be permitted to adjudicate a matter in separate forums simultaneously, because of the added cost and risk of conflicting results. The matter should only be considered and adjudicated one time, in one forum or the other, but not both. [Also applies if person files an EEO complaint first, then a grievance, but carries the grievance all the way thru to the third step. In such cases, the EEOC has held that, though the EEO complaint was filed first, the fact that the person took the grievance all the way thru to the 3rd step shows the person elected to pursue the grievance.]

(a) **Negotiated Grievance Procedure.** If a grievance under a negotiated grievance procedure, which specifically permits the consideration of discrimination claims, is filed earlier than an EEO complaint on the same matter, the EEO complaint may be dismissed because

the complainant has elected a different forum to litigate the matter. The date the first stage of a negotiated grievance is filed is considered to be the filing date. However, if the grievance is subsequently dismissed for lack of jurisdiction, the filing of the grievance cannot be the reason the EEO complaint is dismissed.

(b) **MSPB Appeal.** If a complainant first files an MSPB appeal of a matter appealable to the MSPB, a later filed EEO complaint may be dismissed based upon the complainant's election of forums.

(7) **Mootness.** If a complaint demonstrates harm when filed, it states a claim to be adjudicated, however, if intervening events or relief have completely eradicated the harm, and there is no reasonable expectation that the alleged violation will recur, the matter is moot and may be dismissed. The difference between mootness and failure to state a claim is that under failure to state a claim, there never was any harm suffered by complainant, but in mootness, there was harm suffered which was subsequently rectified and is unlikely to recur. Therefore, there is no present claim to adjudicate.

(8) **Proposal to take Personnel Action.** The EEOC has determined that a person is not harmed when advised that an adverse action is proposed. The harm occurs only when the action is actually implemented. Prior to implementation of the proposal, the matter may be dropped, settled, or in another way resolved with no further action taken on the proposal. Consequently, a complaint based merely upon a proposal to take a personnel action may be dismissed.

(9) **Failure to locate the Complainant.** The complainant has a duty to cooperate in the processing of the complaint. If the complainant fails to keep the agency apprised as to his/her whereabouts, the agency may dismiss the complaint after reasonable efforts are made to locate the complainant. However, prior to dismissal the agency must send written notice to the last known address that a dismissal is proposed. If there is no response, the complaint may be dismissed.

(10) **Failure to respond to request for information.** If the complaint file lacks needed information to move the process forward, the agency may request the information from the complainant. The request is made in writing and contains a warning that failure to respond to the request may result in dismissal of the complaint. If the complainant fails to respond or responds but does not provide the requested information, the complaint may be dismissed.

(11) **Allegation of dissatisfaction with processing of a complaint.** If a complainant is dissatisfied with the processing of an earlier complaint ("spin-off" complaint), a new complaint expressing that dissatisfaction may not be filed and will be dismissed. An alternative procedure is established to consider and resolve such dissatisfaction in lieu of filing a complaint. In VA, the ORM Office of Policy and Compliance considers and responds to such claims.

(12) **Abuse of Process.** Where a complainant misuses the EEO process for a purpose other than prevention and elimination of discrimination and does so in a clear pattern of

February 7, 2007

VA Handbook 5977

misuse, a complaint may be dismissed. While the regulatory authority to dismiss is clearly stated, the EEOC has construed such authority narrowly.

c. Partial Acceptance. If the complaint is dismissed in part, the intake specialist prepares the Partial Acceptance letter. The letter sets forth to the complainant the rationale for the determination and notifies him/her which claim(s) will not be investigated. A copy of the decision letter is placed in the administrative file for consideration when the case is adjudicated. If only a portion of the complaint is dismissed, there is no immediate right for the complainant to appeal that decision. The partial dismissal decision is made part of the file, and subsequent to the investigation, if the complainant requests an EEOC hearing, the Administrative Judge (AJ) will review that decision. If the AJ agrees with the decision, the matter dismissed will not be considered during the hearing phase, but at a later point can be raised in an appeal to EEOC. If the AJ disagrees with the ORM decision, the dismissed portions will be considered during the hearing process. If the complainant does not request a hearing but requests an immediate substantive decision from OEDCA, OEDCA will review the partial dismissal. If OEDCA agrees with the ORM decision, it will not substantively consider the dismissed matters. The complainant may appeal the dismissed matters to EEOC after OEDCA renders the substantive final agency decision. If OEDCA disagrees with the ORM partial dismissal, it may order the matter accepted and investigated.

4. INVESTIGATION. EEO complaints meeting acceptability requirements are assigned for investigation and generally investigated within 180 calendar days, unless the parties agree in writing to extend the time period. If the complaint is amended, the investigation shall be completed within the earlier of 180 days after the last amendment to the complaint or 360 calendar days after the original filing of the complaint. In addition, two or more accepted complaints, filed by the same complainant, must be consolidated for investigation. In cases where the complainant has requested an EEOC hearing, the Administrative Judge may decide to consolidate complaints for joint processing. Mixed cases (complaints on matters appealable to MSPB) and non-mixed cases filed by the same complainant are not consolidated for joint processing. The investigation process is as follows:

a. The ORM Regional EEO Officer/Field Manager assigns complaints for investigation, by letter, to the EEO investigator with concurrent notice to the complainant/representative and Under Secretary, Assistant Secretary, Facility Director, and Other Key Official. Investigations of EEO complaints will be conducted by full-time ORM investigators or contractors appointed by ORM. EEO investigators are required to complete their investigations within 30 or 60 days of assignment (depending on method of investigation). Extensions of that period will be granted only under extraordinary circumstances.

b. The EEO investigator reviews the administrative complaint file and completes the Pre-Investigative Planning Document to determine the appropriate theories of discrimination pertinent to the case and the most suitable method(s) of investigation. The method(s) is determined based on the complexity of the case, i.e., number and types of claims. Methods of investigations include: On-Site, Desk (by telephone), Written Affidavit, and Fact-Finding Conferences.

c. The EEO investigator will work with the EEO/Diversity Program Manager/Liaison/Specialist to schedule the investigation, schedule witnesses, acquire documents, and to make other arrangements necessary for the efficient conduct of the investigation. The investigator proceeds as follows:

(1) Determines the dates to conduct the actual investigation.

(2) Discuss with the EEO Manager/Liaison witness scheduling.

(3) Follows-up on request for evidentiary documents (Document List) transmitted to the Under Secretaries/Facility Director at the time the complaint was accepted.

(4) Obtains written affidavit, written interrogatory, or testimony related to the EEO complaint. When written affidavits are obtained the statements are made under penalty of perjury. When individuals are interviewed, the investigator obtains their testimony under oath. There are several ways to obtain testimony: by interrogatories, a court report or by transcription of the tape recording of the interview. All individuals that are interviewed are offered the opportunity to review and make corrections to their testimony. The procedures are outlined below:

(a) At the conclusion of each interview, while on the record, the investigator will obtain an affirmative or negative response whether the witness wants the opportunity to review, make minor changes, sign and be provided a copy of the transcript.

(b) If a witness requests a copy of the transcript the witness may not make any mark on the transcript itself, all revisions to the original transcript will be made on a correction sheet attached to the transcript. Witnesses may not make substantive changes to the transcript. Witnesses are required to return the signed transcript and correction sheet back to the investigator within seven (7) calendar days of receipt of the transcript. If the witness does not provide the signed transcript and correction sheet within the appropriate time limit, it will be deemed that the witness elected to waive his or her right to review, correct and sign the transcript.

(5) Upon completion of evidence gathering, the investigator develops an impartial and appropriate factual summary and analysis, which will evaluate the evidence in the investigative file but will not reach a conclusion as to whether discrimination did or did not occur. The investigator must be unbiased and objective and the investigation must be thorough.

(6) The investigator will submit the investigative summary and record to the ORM Regional EEO Officer or designee for technical review and release.

5. AMENDMENT OF COMPLAINTS DURING INVESTIGATION. When a complainant raises a new incident of alleged discrimination during the investigation, the EEO Investigator instructs the complainant to submit a letter to the ORM Regional EEO Officer describing the new incident(s) and stating that he/she requests to amend his/her complaint to include additional evidence or a claim like or related to the claim(s) accepted for investigation. If the request to amend is received during the investigation and the ORM Regional EEO Officer renders an

February 7, 2007

VA Handbook 5977

acceptability decision, the EEO Investigator investigates the additional evidence or claim(s). The decision to accept, dismiss or refer amended claims back to counseling is also included in the investigative file. Additional guidance regarding this may be found in this chapter in paragraphs 10 through 12.

6. ADVISEMENT OF RIGHTS. Upon completion of the technical review of the investigative file and summary report, the intake specialist completes the following:

a. Forwards a copy of the investigative file to the complainant and his/her representative, when one has been identified. The file is forwarded with the Notice of Adverseness of Rights letter. This letter notifies the complainant that within 30 calendar days of receiving the investigative file he/she has the right to request a hearing before an Administrative Judge or a FAD by OEDCA, pursuant to 29 CFR §1614.108(f). Copies of the forms to request an EEOC hearing and instructions for requesting a FAD are attached to the Notice. A Request for an EEOC Hearing form can also be obtained through EEOC's website at <http://www.eeoc.gov>.

b. The following actions will follow receipt of the investigative file:

(1) If the complainant and his/her representative examines the investigative file and observes deficiencies, the complainant and/or representative should notify ORM, in writing, of the perceived deficiencies. A copy of the complainant's notification of perceived deficiencies will be included in the investigative file.

(2) If ORM agrees with the alleged deficiencies, ORM will take immediate action to correct them.

(3) If ORM does not agree with the complainant's claimed deficiencies, ORM will prepare a statement explaining the rationale for the disagreement and include it in the investigative file.

c. Transmits a copy of the investigative summary report to the appropriate Under Secretary, Assistant Secretary, Facility Director, and Other Key Official appended to the Notice of Completion of Investigation letter.

7. REQUEST FOR EQUAL EMPLOYMENT OPPORTUNITY COMMISSION (EEOC)

HEARING OR A FINAL AGENCY DECISION (FAD). The complainant has the right to request a hearing before an Administrative Judge or a FAD by OEDCA, pursuant to 29 CFR §1614.108(f). The complainant must request a hearing within 30 calendar days of receipt of the Adverseness of Rights letter, otherwise the intake specialist will send the complaint file to OEDCA for a FAD.

a. **REQUEST FOR EEOC HEARING.** EEOC regulations require that the complainant submit a hearing request directly to the EEOC District Office and a copy to the ORM Field Office having jurisdiction over the geographic area in which the complaint arose. The request for a hearing should be filed on EEOC's Request for a Hearing Form. However, if an appeal form is not available, a written request for a hearing will be acceptable. The hearing request form can be obtained through EEOC's website at <http://www.eeoc.gov>.

(1) Within 15 calendar days of receiving a copy of the complainant's request for a hearing, ORM will send a copy of the complaint file to the EEOC District Office, the Agency Representative and OEDCA. Once a hearing has been requested, all communications and/or matters related to the complaint will be conducted through the Agency Representative.

(2) The scheduling of an EEOC hearing rests with EEOC and the respondent facility. EEOC Administrative Judges are fully responsible for adjudicating the complaint, which means they may dismiss the complaint or issue a decision with or without a hearing.

(3) Where the complainant has requested an EEOC hearing, by EEOC regulation, the EEOC Administrative Judge (AJ) makes a substantive decision on the merits that is binding on the agency, unless OEDCA takes certain action within 40 days of receipt of the AJ's decision. The final action OEDCA must take within the 40-day period is to determine whether or not to implement the EEOC Administrative Judge's decision through the issuance of a final agency action. If OEDCA decides to fully implement the Administrative Judge's decision, the decision becomes the final action of the agency. If the OEDCA final order, which is the notice to complainant, does not fully implement the Administrative Judge's decision, then the agency must simultaneously appeal the matter to EEOC. Whether OEDCA renders a final agency decision or takes final agency action through a final order, the agency must advise the complainant of the right to appeal to EEOC, Office of Federal Operations (OFO) within 30 calendar days of receipt should they be dissatisfied with the decision or final action. The appeal should be filed on EEOC Form 573, Notice of Appeal/Petition to the EEOC. However, if an appeal form is not available a written request for a hearing will be acceptable. EEOC's Notice of Appeal/Petition can be obtained through EEOC's website at <http://www.eeoc.gov>.

b. REQUEST FOR FINAL AGENCY DECISION (FAD). OEDCA renders FADs addressing the merits of all claims in a complaint, including the rationale for their decision. A complainant can elect a FAD by submitting a written request or by failure to respond to the Advisement of Rights letter within 30 calendar days of receiving this notification. After ORM receives the complainant's election, ORM immediately transmits the investigative file to OEDCA upon receipt of the complainant's request for a FAD. In instances where the complainant does not respond to the Notice, ORM transmits the investigative file to OEDCA within 10 calendar days of the expiration of the 30-day period to make an election. OEDCA has 60 calendar days from receipt to render a decision.

(1) Non-Mixed Complaint Procedural Decisions. Where OEDCA issues a decision dismissing a complaint in its entirety, OEDCA will inform the complainant of his/her right to file an appeal with the EEOC. The agency informs the complainant that the appeal must be filed within 30 days of receipt of the FAD. A copy of EEOC Form 573, Notice of Appeal/Petition is attached to the FAD. EEOC's Notice of Appeal/Petition can also be obtained through EEOC's website at <http://www.eeoc.gov>.

(2) Mixed Complaint Procedural Decisions. Where OEDCA issues a decision dismissing a complaint in its entirety, OEDCA will inform the complainant of his/her right to file an appeal with the MSPB. Additional guidance regarding this may be found in this chapter under 16 (a).

February 7, 2007

VA Handbook 5977

8. CIVIL COURT. If the complainant chooses not to appeal to the EEOC, he/she may file a civil action in United States District Court within 90 calendar days of receipt of the agency decision or final action. The right to file suit in US District Court is also available to any complainant if 180 days has elapsed after the complaint was filed and no final agency decision has been rendered or final action has been taken. Special circumstances exist for filing a civil action in United States District Court for Age discrimination and Equal Pay Act complaints. See item 16 (c) and 16 (d) of this chapter.

9. SPECIAL CIRCUMSTANCES DURING THE FORMAL COMPLAINT PROCESS. There are complaints that have slightly different procedures. This section will describe those complaints and the processing rights in accordance with EEOC Regulations.

a. Mixed Case Complaints. A mixed case complaint is a complaint of employment discrimination that may contain a claim of employment discrimination stemming from an action that can be appealed to the MSPB. The complaint may contain only a claim of employment discrimination or it may contain additional claims that the MSPB has jurisdiction to address. A list of actions that can be appealed to MSPB can be found on MSPB's website at <http://www.mspb.gov>. In a mixed case complaint situation, an aggrieved person may initially file a complaint of discrimination with the VA or an appeal on the same matter with MSPB, but not both. A mixed case complaint filed with the VA is processed as an individual complaint of discrimination with the following exceptions:

(1) Complainant is advised of the acceptance of a mixed case complaint and that if a final decision is not issued within 120 calendar days of the filing date of the complaint, he/she may appeal the matter to MSPB at any time thereafter.

(2) Upon completion of the investigation, the complainant is advised that a FAD will be issued by OEDCA within 45 calendar days without a hearing.

(3) If the complainant is dissatisfied with the FAD he/she may appeal the matter to MSPB (not EEOC) within 30 calendar days of receipt of the FAD.

b. Complaints of Class Discrimination. A "class" by definition, is a group of employees, former employees, or applicants for employment who allege they are adversely affected by a personnel management policy or practice. A class complaint is a written complaint of discrimination filed on behalf of the class by the agent of the class, alleging that the class is so numerous that a consolidated complaint by the members of the class is impractical, that there are questions of fact common to the class, that the claims of the agent of the class are typical of the claims of the class, and that the agent of the class or the representative will fairly and adequately protect the interests of the class.

(1) A class complaint must be signed by the agent or representative and must identify the policy or practice adversely affecting the class as well as the specific action or event affecting the class agent. The complaint must be filed with ORM no later than 15 calendar days after the agent's receipt of the Notice of the Right to File a Class Complaint.

(2) Once a formal complaint is filed on behalf of the “class,” the following actions occur:

(a) ORM notifies the Regional Counsel having jurisdiction to designate an Agency Representative.

(b) Within 30 calendar days of the receipt of a class complaint, ORM forwards the complaint, the name of the Agency Representative, a copy of the counselor’s report and other relevant information about the complaint to the EEOC District or Field Office having jurisdiction over the geographic area in which the complaint arose.

(c) The EEOC Supervisory Administrative Judge assigns an Administrative Judge to issue a decision on certification of the class. EEOC uses the following criteria in determining if the class complaint is subject to dismissal:

i. The complaint does not meet all the prerequisites of a class (i.e., numerosity, commonality, typicality, and adequacy of representation).

ii. The claim lacks specificity and detailed information.

iii. The complaint meets any of the criteria for Dismissal of Complaints under EEOC regulations (i.e., the questions posed under Procedural Decision of this Handbook).

iv. The complainant unduly delayed in moving for class certification.

(d) If it is the decision of the Administrative Judge not to certify the class complaint, within 30 calendar days of receipt of the decision, ORM will issue a letter acknowledging receipt of an individual complaint to the agent and individuals who filed formal complaints on the claim(s) and basis(es) identical to the class complaint. ORM will process each complaint as an individual complaint of discrimination. If it is the decision of the Administrative Judge to certify the class complaint, the VA’s organizational component where the complaint was filed is responsible for notifying all class members. All reasonable means will be used to notify all class members of the acceptance of the complaint within 15 calendar days of receipt of the Administrative Judge’s decision or within a time frame specified by the Administrative Judge. EEOC requires that a qualified class agent represent the class.

c. Age Discrimination Complaints. In order to pursue a formal complaint of age discrimination, the complainant must be at least 40 years of age at the time of the alleged discriminatory event at issue. Age discrimination complaints are processed in the same manner as all other complaints, with one exception. There is an alternate process that allows the age complainant to file a civil action without first filing an EEO complaint. A complainant may go directly to Federal District Court by filing a Notice of Intent to Sue with the EEOC. This notice should be filed at least 30-calendar days in advance of the civil suit. The civil suit must be filed within 180-calendar days of occurrence of the event believed to be discriminatory. The EEOC will immediately advise VA whenever such a notice is received. ORM will then have 30-calendar days to conduct an inquiry to discover whether there is any basis for believing that

February 7, 2007

VA Handbook 5977

age discrimination has occurred. Responsibility to conduct an inquiry is delegated to the ORM Office of Policy and Compliance. A report of the inquiry, which briefly summarizes the information discovered, must be furnished to the DAS/ORM for transmittal to EEOC, within 30-calendar days. A summary of the charges of the complainant and the responses of management, along with employment statistics that may be relevant, is required. Filing of a private suit will terminate processing of the EEO discrimination complaint.

d. Equal Pay Act Complaints. An Equal Pay Act claim is raised when a complainant alleges that he or she is receiving less pay than an individual of the opposite sex for a job requiring equal skill, effort and responsibility and performed under similar working conditions. Each day the employee continues to receive less pay for equal work is considered to be a continuing violation by EEOC. A complainant may file an EEO discrimination complaint, and may file directly in a court of competent jurisdiction without first providing notice to the EEOC or exhausting the EEO discrimination complaint process. The civil action must be filed within a court of competent jurisdiction within two years, or, if the violation is willful, within three years of the date of the alleged violation of the Equal Pay Act. The filing of an EEO discrimination complaint does not waive the time for filing a civil action. Filing of a private suit will terminate the processing of the EEO discrimination complaint.

10. ADMINISTRATIVE PROCESS CASE AMENDMENT. At the conclusion of an investigation and any time prior to the agency's mailing of the Notice of Advisement of Rights, a complainant may amend a pending EEO complaint to add claim(s) that are like or related to those claim(s) raised in the pending complaint. If the new claim is accepted as like or related, the complainant cannot later seek EEO counseling on the same claim(s) being amended with the pending complaint.

a. When a complainant raises a new incident of alleged discrimination during the processing of an EEO complaint, the complainant must provide the ORM Regional EEO Officer a letter describing the new incident(s) and stating that he/she wishes to amend his/her complaint to include the new incident(s). Upon receipt of the complainant's request to amend an existing formal complaint, an acceptability determination is made to determine if the new incident:

(1) provides additional evidence offered to support the existing claim, but does not raise a new claim in and of itself;

(2) raises a new claim that is like or related to the claim(s) raised in the pending complaint;
or

(3) raises a new claim that is not like or related to the claim(s) raised in the pending complaint.

b. If the ORM Regional EEO Officer determines that the subsequent act(s) of alleged discrimination is like or related to the claim(s) raised in the pending complaint, an Amended Acceptance of EEO Complaint letter is transmitted to the complainant. This letter notifies the complainant that the subsequent act of alleged discrimination has been accepted for investigation and describes the specific claim(s) being accepted.

c. If the ORM Regional EEO Officer determines that the subsequent acts of alleged discrimination do not add to or clarify the original claim, and/or could not have been reasonably expected to grow out of the investigation of the original claim, the later incident will be treated as a new EEO complaint of discrimination. The EEO Officer will instruct the complainant to seek EEO counseling regarding the subsequent act(s).

11. CASE AMENDMENT AFTER AN EEOC HEARING IS REQUESTED. After the complainant has requested a hearing, he/she may file a motion with the Administrative Judge to amend the complaint to include claims that are like or related to those raised in a pending complaint.

12. CASE CONSOLIDATION

a. **Consolidation of Complaints by Two or More Complainants.** Complaints of discrimination filed by two or more complainants consisting of substantially similar allegations of discrimination or relating to the same matter may be consolidated by the agency or EEOC for joint processing after appropriate notification to the parties.

b. **Consolidation of Complaints by the Same Complainant.** Agencies are required to consolidate two or more complaints filed by the same complainant after appropriate notification to the complainant. When a complaint has been consolidated with an earlier filed complaint the agency will complete its investigation within the earlier of 180 days after the filing of the last complaint or 360 days after the filing of the original complaint. A complainant may request a hearing from an Administrative Judge on the consolidated complaints any time after 180 days from the date of the first filed complaint. If a complainant requests a hearing on consolidated complaints prior to the agency's completion of the investigation, the administrative judge will decide how best to insure an appropriate record. Administrative Judges may decide to place the complaint in abeyance until the agency can finish its investigation or by supplementation of the record through discovery or other methods ordered by the Administrative Judge.

c. **EEOC Case Consolidation.** When an Administrative Judge becomes aware that one or more complaints in the agency process should be consolidated with a complaint in the hearing process, the Administrative Judge may consolidate all claims at the hearing stage or hold the complaint in the hearing process until the others are ready for hearing.

13. ACCESS TO FILES. EEOC regulations and the Privacy Act govern access to EEO complaint files. Further guidance on the release of information of EEO files can be found on ORM's website at <http://vaww.va.gov/orm/ormpap.doc>.

February 7, 2007

VA Handbook 5977

CHAPTER 4 - RESOLUTION OF COMPLAINTS

1. RESOLUTION OF COMPLAINTS. ORM is committed to assisting aggrieved individuals and management in resolving claims of employment discrimination and EEO complaints. EEOC encourages resolution of complaints at all times in the complaint process through a variety of settlement mechanisms: Mediation, Facilitation, Fact Finding, Early Neutral Evaluation, Ombudsmen, Settlement Conferences, Mini-trials and Peer Review. For more detailed information, refer to the Definition Section, Appendix B, of this Handbook or EEOC Management Directive (MD-110).

2. ALTERNATIVE DISPUTE RESOLUTION (ADR). Mediation through Alternative Dispute Resolution (ADR) is available during the informal and formal complaint process. ADR is a process that uses specially trained neutrals (third party mediators), to help individuals resolve disputes. Forms of ADR include, but are not limited to, conciliation, facilitation, mediation, fact-finding, mini-trials and arbitration, or any combination. VA has embraced mediation as its primary method of ADR.

3. OFFER OF RESOLUTION. EEOC regulations provide an incentive through its Offer of Resolution concept. The idea is for the facility and complainant to resolve complaints that will conserve agency resources where settlement reasonably should occur. If the complainant does not accept an Offer of Resolution made in accordance with the requirements of 29 CFR §1614.109(c) and subsequently obtains less relief than had been offered, the complainant's attorney fees will be limited.

4. SETTLEMENT AGREEMENTS AND WITHDRAWAL OF COMPLAINTS. EEOC's and VA's policy is to seek resolution of EEO disputes at the earliest opportunity; therefore, settlement on terms acceptable to both the complainant and the agency is encouraged. When agreement has been reached in principle, the terms should be incorporated into a written settlement agreement. Settlement agreements may include, where appropriate, promotions, back-pay, interest on back-pay, reasonable attorney fees, and compensatory damages as long as the terms do not violate laws, rules, or regulations. Prior to the execution of any settlement agreement, agency officials are advised to consult with the Office of General Counsel or Office of Regional Counsel as appropriate to assure that remedial relief is consistent with the nature of the claim and the terms of the agreement to assure that they are clear, unambiguous, and understandable to the parties. Withdrawal of the EEO complaint by case number and the claim being resolved should be clearly stated in the written settlement agreement. If the complaint is resolved, a copy of the settlement agreement must be provided to the ORM field office with jurisdiction over the case.

a. Settlement Agreement. When a complaint of discrimination is settled a written settlement agreement, signed by both parties is required. The agreement should identify the complaint(s), i.e., cases number(s), claim(s), and basis(es), and also provide that the complainant withdraws all causes of action, including all EEO complaints, grievances, unfair labor practices, civil actions, etc., arising prior to the execution of the agreement. Settlement Agreement Tips can be found on ORM's website at <http://vaww.va.gov/orm/opc/default.htm>.

(1) If both parties agree to settle a matter, ORM staff, upon request, can provide a sample format for a written settlement agreement.

(2) If the complaint is resolved, a copy of the settlement agreement must be provided to the ORM field office.

(3) All settlement agreements should include the following statement: The complainant acknowledges that if (he/she) believes VA has not complied with the terms of this Settlement Agreement, (he/she) may notify the Deputy Assistant Secretary for Resolution Management, in writing, within 30 days of the alleged violation and request the terms of this Settlement Agreement be specifically implemented. Alternatively, (he/she) may request that the EEO complaint be reinstated for further processing from the point processing ceased. Prior to asking the complainant which election he/she would like to make, the complainant should be advised that, if the complaint is reinstated, the parties will be returned to their respective status prior to the settlement and the complainant will be required to repay any money to the Agency paid to him or her as part of the vacated settlement agreement. Thereafter, the complainant may appeal to the Equal Employment Opportunity Commission pursuant to 29 CFR 1614.504 if (he/she) believes that VA has either not fully implemented the Settlement Agreement or improperly failed to reinstate the complaint. The Equal Employment Opportunity Commission states that allegations of subsequent acts of discrimination that violate a settlement agreement shall be processed as separate complaints under §1614.106 or §1614.204. If the complainant believes that (he/she) has experienced reprisal since signing the settlement agreement, (he/she) should bring the matter to the attention of an EEO counselor immediately.

(4) The Older Workers' Benefit Protection Act (OWBPA) sets out strict requirements if a settlement involves a claim of age (40 years and over), discrimination. At a minimum, an agreement to waive an ADEA claim must be clearly written from the employee's viewpoint, specifically referring to rights or claims under the ADEA, have no waivers of prospective rights under the ADEA, and give valuable consideration in exchange for the waiver. It must also specifically state that the complainant has twenty-one (21) calendar days to consider the agreement and seven (7) calendar days following the execution of the agreement to revoke it. In addition, the settlement agreement must also state, in writing, that the employee has the right to consult with an attorney prior to execution of the agreement. An example of a Settlement Agreement for ADEA claims can be found on ORM's website at <http://vawww.va.gov/orm/opc/default.htm>.

(5) The Under Secretary, Assistant Secretary, Facility Director, and Other Key Official or his/her designee must sign all settlement agreements. As it relates to Canteen Service, or the National Cemeteries, the National Canteen Director or the National Cemetery Area Directors must sign all settlement agreements, respectively.

(6) The agency representative will transmit a signed and dated copy of the settlement agreement obtained during an EEOC hearing for inclusion in the administrative file to the ORM's Regional EEO Officer.

February 7, 2007**VA Handbook 5977**

(7) The agency EEO/Diversity Program Manager/Liaison/Specialist will monitor local compliance with settlement agreements and orders issued by the Office of Employment Discrimination Complaints and Adjudication, EEOC, and EEO related cases from the Merit Systems Protection Board, labor arbitrators, and the Federal Labor Relations Authority, as well as ADR agreements. He/she will notify management if compliance falters.

b. **Withdrawal of Complaint.** Should a complainant unilaterally decide to withdraw a claim at any point in the EEO process, the withdrawal must be in writing describing the claims withdrawn, signed, and dated by the complainant. Complaint processing will cease upon receipt of the written withdrawal. Once claims are withdrawn, they cannot be raised again through subsequent contact with an EEO counselor. If the complaint is withdrawn, a copy of the withdrawal statement must be provided to the ORM field office.

February 7, 2007

VA Handbook 5977

CHAPTER 5 - BREACH OF SETTLEMENT AGREEMENT

1. SETTLEMENT AGREEMENT. A settlement agreement is a contract signed by both parties. Any settlement agreement knowingly and voluntarily agreed to by the parties, reached at any stage of the complaint process, shall be binding on both parties.

2. BREACH OF SETTLEMENT AGREEMENT. Should a complainant believe that VA has breached any of the terms of a settlement agreement; the complainant must file a breach of settlement claim with the Deputy Assistant Secretary for Resolution Management, 810 Vermont Avenue NW, Washington, DC 20420. The breach of settlement claim must be filed within 30-calendar days of the date when the complainant knew or reasonably should have known of the alleged noncompliance. The complainant may request that the terms of the settlement agreement be specifically implemented or, alternatively, that the complaint be reinstated for further processing from the point processing ceased.

a. The DAS/RM has delegated the Chief of Policy and Compliance authority to decide Breach of Settlement Agreement Claims. The Chief of Policy and Compliance will issue decisions on all breach allegations within 35-calendar days of receipt.

b. ORM field offices should have the complainant complete the Breach of Settlement Agreement Allegation Form, (Appendix D)

c. A copy of the employee's Breach of Settlement Agreement Allegation Form and all supporting documentation, i.e., original EEO contact sheet, settlement agreement, EEO counselor's report, or background information obtained from the employee, should be forwarded to the Office of Policy and Compliance (OPC).

d. A copy of OPC's decision will be forwarded to the respective field facility and ORM field office.

e. The complainant is entitled to appeal that decision to EEOC within 30-calendar days from receipt or after 35-calendar days from the date the allegation of noncompliance was served on the DAS/RM, if there has been no decision in that time frame.

f. EEOC regulations at 29 CFR §1614.504, only provide for a complainant to seek enforcement of a settlement agreement. If the complainant breaches the terms of the settlement agreement, then the agency will be excused from performing the remaining obligations. There is no formal process for the agency to seek such relief. The agency will simply determine that the complainant stands in breach of the agreement and then refuse to implement the remaining terms.

3. SUBSEQUENT ACTS OF DISCRIMINATION. EEOC regulations 29 CFR §1614.106 and 1614.204 states that subsequent act of discrimination that violate a settlement agreement, or acts of reprisals, shall be processed as a separate complaint of discrimination. A subsequent act is defined as any allegation made by the complainant that involves an act or action by

management that occurred and is unrelated to the original settlement agreement or an allegation that management engaged in reprisal since signing the settlement agreement.

a. ORM Employees should help aggrieved individuals distinguish claims of reprisal, or subsequent acts of discrimination from breach claims. If after discussion, the employee nevertheless wishes to pursue the breach claim, the ORM field office should have the employee complete the Breach of Settlement Agreement Allegation Form, (Appendix D).

b. A copy of the employee's Breach of Settlement Agreement Allegation Form and all supporting documentation, i.e., original EEO contact sheet, EEO counselor's report, or background information obtained from the employee, should be forwarded to the Office of Policy and Compliance (OPC).

c. The Office of Policy and Compliance will issue a decision within 35-calendar days from receipt of the breach claim. A copy of the decision will be forwarded to the respective field facility and ORM field office.

d. If the complainant files a formal complaint of discrimination regarding the subsequent act, the new claim must be reviewed to determine if it meets the procedural requirements for further processing in accordance with 29 CFR §1614.

e. If the complainant files a formal complaint of discrimination regarding a breach claim, the breach claim should be dismissed and forwarded to OPC for processing.

February 7, 2007

VA Handbook 5977

CHAPTER 6 - REMEDIES AND COMPLIANCE

1. REMEDIES (REMEDIAL RELIEF). When there has been a finding of discrimination, the remedies available to the complainant shall be those set forth in EEOC's regulations as 29 CFR §1614. The regulations require that when discrimination is found, the complainant is entitled to the appropriate remedy which, as nearly as possible, places him/her in the situation which he/she would have been had the discrimination not occurred, with all pay and benefits which would have accrued absent the discrimination. The following are the basic elements of remedial relief when there is a finding of discrimination.

a. Notification to all employees of the agency in the affected facility of their right to be free of unlawful discrimination and assurance that the particular types of discrimination found will not reoccur.

b. Commitment that corrective, curative or preventative action will be taken, or measures adopted, to ensure that violations of the law similar to those found will not recur.

c. A offer to each identified victim of discrimination of placement in the position the person would have occupied but for the discrimination suffered by that person, or a substantially equivalent position.

d. Payment to each identified victim of discrimination on a "make whole basis" for any loss of earnings the person may have suffered as a result of the discrimination.

e. Commitment that the agency shall cease from engaging in the specific unlawful employment practices found in the case.

2. PETITION FOR ENFORCEMENT. A complainant may petition the EEOC for enforcement of a decision issued under the EEOC's appellate jurisdiction. The petition shall be submitted to EEOC's Office of Federal Operations (OFO) and shall set forth the basis for the complainant's assertion that the agency is not complying with the decision. EEOC affords the VA and the complainant the opportunity to submit information and/or documentation regarding the issue in dispute. VA will respond to EEOC's notice to show cause and submit evidence of compliance or specify the compelling reasons for noncompliance. EEOC will inform the complainant of the petition for enforcement decision.

3. COMPLIANCE. All officials of VA are required to comply with the final agency decisions issued by OEDCA or the appeal decisions issued by EEOC, including timely implementation of any corrective action ordered. The decisions will specify the corrective actions required and the time limits for implementing those corrective actions.

a. The Office of Policy and Compliance monitors agency compliance with OEDCA and EEOC decisions. To show compliance with the decisions, the Office of Policy and Compliance will obtain the necessary documentation for completing compliance. The following is a list of acceptable documentation required to document OEDCA and EEOC compliance:

(1) Attorney Fees. A copy of the check issued or a payroll voucher for attorney fees and/or narrative statement by an appropriate agency official, or agency payment order stating the dollar amount and date attorney fees was paid.

(2) Awards. A copy of the check issued or a payroll voucher or a narrative statement by an appropriate agency official stating the dollar amount paid, date paid, and the criteria used to calculate the award amount. If the award is non-monetary, provide a copy of the award documentation.

(3) Back Pay and Interest. Computer print-outs or payroll documents outlining gross back pay and interest, copy of any checks issued, or a narrative statement by an appropriate agency official of total monies paid, and date of payment.

(4) Compensatory Damages. The final agency decision and evidence that payment has been made.

(5) Miscellaneous Expenses. A copy of the check issued or a payroll voucher.

(6) Training. Attendance roster of the training session(s) or a narrative statement by an appropriate official that confirms attendance and date of the training.

(7) Personnel Actions (e.g., Reinstatement, Promotion, Hiring, Reassignment), copies of SF-50's or agency service record cards. Provide a copy of the agency's letter to the complainant offering position as outlined in OEDCA or EEOC decision, and a copy of the employees' response accepting or declining the positions.

(8) Expungement of Records. Narrative statement by an appropriate agency official that confirms that the specific document identified in the order has been expunged.

(9) Posting of Notice of Violation for EEOC Decisions. After the expiration of the posted notice, mail the original signed and dated notice reflecting the dates that the notice was posted to EEOC OFO Compliance Officer. For OEDCA, a copy of the notice will suffice.

(10) Supplemental Investigation will include the following: (a) A copy of the letter to the complainant acknowledging receipt from EEOC of remanded case, or a copy of the acceptance letter including language to advise that the agency is in receipt of the EEOC remand. (b) A copy of the letter to the complainant to show that the Report of Investigation (ROI) was transmitted (not the ROI itself unless specified). (c) A copy of the complainant's request for an EEOC hearing or agency final decision.

(11) Restoration of Leave. Printout or statement identifying the amount of leave restored, if applicable. If not, an explanation or statement.

(12) Civil Actions. A complete copy of the civil action complaint demonstrating same issues raised as in compliance matter.

February 7, 2007**VA Handbook 5977**

(13) Settlement Agreements. Signed and dated agreement with specific dollar amounts, if applicable. Also appropriate documentation of relief is provided.

b. The EEO Diversity Program Manager/Liaison/Specialist will monitor local compliance with OEDCA and EEOC decisions and report compliance to the Office of Policy and Compliance. The EEO Diversity Program Manager/Liaison/Specialist will notify management of the non-compliance.

February 7, 2007

VA Handbook 5977

CHAPTER 7 – OFFICIAL TIME

1. OFFICIAL TIME. If the complainant and/or their representative are employees of VA, they are entitled to a reasonable amount of official time to present the complaint and to respond to VA requests for information. The complainants, representatives, and witnesses, who are federal employees, regardless of whether they are employed by VA or some other Federal agency, shall be in duty status when their presence is authorized or required by EEOC or VA officials in connection with the complaint. “Duty Status” means normal hours of work.

a. To the extent practical, meetings, conferences, and hearings should be scheduled during normal working hours.

b. If meetings, conferences or hearings are scheduled outside of the normal work hour, the work schedule should be adjusted or rearranged to coincide with such meetings or hearings. Compensatory time, or official time should be granted to allow an approximately equivalent time off during the normal hours of work.

c. If a VA employee has already worked a full week and they are required to attend a meeting, conference or hearing on an off day, they are entitled to official time and the VA may be required to pay overtime.

2. Requesting Official Time. Official time should be requested in advance. Complainants, representatives, witnesses, and supervisors should arrive at a mutual understanding regarding the official time prior to the use of official time. VA employees are not entitled to simply take official time without first asking for it and having it approved by their supervisor.

a. Employees can request official time either orally or in writing.

b. Supervisors may require proof that the employee requires official time to engage in EEO complaint activity.

c. Employees may be required to justify the amount of official preparation time requested, where the request is for a substantial number of hours. Employees of VA are afforded a reasonable amount of official time, as defined above, to prepare for meetings, conferences, and hearings.

3. Denial of Official Time. If a request for official time, either in whole or in part, is denied, the supervisor should document the denial in writing.

a. The supervisor should provide a copy of the denied official time statement to the EEO/Diversity Program Manager/Liaison/Specialist.

b. The EEO/Diversity Program Manager/Liaison/Specialist should provide the ORM Field Office with a copy of the denied official time statement.

c. The ORM Field Office will include the denied official time statement in the pending complaint file, for which the official time was denied, noting the reason(s) for the denial.

d. If the complainant requests a hearing, EEOC will determine if the complainant was improperly denied official time. If the complainant requests a final agency decision, OEDCA will determine if the complainant was improperly denied official time. Where the complainant contends that an agency improperly denied him/her official time and EEOC or OEDCA finds in the complainant's favor, EEOC or OEDCA may order VA to restore such personal leave as the complainant may have used in lieu of official time.

e. Employees can only protest the official time denied for preparation of his/her own complaint and not for the complaints of others. Witnesses or representatives, who file complaints of discrimination because they were denied official time to work on another individual's EEO complaint, do not have standing and fail to state a claim. A complainant must challenge the denial of official time for their witness(es) or representative during the processing of the complaint for which the official time was denied. The right to raise such matters lies with the complainant and not with their witness or representative.

f. If a claim of denied official time is filed, it will be dismissed in accordance with EEOC Regulation 29 C.F.R. 1614.107(a) which states that an agency may dismiss a complaint which fails to state a claim pursuant to 29 C.F.R. 1614.103. A complainant must challenge the denial of official time during the processing of the underlying complaint.

4. Reasonable Amount of Official Time. "Reasonable" is defined as whatever is appropriate, under the particular circumstances of the complaint, in order to allow a complete presentation of the relevant information associated with the complaint and to respond to VA requests for information. The actual number of hours a complainant and their representative are entitled will vary, depending on the nature and complexity of the complaint and considering the mission of the VA and VA's need to have the employee available to perform their normal duties on a regular basis.

a. Complainants, representatives, and supervisors should arrive at a mutual understanding as to the amount of official time to be used prior to the use of official time.

b. Time spent commuting to and from home should not be included in official time computations.

5. Meetings and Hearing Time. Time spent in meetings and hearings with VA officials or EEOC Administrative Judges is automatically deemed reasonable.

6. Preparation Time. If complainants, representatives, and witnesses, are VA employees, they are also afforded a reasonable amount of official time, as defined above, to prepare for meetings, conferences, and hearings. They should be afforded a reasonable amount of official time to prepare the formal complaint and any appeals that may be filed with EEOC. "Reasonable," with respect to preparation time, is generally defined in terms of hours, not in terms of days, weeks or months.

February 7, 2007

VA Handbook 5977

7. Representatives. Representatives who are employees of VA, should spend most of their time doing the work that they are employed to do. The overall hours of official time afforded to a representative, for both preparation purposes and for attendance at meetings and hearings, may be restricted to a certain percentage of the representative's duty hours in any given month, quarter, or year. The amount of official time to be afforded to a representative for representational activities will vary depending on the circumstances. The nature of the representative's position, the relationship of the position to VA's mission, and the degree the hardship imposes on VA's mission by the representative absence from his or her normal duties should be considered. The agency is not obligated to change work schedules, incur overtime wages, or pay travel expenses to facilitate the choice of a specific representative or to allow the complainant, and representative to meet.

a. When a VA employee serves as an EEO representative for an applicant seeking employment, the representative is not entitled to official time. Official time only applies to representatives of VA and federal employees.

b. Whether or not a representative is entitled to official time depends on the status of the complainant at the time of the alleged discriminatory action and not the status of the complainant at the time representation services are required. Where the challenged action is the complainant's removal, the complainant is an employee at the time of the action and the representative is entitled to official time.

February 7, 2007

VA Handbook 5977

CHAPTER 8 - SPIN-OFF COMPLAINTS

1. DISSATISFACTION WITH THE PROCESSING OF AN EEO COMPLAINT/SPIN-OFF COMPLAINT.

If a complainant is dissatisfied with the processing of his/her pending complaint, he/she should notify the Office of Resolution Management before EEOC's Administrative Judge issues a decision on the complaint, OEDCA issues a final agency decision, or ORM dismisses the complaint. Allegations of dissatisfaction with the processing of an EEO complaint, otherwise known as a Spin-off complaint, should not be treated as a new complaint, but should be incorporated into the pending complaint for disposition. Such complaints usually involve dissatisfaction with matters such as delays, perceived bias, or misconduct by a counselor, investigator, intake specialist, or agency representative, or other similar matters relating to the underlying complaint. Dissatisfaction may be presented at the pre-complaint, informal counseling stage, or during the formal complaint process. A complainant may articulate dissatisfaction with the processing of their complaint by alleging that:

- a. their complaint is being processed in a manner different from that used for complaints filed by members not belonging to his or her protected group, or that
- b. their complaint is being adversely affected because of a specific policy or practice having a discriminatory effect on the processing of his or her complaint.

2. RECEIPT OF THE ALLEGATIONS OF DISSATISFACTION. EEOC regulations require the complainant to first raise their dissatisfaction claims with VA. This means the respective ORM Field Office, the DAS/RM, or the Office of Policy & Compliance. A complainant may raise allegations of dissatisfaction either verbally, or in writing.

3. ALLEGATIONS OF DISSATISFACTION RAISED WITH THE ORM FIELD OFFICE.

- a. When a complainant raises dissatisfaction with the process with the ORM Field Office, it should encourage the individual to put their concerns in writing.
- b. The ORM Field Office must attempt to informally resolve the dissatisfaction.
- c. The complainant's dissatisfaction and the ORM Field Manager's response should be made a part of the EEO administrative file.
- d. If the complainant files a formal complaint alleging improper processing, the claim of dissatisfaction with the processing of the complaint should be dismissed pursuant to 29 CFR §1614.107(a)(8). After the claim of dissatisfaction is dismissed, the ORM field office must send a copy of the dismissal and a referral letter to the Chief of Policy and Compliance for further processing along with the following:

- (1) A referral letter that addresses informal attempts to resolve the dissatisfaction.
- (2) A copy of the complainant's allegations.

(3) If applicable, a copy of the ORM field office's response to the complainant addressing the allegations.

(4) Any specific documentation relating to the complainant's allegations. A copy of the administrative file is not necessary, only specific documentation pertaining to the dissatisfaction should be provided.

4. ALLEGATIONS OF DISSATISFACTION INITIALLY RAISED WITH THE DEPUTY ASSISTANT SECRETARY FOR RESOLUTION MANAGEMENT. If the dissatisfaction is initially raised with the DAS/RM, the DAS/RM will forward the dissatisfaction/spin-off complaint to the Chief of Policy and Compliance. If the dissatisfaction complaint is not in writing, the DAS will encourage the individual to put their concerns in writing and request the individual to forward their concerns to the Chief of Policy and Compliance.

5. ALLEGATIONS OF DISSATISFACTION RECEIVED BY THE OFFICE OF POLICY AND COMPLIANCE. The DAS/RM has delegated the Chief of Policy and Compliance authority to consider and resolve all claims that allege dissatisfaction with the processing of an existing EEO complaint/spin-off complaint. If the dissatisfaction complaint is not in writing, the Policy and Compliance staff will encourage the individual to put their concerns in writing.

a. The Chief of Policy and Compliance will date stamp, log and assign the dissatisfaction/Spin-off complaints to a Policy and Compliance EEO Specialist.

b. The designated EEO Specialist will review and make an inquiry into the complainant's allegations of dissatisfaction. The inquiry may include the following steps:

(1) Determine if the ORM Field Office was aware of the complainant's dissatisfaction and if so, what action(s) were taken to resolve the dissatisfaction.

(2) Determine the stage of processing of the underlying EEO complaint.

(3) Request copies of relevant documents related to the dissatisfaction such as the counselor's report, investigative file, etc., if not available in the Web-based Tracking System.

c. The Office of Policy and Compliance will make the following determinations:

(1) If the processing was not compromised or impacted in any fashion, the individual will be notified that no further action will be taken and that the explanation will be incorporated into the complaint file. If the dissatisfaction is not resolved or the complainant does not agree with ORM's remedy, the individual is advised that they may present their concerns to the EEOC at either of the following stages outlined in item 6 of this chapter.

(2) If the determination concludes that the processing has been compromised, appropriate action(s) will be prepared by the Office of Policy and Compliance and the ORM Field Office will be directed to take appropriate action.

February 7, 2007**VA Handbook 5977**

d. A copy of the Chief of Policy and Compliance's response to the complainant's dissatisfaction/spin-off complaint will be mailed to the appropriate ORM Field Office with a cover letter instructing them to include a copy of response in the underlying complaint file.

e. The Office of Policy and Compliance will attach a copy of the response and enter all information relating to the dissatisfaction/spin-off complaint into the Web-Based Tracking System (WBTS).

6. UNRESOLVED/SPIN-OFF COMPLAINTS. If a dissatisfaction/spin-off complaint is not resolved, or the Complainant does not agree with the ORM's remedy, they may present their concerns to the EEOC at the following processing stages:

a. If the Complainant has requested a hearing and the complaint is under the jurisdiction of the EEOC, the complainant may present their dissatisfaction to the Administrative Judge (AJ) before the AJ issues a decision on that complaint.

b. If the Complainant has not requested a hearing, they may present their concerns to EEOC's Office of Federal Operations on appeal upon receiving a Final Agency Decision (FAD).

c. Where the AJ or OFO finds that ORM has improperly processed the original complaint and that such improper processing has had a material effect on the processing of the original complaint, the AJ or OFO may impose sanctions on ORM, as they deem appropriate.

d. If the AJ finds that ORM's actions were inconsistent with its requirements under the 29 CFR §1614 regulations, but had no material effect on the processing of the complaint, at the AJ's discretion, the AJ may suggest that the complainant submit a letter to EEOC's Federal Sector Programs Department for consideration regarding ORM's conduct.

VA Handbook 5977
Appendix B**DEFINITIONS**

a. **Aggrieved.** An aggrieved is a Federal employee, a former employee, or an applicant for employment who requests resolution of a matter through the pre-complaint informal EEO counseling process. The aggrieved person must allege discrimination based on his or her race, color, religion, gender (sex), national origin, age (40 years and over), physical or mental disability, and/or reprisal. Sexual and non-sexual harassment based on the above categories is also prohibited.

b. **Allegation of Breach of Settlement Agreement.** A claim that the agency has violated or has not performed a specific term(s) of a settlement agreement.

c. **Alternative Dispute Resolution (ADR).** ADR refers to a process and approach designed to resolve disputes in a manner that avoids the cost, delay, and unpredictability of more traditional adversarial and adjudicatory processes, such as, litigation, hearings, and appeals. Numerous types of ADR techniques exist, including mediation, facilitation, fact-finding, early neutral evaluation, the use of an Ombudsman, settlement conferences, mini-trials, and peer review. Mediation is the preferred type of technique for resolving workplace disputes in VA.

d. **Basis.** Discrimination is prohibited because of race, color, religion, gender (sex), national origin, age (40 years and over), physical or mental disability, and/or reprisal. Sexual and non-sexual harassment based on the above categories is also prohibited.

e. **Claim.** A claim is the action(s) the agency has taken, is taking or has not taken that causes the aggrieved person to believe he/she is a victim of discrimination.

f. **Class Complaint.** A class complaint is a complaint brought forth by a group of employees, former employees, or applicants for employment who allege they are adversely affected by a personnel management policy or practice which discriminates against the group on the basis of their common race, color, religion, gender (sex), national origin, age (40 years and over), physical or mental disability, and/or reprisal.

g. **Complaint.** A complaint is an allegation of illegal discrimination that is handled through the EEO discrimination complaint process. A complaint may result when an employee believes he/she has been unfairly treated because of a protected class, i.e., race, color, religion, gender (sex), national origin, age (40 years and over), physical or mental disability, and/or reprisal. The allegation itself is not proof that illegal discrimination has taken place. The investigation that follows the filing of a formal complaint will determine if illegal discrimination has, in fact, occurred. A person who files a complaint is called a complainant.

h. **Complainant.** A complainant is a Federal employee, a former employee, or an applicant for employment who requests resolution of a matter through the EEO discrimination complaint process. The complainant must allege discrimination based on

VA Handbook 5977
Appendix B

February 7, 2007

his/her race, color, religion, gender (sex), national origin, age (40 years and over), physical or mental disability, and/or reprisal.

i. **Discrimination.** The word discrimination is often used to mean illegal discriminatory acts. Discrimination simply means noticing the differences between things or people that are otherwise alike, and making decisions based on those differences. Illegal discrimination is unfair treatment of a person by category, class, or group rather than objective treatment on the basis of merit. Under EEO law, it is illegal to discriminate on the basis of race, color, religion, gender (sex), national origin, age (40 years and over), physical or mental disability, and/or reprisal or to engage in sexual or non-sexual harassment based on the above categories. Discrimination can be intentional or unintentional.

j. **Equal Employment Opportunity Commission (EEOC).** Within its headquarters in Washington, D.C., and through the operations of several offices nationwide, the EEOC coordinates all Federal equal employment opportunity regulations, practices, and policies. The Commission interprets employment discrimination laws, monitors the Federal sector employment discrimination program and oversees the development and implementation of Federal agencies' affirmative employment programs. The EEOC issues policy and regulations on the discrimination complaint system, holds hearings and makes findings on discrimination complaints, and makes final decisions on complaints that have been appealed. It also reviews, upon request, decisions of negotiated grievances and Merit Systems Protection Board appeals if they include issues of discrimination.

k. **Equal Employment Opportunity Commission (EEOC) Hearing.** A hearing is an adjudicatory proceeding that completes the process of developing a full and appropriate record. A hearing provides the parties with a fair and reasonable opportunity to explain and supplement the record and, in appropriate instances, to examine and cross-examine witnesses. Hearings are governed by 29 CFR §1614.109. An Administrative Judge from the EEOC conducts hearings to adjudicate claims of discrimination and issues decisions.

l. **Early Neutral Evaluation.** A process which involves the use of a neutral or impartial third party to provide an objective evaluation, sometimes in writing, of the strengths and weaknesses of a case. Under this method, the parties will usually make informal presentations to the neutral party to highlight their respective cases or positions.

m. **Facilitation.** A process that involves the use of techniques to improve the flow of information in a meeting between parties to a dispute. The techniques may also be applied to decision-making meetings where a specific outcome is desired (e.g., resolution of a conflict or dispute).

February 7, 2007

VA Handbook 5977
Appendix B

n. **Fact-Finding.** A process that uses an impartial expert, in order to determine what the "facts" are in a dispute. The fact finder may be authorized only to investigate or evaluate the matter presented and file a report establishing the facts in the matter.

o. **Final Agency Decision (FAD) to Dismiss.** The agency decision to dismiss an entire EEO complaint or a substantive decision without a hearing on a formal complaint of discrimination.

p. **Mediation.** A form of ADR in which a specially trained neutral third party (mediator) assists individuals to find a mutually acceptable solution to their dispute. Mediation is a problem solving process; it is voluntary, unbiased, and confidential. Employees and management using mediation must agree to participate and agree to any solution that is generated through mediation. Mediation has comprehensive applicability for VA components seeking creative, mutually acceptable, and early resolution of conflicts, and it is the preferred type of ADR for resolving workplace disputes.

q. **Mini-trials.** A process which involves a structured settlement process in which each side to a dispute presents abbreviated summaries of their case before the parties and/or their representatives who have authority to settle the dispute. The summaries contain explicit data about the legal bases and the merits of a case.

r. **Ombudsmen.** An individual who rely on a number of techniques including counseling, mediating, conciliating, and fact finding in an effort to informally resolve disputes. Usually, when an ombudsman receives a complaint, he/she interviews parties, reviews files, and makes recommendations to the disputants. Typically, an ombudsman does not impose solutions.

s. **Peer Review.** A problem-solving process where an employee takes a dispute to a group or panel of fellow employees and managers for a decision. The decision is usually not binding on the employee, and he/she would be able to seek relief in traditional forums for dispute resolution if dissatisfied with the decision.

t. **Representative.** A person who is selected and designated by the aggrieved or the agency to accompany, represent, and advise the complainant, agency or witness during any stage of the complaint process. This individual may also serve as the class agent for class action complaints.

u. **Reprisal.** Actions taken against employees that include restraint, interference, or coercion because of their involvement in filing a charge of discrimination, participating in an investigation, or having opposed prohibited discrimination.

v. **Responding Management Official (RMO).** A management official who is alleged to have acted in a discriminatory manner while acting as an agent of the agency.

VA Handbook 5977
Appendix B

February 7, 2007

w. **Settlement Agreement.** A written contract knowingly and voluntarily signed by the complainant or agent and the VA during the pre-complaint or formal complaint process that resolves an EEO complaint. The terms of the agreement are binding on both parties.

x. **Settlement Conferences.** A pre-hearing conference conducted by a settlement judge (for example an EEOC Administrative Judge) or referee and attended by representatives for the opposing parties and/or the parties themselves in order to reach a mutually acceptable settlement of the disputed matter.

y. **Spin-off Complaint.** A spin-off complaint is a complaint about the processing of an existing complaint.

z. **Whistleblowing.** Whistleblowing means disclosing information that you reasonably believe is evidence of a violation of any law, rule, or regulation, or gross mismanagement, a gross waste of funds, an abuse of authority, or a substantial and specific danger to public health or safety.

VA Handbook 5977
Appendix C**Other Grievance and Administrative Processes**

1. Merit Systems Protection Board (MSPB). The MSPB is the proper appeal forum for a Title 5 employee if the employee has been the subject of an adverse action such as a suspension for more than 14 days, a demotion, or a removal. It is also the proper forum if the employee alleges an employment action was based on his/her whistle-blowing or other protected activity. Call 1-800-653-7200 to seek advice or visit MSPB's website at www.mspb.gov.

2. Office of Special Counsel (OSC). The OSC is the proper forum if a personnel action (appointment, promotion, adverse action, disciplinary or corrective action, detail, transfer, reassignment, reinstatement, restoration, reemployment, some performance evaluations, decision concerning pay or benefits, decision to order examination, or any other significant change in duties, responsibilities or working conditions) has been threatened, proposed, taken, or not taken allegedly because of the employee's whistle-blowing or other protected activity. Call 1-800-872-9855 to seek advice or visit OSC's website at <http://www.osc.gov/>.

3. Office of the Inspector General (OIG). This office deals with possible violation(s) of law, rules or regulations; mismanagement; gross waste of funds; abuse of authority; or danger to the public health and safety. The OIG normally does not act on matters for which there is another complaint process that handles the issue; however, investigations may be conducted on the basis of matters referred by OSC or MSPB. You may contact VA's OIG at 1-800-488-8244 or visit their website at <http://www.va.gov/oig>

4. The United States Government Accountability Office (GAO). The U.S. General Accounting Office (GAO) is an agency that works for Congress and the American people. Congress asks GAO to study the programs and expenditures of the Federal government. It studies how the Federal government spends taxpayer dollars. GAO evaluates Federal programs, audits Federal expenditures, and issues legal opinions. The GAO's Office of Special Investigations may be contacted at 202 512-7470, 1 800 424-5454 or visit their website at <http://www.gao.gov>

5. Negotiated Grievance. A bargaining unit employee may elect to pursue the union grievance procedure for any grievance covered by 5 U.S.C. 7103 (a) (9) in accordance with the process set forth in the collective bargaining agreement.

6. Administrative Grievance. The Administrative Grievance process covers matters of employee concerns or dissatisfaction for which personal relief is possible and which is subject to the control of VA management, that are not expressly excluded by the VA grievance policy. This includes any matter in which an employee alleges that coercion, reprisal, or retaliation occurred against him/her for using the grievance procedure.

VA Handbook 5977
Appendix C

February 7, 2007

7. Office of Workers' Compensation Programs Claim. Work-related traumatic injury: Must be filed within three years of date of injury. (20 C.F.R. 10.100) Occupational disease caused by exposure to injurious work factors: Must be filed within three years of onset of illness. (20 C.F.R. 10.101)

8. Position Classification Appeal. Employees who are dissatisfied with the classification or grading of their positions have the right to appeal the decision. An appeal may be filed at any time and may involve the grade, series, title, or pay system coverage for the position. Employees under the General Schedule (5 U.S.C., chapter 51 and 5 CFR 511) have the option of (1) appealing to VA; (2) appealing to OPM through VA; or, (3) appealing directly to OPM. Employees covered under the Federal Wage System must first appeal to VA (unless the grading of their job has been certified by OPM; in that case, they must appeal to OPM). If they are dissatisfied with the VA's decision, they may appeal to OPM. For more information contact your local Human Resource Department or visit OPM's website at <http://www.opm.gov/fedclass>.

9. Veterans Alleging Service or Benefit Discrimination. Veterans alleging discrimination in service or benefits should contact in writing the Deputy Assistant Secretary for Resolution Management (08), 810 Vermont Avenue, NW, Washington, DC 20420.

10. Veteran Information. Veterans who want more information on VA Benefits can call 1-800 827-1000 or visit the VA's web site at <http://www.va.gov>.

Department of Veterans Affairs		BREACH OF SETTLEMENT AGREEMENT ALLEGATION	
NOTE: Attach a copy of the settlement agreement. If additional space is needed continue on page 2, which is provided solely for extra space.		RETURN TO Department of Veterans Affairs Office of Resolution Management Office of Policy and Compliance (08B) 810 Vermont Avenue, NW Washington, DC 20420	
NAME OF EMPLOYEE John Doe		NAME OF VA FACILITY Any VA Facility	
HOME MAILING ADDRESS 123 Any Road Any Town, Any State 12345-1234		MAILING ADDRESS OF VA FACILITY 345 Any Road Any Town, Any State 12345-1234	
HOME TELEPHONE NUMBER (123) 123-1234		BUSINESS TELEPHONE NUMBER (345) 345-3456	
WHAT CLAIM(S) AND BASIS(ES) DID THE AGREEMENT SETTLE? The agreement settled my EEO complaint, case number 123-456-78910. My claim was that I was not selected for the GS-3030-05-06, Administrative Support Assistant position, Vacancy Announcement XX555-5555-XX, because of my sex (Male).			
DID YOU CONTACT THE EEO PROGRAM MANAGER WHEN YOU FIRST BECAME AWARE THAT A BREACH OCCURRED? <input checked="" type="checkbox"/> NO <input type="checkbox"/> YES (If "YES," provide approximate date and case number assigned.)		APPROXIMATE DATE N/A	NAME OF PERSON CONTACTED N/A
WHAT SPECIFIC PROVISION(S) OF THE SETTLEMENT AGREEMENT DO YOU BELIEVE WAS BREACHED? I believe that provision 3 (a) was breached. Provision 3 (a) states that I, John Doe, will be afforded the opportunity to attend Excel training conducted by Learning Resources on July 15, 2222.			
EXAMPLE			
HOW WAS THE SETTLEMENT AGREEMENT BREACHED? (Reference any actions that occurred that made you believe the settlement agreement was breached. Provide the names of the individuals you believe breached the settlement agreement. Please be specific, and if available, provide supporting documentation.) I believe that provision 3 (a) was breached by Ms. Jane Smith, my supervisor. Ms. Smith breached the agreement on July 15, 2222, when she failed to allow me to attend the Excel training in accordance with provision 3 (a) of the July 1, 2222, settlement agreement. On July 13, 2222, Ms. Smith notified me that she would not allow me to attend the training and that she would not reschedule me for the training. I asked Ms. Smith if I could attend Excel training at a later date and she said "no".			
PROVIDE DATE(S) AS TO WHEN YOU BELIEVE THE SETTLEMENT WAS BREACHED (Regulations require submission of breach claims to be submitted within 30 days of when you became aware, or should have been aware of the noncompliance with the agreement.) July 15, 2222			
IF YOU DO NOT MEET THE 30 DAY TIMEFRAME, EXPLAIN WHY THE DELAY N/A			
SIGNATURE OF EMPLOYEE Mr. John Doe		DATE 08/01/2222

Last Modified: Sun Nov 25 21:05:09 CST 2018

38 United States Code 516, as enacted in Title I, Public Law 105-114, 105th Congress, November 21, 1997, directs the **Secretary** to provide that the employment discrimination complaint resolution system be established and administered in a **fair**, objective manner that encourages **timely and fair resolution**

Title: Section Â§ 2.6 - Secretary's delegations of authority to certain officials (38 U.S.C. 512).Context:

Title 38 - Pensions, Bonuses, and Veterans' Relief. CHAPTER I - DEPARTMENT OF VETERANS AFFAIRS. PART 2 - DELEGATIONS OF AUTHORITY.

§ 2.6

Secretary's delegations of authority to certain officials (38 U.S.C. 512).

Employees occupying or acting in the positions designated below are delegated authority as indicated:

(a) Veterans Health Administration. The Under Secretary for Health is delegated authority:

(1) To act on all matters assigned to the Veterans Health Administration by statute (38 U.S.C. Ch. 73) and by regulation, except such matters as require the personal attention or action of the Secretary.

(2) To revise, exceed, delete, increase, or decrease fees contained in Department of Veterans Affairs Veterans Health Services and Research Administration Manual M-1, part I, appendix A (following agreement therefor as provided in the contract with the intermediary involved), in an approved State fee schedule, and to add additional fees when found to be necessary, provided such fees are not in excess of those customarily charged the general public, in the community concerned, for the same service.

(3) To designate the Deputy Under Secretary for Health, or other physician of the Veterans Health Administration, and authority is hereby delegated such designee to perform the functions prescribed in paragraph (a)(2) of this section.

(4) To revise, exceed, delete, increase or decrease dental fees established in Department of Veterans Affairs Veterans Health Services and Research Administration Manual M-4, chapter 6, and any amendments thereto, and to add additional fees when found to be necessary, provided: such fees are not in excess of those customarily charged the general public, in the community concerned, for the same service.

(5) To designate the Assistant Chief Medical Director for Dentistry, and authority is hereby delegated such designee, to perform the functions prescribed in paragraph (a)(4) of this section.

(6) To supervise programs for grants to the Republic of the Philippines and medical care for Commonwealth Army veterans and Philippine Scouts in Veterans Memorial Medical Center, Manila, pursuant to the provisions of 38 U.S.C. ch. 17, subch. IV.

(7) To designate the Deputy Under Secretary for Health of the Veterans Health Administration and authority is hereby delegated such designee to designate a Department of Veterans Affairs full-time physician or nonmedical Director to serve as an ex officio member on advisory bodies to State Comprehensive Health Planning agencies and to individual Regional Medical Programs in those areas in which there is located one or more Department of Veterans Affairs hospitals or other health facilities, who shall serve on such advisory group as the representative of the Department of Veterans Affairs health facilities located in that area.

(8) To authorize Directors of Department of Veterans Affairs property and facilities under the charge and control of the Department of Veterans Affairs to appoint police officers with the power to enforce Federal laws and Department of Veterans Affairs regulations, to investigate violations of those laws and to arrest for crimes committed on Department of Veterans Affairs property to the full extent provided by Department policies and procedures.

(Authority: 38 U.S.C. 501 and 512)

(9) To develop and establish minimum safety and quality standards for adaptive equipment provided under chapter 39 of title 38, United States Code, or to appoint a designee to perform these functions.

(b) Veterans Benefits Administration—(1) General. The Under Secretary for Benefits is delegated authority to act on all matters assigned to the Veterans Benefits Administration except as provided in § 1.771 of this chapter and to authorize supervisory or adjudicative personnel within his/her jurisdiction to perform such functions as may be assigned.

(2) Philippines. The Director, Department of Veterans Affairs Regional Office, Manila, Philippines, is delegated authority to exercise such authorities as are delegated to directors of regional offices in the United States, which are appropriate to the administration in the Republic of the Philippines of the laws administered by the Department of Veterans Affairs.

(c) Office of Management. (1) The Assistant Secretary for Management (Chief Financial Officer) is delegated authority to act on all matters assigned to his/her office, and to authorize supervisory personnel within his/her jurisdiction to perform such functions as may be assigned. Appropriate written notification will be furnished other Federal agencies concerning such authorizations.

(2) The Assistant Secretary for Management (Chief Financial Officer) is delegated authority under 31 U.S.C. 1553(c)(1), to approve, in a fixed appropriation account to which the period of availability for obligation has expired, obligational increases related to contract changes when such transaction will cause cumulative obligational increase for contract changes during a fiscal year to exceed \$4 million but not more than \$25 million; for this responsibility the Assistant Secretary for Management (Chief Financial Officer) shall act as a member of the Office of the Secretary and shall report to and consult with the Secretary on these matters.

(d) Assistant Secretary for Management (Chief Financial Officer); administration heads and staff office directors. The Assistant Secretary for Management (Chief Financial Officer) is delegated authority to take appropriate action (other than provided for in paragraphs (e)(3) and (e)(4) of this section) in connection with the collection of civil claims by VA for money or property, as authorized in § 1.900, et seq. The Assistant Secretary for Management (Chief Financial Officer) may redelegate such authority as he/she deems appropriate to administration heads and staff office directors.

(Authority: 38 U.S.C. 501, 512)

(e) General Counsel. (1) The General Counsel is delegated authority to serve as the Regulatory Policy Officer for the Department in accordance with Executive Order 12866. The General Counsel, the Principal Deputy General Counsel, the Deputy General Counsel, Central Office, and the Director of the Office of Regulation Policy and Management are delegated authority to manage, direct, and coordinate the Department's rulemaking activities, including the revision and reorganization of regulations, and to perform all functions necessary or appropriate under Executive Order 12866 and other rulemaking requirements.

(Authority: 38 U.S.C. 501, 512)

(2) Under the provisions of 38 U.S.C. 515(b), the General Counsel, Deputy General Counsel, Assistant General Counsel and Regional Counsel, or those authorized to act for them, are authorized to consider, ascertain, adjust, determine, and settle tort claims cognizable thereunder and to execute an appropriate voucher and other necessary instruments in connection with the final disposition of such claims.

(3) Under the provisions of “The Federal Medical Care Recovery Act,” 42 U.S.C. 2651, et seq. (as implemented by part 43, title 28, Code of Federal Regulations), authority is delegated to the General Counsel, Deputy General Counsel, Assistant General Counsel (Professional Staff Group I), Deputy Assistant General Counsel of said staff group, and Regional Counsels or those authorized to act for them, to collect in full, compromise, settle, or waive any claim and execute the release thereof; however, claims in excess of \$100,000 may be compromised, settled, or waived only with the prior approval of the Department of Justice.

(4) Under the Federal Claims Collection Act of 1966, 31 U.S.C. 3711, et seq., authority is delegated to the General Counsel, Deputy General Counsel, Assistant General Counsel, Deputy Assistant General Counsel and Regional Counsel, or those authorized to act for them, to:

(i) Make appropriate determinations with respect to the litigative probabilities of a claim (§ 1.932 of this chapter), the legal merits of a claim (§ 1.942(e) of this chapter), and any other legal considerations of a claim.

(ii) Collect in full a claim involving damage to or loss of government property under the jurisdiction of the Department of Veterans Affairs resulting from negligence or other legal wrong of a person (other than an employee of the Government while acting within the scope of his or her employment) and to compromise, suspend, or terminate any such claim not exceeding \$100,000.

(iii) Collect a claim in full from an individual or legal entity who is liable for the cost of hospital, medical, surgical, or dental care and treatment of a person, and to compromise, suspend, or terminate any such claim not exceeding \$100,000.

(Authority: 31 U.S.C. 3711(a)(2); 38 U.S.C. 501, 512)

(iv) The delegations of authority set forth in paragraphs (e)(4)(ii) and (iii) of this section do not apply to the handling of any claim as to which there is an indication of fraud, the presentation of a false claim or misrepresentation on the part of the debtor or any other party having an interest in the claim, or to any claim based in whole or in part on conduct in violation of the antitrust laws. Such cases will be considered by the General Counsel, who will make the determination in all instances as to whether the case warrants referral to the Department of Justice. The delegations of authority are applicable to those claims where the Department of Justice determines that action based upon the alleged fraud, false claim, or misrepresentation is not warranted.

(5) Pursuant to the provisions of the Military Personnel and Civilian Employees' Claim Act of 1964, 31 U.S.C. 3721, as amended, the General Counsel, Deputy General Counsel, Assistant General Counsel (Professional Staff Group III), Deputy Assistant General Counsel of said staff group, and Regional Counsel or those authorized to act for them, are authorized to settle and pay a claim for not more than \$40,000 made by a civilian officer or employee of the Department of Veterans Affairs for damage to, or loss of, personal property incident to his or her service. (Pub. L. 97-226)

(6) Under the provisions of 38 U.S.C. 7316(e), authority is delegated to the General Counsel, Deputy General Counsel, and the Assistant General Counsel (Professional Staff Group I) to hold harmless or provide liability insurance for any person to whom the immunity provisions of section 7316 apply, for damage for personal injury or death, or for property damage, negligently caused by such person while furnishing medical care or treatment in the exercise of his or her duties in or for the Veterans Health Administration, if such person is assigned to a foreign country, detailed to State or political division thereof, or is acting under any other circumstances which would preclude the remedies of an injured

third person against the United States, provided by sections 1346(b) and 2672 of title 28, United States Code, for such damage or injury.

(7) The General Counsel, Deputy General Counsel, and those authorized to act for them, are authorized to conduct investigations, examine witnesses, take affidavits, administer oaths and affirmations, and certify copies of public or private documents on all matters within the jurisdiction of the General Counsel. Pursuant to the provisions of § 2.2(c), the General Counsel, Deputy General Counsel, and those authorized to act for them, are authorized to countersign VA Form 4505.

(8) The General Counsel, or the Deputy General Counsel acting as or for the General Counsel, is authorized to designate, in accordance with established standards, those legal opinions of the General Counsel which will be considered precedent opinions involving veterans' benefits under laws administered by the Department of Veterans Affairs.

(Authority: 38 U.S.C. 501, 512)

(9) Under the provisions of 38 U.S.C. 1729(c)(1), authority is delegated to the General Counsel, Deputy General Counsel, Assistant General Counsel (Professional Staff Group I), Deputy Assistant General Counsel of said staff group, and Regional Counsel, or those authorized to act for them, to collect in full, compromise, settle, or waive any claim and execute the release thereof; however, claims in excess of \$100,000 may only be compromised, settled, or waived with the prior approval of the General Counsel, Deputy General Counsel, Assistant General Counsel (Professional Staff Group I), or Deputy Assistant General Counsel of said staff group, or those authorized to act for them.

(Authority: 31 U.S.C. 3711(a)(2); 38 U.S.C. 501, 512).

(10) Except as prescribed in paragraph (g)(3) of this section, the General Counsel, Deputy General Counsel, and the Assistant General Counsel for Professional Staff Group IV are authorized to make final Departmental decisions on appeals under the Freedom of Information Act, the Privacy Act, and 38 U.S.C. 5701, 5705 and 7332.

(Authority: 38 U.S.C. 512)

(11) All authority delegated in this paragraph to Regional Counsels will be exercised by them under the supervision of and in accordance with instructions issued by the General Counsel.

(f) National Cemetery Administration. Under Secretary for Memorial Affairs is delegated authority:

(1) To act on all matters assigned to the National Cemetery Administration by statute (38 U.S.C. chapter 24) and by regulation except where specifically requiring the personal attention or action of the Secretary and to authorize supervisory personnel within the jurisdiction of the Under Secretary for Memorial Affairs, to perform such functions as may be assigned.

(2) To designate, as deemed necessary, Superintendents of National Cemeteries as special investigators under 38 U.S.C. 901, however, such law enforcement authority is limited to enforcement of rules and regulations governing conduct on property under the charge and control of the Department of Veterans Affairs, as those rules and regulations apply to the cemetery over which the individual Superintendent exercises control and jurisdiction. Such designation will not authorize the carrying of firearms by any Superintendent.

(3) To accept donations, except offers of land, made in any manner, for the beautification or benefit of national cemeteries.

(4) To name features in national cemeteries, such as, roads, walks, and special structures.

(5) To establish policies and specifications for inscriptions on Government headstones, markers, and private monuments.

(Authority: 38 U.S.C. 501, 512, 2404)

(g) Inspector General. (1) The Secretary delegates to the Inspector General, the authority, as head of the Department of Veterans Affairs, to make written requests under the Privacy Act of 1974, 5 U.S.C. 552a(b)(7), for the transfer of records or copies of records maintained by other agencies which are necessary to carry out an authorized law enforcement activity of the Office of Inspector General. This delegation is made pursuant to 38 U.S.C. 512. The Inspector General may redelegate the foregoing authority within the Office of Inspector General, but the delegation may only be to an official of sufficient rank to ensure that the request for the records has been the subject of a high level evaluation of the need for the information.

(2) The Inspector General delegates the authority under the Inspector General Act of 1978, and redelegates the authority under paragraph (a) of this section, to request Privacy Act-protected records from Federal agencies pursuant to subsection (b)(7) of the Privacy Act to each of the following Office of Inspector General officials: (i) Deputy Inspector General, (ii) Assistant Inspector General for Investigations, (iii) Deputy Assistant Inspector General for Investigations, (iv) Chief of Operations, and (v) Special Agents in Charge of Field Offices of Investigations. These officials may not redelegate this authority.

(3) The Office of Inspector General is authorized to make final decisions on appeals submitted pursuant to the Freedom of Information Act concerning any Office of Inspector General records.

(Authority: 38 U.S.C. 512)

(h) Delegations to Office Resolution Management Officials (ORM). (1) The Deputy Assistant Secretary for Resolution Management is delegated authority to supervise and control the operation of the administrative EEO Discrimination Complaint Processing System within the Department.

(2) The Deputy Assistant Secretary for Resolution Management, the Chief Operating Officer, and all Regional EEO Officers/Field Managers are delegated authority to make procedural agency decisions to either accept or dismiss, in whole or in part, EEO discrimination complaints based upon race, color, national origin, sex, religion, age, disability, or reprisal filed by employees, former employees, or applicants for employment.

(3) The Deputy Assistant Secretary for Resolution Management, the Chief Operating Officer, and the Chief, Policy and Compliance are delegated authority to make agency decisions on all breach of settlement claims raised by employees, former employees, and applicants for employment.

(4) The Deputy Assistant Secretary for Resolution Management, the Chief Operating Officer, and the Chief, Policy and Compliance are delegated authority to consider and resolve all claims raised by employees, former employees, and applicants for employment that allege dissatisfaction with the processing of a previously filed EEO discrimination complaint.

(5) The Deputy Assistant Secretary for Resolution Management, the Chief Operating Officer, and the Chief, Policy and Compliance are delegated authority to monitor compliance by Department organizational components with orders and decisions of the OEDCA and the EEOC.

(i) Delegations to officials of the Office of Employment Discrimination Complaint Adjudication (OEDCA). (1) The Director and Associate Director, OEDCA, are delegated authority to make procedural decisions to dismiss, in whole or in part, any EEO discrimination complaint filed by any employee, former employee, or applicant for employment that may be pending before OEDCA, where administrative complaint processing efficiency may be best served by doing so.

(2) The Director and Associate Director, OEDCA, are delegated authority to dismiss, in whole or in part any EEO discrimination complaint based upon race, color, religion, sex, national origin, age, disability, or reprisal filed by any ORM employee, former employee, or applicant for employment.

(3) The Director and Associate Director, OEDCA, are delegated authority to make the agency decision on all breach of settlement claims raised by ORM employees, former employees, and applicants for employment.

(4) The Director and Associate Director, OEDCA, are delegated authority to consider and resolve all claims raised by ORM employees, former employees, and applicants for employment that allege dissatisfaction with the processing of a previously filed EEO discrimination complaint.

(5) The Director and Associate Director, OEDCA, are delegated authority to make procedural agency decisions to either accept or dismiss, in whole or in part, EEO discrimination complaints filed by employees, former employees, or applicants for employment where the **ORM must recuse itself from a case due to an actual, apparent, or potential conflict of interest.**

(j) Delegation to the Chairman, Board of Veterans' Appeals. In cases where OEDCA has recused itself from a case due to an actual, apparent, or potential conflict of interest, the Chairman, Board of Veterans' Appeals, is delegated authority to make procedural agency decisions to dismiss, in whole or in part, EEO discrimination complaints filed by agency employees, former employees, and applicants for employment; to make substantive final agency decisions where complainants do not request an EEOC hearing; to take final agency action following a decision by an EEOC Administrative Judge; and to make final agency decisions ordering appropriate remedies and relief where there is a finding of discrimination.

(k) Processing complaints involving certain officials. A complaint alleging that the Secretary or the Deputy Secretary personally made a decision directly related to matters in dispute, or are otherwise personally involved in such matters, will be **referred for procedural acceptability review, investigation, and substantive decision making to another Federal agency (e.g., The Department of Justice) pursuant to a cost reimbursement agreement.** Referral will not be made when the action complained of relates merely to ministerial involvement in such matters (e.g., ministerial approval of selection recommendations submitted to the Secretary by the Under Secretary for Health, the Under Secretary for Benefits, the Under Secretary for Memorial Affairs, assistant secretaries, or staff office heads).

Hey (b) (6)

I'm forwarding this email string between (b) (6) and myself so you can have her contact information. When I spoke with her at the Orlando Vet Center Open House, she is very much interested in initiating Vet Center Services to Seminole County. She stated she needs a location and I know you are the best to find that, as you have done so in the past. Hopefully, we can have better results this time and actually start the readjustment counseling process. I apologize for such a late response in responding to (b) (6) conversation. The plate has been full with mostly Veterans Treatment Court, Veterans Day, VA volunteering and election commitments. I know your plate is pretty full also, but I know you will do your best.

Thanks!

Hey (b) (6)

This is just a test email to see if I copied your contact information correctly. I will carbon copy you with any correspondence concerning Vet Center Services for Seminole County. I'm sorry I haven't responded until now. I've been very busy with various commitment to include Election Day, and Veterans Treatment Court on Thursday. I spoke with Ed (b) (6) and Judge (b) (6) this morning, and they are happy we talked. By the way, Happy Veterans Day!

Thanks!

The Pop-Up Auction added an event.

14 mins ·

"Thank You for Your Service Shero's" Please take this opportunity to put these words to practical use. The Pop-up Auction and the National Association of Concerned Veterans (NACV) are working together to help our sisters transitioning from military action to civilian life.

Female veterans are just as much a hero as her counterparts on the front lines. She is strong and rooted. She believes in our country's freedoms and will fight for its survival. She is our veteran hero and while she has asked for nothing in return we feel compelled to give her a place to lay her head when her military journey is done. A safe place to clear her head, consider her plans, and get back on her feet. We want to give her (our female veteran) hope for her future.

NACV is rehabilitating a house in the Mt. Rainer section of Washington, DC. It is a peaceful location in this Nations Capital, near transportation, healthcare, and jobs. The single family home is on a .25 acre lot with a porch and plenty of space to breath. We intend to house three veteran women and develop a plan for their successful transition to civilian life.

Instead of a GO Fund me account we went to a number of donors who have blessed us with some very nice Antique Road Show items we hope to turn into cash. These funds will support the NACV initiative to complete the Mt. Rainer house and provide residential safety to Female vets (our Shero's).

I look forward the online live auction as well as the concurrent Pop-up physical silent auction at 932 Philadelphia Ave in Silver Spring, Maryland. We have items like the 1st Wonder Woman magazine as it originally appeared in 1942; Marvel Group Comic Peter Parker the Spectacular Spider Man; Sport Magazine memorabilia like "The Ring" highlighting the Foreman-Norton fight; historic coins; 1920's Van Cleef similar jewelry and so much more.

Come Join The Pop-up Auction and NACV in saying "Thank you for your service" to women in the military. Bid on and purchase items with helping women transition in mind. Come out on Saturday, November 17th and Sunday November 18th and be prepared to support a good, transparent, and visible cause. [REDACTED] Silver Spring, MD 20904.

POP-UP AUCTION PROJECT SCOPE

Date: Saturday, November 17, 2018 and Sunday, November 18, 2018

Time: 08:00am to 4:00pm

Location: (b) (6)

Silver Spring, MD 20910

Presented by: "The (b) (6)

In association with: (b) (6) (Army), National Association of Concerned Vets; (b) (6) (Navy Veteran); Dr. (b) (6) (Private); and (b) (6) (Air Force), Luxury Homes International

OVERVIEW

1. Project Background and Description

This project is a mission for hope. It is intended to explore how a collaborating group can assist in addressing housing issues for transitioning female veterans in crisis. The plan was introduced by Mr. Rodger Robinson and Mr. Cecil Byrd. Cecil Byrd is an active member of the National Association of Concerned Veteran. He is currently renovating a residence located in Washington, DC intended for female veterans in crisis.

The vision is to rehabilitate available real estate to subsidize temporary housing opportunity for Female veterans transitioning, building, and adjusting to civilian life. This attempt is to connect and collaborate with organizations that provide steps to success for female veterans.

2. Project Scope

This is an exploratory pilot project to organize and define how a series of pop-up auctions can support a sustainable funding source intended to support transitioning veterans. Housed in a commercial establishment these Pop-up functions primary goal will be to establish agreements with various supporters and collect commissions from participating sellers. The project pilot will begin with the sale of 50 donated and consigned items. Each item will be auctioned silently via internet and in-person. A percentage equal to 25% of the winning bid price will go toward Mr. Byrd's program for veteran women. Only items committed by Mr. Byrd and Mr. Robinson will go toward this effort. Secondary seller(s) who wish to use space for sale of items such as movable art, jewelry, coins, collectable magazines, and minimal/portable furniture may be provided the opportunity to sell items in this festive environment. Each seller will donate \$50.00 to the primary organization in support of efforts to house women veterans. Sponsors are encouraged to provide financial donations.

Secondary Sellers are expected to register and are responsible for all aspects of transport, performance, and other applicable characteristics related to the commercial sale of their items and other property. No items shall remain on the premises after their sale-day.

Guests of the Pop-up will register at the front desk for accountability.

There will be a celebrity Guest who will assist in the live auction of 2 special items; 35% of the proceed will be donated to the specified female housing initiative.

There will be inventory of all auction items and a list of secondary Sellers. NO SAME DAY Seller registrants will be accepted.

3. High-Level Requirements

Systems will require are

Ability to sell and accept payments online.

Ability to access and update inventory list.

Physical Security

Connection and support for Social media on Twitter, YouTube, Facebook, Instagram, and LinkedIn.

Collaboration with Live Auction.com

Transportation to and from site for the (50) primary donations

Ability to incorporate automated routing and notifications based on business rules

4. Deliverables

Roundtrip Transportation for primary product

Event Insurance

Promotion

Volunteers [staging and design]

Basic Accounting: Square Services and dedicated bank account for closeout

Music

Food trucks

7. Specific Exclusions from Scope

It will be clear to all that this is a Pilot event to determine whether these pop-up events are a good fit for the collaborative. All items in this sale are donated and shall be returned to the responsibility of its owner at the end of the Pop-up.

8. Implementation Plan

1	<p><i>Recommend to showcase all (50) auction items at the 932 Philadelphia Ave Silver Spring site.</i></p> <p><i>Roundtrip trip transportation is the responsibility of the donor.</i></p> <p><i>Items will be prepped and presented for sale to bidders</i></p> <p><i>A Bid sheet will be set in front of each of the 50 items. 36 will have a public final sale announcement every half hour; and until from start Saturday to closing Sunday. Two items may reach final sale on some half hours.</i></p> <p><i>Bidders will be responsible for transportation of the items sold [unless otherwise suggested]</i></p>
2	<p><i>Volunteers will be stationed at different posts and spread among the three floors</i></p> <p><i>A greeter volunteer will be present at front desk to register guest</i></p>
3	<p><i>Security will also be available to support the safety of our participants and guests.</i></p>
4	<p><i>Hours of operation will be from 8am to 4pm of Saturday and Sunday with a light breakfast provided for volunteers only. Doors will close promptly at 4pm.</i></p>
5	<p><i>Sellers are expected to set up their booths and breakdown during the hours operation. Sellers are expected to have registration fee paid in full prior to the event. If more than, 10 sellers become committed prior to the event date than the demand will change space pricing to \$50 per day.</i></p>

9. High-Level Timeline/Schedule

A Map and Design Plan will be available after the volunteers Saturday, October 19, 2019 site visit.

All activity for this project shall be concluded by Monday, November 18, 2018. Following the event closing an assessment to determine the continuation of similar pop-up projects will be made.

Describe the timeline/schedule plan, design, develop and deploy the project.

APPROVAL AND AUTHORITY TO PROCEED

We approve the project as described above, and authorize the team to proceed.

DEPARTMENT OF VETERANS AFFAIRS
Washington DC 20420

May 10, 2019

In Reply Refer To: 001B
FOIA Request: 18-11960-F

Daniel McGrath, Staff Attorney
Austin Evers, Executive Director
American Oversight
1030 15th Street NW, Suite B255
Washington, DC 20005
foia@americanoversight.org; daniel.mcgrath@americanoversight.org

Dear Mr. McGrath:

This is the Fifth Partial Initial Agency Decision (IAD) to your Freedom of Information Act (FOIA) request to the Office of the Secretary, U.S. Dept. of Veterans Affairs (OSVA) dated and received August 23, 2018, and assigned FOIA tracking number **18-11960-F**. You requested: All records reflecting communications (including emails, email attachments, text messages, messages on messaging platforms (such as Slack, GChat or Google Hangouts, Lync, Skype, or WhatsApp), telephone call logs, calendar invitations/entries, meeting notices, meeting agendas, informational material, talking points, any handwritten or electronic notes taken during any oral communications, summaries of any oral communications, or other materials) between any of the individuals listed

- Veterans Affairs Officials
 - Darin Selnick, Senior Advisor to the Secretary
 - Casin Spero, Special Advisor
 - Individuals within the Offices of the Secretary and Deputy Secretary: David Shulkin, Former Secretary, and anyone acting on his behalf
 - Vivieca Wright Simpson, Former Chief of Staff
 - Pete O'Rourke, Former Chief of Staff, Former Acting Secretary, and Senior Advisor to the Secretary; and anyone acting on his behalf
 - Robert Wilkie, Secretary, and anyone acting on his behalf
 - Jacquelyn Hayes-Byrd, Acting Chief of Staff and Deputy Chief of Staff
 - Thomas Bowman, Deputy Secretary, and anyone acting on his behalf
 - Any political appointee* in the immediate Office of the Secretary or Deputy Secretary during the applicable time period not previously listed above
- Outside Recipients
 - Dan Caldwell
 - Nathan Anderson
 - Shannon Hough
 - Pete Hegseth
 - Any email address ending in @cv4a.org or @cvafoundation.org
 - Isaac "Ike" Perlmutter
 - Bruce Moskowitz
 - Marc Sherman
- All email communications between any of the individuals listed in Column A and any external individuals or organizations (i.e., emails with addresses ending in com/.org/.net/.mil/.edu) that mention one or more of the following search terms in the subject line, body of the email, or attachment:
 - a. "Concerned Veterans"
 - b. "Concerned Vets"
 - c. CVA

d. CV4A

Please provide all responsive records from January 20, 2017, through the date of the search.”

There is substantial overlap between FOIA request **18-11960-F** and your prior FOIA request **18-07426-F**, as there are responsive records responsive to both FOIA requests.

18-11960-F: 5th Partial IAD

After re-reconsidering OSVA’s FOIA Exemption 5 redactions to pages Bates-numbered 1003-1005 and 1124-1132, OSVA no longer redacts them per FOIA Exemption 5.

After re-considering OSVA’s FOIA Exemption 5 redactions to a briefing memorandum and talking points (Bates-numbered 1030-1031), OSVA still believes those redactions are warranted. Exemption 5 permits an agency to withhold material reflecting the thoughts, opinions, and recommendations of federal officials reviewing an issue. Under the deliberative process privilege and FOIA Exemption 5, OSVA redacts portions of talking points and a briefing memorandum prepared for Secretary Shulkin for his meeting with Rep. Cathy McMorris-Rodgers. The redacted information is both predecisional and deliberative because it reflects preliminary opinions and recommendations, which do not reflect VA’s final decision. Exposure of premature discussions before a final decision is made could create undue public confusion. The release of the redacted information would negatively impact the ability of federal employees to openly and frankly consider issues amongst themselves when deliberating, discussing, reviewing, and making recommendations on VA programs. The information reveals the thoughts, deliberations, and opinions that, if released, would have a chilling effect on the ability of federal officials to discuss, opine, recommend or be forthcoming about the agency’s issues which require full and frank assessment. Here, the disclosure of the withheld information is likely to compromise the integrity of this deliberative or decision-making process. Moreover, the predecisional character of a document is not altered by the passage of time. Bruscino v. BOP, No. 94-1955, 1995 WL 444406 at *5 (D.D. C. May 15, 1995), aff’d in part, No. 95-5212, 1996 WL 393101 (D.C. Cir. June 24, 1996); Access Reports v. DOJ, 926 F.2d 1192, 1196-97 (D.C. Cir. 1991) (“talking points” memoranda are predecisional); ACLU v. DHS, 738 F. Supp. 2d 93, 112 (D.D.C. 2010) (“‘talking points’ are predecisional . . . the document itself suggests that a public statement was anticipated at the time of its creation, and given that no official statement has yet been made, the talking points remain ripe recommendations that are ready for adoption or rejection by the Department”); Sec. Fin. Life Ins. Co., No. 03-102-SBC, 2005 WL 839543, at *11 (D.D.C. Apr. 12, 2005) (“The undisputed evidence establishes that these [talking points] are deliberative”); Judicial Watch, Inc. v. U.S. Dep’t of Commerce, 337 F. Supp. 2d 146, 174 (D.D.C. 2004) (protecting “talking points” and recommendations on how to answer questions); St. Louis Sewer Dist., No. 10-2103, at *18 (E.D. Mo. Mar. 2, 2012) (protecting e-mail communications, “press releases, talking points and ‘Q & A,’” drafts, and briefing materials); Citizens for Responsibility & Ethics in Wash. v. DHS, 514 F. Supp. 2d 36, 44 (D.D.C. 2007) (protecting briefing materials concerning Hurricane Katrina response including proposed “solutions and approaches”); Judicial Watch, Inc. v. DOE, 310 F. Supp. 2d 271, 317 (D.D.C. 2004) (protecting briefing materials for Secretary of the Interior), aff’d in part, rev’d in part on other grounds & remanded, 412 F.3d 125, 133 (D.C. Cir. 2005); Klunzinger v. IRS, 27 F. Supp. 2d 1015, 1026 (W.D. 1998) (protecting paper to brief commissioner for meeting); Thompson v. Dep’t of the Navy, No. 95-347, 1997 WL 527344, at *4 (D.D.C. Aug. 18, 1997) (protecting materials to brief senior officials responding to media inquiries, as “disclosure of materials reflecting the process by which the Navy formulates its policy concerning statements to and interactions with the press” could stifle frank communication within the agency), aff’d, No. 97-5292, 1998 WL 202253, at *1 (D.C. Cir. Mar. 11, 1998) (per curiam); Williams v. DOJ, 556 F.

Supp. 63, 65 (D.D.C. 1982) (protecting "briefing papers prepared for the Attorney General prior to an appearance before a congressional committee").

Thus far, OSVA has released to you four thousand nine hundred seventy-six (4,976) pages for FOIA requests **18-07426-F** and **18-11960-F**. Please kindly consider whether "Concerned Vet" or "Concerned Veterans" are limiting enough search terms, which yield false positive emails from veterans claiming to be a "concerned vet" or "concerned veteran," as well as emails referencing the National Association of Concerned Veterans.

18-11960-F: 5/8/19, 4th Partial IAD & Reasonable Searches Dated 12/19/18 & 5/2/19

On December 19, 2018, the OSVA FOIA Officer requested that the VA IT office search through the email boxes of the below twelve (12) custodians from January 20, 2017, to December 19, 2018:

- 1) Wilkie, Robert L., Jr., VA Secretary;
- 2) Shulkin, David, former VA Secretary;
- 3) O'Rourke, Peter M., former VA Acting Secretary;
- 4) Byrne, Jim, current VA Acting Deputy Secretary;
- 5) Bowman, Thomas, former VA Deputy Secretary;
- 6) Powers, Pam, current VA Chief of Staff;
- 7) Hayes-Byrd, Jacquelyn, former VA Acting Chief of Staff;
- 8) Wright-Simpson, Vivieca, former VA Chief of Staff;
- 9) Selnick, Darin, former VA White House Senior Advisor;
- 10) Lukach, Michael, former VA White House Senior Advisor;
- 11) Leinenkugel, Jake, former VA White House Senior Advisor; and,
- 12) Spero, Casin D, former VA White House Liaison.

The VA IT office provided search results, with the OSVA FOIA Officer to conduct secondary searches via the Clearwell e-discovery platform.

On May 2, 2019, using the Clearwell e-discovery platform, the OSVA FOIA Officer used the key terms "Concerned Veterans of America," "CVA," "cv4a.org," "CV4A," "Concerned Vets," and "Concerned Veterans" to search through the email boxes of the aforementioned twelve (12) custodians. Excluding the previous Clearwell search results for the First through Third Partial Initial Agency Decisions, this May 2, 2019, Clearwell search yielded approximately two hundred twenty (220) emails and their attachments totaling approximately five thousand (5,000) pages.

On May 8, 2019, of the approximate two hundred twenty (220) emails and their attachments totaling approximately five thousand (5,000) pages, OSVA released fourteen (14) emails and their attachments totaling five hundred seventy-four (574) pages, Bates-numbered as 4555-5128. After reviewing the five hundred seventy-four (574) pages, OSVA redacted some information with FOIA Exemptions 5 and 6.

5 U.S.C. § 552(b)(5) exempts from required disclosure "inter-agency or intra-agency memorandums or letters which would not be available by law to a party other than an agency in litigation with the agency." Under the attorney-client and work product privileges, the VA redacted portions of records, emails, and communications between VA employees and attorneys relating to federal lawsuits against the VA. The release of this information would impede the ability of VA employees and attorneys to speak openly and frankly about legal issues concerning lawsuits against the VA. The release of this information would also compromise the VA's legal positions for its lawsuits.

5 U.S.C. § 552(b)(6) exempts from required disclosure "personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy." FOIA Exemption 6 permits VA to withhold a document or information within a document if disclosure of the information, either by itself or in conjunction with other information available to either the public or the FOIA requester, would result in an unwarranted invasion of an individual's personal privacy without contributing significantly to the public's understanding of the activities of the federal government. Specifically, the information being withheld, as indicated on the enclosed documents, under FOIA Exemption 6, consists of names, identities, email addresses, VA usernames, phone numbers, cellular numbers, and facsimile numbers of federal employees and private citizens; we however release the names and VA email addresses of VA Senior Executives. Federal civilian employees and private citizens retain a significant privacy interest under certain circumstances, such as in instances where the release of their information could represent a threat to their well-being, harassment, or their ability to function within their sphere of employment. The federal civilian employees and private citizens whose information is at issue have a substantial privacy interest in their personal information. In weighing the private versus the public interest, except names and VA email addresses of VA Senior Executives, we find that there is no public interest in knowing the names, identities, email addresses, VA usernames, phone numbers, cellular numbers, and facsimile numbers of federal civilian employees and private citizens. The coverage of FOIA Exemption 6 is absolute unless the FOIA requester can demonstrate a countervailing public interest in the requested information by demonstrating that the individual is in a position to provide the requested information to members of the general public and that the information requested contributes significantly to the public's understanding of the activities of the Federal government. Additionally, the requester must demonstrate how the public's need to understand the information significantly outweighs the privacy interest of the person to whom the information pertains. Upon consideration of the records, I have not been able to identify a countervailing public interest of sufficient magnitude to outweigh the privacy interest of the individuals whose names are redacted. The protected information has been redacted and (b)(6) inserted. Releasing even a single VA username reveals the pattern to ascertain VA usernames that VA employees use to log into VA Systems of Records; releasing VA usernames exposes the VA, its employees, and its contractors to potential hacking and information technology security liabilities and risks. "Withholding a telephone number or e-mail address, alone, is not sufficient to protect that [privacy] interest; alternate means of contacting and harassing these employees would be readily discoverable on the Internet if this court ordered their names disclosed." Long v. Immigration & Customs Enf't, 2017 U.S. Dist. LEXIS 160719 (D.C. Cir. 2017).

18-11960-F: 5/2/19, 3rd Partial IAD & Reasonable Searches Dated 9/6/18 & 9/11/18

On September 6, 2018, the OSVA FOIA Officer requested that the VA IT office search through the email boxes of the below ten (10) custodians from January 20, 2017, to September 6, 2018:

- 1) Wilkie, Robert L., Jr., VA Secretary;
- 2) Shulkin, David, former VA Secretary;
- 3) O'Rourke, Peter M., former VA Acting Secretary;
- 4) Bowman, Thomas, former VA Deputy Secretary;
- 5) Hayes-Byrd, Jacquelyn, former VA Acting Chief of Staff;
- 6) Wright-Simpson, Vivieca, former VA Chief of Staff;
- 7) Selnick, Darin, former VA White House Senior Advisor;
- 8) Lukach, Michael, former VA White House Senior Advisor;
- 9) Leinenkugel, Jake, former VA White House Senior Advisor; and,
- 10) Spero, Casin D, former VA White House Liaison.

The VA IT office provided search results, with the OSVA FOIA Officer to conduct secondary searches via the Clearwell e-discovery platform.

On September 11, 2018, using the Clearwell e-discovery platform, the OSVA FOIA Officer used the key terms "Concerned Veterans of America," "CVA," and "cv4a.org" to search the email boxes of: former VA Secretary David Shulkin, Robert Wilkie, Peter O'Rourke, Thomas Bowman, Jacquelyn Hayes-Byrd, Vivieca Wright-Simpson, Darin Selnick, Michael Lukach, Jake Leinenkugel, and Casin Spero. This Clearwell search yielded one hundred eighty-two (182) documents totaling three thousand five hundred thirty-one (3,531) pages.

On November 30, 2018, OSVA released to you one hundred seventy-nine (179) documents totaling three thousand five hundred twenty-four (3,524) pages, Bates-numbered as 996-4547 (with 1508-1535 intentionally left blank), redacted with FOIA Exemptions 4, 5, 6, 7(C), and 7(E). On February 14, 2019, OSVA released three (3) documents and their attachments totaling seven (7) pages, Bates-numbered as 4548-4554, redacted with FOIA Exemptions 5 and 6.

18-11960-F: 2/14/19, 2nd Partial IAD & Reasonable Searches Dated 9/6/18 & 9/11/18

From the aforementioned searches dated September 6, 2018, and September 11, 2018, OSVA released three (3) documents and their attachments totaling seven (7) pages, Bates-numbered as 4548-4554, on February 14, 2019, redacted with FOIA Exemptions 5 and 6.

18-11960-F: 11/30/18, Initial Partial IAD & Reasonable Searches Dated 9/6/18 & 9/11/18

Of the searches dated September 6, 2018, and September 11, 2018, OSVA released seventy-nine (179) documents totaling three thousand five hundred twenty-four (3,524) pages on November 30, 2018, Bates-numbered as 996-4547 (with 1508-1535 intentionally left blank), on November 30, 2018.

After reviewing the three thousand five hundred twenty-four (3,524) pages, OSVA redacted some information with FOIA Exemptions 4, 5, 6, 7(C), and 7(E). 5 U.S.C. § 552(b)(4) exempts from disclosure "trade secrets and commercial or financial information obtained from a person and privileged or confidential." Redacted information includes voluntary proposal submission verbiage, technical processes, technical approaches, and partnership or subcontracting agreements. The release of this information would likely lead to substantial competitive harm in reverse-engineering of the vendors' technical approaches, processes, partnership, subcontracting, and business and labor strategies. RMS Indus. v. DOD, No. C-92-1545, slip op. at 7 (N.D. Cal. Nov. 24, 1992) (protecting "descriptions of equipment and the names of contacts, customers, key employees, and subcontractors" because "bidders only submit such information if it will not be released to their competitors"); BDM Corp. v. SBA, 2 Gov't Disclosure Serv. (P-H) ¶ 81,189, at 81,495 (D.D.C. Mar. 20, 1981) (protecting names of consultants and subcontractors, performance, cost, and equipment information).

5 U.S.C. § 552(b)(7)(C) exempts from required disclosure information law enforcement information the disclosure of which "could reasonably be expected to constitute an unwarranted invasion of personal privacy." Redacted information includes names and email addresses of White House employees with security clearances, as well as Redacted information includes names, identities, email addresses, and VA usernames of VA law enforcement employees. The release of this information would risk impersonation of these White House employees with security clearances also working on national security and law enforcement matters, as well as jeopardizing their health and safety and those the White House employees are charged with protecting. The release of this information would risk impersonation of VA law enforcement

personnel and jeopardize the health and safety of not only law enforcement personnel, but those persons the VA law enforcement personnel protect including the VA Secretary.

5 U.S.C. § 552(b)(7)(E) exempts from required disclosure information that “would disclose techniques and procedures for law enforcement investigations or prosecutions, or would disclose guidelines for law enforcement investigations or prosecutions if such disclosure could reasonably be expected to risk circumvention of the law.” Redacted information includes VA usernames of VA law enforcement employees and shared VA email groups, for which VA law enforcement officials plan their law enforcement operations and protection of VA personnel. The release of this information would compromise the safety of VA law enforcement personnel and VA employees.

18-07426-F: 11/20/18, 2nd Partial IAD & Reasonable Searches Dated 5/8/18, 9/18/18, 10/12/18, 10/16/18, & 11/15/18

On October 12, 2018, and October 16, 2018, the OSVA FOIA office searched through former VA Acting Secretary Peter O'Rourke's emails and calendars from May 4, 2018, to June 22, 2018. The OSVA FOIA office used the search terms Sherman, Perlmutter, Moskowitz, @frenchangel59.com, and Kushner. These October 12, 2018, and October 16, 2018, searches yielded forty-four (44) pages, which the VA released redacted as pages Bates-numbered 243-286 on November 20, 2018.

On September 18, 2018, and October 16, 2018, the OSVA FOIA office searched through former VA Acting Chief of Staff Jacquelyn Hayes-Byrd's emails and calendars from November 8, 2016, to June 22, 2018. OSVA used the search terms Sherman, Perlmutter, Moskowitz, @frenchangel59.com, and Kushner. This search yielded two hundred fifty-five (255) pages, which OSVA released redacted as pages Bates-numbered 287-541 on November 20, 2018.

On October 18, 2018, the OSVA FOIA office searched through the email boxes and calendars, from January 20, 2017, to June 22, 2018, of: 1) Bowman, Thomas, former VA Deputy Secretary; 2) Wright-Simpson, Vivieca, former VA Chief of Staff; 3) Selnick, Darin, former VA White House Senior Advisor; 4) Lukach, Michael, former VA White House Senior Advisor; 5) Leinenkugel, Jake, former VA White House Senior Advisor; and 6) Spero, Casin D, former VA White House Liaison. The OSVA FOIA office used the search terms Sherman, Perlmutter, Moskowitz, @frenchangel59.com, and Kushner. This search yielded two hundred seventy-two (272) pages, which OSVA released redacted as pages Bates-numbered 542-813 on November 20, 2018.

On November 15, 2018, the OSVA FOIA office searched through the email boxes and calendars from June 23, 2018, to September 6, 2018, including of:

- 1) Wilkie, Robert L., Jr., VA Secretary;
- 2) O'Rourke, Peter M., former VA Acting Secretary;
- 3) Bowman, Thomas, former VA Deputy Secretary;
- 4) Hayes-Byrd, Jacquelyn, former VA Acting Chief of Staff;
- 5) Wright-Simpson, Vivieca, former VA Chief of Staff;
- 6) Selnick, Darin, former VA White House Senior Advisor;
- 7) Lukach, Michael, former VA White House Senior Advisor;
- 8) Leinenkugel, Jake, former VA White House Senior Advisor; and,
- 9) Spero, Casin D, former VA White House Liaison.

The November 15, 2018, search yielded two pages, which OSVA release redacted as pages Bates-numbered 814-815 on November 20, 2018.

Our May 8, 2018 (our search cut-off date) search yielded fifty-six (56) pages of email communication to or from Jared Kushner. On November 20, 2018, OSVA released these fifty-six (56) pages redacted as pages Bates-numbered 816-871.

After reviewing six hundred twenty-nine (629) pages Bates-numbered 243-871, OSVA redacted some information with FOIA Exemptions 4, 5, 6, and 7(C). Pages bates-numbered 872-995 are intentionally left blank.

18-07426-F: 9/14/18, Partial IAD & Reasonable Searches Dated 5/8/18

On May 8, 2018, our search cut-off date, we searched through former VA Secretary David Shulkin's emails and calendars from February 14, 2017 (the date he became VA Secretary), to March 30, 2018 (the date he left VA). We searched through VA Secretary Robert Wilkie's emails and calendars from April 1, 2018 (the date he became VA Acting Secretary) to May 8, 2018.

We searched through former VA Acting Secretary Peter O'Rourke's emails and calendars from February 15, 2018 (the date he became VA Acting Chief of Staff), to May 3, 2018. VA will conduct a follow-up search of former VA Acting Secretary Peter O'Rourke's emails and calendars from May 4, 2018, to May 8, 2018.

OSVA searched for any emails to or from Mr. Perlmutter, Dr. Moskowitz, and Mr. Kushner. Our search thus far yielded two hundred ninety-eight (298) pages, of which fifty-six (56) pages require consultation with the White House FOIA Liaison. After reviewing two hundred forty-two (242) pages, OSVA redacted some information with FOIA Exemptions 5, 6, 7(C), and 7(E). Bates-numbered as 1-242 on September 14, 2018.

FOIA Mediation

As part of the 2007 FOIA amendments, the Office of Government Information Services (OGIS) was created to offer mediation services to resolve disputes between FOIA requesters and Federal agencies as a non-exclusive alternative to litigation. Using OGIS services does not affect your right to pursue litigation. Under the provisions of the FOIA Improvement Act of 2016, the following contact information is provided to assist FOIA requesters in resolving disputes:

VA Central Office FOIA Public Liaison:

Name: John Buck

Email Address: vacofoiaservice@va.gov

Office of Government Information Services (OGIS)

Email Address: ogis@nara.gov

Fax: 202-741-5769

Mailing address:

National Archives and Records Administration

8601 Adelphi Road

College Park, MD 20740-6001

FOIA Appeal

This concludes OSVA's fifth partial IAD to request **18-11960-F**. Please be advised that should you desire to do so, you may appeal the determination made in this response to:

Office of General Counsel (024)

Department of Veterans Affairs

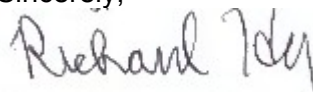

810 Vermont Avenue, NW

Mr. McGrath, Esq., & Mr. Evers
Page 8
May 10, 2019

Washington, DC 20420

If you should choose to file an appeal, please include a copy of this letter with your written appeal and clearly indicate the basis for your disagreement with the determination set forth in this response. Please be advised that in accordance with VA's implementing FOIA regulations at 38 C.F.R. § 1.559, your appeal must be postmarked no later than ninety (90) days of the date of this letter.

Sincerely,

A handwritten signature in dark ink, appearing to read "Richard Ha".

Richard Ha, JD, CIPP/G
OSVA FOIA Officer

Subject: Former Senate Majority Leader Dr. Frist
Date: Thu Jun 01 2017 16:32:31 EDT
Attachments:

I had a long phone conversation with former Senate Majority Leader Dr. Bill Frist last week. Dr. Frist did part-time surgery for over 15 years at the VA Hospital in Nashville. He was also one of the co-chairs of the CVA Fixing Veterans Healthcare Taskforce.

As you know Dr. Frist is a board member for a lot of different types of Healthcare companies and wants to use his expertise and connections to help you and VA healthcare. Below is the follow up email he sent me on four areas he feels he can be helpful with.

One example is Valor Healthcare. VALOR is the biggest CBOC contract care provider for VA with 33 CBOCs that see 110,000 veterans each year. As a contract provider they have the flexibility we don't. I met with their president and they told me they can stand up a NEW CBOC, in 90 days after a contract is signed, at half the cost it takes VA. That would give us the ability to stand up new CBOCs quickly, at less cost, and without the need for legislation. We could also deal with our provider shortage by having more CBOC be contract and moving providers from there to more critical areas. By the way, the OIG did two studies in 2010 and 2011 comparing VA staff CBOC vs. contract CBOC in terms of quality, OIG found no difference.

I think Dr. Frist as past Majority leader could also help us with the Senate in passing legislation.

My recommendation is to set up a meeting with you, Poonam and myself, with Dr. Frist and [REDACTED] MD, President of Valor. [REDACTED] is an Army veteran who was also the Medical Director of the VA Denton, TX CBOC. Dr. Frist comes to DC every couple of weeks so it will be easy to schedule the meeting.

Let me know if you want to go forward with the meeting with Dr. Frist and I will set it up.

Thanks

Darin

Darin Selnick

Subject: issues discussed

Darin,

Great to catch up and excited about the opportunities to accelerate your and the Secretary's initiatives there.

- 1.Primary care and access. I have forwarded to you a memo on Valor and hopefully you can discuss innovation here which can be rapidly adopted.
- 2.Palliative health care. Aspire Health is the largest nonhospice, community based palliative care company in the country and is now in 20 states and on cutting edge with better outcomes and huge savings. They are aware of a pilot that the VA has done which apparently was successful and I would like to put CEO Brad Smith with your smartest person to, again on the innovation and on the service front, meet and discuss how the VA can incorporate this high quality patient and family centered service for advanced illness to our veterans – quickly.
- 3.Infrastructure: I am on the board of AECOM, the largest design and architecture firm in the country, . The VA is a very important client of AECOM as we are engaged with the agency through several contracts and through the Army Corps of Engineers, which now oversees the major construction projects for the VA. AECOM completed the design for the VA hospital in Orlando and has delivered more than a dozen renovation projects over the last couple of years. Would love to further this

relationship. Again quality and speed and expertise is primary.

4. Partnerships. I would suggest in the health IT world and mobile technology and communication world, that the VA meet (b) (6) who is the CEO of Accolade. Partnering with Accolade would potentially greatly accelerate VA entry into the patient navigation world. Their development team is very experienced, 100% health care, and is currently working with 10 of the largest employers in the country.

Thanks for taking time to discuss these opportunities. And thanks for helping me navigate through the VA to serve our veterans (which I had the privilege of doing every week in the operating room for 15 years!

<p>10. VHA needs accountability</p>	<p>Assessment I p. 43</p> <p>VHA employees want to move from a bureaucratic, political, and siloed organization to one defined by accountability, trust, and efficiency.</p>

“Dutchess has made significant progress with Hudson River Housing in driving down the total number of veterans who are struggling to find housing or are homeless, and the action by the VA to not continue the program — it’s absurd,” Molinaro said. “What is most egregious is to have received notice only three weeks before Hudson River Housing would have to fire their employees and shutter the program.”

He said there’s bipartisan support for continued funding from U.S. Sen. Charles Schumer, State Sen. Sue Serino, R-Hyde Park, and Reps. John Faso, R-Kinderhook, and Sean Patrick Maloney, D-Cold Spring, all of whom spoke out opposing the action.

Maloney called the decision “heartless” in a statement and said the organization has been a “lifeline for hundreds of men and women who wore our country’s uniform and needed some help when they got home.”

In a statement, Schumer spokesman Jason Kaplan said: “This is deeply concerning about the wrongheaded decision by the VA to discontinue this vital funding so that Hudson River Housing can continue to do the great work they do to keep our at-risk veterans from becoming homeless. They have done outstanding work so it makes little sense to hinder their ability to deliver top-notch service to our veterans. ...our office is working closely with Rep. Maloney’s office and local officials to bring our concerns to the highest levels of the VA.”

Faso sent a letter Wednesday to John Kuhn, national director of the VA’s Support Services for Veteran Families, imploring him to “use the full resources at your disposal to support HRH, and more importantly the veterans who are now at risk of homelessness, in order to deliver the services they require.

“Dutchess County simply does not have the capacity to deal with this issue without an adequate funding stream,” Faso said in the letter, “because HRH is the only program providing direct housing and support services to local veterans and their families.”

[Back to Top](#)

3.8 - Press of Atlantic City: [Veterans push for better health care, experts fight to provide it](#) (14 September, Nicole Leonard, 320k online visitors/mo; Pleasantville, NJ)

NORTHFIELD — Dozens of men and women squeezed together in a small conference room at the VA Outpatient Clinic in Northfield on a hot summer afternoon.

The crowd, the majority veterans in their 60s, 70s and 80s, looked ready for battle as they stood shoulder to shoulder, arms crossed and some prepared with notes as they faced off with local, state and regional officials from the U.S. Department of Veterans Affairs.

It wasn’t nearly as dangerous as the situations these veterans faced while serving in the military, but it ranked high in priority as most of the South Jersey veterans voiced their demands for better localized health care while VA experts expressed their desire to give it to them.

“We believe community care is sufficient,” said Vince Kane, director at the Wilmington VA Medical Center. “We have to get out of the medical centers and get closer to where the veterans

live. They can't all go through Wilmington. As an example, we're working in Cape May to relocate services to those people."

An estimated 355,766 veterans live in New Jersey, according to the VA. Some areas of the state have more than others, including Cape May County, where veterans make up nearly 9 percent of the population, one of the highest rates in the state.

Many of the veterans who get health care through the VA said they are generally happy with the quality of care they receive, as the VA has some of the most advanced medical technology and experts in the country.

The issues lie in the access and delivery of it, veterans said.

"There have been attempts at the county level to make medical care more accessible and affordable to veterans," said Frank Formica, Atlantic County freeholder chairman and an Air Force veteran. "It seems like there's been a trend in the country to pay more attention to local communities, but we don't have enough resources to execute those services."

Many veterans continue to champion the federal Veterans Choice Program, which allows veterans to use private providers outside VA clinics and hospitals to get care if they live more than 40 miles from a VA center or have to wait more than 30 days for a consultation.

Funding for the program was set to run out this summer, but President Donald Trump signed a bill last month that allocated an additional \$2.7 billion to keep it going.

Instead of having to travel long distances, sometimes on VA shuttles, veterans are able to go to local providers, with approval, for injury treatment, procedures and specialty care, but the service is complicated.

Veterans' concerns included not getting choice approval, long wait times for paperwork to go through and gaps in communication between an outside provider and the VA.

"I needed emergency spine surgery and used the choice program, which was great because I got one of the best spine surgeons in the country at Penn (Medicine)," said one veteran at the Northfield meeting. "Then I needed therapy, and funding ran out. It took five weeks to get re-approved for services that I needed immediately."

Frustration was felt by both the veterans and those who provide services in the region, as many VA officials said they want nothing more than to increase access to health care, bring more services to South Jersey clinics and reduce issues that have prevented veterans from getting care in a timely manner.

Federal regulations, rules and policies often limit the way in which they can make changes at the county level, VA officials said.

Another issue VA officials found was a lack of eligible veterans enrolling and using VA services for their physical and behavioral health needs. Among the 6,000 eligible veterans in Cape May County, fewer than half are enrolled and only 1,824 are actively using services, Kane said.

Kane said he and other VA officials need to identify how to increase participation, adding he is optimistic that changes coming down the pipeline will lead to better outcomes and satisfaction with services in South Jersey.

At the Cape May community-based outpatient clinic, officials hope to expand the physical footprint and increase the number and range of health care services at that location.

Jackie Hinker, U.S. Veteran Affairs Veteran Community Outreach Specialist, said veterans have been looking forward to an expansion “for the longest of time.”

In addition to the brick and mortar clinics, the VA runs mobile clinics that visit several sites through New Jersey every month to provide basic health care checks and tests. One such clinic regularly stops at Stockton University where William Richmann, 68, of Galloway Township gets his annual health visits.

As far as the choice program, Kane said the VA has established relationships with Shore Medical Center, Cape Regional Medical Center and Inspira Health Network, and is talking about working more with others like AtlantiCare and Bacharach Institute for Rehabilitation.

David Hughes, Shore Medical Center Chief Financial Officer, said the hospital has the ability and willingness to treat more veterans than it is currently limited to because of strict agreement contracts under the choice program.

“One of the things we’re working on is a program specifically for vets so that they can go to their local doctor and for us to provide services so that they don’t need to get on a bus for hours,” he said. “We will do whatever we need to for the needs of veterans.”

At the end of the day, both veterans and VA officials agreed they want better streamlined services, shorter wait times, increased accessibility to local care and the resources to establish and improve more programs.

Current plans for improvement are just the beginning, VA officials said.

[Back to Top](#)

3.9 - WKRG (CBS-5): [VA Offers Beds For Hurricane Irma Victims In Florida Nursing Homes](#) (14 September, 272k online visitors/mo; Mobile, AL)

In a press release sent out Thursday by the Department of Veterans Affairs, the U.S. Secretary of Veterans Affairs David Shulkin announced that the VA is making beds available to non-Veteran nursing home residents affected by Hurricane Irma.

This announcement comes after the new reports Wednesday that eight residents of a Florida nursing home died from what appeared to be heat exposure, likely caused by faulty air conditioning at their facility in Hollywood Hills.

Secretary Shulkin has been working with Florida Governor Rick Scott and Senator Bill Nelson and their staffs on this issue since Wednesday evening.

"We thank Governor Scott and Senator Nelson for involving VA and are grateful we can help our fellow citizens where we can in this time of need," said Shulkin. "All Americans are pulling together to help one another, and we must make a special effort for those most vulnerable to the conditions brought on by the storm."

VA has the ability to make its facilities available to non-Veterans as part of its fourth mission to support national, state and local emergency management, public health, safety and homeland security efforts and also through a mission agreement with FEMA under a Stafford Act Declaration.

Secretary Shulkin agreed to make more beds available to non-Veteran nursing home residents as needed and free, while ensuring they continue the primary mission of providing healthcare to Veterans.

The VA is also working closely with the U.S. Department of Health and Human Services and the Federal Emergency Management Agency on the overall response to Irma, in addition to this specific issue.

"We will continue to look for ways to relieve the hardship this powerful storm has caused," said Shulkin. "Much of the heavy-lifting to recover from the hurricane is still to come and our leaders and staff are determined to find as many ways as we can for VA to help in the response."

[Back to Top](#)

3.10 - WUSF Public Media: [VA Secretary Offers Beds To Nursing Home Patients Affected By Irma](#) (14 September, Bobbie O'Brien, 197k online visitors/mo; Tampa, FL)

The tragic deaths of eight nursing home residents after Irma knocked out their air conditioning has prompted the U.S. Secretary of Veterans Affairs to offer up available beds at Florida's VA nursing homes.

The Florida Department of Veterans Affairs operates six nursing homes for veterans built with federal and state money.

Dr. David Shulkin, U.S. Secretary of Veterans Affairs, said that part of the VA's mission is to support emergency management and public health which allows them to open up to non-veterans impacted by Hurricane Irma.

In a news release, Shulkin said he was working with Gov. Rick Scott and U.S. Sen. Bill Nelson to help nursing home residents.

"All Americans are pulling together to help one another, and we must make a special effort for those most vulnerable to the conditions brought on by the storm," Shulkin said.

But Shulkin emphasized that veterans remain their primary mission and the circumstances will not change that.

Five of Florida's veterans' homes lost power during the hurricane, but a state spokesman said all the homes had backup generators and have since had power restored.

[Back to Top](#)

3.11 - KSNT (NBC-27): [VA opening Veterans Crisis Line in Topeka – expected to hire 100 people](#) (14 September, Grant Stephens, 161k online visitors/mo; Topeka, KS)

The U.S. Veterans Administration is opening it's third Veterans Crisis Line call center in Topeka. It's expected to hire 100 employees.

"When it comes to preventing Veteran suicide, we will do everything we can to make it as easy as possible for Veterans to reach us," said VA secretary Dr. David J. Shulkin. "The new center in Topeka gives us more feet on the ground and an easier way for Veterans to connect with us when they need us most."

The VA already has two call centers, one in upstate New York, and one in Atlanta, Georgia. The VA says the Topeka call center will be located on the VA campus and is expected to open in the fall.

The new center will bring the total number of crisis line responders to 610.

The agency says that since its launch in 2007, the VCL has answered more than 3 million calls. Since launching chat in 2009 and text services in November 2011, the VCL has answered nearly 359,000 and nearly 78,000 requests for chat and text services.

Veterans in crisis can call the Veterans Crisis Line for confidential support 24 hours a day, seven days a week, 365 days a year at 800-273-8255 and Press 1, chat online at VeteransCrisisLine.net/Chat or text to 838255.

For more information or to apply for openings at the new call center, visit www.usajobs.gov/GetJob/ViewDetails/478700400 or www.usajobs.gov and search for announcement No. 10046052.

[Back to Top](#)

3.12 - Florida Politics: [VA hospitals to take in nursing home residents, Bill Nelson says](#) (14 September, Scott Powers, 161k online visitors/mo; Saint Petersburg, FL)

The U.S. Department of Veterans Affairs will make beds in VA facilities available to residents of Florida nursing homes that have no power, Sen. Bill Nelson said Thursday.

Nelson said he saw that the VA had done so with refugees from the U.S. Virgin Islands, accepting them into the VA hospital at Puerto Rico, and asked them Wednesday, before news of the horrific six-death incident in Hollywood, if the same could be done in Florida.

"I called the VA secretary [David Shulkin] yesterday," Nelson said. "He said, 'Absolutely!' He said, 'You have my authority to make that happen.'"

Nelson said he's now working with an assistant secretary to get it done.

Nelson said he is not certain how many beds might be available in Florida's VA facilities.

The VA issued a release Thursday saying that Shulkin has been working with both Florida Gov. Rick Scott and Nelson and their staffs on this issue beginning yesterday evening.

"We thank Governor Scott and Senator Nelson for involving VA and are grateful we can help our fellow citizens where we can in this time of need," Shulkin stated in the release. "All Americans are pulling together to help one another, and we must make a special effort for those most vulnerable to the conditions brought on by the storm."

The VA has the ability to make its facilities available to non-veterans as part of its fourth mission, to support national, state and local emergency management, public health, safety and homeland security efforts and also through a mission agreement with FEMA under a Stafford Act Declaration.

Shulkin agreed to make more beds available to non-veteran nursing home residents as needed and free, while ensuring we continue our primary mission of providing healthcare to Veterans, the release stated.

The VA is also working closely with the U.S. Department of Health and Human Services and the Federal Emergency Management Agency on the overall response to Irma, in addition to this specific issue.

[Back to Top](#)

3.13 - ideastream.org (Audio): [Cleveland VA Gets National Recognition](#) (13 September, Stephanie Jarvis, 145k online visitors/mo; Cleveland, OH)

As the battle against the opioid epidemic rages on, a local program to manage opioid addiction among some of our region's most at-risk patients is gaining national recognition.

Of all the veteran's hospitals in the country, the Northeast Ohio VA Healthcare System is being recognized for its innovative program to cut down on opioid prescriptions and addiction among the veterans it serves – at a time Ohio sits at the epicenter of the opioid crisis. Thursday, the Secretary of Veterans Affairs, along with New Jersey Governor Chris Christie - who heads up the White House Opioid Task Force, will travel to Cleveland to learn more about the VA's program.

To help us understand how the program is helping our region's veterans steer clear of pain pills -- and how it may be a model for other health systems, ideastream's Kay Colby spoke with Dr. Ali Mchaourab, the head of the pain management program at the Cleveland VA.

3.14 - ideastream.org (Video/Audio): [President's Opioid Task Force Learns Best Practices from Cleveland VA](#) (14 September, Annie Wu, 145k online visitors/mo; Cleveland, OH)

The U.S. Secretary of Veterans Affairs joined President Trump's opioid task force at the Cleveland VA Medical Center on Thursday. They were in town to hear from VA doctors on their best practices for pain management and opioid use including guidelines for prescribing opioids, alternative medicine for dealing with pain, and a continuum of care for opioid addiction.

Nationally, the VA has been using these practices since 2013. Locally, the VA began even earlier and Secretary of Veterans Affairs Dr. David Shulkin says Cleveland is showing strong results.

"Just 4 percent of the patient population they serve are using and being prescribed opioids, which is well, well below what you would find across the country."

At a roundtable discussion that included President Trump's advisor Kellyanne Conway, the VA shared some of its practices to address pain, including the use of alternative treatments such as acupuncture, yoga and meditation.

"In not all cases must pain management mean pain medicine. There are opioids and there are other modalities. And we saw that first hand here. To read about it is one thing. To intuit as a lay person is quite another. But to see it in practice is quite remarkable and something I will take back to the White House and really never forget."

The opioid task force will issue its report on November first.

The group's chairman—New Jersey Governor Chris Christie says his group is working with the White House to designate the opioid epidemic a national emergency.

"The president is getting advice from his staff and from lawyers on the best way to do that, and I'm confident that in the very near future he will execute the documents that need to be executed for us to be able to do that. But the biggest problem would be is if we did it in a way that was haphazard and less effective and have to go back and redo it."

President Trump said in August he intended to make the national emergency declaration—opening up federal funds to address the problem—but he has yet to do so.

3.15 - KIII (ABC-3, Video): [VA Outpatient Clinic closed due to damage from Harvey](#) (14 September, 65k online visitors/mo; Corpus Christi, TX)

Among the facilities that suffered significant damage in Hurricane Harvey was the Corpus Christi Veteran's Affairs Outpatient Clinic.

The building suffered water damage and beginning Monday, veterans who normally receive primary care services at the clinic will be treated at the Corpus Christi Specialty Outpatient Clinic on Enterprize Parkway or the Patient Aligned Care Team Annex Building, which is near the VA's outpatient clinic.

It is expected to take about 130 days to make repairs to the VA building.

[Back to Top](#)

3.16 - KXXV (ABC-25, Video): [Reminding veterans of local services this Suicide Prevention Week](#) (13 September, Holly Stouffer, 54k online visitors/mo; Waco, TX)

It's Suicide Prevention Week and a local veterans affairs center is making sure the veteran community knows of the resources available to them.

According to the Department of Veterans Affairs, an average of 20 veterans die by suicide each day.

The Waco VA offers a number of resources to help those struggling with their mental health, including its Center of Excellence, which focuses on researching the events that lead up to suicidal thoughts.

"The classic one certainly is a major depressive disorder, but even minor feelings of depression," said Dr. Richard Seim, a clinical psychologist at the Center of Excellence. "PTSD, traumatic brain injury, symptoms of military sexual trauma or even just kind of life issues like marital problems or family functioning issues."

Dr. Seim said this type of research allows them to better serve veterans who could use additional treatment after going through traditional therapy.

"One of the studies we've been running for the last seven years now is tracking veterans as they come back from recent wars in Iraq and Afghanistan and looking at those symptoms of PTSD, traumatic brain injury and so forth to see how they change over time," said Dr. Seim.

Dr. Seim said the Center of Excellence is also about to open a new clinic. It will involve using magnetic waves to stimulate the brain, which will help to alleviate symptoms of depression.

If you know a veteran struggling with depression, call the Veterans Crisis Line at 1-800-273-8255.

[Back to Top](#)

3.17 - WEWS (ABC-5, Video): [White House Opioid Task Force looks for answers to crisis in Cleveland](#) (13 September, Mona Kosar, 17k online visitors/mo; Cleveland, OH)

With the opioid epidemic considered a national emergency, News 5 has learned the answer to this scourge may be here in Cleveland. The president's opioid task force is coming here to look for some answers.

Behind the wall of the Louis Stokes Cleveland VA Medical Center lies a possible solution to a national crisis. “I think the lessons we have learned can be duplicated in the private sector,” said Medical Director Susan Fuehrer.

Those lessons started a decade ago when the center began addressing the over-prescription of addictive opioids with other alternatives such as yoga and physical therapy.

“Rather than just prescribe opioids to manage pain they have been working on evidence based management and alternative therapy,” Fuehrer said.

From 2008 to 2015, the center saw a 50% reduction in the prescription of opioids. Even at the height of the epidemic, the center was recognized for its reduction. “There have been lots of ways that we have been identified as a best practice within the VA health care system,” said Fuehrer.

Their practices haven’t gone unnoticed in Washington either. When it came time for the newly formed white house opioid task force to seek a solution, they pinpointed The Louis Stokes Center.

“They will be meeting with multi disciplinary people and they are going to speak to a veteran or two who have recovered from opioid addiction,” said Fuehrer.

Fuehrer says this is an opportunity for their work to have a national impact.

“If one or two things make a difference for one or two people outside the VA community, then we will call tomorrow a success,” Fuehrer said.

3.18 - Missoula Current: [Tester urges VA to move quicker in opening new Missoula health clinic](#) (14 September, Martin Kidston, 17k online visitors/mo; Missoula, MT)

President Donald Trump signed Sen. Jon Tester’s bill securing a lease for a larger Veterans Affairs clinic in Missoula on the first day of August, marking a positive step for a facility that’s long been in need of expansion.

Now, the state’s senior senator is asking the VA to expedite the process.

Tester this week sent a letter to VA Secretary David Shulkin asking the agency to move the process forward, saying the region’s demand for VA care is projected to increase 43 percent over the next 20 years.

While it traditionally takes the VA as long as five years to open a new clinic once authorization is given, Tester said the Missoula facility is needed sooner rather than later.

“To the greatest extent possible, I urge the department to expedite the process for leasing the recently authorized replacement of the outpatient clinic in Missoula in order to better meet current and future patient demand,” Tester wrote. “I urge the VA to move with all due speed to procure this facility.”

Trump signed Tester's VA Choice and Quality Employment Act in August, which included the leasing authority allowing the VA to secure a larger facility in Missoula.

The authorization will nearly triple the clinic's size, providing additional parking, clinical space and the medical services needed to meet the growing demand for VA care in Missoula, the state's second largest city.

Tester's communications director, Marnee Banks, said the VA was authorized to pursue 28 major medical leases under the latest bill, including one in Missoula. The lease allows for a 60,000-square-foot facility with an estimated rent just under \$2 million a year.

"It will provide primary care, mental health, specialty care and some outpatient surgeries," Banks said. "The VA intends for the clinic to be located in the same general area as the existing clinic."

Banks said it often takes the VA about two years to develop the specific facility requirements once it begins working on the lease. Another year is needed to negotiate with developers prior to issuing a construction award.

That's followed by an additional two years to build the facility.

"The former Deputy (VA) Secretary (Sloan) Gibson had been working to bring this timeline down," Banks said. "The VA will need to obtain a delegation of authority from GSA to award the Missoula clinic lease."

The effort to secure a larger Missoula clinic dates back to at least 2014 when Tester began pushing the VA to expand the facility. Back then, a VA consulting team had toured the small clinic and recommended a modest expansion.

Nearly a year later, the General Services Administration began studying the possibility of converting the vacant Federal Building in downtown Missoula to a new outpatient clinic. That effort was later deemed cost prohibitive, leaving the clinic's future in limbo.

At the same time, the VA fell into controversy, resulting in the resignation of then-VA Secretary Erick Shinkseki, who was replaced by Robert McDonald and later by Shulkin, who now heads the agency under the Trump administration.

The Montana Department of Veterans Affairs and its own health care system has also seen a parade of new leaders, including Christine Gregory, Johnny Ginnity and Kathy Berger, who took the agency's helm in late 2016 and pledged changes to the system.

8.1 - Dayton Daily News: [Lawmakers pushing for Columbus to get national veterans museum \(14 September, Jessica Wehrman, 1.1M online visitors/mo; Dayton, OH\)](#)

WASHINGTON - To hear Reps. Joyce Beatty and Steve Stivers tell it, Columbus is an ideal place to host the National Veterans Memorial and Museum.

The state, they said hosts the 6th largest veterans population in the U.S. If that's not enough, it's within an eight-hour car ride of almost half of the nation's veterans.

Speaking before a House panel Wednesday, Stivers and Beatty argued that a memorial to the nation's veterans was long overdue — and that Columbus was all too happy to change that. The site, argued Stivers, “will serve as a civic landmark to honor, inspire and educate all Americans about the service and sacrifice of more than 22 million veterans in this country.”

Under construction and scheduled to open next summer, the site started as a replacement for Columbus' previous veterans memorial and then blossomed into something far more sweeping and ambitious, said Stivers. Now, he, Beatty and Rep. Pat Tiberi, R-Genoa Township are pushing a bill that would designate it a national museum.

It wouldn't be the state's only museum honoring the armed services or those who have served: Roughly an hour's drive away, Dayton hosts the National Museum of the United States Air Force.

During a hearing on the bill Wednesday, Matthew Sullivan, deputy undersecretary for finance and planning and CFO for the National Cemetery Administration for the Department of Veterans Affairs, said the department neither supported nor opposed locating the museum in Columbus. “VA respectfully expresses no view on the proposed bill, which does not apply to VA or to VA's core mission,” he testified.

But Alex Zhang, assistant director of National Veterans Affairs and Rehabilitation for the American Legion, said his organization backs the bill. He said the bill would “represent American veterans with profound respect, connecting them with the civilian population, possibly inspiring others to serve and most importantly, educating youth about what these fine men and women have done for America.”

The organization, he said, “wholeheartedly supports” the “beautiful, thoughtful” memorial's designation, he said.

Veterans of Foreign Wars also backed the legislation, with John Towles, deputy director of national legislative service for the organization, telling the House Veterans Affairs Committee's subcommittee on Disability Assistance and Memorial Affairs "our country currently lacks a museum specifically dedicated to honoring and preserving the collective sacrifices made by this nation's veterans."

"This museum would serve to fill that gap," he said.

Groundbreaking for the 50,000 square foot museum and memorial began in 2015, and more than \$75 million was raised for design and construction. It's located at 300 West Broad St. in Columbus, site of the former Franklin County Veterans Memorial.

The entire Ohio congressional delegation is cosponsoring the bill, and Stivers said he hopes to tuck it into a larger legislative package in the months ahead. Sens. Sherrod Brown, D-Ohio, and Rob Portman, R-Ohio, are working on a similar measure in the Senate.

Beatty said the museum was in part the brainchild of former Ohio Sen. John Glenn, who died last year.

"If he were here today, he would highlight this museum and memorial," she said. "He would talk about the 300 foot reflecting pool. He would talk about the memorial wall. He would talk about the sanctuary where veterans families and others could go.

"It's a tremendous idea," she told the panel. "And we ask for your support."

1. Top Stories

1.1 - Military.com: [Obamacare Repeal Would Increase Uninsured Veterans: Report](#) (14 September, Amy Bushatz, 9M online visitors/mo; San Francisco, CA)

Repealing Obamacare would leave more than nine percent of all veterans under 65 without health insurance, likely causing an increased strain on the Department of Veterans Affairs, researchers caution in a new report released Thursday. As of 2015, about 5.8 percent of America's 10.8 million estimated veterans under age 65 were without health insurance, the report found.

1.3 - The Tennessean (Video): [Meet the man picked to fix the Memphis VA, one of the most troubled in the nation](#) (14 September, Jake Lowary, 2.1M online visitors/mo; Nashville, TN)

There's a symbolic line at the Memphis Veterans Affairs Medical Center that new director David Dunning says sums up the daunting task ahead of him. On one side, in the brand-new emergency room, there's new floors, cutting-edge technology and other modern amenities. On the other, there is decades-old wallpaper, mismatched tile and almost cliché decor.

[Hyperlink to Above](#)

1.4 - The Republican: [Ginnie Mae launches task force to investigate VA-backed lenders; US Sen. Elizabeth Warren praises move](#) (14 September, Shannon Young, 2.1M online visitors/mo; Springfield, MA)

Ginnie Mae, the principal financing arm for government loans, will look into potentially misleading marketing practices involving U.S. Department of Veterans Affairs-backed lenders, officials announced Thursday. Acknowledging concerns U.S. Sen. Elizabeth Warren raised in a recent letter, Ginnie Mae Acting President and Chief Operating Officer Michael Bright said the Massachusetts Democrat is right to be bothered by the potential impacts aggressive mortgage marketing practices could have on veteran borrowers.

[Hyperlink to Above](#)

1.5 - Military Times: [New ad campaign reopens fight over VA privatization claims](#) (14 September, Leo Shane III, 2.1M online visitors/mo; Springfield, VA)

A left-leaning veterans advocacy group today is reopening the fight over privatization of Veterans Affairs services with a multi-state ad campaign imploring lawmakers to "save VA." The nearly \$400,000 effort comes as top VA officials and congressional leaders are preparing to

unveil their long-term plans for the department's controversial Choice program, which allows veterans to seek private-sector care using federal dollars.

[Hyperlink to Above](#)

1.6 - Military Times: [Ashford University gets OK to keep GI Bill students](#) (14 September, Natalie Gross, 2.1M online visitors/mo; Springfield, VA)

Ashford University has received the Department of Veterans Affairs' stamp of approval to continue enrolling GI Bill students long-term. The announcement comes after a tumultuous summer for the online for-profit school, which was, at one time, scheduled to lose its eligibility to receive VA funds in August after losing its state-level approval in Iowa. Ashford then sought approval in Arizona and was permitted to continue enrolling veteran students for the new school year, pending approval from VA.

[Hyperlink to Above](#)

1.7 - Stars and Stripes: [Veterans crisis line to open third call center](#) (14 September, Nikki Wentling, 1.5M online visitors/mo; Washington, DC)

The Department of Veterans Affairs will open a third call center in the fall to handle an anticipated increase in calls to the veterans crisis hotline. The call center will be located on the VA campus in Topeka, Kansas, the VA said late Wednesday. The announcement comes just nine months after a second call center was opened in Atlanta.

2.1 - WRAL (NBC-5, Video): [Long waits lead to good news for vets seeking resolution to VA problems](#) (14 September, Cullen Browder, 3.1M online visitors/mo; Raleigh, NC)

Hundreds of veterans walked into the Herb Young Community Center in Cary on Thursday with complaints and problems and walked out with resolution and, many times, money. The American Legion and the VFW sponsored the Veterans' Experience Action Center to help veterans who are having trouble with the U.S. Department of Veterans Affairs. Because North Carolina is the only state hosting such events, veterans came from across the country.

[Hyperlink to Above](#)

2.2 - Inside Higher Ed: [VA seeks broad waiver of rule barring payments from for-profit colleges](#) (15 September, Andrew Kreighbaum, 1.6M online visitors/mo; Washington, DC)

The Department of Veterans Affairs intends to grant employees a waiver of a rule barring receipt of salary or other benefits from for-profit colleges. The proposed regulation was published in the federal register Thursday and would take effect next month without "adverse comment." A recent VA inspector general report found that two employees had violated the rule by working as adjunct instructors at for-profit colleges receiving VA benefits.

2.4 - WTVD (ABC-11, Video): [Cary event brings veterans face-to-face with VA representatives](#) (14 September, Julie Wilson, 880k online visitors/mo; Durham, NC)

The American Legion and the Town of Cary are hosting a three-day event focused on answering questions for veterans. The Veterans Experience Action Center will put veterans face-to-face with a representative from the U.S. Department of Veteran Affairs. Meetings will allow for explanations, assistance facilitating, expediting existing claims and appeals, filing new claims, and accepting all claim related evidence.

[Hyperlink to Above](#)

2.5 - La Crosse Tribune (Jackson County Chronicle): [Jackson County hosts benefits fair for veterans](#) (14 September, Jordan Simonson, 818k online visitors/mo; La Crosse, WI)

The Jackson County Veterans Service Office and Tomah VA Medical Center hosted a Homeless/At Risk Veterans Stand Down and Benefits Fair Thursday at the Black River Falls American Legion Post 200, providing information for veterans about many of the services available to them via federal, state and local programs. "It is a two-fold event, it is a homeless or an at-risk stand down for veterans in the area that can come and get assets and services.

[Hyperlink to Above](#)

2.6 - KTVI (FOX-2, Video): [Government workers hold union rally outside VA Medical Center on Grand](#) (14 September, 663k online visitors/mo; Saint Louis, MO)

Workers at the John Cochran VA Medical Center will hold a rally Thursday, September 14 outside the hospital. Members of the American Federation of Government Workers want to raise awareness of what they call dangerously low staffing levels at facilities around the country. The union claims the shortages are depriving veterans of the health care they deserve. They say it's also creating risks to patient safety and a hazardous work environment.

[Hyperlink to Above](#)

2.7 - WNCN (CBS-17, Video): [3-day push will help NC veterans connect with benefits](#) (14 September, Bearshelle Edme, 607k online visitors/mo; Raleigh, NC)

— A three-day event for veterans launched Thursday to help former military members access benefits, among other services. But many veterans told CBS North Carolina's Bearshelle Edmé they're frustrated with all these processes, applications, and long waits. 61 years could separate some of the veterans who have served in the Korean War from those who were sent to the Iraq War.

[Hyperlink to Above](#)

2.8 - Post-Tribune: [Column: Vietnam documentary should take a balanced look](#) (14 September, Tom Bellino, 261k online visitors/mo; Crown Point, IN)

The PBS special series, "The Vietnam War," by Ken Burns and Lynn Novick, which begins Sunday, no doubt will evoke emotions for both the veterans of that war as well as the observers, resisters and opponents of it. Various Veterans Affairs facilities are offering a Monday morning debriefing after the first episode of the series, because "it may bring up stressful memories for combat veterans."

[Hyperlink to Above](#)

2.9 - WUSF Public Media (Audio): [VA Prepares for PBS Vietnam Documentary; It May Trigger Some Vets' PTSD](#) (15 September, Steve Walsh, 197k online visitors/mo; Tampa, FL)
The ten-part documentary by filmmakers Ken Burns and Lynn Novick is at times graphic, and people who work with veterans say it may trigger traumatic memories for those who fought in Vietnam. For two weeks, PBS stations will relive one of the most divisive eras in American history. "The Vietnam War" documentary - produced by Ken Burns and Lynn Novick - is being billed as a rare cultural milestone.

2.11 - New Hampshire Public Radio: [Makeup of N.H. VA Task Force Announced, Some Whistleblowers Say They Were Shut Out of Process](#) (14 September, Peter Biello, 148k online visitors/mo; Concord, NH)
The Department of Veterans Affairs has released a list of the twelve people who will serve on a task force looking at the future of health care for New Hampshire veterans. Since July, a dozen whistleblowers have come forward with allegations of substandard care at the Manchester VA. One of those whistleblowers, cardiologist Erik Funk, will serve on the task force. The list also includes four people who are not VA employees and five who are not New Hampshire residents.

[Hyperlink to Above](#)

2.12 - Hudson Valley News Network: [Maloney, Local Officials Slam VA Decision to Cut Funding](#) (14 September, Kathy Welsh, 54k online visitors/mo; Hyde Park, NY)
— Representative Sean Patrick Maloney (NY-18) and local officials condemned a decision by the Department of Veterans Affairs to deny an anticipated annual federal investment of over \$500,000 to Hudson River Housing. If no action is taken, funding will run out and the program will be terminated after Sept. 30.

[Hyperlink to Above](#)

2.13 - DS News: [Ginnie Mae Responds to Senator Warren on VA Lenders](#) (14 September, Brianna Gilpin, 54k online visitors/mo; Dallas, TX)

Thursday, in a letter to Senator Elizabeth Warren (D-MA), Ginnie Mae explained how it is curbing VA refinance speeds and aggressive marketing by some VA approved lenders. The letter was in response to Sen. Warren, who initially addressed the aggressive practices in a letter to Ginnie Mae on September 6, 2017. Warren warned that the marketing practices are negatively impacting Ginnie Mae securities without necessarily benefiting veteran borrowers.

[Hyperlink to Above](#)

2.14 - Reveal: [White House seeks to legalize payoffs to VA officials by for-profit schools](#)

(14 September, Aaron Glantz, 39k online visitors/mo; Emeryville, CA)

The Trump administration is seeking to waive a 50-year-old anti-corruption law that prevents officials who administer the GI Bill from accepting money from for-profit schools backed by taxpayer subsidies. The proposed regulation, published Thursday in the Federal Register, would allow employees of the Department of Veterans Affairs to receive "wages, salary, dividends, profits, gratuities" and services from for-profit schools that receive GI Bill funds.

(14 September, 900 online visitors/day; Tampa, FL)

Northville, MI (Law Firm Newswire) September 14, 2017 - The Department of Veterans Affairs (VA) fired the longtime director of its main veterans medical center in Washington, D.C. Brian

Hawkins was dismissed due to growing concerns about his leadership of the VA facility. The VA released a statement saying "he failed to provide effective leadership." Hawkins was reassigned to a different post within the agency in April pending further review.

[Hyperlink to Above](#)

3. Access to Healthcare

3.1 - ABC News (AP): [The Latest: Hurricane cleanup crew finds body near hotel](#) (14 September, 24.1M online visitors/mo; New York, NY)

Federal officials say that nursing homes normally reserved for veterans will be opened up to non-veteran nursing home residents if space is available, in the aftermath of Hurricane Irma. U.S. Sen. Bill Nelson announced Thursday that the U.S. Department of Veterans Affairs had agreed to open its nursing homes following eight deaths at Florida nursing home. Florida has seven nursing homes throughout the state that are available to residents who were veterans.

[Hyperlink to Above](#)

3.2 - The Huffington Post: [VA Broken Promise Harms Veteran and Costs Jobs](#) (14 September, Hal Donahue, 22.9M online visitors/mo; New York, NY)

A technical expert, Joe possessed little knowledge concerning how to actually start a business. He visited his local VA Veterans Rehabilitation Counselor and received a wealth of information and assistance to create a Service-Disabled Veteran-Owned Small Business(SDVOSB).

[Hyperlink to Above](#)

3.3 - Palm Beach Post: [VA offers beds to Florida nursing home residents affected by Irma](#) (14 September, Joe Capozzi, 3.8M online visitors/mo; West Palm Beach, FL)

The U.S. Department of Veterans Affairs is making beds available to non-veteran nursing home residents affected by Hurricane Irma. U.S. Secretary of Veterans Affairs David Shulkin announced the plan after talking with Gov. Rick Scott and Sen. Bill Nelson late Wednesday. Those discussions took place after eight residents of a Florida nursing home died from what appears to be heat exposure likely caused by a power outage at their facility in Hollywood.

[Hyperlink to Above](#)

3.4 - WJW (FOX-8, Video): [Presidential Opioid Commission praises, learns from Cleveland VA](#) (14 September, Bill Sheil, 665k online visitors/mo; Cleveland, OH)

Gov. Chris Christie of New Jersey, head of a Presidential Commission on opioids, summed it up well when addressing doctors and patients gathered at the Louis Stokes VA Center in Cleveland. "We didn't come here by accident," he said. Christie, and several prominent national figures, toured the VA Center on Thursday to learn more about a remarkable contradiction.

[Hyperlink to Above](#)

3.5 - WOIO (CBS-19): [White House opioid commission turns to Cleveland VA for solutions](#) (14 September, Sara Goldenberg, 610k online visitors/mo; Cleveland, OH)

Northeast Ohio continues to struggle with opioid addiction and overdose deaths. But there's a treatment program in our own backyard that's bucking the trend. The VA Secretary and White

House officials came to Cleveland on Thursday to learn more. The Northeast Ohio VA Healthcare System has the lowest addiction rates across the VA.

[Hyperlink to Above](#)

3.6 - WIBW (CBS-13): [VA opening new Veterans Crisis Line in Topeka: expects to hire 100](#)

(14 September, Nick Viviani, 485k online visitors/mo; Topeka, KS)

Topeka will be the home of the Dept. of Veterans Affairs' newest Veterans Crisis Line call center. On Wednesday, the VA officially announced it would open the new crisis line, its third one nationwide, in the Capital City. The new call center is expected to employ 100 people and will be housed in the VA Eastern Kansas Health Care System.

[Hyperlink to Above](#)

3.7 - Poughkeepsie Journal (Video): [Hudson River Housing lose federal funding for homeless veteran program](#)

(14 September, Jack Howland, 440k online visitors/mo; Poughkeepsie, NY)

Homeless veterans and their families might be losing support in a few weeks, if Hudson River Housing is forced to shut down a key program. Hudson River Housing is facing losing its program serving homeless veteran families in Dutchess County by the end of September in the wake of the U.S. Department of Veteran Affairs denying the group an annual grant, the nonprofit said Thursday.

[Hyperlink to Above](#)

3.8 - Press of Atlantic City: [Veterans push for better health care, experts fight to provide it](#)

(14 September, Nicole Leonard, 320k online visitors/mo; Pleasantville, NJ)

Dozens of men and women squeezed together in a small conference room at the VA Outpatient Clinic in Northfield on a hot summer afternoon. The crowd, the majority veterans in their 60s, 70s and 80s, looked ready for battle as they stood shoulder to shoulder, arms crossed and some prepared with notes as they faced off with local, state and regional officials from the U.S. Department of Veterans Affairs.

3.9 - WKRG (CBS-5): [VA Offers Beds For Hurricane Irma Victims In Florida Nursing Homes](#)

(14 September, 272k online visitors/mo; Mobile, AL)

In a press release sent out Thursday by the Department of Veterans Affairs, the U.S. Secretary of Veterans Affairs David Shulkin announced that the VA is making beds available to non-Veteran nursing home residents affected by Hurricane Irma. This announcement comes after the new reports Wednesday that eight residents of a Florida nursing home died from what appeared to be heat exposure, likely caused by faulty air conditioning at their facility in Hollywood Hills.

1. Top Stories

1.1 - Military.com: [Obamacare Repeal Would Increase Uninsured Veterans: Report](#) (14 September, Amy Bushatz, 9M online visitors/mo; San Francisco, CA)

Repealing Obamacare would leave more than nine percent of all veterans under 65 without health insurance, likely causing an increased strain on the Department of Veterans Affairs, researchers caution in a new report released Thursday.

As of 2015, about 5.8 percent of America's 10.8 million estimated veterans under age 65 were without health insurance, the report found.

Eliminating the Affordable Care Act (ACA), it says, would push that number up to 9.1 percent, while subsequently increasing the number of veterans who rely on the VA for some or all of their health care needs.

The report, compiled by the nonpartisan Rand Corp. and released Thursday, examines demographics and health care data for non-elderly veterans under age 65 between 2013 and 2015.

The report was commissioned by the non-profit Robert Wood Johnson Foundation and the New York State Health Foundation, which promote expanding health insurance coverages as part of their mission.

Among the report's big-picture findings, said researcher Michael Dworsky, is the major impact Obamacare had on how veterans get their health care.

Rather than turning to the VA exclusively, most veterans carry some kind of dual coverage.

Thanks to the ACA, he said, the number of dual-covered veterans increased -- and the demand on the VA's health system went down.

"First of all, the ACA did change coverage for veterans," Dworsky said. "The VA health system is not an island. It's connected to what's happening in the rest of the health care system and the rest of federal health policy.

"What we're trying to get people to pay more attention to, is if you think about a change as significant as repealing the ACA, it could be very important to think through how other federal programs ... might be impacted," he said.

More than six million non-elderly veterans were eligible for VA health care in 2015, the report estimates, a figure not tracked by federal officials, Rand officials said.

About six million veterans total, the majority of whom were over 65, used VA health care in 2015, according to VA statistics.

The VA has been plagued by scandals stemming from a substantial claims backlog, mishandled or lost paperwork, long appointment wait times, mismanaged facilities and a provider shortage.

The VA Choice system attempts to remedy some of those problems by pushing some veterans to community-based providers for care.

Lawmakers have ordered ongoing program overhauls and increased congressional oversight as a means of addressing the system's woes.

Without the ACA, the report found, veterans under 65 would have turned to the VA for about 1 percent more health care in 2015. That's about 125,000 more office visits, 1,500 more inpatient surgeries and 375,000 more prescriptions, it says.

Additionally, if an effort known as "repeal and replace" had been made law, the number of uninsured veterans would likely have gone even higher -- up to 10.4 percent, the reports says.

That estimate is based on a 2024 plan for health care policy included in replacement language known as the American Health Care Act (AHCA), which would have changed how the federal government funds Medicaid.

The AHCA was ultimately rejected by lawmakers earlier this year.

Dworsky said the researchers hope the report will inspire policymakers to broaden their view of how an Obamacare repeal would impact other portions of the U.S. health care system.

"The goal of the report really was to try and broaden the debate over ACA appeal and make sure the potential spillover effect on the VA health system and insurance coverage would be taken in account," he said.

"We didn't really see that as part of the conversation, and we think it still might be a little bit neglected," Dworsky said.

[Back to Top](#)

1.2 - Miami Herald: [Veteran Affairs offers beds to nursing home residents in need after Irma](#) (14 September, David J. Neal, 8.9M online visitors/mo; Doral, FL)

After Wednesday's death of eight residents of a Hollywood nursing home steaming without air conditioning, U.S. Secretary of Veteran Affairs David Shulkin announced Thursday that the agency will open available beds to non-Veteran nursing home residents affected by Hurricane Irma.

"We will continue to look for ways to relieve the hardship this powerful storm has caused," Shulkin said. "Much of the heavy-lifting to recover from the hurricane is still to come and our leaders and staff are determined to find as many ways as we can for VA to help in the response."

After delivering withering statements about the tragic deaths at The Rehabilitation Center at Hollywood Hills, the VA announcement said, Florida Gov. Rick Scott and U.S. Sen. Bill Nelson, D-Fla., began talking with Shulkin Wednesday night about inadequately cooled nursing homes. The Florida Health Care Association said as of Thursday morning, 64 of the state's 683 nursing homes remained without power after Irma's rampage across the state.

Many nursing homes have generators, but generators doesn't equal air conditioning. The Rehabilitation Center had a generator.

Hollywood police, now going over the center with a search warrant, said Thursday morning, "The initial investigation has determined the facility had some power; however the building's air conditioning system was not fully functional."

1.3 - The Tennessean (Video): [Meet the man picked to fix the Memphis VA, one of the most troubled in the nation](#) (14 September, Jake Lowary, 2.1M online visitors/mo; Nashville, TN)

There's a symbolic line at the Memphis Veterans Affairs Medical Center that new director David Dunning says sums up the daunting task ahead of him.

On one side, in the brand-new emergency room, there's new floors, cutting-edge technology and other modern amenities.

On the other, there is decades-old wallpaper, mismatched tile and almost cliché decor.

Dunning calls it "very clean, but it's just tired" and says the divide represents where they are and where he intends to take the hospital in the future.

"We're on a trip to L.A. and we've made it to Little Rock," he told the USA TODAY NETWORK - Tennessee during an exclusive interview this summer.

The Memphis VA serves hundreds of thousands of veterans in three states but is among the most troubled in the entire nation. It has received just one star in the agency's internal rankings — one of 14 nationwide and three in Tennessee with the rating.

New documents obtained by the USA TODAY NETWORK detailed a litany of patient safety issues at the hospital in recent years, including how VA providers mistakenly left plastic packaging embedded in a veteran's artery, leading to an amputation.

Reports of threats to patient safety jumped from 700 in 2015 to more than 1,000 in 2016, the newly obtained documents show.

Dunning, 52, a twice-deployed career Army officer, now finds himself tasked with turning around the hospital and improving patient care. The job comes amid several ongoing congressional investigations and as the hospital is one of just four nationwide reporting weekly to the VA's top health official in Washington.

The problems leading to the one-star ranking and detailed in the newly obtained documents pre-date Dunning's arrival. VA Secretary David Shulkin tapped Dunning in May to pull the hospital from the bottom. Four interim directors preceded him.

"We acknowledge it, but we don't accept it," Dunning said of the one-star ranking and history of poor care.

Dunning said he was "given the whole truth" about the hospital before accepting the director's position

"I chose to come to the Memphis VA with the expectation that I would be required to make tough decisions on behalf of my fellow veterans," Dunning said.

In June, Shulkin mentioned the hospital during a White House briefing on a push to pass accountability legislation that allows problem employees to be fired more easily.

Shulkin used the hospital as an example just days after the USA TODAY NETWORK reported that an employee returned to work after serving a 60-day jail sentence for a third DUI conviction and used donated leave to continue being paid.

The hospital denied the woman, Brittney Lowe, used donated leave, but sent a memo to all hospital employees about the leave policy, which generally only applies to long absences related to health conditions.
whistleblowers

Dunning declined to respond to those statements, but noted that Shulkin also referenced the hospital's one-star rating.

"There are very few people that believe they're a one star and they're offended (at the rating)," he said.

Dunning the Memphian, combat vet

Dunning was born in the now-razed Baptist Hospital just blocks from where the current VA hospital sits today. His grandmother retired from the VA when it was located on Getwell Road, before it moved to its current home in the Medical District.

His father was a Baptist preacher, an upbringing that meant spending time in lots of different places.

"We skipped everywhere when I was a kid, and I literally skipped everywhere in the military," he said.

But now he's back in what he calls his "forever home," a place he and his wife both have craved after more than a dozen moves during his military career.

"I'm committed to Memphis. Hopefully Memphis is committed to me."

David Dunning, Memphis VA director

"I'm committed to Memphis," he said. "Hopefully Memphis is committed to me."

Dunning's grandparents grew up on Summer Avenue in Memphis, and his life and career as a soldier has taken him all over the world and Tennessee, from Somerville to Columbia to Clarksville and Nashville.

He still has family in Bartlett and his two brothers went to the University of Memphis.

"I could have gone somewhere and probably made more money, but this is where I belong," he said, noting that he had a choice of director positions to choose from, one in Memphis and one in the Northeast.

Dunning's Army career was almost entirely in the Medical Command section, and took him all over the world, the last stop for two years at Tripler Army Medical Center in Hawaii, a facility slightly larger than the Memphis VA.

Dunning deployed twice, and was among the first soldiers to take part in the Iraq surge ordered by then-President George W. Bush.

He also served in the 101st Airborne Division early in his career and remembers eating at Nashville's San Antonio Taco Company, a popular eatery on 21st Avenue near Vanderbilt University.

"There wasn't much to do in Clarksville back then," he said of his time with the 101st some 25 years ago.

The 5-point plan

Dunning said the increase in patient safety reports is a sign of improvement, and a sign of greater comfort disclosing issues.

And when Dunning talks about his vision and goals, he cites his five-point focusing on primary care, mental health, hospital-patient flow, infrastructure modernization, and the hospital's culture.

It's a plan he developed over his first 60 days on the job, and is "directly in line" with higher initiatives laid out by Shulkin, he said.

Dunning has made quick progress on some of the initiatives. The hospital will see a renovated and reorganized main entry atrium complete at the end of the year and a new parking garage begin around the same time that will add about 180 spots in a three-story parking garage.

He's also had the help of regional oversight to expedite the hiring of 182 critical but vacant positions he sees as necessary to improve the hospital's care and culture, mainly for the patients.

In just 30 days between June and July, the hospital hired 30 medical support assistants, who are among the first people to interact with veterans when they call for an appointment or visit the hospital.

Each of those could yield immediate gains, but also bring frustration with some patients.

The crave for stability

Dunning's arrival has brought a sense of stability to the hospital, which has been under control of interim directors for more than 18 months since the last permanent director left in February 2016.

"The culture war is really the biggest issue we have to fight here," Dunning said.

Some within the facility are already on Dunning's side. Willie Logan, the communications director, said the hospital has craved a stable presence at the helm.

"You (have to) get a leader people want to follow, we haven't had one," she said.

David Spencer, the executive officer for the Memphis Combat Vets Motorcycle Association, said though he doesn't get medical care at the Memphis VA, he knows many who do, and those experiences are mixed.

Dunning spoke to a recent chapter meeting, where Spencer said he was "firm" about improving the hospital's performance and reputation, and afterward personally met with many of the members, with an assistant taking notes and contact information.

"I think he's got the right idea," Spencer said.

Spencer said Dunning, if given the opportunity to succeed by both the community and the VA, he's confident he will achieve his goal.

Dunning has placed establishing healthy relationships with other area hospitals — "community affiliates," he calls them — around Memphis at the top of his priority list.

"My big thing is we just need to get moving," he said.

1.4 - The Republican: [Ginnie Mae launches task force to investigate VA-backed lenders; US Sen. Elizabeth Warren praises move](#) (14 September, Shannon Young, 2.1M online visitors/mo; Springfield, MA)

Ginnie Mae, the principal financing arm for government loans, will look into potentially misleading marketing practices involving U.S. Department of Veterans Affairs-backed lenders, officials announced Thursday.

Acknowledging concerns U.S. Sen. Elizabeth Warren raised in a recent letter, Ginnie Mae Acting President and Chief Operating Officer Michael Bright said the Massachusetts Democrat is right to be bothered by the potential impacts aggressive mortgage marketing practices could have on veteran borrowers.

Bright, who noted that Ginnie Mae has already taken some steps to address these issues, further announced the creation of a joint "Lender Abuse Task Force," which will work with the VA to crack down on such practices.

Contending that some Ginnie Mae-approved issuer companies seem to be taking advantage of the VA program to aggressively market and "churn" loans, or successfully solicit an existing VA borrower to refinance a mortgage, Bright said his agency is working to analyze data and better understand what net economic benefit such refinances could offer borrowers.

Bright said the agency further believes it has found some patterns of suspicious behavior it will work to curtail, adding that "this churning is having a negative impact on Ginnie Mae securities."

For example, he argued that some VA borrowers may pay a higher mortgage rate than they otherwise would due to such churning.

Bright noted that Ginnie Mae took steps to respond to these issues, as well as those raised in a November 2016 Consumer Financial Protection Bureau report, which offered a snapshot of complaints service members have filed related to VA mortgage refinancing.

However, he noted that some issuers "seem determined to evade the intent of our program guidelines" and employ practices that "appear designed to market products that evade Ginnie Mae and VA program rules, and, in our view, may not be designed to help veteran homeowners."

The new task force, Bright said, will help the agency "continue and intensify (its) work in analyzing monthly data and developing additional policy steps" and be responsible for keeping members of Congress and industry officials aware of program changes and enforcement actions.

"Ginnie Mae, in its sole discretion, reserves the right to remove any lender from its program for violations and we have not finished our work to solve this issue," he wrote in a letter to Warren. "We are analyzing every option, from large scale program changes to working lender-by-lender, to understand how individual marketing practices may be impacting the overall health of Ginnie Mae's program."

Bright added that he's committed to working with Warren "and partner federal agencies to put an end to these practices."

Warren lauded Ginnie Mae's response to her recent inquiry into these refinance mortgage marketing practices.

"I am glad that Ginnie Mae and the VA have created the Lender Abuse Task Force and have committed to work with me to crack down on lenders who are exploiting veterans in order to line their own pockets," she said in a statement. "These abusive practices are wrong, and lenders who engage in them shouldn't benefit from any taxpayer backing."

Warren, in her early September letter to Bright, raised concerns that Ginnie Mae-approved companies could be forcefully marketing VA-backed refinance mortgages that hurt veterans and American taxpayers.

She pointed to CFPB report, which found that of the more than 12,500 mortgage complaints service members, veterans and their dependents filed with the bureau, about 14 percent -- or 1,800 -- were related to refinance.

Market analysts, meanwhile, have noted that some VA mortgage service providers are more likely to "churn" loans, or successfully solicit an existing VA borrower to refinance a mortgage -- something that may reflect aggressive marketing tactics, Warren argued.

[Back to Top](#)

1.5 - Military Times: [New ad campaign reopens fight over VA privatization claims](#) (14 September, Leo Shane III, 2.1M online visitors/mo; Springfield, VA)

WASHINGTON — A left-leaning veterans advocacy group today is reopening the fight over privatization of Veterans Affairs services with a multi-state ad campaign imploring lawmakers to “save VA.”

The nearly \$400,000 effort comes as top VA officials and congressional leaders are preparing to unveil their long-term plans for the department’s controversial Choice program, which allows veterans to seek private-sector care using federal dollars.

The program has been a frequent target of critics who accuse conservatives of working to undermine VA funding and services, by outsourcing core government responsibilities to provide health care to veterans.

But supporters — including President Donald Trump, who has repeatedly promised to expand current Choice offerings — say the outside care options are critical to providing faster, less cumbersome medical access for veterans, and avoiding long wait times at VA facilities.

The ad campaign by VoteVets Action Fund does not mention the Choice program by name but warns watchers “don’t let Trump privatize my VA.” The group, which has worked closely with a number of Democratic outreach and election efforts, argues that moving more veterans outside the federally-funded health care system will erode its effectiveness and value.

“We’re doing this because we want to make sure people know the true story at VA,” said Will Fischer, VoteVets director of government relations and an Iraq War veteran. “The other side is interested in making money off of veterans and privatizing anything and everything.”

That’s a charge that VA Secretary David Shulkin has repeatedly denied, in congressional testimony and numerous media interviews.

Currently, about one-third of veterans medical appointments paid for by VA are conducted by physicians outside the department. White House officials have requested \$13.2 billion in outside care spending for fiscal 2018, about one-fifth of the total funding requested for veterans health services.

Shulkin has pushed for significant changes to the Choice program, including changing eligibility criteria to open the program to more veterans. Choice funding is expected to run out early next year, and Shulkin has promised the replacement — the Coordinated Access and Rewarding Experiences program, or Veterans CARE — will be “a program that’s easy to understand, simple to administer and meets (veterans) needs.”

The criteria, cost and potential impacts on other programs have not yet been released.

Republican leaders on Capitol Hill have also repeatedly promised not to look at “privatizing VA,” but have taken criticism from Democratic colleagues for a host of policy suggestions that some fear could be the first steps towards eroding department resources.

Fischer said he hopes viewers of the ads help push for improvements to the VA system instead of moving more outside it.

Just extending the Choice program another six months became a contentious debate earlier this summer, with several prominent veterans groups lobbying for additional funds for VA facilities in conjunction with \$2.1 billion in Choice money. That fight is likely to resume again this fall if groups see plans to pull money from existing VA programs for private-sector payments.

Meanwhile, supporters of outside care expansion have also been increasing their outreach in recent weeks.

Officials from Concerned Veterans for America, which has ties to conservative groups and have been among the most vocal supporters of reforming and broadening the Choice program, has released a series of op-eds and policy positions arguing that too many veterans face significant waits for basic health needs within VA.

“Every veteran should have the choice to use their health care benefits in the private sector, especially if the VA is unable to provide them with quality care in a timely manner,” CVA Policy Director Dan Caldwell said in a statement late last month.

The VoteVets ads will be airing in Alaska, Florida, Kansas, Louisiana, Maine, Minnesota, Montana, Nevada, Ohio, South Dakota, Tennessee, Texas and West Virginia. They’re also available online.

[Back to Top](#)

1.6 - Military Times: [Ashford University gets OK to keep GI Bill students](#) (14 September, Natalie Gross, 2.1M online visitors/mo; Springfield, VA)

Ashford University has received the Department of Veterans Affairs’ stamp of approval to continue enrolling GI Bill students long-term.

The announcement comes after a tumultuous summer for the online for-profit school, which was, at one time, scheduled to lose its eligibility to receive VA funds in August after losing its state-level approval in Iowa. Ashford then sought approval in Arizona and was permitted to continue enrolling veteran students for the new school year, pending approval from VA.

It got that Wednesday, according to a letter to students from Ashford President Craig Swenson. A VA spokesman confirmed this was the final step to certify students’ use of GI Bill funds through the school’s Arizona location.

“We appreciate the VA and Arizona (State Approving Agency) for working to complete this process and ensuring there was no disruption to students’ GI Bill education benefits,” Swenson said in a statement. “We look forward to continuing to serve these students and assisting them in achieving their educational goals.”

In July, an Iowa court ruled against Ashford’s request to retain state eligibility for its online programs, more than a year after the school closed its only campus in the state. The school of

more than 40,000 students, which is the 15th most popular college destination for GI Bill users, turned to Arizona, opening an administrative and student service center in Phoenix.

Federal approval of the move wasn't guaranteed; the VA did not accept the Arizona State Approving Agency's initial notice of approval and had requested additional information. But Thursday, a VA spokesman said the department had acknowledged the state's approval of the university and that there would be no immediate impact to Ashford students using GI Bill benefits.

He said in an email, "VA continues to review adherence to statutory and regulatory requirements relating to this approval. In all cases, we urge G.I. Bill recipients to make informed decisions regarding the use of their education benefits."

Loss of VA approval could have also impacted the school's eligibility to enroll active-duty military students using tuition assistance, since schools must have VA approval in order to receive funds from the Department of Defense.

[Back to Top](#)

1.7 - Stars and Stripes: [Veterans crisis line to open third call center](#) (14 September, Nikki Wentling, 1.5M online visitors/mo; Washington, DC)

The Department of Veterans Affairs will open a third call center in the fall to handle an anticipated increase in calls to the veterans crisis hotline.

The call center will be located on the VA campus in Topeka, Kansas, the VA said late Wednesday. The announcement comes just nine months after a second call center was opened in Atlanta.

"The new center in Topeka gives us more feet on the ground and an easier way for veterans to connect with us when they need us most," VA Secretary David Shulkin said in a written statement.

The VA has previously been criticized for allowing calls to the veterans crisis line to roll to voicemail. Last year, the VA inspector general reported instances of veterans waiting on hold for long periods and calls being dropped.

The opening of the Atlanta facility improved the situation, the VA said. In December, it reported the crisis line was answering 44 percent more calls than it was months earlier, but some calls were still rolling to a backup center. When phone lines are busy, calls are routed to another contracted call center. The inspector found responders in those centers were ill-equipped to handle crises.

About 200 responders work at the Atlanta facility, and 310 work at the VA's original call center in upstate New York. The Topeka facility will bring the number of employees staffing the veterans crisis line to 610. The call centers answer phone calls, texts and online messages from veterans, servicemembers and their families.

The VA is also expecting an increase in calls once it expands a function to automatically transfer veterans to the veterans crisis line from any VA facility. At VA hospitals, veterans can press "7" from a phone and be sent to the hotline. The VA is rolling the option out to its 300 veterans centers and more than 1,000 outpatient clinics.

The expansion is expected in the next few months. The VA said the Topeka call center would open in the fall, but didn't give a date of when it would be operational.

"Expanding the [veterans crisis line] to additional locations and increasing crisis responders is critical to providing veterans with support they need, when they need it," Sen. Jerry Moran, R-Kan., said in a written statement. Moran is a member of the Senate Veterans' Affairs Committee.

To reach the hotline, veterans, servicemembers or their families can call 1-800-273-8255 and press 1, text 838255 or open an online chat at veteranscrisisline.net.

2. Veteran and Employee Experience

2.1 - WRAL (NBC-5, Video): [Long waits lead to good news for vets seeking resolution to VA problems](#) (14 September, Cullen Browder, 3.1M online visitors/mo; Raleigh, NC)

CARY, N.C. — Hundreds of veterans walked into the Herb Young Community Center in Cary on Thursday with complaints and problems and walked out with resolution and, many times, money.

The American Legion and the VFW sponsored the Veterans' Experience Action Center to help veterans who are having trouble with the U.S. Department of Veterans Affairs. Because North Carolina is the only state hosting such events, veterans came from across the country.

"Nothing could be finer than to be in Carolina this morning," said Army veteran Marc Stratton, who flew to the Triangle from Arizona. "I got more done today in less than an hour than I've done in years."

Veterans started lining up for the event Wednesday night, and the line wrapped around the building by the time the doors opened at 9 a.m.

"The word got out, and the need is there," said Richard Spyrisson, the service officer for the American Legion post in Cary. "The biggest thing is that the veteran can tell that [volunteer] his story, his problem, why he needs this."

Army veteran Robert Jones of Greenville stood in line for hours to erase years of VA paperwork problems.

"They made a mistake, and they acknowledged that themselves and corrected it and took a lot of pressure off," Jones said. "Today was a very good day. I thank God for the folks here."

Struggling with PTSD, Marine veteran Dustin Glidewell of Carthage finally got the disability he'd been fighting for.

"I got 100 percent today," Glidewell said. "That means my kids get fed. I mean, it means I have a home now."

Not every veteran got what they wanted, but they got answers and personal attention.

"Today's been amazing. They spent three hours with me, and it's been ultimately validating," said Evangeline Moore, a homeless Navy veteran who drove from Washington, D.C., in search of education assistance.

"It feels like I just dropped my rucksack for the last time. I can breathe again," Glidewell said.

The Veterans' Experience Action Center continues 9 a.m. to 4 p.m. Friday and 9 a.m. to 3 p.m. Saturday. Veterans are advised to bring their medical records with them.

About 500 veterans were served in a similar event last year, and organizers said they hope to double that by the end of Saturday.

"This is needed, and we're going to try and increase this format," North Carolina Secretary of Military and Veterans Affairs Larry Hall said. "We do it several times across the state already, and we have these kinds of turnouts. The second thing is we have to have better follow up and make sure they get into the system."

2.2 - Inside Higher Ed: [VA seeks broad waiver of rule barring payments from for-profit colleges](#) (15 September, Andrew Kreighbaum, 1.6M online visitors/mo; Washington, DC)

The Department of Veterans Affairs intends to grant employees a waiver of a rule barring receipt of salary or other benefits from for-profit colleges.

The proposed regulation was published in the federal register Thursday and would take effect next month without "adverse comment."

A recent VA inspector general report found that two employees had violated the rule by working as adjunct instructors at for-profit colleges receiving VA benefits. The report recommended issuing waivers where no specific conflict of interest exists.

The proposal goes further, granting a waiver to all VA employees as long as they abide by certain other federal conflict-of-interest laws. Asked for comment, the VA's press office referred to language in the agency's notice of intent stating that the "statute has illogical and unintended consequences."

Carrie Wofford, president of Veterans Education Success, a group that's frequently been critical of for-profit colleges, called the proposal "crazy." She argued it would allow employees at VA, which acts as a regulator of institutions receiving veterans' education benefits, to hold stock or receive gifts from those entities.

Will Hubbard, vice president of government affairs at Student Veterans of America, said he wasn't sure the proposal had a nefarious intent. But he said the timing was interesting considering recent changes the Department of Education has made to rules protecting students and certain personnel decisions at the department.

"We remain very committed to ensuring that student veterans continue to be the top priority of the Department of Veterans Affairs," he said.

2.3 - Commercial Appeal (Video): [How we're fixing a broken VA care system](#) (14 September, Phil Roe and David Kustoff, 1.1M online visitors/mo; Memphis, TN)

As the Chairman of the House Committee on Veterans Affairs and the Congressman representing West Tennessee veterans who seek care at the Memphis VA Medical Center, we are concerned and outraged by the recent abysmal failures at the Memphis facility.

We are encouraged to see swift action from the Department of Veterans Affairs (VA) to get the Memphis facility on track — and will continue to closely monitor progress — but these examples underscore the serious and urgent need to reform VA. As the representatives of Tennessee veterans, we have a duty to ensure they have timely access to quality health care, and it's a duty we take very seriously.

This is simple: the men and women who put on a uniform and fought for this country made a promise to serve; a promise to defend the United States against all enemies foreign and domestic. In return, this country made a promise to care for the men and women who have borne the battle and to provide for their families.

Over the past several years, we've seen numerous instances of VA failing veterans, and it's long past time Congress act in a bipartisan way to make things right. We've made some progress, but as ongoing congressional investigations and recent media reports show, there is still much work to do.

We're fortunate to have partners in the Trump administration. President Trump has repeatedly expressed his desire to reform VA, and VA Secretary Shulkin has worked to build trust with members of Congress on both sides of the aisle. Secretary Shulkin called both of us individually to hear our concerns about the Memphis VA facility and to discuss ways to improve care for West Tennessee veterans.

The secretary has always been honest about the challenges the department faces and what VA needs from Congress to be successful. That's why we championed and supported accountability legislation the administration explicitly asked for. The Department of Veterans Affairs Accountability and Whistleblower Protection Act of 2017 was signed into law by President Trump on June 23 after passing the House and Senate with bipartisan support.

This law gives the secretary more authority to fire or discipline bad employees while protecting VA employees' due process rights. The vast majority of VA employees are good, hardworking

men and women who want to serve veterans honorably, but the bad actions of a few have tainted the reputations of many.

Still, as any employer will tell you, you cannot fire your way to success. That's why the accountability law includes provisions that provide VA with direct-hiring authority to fill medical center positions throughout the country. According to a VA Fact Sheet released in March 2015, "since June 2014, ninety one percent of [VA] medical facilities have new leaders or leadership teams..." That percentage is inclusive of both newly placed, permanent leaders and those who have been detailed to an acting director role.

How can we expect to change the direction of VA without steady leadership? After having numerous interim directors at the Memphis VA in 2016 alone, we applaud VA for hiring Memphis VA Medical Center Director David Dunning. We thank Director Dunning for his commitment to bringing much-needed stability to the Memphis facility.

Congress has also sent legislation to the president's desk, which was signed into law on Aug. 12, 2017, that will give the department the tools it needs to recruit, train and retain a high-quality workforce. These are two strong steps in the right direction. Another, and perhaps the most important step, is giving veterans options for care just like any other patient. If a patient receiving care in the private sector isn't happy with the quality of care, they can find another provider to meet their needs. Veterans should have that same option.

This fall, Congress will work to reauthorize the Choice Program, a program we realize needs improvements and reform. Providing veterans with options for care is another important part of making things right on behalf of our nation's veterans. Our priority will continue to be making good on the promise we made to veterans in Tennessee and across the nation. It's a promise worth keeping, and a promise that has been broken for far too long.

U.S. Rep. David Kustoff of Memphis represents the Eighth Congressional District. U.S. Rep. Phil Roe of Johnson City, Tenn., is chairman of the House Committee on Veterans Affairs.

2.4 - WTVD (ABC-11, Video): [Cary event brings veterans face-to-face with VA representatives](#) (14 September, Julie Wilson, 880k online visitors/mo; Durham, NC)

CARY (WTVD) -- The American Legion and the Town of Cary are hosting a three-day event focused on answering questions for veterans.

The Veterans Experience Action Center will put veterans face-to-face with a representative from the U.S. Department of Veteran Affairs.

Meetings will allow for explanations, assistance facilitating, expediting existing claims and appeals, filing new claims, and accepting all claim related evidence.

The event runs from 9 a.m. to 4 p.m. Thursday and Friday. On Saturday, doors will be open from 9 a.m. to 3 p.m.

Veterans in attendance are asked to bring their DD214, all medical records about their disability both military and civilian, along with any dependency documentation.

The location for the event is Herbert Young Community Center in Cary, 101 Wilkinson Ave., Cary, NC, 27513.

[Back to Top](#)

2.5 - La Crosse Tribune (Jackson County Chronicle): [Jackson County hosts benefits fair for veterans](#) (14 September, Jordan Simonson, 818k online visitors/mo; La Crosse, WI)

The Jackson County Veterans Service Office and Tomah VA Medical Center hosted a Homeless/At Risk Veterans Stand Down and Benefits Fair Thursday at the Black River Falls American Legion Post 200, providing information for veterans about many of the services available to them via federal, state and local programs.

"It is a two-fold event, it is a homeless or an at-risk stand down for veterans in the area that can come and get assets and services. It is also a benefits fair for any other veteran. They can come in and as you can see there are many different points of contact here, they can actually find out a lot of information," Jackson County veterans service officer Randy Bjerke said.

This fair was aimed at getting more veterans in Jackson County connected with the many services that they qualify for, including the Tomah VA Medical Center.

"We could identify that the veteran population in all of our counties is higher than the population of veterans that are actually registered with the VA. That means that there's a lot of veterans within our counties that just don't know what their benefits are. They don't know that they qualify for things. They may not know that we have a homeless program. They may not know that there are other programs that might help them both within the community and the VA," Tomah VA Medical Center homeless outreach coordinator Amanda Steinhoff said.

The first-time event for Jackson County had more than 20 vendors including several local, state and federal programs.

"We have never had a veterans homeless stand down in Jackson County, so being the first of its kind we have a lot of resources here, a lot of community programs here, a lot of state and federal resources here to help veterans identify if they need any help," Steinhoff said.

One of those local programs on hand was the local VFW Post 1959 that was helping serve a light meal during the event.

"Since we feel fervent about helping veterans, I shouldn't say more so than anyone, just as much as anyone else, we want to do a couple of things. First, we want to facilitate this for all of the entities that are here. The American Red Cross, the VA, but we also want to assist with our own personal recruiting drive because there are not very many VFW members," VFW Post 1959 chaplain Mario Garcia said.

Garcia spoke passionately about the many benefits of the VFW for its members, highlighting the importance of programs for veterans.

“It is that little brotherhood, or that cohesive mindset that we bring to other veterans that could be possibly stumbling a little bit, that could use a helping hand. So what the VFW does in their position, we have an emergency fund,” Garcia said explaining that they recently used the fund to help a veteran replace his roof.

It is connecting even one veteran with programs like the Tomah VA Medical Center and the local VFW that made the event a success for Bjerke.

“Every time that we get a new veteran to come in and find out what is available to them, that is a benefit just in itself because we have one more educated veteran. I don’t like it when they are in the woodwork, so to speak,” Bjerke said. “No matter how many veterans you have, you always wish you had more show up. Because you want to be able to get that word out and be able to inform the veterans that need it.”

2.6 - KTVI (FOX-2, Video): [Government workers hold union rally outside VA Medical Center on Grand](#) (14 September, 663k online visitors/mo; Saint Louis, MO)

Workers at the John Cochran VA Medical Center will hold a rally Thursday, September 14 outside the hospital. Members of the American Federation of Government Workers want to raise awareness of what they call dangerously low staffing levels at facilities around the country.

The union claims the shortages are depriving veterans of the health care they deserve. They say it’s also creating risks to patient safety and a hazardous work environment.

[Back to Top](#)

2.7 - WNCN (CBS-17, Video): [3-day push will help NC veterans connect with benefits](#) (14 September, Bearshelle Edme, 607k online visitors/mo; Raleigh, NC)

CARY, N.C. (WNCN) – A three-day event for veterans launched Thursday to help former military members access benefits, among other services.

But many veterans told CBS North Carolina’s Bearshelle Edmé they’re frustrated with all these processes, applications, and long waits.

61 years could separate some of the veterans who have served in the Korean War from those who were sent to the Iraq War. But as they formed a perimeter around the Cary Herbert Young Community Center, their mission was the same: access to veteran benefits.

“You start out at the VA. They put you in the system, then you meet with the veteran services officer to fill out the paperwork,” explained Larry Kall, a Army veteran of Vietnam. “They say it’s six to nine months to a year before you hear anything. I’m hoping this will escalate it.”

The Veterans Experience Action Center, VEAC, brings in former military member from across the nation.

It's the third year for the event where agents help fill out applications for benefit claims and direct veterans to health services, including for mental illness.

Derwood Bobbitt is a Marine veteran, who like others, has doubts about the process.

"Yes, I volunteered to serve my country; however, I was perfectly fine then," Bobbitt said. "Now, all of a sudden I have an injury or mental illness or whatever the case may be. You know, 'Hey let's fix this problem. Instead of putting a Band-Aid on something that needs surgery, hey, let's do surgery.'"

The Department of Veteran Affairs, along with several other veteran organizations, sponsor the event.

Asked how to make veterans feel less frustrated and more valued, Megan Miller, an assistant veterans services manager at the Winston-Salem VBA answered: "Part of the way we're trying to make it better is by being here face-to-face, because I think a lot of the frustration results from confusion. Veterans don't understand the process to file a claim or they don't understand why their claim may not be entitled to service connection for example."

VA officials say regional and congressional offices as well as online resources are all available.

They hope the three-day event starts or continues the process to honoring their service.

[Back to Top](#)

2.8 - Post-Tribune: [Column: Vietnam documentary should take a balanced look](#) (14 September, Tom Bellino, 261k online visitors/mo; Crown Point, IN)

The PBS special series, "The Vietnam War," by Ken Burns and Lynn Novick, which begins Sunday, no doubt will evoke emotions for both the veterans of that war as well as the observers, resisters and opponents of it. Various Veterans Affairs facilities are offering a Monday morning debriefing after the first episode of the series, because "it may bring up stressful memories for combat veterans."

Clearly the Vietnam experience is so unique that extraordinary responses are expected to the impact of this series, as it was to the actual war.

Vietnam, the time and place, was in fact extraordinary, and was and still is difficult to describe. Former United States Senator and Secretary of the Navy James Webb, who also was a highly decorated combat Marine in Vietnam, summed it up on a CBS Sunday Morning show in 2014: "If you were there, I don't need to explain. If you weren't, I can't explain."

I would suspect that most veterans of Vietnam would echo that statement. It has become became a common mantra of many veterans of that war. Many thought (and still think) the greatest problem many of the returning Vietnam veterans was that if in fact your body came back, so did your mind.

Some veterans are discussing whether they will watch the series. Some say that since it no doubt was developed by what they perceive as a left-leaning type, it merely will rehash the anti-war sentiment of the era, and they simply do not want to hear that again. Some of the more hardened veterans go on to say this will no doubt portray the enemy as the good guy and the American soldier as the bad guy, resurrecting the way they were treated upon the return home following their tours of duty in Southeast Asia.

The stories of being spat upon at airports, with chants of "Baby Killer," and "Hey Hey, Ho Ho, how many kids did you kill today?" are ubiquitous in the Vietnam veteran community.

Even if half of these stories are embellished memories, then the other half are tragic, and perhaps even more tragic because they were heaped on young men, often 17 to 27 years old. They answered the call of their country and were sent to a foreign land to fight a war that was not a declared war, one not supported by most of their peers, and even most of their government.

Other warriors are referred to as "The Greatest Generation," as is the case of the World War II veterans, and "American Heroes" in the case of the Iraq and Afghanistan veterans. These accolades are right and just.

No such positive descriptors, however, have been applied to the Vietnam veteran. Perhaps the relatively recent greeting of "Welcome Home" is America's newfound acknowledgment of the veteran from 1965 to 1975, the war of which the writer Myra MacPherson described in 1984, "Above all, Vietnam was a war that asked everything of a few and nothing of most of America."

Michael Herr, who helped write the screenplay for "Full Metal Jacket" and "Apocalypse Now," wrote, "All the wrong people remember Vietnam. I think all the people who remember it should forget it, and all the people who forget it should remember it."

There is no doubt that all war is hell, but without the support of the people who send you into that war however, it is an even greater hell.

Hopefully, Ken Burns and Lynn Novick in their series, treat the Vietnam veteran with the honor deserved, and that the warrior of that war, albeit not declared, can in some way put away some of the demons that often come at night. Let's hope so.

Dr. Tom Bellino is the author of *Bac Si: A Novel*, a saga of the Vietnam War. He was a Navy psychologist during the Vietnam War.

2.9 - WUSF Public Media (Audio): [VA Prepares for PBS Vietnam Documentary; It May Trigger Some Vets' PTSD](#) (15 September, Steve Walsh, 197k online visitors/mo; Tampa, FL)

The ten-part documentary by filmmakers Ken Burns and Lynn Novick is at times graphic, and people who work with veterans say it may trigger traumatic memories for those who fought in Vietnam.

For two weeks, PBS stations will relive one of the most divisive eras in American history.

"The Vietnam War" documentary - produced by Ken Burns and Lynn Novick - is being billed as a rare cultural milestone. The filmmakers have been planning the series since 2006, meaning their production process was about as long as America's involvement in the war.

The series is designed to be intense. Each episode is preceded by a warning about strong language and graphic violence.

But people who work with veterans say the documentary may be too intense for some of those who fought in Vietnam.

"Some are going to watch it. Few will," said Henry Peterson, a chaplain at the Department of Veterans Affairs in San Diego. He counsels people with PTSD.

"It could bring up some memories they don't want to deal with," Patterson said. "It could bring up some memories they may need to deal with."

Tina Mayes, a VA staff psychologist, said almost anything can trigger the vivid and aggressive thoughts associated with PTSD. A door slam. Smell of diesel.

"It can be something someone says. The way they say it," Mayes said.

News, movies, and documentaries are among the most common triggers.

"I would say the majority of veterans that I work with, when their symptoms are high, they're actively avoiding any media," Mayes said.

While PTSD is an issue among veterans of all eras, as well as certain populations of non-veterans, Mayes said people who served in Vietnam are particularly vulnerable.

"Honestly we don't know why, but some of the research suggests that it was because of the way they were received when they came back," she said.

In the 1970s, the VA was often unwelcoming. Society in general appeared, at best, uninterested in the plight of returning vets, and in some places was openly hostile.

Decades later, some vets still live with the symptoms of untreated PTSD, like the aggression that feels like it comes out of nowhere.

"It affects everyone," said Vietnam combat veteran Larry Taylor. "I would say my own wife experienced PTSD just from her relationship with me and the war I fought in."

Before he was treated, Taylor coped by avoiding his triggers. He didn't see *Apocalypse Now*, *The Deer Hunter*, or other popular movies about Vietnam. But when the first Gulf War broke out in 1990, he couldn't avoid the constant media coverage.

"Basically after the Gulf War, my PTSD kicked in," Taylor said. "I would wake up screaming. My wife would wonder what's going on. I was having nightmares all the time, during the daytime."

Still, Taylor wouldn't seek treatment for another decade. He's now the lead mental health chaplain at the VA in San Diego. He plans to watch the 18 hour long PBS documentary.

"I think today I know the difference between a bad memory and reliving a situation," Taylor said. "Fortunately I'm not reliving things the way I once did."

His guidance for vets is: Don't feel obligated to watch. If you do watch, find a loved one to watch with you. Taylor is enlisting his wife of 46 years.

In the past, the VA provided outreach around movies like Saving Private Ryan for vets who were triggered by what they saw. But the agency said it didn't experience a major increase in calls.

This time, the VA is partnering with PBS, preparing to provide counseling to any vets who feel it's time to start working through their own experience with the war.

[Back to Top](#)

2.10 - Tribune-Democrat: [UPJ summit seeks ways to help veterans](#) (15 September, Dave Sutor, 155k online visitors/mo; Johnstown, PA)

Issues that afflict active military personnel and veterans, including thoughts of suicide, physical pain and moral injury, also impact the general population, albeit in different ways.

So, when advancements are made to help men and women who serve the United States deal with those challenges, the nation benefits.

That lesson was understood well by U.S. Rep. John Murtha, whose work helping military personnel and their families deal with traumatic brain injury and breast cancer ended up positively impacting Johnstown, Pennsylvania and the entire country.

Carrying on his mission was part of the reason for holding the James E. Van Zandt VAMC Health and Wellness Community Summit on Thursday at the University of Pittsburgh at Johnstown's John P. Murtha Center for Public Service and National Competitiveness.

"He made taking care of veterans a benefit to the whole community," state Rep. Bryan Barbin said. "What we learned in taking care of veterans was also a benefit to the population as a whole. And that should continue."

The summit was the first symposium-type event hosted by the newly opened center.

"I can't think of any organization that's more appropriate for this center than one dealing with veterans and their problems and concerns because, as all of you know, that, for Jack, was our No. 1 program and problem that he worked on," said Joyce Murtha, the late congressman's widow. "And he just felt like that veterans didn't always get all they deserved."

UPJ President Jem Spectar explained how the gathering brought together representatives from different fields to share ideas, which was a way Murtha worked when trying to find solutions to difficult issues.

"One of the most important things this center can do is to bring people from different sectors," Spectar said. "We have here representatives from the medical community, from the military community, leaders, community service agencies, volunteers to talk about issues of concern to our community and to bring insights, new ideas, the latest research to try to find solutions to the pressing and vexing issues that affect our community."

The summit included a presentation about suicide among military personnel and veterans.

Russell L. Crupe, Sr., whose son committed suicide after serving in Iraq, discussed the need to eliminate the "stigma" that exists surrounding mental issues that can lead to suicide.

"It's a story I'm trying to tell," Crupe said. "Maybe I can save a veteran's life."

Ronald Poropatich, executive director for the University of Pittsburgh Center for Military Medicine Research, discussed advancements that are being made in eye transplants, regenerative medicine, and other areas. He went into detail about work being done to better map nerves in the human brain.

"It's high-definition fiber tracking," Poropatich said. "It's neuroimaging, imaging of the brain. It's taking a MRI of the brain and developing a stronger way to interpret the signals from the MRI machine in such a way that we can see the actual nerve fiber, where we don't see that now."

The research is supported by the Department of Defense.

"Military funding that we're receiving to do research for military-specific medical problems has a direct translation to the civilian sector," Poropatich said.

[Back to Top](#)

2.11 - New Hampshire Public Radio: [Makeup of N.H. VA Task Force Announced, Some Whistleblowers Say They Were Shut Out of Process](#) (14 September, Peter Biello, 148k online visitors/mo; Concord, NH)

The Department of Veterans Affairs has released a list of the twelve people who will serve on a task force looking at the future of health care for New Hampshire veterans.

Since July, a dozen whistleblowers have come forward with allegations of substandard care at the Manchester VA. One of those whistleblowers, cardiologist Erik Funk, will serve on the task force.

The list also includes four people who are not VA employees and five who are not New Hampshire residents.

Ed Kois, a VA doctor and leader of the whistleblowers, said that's a problem.

"We have people deciding the fate of the Manchester VA who don't have any skin in New Hampshire," Kois said.

VA Secretary David Shulkin ordered the creation of this task force in a visit to New Hampshire last month.

One of the more outspoken whistleblowers, Stewart Levenson, was turned away when he offered to join. Levenson worked at the Manchester VA for nearly two decades before leaving the VA earlier this summer.

Dr. Michael Mayo-Smith, network director for the New England VA system and co-chair of the task force, said at the time in an email obtained by NHPR that Levenson could not join the task force because "government work needs to be done by government employees - others are not bound by the same ethical and regulatory guidance."

He went on to say that "the Task Force will be VA staff."

Mayo-Smith was unavailable to comment Thursday.

Dave Kenney is co-chair of the committee, and chair of the New Hampshire State Veterans Advisory Committee. He is also not a VA employee. Kenney says through his work on this task force, he will be looking for ways to bring "full-service" healthcare to New Hampshire veterans.

"Full-service" means a broader range of treatment options for New Hampshire veterans, including in-patient care. Kenney says that's what most veterans want.

"They want full service, however that manifests itself," Kenney said. "Whether it's a combination of VAMC [VA Medical Center] and Choice [The Veterans Choice Program], which I believe is the way it will be."

New Hampshire is one of three states in the country without a full-service VA Medical Center, along with Alaska and Hawaii.

The task force's next meeting is scheduled for September 25th, with recommendations due by January 2018.

[Back to Top](#)

2.12 - Hudson Valley News Network: [Maloney, Local Officials Slam VA Decision to Cut Funding](#) (14 September, Kathy Welsh, 54k online visitors/mo; Hyde Park, NY)

NEWBURGH – Representative Sean Patrick Maloney (NY-18) and local officials condemned a decision by the Department of Veterans Affairs to deny an anticipated annual federal investment of over \$500,000 to Hudson River Housing.

If no action is taken, funding will run out and the program will be terminated after Sept. 30.

"Hudson River Housing has been an absolute lifeline for hundreds of men and women who wore our country's uniform and needed some help when they got home. This heartless decision would leave them out in the cold," said Rep. Maloney. "This breaks our sacred promise to our veterans and turns our back on them when they need us most."

“Veterans should have every expectation we will continue to support them and will not give up on them,” said Dutchess County Executive Marcus J. Molinaro. “These brave men and women put their lives at risk to ensure our safety and the security of our nation. Though Supportive Services for Veteran Families (SSVF) and our partnership with Hudson River Housing has led to a dramatic decrease in homelessness among veterans, the issue remains. We do not want to see even one veteran struggling to find safe shelter and secure housing. With little notice the Department of Veterans Affairs’ decision to deny another year of SSVF support in our community is shortsighted and illogical. We are grateful to Congressmen John Faso and Sean Maloney and Senator Chuck Schumer for speaking up for Dutchess County’s and America’s veterans. We cannot allow any veteran to be left out in the cold, to struggle on their own. Dutchess County stands with our veterans and will keep fighting for every one of them.”

“Since 2012, Hudson River Housing has been able to assist over 500 families who would have otherwise been homeless without this funding,” said New York State Senator Sue Serino. “This harmful decision to eliminate this grant, which has effectively reached so many veterans in need, illustrates either a lack of understanding of the critical need it fills or a callous disregard for our veterans. I implore the Division of Veterans Affairs to reconsider and provide this critical funding to ensure that our homeless veterans and their families are not abandoned by the nation they have courageously served.”

“On behalf of the homeless Veteran families that Hudson River Housing proudly serves, we are devastated by the news of the defunding of our Support Services for Veteran Families (SSVF) grant,” said Hudson River Housing Executive Director Christa Hines. “The possible closure of the SSVF program will cause an immediate and serious impact on the at-risk and homeless Veteran community that we serve and potentially reverse all of the progress that Hudson River Housing and our partners have made to address Veteran homelessness in Dutchess County. The manner in which we received notification that funding we have relied upon since 2012 would be completely eliminated in 2 weeks just furthers our disappointment and magnifies the impact this will have on the Veterans we serve. We appreciate the willingness of our Congressional representatives, John Faso and Sean Patrick Maloney, our Senator Charles Schumer and State Senator Sue Serino as well as Dutchess County Executive Marcus Molinaro who joined with us in questioning why this funding was cut and their advocacy on our behalf with the Administration.”

Hudson River Housing will apply for an emergency one month extension to allow the organization to finish its existing cases. Local leaders are working together to appeal the decision or secure an extension. Rep. Maloney sent a letter directly to the President, asking him to intervene on behalf of local veterans. Dutchess County Executive Molinaro wrote an additional letter to the VA.

Hudson River Housing in the City of Poughkeepsie has received an investment of \$511,000 every year for the past five years from the Supportive Services for Veteran Families (SSVF) program. The investment has allowed the organization to employ five full-time staff who provide wraparound services to homeless veterans. Two staff members are veterans themselves. Since starting the program in 2012, HRH has helped over 450 homeless or at-risk veteran families and are currently providing services to thirty veterans. The U.S. Interagency Council on Homelessness recently confirmed that Dutchess County had effectively ended homelessness among veterans. However, this status is reliant on local organizations which have the capacity to assist individual veterans who are at-risk or have recently become homeless.

Since taking office in 2013, Rep. Maloney has worked to secure nearly \$2 million to assist homeless veterans in the Hudson Valley. In July, he introduced the Housing Our Heroes Act, which would create a three-year \$25 million pilot program within the VA to provide grants to VSOs and other non-governmental organizations to acquire and update blighted properties for the purpose of housing homeless veterans.

2.13 - DS News: [Ginnie Mae Responds to Senator Warren on VA Lenders](#) (14 September, Brianna Gilpin, 54k online visitors/mo; Dallas, TX)

Thursday, in a letter to Senator Elizabeth Warren (D-MA), Ginnie Mae explained how it is curbing VA refinance speeds and aggressive marketing by some VA approved lenders.

The letter was in response to Sen. Warren, who initially addressed the aggressive practices in a letter to Ginnie Mae on September 6, 2017. Warren warned that the marketing practices are negatively impacting Ginnie Mae securities without necessarily benefiting veteran borrowers.

After researching the unusually fast prepayment speeds Ginnie Mae was noticing in its securities, as well as conducting conversations with its partners at the VA, with Ginnie Mae issuers, and the investor community, in 2016 Ginnie Mae decided to change a few program standards.

“The APM put in place a limitation on the delivery of so-called “streamline refinance” loans into standard Ginnie mortgage-backed-securities until six consecutive monthly payments were made on the initial mortgage loans,” Michael Bright, President and CEO of Ginnie Mae said in the letter.

According to Bright, this means that an originator cannot do a quick refinance of a loan and deliver it into a standard Ginnie Mae security until the borrower has made six months of payments. This restriction went into effect in February of this year, but after a successful six months, Ginnie Mae noticed more streamlined refinancing appearing in their pools. Some VA loan issuers are now using other “evasive mechanisms.”

“Ginnie Mae’s efforts, along with its partners in government, industry, Congress, and other stakeholders, seek to fully root out these questionable lending practices that harm veterans and harm the Ginnie Mae security, which also notably means harm to FHA and other government backed loan program borrowers,” Bright said.

[Back to Top](#)

2.14 - Reveal: [White House seeks to legalize payoffs to VA officials by for-profit schools](#) (14 September, Aaron Glantz, 39k online visitors/mo; Emeryville, CA)

The Trump administration is seeking to waive a 50-year-old anti-corruption law that prevents officials who administer the GI Bill from accepting money from for-profit schools backed by taxpayer subsidies.

The proposed regulation, published Thursday in the Federal Register, would allow employees of the Department of Veterans Affairs to receive “wages, salary, dividends, profits, gratuities” and services from for-profit schools that receive GI Bill funds.

VA employees would also be allowed to own stock in those colleges, the waiver says, as “the Secretary (of Veterans Affairs) has determined that no detriment will result to the United States, veterans or eligible persons from such activities.”

News of the proposed rule blindsided veterans’ advocates who have battled for years against predatory colleges, many of which have used aggressive marketing techniques to become leading recipients of GI Bill money.

“Bizarre and very likely illegal,” said Carrie Wofford, president of Veterans Education Success, a nonprofit group that has bailed out veterans who found themselves unemployed and deep in debt after attending for-profit schools.

“There are federal laws – including federal criminal laws – that prohibit federal employees from engaging in this exact behavior,” she said.

At VA headquarters in Washington, press secretary Curt Cashour said the agency remained “committed to protecting veterans from predatory behavior from for-profit educational institutions.”

But he said the Vietnam-era law that prohibited employees from receiving payments from for-profit schools was so sweeping that it could have “illogical and unintended consequences.” He cited supplementary materials attached to the regulation that said current law could cover VA lab technicians who take a class, on their own time and using their own money, at a for-profit educational institution that is also attended by veterans using the GI Bill.

The rule change sought by the Trump administration is far more sweeping, however. It would create a situation where VA officials, who are charged with ensuring GI Bill funds are well spent, could accept payments from colleges that are facing civil suits or probes from law enforcement.

Under this rule change, VA employees could even own or run a for-profit college that profits from the GI Bill.

It’s the latest example of the Trump administration apparently embracing conflicts of interest when it comes to for-profit colleges.

Earlier this week, the VA angered many consumer advocates by allowing for-profit Ashford University to continue receiving GI Bill money even after regulators in California and Iowa revoked its certification from the program. The online college had responded to the crackdown by moving its official address from Iowa to Arizona. On Wednesday, the VA sent Ashford a letter saying it would be able to continue to accept taxpayer money to educate veterans, using the Arizona address.

On Aug. 31, the Trump administration announced it had picked Julian Schmoke Jr., a former official at for-profit DeVry University, to head an Education Department unit that polices colleges for student aid fraud. Last year, DeVry paid \$100 million to settle federal claims it misled students.

And, shortly after last November's election, Donald Trump agreed to pay \$25 million to settle multiple lawsuits claiming fraud at Trump University, his own now-defunct for-profit real estate school. The school, which lacked any academic accreditation, did not receive GI Bill funds.

2.15 - WBOY (NBC-12, Video): [VA Hospital Hosts Town Hall to Hear Concerns from Veterans](#) (14 September, Elayna Conard, 21k online visitors/mo; Clarksburg, WV)

The VA Hospital held a town hall to hear the concerns of veterans Thursday afternoon.

The VA holds these town halls every few months as a way to keep open communication with veterans. The director of the hospital, Dr. Glenn Snider, said that he was glad to hear compliments from veterans about their recent services.

Dr. Snider said that most questions from veterans tend to be about benefits and the best people to contact so at every town hall are representatives to directly talk to veterans.

Many veterans had concerns and questions about food service and accommodating religious preferences like kosher.

"We not only provide food for our in-patients, we also provide food for some of our out-patients and we are the food preparer for the state veterans home next door. Our space is constrained and that is one of the reasons we can't expand as quickly the food services as we would like to," said Dr. Snider, director.

Dr. Snider went on to add that food service staff and nutritionists work to accommodate both religious and dietary needs for every veteran.

2.16 - Bloomberg Politics: [U.S. Probes High-Pressure Mortgage Sales Targeting Veterans](#) (14 September, Joe Light, 18k online visitors/mo; New York, NY)

The U.S. is investigating lenders for allegedly pressuring veterans and members of the military into unneeded mortgage refinances -- unsavory conduct that not only leads to higher consumer costs but has consequences for one of the world's largest bond markets.

The probe is being conducted by Ginnie Mae, a government-owned corporation whose purpose is to make mortgages more affordable. It does so by guaranteeing repayment on \$2 trillion of mortgage bonds even if borrowers default on the underlying loans. Ginnie-backed securities support several federal housing initiatives, including programs in which loans are made through the Department of Veterans Affairs.

The concern is that some lenders are improperly pushing veterans and servicemembers to refinance loans that have been wrapped into Ginnie securities. Lenders are hounding

consumers to refinance loans over and over again in a short period of time, according to Ginnie Acting President Michael Bright. The practice, known as churning, generates high fees for lenders but can leave servicemembers with larger loan balances.

The issue is starting to resonate on Capitol Hill, where it has drawn the attention of Senator Elizabeth Warren, one of the finance industry's most relentless critics. Last week, the Massachusetts Democrat sent Bright a letter, asking whether some lenders were abusing Ginnie's program by engaging in aggressive marketing tactics.

Task Force

In a response to Warren dated Thursday, Bright said Ginnie and Veterans Affairs had created a task force to address churning and other abusive practices by lenders approved to issue Ginnie-backed bonds. The agencies could impose restrictions on refinances and ban lenders from their programs. Bright's letter didn't identify any specific companies engaging in churning.

"There are clearly some Ginnie Mae-approved issuer companies who appear to be taking advantage of the VA program to aggressively market and churn loans in our securities," Bright wrote to Warren in his letter, which Ginnie provided to Bloomberg News.

When banks make loans through Veterans Affairs they offer terms that aren't available to most borrowers. These include no requirement for a down payment and adding closing costs to loan balances so borrowers don't have to pay them at the time of the sale.

But the loans are also prime targets for churning, Bright said in an interview. Unlike financing provided through other government programs, lenders issuing loans through Veterans Affairs don't have a strong obligation to ensure that borrowers experience a real benefit when they refinance. Some lenders are persuading servicemembers to refinance loans at rates that barely reduce their mortgage payment, while misleading them about potential consequences, Bright said.

"I am glad that Ginnie Mae and the VA have created the Lender Abuse Task Force and have committed to working with me to crack down on lenders who are exploiting veterans in order to line their own pockets," Warren said in a statement Thursday. "These abusive practices are wrong, and lenders who engage in them shouldn't benefit from any taxpayer backing."

'Predatory Lending'

Ted Tozer, who helmed Ginnie under President Barack Obama's administration, said that his agency found some lenders who called veterans and offered a refinance that would allow them to draw cash out of their homes and pay off other debts such as credit-card balances. However the rate given could be a half percentage point above the current market price. Then several months later, the lender or a competitor would call the veteran back and offer another refinance at the market rate, earning another round of fees for the refinance.

"It's starting to smell like predatory lending," said Tozer, comparing the recent practices to those used by subprime lenders before the last housing bust.

In a report released last November, the Consumer Financial Protection Bureau said it had received 1,800 complaints from servicemembers, veterans or their families about mortgage refinances. In one such complaint, a veteran continued to get calls from their mortgage

company, even though they had told the lender multiple times that they had recently refinanced their mortgage.

Bonds Slump

Serial refinances have become enough of a problem that they are driving down prices of Ginnie bonds, JPMorgan Chase & Co. analysts said in a research report issued last week.

When investors buy Ginnie securities, they make assumptions about how quickly borrowers will refinance. If refinances happen more quickly than expected, investors risk losing their expected bond yield and income stream. Such factors make Ginnie bonds less attractive, and when demand wanes, prices fall.

That's what seems to be happening, and it doesn't just affect Veterans Affairs mortgages, the JPMorgan analysts wrote. Veterans Affairs mortgages are wrapped into the same Ginnie-securities as mortgages backed by the Federal Housing Administration, which are popular among first-time home buyers. Falling securities prices lead to higher interest rates for mortgage borrowers.

Ginnie has tried to slow down the refinancing rush in the past year, putting a six-month moratorium between new mortgages and a refinance.

However, there were enough exceptions to the moratorium that serial refinances didn't stop, and once the six-month mark passed, Bright said Ginnie saw a new blitz of lenders preying on servicemembers. In the letter to Warren, Bright said that some lenders apparently targeted veterans for a refinance at "six months and one day."

2.17 - KUPR (NPR-89.3): [Landmark Vietnam War Series May Trigger Unwanted Memories For Some Vets](#) (14 September, Steve Walsh, 17k online visitors/mo; Fresno, CA)

Starting Sunday, PBS stations around the country begin airing a 10-part series on the Vietnam War produced by Ken Burns and Lynn Novick. Many veterans will be watching. Others say they definitely will not watch because they want to avoid the traumatic memories that could be triggered.

"The Vietnam War" is being billed as a rare cultural milestone, at least for veterans of the war. The filmmakers have been planning the documentary series since 2006 -- meaning their production process has been about as long as the war itself, from the Gulf of Tonkin Resolution in 1964 to the Fall of Saigon in 1975.

The series may be too intense for some Vietnam vets, according to Henry Peterson, a chaplain with the Veterans Affairs hospital in San Diego. He counsels veterans with post traumatic stress disorder, PTSD, and he surveyed some of them to find out who will be watching. He said many of his clients will not.

"It could bring up some memories that they don't want to deal with," Peterson said. "It could bring up some memories they may need to deal with."

Almost anything can trigger the vivid and aggressive thoughts associated with PTSD. It might be a door slam or the smell of diesel, according to Tina Mayes, a staff psychologist at VA San Diego Healthcare.

Most common triggers

"It can be something someone says. The way they say it," she said.

News, films and documentaries are among the most common triggers.

"I would say the majority of veterans that I work with when their symptoms are high, they're actively avoiding any media," she said.

Vietnam vets are particularly vulnerable. Most of them were not treated early. The PTSD treatment evolved after this group of vets had returned from the war. In the 1970s, the VA was often unwelcoming. Society in general appeared, at best, uninterested in the plight of returning vets. Older Vietnam vets, in particular, have among the highest rate of suicide.

"Honestly, we don't know why, but some of the research suggests that it was because of the way they were received when they came back," Mayes said.

'It affects everyone'

This group of vets can end up living for decades with the symptoms of untreated PTSD, including feelings of aggression that seem to emerge from nowhere, said Larry Taylor, a combat veteran of Vietnam.

"It affects everyone," Taylor said. "I would say my own wife experienced PTSD just from her relationship with me and the war I fought in."

Before Taylor was treated, he coped by avoiding his triggers. He did not watch movies like "Apocalypse Now" or "The Deer Hunter," but he ran into trouble when news coverage of the original Gulf War blanketed TV. As the war raged, so did Taylor's symptoms.

"Basically, after the Gulf War, my PTSD kicked in," Taylor said. "I would wake up screaming. My wife would wonder what's going on. I was having nightmares all the time, during the daytime."

Find a loved one to watch it with you

Still, Taylor did not seek treatment for another decade. He is now the lead mental health chaplain at VA San Diego. He plans to watch the 18-hour-long documentary.

"I think today I know the difference between a bad memory and reliving a situation," he said. "Fortunately, I'm not reliving things the way I once did."

Taylor is counseling other Vietnam veterans that they should not feel obligated to watch the documentary. If they do watch, he advises them to find a loved one to watch it with you. Taylor is enlisting his wife of 46 years.

In the past, the VA has provided outreach around movies like "Saving Private Ryan" for vets who may be triggered by what they are seeing. This time the VA is partnering with PBS, preparing to provide counseling to any vets who feel it is time to start working through their own experience with the war.

2.18 - Law Firm Newswire: [VA Fires Head of DC Facility Amid Confidentiality Breach, Leadership Concerns Says Veterans Attorney Jim Fausone](#) (14 September, 900 online visitors/day; Tampa, FL)

Northville, MI (Law Firm Newswire) September 14, 2017 - The Department of Veterans Affairs (VA) fired the longtime director of its main veterans medical center in Washington, D.C.

Brian Hawkins was dismissed due to growing concerns about his leadership of the VA facility. The VA released a statement saying "he failed to provide effective leadership." Hawkins was reassigned to a different post within the agency in April pending further review. Retired Army Col. Lawrence Connell has served as the hospital's acting director since then.

"The disciplinary action taken against Brian Hawkins reiterates the fact that the VA is now more committed to enhancing accountability in the department," commented Jim Fausone, a Michigan veterans attorney. "Both VA employees and leaders should face the appropriate consequences if they put veterans at the risk of harm and are not aligned with the VA's mission."

Hawkins' departure followed several months of investigations by the VA Office of Inspector General. Audits found evidence of mismanagement at the facility. The hospital's patients were endangered by poor inventory practices and organizational dysfunction.

The VA Inspector General Michael J. Missal released the findings of an internal probe in April. His report documented "the highest levels of chaos" at the Washington, D.C. medical center, including large-scale medical supply shortages and unsanitary conditions in equipment storage areas.

The VA had an even bigger cause for concern when its internal watchdog made public another report in June. It revealed that Hawkins had emailed "sensitive" information about administrative decisions and VA staff to his wife's personal account. She is not a VA employee. According to the report, the emails were a breach of the department's rules on data confidentiality.

Hawkins was fired after the inspector general's office recommended new disciplinary action be taken against him. Missal was unable to prove separate accusations of Hawkins trying to obstruct an investigation into staff bonuses that he authorized "without proper justification." The report, however, said his employees delayed providing certain documents related to the probe.

3. Access to Healthcare

3.1 - ABC News (AP): [The Latest: Hurricane cleanup crew finds body near hotel](#) (14 September, 24.1M online visitors/mo; New York, NY)

The Latest on Hurricane Irma (all times local):

[...]

2:50 p.m.

Federal officials say that nursing homes normally reserved for veterans will be opened up to non-veteran nursing home residents if space is available, in the aftermath of Hurricane Irma.

U.S. Sen. Bill Nelson announced Thursday that the U.S. Department of Veterans Affairs had agreed to open its nursing homes following eight deaths at Florida nursing home. Florida has seven nursing homes throughout the state that are available to residents who were veterans.

Multiple nursing homes and assisted living centers in Florida have evacuated their residents after losing electric power.

U.S. Secretary of Veterans Affairs David Shulkin said in a statement that available beds will be offered to non-veterans, although the agency would continue to focus on its primary mission of assisting veterans.

3.2 - The Huffington Post: [VA Broken Promise Harms Veteran and Costs Jobs](#) (14 September, Hal Donahue, 22.9M online visitors/mo; New York, NY)

Trusting the Department of Veterans Affairs and not seeking outside assistance can hurt veterans.

Meet Joe Stahurski. Experts like Joe made aviators like me miserable. Red Flag, the huge international aerial combat training exercises held by the Air Force, is deadly serious business. One of Joe's jobs was to ready aircrews for war. Just as Red Flag training became intense, radars maintained by Joe would come on line posing the latest enemy anti-aircraft threats. Our detection and threat systems were tones and lights. The threats Joe helped simulate lit up what we called 'oh sh*t' lights. Dire warnings at the best of times.

We cannot thank these people enough. Joe, and people like him, help US military aviators and aircrew of allied nations survive their first critical hours and days of combat. Mr. Stahurski is a disabled Army veteran who continues to serve. Following six years of military service, Joe's critical skills were put to use working for a military contractor both in Florida and then for 15 years at Tobyhanna Army Depot where his duties went far beyond Red Flag.

"Tobyhanna Army Depot is a recognized leader in providing World-Class Logistics Support for Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance (C4ISR) Systems across the Department of Defense..."

As this century's wars began to wind down, Mr. Stahurski expected that his job as a defense contractor would come to an end. Joe saved for that eventuality and when laid off last year, he sought help starting a disabled veteran owned business. A technical expert, Joe possessed little knowledge concerning how to actually start a business. He visited his local VA Veterans Rehabilitation Counselor and received a wealth of information and assistance to create a Service-Disabled Veteran-Owned Small Business(SDVOSB).

Mr. Stahurski was referred to the University of Scranton Small Business Development Center where he met Nicholas DeAntonio from the Defense Transition Partnership, a program designed specifically to help people just like Mr. Stahurski. Mr. DeAntonio provided expert guidance concerning the myriad requirements, applications and planning necessary to become a disabled veteran owned business. Everyone Joe contacted was eager to assist him from former fellow workers to potential clients eager to use his services.

Under the expert tutelage of Mr. DeAntonio, Joe spent countless hours developing business plans, sourcing equipment and identifying labor sources. By August, 2016, Mr. Stahurski was the proud owner of a fully certified Disabled Veteran Business, STS Delta Aerospace Corporation , and he was fielding calls from potential clients wanting his services. There was one snag. Joe was still waiting for his equipment. Stahurski had identified the equipment required and submitted the order to the VA for his promised equipment valued at approximately \$16,000.

Mr. Stahurski patiently waited, accepting delays while losing potential business on a steady basis. The promised equipment never arrived and by November, the VA was no longer returning his calls. Finally, in 2017, Joe received word that he could not be approved to receive his equipment until he completed additional paperwork. Seeking advice from local official and unofficial veteran resources, Mr. Stahurski appealed to Congressman Matt Cartwright, his local congressman, who summed up the Mr. Stahurski situation precisely:

"...Mr. Stahurski was approved for the program in August 2016 after presenting a well-developed 3-year business plan. However, after a February 2017 change in regulations, a 5-year business plan became a requirement. As a result of this change, Mr. Stahurski was unable to move forward with his business despite being previously approved under the program. Mr. Stahurski has not benefitted from the program as promised and has suffered significant financial harm. I firmly believe this is an egregious oversight on the part of the VA as Mr. Stahurski was previously approved prior to the rule change adopted earlier this year."

When asked what occurred, Mr. DeAntonio praised all the local people involved especially Mr. Stahurski but then said; "The VA moved the goal post". The VA agrees in a July letter to Congressman Cartwright:

"...The veteran's case at this time is still pending Self-Employment approval, because in 2017 VR&E guidelines have been updated for any case pending which has caused the Veterans' case to require new updated information for a business plan to be approved."

If taken to nearly any financial institution when complete, Mr. Stahurski's business plan would almost certainly have won a solid loan under favorable terms. Joe Stahurski met every requirement and was eagerly awaiting delivery of his equipment to begin hiring employees. Concern only developed when the VA stopped responding to his telephone calls toward the end

of 2016. If Mr. Stahurski made any mistake, it was trusting the VA and delaying to seek outside assistance. He is now receiving assistance.

Congressman Cartwright requested a meeting with VA officials in Washington to further discuss the program and Mr. Stahurski's situation. Following a request from Mr. Stahurski, Senator Robert Casey is now aggressively pursuing his complaint. While local veteran advocates have connected Mr. Stahurski to other disabled veteran businesses who may be able to assist him.

Mr. Stahurski wants to protect fellow veterans:

"No other veteran should have to go through what I have. Be aware of the challenges dealing with the VA and seek help when difficulties cannot be resolved. Your members of Congress are there for you; use them."

Mr. Stahurski deserves both to be made whole and to receive our thanks for speaking out.

[Back to Top](#)

3.3 - Palm Beach Post: [VA offers beds to Florida nursing home residents affected by Irma](#) (14 September, Joe Capozzi, 3.8M online visitors/mo; West Palm Beach, FL)

The U.S. Department of Veterans Affairs is making beds available to non-veteran nursing home residents affected by Hurricane Irma.

U.S. Secretary of Veterans Affairs David Shulkin announced the plan after talking with Gov. Rick Scott and Sen. Bill Nelson late Wednesday. Those discussions took place after eight residents of a Florida nursing home died from what appears to be heat exposure likely caused by a power outage at their facility in Hollywood.

"We thank Governor Scott and Senator Nelson for involving VA and are grateful we can help our fellow citizens where we can in this time of need," Shulkin said.

VA can make its facilities available to non-veterans as part of its mission to support national, state and local emergency management, public health, safety and homeland security efforts.

Shulkin agreed to make more beds available to non-veteran nursing home residents as needed and free.

The VA also is working with the U.S. Department of Health and Human Services and the Federal Emergency Management Agency on the overall response to Irma.

"We will continue to look for ways to relieve the hardship this powerful storm has caused," Shulkin said. "Much of the heavy-lifting to recover from the hurricane is still to come and our leaders and staff are determined to find as many ways as we can for VA to help in the response."

[Back to Top](#)

3.4 - WJW (FOX-8, Video): [Presidential Opioid Commission praises, learns from Cleveland VA](#) (14 September, Bill Sheil, 665k online visitors/mo; Cleveland, OH)

Gov. Chris Christie of New Jersey, head of a Presidential Commission on opioids, summed it up well when addressing doctors and patients gathered at the Louis Stokes VA Center in Cleveland.

"We didn't come here by accident," he said.

Christie, and several prominent national figures, toured the VA Center on Thursday to learn more about a remarkable contradiction.

Even though the state of Ohio has the highest addiction rate in the nation, the Stokes Center in Cleveland has the lowest addiction rate across the nation in terms of VA hospitals treating patients.

So, how is that possible?

It started several years ago, when caregivers at the Stokes VA starting tackling the explosion in opiate addiction.

Basically, they looked for innovative ways to treat pain that involved fewer opiates, and they looked to monitor patients closely for signs of addiction, along with additional training for doctors about prescribing painkillers.

The Cleveland model has now been incorporated into a system-wide effort at the VA called

"STOP PAIN."

"One of my personal goals in working with the President...is to de-stigmatize the opiate addiction," said Kellyanne Conway, a counselor to President Trump.

Former Congressman Patrick Kennedy, a recovering addict, said the VA is on the forefront in treating mental illness and addiction together in their efforts to help many patients.

He also said addiction needs to be treated, and covered by insurance, like any other disease. The Secretary of Veterans Affairs, David Shulkin, also traveled to Cleveland with the group to see first-hand what has worked so well at the Stokes VA Center.

VA doctors here have reduced opioid prescribing by 25 percent in the past seven years. That's more than double the reduction seen nationwide, or elsewhere in the region at other health systems.

[Back to Top](#)

3.5 - WOIO (CBS-19): [White House opioid commission turns to Cleveland VA for solutions](#) (14 September, Sara Goldenberg, 610k online visitors/mo; Cleveland, OH)

CLEVELAND HEIGHTS, OH (WOIO) - Northeast Ohio continues to struggle with opioid addiction and overdose deaths.

But there's a treatment program in our own backyard that's bucking the trend.

The VA Secretary and White House officials came to Cleveland on Thursday to learn more.

The Northeast Ohio VA Healthcare System has the lowest addiction rates across the VA.

They're creating alternatives to pain management, and officials hope some of what they're doing could become a national model to fight the opioid epidemic.

Governor Chris Christie of New Jersey heads President Trump's opioid commission.

Christie toured the Louis Stokes Cleveland VA Medical Center along with VA Secretary David Shulkin, Kellyanne Conway and former Congressman Patrick Kennedy Thursday morning.

"We didn't come here by accident, we didn't pick you out of a hat. We came here because this facility has the reputation for being a model," Christie said.

"The only way we're going to stop the suffering and death is to change the culture around the way we manage pain in this country. And the model here is extraordinary, both in terms of its breadth and its effectiveness," Christie said.

Only four percent of veterans who receive care at this VA are prescribed opioids.

The VA says that's well below the national average.

The VA healthcare system in Cleveland has reduced opioid prescriptions by nearly 25 percent since 2010.

The VA says other healthcare providers in the area have reduced prescriptions by only 10 percent.

Officials are looking at the best practices used here, focusing on pain treatment alternatives like physical therapy, even acupuncture and yoga.

Patrick Kennedy, the son of Ted Kennedy, is a recovering opioid addict himself.

"We want the same urgency of care that you would provide for any other disease someone could be afflicted with, end of story," Kennedy said.

Kennedy hopes what they're doing here can be used everywhere.

"We can save people. I've been able to get access to continuity of care, I shouldn't be the only one in this country," Kennedy said.

The opioid commission plans to have a final report with recommendations ready for the President on November 1st.

Officials say they need to take more steps before declaring a national emergency to fight the epidemic.

[Back to Top](#)

3.6 - WIBW (CBS-13): [VA opening new Veterans Crisis Line in Topeka; expects to hire 100](#)
(14 September, Nick Viviani, 485k online visitors/mo; Topeka, KS)

Topeka will be the home of the Dept. of Veterans Affairs' newest Veterans Crisis Line call center.

On Wednesday, the VA officially announced it would open the new crisis line, its third one nationwide, in the Capital City. The new call center is expected to employ 100 people and will be housed in the VA Eastern Kansas Health Care System.

"When it comes to preventing Veteran suicide, we will do everything we can to make it as easy as possible for Veterans to reach us," said VA Secretary Dr. David J. Shulkin. "The new center in Topeka gives us more feet on the ground and an easier way for Veterans to connect with us when they need us most."

The VA says the call center should open this fall. VCL currently operates two centers in Canandaigua, New York, and Atlanta, Georgia.

More information about the openings and how to apply are available here. The VA says the positions are open to applicants with prior comparable experience or a master's degree in a health science, such as mental health, social work, or psychology. The agency held a job fair as well last Friday prior to the announcement of the new facility.

Having a third location will offer the VA more capacity as it expands the "Press 7" automatic transfer function for its Community-based Outpatient Clinics (CBOCs) and Vet Centers. Press 7 offers callers to VA Medical Centers immediate access to the crisis line from a main phone tree.

Right now, the CBOC and Vet Center do not have that option and veterans have to take the extra steps of calling 800-273-8255 and pressing 1, the VA explained.

According to numbers from the agency, the VCL has answered more than three million calls since it launched in 2007 and dispatched emergency services for callers in imminent crisis more than 84,000 times. Chat was launched two years later, in 2009, and text services came two years after that and, in that time, the VCL had answered nearly 359,000 and nearly 78,000 requests for chat and text services respectively.

Veterans in crisis can call the Veterans Crisis Line for confidential support 24 hours a day, seven days a week, 365 days a year at 800-273-8255 and Press 1, chat online at VeteransCrisisLine.net/Chat or text to 838255.

[Back to Top](#)

3.7 - Poughkeepsie Journal (Video): [Hudson River Housing lose federal funding for homeless veteran program](#) (14 September, Jack Howland, 440k online visitors/mo; Poughkeepsie, NY)

Homeless veterans and their families might be losing support in a few weeks, if Hudson River Housing is forced to shut down a key program.

Hudson River Housing is facing losing its program serving homeless veteran families in Dutchess County by the end of September in the wake of the U.S. Department of Veteran Affairs denying the group an annual grant, the nonprofit said Thursday.

The Support Services for Veteran Families grant - about \$500,000 - has been awarded to Hudson River Housing since 2012, and has been the sole source of funding its program for those who are homeless or lack secure housing and their families. Hudson River Housing Executive Director Christa Hines said the VA informed the organization that its funding renewal application was rejected in a letter received Sept. 7.

The 2017 funding of \$516,145 provided by the VA is set to run out Sept. 30.

This annual federal grant, Hines said, has been the organization's second-largest source of funding and it's only funding specifically for veterans.

"We have 30 open cases of homeless veteran families we're currently servicing, and in two weeks we could not be able to serve them," she said. "We're beyond concerned."

A spokesperson for the VA could not be reached by deadline.

Hudson River Housing, which began in 1984, has provided outreach services for Dutchess County's homeless population and those who are at-risk, but the SSVF specifically targets veterans.

Since 2012, the program has served more than 458 homeless or at-risk veteran families, providing services like housing location, rental assistance, financial planning, employment assistance and transportation. The organization takes on roughly 10 new cases each month.

Hines said the SSVF grant funds five-full time employees, two of them veterans, as well as an office space on North Clinton Street.

Hudson River Housing President Dan Hubbel said the organization is working on a plan as to "how we can continue that funding and continue the service.

"If the VA wants to renege on our commitment on veterans, Hudson River Housing isn't doing that," he said. "We made a commitment in 2012 and we want to continue that commitment."

Dutchess County Executive Marc Molinaro said the county, with Hudson River Housing, will send a request to the VA to extend the funding for 12 more months. This, he said, would keep the program running and allow the organization to eventually "transition to perhaps some other federally funded program or something that allows us to continue to make the progress we've been making.

“Dutchess has made significant progress with Hudson River Housing in driving down the total number of veterans who are struggling to find housing or are homeless, and the action by the VA to not continue the program — it’s absurd,” Molinaro said. “What is most egregious is to have received notice only three weeks before Hudson River Housing would have to fire their employees and shutter the program.”

He said there’s bipartisan support for continued funding from U.S. Sen. Charles Schumer, State Sen. Sue Serino, R-Hyde Park, and Reps. John Faso, R-Kinderhook, and Sean Patrick Maloney, D-Cold Spring, all of whom spoke out opposing the action.

Maloney called the decision “heartless” in a statement and said the organization has been a “lifeline for hundreds of men and women who wore our country’s uniform and needed some help when they got home.”

In a statement, Schumer spokesman Jason Kaplan said: “This is deeply concerning about the wrongheaded decision by the VA to discontinue this vital funding so that Hudson River Housing can continue to do the great work they do to keep our at-risk veterans from becoming homeless. They have done outstanding work so it makes little sense to hinder their ability to deliver top-notch service to our veterans. ...our office is working closely with Rep. Maloney’s office and local officials to bring our concerns to the highest levels of the VA.”

Faso sent a letter Wednesday to John Kuhn, national director of the VA’s Support Services for Veteran Families, imploring him to “use the full resources at your disposal to support HRH, and more importantly the veterans who are now at risk of homelessness, in order to deliver the services they require.

“Dutchess County simply does not have the capacity to deal with this issue without an adequate funding stream,” Faso said in the letter, “because HRH is the only program providing direct housing and support services to local veterans and their families.”

[Back to Top](#)

3.8 - Press of Atlantic City: [Veterans push for better health care, experts fight to provide it](#) (14 September, Nicole Leonard, 320k online visitors/mo; Pleasantville, NJ)

NORTHFIELD — Dozens of men and women squeezed together in a small conference room at the VA Outpatient Clinic in Northfield on a hot summer afternoon.

The crowd, the majority veterans in their 60s, 70s and 80s, looked ready for battle as they stood shoulder to shoulder, arms crossed and some prepared with notes as they faced off with local, state and regional officials from the U.S. Department of Veterans Affairs.

It wasn’t nearly as dangerous as the situations these veterans faced while serving in the military, but it ranked high in priority as most of the South Jersey veterans voiced their demands for better localized health care while VA experts expressed their desire to give it to them.

“We believe community care is sufficient,” said Vince Kane, director at the Wilmington VA Medical Center. “We have to get out of the medical centers and get closer to where the veterans

live. They can't all go through Wilmington. As an example, we're working in Cape May to relocate services to those people."

An estimated 355,766 veterans live in New Jersey, according to the VA. Some areas of the state have more than others, including Cape May County, where veterans make up nearly 9 percent of the population, one of the highest rates in the state.

Many of the veterans who get health care through the VA said they are generally happy with the quality of care they receive, as the VA has some of the most advanced medical technology and experts in the country.

The issues lie in the access and delivery of it, veterans said.

"There have been attempts at the county level to make medical care more accessible and affordable to veterans," said Frank Formica, Atlantic County freeholder chairman and an Air Force veteran. "It seems like there's been a trend in the country to pay more attention to local communities, but we don't have enough resources to execute those services."

Many veterans continue to champion the federal Veterans Choice Program, which allows veterans to use private providers outside VA clinics and hospitals to get care if they live more than 40 miles from a VA center or have to wait more than 30 days for a consultation.

Funding for the program was set to run out this summer, but President Donald Trump signed a bill last month that allocated an additional \$2.7 billion to keep it going.

Instead of having to travel long distances, sometimes on VA shuttles, veterans are able to go to local providers, with approval, for injury treatment, procedures and specialty care, but the service is complicated.

Veterans' concerns included not getting choice approval, long wait times for paperwork to go through and gaps in communication between an outside provider and the VA.

"I needed emergency spine surgery and used the choice program, which was great because I got one of the best spine surgeons in the country at Penn (Medicine)," said one veteran at the Northfield meeting. "Then I needed therapy, and funding ran out. It took five weeks to get re-approved for services that I needed immediately."

Frustration was felt by both the veterans and those who provide services in the region, as many VA officials said they want nothing more than to increase access to health care, bring more services to South Jersey clinics and reduce issues that have prevented veterans from getting care in a timely manner.

Federal regulations, rules and policies often limit the way in which they can make changes at the county level, VA officials said.

Another issue VA officials found was a lack of eligible veterans enrolling and using VA services for their physical and behavioral health needs. Among the 6,000 eligible veterans in Cape May County, fewer than half are enrolled and only 1,824 are actively using services, Kane said.

Kane said he and other VA officials need to identify how to increase participation, adding he is optimistic that changes coming down the pipeline will lead to better outcomes and satisfaction with services in South Jersey.

At the Cape May community-based outpatient clinic, officials hope to expand the physical footprint and increase the number and range of health care services at that location.

Jackie Hinker, U.S. Veteran Affairs Veteran Community Outreach Specialist, said veterans have been looking forward to an expansion “for the longest of time.”

In addition to the brick and mortar clinics, the VA runs mobile clinics that visit several sites through New Jersey every month to provide basic health care checks and tests. One such clinic regularly stops at Stockton University where William Richmann, 68, of Galloway Township gets his annual health visits.

As far as the choice program, Kane said the VA has established relationships with Shore Medical Center, Cape Regional Medical Center and Inspira Health Network, and is talking about working more with others like AtlantiCare and Bacharach Institute for Rehabilitation.

David Hughes, Shore Medical Center Chief Financial Officer, said the hospital has the ability and willingness to treat more veterans than it is currently limited to because of strict agreement contracts under the choice program.

“One of the things we’re working on is a program specifically for vets so that they can go to their local doctor and for us to provide services so that they don’t need to get on a bus for hours,” he said. “We will do whatever we need to for the needs of veterans.”

At the end of the day, both veterans and VA officials agreed they want better streamlined services, shorter wait times, increased accessibility to local care and the resources to establish and improve more programs.

Current plans for improvement are just the beginning, VA officials said.

3.9 - WKRG (CBS-5): [VA Offers Beds For Hurricane Irma Victims In Florida Nursing Homes](#) (14 September, 272k online visitors/mo; Mobile, AL)

In a press release sent out Thursday by the Department of Veterans Affairs, the U.S. Secretary of Veterans Affairs David Shulkin announced that the VA is making beds available to non-Veteran nursing home residents affected by Hurricane Irma.

This announcement comes after the new reports Wednesday that eight residents of a Florida nursing home died from what appeared to be heat exposure, likely caused by faulty air conditioning at their facility in Hollywood Hills.

Secretary Shulkin has been working with Florida Governor Rick Scott and Senator Bill Nelson and their staffs on this issue since Wednesday evening.

"We thank Governor Scott and Senator Nelson for involving VA and are grateful we can help our fellow citizens where we can in this time of need," said Shulkin. "All Americans are pulling together to help one another, and we must make a special effort for those most vulnerable to the conditions brought on by the storm."

VA has the ability to make its facilities available to non-Veterans as part of its fourth mission to support national, state and local emergency management, public health, safety and homeland security efforts and also through a mission agreement with FEMA under a Stafford Act Declaration.

Secretary Shulkin agreed to make more beds available to non-Veteran nursing home residents as needed and free, while ensuring they continue the primary mission of providing healthcare to Veterans.

The VA is also working closely with the U.S. Department of Health and Human Services and the Federal Emergency Management Agency on the overall response to Irma, in addition to this specific issue.

"We will continue to look for ways to relieve the hardship this powerful storm has caused," said Shulkin. "Much of the heavy-lifting to recover from the hurricane is still to come and our leaders and staff are determined to find as many ways as we can for VA to help in the response."

[Back to Top](#)

3.10 - WUSF Public Media: [VA Secretary Offers Beds To Nursing Home Patients Affected By Irma](#) (14 September, Bobbie O'Brien, 197k online visitors/mo; Tampa, FL)

The tragic deaths of eight nursing home residents after Irma knocked out their air conditioning has prompted the U.S. Secretary of Veterans Affairs to offer up available beds at Florida's VA nursing homes.

The Florida Department of Veterans Affairs operates six nursing homes for veterans built with federal and state money.

Dr. David Shulkin, U.S. Secretary of Veterans Affairs, said that part of the VA's mission is to support emergency management and public health which allows them to open up to non-veterans impacted by Hurricane Irma.

In a news release, Shulkin said he was working with Gov. Rick Scott and U.S. Sen. Bill Nelson to help nursing home residents.

"All Americans are pulling together to help one another, and we must make a special effort for those most vulnerable to the conditions brought on by the storm," Shulkin said.

But Shulkin emphasized that veterans remain their primary mission and the circumstances will not change that.

Five of Florida's veterans' homes lost power during the hurricane, but a state spokesman said all the homes had backup generators and have since had power restored.

[Back to Top](#)

3.11 - KSNT (NBC-27): [VA opening Veterans Crisis Line in Topeka – expected to hire 100 people](#) (14 September, Grant Stephens, 161k online visitors/mo; Topeka, KS)

The U.S. Veterans Administration is opening it's third Veterans Crisis Line call center in Topeka. It's expected to hire 100 employees.

"When it comes to preventing Veteran suicide, we will do everything we can to make it as easy as possible for Veterans to reach us," said VA secretary Dr. David J. Shulkin. "The new center in Topeka gives us more feet on the ground and an easier way for Veterans to connect with us when they need us most."

The VA already has two call centers, one in upstate New York, and one in Atlanta, Georgia. The VA says the Topeka call center will be located on the VA campus and is expected to open in the fall.

The new center will bring the total number of crisis line responders to 610.

The agency says that since its launch in 2007, the VCL has answered more than 3 million calls. Since launching chat in 2009 and text services in November 2011, the VCL has answered nearly 359,000 and nearly 78,000 requests for chat and text services.

Veterans in crisis can call the Veterans Crisis Line for confidential support 24 hours a day, seven days a week, 365 days a year at 800-273-8255 and Press 1, chat online at VeteransCrisisLine.net/Chat or text to 838255.

For more information or to apply for openings at the new call center, visit www.usajobs.gov/GetJob/ViewDetails/478700400 or www.usajobs.gov and search for announcement No. 10046052.

3.12 - Florida Politics: [VA hospitals to take in nursing home residents, Bill Nelson says](#) (14 September, Scott Powers, 161k online visitors/mo; Saint Petersburg, FL)

The U.S. Department of Veterans Affairs will make beds in VA facilities available to residents of Florida nursing homes that have no power, Sen. Bill Nelson said Thursday.

Nelson said he saw that the VA had done so with refugees from the U.S. Virgin Islands, accepting them into the VA hospital at Puerto Rico, and asked them Wednesday, before news of the horrific six-death incident in Hollywood, if the same could be done in Florida.

"I called the VA secretary [David Shulkin] yesterday," Nelson said. "He said, 'Absolutely!' He said, 'You have my authority to make that happen.'"

Nelson said he's now working with an assistant secretary to get it done.

Nelson said he is not certain how many beds might be available in Florida's VA facilities.

The VA issued a release Thursday saying that Shulkin has been working with both Florida Gov. Rick Scott and Nelson and their staffs on this issue beginning yesterday evening.

"We thank Governor Scott and Senator Nelson for involving VA and are grateful we can help our fellow citizens where we can in this time of need," Shulkin stated in the release. "All Americans are pulling together to help one another, and we must make a special effort for those most vulnerable to the conditions brought on by the storm."

The VA has the ability to make its facilities available to non-veterans as part of its fourth mission, to support national, state and local emergency management, public health, safety and homeland security efforts and also through a mission agreement with FEMA under a Stafford Act Declaration.

Shulkin agreed to make more beds available to non-veteran nursing home residents as needed and free, while ensuring we continue our primary mission of providing healthcare to Veterans, the release stated.

The VA is also working closely with the U.S. Department of Health and Human Services and the Federal Emergency Management Agency on the overall response to Irma, in addition to this specific issue.

3.13 - ideastream.org (Audio): [Cleveland VA Gets National Recognition](#) (13 September, Stephanie Jarvis, 145k online visitors/mo; Cleveland, OH)

As the battle against the opioid epidemic rages on, a local program to manage opioid addiction among some of our region's most at-risk patients is gaining national recognition.

Of all the veteran's hospitals in the country, the Northeast Ohio VA Healthcare System is being recognized for its innovative program to cut down on opioid prescriptions and addiction among the veterans it serves – at a time Ohio sits at the epicenter of the opioid crisis. Thursday, the Secretary of Veterans Affairs, along with New Jersey Governor Chris Christie - who heads up the White House Opioid Task Force, will travel to Cleveland to learn more about the VA's program.

To help us understand how the program is helping our region's veterans steer clear of pain pills -- and how it may be a model for other health systems, ideastream's Kay Colby spoke with Dr. Ali Mchaourab, the head of the pain management program at the Cleveland VA.

[Back to Top](#)

3.14 - ideastream.org (Video/Audio): [President's Opioid Task Force Learns Best Practices from Cleveland VA](#) (14 September, Annie Wu, 145k online visitors/mo; Cleveland, OH)

The U.S. Secretary of Veterans Affairs joined President Trump's opioid task force at the Cleveland VA Medical Center on Thursday. They were in town to hear from VA doctors on their best practices for pain management and opioid use including guidelines for prescribing opioids, alternative medicine for dealing with pain, and a continuum of care for opioid addiction.

Nationally, the VA has been using these practices since 2013. Locally, the VA began even earlier and Secretary of Veterans Affairs Dr. David Shulkin says Cleveland is showing strong results.

"Just 4 percent of the patient population they serve are using and being prescribed opioids, which is well, well below what you would find across the country."

At a roundtable discussion that included President Trump's advisor Kellyanne Conway, the VA shared some of its practices to address pain, including the use of alternative treatments such as acupuncture, yoga and meditation.

"In not all cases must pain management mean pain medicine. There are opioids and there are other modalities. And we saw that first hand here. To read about it is one thing. To intuit as a lay person is quite another. But to see it in practice is quite remarkable and something I will take back to the White House and really never forget."

The opioid task force will issue its report on November first.

The group's chairman—New Jersey Governor Chris Christie says his group is working with the White House to designate the opioid epidemic a national emergency.

"The president is getting advice from his staff and from lawyers on the best way to do that, and I'm confident that in the very near future he will execute the documents that need to be executed for us to be able to do that. But the biggest problem would be is if we did it in a way that was haphazard and less effective and have to go back and redo it."

President Trump said in August he intended to make the national emergency declaration—opening up federal funds to address the problem—but he has yet to do so.

3.15 - KIII (ABC-3, Video): [VA Outpatient Clinic closed due to damage from Harvey](#) (14 September, 65k online visitors/mo; Corpus Christi, TX)

Among the facilities that suffered significant damage in Hurricane Harvey was the Corpus Christi Veteran's Affairs Outpatient Clinic.

The building suffered water damage and beginning Monday, veterans who normally receive primary care services at the clinic will be treated at the Corpus Christi Specialty Outpatient Clinic on Enterprise Parkway or the Patient Aligned Care Team Annex Building, which is near the VA's outpatient clinic.

It is expected to take about 130 days to make repairs to the VA building.

[Back to Top](#)

3.16 - KXXV (ABC-25, Video): [Reminding veterans of local services this Suicide Prevention Week](#) (13 September, Holly Stouffer, 54k online visitors/mo; Waco, TX)

It's Suicide Prevention Week and a local veterans affairs center is making sure the veteran community knows of the resources available to them.

According to the Department of Veterans Affairs, an average of 20 veterans die by suicide each day.

The Waco VA offers a number of resources to help those struggling with their mental health, including its Center of Excellence, which focuses on researching the events that lead up to suicidal thoughts.

"The classic one certainly is a major depressive disorder, but even minor feelings of depression," said Dr. Richard Seim, a clinical psychologist at the Center of Excellence. "PTSD, traumatic brain injury, symptoms of military sexual trauma or even just kind of life issues like marital problems or family functioning issues."

Dr. Seim said this type of research allows them to better serve veterans who could use additional treatment after going through traditional therapy.

"One of the studies we've been running for the last seven years now is tracking veterans as they come back from recent wars in Iraq and Afghanistan and looking at those symptoms of PTSD, traumatic brain injury and so forth to see how they change over time," said Dr. Seim.

Dr. Seim said the Center of Excellence is also about to open a new clinic. It will involve using magnetic waves to stimulate the brain, which will help to alleviate symptoms of depression.

If you know a veteran struggling with depression, call the Veterans Crisis Line at 1-800-273-8255.

[Back to Top](#)

3.17 - WEWS (ABC-5, Video): [White House Opioid Task Force looks for answers to crisis in Cleveland](#) (13 September, Mona Kosar, 17k online visitors/mo; Cleveland, OH)

With the opioid epidemic considered a national emergency, News 5 has learned the answer to this scourge may be here in Cleveland. The president's opioid task force is coming here to look for some answers.

Behind the wall of the Louis Stokes Cleveland VA Medical Center lies a possible solution to a national crisis. “I think the lessons we have learned can be duplicated in the private sector,” said Medical Director Susan Fuehrer.

Those lessons started a decade ago when the center began addressing the over-prescription of addictive opioids with other alternatives such as yoga and physical therapy.

“Rather than just prescribe opioids to manage pain they have been working on evidence based management and alternative therapy,” Fuehrer said.

From 2008 to 2015, the center saw a 50% reduction in the prescription of opioids. Even at the height of the epidemic, the center was recognized for its reduction. “There have been lots of ways that we have been identified as a best practice within the VA health care system,” said Fuehrer.

Their practices haven’t gone unnoticed in Washington either. When it came time for the newly formed white house opioid task force to seek a solution, they pinpointed The Louis Stokes Center.

“They will be meeting with multi disciplinary people and they are going to speak to a veteran or two who have recovered from opioid addiction,” said Fuehrer.

Fuehrer says this is an opportunity for their work to have a national impact.

“If one or two things make a difference for one or two people outside the VA community, then we will call tomorrow a success,” Fuehrer said.

3.18 - Missoula Current: [Tester urges VA to move quicker in opening new Missoula health clinic](#) (14 September, Martin Kidston, 17k online visitors/mo; Missoula, MT)

President Donald Trump signed Sen. Jon Tester’s bill securing a lease for a larger Veterans Affairs clinic in Missoula on the first day of August, marking a positive step for a facility that’s long been in need of expansion.

Now, the state’s senior senator is asking the VA to expedite the process.

Tester this week sent a letter to VA Secretary David Shulkin asking the agency to move the process forward, saying the region’s demand for VA care is projected to increase 43 percent over the next 20 years.

While it traditionally takes the VA as long as five years to open a new clinic once authorization is given, Tester said the Missoula facility is needed sooner rather than later.

“To the greatest extent possible, I urge the department to expedite the process for leasing the recently authorized replacement of the outpatient clinic in Missoula in order to better meet current and future patient demand,” Tester wrote. “I urge the VA to move with all due speed to procure this facility.”

Trump signed Tester's VA Choice and Quality Employment Act in August, which included the leasing authority allowing the VA to secure a larger facility in Missoula.

The authorization will nearly triple the clinic's size, providing additional parking, clinical space and the medical services needed to meet the growing demand for VA care in Missoula, the state's second largest city.

Tester's communications director, Marnee Banks, said the VA was authorized to pursue 28 major medical leases under the latest bill, including one in Missoula. The lease allows for a 60,000-square-foot facility with an estimated rent just under \$2 million a year.

"It will provide primary care, mental health, specialty care and some outpatient surgeries," Banks said. "The VA intends for the clinic to be located in the same general area as the existing clinic."

Banks said it often takes the VA about two years to develop the specific facility requirements once it begins working on the lease. Another year is needed to negotiate with developers prior to issuing a construction award.

That's followed by an additional two years to build the facility.

"The former Deputy (VA) Secretary (Sloan) Gibson had been working to bring this timeline down," Banks said. "The VA will need to obtain a delegation of authority from GSA to award the Missoula clinic lease."

The effort to secure a larger Missoula clinic dates back to at least 2014 when Tester began pushing the VA to expand the facility. Back then, a VA consulting team had toured the small clinic and recommended a modest expansion.

Nearly a year later, the General Services Administration began studying the possibility of converting the vacant Federal Building in downtown Missoula to a new outpatient clinic. That effort was later deemed cost prohibitive, leaving the clinic's future in limbo.

At the same time, the VA fell into controversy, resulting in the resignation of then-VA Secretary Erick Shinkseki, who was replaced by Robert McDonald and later by Shulkin, who now heads the agency under the Trump administration.

The Montana Department of Veterans Affairs and its own health care system has also seen a parade of new leaders, including Christine Gregory, Johnny Ginnity and Kathy Berger, who took the agency's helm in late 2016 and pledged changes to the system.

8.1 - Dayton Daily News: [Lawmakers pushing for Columbus to get national veterans museum \(14 September, Jessica Wehrman, 1.1M online visitors/mo; Dayton, OH\)](#)

WASHINGTON - To hear Reps. Joyce Beatty and Steve Stivers tell it, Columbus is an ideal place to host the National Veterans Memorial and Museum.

The state, they said hosts the 6th largest veterans population in the U.S. If that's not enough, it's within an eight-hour car ride of almost half of the nation's veterans.

Speaking before a House panel Wednesday, Stivers and Beatty argued that a memorial to the nation's veterans was long overdue — and that Columbus was all too happy to change that. The site, argued Stivers, “will serve as a civic landmark to honor, inspire and educate all Americans about the service and sacrifice of more than 22 million veterans in this country.”

Under construction and scheduled to open next summer, the site started as a replacement for Columbus' previous veterans memorial and then blossomed into something far more sweeping and ambitious, said Stivers. Now, he, Beatty and Rep. Pat Tiberi, R-Genoa Township are pushing a bill that would designate it a national museum.

It wouldn't be the state's only museum honoring the armed services or those who have served: Roughly an hour's drive away, Dayton hosts the National Museum of the United States Air Force.

During a hearing on the bill Wednesday, Matthew Sullivan, deputy undersecretary for finance and planning and CFO for the National Cemetery Administration for the Department of Veterans Affairs, said the department neither supported nor opposed locating the museum in Columbus. “VA respectfully expresses no view on the proposed bill, which does not apply to VA or to VA's core mission,” he testified.

But Alex Zhang, assistant director of National Veterans Affairs and Rehabilitation for the American Legion, said his organization backs the bill. He said the bill would “represent American veterans with profound respect, connecting them with the civilian population, possibly inspiring others to serve and most importantly, educating youth about what these fine men and women have done for America.”

The organization, he said, “wholeheartedly supports” the “beautiful, thoughtful” memorial's designation, he said.

Veterans of Foreign Wars also backed the legislation, with John Towles, deputy director of national legislative service for the organization, telling the House Veterans Affairs Committee's subcommittee on Disability Assistance and Memorial Affairs "our country currently lacks a museum specifically dedicated to honoring and preserving the collective sacrifices made by this nation's veterans."

"This museum would serve to fill that gap," he said.

Groundbreaking for the 50,000 square foot museum and memorial began in 2015, and more than \$75 million was raised for design and construction. It's located at 300 West Broad St. in Columbus, site of the former Franklin County Veterans Memorial.

The entire Ohio congressional delegation is cosponsoring the bill, and Stivers said he hopes to tuck it into a larger legislative package in the months ahead. Sens. Sherrod Brown, D-Ohio, and Rob Portman, R-Ohio, are working on a similar measure in the Senate.

Beatty said the museum was in part the brainchild of former Ohio Sen. John Glenn, who died last year.

"If he were here today, he would highlight this museum and memorial," she said. "He would talk about the 300 foot reflecting pool. He would talk about the memorial wall. He would talk about the sanctuary where veterans families and others could go.

"It's a tremendous idea," she told the panel. "And we ask for your support."

Veterans Affairs Media Summary and News Clips

4 October 2017

[1. Top Stories](#)

1.1 - The Washington Post (AP): [VA watchdog reviewing Shulkin's 10-day trip to Europe](#)

(3 October, Hope Yen, 43.9M online visitors/mo; Washington, DC)

The Veterans Affairs Department's watchdog said Tuesday it is reviewing Secretary David Shulkin's 10-day trip to Europe with his wife that mixed business meetings with sightseeing. Shulkin disclosed last week he traveled to Denmark and England to discuss veterans' health issues. Travel records released by VA show four days of the trip were spent on personal activities, including attending a Wimbledon tennis match and a cruise on the Thames River.

1.3 - CNN (Video): [VA Secretary David Shulkin under review for work trip to Europe](#)

(3 October, Miranda Green, Rene March, and Gregory Wallace, 29.7M online visitors/mo; Atlanta, GA)

The VA's inspector general is reviewing Veterans Affairs Secretary David Shulkin's July business trip to London and Denmark, which included meetings with Danish and UK officials as well as a stop at Wimbledon. It's now the fifth investigation into a member of the Trump administration's travel by a department inspector general.

[Hyperlink to Above](#)

1.4 - CBS News: [Veterans Affairs inspector general is reviewing David Shulkin's Europe trip](#)

(3 October, Jacqueline Alemany, 26.1M online visitors/mo; New York, NY)

The Department of Veterans Affairs inspector general is reviewing Secretary David Shulkin's 10-day taxpayer-funded trip to Europe in July, during which Shulkin and his wife spent time shopping and sightseeing in Denmark and the U.K. A spokesman for the VA's Office of Inspector General told CBS News on Tuesday that it is "gathering information and reviewing the recent trip."

[Hyperlink to Above](#)

1.5 - Military Times: [VA names Elizabeth Dole to head caregivers advisory group](#)

(3 October, Leo Shane III, 2.1M online visitors/mo; Springfield, VA)

Veterans Affairs officials on Monday announced former North Carolina Sen. Elizabeth Dole will chair the department's new family and caregiver advisory committee, formed in response to problems with support programs earlier this year. The committee, which features a mix of veterans and military caregivers, is charged with advocating for improvements to VA care and benefits services. In a statement, Dole called the work "critical" for the veterans community.

[Hyperlink to Above](#)

1.6 - KARE (NBC-11, Video): [VA apologizes to Vietnam vet for ER denial - The Department Of Veterans Affairs has apologized to a Vietnam veteran for repeatedly denying his claim for medical care after KARE 11 reported his story as part of its continuing investigation – a pattern of denial.](#) (3 October, A.J. Lagoe and Steven Eckert, 1.5M online visitors/mo; Golden Valley, MN)

Rocky's story of wrongful denial began this past July when he needed emergency surgery to remove a large kidney stone. "The pain just got to be excruciating," Rocky said. "So, I called VA nurses hotline and asked them what I should do, and they said to go to the nearest facility which was St. John's Hospital in Maplewood."

What is the mission of VA's Office of Community Care? How is VA enhancing how it provides Community Care? What can VA do better? Join host Michael Keegan as he explores these questions & more with Baligh Yehia, Deputy Under Secretary for Health for Community Care at the US Department of Veterans Affairs.

[Hyperlink to Above](#)

[2. Veteran and Employee Experience](#)

2.1 - The Hill: [VA chief under investigation over European trip: report](#) (3 October, Jacqueline Thomsen, 11.8M online visitors/mo; Washington, DC)

The Department of Veteran Affairs inspector general is investigating Veteran Affairs Secretary David Shulkin over his trip to Europe, CNN reported Tuesday. Shulkin traveled to London and Denmark in July, where he met with officials from both countries. Michael Nacincik, spokesman for the VA inspector general's office, told CNN that he couldn't say what triggered the probe or if the office was investigating any other instances of Shulkin's travel.

[Hyperlink to Above](#)

2.2 - Fortune: [Trump's VA Secretary Is the Fourth Cabinet Member to be Caught in a Travel Expense Scandal](#) (3 October, John Patrick Pullen, 7.7M online visitors/mo; New York, NY)

Overshadowed by Health and Human Services Secretary Tom Price's resignation Friday afternoon, Veterans Affairs chief David Shulkin is the latest Trump cabinet member to be found mixing personal trips and expenses with government travel. The VA secretary cruised the Thames, took in sight-seeing at Westminster Abbey, and watched a Wimbledon tennis match during a 10-day European trip with his wife, according to an itinerary obtained by The Washington Post.

[Hyperlink to Above](#)

2.3 - Washington Examiner: [VA watchdog launches probe of David Shulkin's 10-day European trip](#) (3 October, Gabby Morrongiello, 4.8M online visitors/mo; Washington, DC)

The Department of Veterans Affairs' internal watchdog has launched an investigation into a 10-day, taxpayer-funded trip taken by Secretary David Shulkin and his wife earlier this summer. Shulkin came under fire last week for the July vacation to Denmark and the U.K., during which he and his wife attended a Wimbledon tennis match, and went shopping and sightseeing.

[Hyperlink to Above](#)

2.4 - WXIN (FOX-59, Video): [Veterans voice concerns, outline legislative agenda items at town hall](#) (3 October, Haley Bull, 1.5M online visitors/mo; Indianapolis, IN)

Veterans are making sure their voices are heard by state lawmakers and local government officials during a series of town hall meetings across the state. Tuesday, veterans at a meeting in Carmel raised their concerns and outlined their legislative agenda items for the upcoming legislative session. "It's really important for the legislators to hear our concerns we have many healthcare being right at the top of the list..."

[Hyperlink to Above](#)

2.5 - Fayetteville Observer: [NC congressmen, VA leaders meet in Washington](#) (3 October, Drew Brooks, 439k online visitors/mo; Fayetteville, NC)

Congress members from North Carolina met with Veterans Affairs leaders in Washington on Tuesday, hoping for better communication on problems in the VA system. Eight House members met with top officials from the VA's Mid-Atlantic Health Care Network, also known as Veterans Integrated Service Network 6, and the leaders from at least three VA medical centers, including Fayetteville's.

[Hyperlink to Above](#)

2.6 - Michigan Radio Network: [Ann Arbor VA Hospital employees and vets protest staffing shortage](#) (3 October, Tracy Samilton, 385k online visitors/mo; Ann Arbor, MI)

Ann Arbor VA Hospital employees rallied Tuesday to ask Congress for enough money to eliminate the 49,000 VA job vacancies nationwide. Similar rallies have been held at other VA hospitals nationally in recent weeks. Ozzie James, Jr. is president of American Federation of Government Employees Local 2092. He says veterans need the expertise of VA doctors, nurses and other staff, because outside health care professionals don't fully understand veterans' needs.

1.1 - The Washington Post (AP): [VA watchdog reviewing Shulkin's 10-day trip to Europe](#) (3 October, Hope Yen, 43.9M online visitors/mo; Washington, DC)

WASHINGTON — The Veterans Affairs Department's watchdog said Tuesday it is reviewing Secretary David Shulkin's 10-day trip to Europe with his wife that mixed business meetings with sightseeing.

Shulkin disclosed last week he traveled to Denmark and England to discuss veterans' health issues. Travel records released by VA show four days of the trip were spent on personal activities, including attending a Wimbledon tennis match and a cruise on the Thames River. The VA said Shulkin traveled on a commercial airline, and that his wife's airfare and meals were paid for by the government as part of "temporary duty" expenses.

A spokesman for VA inspector general Michael Missal described the review as "preliminary."

Shulkin is one of several Cabinet members who have faced questions about travel after Tom Price resigned as health chief.

Curt Cashour, a VA spokesman, said the travel activities had been approved as part of an ethics review.

"The secretary welcomes the IG looking into his travel, and a good place to start would be VA's website where VA posted his full foreign travel itineraries, along with any travel on government or private aircraft," Cashour said.

The site lists Shulkin's travel itineraries but does not detail costs to the government.

1.2 - FOX News: [Hurricane Maria: VA in Puerto Rico still trying to reach more than 500 homebound vets](#) (3 October, Tori Richards, 32.5M online visitors/mo; New York, NY)

Nearly two weeks after Hurricane Maria roared through Puerto Rico, destroying much of the island's infrastructure, more than 500 homebound at-risk veterans still haven't been reached by doctors, nurses and social workers, Fox News has learned.

There are 1,687 homebound vets in Puerto Rico who require ongoing treatment such as dialysis, chemotherapy and insulin to survive. Since Maria struck Sept. 20, the San Juan VA Medical Center has dispatched special teams consisting of a doctor, nurse and social worker to visit the homes of each one of these vets.

It has been a tough task. Most of the island still lacks power because of damage to the electric grid and intermittent phone service because of downed lines and cell towers. Many rural areas have been rendered inaccessible by damage to roads and the scarcity of gasoline for vehicles.

As of Tuesday, VA officials said visits have taken place at the homes of 1,147 homebound vets. That leaves 540 more to be seen. The VA is vowing to reach the rest but isn't sure how long it will take.

"The safety of all our patients is a top priority," VA spokesperson Mary Kay Rutan told Fox News Tuesday. "We have been going out in the communities where it is safe to do so. Additionally, we are engaged with local shelter operations and other agencies to assist in helping us locate veterans."

One of the visits resulted in a homebound vet who needed more treatment being transported by military helicopter to the San Juan VA, Rutan said.

Another visit brought more insulin to 75-year-old Vietnam vet Miguel Olivera in the hard-hit mountain town of Aguas Buenas, north of San Juan. The Veterans of Foreign Wars in Washington had asked the VA to check on Olivera after learning that he was in danger of losing his last vial of insulin because he had no electricity to keep it refrigerated.

"I'm just happy to hear one veteran is being taken care of," VFW spokesman Joe Davis told Fox News. "I wish there was more that all of us could do for Puerto Rico, it's just terrible down there."

VA whistleblower Joseph Colon, a credentialing official at the San Juan VA Medical Center, said more needed to be done for the island's homebound vets.

"If you are truly in the business of caring for veterans it should not take two weeks to check on all high-risk patients," Colon told Fox News.

Colon also complained that the majority of staff at the San Juan VA had to be sent home last week because the hospital was running out of food, water and diesel fuel for generators.

He also accused hospital leaders of not having a contingency plan to deal with the storm and said the hospital's acting director, Dr. Antonio Sanchez, wasn't around when Maria struck.

"If you know you are going to have problems with water and possibly the electrical grid, why wouldn't you stock up on supplies?" he said. "There is a big new concrete garage next door, they could've put it in there."

As of Monday, the hospital was back at full strength, according to officials.

Rutan defended the hospital's plans for dealing with Maria and the previous one that passed through, Hurricane Irma.

"The San Juan VA Medical Center has comprehensive and well-tested emergency management and operations plans where they have successfully managed numerous hurricanes and other events, including most recently Hurricane Irma," she said.

Rutan also said that Sanchez was at a VA meeting in the U.S. the day of the hurricane and returned as fast as he could three days later.

"He was on the very first available flight to the island on Saturday after the storm," Rutan said. "In his absence, the deputy medical center director and the full incident management team

conducted necessary operations ensuring the safety of more than 300 patients and 800 staff during the height of the storm.”

But Colon said he still questioned why Sanchez wouldn't skip the meeting knowing that a Category 4 storm was bearing down on Puerto Rico.

“He had plenty of time to get back here – was that conference so important?” he said.

[Back to Top](#)

1.3 - CNN (Video): [VA Secretary David Shulkin under review for work trip to Europe](#) (3 October, Miranda Green, Rene March, and Gregory Wallace, 29.7M online visitors/mo; Atlanta, GA)

Washington (CNN) - The VA's inspector general is reviewing Veterans Affairs Secretary David Shulkin's July business trip to London and Denmark, which included meetings with Danish and UK officials as well as a stop at Wimbledon.

It's now the fifth investigation into a member of the Trump administration's travel by a department inspector general.

Shulkin joins Environmental Protection Agency Administrator Scott Pruitt, Interior Secretary Ryan Zinke, Treasury Secretary Steven Mnuchin and recently resigned Health and Human Services Secretary Tom Price under scrutiny for the use of private planes, first class travel, military air or flights for possible personal reasons.

Michael Nacincik, spokesman for the VA inspector general's office, told CNN he could not specify who requested the investigation, nor whether the inspector general's office was investigating any other travel by the secretary.

News of Shulkin's July trip abroad, which included a Thames River cruise, was first reported by The Washington Post last week.

Following the report, the Veterans Affairs department posted the trip itinerary online, which showed that Shulkin traveled with his wife and three members of the department, one of whom also brought a spouse. The US government paid for the travel expenses and a per diem for Shulkin's wife, Merle Bari, the Post reported.

Last Friday, HHS Secretary Price resigned after coming under fire for his use of chartered planes for business purposes. Price's departure came as he's being investigated by the department's inspector general for using private jets for multiple government business trips, even to fly distances often as short as from Washington to Philadelphia. The total cost for the trips ran into the hundreds of thousands of dollars.

Interior's Zinke is also being investigated over his travel.

In a statement he gave before giving his policy speech at the Heritage Foundation Friday, Zinke confirmed that he's used private jet travel on three occasions and has flown military aircraft at other times as well.

"Using tax dollars wisely and ethically is a greatest responsibility and is at the heart of good government," he said. "Unfortunately there are some times when Interior has to utilize charter services because we often travel to areas that don't have a lot of flight options."

He called the recent criticism about his use of private jets "a little BS."

CNN's Kevin Liptak contributed to this report.

[Back to Top](#)

1.4 - CBS News: [Veterans Affairs inspector general is reviewing David Shulkin's Europe trip](#) (3 October, Jacqueline Alemany, 26.1M online visitors/mo; New York, NY)

The Department of Veterans Affairs inspector general is reviewing Secretary David Shulkin's 10-day taxpayer-funded trip to Europe in July, during which Shulkin and his wife spent time shopping and sightseeing in Denmark and the U.K.

A spokesman for the VA's Office of Inspector General told CBS News on Tuesday that it is "gathering information and reviewing the recent trip."

Details of the trip, which included visits to Westminster Abbey and Wimbledon, were first reported by The Washington Post. While the trip to Denmark and the United Kingdom was focused on veterans issues, Shulkin and his wife also devoted significant time to leisure activities paid for by U.S. government dollars.

Shulkin joins the list of cabinet members under investigation for travel. Tom Price resigned as Secretary of Human and Health Services last week after coming under fire for extensive use of expensive private jets footed by taxpayers. EPA Administrator Scott Pruitt, Treasury Secretary Steven Mnuchin and Interior Secretary Ryan Zinke are also currently under investigation by their respective agency's inspector generals for travel spending.

Shulkin announced in a statement last week that the VA would be posting all official travel taken since January 20th on the VA website.

"Under this administration, VA is committed to becoming the most transparent organization in government, and I'm pleased to take another step in that direction with this move," Shulkin said in a statement. "Veterans and taxpayers have a right to know about my official travel as secretary, and posting this information online for all to see will do just that."

The itinerary uploaded to the website details conferences on veterans policy and meetings with various government officials but also time carved out of his schedule for extracurricular activities. In London, Shulkin and his wife Dr. Merle Bari attended Wimbledon and visited Buckingham Palace and Westminster Abbey. They also took a cruise down the Thames River followed by "dinner/ evening in Piccadilly Circus" and spent their first day in Denmark visiting various castles throughout Copenhagen.

The website also notes that Shulkin has not utilized private aircraft to date. Curt Cashour, VA Press Secretary told CBS News in a statement, "The Secretary welcomes the IG looking into his

travel, and a good place to start would be VA's website where the VA posted his full foreign travel itineraries, along with any travel on government or private aircraft."

"As the posted information shows, the Secretary has taken no trips on private aircraft," Cashour continued, "and the only government aircraft trips he has taken has been as a guest on the planes of the President, Vice President, or First Lady."

[Back to Top](#)

1.5 - Military Times: [VA names Elizabeth Dole to head caregivers advisory group](#) (3 October, Leo Shane III, 2.1M online visitors/mo; Springfield, VA)

WASHINGTON — Veterans Affairs officials on Monday announced former North Carolina Sen. Elizabeth Dole will chair the department's new family and caregiver advisory committee, formed in response to problems with support programs earlier this year.

The committee, which features a mix of veterans and military caregivers, is charged with advocating for improvements to VA care and benefits services. In a statement, Dole called the work "critical" for the veterans community.

"Military families, caregivers, and survivors are truly our nation's hidden heroes, and make great sacrifices each and every day on behalf of their loved ones, so we must do more to support them on their journey," she said.

Last spring, VA conducted a nine-week review of the department's caregiver program after an NPR report revealed dozens of regional medical centers were cutting back on the number of families receiving caregiver benefits, possibly against program rules.

More than 20,000 individuals are currently enrolled in the department's caregivers stipend program, which awards payouts of several thousand dollars a month to family members of severely injured post-9/11 veterans providing full-time caregiving duties.

In July, VA officials ended the review promising better communication and outreach to families involved. Shulkin has also publicly discussed the possibility of extending the caregiver stipend to veterans of other war generations, but doing so will likely require congressional action.

In a statement Monday, Shulkin said his department "is committed to the delivery of highest quality care and support to our veterans, and recognizes the essential role their families, caregivers, and survivors have every day."

Dole, herself a caregiver to husband Bob Dole, the former U.S. Senate majority leader and a veteran injured in World War II, has been an advocate for military and veteran caregivers in recent years through the Elizabeth Dole Foundation.

Sherman Gillums, executive director at Paralyzed Veterans of America, will serve as vice chair of the committee. The group also includes Lolita Zinke, wife of Interior Secretary Ryan Zinke, who served as a Navy SEAL.

[Back to Top](#)

1.6 - KARE (NBC-11, Video): [VA apologizes to Vietnam vet for ER denial - The Department Of Veterans Affairs has apologized to a Vietnam veteran for repeatedly denying his claim for medical care after KARE 11 reported his story as part of its continuing investigation – a pattern of denial.](#) (3 October, A.J. Lagoe and Steven Eckert, 1.5M online visitors/mo; Golden Valley, MN)

LITTLE CANADA, Minn. - Rockne “Rocky” Waite of Little Canada, Minnesota sat in his living room on September 26th watching his television in disbelief.

“It was like watching my own story,” the 71-year-old former Army Medic recalled.

He was watching a KARE 11 investigative report exposing how veterans are being saddled with medical debt they should not owe – some of it even turned over to collection agencies – after trips to the emergency room.

“It was exactly what happened to me!” Rocky said.

Rocky’s story of wrongful denial began this past July when he needed emergency surgery to remove a large kidney stone.

“The pain just got to be excruciating,” Rocky said. “So, I called VA nurses hotline and asked them what I should do, and they said to go to the nearest facility which was St. John’s Hospital in Maplewood.”

Following his emergency operation in the private hospital, the surgeon told Rocky a stent had been inserted and he needed to get it removed in 10 days.

Following VA protocol, Rocky again called the nurses hotline at the Minneapolis VA to ask if he should go back to the private hospital where he had the surgery, or if he should come into the VA for the procedure?

His VA medical file shows Rocky spoke with a registered nurse who, after consulting with his regular VA physician, instructed him to go back to St. John’s to have the stent removed.

“I took their advice, went, had the procedure done,” Rocky said.

Despite doing exactly what the VA instructed, Rocky received a denial letter in the mail. The VA was refusing to pay for the stent removal, leaving the 100% service connected disabled veteran with the \$1,200 bill.

“What more could I have done?” Rocky asked while throwing his hands in the air. “I did as I was told, I don’t know how else you could do it!”

Rocky’s is not an isolated case.

Current and former VA staffers tell KARE 11 that medical claim processors at the VA are pressured to review complicated files in just minutes.

To meet performance goals, they say it's quicker to deny claims than to take the additional steps needed to approve payments.

"We are accountable for speed," one VA insider told KARE 11 in an exclusive interview. "We were told to pick-n-click and get them moving."

When he appealed his bill rejection, Rocky said he quickly received another denial letter.

Fast forward a few weeks and the frustrated veteran watched as KARE 11's investigation aired.

Rocky emailed his denial records to KARE 11. Investigative Reporter A.J. Lagoe told about Rocky's case during a follow-up broadcast and emailed the Department of Veterans Affairs asking what the veteran, who appeared to have followed all the rules, should have done differently?

VA Press Secretary Curt Cashour responded, "While strict rules and federal law govern when VA can pay for emergency care, we always want to work with veterans on their particular claim(s) to see what VA can do in their case. We will do that in this case."

The next day, Rocky received a voicemail from a VA official apologizing for the hassle he'd been through and stating, "So we'll get that paid for you, probably today."

"What bothers me about this is it is not just one incident," Senator Amy Klobuchar (D-MN) said.

Klobuchar says her office has received a number of similar constituent complaints.

"There are many incidents and usually when a member of Congress starts getting called over and over again it's like the canary in the coal mine. It means there is one, and then there's 10, and then there's 20. It means there's probably thousands across the country, and this means they are having a rule problem, a protocol problem, that has to be fixed!"

The Senator said she would be speaking directly to VA Secretary David J. Shulkin this week about the ER denials uncovered in the KARE 11 investigation.

KARE 11 analyzed two and a half years of VA data and found in the VA MidWest Network, which includes Minnesota, 52% of all ER claims were denied.

As a result, \$65,772,205 in medical bills were forced back onto veterans to pay.

There is no way to determine how many of those veterans got stuck with bills – like Rocky – because of improper VA denials.

"If it hadn't been for KARE 11, I would still have been fighting this battle," Rocky said. "And it could go on for years with these people."

2.1 - The Hill: [VA chief under investigation over European trip: report](#) (3 October, Jacqueline Thomsen, 11.8M online visitors/mo; Washington, DC)

The Department of Veteran Affairs inspector general is investigating Veteran Affairs Secretary David Shulkin over his trip to Europe, CNN reported Tuesday.

Shulkin traveled to London and Demark in July, where he met with officials from both counties.

Michael Nacincik, spokesman for the VA inspector general's office, told CNN that he couldn't say what triggered the probe or if the office was investigating any other instances of Shulkin's travel.

The Washington Post first reported last week that Shulkin spent half of the trip sightseeing and shopping with his wife.

The VA chief was there to attend a conference in London on veterans' health issues and then held a series of meetings in Denmark.

Shulkin reportedly attended a Wimbledon tennis tournament match, toured multiple palaces in London and Denmark and took a cruise on the River Thames in London while on the trip.

The VA head took commercial flights for the trip and reportedly sat in coach on at least one of them, The Post reported.

The investigation into Shulkin is the fifth inspector-general investigation into a member of the Trump administration.

Environmental Protection Agency Administrator Scott Pruitt, Interior Secretary Ryan Zinke, Treasury Secretary Steven Mnuchin and former Heath Secretary Tom Price were each probed over their use of private, military or chartered planes.

Price resigned last week over his use of private jets.

2.2 - Fortune: [Trump's VA Secretary Is the Fourth Cabinet Member to be Caught in a Travel Expense Scandal](#) (3 October, John Patrick Pullen, 7.7M online visitors/mo; New York, NY)

Overshadowed by Health and Human Services Secretary Tom Price's resignation Friday afternoon, Veterans Affairs chief David Shulkin is the latest Trump cabinet member to be found mixing personal trips and expenses with government travel. The VA secretary cruised the Thames, took in sight-seeing at Westminster Abbey, and watched a Wimbledon tennis match during a 10-day European trip with his wife, according to an itinerary obtained by The Washington Post.

The VA secretary's 10-day trip—which also included the department's undersecretary and her husband, Shulkin's chief of staff, an aide, and six security people—was approximately half business, half pleasure, the itinerary reportedly details. The government paid for Shulkin's wife airfare and provided a per diem for her meals because she was traveling on “approved invitational orders,” reports the Post.

The Shulkins' July trip was revealed as the personal travel and government expenses of other cabinet officials have also come under scrutiny. In his first three months in office, Environmental Protection Agency chief Scott Pruitt reportedly travelled home to Oklahoma at least 10 times, according to records acquired by a watchdog group. In addition, the EPA is building a \$25,000 soundproof booth for Pruitt, the first agency head to have an around-the-clock security detail.

In August, U.S. Treasury Secretary Steve Mnuchin and his wife reportedly used a government plane to travel to Lexington, Ky. to watch the solar eclipse, a trip that came to light after Mnuchin's wife, Louise Linton boasted on Instagram about traveling with her husband on a government plane. Mnuchin has denied that he took the trip to view the eclipse. He has also said claims about him requesting the use of a government jet during his honeymoon with Linton earlier this year were about national security.

HHS secretary Price's spending has been the most audacious of the cabinet so far. The former Georgia congressman may have taken more than \$1 million in chartered, private jets, according to reporting by the Post. The revelation ultimately led to his resignation on Friday.

As for Shulkin, the VA Secretary is likely hoping Price's exit helps his own spending to fly under the radar. One of few Obama administration holdovers, Shulkin was most recently the VA's undersecretary before being promoted by President Trump. Considering his previous boss and

the current president's unfavorable views of how the VA has been run, Shulkin may now be on thin ice—if he wasn't already.

2.3 - Washington Examiner: [VA watchdog launches probe of David Shulkin's 10-day European trip](#) (3 October, Gabby Morrongiello, 4.8M online visitors/mo; Washington, DC)

The Department of Veterans Affairs' internal watchdog has launched an investigation into a 10-day, taxpayer-funded trip taken by Secretary David Shulkin and his wife earlier this summer.

Shulkin came under fire last week for the July vacation to Denmark and the U.K., during which he and his wife attended a Wimbledon tennis match, and went shopping and sightseeing.

Though a conference on veterans policy and meetings with foreign officials were included in the trip, much of the secretary's time was spent touring castles in Copenhagen and enjoying a cruise with his wife.

Michael Nacincik, a spokesperson for the VA's Inspector General, told the Washington Examiner on Tuesday the internal watchdog is "gathering information and reviewing the secretary's recent trip." CBS News first reported the investigation.

Nacincik could not say how long the investigation is estimated to take or when it began.

"It really depends on what they find or what they don't find," he said.

Shulkin denied any wrongdoing in a statement last week, and announced that he would make the itinerary from his trip for the public.

"Veterans and taxpayers have a right to know about my official travel as secretary, and posting this information online for all to see will do just that," he said.

"The secretary welcomes the IG looking into his travel, and a good place to start would be VA's website where the VA posted his full foreign travel itineraries, along with any travel on a government or private aircraft," VA press secretary Curt Cashour later told CBS.

News of the IG investigation comes days after Health and Human Services Secretary Tom Price was fired for chartering several private flights on the taxpayer dime.

The Interior Department's internal watchdog also launched an investigation this week into Secretary Zinke's travel, bring the total number of Cabinet officials under investigation by their own agencies to four, including Treasury Secretary Steve Mnuchin and EPA administrator Scott Pruitt.

2.4 - WXIN (FOX-59, Video): [Veterans voice concerns, outline legislative agenda items at town hall](#) (3 October, Haley Bull, 1.5M online visitors/mo; Indianapolis, IN)

CARMEL, Ind. – Veterans are making sure their voices are heard by state lawmakers and local government officials during a series of town hall meetings across the state.

Tuesday, veterans at a meeting in Carmel raised their concerns and outlined their legislative agenda items for the upcoming legislative session.

"It's really important for the legislators to hear our concerns we have many healthcare being right at the top of the list, also treatment of PTSD as our returning veterans from the global war on terror suicide rates among veterans are at an all-time high," said Steven McDaniel, commander of VFW Post 10003.

Some of the issues veterans raised include support for medical marijuana and ways to help veterans find employment.

But before the town hall, a group of Indiana veterans groups called the Big Four, including the VFW, AMVETS, Disabled American Veterans and the American legion, met to approve a list of their legislative agenda items for the next session.

"We've come a long way veterans contribute a lot to the state of Indiana we're not asking for a handout," said Richard Leirer, the commander for dist. 6 of the VFW in Indiana and legislative chairman.

"We want to make sure we clean up some legislation that was passed this last year in the budget bill with some wording to extend the program for our homeless veterans and for our hyperbaric oxygen therapy treatment for traumatic brain injury," said Lisa Wilken, the legislative director for Indiana AMVETS.

Wilken said they also want to make another run at a bill creating a lottery scratch off ticket to help fund veterans' programs.

"We think we have the support now to get it passed this year," Leirer said.

The next town hall will be held Oct. 17 in Indianapolis.

[Back to Top](#)

2.5 - Fayetteville Observer: [NC congressmen, VA leaders meet in Washington](#) (3 October, Drew Brooks, 439k online visitors/mo; Fayetteville, NC)

Congress members from North Carolina met with Veterans Affairs leaders in Washington on Tuesday, hoping for better communication on problems in the VA system.

Eight House members met with top officials from the VA's Mid-Atlantic Health Care Network, also known as Veterans Integrated Service Network 6, and the leaders from at least three VA medical centers, including Fayetteville's.

The meeting was an introduction of sorts for DeAnne Seekins, who became director of VISN 6 in July. The network includes seven VA medical centers, 27 community-based outpatient clinics and four health care centers, and it is the fastest-growing region within the VA.

Republican Rep. Richard Hudson, whose district includes parts of Fayetteville, said he was impressed by Seekins and other VA leaders.

The discussion was “very candid, very open,” and addressed concerns about delays in VA care, problems within the VA Choice Program and late payments to vendors working with the VA, Hudson said.

“Hopefully it’s the beginning of better communication,” said Hudson, who helped organize the meeting.

Seekins was appointed director of VISN 6 after leading the Durham VA Health Care System for five years. Directors of VA medical centers in Asheville and Durham also attended the meeting.

Fayetteville has the fastest growing patient population in the VA, Hudson said, and it was important for VA leaders and Congress to be on the same page to help address issues that arise with that growth.

“I take very seriously my responsibilities as a voice for veterans in North Carolina,” he said. “I wanted to open better lines of communications.”

The meeting was co-chaired by Democratic Rep. David Price. It included Republican Reps. Robert Pittenger, Virginia Foxx, David Rouzer, Walter Jones and Mark Meadows, and Democratic Rep. Alma Adams.

In the past, members of Congress have had to “start at the bottom and work up” when it comes to VA issues, Hudson said. After the meeting, he hopes there will be a direct line of dialogue at the highest levels of the local VA network.

He said he would like VA leaders to notify the congressional delegation of potential issues or when problems arise. The delegation can be more proactive in helping the VA fix issues that continue to plague the system.

“We both have the same mission — taking care of our veterans,” he said.

VISN 6 officials said the meeting was important to Seekins, who wants to develop relationships with the delegation and learn their concerns.

A spokesman, Stephen Wilkins, said the meeting was not meant to address specific issues, but instead more of a meet and greet.

But Hudson said the delegation was able to ask questions, paying particular attention to access to VA care, the opioid epidemic among veterans, and the Choice program that allows some veterans to seek care outside the VA system.

Several representatives also brought up VA payments. They said veterans are being harassed by collection agencies because the VA is not paying its bills.

Hudson said that while he praises the network's efforts to cut down on wait times, he is lobbying for an expanded Choice program that gives more veterans the ability to go outside the VA.

The Fayetteville VA previously had one of the nation's longest waits for veteran care. In recent months, officials have said those numbers have drastically improved.

"I think we're making progress, but I personally would like to see veterans having more access to private care as an alternative," Hudson said.

Hudson has introduced legislation that would allow any veteran who is at least 50 percent disabled to see whatever doctor they would like.

"I'm just not convinced we can build enough VA facilities to keep up with the growth," Hudson said.

He said that expanded Choice would never destroy the VA. But giving veterans the ability to "vote with their feet" may force the VA to improve its practices.

"Competition will make the VA better," he said. "They care about our veterans but they work within a system that is just strangled with bureaucracy."

The congressional delegation last met with VA leaders earlier this year, after a VA audit found that the network underreported the length of wait times for new patients, and that those seeking care outside of the Department of Veterans Affairs often had long waits or were unable to receive care.

Hudson said the delegation wants to meet regularly with VA leaders.

"I think we all agreed we'd like to have something," he said. He urged veterans in North Carolina who have problems with the VA to contact their Congress representative.

"We'll be their advocate," he said.

[Back to Top](#)

2.6 - Michigan Radio Network: [Ann Arbor VA Hospital employees and vets protest staffing shortage](#) (3 October, Tracy Samilton, 385k online visitors/mo; Ann Arbor, MI)

Ann Arbor VA Hospital employees rallied Tuesday to ask Congress for enough money to eliminate the 49,000 VA job vacancies nationwide. Similar rallies have been held at other VA hospitals nationally in recent weeks.

Ozzie James, Jr. is president of American Federation of Government Employees Local 2092. He says veterans need the expertise of VA doctors, nurses and other staff, because outside health care professionals don't fully understand veterans' needs.

"The promise to take care of the veterans who go fight the war, you're not keeping that promise," says James. "Because you fail to have the staffing that's needed to take care of the veteran when he or she comes home. It's a disgrace to us."

James says the shortage is particularly acute for VA nurses; many cannot take the vacations to which they're entitled because there is no one to fill in for them.

He says the staffing problem predates the Trump administration but has gotten worse under it.

Darcy Guyton-Hanna is a dental hygienist at the Ann Arbor VA. She says the staffing shortage means some veterans have to wait a year for a comprehensive dental exam.

"We are short two dental assistants and one administrative assistant, so they have a lot of the dentists doing paperwork and administrative jobs instead of seeing patients," says Guyton-Hanna.

She says administrators told her there is a hiring freeze so nothing can be done about the situation.

But according to recent comments by VA Secretary David Shulkin, the prospect for more federal money for the VA to boost hiring seems dim. At a press conference in late May, he said, "the problems in VA are not largely going to be solved through additional money. These are going to be solved through management practices, focus, and some legislation changes."

Shulkin said the VA will have a position management system in place by December, so it can track which jobs are open. And the agency plans to expand graduate medical education training opportunities to be able to train more health professionals to stay in the VA system.

He said the VA also plans to work with the Unified Services University -- the medical school of the military -- to train more medical students who then would serve in the VA for 10 years after their education.

2.7 - Outer Banks Sentinel: [VETERANS POST Will bad employees still linger at VA?](#) (4 October, 23k online visitors/mo; Nags Head, NC)

The Department of Veterans Affairs' new authority to get rid of bad employees is getting a test in Memphis.

An employee at the Memphis VA Medical Center was arrested for aggravated assault with a deadly weapon and criminal impersonation of a police officer. Specifically, she pulled a revolver on a grandmother and a toddler, waving the gun and saying she was the police.

According to the VA, the employee was being processed for removal and has been suspended. What, exactly, does that mean. Taking steps to terminate the employee? Barred from the facility? Told to stay home with pay?

Inquiring minds want to know: Will the Merit Systems Protection Board jump in on this one, too? Long ago the VA tried twice to remove an employee because the hospital kept running out of crucial surgical inventory. The Office of the Inspector General got involved and came up with yet one more reason to get rid of the guy: He'd been sending sensitive VA personnel information

to his personal email account and his wife. The guy was fired, but after the Board got involved, the VA had to rehire him. It took quite a while, but finally he is gone.

This is the same place where a veteran getting care had his vehicle stolen from the parking lot by a VA employee. The veteran had to turn over all his personal belongings when he was admitted ... including his car keys. Within hours, before his wife could retrieve the car, it was gone. Six months later, the veteran saw his car in the parking lot, called police, and they arrested a VA employee when he came out.

So now we watch and wait. Will pulling a handgun on a little girl and her grandmother be serious enough to get rid of the employee? Does the Accountability Act truly have enough teeth to get the job done?

[Back to Top](#)

2.8 - WSAW (CBS-7, Video): [Free benefits expo offered for area veterans](#) (3 October, 196k online visitors/mo; Wausau, WI)

In an effort to serve area veterans, a Wausau expo will offer free service members or dependents of veterans who want to gather information.

The U.S. Department of Veterans Affairs along with the Wausau Veterans Service Office are organizing the event on Thursday, October 5.

To explain what will be offered, Veteran Service Officer, Scott Berger joined the Sunrise 7 team.

From 10 a.m. to 2 p.m. at the East Gate Hall of Marathon Park in Wausau area veterans are encouraged to visit the Wausau Area Veterans Benefits Expo.

Vets can expect to gather information and learn about VA and other community services that they may want to avail themselves to. Also, eligible veterans will be able to get their flu shot.

3. Access to Healthcare

3.1 - The Hill: [Congress can use the power of pets to help women and vets](#) (3 October, Rep Steve Cohen (D-Tenn.) and Mike Bober, 11.8M online visitors/mo; Washington, DC)

Each year, Congress works hard to pass bills that will help the American people. While acrimony and partisanship have made this more difficult, lawmakers are considering two bills that have bipartisan support on Capitol Hill and among the American people: H.R. 2327 and H.R. 909, the Puppies Assisting Wounded Servicemembers (PAWS), and the Pets And Women Safety (PAWS) Acts of 2017.

Each of these bills involves man's best friend, and both provide for an underserved segment of America. In the case of H.R. 2327, veterans with PTSD and traumatic brain injuries are provided

opportunities for healing through grant-funded service dogs. H.R. 909 expands the number of domestic abuse shelters that can accept pets, in order to help abused women escape domestic violence.

Rep. Cohen is a sponsor of both bills, and PIJAC supports them on behalf of the professional pet care community. Passing these bills now would be a powerful symbol to a public eager for Congress to lead, as National Suicide Prevention Month ends and National Domestic Violence Awareness Month begins.

The House is already taking important steps to help veterans get the companions they need. On Sept. 26, the House Veterans Affairs Committee held a hearing about several bills, including H.R. 2327, that can help servicemembers adjust back to non-combat life. H.R. 2327 has support among myriad veterans' groups, and 200 House co-sponsors. With about 20 veterans committing suicide each day, the PAWS Act is just one way that Congress can improve assistance to America's military servicemembers who return from war with physical and mental scars.

H.R. 909 is likewise an important bill with enormous support. It has 230 co-sponsors in the House and 20 in the Senate. It will provide assistance to many of the approximately one in four women, and one in seven men, who are domestically abused each year.

Studies are clear that in a home where human abuse is taking place, a pet is also often a target. With nearly half of women saying they have returned to an abusive home out of concern for a pet's safety, H.R. 909 is clearly necessary to save lives and prevent more harm to innocent human and animal victims.

The bill provides funds so that abuse shelters can accommodate pets, and extends domestic abuse laws so that courts may require abusers to provide restitution for veterinary costs a victim may incur.

These bills recognize the strength of the human-animal bond. Fully 65 percent of U.S. households have a pet; 88 percent of House and Senate offices allow pets in their offices.

Not only is connecting people and pets good business – with 1.3 million jobs, mostly small business, supported in 2015 alone – it is also great for human health. Just owning a pet saves over \$11 billion in health care dollars each year, according to a conservative study by George Mason University. Other studies show direct links to less stress, better educational results, and improved health for senior citizens.

Whether in Washington, D.C. or Tennessee, pets are everyone's best friend. Congress should use the power of pets to bring people together by passing H.R. 2327 and H.R. 909.

Representative Steve Cohen represents the 9th District of Tennessee. Mike Bober is President of the Pet Industry Joint Advisory Council (PIJAC), which is the legislative and advocacy voice of the responsible pet industry.

[Back to Top](#)

3.2 - Dayton Business Journal: [Dayton VA moving clinic to new location](#) (3 October, John Bush, 885k online visitors/mo; Dayton, OH)

The Dayton VA Medical Center is moving its Lima clinic to a larger location this spring.

The Lima Community Based Outpatient Clinic, currently located at 1303 Bellefontaine Ave., will move to 750 W. High St. following renovations.

The project will allow the VA to treat more veterans.

The new clinic will be housed in a professional building on the campus of St. Rita's Medical Center. It is owned by Lima IV Medical Properties LLC, which will hire a contractor to perform renovations after a bidding process.

The clinic will offer more than 1,400 additional square feet compared to the old location — 9,750 square feet versus 8,341. The increase in space will allow for additional nursing clinics, dedicated exam rooms for tele-health and other specialty services, and more parking (about 100 spaces).

It is also located near major roadways such as U.S. 30, state Route 501, Hume Road and Thayer Road.

The new clinic will be designed "to best serve the needs of veterans" by improving access to care, efficiency of facility operations, infrastructure layout, parking and care coordination between all services, according to a press release from the Dayton VA.

The VA stated the relocation was a necessary move, as the number of veterans served at the current Lima CBOC has expanded by 10.5 percent over the past two years.

The Bellefontaine Avenue site will remain open for all existing services until the new location is ready in spring 2018. At that time, veterans' medical information and appointment schedules will be transferred to the new CBOC.

The Lima clinic served more than 4,200 veterans in the last year, with more than 22,000 outpatient visits.

The Dayton VA Medical Center is the third-largest hospital in the Dayton region with \$382 million in net revenue for 2015, according to DBJ research. The hospital has 371 beds and saw about 5,500 admissions that year.

[Back to Top](#)

3.3 - Government Executive: [How the VA Is Blocking Marijuana Research Veterans Say Could Save Lives](#) (3 October, Eric Katz, 852k online visitors/mo; Washington, DC)

In 2010, Boone Cutler was taking 30 milligrams of morphine, 70 milligrams of oxycodone and other opioids each day. He regularly went three to four days without sleep. The Army veteran had survived a blast injury while deployed in Sadr City, Iraq, and has since endured seven knee surgeries, five shoulder surgeries and back surgery. He also suffers from Parkinson's Disease.

"I did my time," Cutler says. "I've been beat up a few times."

That year, however, Cutler abandoned his treatment through the Veterans Affairs Department and checked himself into a psychiatric ward at a private hospital, where he quit his prescribed cocktail of opioid painkillers cold turkey. Upon leaving the hospital, a coworker convinced him to try something new for his physical and psychological symptoms: marijuana. He was reluctant, telling his colleague, "I'm not one of those pot heads."

The more he thought about it, the more he realized he had nothing left to lose: "I tried everything," he says. "Nothing worked."

But after trying cannabis, Cutler experienced something for the first time since he returned from Iraq: He slept for five hours.

"I thought it was a fluke. I tried it again, and it happened again," he says. "That was an absolute, 100 percent, 180-degree life changing event for me."

Cutler is part of a growing community of veterans who depend on cannabis to treat post-traumatic stress and pain from service-connected injuries. Some vets returning from combat tours of duty have reported that the drug has reduced nightmares and flashbacks, eased pain and helped eliminate their dependency on opioids. The drug nonetheless remains classified as "schedule one" by the federal government, which it defines as "drugs with no currently accepted medical use and a high potential for abuse." While some studies have examined the potential medicinal benefits of cannabis and a growing number of states have legalized medical and even recreational marijuana, there has never been a federally-approved study of its impact on post-traumatic stress disorder with the potential to change the federal government's scheduling.

Dr. Sue Sisley and the Multidisciplinary Association for Psychedelic Studies are trying to change that. Sisley and the group have worked for 10 years to get their triple-blind study with a placebo on the impact of marijuana on veterans with PTSD off the ground. Sisley's research now has approval from the Food and Drug Administration, the Drug Enforcement Administration and the Health and Human Services Department's National Institute on Drug Abuse, which is supplying the marijuana for the study. The research has finally commenced, and Sisley now has 28 participants in treatment. She will need 76 to complete the study, but she is facing a significant barrier: she is running out of veterans who qualify to participate, and the Veterans Affairs Department is refusing to help her identify more.

Taking Risks

Unlike Cutler's state of Nevada, where marijuana is now legal, Thomas Brennan lives in North Carolina, where the drug remains outlawed in all forms. The Marine Corps veteran who completed tours in Fallujah, Iraq, in 2004 and the Helmand Province in Afghanistan in 2010 felt he had no choice but to set up a cannabis distribution network with a handful of other veterans. While they had the marijuana shipped from Marines they trusted located in other parts of the country, they knew they were putting themselves in jeopardy.

"Veterans know this is better than the alternative and were willing to take the risks to deal with this," says Brennan, who suffers from PTSD.

Brennan also tried to use VA as his primary care provider, but felt shunned after informing his doctors there he used marijuana.

“They treated me like a drug addict when I told them about my cannabis use,” says Brennan, who considers himself lucky because he is now entitled to TRICARE by virtue of being medically retired. “They weren’t willing to help me wean off narcotics.” Brennan, before he started using marijuana, took a mixture of antidepressants, sedatives, amphetamines and mood stabilizers that VA sent him through the mail.

Brennan credits marijuana with saving his life, saying without it, he would have committed suicide.

Blocking Research

VA says it is willing to examine research on medical marijuana.

“There may be some evidence that this is beginning to be helpful,” VA Secretary David Shulkin said in May. “And we’re interested in looking at that and learning from that.”

To veterans like Cutler and Brennan, and service organizations like the American Legion, which is pushing VA to adopt a more lenient position on medical marijuana, the department is standing directly in the way of researchers trying to collect that evidence. The researchers will continue their work even if they cannot sign up a sufficient number of veterans, according to MAPS’ Brad Burge, by opening up the study to anyone with PTSD. Burge said it is unclear if such a study would still be generalizable to the veteran community.

VA, for its part, said it is bound by federal law that prohibits its clinicians from recommending patients for studies involving marijuana. A spokesman blamed Sisley and MAPS for not finding other means to recruit veterans for their research.

“Federal law restricts VA’s ability to conduct research involving medical marijuana, or to refer veterans to such research projects,” said Curt Cashour, the VA spokesman. “If the researcher is truly interested in finding veterans for her study, she should spend more time recruiting candidates and less time protesting to the media.”

Sisley says VA is poorly informed, noting she and her team have been “pounding the pavement” to recruit participants. She has screened more than 4,000 veterans over the last two years, but most of them are not qualified to participate. Veterans enrolled in VA health care are uniquely qualified subjects, she explains, as they are likely to have already attempted other treatment and are less likely to already depend on marijuana.

“If you’re in the VA system, that means you’ve already raised your hand and said ‘I need help,’” Sisley says. She adds the department is being disingenuous when it says it wants to examine more research: “It’s very negligent for VA to be begging for more data, and then refuse to cooperate with the federally legal, FDA-approved study that is happening right in the backyard of a VA facility. They should be ashamed.”

Sisley’s study is not receiving any federal funds. She has a \$2.1 million grant awarded from the state of Colorado, and received the marijuana from a National Institute on Drug Abuse contracted facility at the University of Mississippi (all federally approved research on marijuana

comes from plants grown at that facility). To advocates, VA already has the authority to refer its patients to the study.

"We've been, to no avail, trying to work locally with the hospital director and the [Veterans Integrated Service Networks] director to try to get them to build some kind of bridge, some kind of information bridge between the [researchers] and the VA, and they've just been really resistant to doing that," said Lou Celli, American Legion's VA director. He noted VA's laudable history in research, with its clinicians winning three Nobel prizes.

"The time is ripe for this administration to take the lead on this issue and really come out looking like superheroes," Celli said. "It's not a controversial topic. It's only controversial in their own minds."

The American Legion is hopeful if Sisley's study is completed, and its results are accepted by the FDA, it would just be the tip of the iceberg into researching the possibilities of medical marijuana. Like Brennan and Cutler, he acknowledges cannabis will not cure PTSD for any veteran. The alleviation it does provide, however, enables them to seek further help.

"The most common term I hear is, 'It helps keep the visitors away,' meaning the nightmares, the flashbacks," Celli says. "We don't believe there is any study that will prove cannabis cures PTSD. But what it does do is it relaxes them enough, and it lowers their inhibitions enough to be able to receive counseling and to be able to work through whatever issues that they have."

Sisley says marijuana could help address the epidemic of veteran suicides, and if the plant can save even one life, her research is worth pursuing.

"Please allow science to stop being shackled by VA politics," she says in a plea to the department. Absent such action, the American Legion plans to mobilize its 2 million members to lobby VA and members of Congress to help the study move forward.

Getting Out of Bed

Cutler describes the period of his life in which he was taking an ever-growing opioid cocktail as a "never-ending blackout." He went through cycles in which his tolerance would soar, he would detox, the pain would continue and he would repeat the process all over again. He now takes cannabidiol tablets during the day, which he says have no psychoactive effect, and smokes marijuana at night before going to sleep. Cutler calls the VA "hypocritical" for prescribing addictive opioids, but refusing to even research marijuana.

"You send us to war," he says, "and you deny us medication."

Brennan knows marijuana is not a cure-all. He still takes some prescription drugs. He still has migraines. He is, however, sleeping more easily and for longer. He has seen gradual improvements to his depression, mood and relationships. He no longer feels numb.

"Sometimes," Brennan explains, "the smallest reasons for getting out of bed in the morning are what can make a difference for mental health."

[Back to Top](#)

3.4 - WSLs (NBC-10, Video): [Salem VA Medical Center offering free drive-thru flu vaccines, The medical center has opened a drive-thru flu shot clinic on campus.](#) (3 October, Alison Wickline, 815k online visitors/mo; Roanoke, VA)

SALEM, Va. - The Salem VA Medical Center is making it easier for veterans to get their flu shots.

The medical center has opened a drive-thru flu shot clinic on campus. During the whole month of October, between 8 a.m. and 4 p.m., from Monday to Friday, veterans enrolled in the VA system and Salem VA Medical Center employees can receive the vaccine for free.

"For them, it's just a quick and easy process. It's less time-consuming for them because it's a hassle to go into primary care and have a wait time," said Jody Duke, assistant nurse manager for the Salem VA Medical Center.

Veterans are asked to bring their ID card when they visit the flu shot clinic. The clinic is set up in front of Building 1. Staff members say they have given more than 200 vaccines since Monday.

[Back to Top](#)

3.5 - JD Supra: [Department of Veterans Affairs Releases Long-Awaited Proposed Rule to Allow Telehealth Services Across State Lines](#) (3 October, Faegre Baker Daniels, 701k online visitors/mo; Sausalito, CA)

On Friday, September 29, the Department of Veterans Affairs (VA) released its long-awaited proposed rule amending medical regulations to improve access to care for beneficiaries regardless of patient or provider locations. Specifically, the rule enables health care providers to provide telehealth services to beneficiaries across state lines in an effort to increase patient access to care. This "modern, beneficiary- and family-centered health care delivery model" – 38 CFR 17.417 – will leverage novel information and telecommunication technologies, such as apps on a patient's phone or computer, to connect patients and providers throughout the country.

The proposed rule provides a concrete outline for how the Trump Administration intends to utilize the increasingly popular telehealth technology to care for veterans. In fiscal year (FY) 2016, VA providers had 2.17 million telehealth episodes serving over 700,000 beneficiaries. While this accounted for only 12 percent of all beneficiaries that sought care from the Veterans Health Administration (VHA), 45 percent of these patients were from rural communities. Telehealth technology is incredibly effective at expanding access to care for patients in remote locations.

As a national health care provider, the VHA must ensure that its beneficiaries all receive an adequate level of care regardless of location at the time which health care services are provided. As the proposed rule notes, a focused effort to ensure beneficiaries in remote, rural or medically underserved areas is necessary to level accessibility to those with on-site services available. Telehealth will improve the ability of the VHA to take these clinical services to beneficiaries in a convenient, cost-effective and institutionally efficient matter. Congressional and Administration-based efforts to date have demonstrated the desire to make this transition,

evidenced by authorization of department-wide initiatives, copayment waivers and pilot programs.

Today, all VHA providers are licensed in at least one state, but are restricted from practicing in states in which they are not licensed. The proposed rule would exercise federal preemption of state licensure and allow licensed providers to provide services, regardless of the patient's location. Previously, VA medical centers have held off on expansion of telehealth services outside of federal property, such as a beneficiary or provider's home, for fear of repercussions. To date, issues arising from disparities between state law and the VA health care practice have impeded the integration of these services. While some states have already begun to regulate the practice of interstate telehealth, the VA would exercise the federal preemption of state licensure, registration, and certification laws, rules and regulations for all VA providers offering telehealth services within the scope of their employment. Furthering the VA's capabilities to provide telehealth services across state lines would allow these providers to treat more patients in a more timely fashion.

The proposed rule is in stark contrast to Medicare rules, which still require patients to reside in certain locations to receive covered telehealth services. VHA could be paving the way for changes to the Medicare program as the benefits to increased access to care, as well as cost-effective care, are demonstrated.

At a time where the country faces the perils of a deadly prescription opioid epidemic, however, the proposed rule is absent of any language around prescribing practices. The rulemaking does not affect the VA's existing requirement for compliance with state regulations on prescribing and administering controlled substances. Health care providers are still required to abide by limitations put forth in the Controlled Substances Act alongside any additional federal regulations that apply to the VA.

Advancing access to health care services for individuals in remote, rural or medically underserved areas will also benefit those dealing with serious mental illnesses, such as anxiety, depression or agoraphobia. Research conducted by the VA in 2016 clearly demonstrates the improvement that telehealth provides in terms of outcomes, especially in the instance of mental health. VA beneficiaries receiving mental health services through synchronous video telehealth saw a 39 percent reduction in acute psychiatric intakes. Data also supports the use of telehealth for the treatment of general or chronic condition management. For those with limited mobility, telehealth offers an alternative to receiving care without the stress of traveling to receive care. For many, receiving care in the comfort of their home may also lead them to take a more proactive role in their health care, thus improving outcomes.

As a part of the proposed rulemaking, VA solicited comments and input from a variety of stakeholders, including the National Governors Association, Association of State and Provincial Psychology, National Council of State Boards of Nursing, Federation of State Medical Boards, Association of Social Work Boards, and National Association of State Directors of Veterans Affairs. Each of these stakeholders, among others, responded favorably to the inquiries and noted their support of the proposed rulemaking.

The proposed rule will be published in the Federal Register on Monday, October 2, with an open comment period lasting 30 days.

3.6 - KRGV (ABC-5, Video): [Local VA Records Show Improvements in Veterans' Wait Times](#) (3 October, Matt Rist and Valerie Gonzalez, 275k online visitors/mo; Weslaco, TX)

CHANNEL 5 NEWS' investigative team looked closer at data behind wait times at the VA Texas Valley Coastal Bend Health Care System clinics.

After scouring through records, we found a downward trend in wait times for returning patients. However, if you're a new patient, you can expect to wait as long as 70 days for care.

The Texas Valley Coastal Bend Veteran's administration booked more than 235,000 appointments for the fiscal year 2017 alone.

That works out to just shy of 30,000 patients churning through the system.

"We have radically changed the access to our patients," said Dr. Jorge Ortegon, Chief of Medicine at the Texas Valley Coastal Bend VA.

He shared what happens if patients face high wait times.

"The health of the patient will deteriorate," said Dr. Ortegon.

CHANNEL 5 NEWS wanted to find out exactly how long VATVCBHCS patients are waiting, so we pulled data from the VA's government website.

As of Sept. 1st, patients waited an average of five days for primary care, five days for specialists and 2.5 days for mental health care in the Rio Grande Valley region.

"Fortunately, we've done a really good job of gaining trust and credibility back with our patients," said VA Texas Valley Coastal Bend Health Care System VA director Joe Perez.

The data showed it's difficult for veterans to get certain types of care in some places.

In July, veterans at a Harlingen clinic waited an average of 13.5 days to see a specialist. The Sept. 1st numbers show improvement; veterans now wait at that clinic just more than 10 days.

Several Corpus Christi and Laredo veterans also faced waits longer than overall averages.

In July, veterans from Corpus Christi waited 10 days to get primary care. In Laredo, it took eight days to see a specialist.

"Our challenge here is having some of these specialties on board," Perez said.

Perez said they streamlined many processes to reduce wait times. He said veterans can directly opt into the Choice Program and choose an outside provider if wait times are clocking over a certain number of days.

If you're a new patient, expect to wait as many as 70 days to get specialty care at the VA.

The following is a breakdown of new patient wait times as of late September:

In McAllen, for primary care, you'll wait an average of 24 days, compared to 16 in the Harlingen clinic and just 12 at its other Treasure Hills location.

According to the records, when it comes to specialized care like gastroenterology, it takes 27 days. To see an Audiologist, you'll have to take a 70-day wait.

Perez said that number is an exception.

"These are really good compared to what I've experienced out in the community," Perez said. "From my own personal experience, if I could have something at 24 days that would be awesome."

Perez said wait times rise when patients miss or forget to cancel appointments. He also said wait times can be a testament to the quality of care they provide.

"We have a number of patients who choose to wait a little bit longer to be seen by us," Perez said. "We do know their background, we can relate to them. A lot of it is by veteran's choice."

Veterans like Hilario Diaz make that choice every day. Diaz said he's satisfied with his experiences at local regional VA clinics.

"Where in the Valley can you go to and you don't have to wait to see a doctor?" Diaz said.

He did not wait long for care.

"It's free. I haven't researched, but I would venture to say there's no other country in the world that does for veterans what the United States of America does," Diaz said.

Army veteran Robert Grandstaff shared a different experience with the VA. He was injured while deployed.

"I need a lot of care, I have a lot of physical injuries, PTSD, chronic back pain," Grandstaff said.

He said he waited long for his first VA appointment in 2013.

"When I first moved here, I asked for an appointment and they told me to wait three to four months," Grandstaff said.

Grandstaff said his injuries force him to seek specialty care.

"Just like other veterans, I'm going to have to find other care," Grandstaff said. "There needs to be some sort of better system, better accountability."

Back in 2016, the local VA was scrutinized after an allegation of altering data to make it look like veterans were waiting less time for appointments.

Perez said it happened at clinics across the country, but it's no longer an issue.

"It was a national initiative to do training and re-training of everybody that had the ability to schedule within our system and that continues annually," Perez said.

The director admits wait times will constantly change. A new patient survey will be a crucial measuring stick to find out how satisfied or dissatisfied veterans are with their care.

If you want to learn more about wait times at VA clinics across the region, you can log on to the VA's website: <https://www.accesstopwt.va.gov/>

There are bi-monthly published reports on government websites which outline wait times and show conflicting information. Perez said the data online is always changing and it can make monthly published reports quickly outdated.

3.7 - South Bend Tribune: [Our Opinion: A long journey's end for local veterans](#) (3 October, Editorial Board, 273k online visitors/mo; South Bend, IN)

The recent opening of the new St. Joseph County VA Clinic in Mishawaka marked the beginning of a new era for veterans' care locally.

It's been a long journey. Veterans from South Bend, Mishawaka, Elkhart and other local communities have often had to travel to VA facilities in Chicago or Fort Wayne for more extensive medical procedures. Now, patients will be able to receive more services here. As many as 8,000 patients will be receiving services here initially and the VA hopes to grow that number to 13,000 in the next two years.

Work on the clinic began nearly a decade ago when, as a U.S. representative, Joe Donnelly began work on improving veterans' services here with the possible goal of building a new facility. Credit, too, should be given to Jackie Walorski, who has made veterans' issues a priority during her time as Indiana's 2nd District congressional representative.

The VA approved a clinic for the South Bend area and in 2011 Congress appropriated \$6.7 million to build it.

Nearly two years ago, ground was broken for a new 89,000-square-foot clinic. Now, the dream has become a reality.

Veterans will be able to receive a range of offerings at the new clinic that the current clinic on South Bend's Western Avenue doesn't provide: eye and hearing clinics, foot and skin doctors, a cardiologist for consulting (no procedures), prosthetics, physical and occupational therapy and CT scans. Women will have a space for primary care and procedures.

More services will gradually be added.

"It's the culmination of the dedication and determination of the entire community," Donnelly wrote in a Tribune Viewpoint last week, "and it's an example of what we can accomplish when we work together."

Hoosier veterans in northern Indiana now are getting the care they need and a clinic they deserve.

...

Leaders at the South Bend Police Department, who are finding it difficult to recruit and retain officers in this day and age, are trying something different to address the problem.

The Common Council approved a plan by Police Chief Scott Ruskowski to begin a part-time program using retired officers to staff certain positions.

Rather than working patrol beats, retired officers would be assigned to more administrative and less confrontational tasks.

Ruskowski envisions part-time officers handling jobs such as traffic control at Notre Dame football games, taking vandalism and shoplifting reports, traffic enforcement and other "quality of life issues."

The officers would be paid a bit less, but would carry the same weapons and have the same arrest powers as full-time officers. Pending approval by the city's Board of Public Safety, the program could be launched by spring.

Statewide, the only other known city department to operate such a program is Danville, a small community west of Indianapolis.

South Bend's plan to use retired officers is a creative way to address its personnel shortage. That kind of resourcefulness is what's needed to attract new officers to the city, retain current ones and maintain the level of public safety this community deserves.

[Back to Top](#)

3.8 - KRTV (CBS-3): [VA gearing up for Drive Thru-Flu Clinic and Health Fair](#) (3 October, Eric Jochim, 195k online visitors/mo; Black Eagle, MT)

Staff at the VA are gearing up for their Annual Drive Thru-Flu Clinic and Health Fair.

Tomorrow from 7 am to 5 pm free Flu shots will be available for to all enrolled Veterans and VA employees.

If a veteran isn't enrolled with the VA staff will be on hand to assist with the process.

Last year at the event the clinic administered over 500 flu shots.

Registered Nurse Katie Temple urges the public to get their flu shot sooner than later.

"Up to 20% of the population actually gets influenza every year and the elderly and the young are really prone to get hospitalized from influenza," said Temple.

The clinic will also offer health promotions, disease prevention, suicide awareness, and hepatitis C screenings.

According to VA staff baby boomers are 5 times more likely to test positive for hepatitis C than any other age group.

The county health office will also be in attendance from 8:30am to 3 pm, to provide flu shots to family members for a small fee.

[Back to Top](#)

3.9 - Healthcare-Informatics: [VA Issues Proposed Rule to Allow Home-Based Telemedicine for Veterans](#) (3 October, Heather Landi, 158k online visitors/mo; New York, NY)

The U.S. Department of Veterans Affairs (VA) issued a proposed rule this week that would allow VA healthcare providers to provide medical care via telehealth across state lines and regardless of the location of the provider of the beneficiary.

The VA says the proposed rule would increase the availability of mental health, specialty and general clinical care for all VA beneficiaries. “Just as it is critical to ensure there are qualified health care providers on-site at all VA medical facilities, VA must ensure that all beneficiaries, specifically including beneficiaries in remote, rural or medically underserved areas, have the greatest possible access to mental health care, specialty care and general clinical care,” the proposed rule states. “Thus, VA has developed a telehealth program as a modern, beneficiary- and family-centered health care delivery model that leverages information and telecommunication technologies to connect beneficiaries with health care providers, irrespective of the state or location within a state where the health care provider or the beneficiary is physically located at the time the health care is provided.”

Further, VA officials stated, “By providing health care services by telehealth from one state to a beneficiary located in another state or within the same state, whether that beneficiary is located at a VA medical facility or in his or her own home, VA can use its limited health care resources most efficiently.”

VA will accept comments on the proposed rule through Nov. 1.

For fiscal year (FY) 2016, VA health care providers had 2.17 million telehealth episodes of health care (meaning a clinical encounter or a period of time in which care was monitored), which served over 702,000 veterans (approximately 12 percent of the total patient population), with 45 percent of those veterans living in rural communities. By increasing VA’s capabilities to provide telehealth services, VA would be able to expand these services, the agency said in the proposed rule.

While telehealth enhances VA’s capacity to deliver health care services to beneficiaries located in areas where health care providers may be unavailable or to beneficiaries who may be unable to travel to the nearest VA medical facility for care because of their medical conditions, the agency states that in order to protect VA health care providers from potential adverse actions by states, many VA medical centers (VAMC) are currently not expanding some critical telehealth services if the health care service is provided outside federal property, or across state lines.

In addition, many individual VA health care providers refuse to practice telehealth because of concerns over states taking action against the health care provider’s state license, state laws, or

the shifting regulatory landscape that creates legal ambiguity and unacceptable state licensing risk, the VA stated in the proposed rule. “The current disparities between VA health care practice in telehealth and state laws have effectively stopped or inhibited VA’s expansion of telehealth services to certain locations, thereby reducing the availability and accessibility of care for beneficiaries,” the VA stated.

This proposed rulemaking would clarify that VA health care providers may exercise their authority to provide care through the use of telehealth, notwithstanding any state laws, rules, or licensure, registration, or certification requirements to the contrary. In so doing, VA would exercise federal preemption of state licensure, registration, and certification laws, rules, regulations, or requirements to the extent such state laws conflict with the ability of VA health care providers to engage in the practice of telehealth while acting within the scope of their VA employment.

The VA notes in the proposed rule that the changes would improve VA’s ability to provide mental health services to veterans. Veterans who received mental health services through synchronous video telehealth in fiscal year 2016 saw a reduction in the number of acute psychiatric VA bed days of care by 39 percent, the VA reports.

Another benefit of expanding VA telehealth includes serving a recruitment incentive for VA healthcare providers and allowing VA to address recruitment shortages, the agency states. In Charleston, South Carolina, the South Carolina VAMC serves as one of the VA’s National TeleMental Health Hubs and provides mental health services to veterans across eight states with a team of 30 full-time healthcare provides. The VA notes there are currently multiple vacancies for TeleMental Health psychiatrists at the Charleston Hub, and “in the past six months, applicants have only expressed interest in telework positions.”

The American Medical Association (AMA) released a statement supporting the expansion of clinically validated telehealth services within the VA, and stated that “this decision ensures that important patient protections are in place for the delivery of high quality and reliable care.

“The VA has a unique federally controlled healthcare system with essential safeguards to help ensure that both in-person and virtual beneficiary care meet and exceed the standard of care. The AMA strongly supports that the proposed rule explicitly provides that this program’s multi-state licensure exception applies only to VA-employed providers and would not be expanded to contracted physicians or providers who are not directly controlled and supervised by the VA and would not necessarily have the same training, staff support, shared access to a beneficiary’s EHR and infrastructure capabilities. We applaud the VA’s expansion of telehealth services in a manner that promotes quality and access,” the AMA stated.

3.10 - Gatehouse Media: [VA’s chief surgeon envisions center of excellence in Fayetteville](#)
(3 October, Amanda Dolasinski, 74k online visitors/mo; Fayetteville, NC)

Dr. Lynn Weaver was a part of integration in Knoxville, Tennessee, but bullies were no match. His distinguished career now comes to Fayetteville’s VA Medical Center.

Fifty-three years ago, a young Lynn Weaver walked into his new classroom at West High School in Knoxville, Tennessee, ready for lessons, but honestly more interested in the football field.

He and a dozen other black students were the first to integrate into the school.

"I got stomach cramps every morning just thinking about going to school," Weaver said. "I stopped eating breakfast."

The daring move led Weaver to second-guess his abilities. But the 14-year-old student who was constantly targeted by racist teachers and bullies would not only ace his classes, he also became one of the top Veterans Affairs surgeons.

In February, Weaver was named the chief of surgery at the Fayetteville Veterans Affairs Medical Center. Weaver, who completed his residency while serving 13 years in the Army, most recently worked as the senior associate dean and chairman of surgery at Ross University School of Medicine in Dominica.

Gregory Antoine, the medical center's chief of staff and a longtime friend, enticed him to take over the surgery department in Fayetteville, Weaver said. The men were stationed together at Fort Campbell, Kentucky.

The VA has been finding ways to work with Womack Army Medical Center on Fort Bragg, and is looking into ways to work with Wake Forest University and the University of North Carolina at Chapel Hill, he said.

"I liked the picture he envisioned for patients," Weaver said. "You can put together a center of excellence right here in Fayetteville."

Weaver's career began to take shape when he was a high school student in Knoxville. That's when learning became a spiteful act, and he learned as much as he could, he said.

Weaver was a constant target of racist teachers, who put his desk in the back corner of their classrooms, he said. And of the students and parents who crowded him on the football team, intimidating him.

With failing grades in all of his seventh grade classes, Weaver questioned if he was smart enough to be in the school.

"I started to think I am dumb," Weaver said. "Maybe I don't belong."

Then Edward Hill, his science teacher, knocked on the door at his family's home.

"He said, 'I heard you're having problems,' " Weaver recalled. "I said, 'Yeah, they're trying to run me away.' "

Hill, a black teacher, set up private tutoring lessons for Weaver after school and on Saturdays.

"I was able to pass the semester," Weaver said. "After they got through tutoring me, learning became a spiteful activity. I needed to show I belong and I was as smart as everyone else."

Hill encouraged Weaver to compete in the Southern Appalachian Science Fair that year. Weaver, not thrilled about yet another activity that would cut away at his time practicing football, conceded when Hill paid another visit to his home and spoke with his parents.

For three days, Weaver dressed up in a jacket and tie and stood next to his project at the science fair. The other contestants, mostly white students, ignored him and didn't speak to him, Weaver said.

His project was simple compared to the other students. He set out to prove why asbestos was a good insulator; it is now a known carcinogen.

A group of men stopped at his project and Weaver was so excited someone wanted to talk to him. He rattled off all the details of his experiment.

Unbeknownst to him, they were the judges — and they would later name him grand champion.

"I was the first black student to win," Weaver said, smiling at the memory. "It was a huge deal in Knoxville."

His win caught the attention of bullies, Weaver said. He had a brief brush with being a "bigger thug than they were," Weaver said.

Then he decided to get back on track, dedicating his life to making his father and Hill proud.

He hadn't given college much thought, but didn't question when he received a scholarship to Howard University. Years later he learned he received that scholarship because Hill applied for it on his behalf.

Weaver would go on to complete his residency training in general surgery at Fitzsimmons Army Medical Center in Denver, Colorado, and residency at Madigan Army Medical Center in Tacoma, Washington. He served in the Army from 1974 to 1987, when he was a major.

"As far as being a surgeon in the Army, you're not trying to make money," Weaver said. "You're there to take care of the soldiers. I really enjoyed my time in the Army."

As Weaver winds down his busy career, he said he's happy to be in Fayetteville, taking care of soldiers.

"I thought it'd be great to end my career in a place with a lot of soldiers and veterans," he said. "I've made a difference, I hope."

3.11 - Salem News: [Walgreens to offer flu shots for vets](#) (3 October, Larry Shields, 68k online visitors/mo; Salem, OH)

For the first time, the Veterans Administration is partnering with the Walgreens drug store chain to provide flu shots for all veterans, Rod Hughes, commander of AMVETS Post 45, said.

The shots will be given from 11 a.m. to 5 p.m. Oct. 14 at the AMVETS Post 45, 750 S. Broadway Ave., in Salem.

“The VA teamed up with Walgreens this year so we are providing a place for flu shots for all vets in the VA,” Hughes said, adding that, “their spouses are also able to get shots that day with current insurance.”

The Columbiana County Veterans Service Commission will also have representatives available for veterans who are not registered and veterans can speak with them about what services and benefits are available to them.

Any veteran who is unsure if they are registered should bring their DD-214 form. The shots will be at no cost to veterans with proof of registration.

Hughes said Walgreens will provide pharmacists and the necessary personnel to fill out paperwork to the post.

Privacy laws under the Health Insurance Portability and Accountability Act of 1996 (HIPAA) will be followed Hughes said.

“Our members are aware of the flu shot program this year,” Hughes said, “but possibly not all veterans.”

AMVETS Post 45 has a combined membership of 800 regular, auxiliary and Sons of AMVETS members.

The VA system includes the Youngstown and Calcutta outpatient clinics along with Brecksville and Wade Park hospitals.

3.12 - KGVO (CMN-1290, Audio): [Montana Veteran Affairs Talks With Veteran's Heartbeat About Recent Suicide Numbers](#) (3 October, Nick Chrestenson, 20k online visitors/mo; Missoula, MT)

Veteran's Heartbeat – On the Pulse of the Veteran is a weekly half hour talk show devoted to issues of hope, health, opportunity and well-being of veterans. Join us on KGVO 98.3 FM every Saturday morning at 8:30 a.m. The show is brought to you by the Rural Institute for Veteran's Education and Research and they are on a mission. When veterans encounter obstacles to health and well-being, RIVER is there to help. RIVER provides training to the veteran's community for outdoor recreational therapists and emergency medical technicians, plus medical services and cutting edge research projects. If you are a veteran or veteran's family, contact RIVER at riverofchange.org.

For episode 32 of Veteran's Heartbeat, we spoke with Juliana Hallows and she is the Suicide Prevention Coordinator with Veteran Affairs Montana.

3.13 - KTVH (NBC-12): [Drive-thru flu shot clinic offers vets and others convenient option](#) (3 October, John Riley, 2.3k online visitors/day; Helena, MT)

Over 550 Veterans received their Flu immunization on Tuesday at the Fort Harrison along with community members and VA staff.

VA Montana staff braved the cold temperatures outside to kick off the flu season with the annual Fall Health Festival and Drive-Thru Flu Clinic.

The shots were free for enrolled veterans and VA employees. County Health Department were on hand to supply flu shots for a fee for everyone else.

People 65 years and older, young children and people with certain health conditions are at higher risk for serious flu complications.

Each year around 200,000 people are hospitalized and around 32,000 people die from Influenza. Health experts say best way to prevent the flu is by getting vaccinated each year.

Veterans attending the event said that they love the ease of the clinic considering they didn't even have to leave their vehicles.

"I've never had to wait long," said veteran Louie Stiles, "When I was doing it privately getting these private shots they'd just take a lot of time, this doesn't. "

If you are an enrolled veteran and missed the clinic you can still get your shot at the VA Medical Center.

[Back to Top](#)

3.14 - Interlochen Public Radio: [In Michigan, veterans commit suicide at high rate](#) (3 October, David Cassleman, 900 online visitors/day; Interlochen, MI)

The suicide rate for Michigan veterans is more than twice as high as the state's overall rate, according to data released by the U.S. Department of Veterans Affairs last month.

The analysis shows more than 200 veterans killed themselves in Michigan in 2014 – the most recent year covered by the study.

Michigan's rate of 35.5 suicides per 100,000 veterans is slightly less than the national rate of 38.4. The rate for all Michigan residents is 16.9.

Dr. Nazzareno Liegghio, the chief of mental health at the Saginaw VA medical center, says it can be difficult for veterans to travel to get mental health treatment.

“In Michigan I think the biggest challenge is just our huge space and area,” Liegghio says, “and the location of veterans between the upper part of lower Michigan and Upper Peninsula.”

The suicide rate is especially high among young Michigan veterans. Only Oklahoma had a higher rate than Michigan for veterans aged 18-34.

Liegghio says young veterans are at risk when they transition out of the military.

“Usually they enlist around 18, 19, so they get out, they’re 23, 24,” Liegghio says. “They come home. They have a little time to adjust. And then all of a sudden they find themselves, ‘okay, now what do I do?’”

Nationwide more than two-thirds of veterans who commit suicide are aged 50 or older.

The analysis shows 20 veterans commit suicide each day in the United States.

6.1 - WXIN (FOX-59, Video): [Researchers at IUPUI using dogs to sniff out prostate cancer](#)
(3 October, Nick McGill, 1.5M online visitors/mo; Indianapolis, IN)

Scientists at IUPUI are hoping man’s best friend can help solve one of man’s biggest problems.

Recently, a study in Italy found that dogs have the ability to smell and detect certain odors in urine that are associated with prostate cancer with 98% accuracy. A team at IUPUI, led by Dr. Mangilal Argawal, is hoping to replicate that process and develop an early screening method.

“If we can find that smell in prostate cancer from urine, it can really change the way we diagnose prostate cancer right now,” Argawal said.

Partnering with the Roudebush VA Medical Center, Argawal says his team has potentially identified molecules that could be the key to the “odor test.”

The team is working with dog training service “Medical Mutts” to verify their work. The hope is then to create a sensor that can detect the odors. Argawal says it would work similar to a “pregnancy test for prostate cancer.”

“So if you can make a sensor that is as accurate as a trained dog that can sniff prostate cancer from urine at 98% accuracy, then you are completely changing the field,” he said.

Argawal says current tests for prostate cancer screening can be inaccurate and lead to unnecessary and painful biopsies, a fact that can deter many men from seeking the tests. Argawal says if his team is successful, it would eliminate those problems.

“You can do the test in a clinic, you could do the test at home, same day results, and same day discussion with you doctor. So there are a lot of advantages to having accurate tests that avoid biopsies,” he said.

Argawal says so far the results of his team’s work are promising. He says they may be about four years away from finishing their study, developing a sensor and clearing clinical trials. However, he added that four years in “medical time” is relatively quick.

7. Supply Chain Modernization

7.1 - Forbes: [Use It Or Lose It -- Trump's Agencies Spent \\$11 Billion Last Week In Year-End Spending Spree](#) (3 October, Adam Andrzejewski, 29.8M online visitors/mo; Jersey City, NJ)

Every September, the end of the fiscal year sparks a “use it or lose it” spending frenzy as federal agencies race to use up what’s left in their annual budgets. It’s a phenomenon that should drive taxpayers crazy. Agencies are afraid that if they spend less than their budget allows, Congress might send them less money in the next year. Agencies often try to spend everything that’s left instead of admitting they can operate on less.

Here are the top ten ways the government wasted taxpayer money in the last week of FY2017:

[...]

5. Insect and Rodent Control at the VA – The federal government did some end-of-the-year cleaning, paying \$152.5 million in “housekeeping” bills. While agencies paid \$114 million to guards and facilities operations support, they also signed for custodial janitorial (\$24.3 million); laundry and dry cleaning (\$2.9 million); surveillance (\$2.7 million); trash and garbage collection (\$1 million); carpet cleaning (\$630,943); interior landscaping (\$154,458); and snow removal/salt (\$127,373). “Housekeeping” contracts included insect and rodent control, which cost \$111,000 at the Department of Veterans Affairs.

6. Redecorating Allowance – For the new fiscal year, many federal agencies decided to redecorate. In one week, the government spent \$83.4 million on furniture plus another \$23 million on office supplies and equipment. The Department of Veterans Affairs spent \$15.6 million on new office furniture including \$4.7 million to a veteran-owned company, American Veteran Office Furniture, LLC. The largest furniture contractor across all agencies, however, was Knoll, Inc. (\$6.2 million) – a luxury furniture company that has 40 pieces permanently displayed in the American Museum of Modern Art in New York City.

7. Self-Promotion (PR) Machine – The government spent tens of millions of dollars on last-minute self-promotion. Agencies spent \$18.6 million on public relations, \$11.7 million on market research and public opinion, and \$5.5 million on communications. Further, \$28.8 million went to advertising efforts – the Department of Homeland Security spent \$15 million on advertising, including a \$6.7 million deal with Lempugh, Inc., and a \$4 million contract with the Ogilvy Group. Further, the Department of Veterans Affairs spent \$3.2 million on signs and advertising displays with S2 Ventures, LLC.

[...]

In the midst of the government's year-end spending spree, Senator Rand Paul (R-KY) introduced the Bonuses for Cost-Cutters Act to curb "use it or lose it" spending. Paul's bill would expand current law to pay bonus happy bureaucrats who identify unneeded or surplus funds and redirect 90 percent of those savings to deficit reduction.

The private-sector uses zero-based budgeting - where all expenses need to be justified from the ground up and every function within an organization is audited for cost. As a businessman, the president should know this.

Whether it's passing legislation or finding another way to address this taxpayer abuse, Congress needs to crack down on "use it lose it" spending. When agencies engage in this wasteful practice, we all lose.

Adam Andrzejewski (say: Angie-eff-ski) is the Founder and CEO of OpenTheBooks.com – a national transparency organization with a database of 4 billion federal, state and local expenditures.

[Back to Top](#)

7.2 - EHR Intelligence: [VA to Award Cerner EHR Implementation Contract Within 30 Days, The federal agency will migrate or abandon 240 of its 299 other IT projects to allocate funding toward the Cerner EHR implementation.](#) (3 October, Kate Monica, 50k online visitors/mo; Danvers, MA)

VA Secretary David Shulkin announced the federal agency will award its EHR implementation contract to Cerner Corporation in the next thirty days.

The announcement came during the recent Senate Veterans Affairs Committee hearing last week. The new VA EHR system will operate on a similar platform as the Department of Defense (DoD) EHR system—MHS Genesis—in an effort to improve interoperability between agencies.

"We released to Congress—to you—30-day notice of award of a contract," said Shulkin. "We are keeping on the timeline that we talked about. We're marching forward. We have the principles. I have some updates to share with you on the strategic IT plan, because I think we are making a lot of progress with that."

In June, three senators submitted a letter to Shulkin and DoD Secretary James Mattis requesting more information about the Cerner EHR replacement, as well as a projected timeline.

Senators John McCain (R-AZ), Johnny Isakson (R-GA), and Jerry Moran (R-KS) emphasized the importance of an efficient integrated health system.

In this most recent discussion of the upcoming project, Shulkin stated part of VA's strategic plan will involve phasing out 80 percent of VA's other projects currently in development. The federal department will migrate or cease work on 240 of its 299 projects.

"By concentrating on some specific IT modernization initiatives, like [electronic health record modernization, financial management business transformation], etc., and leveraging cloud and digital platforms, the 80 percent reduction of ongoing development projects is expected to occur within 18 months, which is part of the overall IT modernization roadmap," VA Press Secretary Curt Cashour told Federal News Radio in an email.

VA has not stated how much the Cerner EHR implementation will cost. However, the VA IT office must contend with the \$215 million budget cut in the President's fiscal 2018 proposal. An appropriations bill for 2018 designated \$78.6 billion in discretionary funding for VA healthcare modernization and improvements.

In an effort to better utilize funds, a source close to the department stated VA is ceasing development on less pressing projects and instead allocating those funds to the new Cerner system.

While VA has not released any information about how much the system will cost, the federal department has outlined its priorities for the new Cerner EHR and indicated other tools necessary to optimize the system.

"We haven't gotten to defining which specific tools they are yet, and how we're going to meet those needs," Shulkin said. "We've talked about the days of VA being a software developer are over, and we're going to be looking at off the shelf, current technologies. There's going to be a lot more definition on that."

Shulkin also emphasized the need for experienced political leadership and assistance from the private sector to offer guidance during the implementation process.

"This is a big, complex organization," Shulkin told reporters following the hearing. "I need the best team possible. I need my nominees, all my political appointments to clear through the vetting process and then to go through their confirmation if it's required. And I need additional people from the private sector who want to come and serve their country to get in touch, because we need the A team on this."

Toward this end, Cerner created an Advisory Group last month to offer insights and recommendations during the EHR modernization that includes former government, military, and private sector leaders.

"Our Veterans deserve continuous access to their medical records while in the service and afterward, whether they are seen in VA or a private health care system," said former Nebraska Senator and Governor Bob Kerrey, who will chair the group. "I received years of treatment from VA and have firsthand experience with the challenges veterans often face when receiving care."

Other members of the group include Former VA CEO and Assistant Secretary of Information and Technology Roger Baker and former National Coordinator and Acting Assistant Secretary for Health Karen DeSalvo, MD.

7.3 - ExecutiveGov: [Report: VA Inches Closer to Cerner EHR Devt Contract Award](#) (3 October, Jane Edwards, 20k online visitors/mo; Tysons Corner, VA)

The Department of Veterans Affairs expects to award Cerner a contract to build a new electronic health record system for VA as early as this month, Federal News Radio reported Friday.

VA Secretary David Shulkin told members of the Senate Veterans Affairs Committee at a hearing Wednesday that the department issued to Congress a 30-day notice of contract award for the new EHR platform.

His statement came months after he announced plans in June to issue a direct solicitation to Cerner to implement the same EHR system – MHS Genesis – that the Defense Department currently deploys.

VA Press Secretary Curt Cashour told the station in an email that the department will end 80 percent of its ongoing information technology development projects over the next 18 months as part of VA's IT strategic plan.

A source said the agency's move to reduce its current projects seeks to help fund the implementation of the new EHR system, the report added.

Cerner collaborates with Leidos and Accenture as part an industry team that won a potential 10-year, \$4.3 billion contract in 2015 to help DoD integrate a commercial EHR platform across the Military Health System.

8. Other

8.1 - The Washington Post (AP): [Tennessee mail carrier sentenced for stealing opioids](#) (3 October, 43.9M online visitors/mo; Washington, DC)

GREENEVILLE, Tenn. — A Tennessee mail carrier who pleaded guilty to stealing at least 33 packages of medications intended for veterans has been sentenced to probation.

The Kingsport Times-News reports that Bronson Cobble was sentenced last week to three years' probation and ordered to pay \$1,154 in restitution following his June plea to one count of theft of mail.

Prosecutors in a sentencing memorandum recommended a bottom-range sentence, saying his admission of guilt and request for court-appointed counsel makes him unlike most defendants and suggests a low risk of recidivism.

Court records state that between August 2016 and March, Cobble stole the packages mailed from the U.S. Department of Veterans Affairs to patients in East Tennessee and used the narcotics himself because of a severe opioid addiction.

[Back to Top](#)

8.2 - The Buffalo News: [Alden companies accused in fraud case agree to pay \\$3 million](#) (3 October, Phil Fairbanks, 1.6M online visitors/mo; Buffalo, NY)

An Alden company used a figurehead to qualify for contracts set aside for disabled veteran-owned small businesses and on Tuesday agreed to pay \$3 million to settle a whistleblower's lawsuit, according to federal prosecutors.

The monetary settlement ends a civil suit that accused Zoladz Construction Company, Arsenal Contracting LLC and Alliance Contracting, all of Alden, of recruiting a service-disabled veteran to serve as a front for Arsenal, a sham company controlled by two other individuals.

Those two men, John Zoladz of Darien and David Lyons of Grand Island, also were named in the suit and in the agreement settling allegations that they violated the federal False Claims Act. Neither Zoladz nor Lyons is a service-disabled veteran.

The government, in its suit, claimed Arsenal was a front company that had few employees of its own and relied almost exclusively on Zoladz Construction and Alliance to operate.

"Every time an ineligible contractor knowingly pursues and obtains such set-aside contracts, they are cheating American taxpayers at the expense of service-disabled veterans," said acting Assistant Attorney General Chad A. Readler in a statement.

A woman answering the phone at Zoladz said the company would not comment.

The scheme that Zoladz and Lyons carried out included false statements regarding Arsenal's qualifications for the small business program to the U.S. Department of Veterans' Affairs.

"The multi-million dollar civil judgment ensures that those involved pay a heavy price for their decision to divert to themselves resources intended for the benefit of those who have made supreme sacrifices on behalf of all," said acting U.S. Attorney James P. Kennedy.

The settlement also resolves a whistleblower lawsuit filed in 2011 by the Western New York Foundation for Fair Contracting, a labor-management group acting as watchdog on public contracts.

Under the settlement, the foundation will receive \$450,000.

“The contracting companies and principals allowed greed to corrupt a federal process intended to benefit service-disabled, veteran-owned small businesses,” said Special Agent in Charge Adam S. Cohen of FBI Buffalo Field Office.

The settlement is the result of investigation by the FBI, Assistant U.S. Attorney Kathleen A. Lynch, the VA Office of Inspector General and the Small Business Administrations's Office of Inspector General.

4 October 2017

1. Top Stories

1.1 - The Washington Post (AP): [VA watchdog reviewing Shulkin's 10-day trip to Europe](#)

(3 October, Hope Yen, 43.9M online visitors/mo; Washington, DC)

The Veterans Affairs Department's watchdog said Tuesday it is reviewing Secretary David Shulkin's 10-day trip to Europe with his wife that mixed business meetings with sightseeing. Shulkin disclosed last week he traveled to Denmark and England to discuss veterans' health issues. Travel records released by VA show four days of the trip were spent on personal activities, including attending a Wimbledon tennis match and a cruise on the Thames River.

1.3 - CNN (Video): [VA Secretary David Shulkin under review for work trip to Europe](#)

(3 October, Miranda Green, Rene March, and Gregory Wallace, 29.7M online visitors/mo; Atlanta, GA)

The VA's inspector general is reviewing Veterans Affairs Secretary David Shulkin's July business trip to London and Denmark, which included meetings with Danish and UK officials as well as a stop at Wimbledon. It's now the fifth investigation into a member of the Trump administration's travel by a department inspector general.

[Hyperlink to Above](#)

1.4 - CBS News: [Veterans Affairs inspector general is reviewing David Shulkin's Europe trip](#)

(3 October, Jacqueline Alemany, 26.1M online visitors/mo; New York, NY)

The Department of Veterans Affairs inspector general is reviewing Secretary David Shulkin's 10-day taxpayer-funded trip to Europe in July, during which Shulkin and his wife spent time shopping and sightseeing in Denmark and the U.K. A spokesman for the VA's Office of Inspector General told CBS News on Tuesday that it is "gathering information and reviewing the recent trip."

1.5 - Military Times: [VA names Elizabeth Dole to head caregivers advisory group](#)

(3 October, Leo Shane III, 2.1M online visitors/mo; Springfield, VA)

Veterans Affairs officials on Monday announced former North Carolina Sen. Elizabeth Dole will chair the department's new family and caregiver advisory committee, formed in response to problems with support programs earlier this year. The committee, which features a mix of veterans and military caregivers, is charged with advocating for improvements to VA care and benefits services. In a statement, Dole called the work "critical" for the veterans community.

2.1 - The Hill: [VA chief under investigation over European trip: report](#) (3 October, Jacqueline Thomsen, 11.8M online visitors/mo; Washington, DC)

The Department of Veteran Affairs inspector general is investigating Veteran Affairs Secretary David Shulkin over his trip to Europe, CNN reported Tuesday. Shulkin traveled to London and Demark in July, where he met with officials from both counties. Michael Nacincik, spokesman for the VA inspector general's office, told CNN that he couldn't say what triggered the probe or if the office was investigating any other instances of Shulkin's travel.

2.2 - Fortune: [Trump's VA Secretary Is the Fourth Cabinet Member to be Caught in a Travel Expense Scandal](#) (3 October, John Patrick Pullen, 7.7M online visitors/mo; New York, NY)

Overshadowed by Health and Human Services Secretary Tom Price's resignation Friday afternoon, Veterans Affairs chief David Shulkin is the latest Trump cabinet member to be found mixing personal trips and expenses with government travel. The VA secretary cruised the Thames, took in sight-seeing at Westminster Abbey, and watched a Wimbledon tennis match during a 10-day European trip with his wife, according to an itinerary obtained by The Washington Post.

[Hyperlink to Above](#)

2.3 - Washington Examiner: [VA watchdog launches probe of David Shulkin's 10-day European trip](#) (3 October, Gabby Morrongiello, 4.8M online visitors/mo; Washington, DC)

The Department of Veterans Affairs' internal watchdog has launched an investigation into a 10-day, taxpayer-funded trip taken by Secretary David Shulkin and his wife earlier this summer. Shulkin came under fire last week for the July vacation to Denmark and the U.K., during which he and his wife attended a Wimbledon tennis match, and went shopping and sightseeing.

[Hyperlink to Above](#)

2.4 - WXIN (FOX-59, Video): [Veterans voice concerns, outline legislative agenda items at town hall](#) (3 October, Haley Bull, 1.5M online visitors/mo; Indianapolis, IN)

Veterans are making sure their voices are heard by state lawmakers and local government officials during a series of town hall meetings across the state. Tuesday, veterans at a meeting in Carmel raised their concerns and outlined their legislative agenda items for the upcoming legislative session. "It's really important for the legislators to hear our concerns we have many healthcare being right at the top of the list..."

2.5 - Fayetteville Observer: [NC congressmen, VA leaders meet in Washington](#) (3 October, Drew Brooks, 439k online visitors/mo; Fayetteville, NC)

Congress members from North Carolina met with Veterans Affairs leaders in Washington on Tuesday, hoping for better communication on problems in the VA system. Eight House members met with top officials from the VA's Mid-Atlantic Health Care Network, also known as Veterans Integrated Service Network 6, and the leaders from at least three VA medical centers, including Fayetteville's.

[Hyperlink to Above](#)

2.6 - Michigan Radio Network: [Ann Arbor VA Hospital employees and vets protest staffing shortage](#) (3 October, Tracy Samilton, 385k online visitors/mo; Ann Arbor, MI)

Ann Arbor VA Hospital employees rallied Tuesday to ask Congress for enough money to eliminate the 49,000 VA job vacancies nationwide. Similar rallies have been held at other VA hospitals nationally in recent weeks. Ozzie James, Jr. is president of American Federation of Government Employees Local 2092. He says veterans need the expertise of VA doctors, nurses and other staff, because outside health care professionals don't fully understand veterans' needs.

1. Top Stories

1.1 - The Washington Post (AP): [VA watchdog reviewing Shulkin's 10-day trip to Europe](#) (3 October, Hope Yen, 43.9M online visitors/mo; Washington, DC)

WASHINGTON — The Veterans Affairs Department's watchdog said Tuesday it is reviewing Secretary David Shulkin's 10-day trip to Europe with his wife that mixed business meetings with sightseeing.

Shulkin disclosed last week he traveled to Denmark and England to discuss veterans' health issues. Travel records released by VA show four days of the trip were spent on personal activities, including attending a Wimbledon tennis match and a cruise on the Thames River. The VA said Shulkin traveled on a commercial airline, and that his wife's airfare and meals were paid for by the government as part of "temporary duty" expenses.

A spokesman for VA inspector general Michael Missal described the review as "preliminary."

Shulkin is one of several Cabinet members who have faced questions about travel after Tom Price resigned as health chief.

Curt Cashour, a VA spokesman, said the travel activities had been approved as part of an ethics review.

"The secretary welcomes the IG looking into his travel, and a good place to start would be VA's website where VA posted his full foreign travel itineraries, along with any travel on government or private aircraft," Cashour said.

The site lists Shulkin's travel itineraries but does not detail costs to the government.

[Back to Top](#)

1.2 - FOX News: [Hurricane Maria: VA in Puerto Rico still trying to reach more than 500 homebound vets](#) (3 October, Tori Richards, 32.5M online visitors/mo; New York, NY)

Nearly two weeks after Hurricane Maria roared through Puerto Rico, destroying much of the island's infrastructure, more than 500 homebound at-risk veterans still haven't been reached by doctors, nurses and social workers, Fox News has learned.

There are 1,687 homebound vets in Puerto Rico who require ongoing treatment such as dialysis, chemotherapy and insulin to survive. Since Maria struck Sept. 20, the San Juan VA Medical Center has dispatched special teams consisting of a doctor, nurse and social worker to visit the homes of each one of these vets.

It has been a tough task. Most of the island still lacks power because of damage to the electric grid and intermittent phone service because of downed lines and cell towers. Many rural areas have been rendered inaccessible by damage to roads and the scarcity of gasoline for vehicles.

As of Tuesday, VA officials said visits have taken place at the homes of 1,147 homebound vets. That leaves 540 more to be seen. The VA is vowing to reach the rest but isn't sure how long it will take.

"The safety of all our patients is a top priority," VA spokesperson Mary Kay Rutan told Fox News Tuesday. "We have been going out in the communities where it is safe to do so. Additionally, we are engaged with local shelter operations and other agencies to assist in helping us locate veterans."

One of the visits resulted in a homebound vet who needed more treatment being transported by military helicopter to the San Juan VA, Rutan said.

Another visit brought more insulin to 75-year-old Vietnam vet Miguel Olivera in the hard-hit mountain town of Aguas Buenas, north of San Juan. The Veterans of Foreign Wars in Washington had asked the VA to check on Olivera after learning that he was in danger of losing his last vial of insulin because he had no electricity to keep it refrigerated.

"I'm just happy to hear one veteran is being taken care of." VFW spokesman Joe Davis told Fox News. "I wish there was more that all of us could do for Puerto Rico, it's just terrible down there."

VA whistleblower Joseph Colon, a credentialing official at the San Juan VA Medical Center, said more needed to be done for the island's homebound vets.

"If you are truly in the business of caring for veterans it should not take two weeks to check on all high-risk patients," Colon told Fox News.

Colon also complained that the majority of staff at the San Juan VA had to be sent home last week because the hospital was running out of food, water and diesel fuel for generators.

He also accused hospital leaders of not having a contingency plan to deal with the storm and said the hospital's acting director, Dr. Antonio Sanchez, wasn't around when Maria struck.

"If you know you are going to have problems with water and possibly the electrical grid, why wouldn't you stock up on supplies?" he said. "There is a big new concrete garage next door, they could've put it in there."

As of Monday, the hospital was back at full strength, according to officials.

Rutan defended the hospital's plans for dealing with Maria and the previous one that passed through, Hurricane Irma.

"The San Juan VA Medical Center has comprehensive and well-tested emergency management and operations plans where they have successfully managed numerous hurricanes and other events, including most recently Hurricane Irma," she said.

Rutan also said that Sanchez was at a VA meeting in the U.S. the day of the hurricane and returned as fast as he could three days later.

"He was on the very first available flight to the island on Saturday after the storm," Rutan said. "In his absence, the deputy medical center director and the full incident management team

conducted necessary operations ensuring the safety of more than 300 patients and 800 staff during the height of the storm.”

But Colon said he still questioned why Sanchez wouldn't skip the meeting knowing that a Category 4 storm was bearing down on Puerto Rico.

“He had plenty of time to get back here – was that conference so important?” he said.

1.3 - CNN (Video): [VA Secretary David Shulkin under review for work trip to Europe](#) (3 October, Miranda Green, Rene March, and Gregory Wallace, 29.7M online visitors/mo; Atlanta, GA)

Washington (CNN) - The VA's inspector general is reviewing Veterans Affairs Secretary David Shulkin's July business trip to London and Denmark, which included meetings with Danish and UK officials as well as a stop at Wimbledon.

It's now the fifth investigation into a member of the Trump administration's travel by a department inspector general.

Shulkin joins Environmental Protection Agency Administrator Scott Pruitt, Interior Secretary Ryan Zinke, Treasury Secretary Steven Mnuchin and recently resigned Health and Human Services Secretary Tom Price under scrutiny for the use of private planes, first class travel, military air or flights for possible personal reasons.

Michael Nacincik, spokesman for the VA inspector general's office, told CNN he could not specify who requested the investigation, nor whether the inspector general's office was investigating any other travel by the secretary.

News of Shulkin's July trip abroad, which included a Thames River cruise, was first reported by The Washington Post last week.

Following the report, the Veterans Affairs department posted the trip itinerary online, which showed that Shulkin traveled with his wife and three members of the department, one of whom also brought a spouse. The US government paid for the travel expenses and a per diem for Shulkin's wife, Merle Bari, the Post reported.

Last Friday, HHS Secretary Price resigned after coming under fire for his use of chartered planes for business purposes. Price's departure came as he's being investigated by the department's inspector general for using private jets for multiple government business trips, even to fly distances often as short as from Washington to Philadelphia. The total cost for the trips ran into the hundreds of thousands of dollars.

Interior's Zinke is also being investigated over his travel.

In a statement he gave before giving his policy speech at the Heritage Foundation Friday, Zinke confirmed that he's used private jet travel on three occasions and has flown military aircraft at other times as well.

"Using tax dollars wisely and ethically is a greatest responsibility and is at the heart of good government," he said. "Unfortunately there are some times when Interior has to utilize charter services because we often travel to areas that don't have a lot of flight options."

He called the recent criticism about his use of private jets "a little BS."

CNN's Kevin Liptak contributed to this report.

[Back to Top](#)

1.4 - CBS News: [Veterans Affairs inspector general is reviewing David Shulkin's Europe trip](#) (3 October, Jacqueline Alemany, 26.1M online visitors/mo; New York, NY)

The Department of Veterans Affairs inspector general is reviewing Secretary David Shulkin's 10-day taxpayer-funded trip to Europe in July, during which Shulkin and his wife spent time shopping and sightseeing in Denmark and the U.K.

A spokesman for the VA's Office of Inspector General told CBS News on Tuesday that it is "gathering information and reviewing the recent trip."

Details of the trip, which included visits to Westminster Abbey and Wimbledon, were first reported by The Washington Post. While the trip to Denmark and the United Kingdom was focused on veterans issues, Shulkin and his wife also devoted significant time to leisure activities paid for by U.S. government dollars.

Shulkin joins the list of cabinet members under investigation for travel. Tom Price resigned as Secretary of Human and Health Services last week after coming under fire for extensive use of expensive private jets footed by taxpayers. EPA Administrator Scott Pruitt, Treasury Secretary Steven Mnuchin and Interior Secretary Ryan Zinke are also currently under investigation by their respective agency's inspector generals for travel spending.

Shulkin announced in a statement last week that the VA would be posting all official travel taken since January 20th on the VA website.

"Under this administration, VA is committed to becoming the most transparent organization in government, and I'm pleased to take another step in that direction with this move," Shulkin said in a statement. "Veterans and taxpayers have a right to know about my official travel as secretary, and posting this information online for all to see will do just that."

The itinerary uploaded to the website details conferences on veterans policy and meetings with various government officials but also time carved out of his schedule for extracurricular activities. In London, Shulkin and his wife Dr. Merle Bari attended Wimbledon and visited Buckingham Palace and Westminster Abbey. They also took a cruise down the Thames River followed by "dinner/ evening in Piccadilly Circus" and spent their first day in Denmark visiting various castles throughout Copenhagen.

The website also notes that Shulkin has not utilized private aircraft to date. Curt Cashour, VA Press Secretary told CBS News in a statement, "The Secretary welcomes the IG looking into his

travel, and a good place to start would be VA's website where the VA posted his full foreign travel itineraries, along with any travel on government or private aircraft."

"As the posted information shows, the Secretary has taken no trips on private aircraft," Cashour continued, "and the only government aircraft trips he has taken has been as a guest on the planes of the President, Vice President, or First Lady."

[Back to Top](#)

1.5 - Military Times: [VA names Elizabeth Dole to head caregivers advisory group](#) (3 October, Leo Shane III, 2.1M online visitors/mo; Springfield, VA)

WASHINGTON — Veterans Affairs officials on Monday announced former North Carolina Sen. Elizabeth Dole will chair the department's new family and caregiver advisory committee, formed in response to problems with support programs earlier this year.

The committee, which features a mix of veterans and military caregivers, is charged with advocating for improvements to VA care and benefits services. In a statement, Dole called the work "critical" for the veterans community.

"Military families, caregivers, and survivors are truly our nation's hidden heroes, and make great sacrifices each and every day on behalf of their loved ones, so we must do more to support them on their journey," she said.

Last spring, VA conducted a nine-week review of the department's caregiver program after an NPR report revealed dozens of regional medical centers were cutting back on the number of families receiving caregiver benefits, possibly against program rules.

More than 20,000 individuals are currently enrolled in the department's caregivers stipend program, which awards payouts of several thousand dollars a month to family members of severely injured post-9/11 veterans providing full-time caregiving duties.

In July, VA officials ended the review promising better communication and outreach to families involved. Shulkin has also publicly discussed the possibility of extending the caregiver stipend to veterans of other war generations, but doing so will likely require congressional action.

In a statement Monday, Shulkin said his department "is committed to the delivery of highest quality care and support to our veterans, and recognizes the essential role their families, caregivers, and survivors have every day."

Dole, herself a caregiver to husband Bob Dole, the former U.S. Senate majority leader and a veteran injured in World War II, has been an advocate for military and veteran caregivers in recent years through the Elizabeth Dole Foundation.

Sherman Gillums, executive director at Paralyzed Veterans of America, will serve as vice chair of the committee. The group also includes Lolita Zinke, wife of Interior Secretary Ryan Zinke, who served as a Navy SEAL.

[Back to Top](#)

1.6 - KARE (NBC-11, Video): [VA apologizes to Vietnam vet for ER denial - The Department Of Veterans Affairs has apologized to a Vietnam veteran for repeatedly denying his claim for medical care after KARE 11 reported his story as part of its continuing investigation – a pattern of denial.](#) (3 October, A.J. Lagoe and Steven Eckert, 1.5M online visitors/mo; Golden Valley, MN)

LITTLE CANADA, Minn. - Rockne “Rocky” Waite of Little Canada, Minnesota sat in his living room on September 26th watching his television in disbelief.

“It was like watching my own story,” the 71-year-old former Army Medic recalled.

He was watching a KARE 11 investigative report exposing how veterans are being saddled with medical debt they should not owe – some of it even turned over to collection agencies – after trips to the emergency room.

“It was exactly what happened to me!” Rocky said.

Rocky’s story of wrongful denial began this past July when he needed emergency surgery to remove a large kidney stone.

“The pain just got to be excruciating,” Rocky said. “So, I called VA nurses hotline and asked them what I should do, and they said to go to the nearest facility which was St. John’s Hospital in Maplewood.”

Following his emergency operation in the private hospital, the surgeon told Rocky a stent had been inserted and he needed to get it removed in 10 days.

Following VA protocol, Rocky again called the nurses hotline at the Minneapolis VA to ask if he should go back to the private hospital where he had the surgery, or if he should come into the VA for the procedure?

His VA medical file shows Rocky spoke with a registered nurse who, after consulting with his regular VA physician, instructed him to go back to St. John’s to have the stent removed.

“I took their advice, went, had the procedure done,” Rocky said.

Despite doing exactly what the VA instructed, Rocky received a denial letter in the mail. The VA was refusing to pay for the stent removal, leaving the 100% service connected disabled veteran with the \$1,200 bill.

“What more could I have done?” Rocky asked while throwing his hands in the air. “I did as I was told, I don’t know how else you could do it!”

Rocky’s is not an isolated case.

Current and former VA staffers tell KARE 11 that medical claim processors at the VA are pressured to review complicated files in just minutes.

To meet performance goals, they say it's quicker to deny claims than to take the additional steps needed to approve payments.

"We are accountable for speed," one VA insider told KARE 11 in an exclusive interview. "We were told to pick-n-click and get them moving."

When he appealed his bill rejection, Rocky said he quickly received another denial letter.

Fast forward a few weeks and the frustrated veteran watched as KARE 11's investigation aired.

Rocky emailed his denial records to KARE 11. Investigative Reporter A.J. Lagoe told about Rocky's case during a follow-up broadcast and emailed the Department of Veterans Affairs asking what the veteran, who appeared to have followed all the rules, should have done differently?

VA Press Secretary Curt Cashour responded, "While strict rules and federal law govern when VA can pay for emergency care, we always want to work with veterans on their particular claim(s) to see what VA can do in their case. We will do that in this case."

The next day, Rocky received a voicemail from a VA official apologizing for the hassle he'd been through and stating, "So we'll get that paid for you, probably today."

"What bothers me about this is it is not just one incident," Senator Amy Klobuchar (D-MN) said.

Klobuchar says her office has received a number of similar constituent complaints.

"There are many incidents and usually when a member of Congress starts getting called over and over again it's like the canary in the coal mine. It means there is one, and then there's 10, and then there's 20. It means there's probably thousands across the country, and this means they are having a rule problem, a protocol problem, that has to be fixed!"

The Senator said she would be speaking directly to VA Secretary David J. Shulkin this week about the ER denials uncovered in the KARE 11 investigation.

KARE 11 analyzed two and a half years of VA data and found in the VA MidWest Network, which includes Minnesota, 52% of all ER claims were denied.

As a result, \$65,772,205 in medical bills were forced back onto veterans to pay.

There is no way to determine how many of those veterans got stuck with bills – like Rocky – because of improper VA denials.

"If it hadn't been for KARE 11, I would still have been fighting this battle," Rocky said. "And it could go on for years with these people."

1.7 - WFED (AM-1500, Audio): [Advancing the VA's Community Care Mission: A conversation with Baligh Yehia, Deputy Under Secretary for Health](#) (3 October, 831k online visitors/mo; Washington, DC)

This content is provided by the IBM Center for the Business of Government.

Mondays at 11:00 a.m. & Fridays at 1:00 p.m.

The Business of Government Radio Hour, hosted by Michael J. Keegan, features a conversation with a federal executive who is changing the way government does business. The executives discuss their careers and the management challenges facing their organizations. Guests include administrators, chief financial officers, chief information officers, chief operating officers, commissioners, controllers, directors, and undersecretaries.

SPECIAL REBROADCAST:

What is the mission of VA's Office of Community Care? How is VA enhancing how it provides Community Care? What can VA do better? Join host Michael Keegan as he explores these questions & more with Baligh Yehia, Deputy Under Secretary for Health for Community Care at the US Department of Veterans Affairs.

2. Veteran and Employee Experience

2.1 - The Hill: [VA chief under investigation over European trip: report](#) (3 October, Jacqueline Thomsen, 11.8M online visitors/mo; Washington, DC)

The Department of Veteran Affairs inspector general is investigating Veteran Affairs Secretary David Shulkin over his trip to Europe, CNN reported Tuesday.

Shulkin traveled to London and Demark in July, where he met with officials from both counties.

Michael Nacincik, spokesman for the VA inspector general's office, told CNN that he couldn't say what triggered the probe or if the office was investigating any other instances of Shulkin's travel.

The Washington Post first reported last week that Shulkin spent half of the trip sightseeing and shopping with his wife.

The VA chief was there to attended a conference in London on veterans' health issues and then held a series of meetings in Denmark.

Shulkin reportedly attended a Wimbledon tennis tournament match, toured multiple palaces in London and Denmark and took a cruise on the River Thames in London while on the trip.

The VA head took commercial flights for the trip and reportedly sat in coach on at least one of them, The Post reported.

The investigation into Shulkin is the fifth inspector-general investigation into a member of the Trump administration.

Environmental Protection Agency Administrator Scott Pruitt, Interior Secretary Ryan Zinke, Treasury Secretary Steven Mnuchin and former Health Secretary Tom Price were each probed over their use of private, military or chartered planes.

Price resigned last week over his use of private jets.

[Back to Top](#)

2.2 - Fortune: [Trump's VA Secretary Is the Fourth Cabinet Member to be Caught in a Travel Expense Scandal](#) (3 October, John Patrick Pullen, 7.7M online visitors/mo; New York, NY)

Overshadowed by Health and Human Services Secretary Tom Price's resignation Friday afternoon, Veterans Affairs chief David Shulkin is the latest Trump cabinet member to be found mixing personal trips and expenses with government travel. The VA secretary cruised the Thames, took in sight-seeing at Westminster Abbey, and watched a Wimbledon tennis match during a 10-day European trip with his wife, according to an itinerary obtained by The Washington Post.

The VA secretary's 10-day trip—which also included the department's undersecretary and her husband, Shulkin's chief of staff, an aide, and six security people—was approximately half business, half pleasure, the itinerary reportedly details. The government paid for Shulkin's wife airfare and provided a per diem for her meals because she was traveling on "approved invitational orders," reports the Post.

The Shulkins' July trip was revealed as the personal travel and government expenses of other cabinet officials have also come under scrutiny. In his first three months in office, Environmental Protection Agency chief Scott Pruitt reportedly travelled home to Oklahoma at least 10 times, according to records acquired by a watchdog group. In addition, the EPA is building a \$25,000 soundproof booth for Pruitt, the first agency head to have an around-the-clock security detail.

In August, U.S. Treasury Secretary Steve Mnuchin and his wife reportedly used a government plane to travel to Lexington, Ky. to watch the solar eclipse, a trip that came to light after Mnuchin's wife, Louise Linton boasted on Instagram about traveling with her husband on a government plane. Mnuchin has denied that he took the trip to view the eclipse. He has also said claims about him requesting the use of a government jet during his honeymoon with Linton earlier this year were about national security.

HHS secretary Price's spending has been the most audacious of the cabinet so far. The former Georgia congressman may have taken more than \$1 million in chartered, private jets, according to reporting by the Post. The revelation ultimately led to his resignation on Friday.

As for Shulkin, the VA Secretary is likely hoping Price's exit helps his own spending to fly under the radar. One of few Obama administration holdovers, Shulkin was most recently the VA's undersecretary before being promoted by President Trump. Considering his previous boss and

the current president's unfavorable views of how the VA has been run, Shulkin may now be on thin ice—if he wasn't already.

[Back to Top](#)

2.3 - Washington Examiner: [VA watchdog launches probe of David Shulkin's 10-day European trip](#) (3 October, Gabby Morrongiello, 4.8M online visitors/mo; Washington, DC)

The Department of Veterans Affairs' internal watchdog has launched an investigation into a 10-day, taxpayer-funded trip taken by Secretary David Shulkin and his wife earlier this summer.

Shulkin came under fire last week for the July vacation to Denmark and the U.K., during which he and his wife attended a Wimbledon tennis match, and went shopping and sightseeing.

Though a conference on veterans policy and meetings with foreign officials were included in the trip, much of the secretary's time was spent touring castles in Copenhagen and enjoying a cruise with his wife.

Michael Nacincik, a spokesperson for the VA's Inspector General, told the Washington Examiner on Tuesday the internal watchdog is "gathering information and reviewing the secretary's recent trip." CBS News first reported the investigation.

Nacincik could not say how long the investigation is estimated to take or when it began.

"It really depends on what they find or what they don't find," he said.

Shulkin denied any wrongdoing in a statement last week, and announced that he would make the itinerary from his trip for the public.

"Veterans and taxpayers have a right to know about my official travel as secretary, and posting this information online for all to see will do just that," he said.

"The secretary welcomes the IG looking into his travel, and a good place to start would be VA's website where the VA posted his full foreign travel itineraries, along with any travel on a government or private aircraft," VA press secretary Curt Cashour later told CBS.

News of the IG investigation comes days after Health and Human Services Secretary Tom Price was fired for chartering several private flights on the taxpayer dime.

The Interior Department's internal watchdog also launched an investigation this week into Secretary Zinke's travel, bring the total number of Cabinet officials under investigation by their own agencies to four, including Treasury Secretary Steve Mnuchin and EPA administrator Scott Pruitt.

[Back to Top](#)

2.4 - WXIN (FOX-59, Video): [Veterans voice concerns, outline legislative agenda items at town hall](#) (3 October, Haley Bull, 1.5M online visitors/mo; Indianapolis, IN)

CARMEL, Ind. – Veterans are making sure their voices are heard by state lawmakers and local government officials during a series of town hall meetings across the state.

Tuesday, veterans at a meeting in Carmel raised their concerns and outlined their legislative agenda items for the upcoming legislative session.

"It's really important for the legislators to hear our concerns we have many healthcare being right at the top of the list, also treatment of PTSD as our returning veterans from the global war on terror suicide rates among veterans are at an all-time high," said Steven McDaniel, commander of VFW Post 10003.

Some of the issues veterans raised include support for medical marijuana and ways to help veterans find employment.

But before the town hall, a group of Indiana veterans groups called the Big Four, including the VFW, AMVETS, Disabled American Veterans and the American legion, met to approve a list of their legislative agenda items for the next session.

"We've come a long way veterans contribute a lot to the state of Indiana we're not asking for a handout," said Richard Leirer, the commander for dist. 6 of the VFW in Indiana and legislative chairman.

"We want to make sure we clean up some legislation that was passed this last year in the budget bill with some wording to extend the program for our homeless veterans and for our hyperbaric oxygen therapy treatment for traumatic brain injury," said Lisa Wilken, the legislative director for Indiana AMVETS.

Wilken said they also want to make another run at a bill creating a lottery scratch off ticket to help fund veterans' programs.

"We think we have the support now to get it passed this year," Leirer said.

The next town hall will be held Oct. 17 in Indianapolis.

[Back to Top](#)

2.5 - Fayetteville Observer: [NC congressmen, VA leaders meet in Washington](#) (3 October, Drew Brooks, 439k online visitors/mo; Fayetteville, NC)

Congress members from North Carolina met with Veterans Affairs leaders in Washington on Tuesday, hoping for better communication on problems in the VA system.

Eight House members met with top officials from the VA's Mid-Atlantic Health Care Network, also known as Veterans Integrated Service Network 6, and the leaders from at least three VA medical centers, including Fayetteville's.

The meeting was an introduction of sorts for DeAnne Seekins, who became director of VISN 6 in July. The network includes seven VA medical centers, 27 community-based outpatient clinics and four health care centers, and it is the fastest-growing region within the VA.

Republican Rep. Richard Hudson, whose district includes parts of Fayetteville, said he was impressed by Seekins and other VA leaders.

The discussion was “very candid, very open,” and addressed concerns about delays in VA care, problems within the VA Choice Program and late payments to vendors working with the VA, Hudson said.

“Hopefully it’s the beginning of better communication,” said Hudson, who helped organize the meeting.

Seekins was appointed director of VISN 6 after leading the Durham VA Health Care System for five years. Directors of VA medical centers in Asheville and Durham also attended the meeting.

Fayetteville has the fastest growing patient population in the VA, Hudson said, and it was important for VA leaders and Congress to be on the same page to help address issues that arise with that growth.

“I take very seriously my responsibilities as a voice for veterans in North Carolina,” he said. “I wanted to open better lines of communications.”

The meeting was co-chaired by Democratic Rep. David Price. It included Republican Reps. Robert Pittenger, Virginia Foxx, David Rouzer, Walter Jones and Mark Meadows, and Democratic Rep. Alma Adams.

In the past, members of Congress have had to “start at the bottom and work up” when it comes to VA issues, Hudson said. After the meeting, he hopes there will be a direct line of dialogue at the highest levels of the local VA network.

He said he would like VA leaders to notify the congressional delegation of potential issues or when problems arise. The delegation can be more proactive in helping the VA fix issues that continue to plague the system.

“We both have the same mission — taking care of our veterans,” he said.

VISN 6 officials said the meeting was important to Seekins, who wants to develop relationships with the delegation and learn their concerns.

A spokesman, Stephen Wilkins, said the meeting was not meant to address specific issues, but instead more of a meet and greet.

But Hudson said the delegation was able to ask questions, paying particular attention to access to VA care, the opioid epidemic among veterans, and the Choice program that allows some veterans to seek care outside the VA system.

Several representatives also brought up VA payments. They said veterans are being harassed by collection agencies because the VA is not paying its bills.

Hudson said that while he praises the network's efforts to cut down on wait times, he is lobbying for an expanded Choice program that gives more veterans the ability to go outside the VA.

The Fayetteville VA previously had one of the nation's longest waits for veteran care. In recent months, officials have said those numbers have drastically improved.

"I think we're making progress, but I personally would like to see veterans having more access to private care as an alternative," Hudson said.

Hudson has introduced legislation that would allow any veteran who is at least 50 percent disabled to see whatever doctor they would like.

"I'm just not convinced we can build enough VA facilities to keep up with the growth," Hudson said.

He said that expanded Choice would never destroy the VA. But giving veterans the ability to "vote with their feet" may force the VA to improve its practices.

"Competition will make the VA better," he said. "They care about our veterans but they work within a system that is just strangled with bureaucracy."

The congressional delegation last met with VA leaders earlier this year, after a VA audit found that the network underreported the length of wait times for new patients, and that those seeking care outside of the Department of Veterans Affairs often had long waits or were unable to receive care.

Hudson said the delegation wants to meet regularly with VA leaders.

"I think we all agreed we'd like to have something," he said. He urged veterans in North Carolina who have problems with the VA to contact their Congress representative.

"We'll be their advocate," he said.

[Back to Top](#)

2.6 - Michigan Radio Network: [Ann Arbor VA Hospital employees and vets protest staffing shortage](#) (3 October, Tracy Samilton, 385k online visitors/mo; Ann Arbor, MI)

Ann Arbor VA Hospital employees rallied Tuesday to ask Congress for enough money to eliminate the 49,000 VA job vacancies nationwide. Similar rallies have been held at other VA hospitals nationally in recent weeks.

Ozzie James, Jr. is president of American Federation of Government Employees Local 2092. He says veterans need the expertise of VA doctors, nurses and other staff, because outside health care professionals don't fully understand veterans' needs.

"The promise to take care of the veterans who go fight the war, you're not keeping that promise," says James. "Because you fail to have the staffing that's needed to take care of the veteran when he or she comes home. It's a disgrace to us."

James says the shortage is particularly acute for VA nurses; many cannot take the vacations to which they're entitled because there is no one to fill in for them.

He says the staffing problem predates the Trump administration but has gotten worse under it.

Darcy Guyton-Hanna is a dental hygienist at the Ann Arbor VA. She says the staffing shortage means some veterans have to wait a year for a comprehensive dental exam.

"We are short two dental assistants and one administrative assistant, so they have a lot of the dentists doing paperwork and administrative jobs instead of seeing patients," says Guyton-Hanna.

She says administrators told her there is a hiring freeze so nothing can be done about the situation.

But according to recent comments by VA Secretary David Shulkin, the prospect for more federal money for the VA to boost hiring seems dim. At a press conference in late May, he said, "the problems in VA are not largely going to be solved through additional money. These are going to be solved through management practices, focus, and some legislation changes."

Shulkin said the VA will have a position management system in place by December, so it can track which jobs are open. And the agency plans to expand graduate medical education training opportunities to be able to train more health professionals to stay in the VA system.

He said the VA also plans to work with the Unified Services University -- the medical school of the military -- to train more medical students who then would serve in the VA for 10 years after their education.

[Back to Top](#)

2.7 - Outer Banks Sentinel: [VETERANS POST Will bad employees still linger at VA?](#) (4 October, 23k online visitors/mo; Nags Head, NC)

The Department of Veterans Affairs' new authority to get rid of bad employees is getting a test in Memphis.

An employee at the Memphis VA Medical Center was arrested for aggravated assault with a deadly weapon and criminal impersonation of a police officer. Specifically, she pulled a revolver on a grandmother and a toddler, waving the gun and saying she was the police.

According to the VA, the employee was being processed for removal and has been suspended. What, exactly, does that mean. Taking steps to terminate the employee? Barred from the facility? Told to stay home with pay?

Inquiring minds want to know: Will the Merit Systems Protection Board jump in on this one, too? Long ago the VA tried twice to remove an employee because the hospital kept running out of crucial surgical inventory. The Office of the Inspector General got involved and came up with yet one more reason to get rid of the guy: He'd been sending sensitive VA personnel

information to his personal email account and his wife. The guy was fired, but after the Board got involved, the VA had to rehire him. It took quite a while, but finally he is gone.

This is the same place where a veteran getting care had his vehicle stolen from the parking lot by a VA employee. The veteran had to turn over all his personal belongings when he was admitted ... including his car keys. Within hours, before his wife could retrieve the car, it was gone. Six months later, the veteran saw his car in the parking lot, called police, and they arrested a VA employee when he came out.

So now we watch and wait. Will pulling a handgun on a little girl and her grandmother be serious enough to get rid of the employee? Does the Accountability Act truly have enough teeth to get the job done?

[Back to Top](#)

2.8 - WSAW (CBS-7, Video): [Free benefits expo offered for area veterans](#) (3 October, 196k online visitors/mo; Wausau, WI)

In an effort to serve area veterans, a Wausau expo will offer free service members or dependents of veterans who want to gather information.

The U.S. Department of Veterans Affairs along with the Wausau Veterans Service Office are organizing the event on Thursday, October 5.

To explain what will be offered, Veteran Service Officer, Scott Berger joined the Sunrise 7 team.

From 10 a.m. to 2 p.m. at the East Gate Hall of Marathon Park in Wausau area veterans are encouraged to visit the Wausau Area Veterans Benefits Expo.

Vets can expect to gather information and learn about VA and other community services that they may want to avail themselves to. Also, eligible veterans will be able to get their flu shot.

[Back to Top](#)

3. Access to Healthcare

3.1 - The Hill: [Congress can use the power of pets to help women and vets](#) (3 October, Rep Steve Cohen (D-Tenn.) and Mike Bober, 11.8M online visitors/mo; Washington, DC)

Each year, Congress works hard to pass bills that will help the American people. While acrimony and partisanship have made this more difficult, lawmakers are considering two bills that have bipartisan support on Capitol Hill and among the American people: H.R. 2327 and H.R. 909, the Puppies Assisting Wounded Servicemembers (PAWS), and the Pets And Women Safety (PAWS) Acts of 2017.

Each of these bills involves man's best friend, and both provide for an underserved segment of America. In the case of H.R. 2327, veterans with PTSD and traumatic brain injuries are provided

opportunities for healing through grant-funded service dogs. H.R. 909 expands the number of domestic abuse shelters that can accept pets, in order to help abused women escape domestic violence.

Rep. Cohen is a sponsor of both bills, and PIJAC supports them on behalf of the professional pet care community. Passing these bills now would be a powerful symbol to a public eager for Congress to lead, as National Suicide Prevention Month ends and National Domestic Violence Awareness Month begins.

The House is already taking important steps to help veterans get the companions they need. On Sept. 26, the House Veterans Affairs Committee held a hearing about several bills, including H.R. 2327, that can help servicemembers adjust back to non-combat life. H.R. 2327 has support among myriad veterans' groups, and 200 House co-sponsors. With about 20 veterans committing suicide each day, the PAWS Act is just one way that Congress can improve assistance to America's military servicemembers who return from war with physical and mental scars.

H.R. 909 is likewise an important bill with enormous support. It has 230 co-sponsors in the House and 20 in the Senate. It will provide assistance to many of the approximately one in four women, and one in seven men, who are domestically abused each year.

Studies are clear that in a home where human abuse is taking place, a pet is also often a target. With nearly half of women saying they have returned to an abusive home out of concern for a pet's safety, H.R. 909 is clearly necessary to save lives and prevent more harm to innocent human and animal victims.

The bill provides funds so that abuse shelters can accommodate pets, and extends domestic abuse laws so that courts may require abusers to provide restitution for veterinary costs a victim may incur.

These bills recognize the strength of the human-animal bond. Fully 65 percent of U.S. households have a pet; 88 percent of House and Senate offices allow pets in their offices.

Not only is connecting people and pets good business – with 1.3 million jobs, mostly small business, supported in 2015 alone – it is also great for human health. Just owning a pet saves over \$11 billion in health care dollars each year, according to a conservative study by George Mason University. Other studies show direct links to less stress, better educational results, and improved health for senior citizens.

Whether in Washington, D.C. or Tennessee, pets are everyone's best friend. Congress should use the power of pets to bring people together by passing H.R. 2327 and H.R. 909.

Representative Steve Cohen represents the 9th District of Tennessee. Mike Bober is President of the Pet Industry Joint Advisory Council (PIJAC), which is the legislative and advocacy voice of the responsible pet industry.

3.2 - Dayton Business Journal: [Dayton VA moving clinic to new location](#) (3 October, John Bush, 885k online visitors/mo; Dayton, OH)

The Dayton VA Medical Center is moving its Lima clinic to a larger location this spring.

The Lima Community Based Outpatient Clinic, currently located at 1303 Bellefontaine Ave., will move to 750 W. High St. following renovations.

The project will allow the VA to treat more veterans.

The new clinic will be housed in a professional building on the campus of St. Rita's Medical Center. It is owned by Lima IV Medical Properties LLC, which will hire a contractor to perform renovations after a bidding process.

The clinic will offer more than 1,400 additional square feet compared to the old location — 9,750 square feet versus 8,341. The increase in space will allow for additional nursing clinics, dedicated exam rooms for tele-health and other specialty services, and more parking (about 100 spaces).

It is also located near major roadways such as U.S. 30, state Route 501, Hume Road and Thayer Road.

The new clinic will be designed "to best serve the needs of veterans" by improving access to care, efficiency of facility operations, infrastructure layout, parking and care coordination between all services, according to a press release from the Dayton VA.

The VA stated the relocation was a necessary move, as the number of veterans served at the current Lima CBOC has expanded by 10.5 percent over the past two years.

The Bellefontaine Avenue site will remain open for all existing services until the new location is ready in spring 2018. At that time, veterans' medical information and appointment schedules will be transferred to the new CBOC.

The Lima clinic served more than 4,200 veterans in the last year, with more than 22,000 outpatient visits.

The Dayton VA Medical Center is the third-largest hospital in the Dayton region with \$382 million in net revenue for 2015, according to DBJ research. The hospital has 371 beds and saw about 5,500 admissions that year.

3.3 - Government Executive: [How the VA Is Blocking Marijuana Research Veterans Say Could Save Lives](#) (3 October, Eric Katz, 852k online visitors/mo; Washington, DC)

In 2010, Boone Cutler was taking 30 milligrams of morphine, 70 milligrams of oxycodone and other opioids each day. He regularly went three to four days without sleep. The Army veteran had survived a blast injury while deployed in Sadr City, Iraq, and has since endured seven knee surgeries, five shoulder surgeries and back surgery. He also suffers from Parkinson's Disease.

"I did my time," Cutler says. "I've been beat up a few times."

That year, however, Cutler abandoned his treatment through the Veterans Affairs Department and checked himself into a psychiatric ward at a private hospital, where he quit his prescribed cocktail of opioid painkillers cold turkey. Upon leaving the hospital, a coworker convinced him to try something new for his physical and psychological symptoms: marijuana. He was reluctant, telling his colleague, "I'm not one of those pot heads."

The more he thought about it, the more he realized he had nothing left to lose: "I tried everything," he says. "Nothing worked."

But after trying cannabis, Cutler experienced something for the first time since he returned from Iraq: He slept for five hours.

"I thought it was a fluke. I tried it again, and it happened again," he says. "That was an absolute, 100 percent, 180-degree life changing event for me."

Cutler is part of a growing community of veterans who depend on cannabis to treat post-traumatic stress and pain from service-connected injuries. Some vets returning from combat tours of duty have reported that the drug has reduced nightmares and flashbacks, eased pain and helped eliminate their dependency on opioids. The drug nonetheless remains classified as "schedule one" by the federal government, which it defines as "drugs with no currently accepted medical use and a high potential for abuse." While some studies have examined the potential medicinal benefits of cannabis and a growing number of states have legalized medical and even recreational marijuana, there has never been a federally-approved study of its impact on post-traumatic stress disorder with the potential to change the federal government's scheduling.

Dr. Sue Sisley and the Multidisciplinary Association for Psychedelic Studies are trying to change that. Sisley and the group have worked for 10 years to get their triple-blind study with a placebo on the impact of marijuana on veterans with PTSD off the ground. Sisley's research now has approval from the Food and Drug Administration, the Drug Enforcement Administration and the Health and Human Services Department's National Institute on Drug Abuse, which is supplying the marijuana for the study. The research has finally commenced, and Sisley now has 28 participants in treatment. She will need 76 to complete the study, but she is facing a significant barrier: she is running out of veterans who qualify to participate, and the Veterans Affairs Department is refusing to help her identify more.

Taking Risks

Unlike Cutler's state of Nevada, where marijuana is now legal, Thomas Brennan lives in North Carolina, where the drug remains outlawed in all forms. The Marine Corps veteran who completed tours in Fallujah, Iraq, in 2004 and the Helmand Province in Afghanistan in 2010 felt he had no choice but to set up a cannabis distribution network with a handful of other veterans. While they had the marijuana shipped from Marines they trusted located in other parts of the country, they knew they were putting themselves in jeopardy.

"Veterans know this is better than the alternative and were willing to take the risks to deal with this," says Brennan, who suffers from PTSD.

Brennan also tried to use VA as his primary care provider, but felt shunned after informing his doctors there he used marijuana.

“They treated me like a drug addict when I told them about my cannabis use,” says Brennan, who considers himself lucky because he is now entitled to TRICARE by virtue of being medically retired. “They weren’t willing to help me wean off narcotics.” Brennan, before he started using marijuana, took a mixture of antidepressants, sedatives, amphetamines and mood stabilizers that VA sent him through the mail.

Brennan credits marijuana with saving his life, saying without it, he would have committed suicide.

Blocking Research

VA says it is willing to examine research on medical marijuana.

“There may be some evidence that this is beginning to be helpful,” VA Secretary David Shulkin said in May. “And we’re interested in looking at that and learning from that.”

To veterans like Cutler and Brennan, and service organizations like the American Legion, which is pushing VA to adopt a more lenient position on medical marijuana, the department is standing directly in the way of researchers trying to collect that evidence. The researchers will continue their work even if they cannot sign up a sufficient number of veterans, according to MAPS’ Brad Burge, by opening up the study to anyone with PTSD. Burge said it is unclear if such a study would still be generalizable to the veteran community.

VA, for its part, said it is bound by federal law that prohibits its clinicians from recommending patients for studies involving marijuana. A spokesman blamed Sisley and MAPS for not finding other means to recruit veterans for their research.

“Federal law restricts VA’s ability to conduct research involving medical marijuana, or to refer veterans to such research projects,” said Curt Cashour, the VA spokesman. “If the researcher is truly interested in finding veterans for her study, she should spend more time recruiting candidates and less time protesting to the media.”

Sisley says VA is poorly informed, noting she and her team have been “pounding the pavement” to recruit participants. She has screened more than 4,000 veterans over the last two years, but most of them are not qualified to participate. Veterans enrolled in VA health care are uniquely qualified subjects, she explains, as they are likely to have already attempted other treatment and are less likely to already depend on marijuana.

“If you’re in the VA system, that means you’ve already raised your hand and said ‘I need help,’” Sisley says. She adds the department is being disingenuous when it says it wants to examine more research: “It’s very negligent for VA to be begging for more data, and then refuse to cooperate with the federally legal, FDA-approved study that is happening right in the backyard of a VA facility. They should be ashamed.”

Sisley’s study is not receiving any federal funds. She has a \$2.1 million grant awarded from the state of Colorado, and received the marijuana from a National Institute on Drug Abuse contracted facility at the University of Mississippi (all federally approved research on marijuana

comes from plants grown at that facility). To advocates, VA already has the authority to refer its patients to the study.

"We've been, to no avail, trying to work locally with the hospital director and the [Veterans Integrated Service Networks] director to try to get them to build some kind of bridge, some kind of information bridge between the [researchers] and the VA, and they've just been really resistant to doing that," said Lou Celli, American Legion's VA director. He noted VA's laudable history in research, with its clinicians winning three Nobel prizes.

"The time is ripe for this administration to take the lead on this issue and really come out looking like superheroes," Celli said. "It's not a controversial topic. It's only controversial in their own minds."

The American Legion is hopeful if Sisley's study is completed, and its results are accepted by the FDA, it would just be the tip of the iceberg into researching the possibilities of medical marijuana. Like Brennan and Cutler, he acknowledges cannabis will not cure PTSD for any veteran. The alleviation it does provide, however, enables them to seek further help.

"The most common term I hear is, 'It helps keep the visitors away,' meaning the nightmares, the flashbacks," Celli says. "We don't believe there is any study that will prove cannabis cures PTSD. But what it does do is it relaxes them enough, and it lowers their inhibitions enough to be able to receive counseling and to be able to work through whatever issues that they have."

Sisley says marijuana could help address the epidemic of veteran suicides, and if the plant can save even one life, her research is worth pursuing.

"Please allow science to stop being shackled by VA politics," she says in a plea to the department. Absent such action, the American Legion plans to mobilize its 2 million members to lobby VA and members of Congress to help the study move forward.

Getting Out of Bed

Cutler describes the period of his life in which he was taking an ever-growing opioid cocktail as a "never-ending blackout." He went through cycles in which his tolerance would soar, he would detox, the pain would continue and he would repeat the process all over again. He now takes cannabidiol tablets during the day, which he says have no psychoactive effect, and smokes marijuana at night before going to sleep. Cutler calls the VA "hypocritical" for prescribing addictive opioids, but refusing to even research marijuana.

"You send us to war," he says, "and you deny us medication."

Brennan knows marijuana is not a cure-all. He still takes some prescription drugs. He still has migraines. He is, however, sleeping more easily and for longer. He has seen gradual improvements to his depression, mood and relationships. He no longer feels numb.

"Sometimes," Brennan explains, "the smallest reasons for getting out of bed in the morning are what can make a difference for mental health."

3.4 - WSLs (NBC-10, Video): [Salem VA Medical Center offering free drive-thru flu vaccines, The medical center has opened a drive-thru flu shot clinic on campus.](#) (3 October, Alison Wickline, 815k online visitors/mo; Roanoke, VA)

SALEM, Va. - The Salem VA Medical Center is making it easier for veterans to get their flu shots.

The medical center has opened a drive-thru flu shot clinic on campus. During the whole month of October, between 8 a.m. and 4 p.m., from Monday to Friday, veterans enrolled in the VA system and Salem VA Medical Center employees can receive the vaccine for free.

"For them, it's just a quick and easy process. It's less time-consuming for them because it's a hassle to go into primary care and have a wait time," said Jody Duke, assistant nurse manager for the Salem VA Medical Center.

Veterans are asked to bring their ID card when they visit the flu shot clinic. The clinic is set up in front of Building 1. Staff members say they have given more than 200 vaccines since Monday.

3.5 - JD Supra: [Department of Veterans Affairs Releases Long-Awaited Proposed Rule to Allow Telehealth Services Across State Lines](#) (3 October, Faegre Baker Daniels, 701k online visitors/mo; Sausalito, CA)

On Friday, September 29, the Department of Veterans Affairs (VA) released its long-awaited proposed rule amending medical regulations to improve access to care for beneficiaries regardless of patient or provider locations. Specifically, the rule enables health care providers to provide telehealth services to beneficiaries across state lines in an effort to increase patient access to care. This "modern, beneficiary- and family-centered health care delivery model" – 38 CFR 17.417 – will leverage novel information and telecommunication technologies, such as apps on a patient's phone or computer, to connect patients and providers throughout the country.

The proposed rule provides a concrete outline for how the Trump Administration intends to utilize the increasingly popular telehealth technology to care for veterans. In fiscal year (FY) 2016, VA providers had 2.17 million telehealth episodes serving over 700,000 beneficiaries. While this accounted for only 12 percent of all beneficiaries that sought care from the Veterans Health Administration (VHA), 45 percent of these patients were from rural communities. Telehealth technology is incredibly effective at expanding access to care for patients in remote locations.

As a national health care provider, the VHA must ensure that its beneficiaries all receive an adequate level of care regardless of location at the time which health care services are provided. As the proposed rule notes, a focused effort to ensure beneficiaries in remote, rural or medically underserved areas is necessary to level accessibility to those with on-site services available. Telehealth will improve the ability of the VHA to take these clinical services to beneficiaries in a convenient, cost-effective and institutionally efficient matter. Congressional and Administration-based efforts to date have demonstrated the desire to make this transition,

evidenced by authorization of department-wide initiatives, copayment waivers and pilot programs.

Today, all VHA providers are licensed in at least one state, but are restricted from practicing in states in which they are not licensed. The proposed rule would exercise federal preemption of state licensure and allow licensed providers to provide services, regardless of the patient's location. Previously, VA medical centers have held off on expansion of telehealth services outside of federal property, such as a beneficiary or provider's home, for fear of repercussions. To date, issues arising from disparities between state law and the VA health care practice have impeded the integration of these services. While some states have already begun to regulate the practice of interstate telehealth, the VA would exercise the federal preemption of state licensure, registration, and certification laws, rules and regulations for all VA providers offering telehealth services within the scope of their employment. Furthering the VA's capabilities to provide telehealth services across state lines would allow these providers to treat more patients in a more timely fashion.

The proposed rule is in stark contrast to Medicare rules, which still require patients to reside in certain locations to receive covered telehealth services. VHA could be paving the way for changes to the Medicare program as the benefits to increased access to care, as well as cost-effective care, are demonstrated.

At a time where the country faces the perils of a deadly prescription opioid epidemic, however, the proposed rule is absent of any language around prescribing practices. The rulemaking does not affect the VA's existing requirement for compliance with state regulations on prescribing and administering controlled substances. Health care providers are still required to abide by limitations put forth in the Controlled Substances Act alongside any additional federal regulations that apply to the VA.

Advancing access to health care services for individuals in remote, rural or medically underserved areas will also benefit those dealing with serious mental illnesses, such as anxiety, depression or agoraphobia. Research conducted by the VA in 2016 clearly demonstrates the improvement that telehealth provides in terms of outcomes, especially in the instance of mental health. VA beneficiaries receiving mental health services through synchronous video telehealth saw a 39 percent reduction in acute psychiatric intakes. Data also supports the use of telehealth for the treatment of general or chronic condition management. For those with limited mobility, telehealth offers an alternative to receiving care without the stress of traveling to receive care. For many, receiving care in the comfort of their home may also lead them to take a more proactive role in their health care, thus improving outcomes.

As a part of the proposed rulemaking, VA solicited comments and input from a variety of stakeholders, including the National Governors Association, Association of State and Provincial Psychology, National Council of State Boards of Nursing, Federation of State Medical Boards, Association of Social Work Boards, and National Association of State Directors of Veterans Affairs. Each of these stakeholders, among others, responded favorably to the inquiries and noted their support of the proposed rulemaking.

The proposed rule will be published in the Federal Register on Monday, October 2, with an open comment period lasting 30 days.

3.6 - KRGV (ABC-5, Video): [Local VA Records Show Improvements in Veterans' Wait Times](#) (3 October, Matt Rist and Valerie Gonzalez, 275k online visitors/mo; Weslaco, TX)

CHANNEL 5 NEWS' investigative team looked closer at data behind wait times at the VA Texas Valley Coastal Bend Health Care System clinics.

After scouring through records, we found a downward trend in wait times for returning patients. However, if you're a new patient, you can expect to wait as long as 70 days for care.

The Texas Valley Coastal Bend Veteran's administration booked more than 235,000 appointments for the fiscal year 2017 alone.

That works out to just shy of 30,000 patients churning through the system.

"We have radically changed the access to our patients," said Dr. Jorge Ortegon, Chief of Medicine at the Texas Valley Coastal Bend VA.

He shared what happens if patients face high wait times.

"The health of the patient will deteriorate," said Dr. Ortegon.

CHANNEL 5 NEWS wanted to find out exactly how long VATVCBHCS patients are waiting, so we pulled data from the VA's government website.

As of Sept. 1st, patients waited an average of five days for primary care, five days for specialists and 2.5 days for mental health care in the Rio Grande Valley region.

"Fortunately, we've done a really good job of gaining trust and credibility back with our patients," said VA Texas Valley Coastal Bend Health Care System VA director Joe Perez.

The data showed it's difficult for veterans to get certain types of care in some places.

In July, veterans at a Harlingen clinic waited an average of 13.5 days to see a specialist. The Sept. 1st numbers show improvement; veterans now wait at that clinic just more than 10 days.

Several Corpus Christi and Laredo veterans also faced waits longer than overall averages.

In July, veterans from Corpus Christi waited 10 days to get primary care. In Laredo, it took eight days to see a specialist.

"Our challenge here is having some of these specialties on board," Perez said.

Perez said they streamlined many processes to reduce wait times. He said veterans can directly opt into the Choice Program and choose an outside provider if wait times are clocking over a certain number of days.

If you're a new patient, expect to wait as many as 70 days to get specialty care at the VA.

The following is a breakdown of new patient wait times as of late September:

In McAllen, for primary care, you'll wait an average of 24 days, compared to 16 in the Harlingen clinic and just 12 at its other Treasure Hills location.

According to the records, when it comes to specialized care like gastroenterology, it takes 27 days. To see an Audiologist, you'll have to take a 70-day wait.

Perez said that number is an exception.

"These are really good compared to what I've experienced out in the community," Perez said. "From my own personal experience, if I could have something at 24 days that would be awesome."

Perez said wait times rise when patients miss or forget to cancel appointments. He also said wait times can be a testament to the quality of care they provide.

"We have a number of patients who choose to wait a little bit longer to be seen by us," Perez said. "We do know their background, we can relate to them. A lot of it is by veteran's choice."

Veterans like Hilario Diaz make that choice every day. Diaz said he's satisfied with his experiences at local regional VA clinics.

"Where in the Valley can you go to and you don't have to wait to see a doctor?" Diaz said.

He did not wait long for care.

"It's free. I haven't researched, but I would venture to say there's no other country in the world that does for veterans what the United States of America does," Diaz said.

Army veteran Robert Grandstaff shared a different experience with the VA. He was injured while deployed.

"I need a lot of care, I have a lot of physical injuries, PTSD, chronic back pain," Grandstaff said.

He said he waited long for his first VA appointment in 2013.

"When I first moved here, I asked for an appointment and they told me to wait three to four months," Grandstaff said.

Grandstaff said his injuries force him to seek specialty care.

"Just like other veterans, I'm going to have to find other care," Grandstaff said. "There needs to be some sort of better system, better accountability."

Back in 2016, the local VA was scrutinized after an allegation of altering data to make it look like veterans were waiting less time for appointments.

Perez said it happened at clinics across the country, but it's no longer an issue.

"It was a national initiative to do training and re-training of everybody that had the ability to schedule within our system and that continues annually," Perez said.

The director admits wait times will constantly change. A new patient survey will be a crucial measuring stick to find out how satisfied or dissatisfied veterans are with their care.

If you want to learn more about wait times at VA clinics across the region, you can log on to the VA's website: <https://www.accesstopwt.va.gov/>

There are bi-monthly published reports on government websites which outline wait times and show conflicting information. Perez said the data online is always changing and it can make monthly published reports quickly outdated.

[Back to Top](#)

3.7 - South Bend Tribune: [Our Opinion: A long journey's end for local veterans](#) (3 October, Editorial Board, 273k online visitors/mo; South Bend, IN)

The recent opening of the new St. Joseph County VA Clinic in Mishawaka marked the beginning of a new era for veterans' care locally.

It's been a long journey. Veterans from South Bend, Mishawaka, Elkhart and other local communities have often had to travel to VA facilities in Chicago or Fort Wayne for more extensive medical procedures. Now, patients will be able to receive more services here. As many as 8,000 patients will be receiving services here initially and the VA hopes to grow that number to 13,000 in the next two years.

Work on the clinic began nearly a decade ago when, as a U.S. representative, Joe Donnelly began work on improving veterans' services here with the possible goal of building a new facility. Credit, too, should be given to Jackie Walorski, who has made veterans' issues a priority during her time as Indiana's 2nd District congressional representative.

The VA approved a clinic for the South Bend area and in 2011 Congress appropriated \$6.7 million to build it.

Nearly two years ago, ground was broken for a new 89,000-square-foot clinic. Now, the dream has become a reality.

Veterans will be able to receive a range of offerings at the new clinic that the current clinic on South Bend's Western Avenue doesn't provide: eye and hearing clinics, foot and skin doctors, a cardiologist for consulting (no procedures), prosthetics, physical and occupational therapy and CT scans. Women will have a space for primary care and procedures.

More services will gradually be added.

"It's the culmination of the dedication and determination of the entire community," Donnelly wrote in a Tribune Viewpoint last week, "and it's an example of what we can accomplish when we work together."

Hoosier veterans in northern Indiana now are getting the care they need and a clinic they deserve.

...

Leaders at the South Bend Police Department, who are finding it difficult to recruit and retain officers in this day and age, are trying something different to address the problem.

The Common Council approved a plan by Police Chief Scott Ruskowski to begin a part-time program using retired officers to staff certain positions.

Rather than working patrol beats, retired officers would be assigned to more administrative and less confrontational tasks.

Ruskowski envisions part-time officers handling jobs such as traffic control at Notre Dame football games, taking vandalism and shoplifting reports, traffic enforcement and other "quality of life issues."

The officers would be paid a bit less, but would carry the same weapons and have the same arrest powers as full-time officers. Pending approval by the city's Board of Public Safety, the program could be launched by spring.

Statewide, the only other known city department to operate such a program is Danville, a small community west of Indianapolis.

South Bend's plan to use retired officers is a creative way to address its personnel shortage. That kind of resourcefulness is what's needed to attract new officers to the city, retain current ones and maintain the level of public safety this community deserves.

[Back to Top](#)

3.8 - KRTV (CBS-3): [VA gearing up for Drive Thru-Flu Clinic and Health Fair](#) (3 October, Eric Jochim, 195k online visitors/mo; Black Eagle, MT)

Staff at the VA are gearing up for their Annual Drive Thru-Flu Clinic and Health Fair.

Tomorrow from 7 am to 5 pm free Flu shots will be available for to all enrolled Veterans and VA employees.

If a veteran isn't enrolled with the VA staff will be on hand to assist with the process.

Last year at the event the clinic administered over 500 flu shots.

Registered Nurse Katie Temple urges the public to get their flu shot sooner than later.

"Up to 20% of the population actually gets influenza every year and the elderly and the young are really prone to get hospitalized from influenza," said Temple.

The clinic will also offer health promotions, disease prevention, suicide awareness, and hepatitis C screenings.

According to VA staff baby boomers are 5 times more likely to test positive for hepatitis C than any other age group.

The county health office will also be in attendance from 8:30am to 3 pm, to provide flu shots to family members for a small fee.

[Back to Top](#)

3.9 - Healthcare-Informatics: [VA Issues Proposed Rule to Allow Home-Based Telemedicine for Veterans](#) (3 October, Heather Landi, 158k online visitors/mo; New York, NY)

The U.S. Department of Veterans Affairs (VA) issued a proposed rule this week that would allow VA healthcare providers to provide medical care via telehealth across state lines and regardless of the location of the provider of the beneficiary.

The VA says the proposed rule would increase the availability of mental health, specialty and general clinical care for all VA beneficiaries. “Just as it is critical to ensure there are qualified health care providers on-site at all VA medical facilities, VA must ensure that all beneficiaries, specifically including beneficiaries in remote, rural or medically underserved areas, have the greatest possible access to mental health care, specialty care and general clinical care,” the proposed rule states. “Thus, VA has developed a telehealth program as a modern, beneficiary- and family-centered health care delivery model that leverages information and telecommunication technologies to connect beneficiaries with health care providers, irrespective of the state or location within a state where the health care provider or the beneficiary is physically located at the time the health care is provided.”

Further, VA officials stated, “By providing health care services by telehealth from one state to a beneficiary located in another state or within the same state, whether that beneficiary is located at a VA medical facility or in his or her own home, VA can use its limited health care resources most efficiently.”

VA will accept comments on the proposed rule through Nov. 1.

For fiscal year (FY) 2016, VA health care providers had 2.17 million telehealth episodes of health care (meaning a clinical encounter or a period of time in which care was monitored), which served over 702,000 veterans (approximately 12 percent of the total patient population), with 45 percent of those veterans living in rural communities. By increasing VA’s capabilities to provide telehealth services, VA would be able to expand these services, the agency said in the proposed rule.

While telehealth enhances VA’s capacity to deliver health care services to beneficiaries located in areas where health care providers may be unavailable or to beneficiaries who may be unable to travel to the nearest VA medical facility for care because of their medical conditions, the agency states that in order to protect VA health care providers from potential adverse actions by states, many VA medical centers (VAMC) are currently not expanding some critical telehealth services if the health care service is provided outside federal property, or across state lines.

In addition, many individual VA health care providers refuse to practice telehealth because of concerns over states taking action against the health care provider’s state license, state laws, or

the shifting regulatory landscape that creates legal ambiguity and unacceptable state licensing risk, the VA stated in the proposed rule. “The current disparities between VA health care practice in telehealth and state laws have effectively stopped or inhibited VA’s expansion of telehealth services to certain locations, thereby reducing the availability and accessibility of care for beneficiaries,” the VA stated.

This proposed rulemaking would clarify that VA health care providers may exercise their authority to provide care through the use of telehealth, notwithstanding any state laws, rules, or licensure, registration, or certification requirements to the contrary. In so doing, VA would exercise federal preemption of state licensure, registration, and certification laws, rules, regulations, or requirements to the extent such state laws conflict with the ability of VA health care providers to engage in the practice of telehealth while acting within the scope of their VA employment.

The VA notes in the proposed rule that the changes would improve VA’s ability to provide mental health services to veterans. Veterans who received mental health services through synchronous video telehealth in fiscal year 2016 saw a reduction in the number of acute psychiatric VA bed days of care by 39 percent, the VA reports.

Another benefit of expanding VA telehealth includes serving a recruitment incentive for VA healthcare providers and allowing VA to address recruitment shortages, the agency states. In Charleston, South Carolina, the South Carolina VAMC serves as one of the VA’s National TeleMental Health Hubs and provides mental health services to veterans across eight states with a team of 30 full-time healthcare provides. The VA notes there are currently multiple vacancies for TeleMental Health psychiatrists at the Charleston Hub, and “in the past six months, applicants have only expressed interest in telework positions.”

The American Medical Association (AMA) released a statement supporting the expansion of clinically validated telehealth services within the VA, and stated that “this decision ensures that important patient protections are in place for the delivery of high quality and reliable care.

“The VA has a unique federally controlled healthcare system with essential safeguards to help ensure that both in-person and virtual beneficiary care meet and exceed the standard of care. The AMA strongly supports that the proposed rule explicitly provides that this program’s multi-state licensure exception applies only to VA-employed providers and would not be expanded to contracted physicians or providers who are not directly controlled and supervised by the VA and would not necessarily have the same training, staff support, shared access to a beneficiary’s EHR and infrastructure capabilities. We applaud the VA’s expansion of telehealth services in a manner that promotes quality and access,” the AMA stated.

[Back to Top](#)

3.10 - Gatehouse Media: [VA’s chief surgeon envisions center of excellence in Fayetteville](#)
(3 October, Amanda Dolasinski, 74k online visitors/mo; Fayetteville, NC)

Dr. Lynn Weaver was a part of integration in Knoxville, Tennessee, but bullies were no match. His distinguished career now comes to Fayetteville’s VA Medical Center.

Fifty-three years ago, a young Lynn Weaver walked into his new classroom at West High School in Knoxville, Tennessee, ready for lessons, but honestly more interested in the football field.

He and a dozen other black students were the first to integrate into the school.

"I got stomach cramps every morning just thinking about going to school," Weaver said. "I stopped eating breakfast."

The daring move led Weaver to second-guess his abilities. But the 14-year-old student who was constantly targeted by racist teachers and bullies would not only ace his classes, he also became one of the top Veterans Affairs surgeons.

In February, Weaver was named the chief of surgery at the Fayetteville Veterans Affairs Medical Center. Weaver, who completed his residency while serving 13 years in the Army, most recently worked as the senior associate dean and chairman of surgery at Ross University School of Medicine in Dominica.

Gregory Antoine, the medical center's chief of staff and a longtime friend, enticed him to take over the surgery department in Fayetteville, Weaver said. The men were stationed together at Fort Campbell, Kentucky.

The VA has been finding ways to work with Womack Army Medical Center on Fort Bragg, and is looking into ways to work with Wake Forest University and the University of North Carolina at Chapel Hill, he said.

"I liked the picture he envisioned for patients," Weaver said. "You can put together a center of excellence right here in Fayetteville."

Weaver's career began to take shape when he was a high school student in Knoxville. That's when learning became a spiteful act, and he learned as much as he could, he said.

Weaver was a constant target of racist teachers, who put his desk in the back corner of their classrooms, he said. And of the students and parents who crowded him on the football team, intimidating him.

With failing grades in all of his seventh grade classes, Weaver questioned if he was smart enough to be in the school.

"I started to think I am dumb," Weaver said. "Maybe I don't belong."

Then Edward Hill, his science teacher, knocked on the door at his family's home.

"He said, 'I heard you're having problems,' " Weaver recalled. "I said, 'Yeah, they're trying to run me away.' "

Hill, a black teacher, set up private tutoring lessons for Weaver after school and on Saturdays.

"I was able to pass the semester," Weaver said. "After they got through tutoring me, learning became a spiteful activity. I needed to show I belong and I was as smart as everyone else."

Hill encouraged Weaver to compete in the Southern Appalachian Science Fair that year. Weaver, not thrilled about yet another activity that would cut away at his time practicing football, conceded when Hill paid another visit to his home and spoke with his parents.

For three days, Weaver dressed up in a jacket and tie and stood next to his project at the science fair. The other contestants, mostly white students, ignored him and didn't speak to him, Weaver said.

His project was simple compared to the other students. He set out to prove why asbestos was a good insulator; it is now a known carcinogen.

A group of men stopped at his project and Weaver was so excited someone wanted to talk to him. He rattled off all the details of his experiment.

Unbeknownst to him, they were the judges — and they would later name him grand champion.

"I was the first black student to win," Weaver said, smiling at the memory. "It was a huge deal in Knoxville."

His win caught the attention of bullies, Weaver said. He had a brief brush with being a "bigger thug than they were," Weaver said.

Then he decided to get back on track, dedicating his life to making his father and Hill proud.

He hadn't given college much thought, but didn't question when he received a scholarship to Howard University. Years later he learned he received that scholarship because Hill applied for it on his behalf.

Weaver would go on to complete his residency training in general surgery at Fitzsimmons Army Medical Center in Denver, Colorado, and residency at Madigan Army Medical Center in Tacoma, Washington. He served in the Army from 1974 to 1987, when he was a major.

"As far as being a surgeon in the Army, you're not trying to make money," Weaver said. "You're there to take care of the soldiers. I really enjoyed my time in the Army."

As Weaver winds down his busy career, he said he's happy to be in Fayetteville, taking care of soldiers.

"I thought it'd be great to end my career in a place with a lot of soldiers and veterans," he said. "I've made a difference, I hope."

3.11 - Salem News: [Walgreens to offer flu shots for vets](#) (3 October, Larry Shields, 68k online visitors/mo; Salem, OH)

For the first time, the Veterans Administration is partnering with the Walgreens drug store chain to provide flu shots for all veterans, Rod Hughes, commander of AMVETS Post 45, said.

The shots will be given from 11 a.m. to 5 p.m. Oct. 14 at the AMVETS Post 45, 750 S. Broadway Ave., in Salem.

“The VA teamed up with Walgreens this year so we are providing a place for flu shots for all vets in the VA,” Hughes said, adding that, “their spouses are also able to get shots that day with current insurance.”

The Columbiana County Veterans Service Commission will also have representatives available for veterans who are not registered and veterans can speak with them about what services and benefits are available to them.

Any veteran who is unsure if they are registered should bring their DD-214 form. The shots will be at no cost to veterans with proof of registration.

Hughes said Walgreens will provide pharmacists and the necessary personnel to fill out paperwork to the post.

Privacy laws under the Health Insurance Portability and Accountability Act of 1996 (HIPAA) will be followed Hughes said.

“Our members are aware of the flu shot program this year,” Hughes said, “but possibly not all veterans.”

AMVETS Post 45 has a combined membership of 800 regular, auxiliary and Sons of AMVETS members.

The VA system includes the Youngstown and Calcutta outpatient clinics along with Brecksville and Wade Park hospitals.

3.12 - KGVO (CMN-1290, Audio): [Montana Veteran Affairs Talks With Veteran's Heartbeat About Recent Suicide Numbers](#) (3 October, Nick Chrestenson, 20k online visitors/mo; Missoula, MT)

Veteran's Heartbeat – On the Pulse of the Veteran is a weekly half hour talk show devoted to issues of hope, health, opportunity and well-being of veterans. Join us on KGVO 98.3 FM every Saturday morning at 8:30 a.m. The show is brought to you by the Rural Institute for Veteran's Education and Research and they are on a mission. When veterans encounter obstacles to health and well-being, RIVER is there to help. RIVER provides training to the veteran's community for outdoor recreational therapists and emergency medical technicians, plus medical services and cutting edge research projects. If you are a veteran or veteran's family, contact RIVER at riverofchange.org.

For episode 32 of Veteran's Heartbeat, we spoke with Juliana Hallows and she is the Suicide Prevention Coordinator with Veteran Affairs Montana.

3.13 - KTVH (NBC-12): [Drive-thru flu shot clinic offers vets and others convenient option](#) (3 October, John Riley, 2.3k online visitors/day; Helena, MT)

Over 550 Veterans received their Flu immunization on Tuesday at the Fort Harrison along with community members and VA staff.

VA Montana staff braved the cold temperatures outside to kick off the flu season with the annual Fall Health Festival and Drive-Thru Flu Clinic.

The shots were free for enrolled veterans and VA employees. County Health Department were on hand to supply flu shots for a fee for everyone else.

People 65 years and older, young children and people with certain health conditions are at higher risk for serious flu complications.

Each year around 200,000 people are hospitalized and around 32,000 people die from Influenza. Health experts say best way to prevent the flu is by getting vaccinated each year.

Veterans attending the event said that they love the ease of the clinic considering they didn't even have to leave their vehicles.

"I've never had to wait long," said veteran Louie Stiles, "When I was doing it privately getting these private shots they'd just take a lot of time, this doesn't."

If you are an enrolled veteran and missed the clinic you can still get your shot at the VA Medical Center.

3.14 - Interlochen Public Radio: [In Michigan, veterans commit suicide at high rate](#) (3 October, David Cassleman, 900 online visitors/day; Interlochen, MI)

The suicide rate for Michigan veterans is more than twice as high as the state's overall rate, according to data released by the U.S. Department of Veterans Affairs last month.

The analysis shows more than 200 veterans killed themselves in Michigan in 2014 – the most recent year covered by the study.

Michigan's rate of 35.5 suicides per 100,000 veterans is slightly less than the national rate of 38.4. The rate for all Michigan residents is 16.9.

Dr. Nazzareno Liegghio, the chief of mental health at the Saginaw VA medical center, says it can be difficult for veterans to travel to get mental health treatment.

“In Michigan I think the biggest challenge is just our huge space and area,” Liegghio says, “and the location of veterans between the upper part of lower Michigan and Upper Peninsula.”

The suicide rate is especially high among young Michigan veterans. Only Oklahoma had a higher rate than Michigan for veterans aged 18-34.

Liegghio says young veterans are at risk when they transition out of the military.

“Usually they enlist around 18, 19, so they get out, they’re 23, 24,” Liegghio says. “They come home. They have a little time to adjust. And then all of a sudden they find themselves, ‘okay, now what do I do?’”

Nationwide more than two-thirds of veterans who commit suicide are aged 50 or older.

The analysis shows 20 veterans commit suicide each day in the United States.

6.1 - WXIN (FOX-59, Video): [Researchers at IUPUI using dogs to sniff out prostate cancer](#)
(3 October, Nick McGill, 1.5M online visitors/mo; Indianapolis, IN)

Scientists at IUPUI are hoping man’s best friend can help solve one of man’s biggest problems.

Recently, a study in Italy found that dogs have the ability to smell and detect certain odors in urine that are associated with prostate cancer with 98% accuracy. A team at IUPUI, led by Dr. Mangilal Argawal, is hoping to replicate that process and develop an early screening method.

“If we can find that smell in prostate cancer from urine, it can really change the way we diagnose prostate cancer right now,” Argawal said.

Partnering with the Roudebush VA Medical Center, Argawal says his team has potentially identified molecules that could be the key to the “odor test.”

The team is working with dog training service “Medical Mutts” to verify their work. The hope is then to create a sensor that can detect the odors. Argawal says it would work similar to a “pregnancy test for prostate cancer.”

“So if you can make a sensor that is as accurate as a trained dog that can sniff prostate cancer from urine at 98% accuracy, then you are completely changing the field,” he said.

Argawal says current tests for prostate cancer screening can be inaccurate and lead to unnecessary and painful biopsies, a fact that can deter many men from seeking the tests. Argawal says if his team is successful, it would eliminate those problems.

“You can do the test in a clinic, you could do the test at home, same day results, and same day discussion with you doctor. So there are a lot of advantages to having accurate tests that avoid biopsies,” he said.

Argawal says so far the results of his team’s work are promising. He says they may be about four years away from finishing their study, developing a sensor and clearing clinical trials. However, he added that four years in “medical time” is relatively quick.

7. Supply Chain Modernization

7.1 - Forbes: [Use It Or Lose It -- Trump's Agencies Spent \\$11 Billion Last Week In Year-End Spending Spree](#) (3 October, Adam Andrzejewski, 29.8M online visitors/mo; Jersey City, NJ)

Every September, the end of the fiscal year sparks a “use it or lose it” spending frenzy as federal agencies race to use up what’s left in their annual budgets. It’s a phenomenon that should drive taxpayers crazy. Agencies are afraid that if they spend less than their budget allows, Congress might send them less money in the next year. Agencies often try to spend everything that’s left instead of admitting they can operate on less.

Here are the top ten ways the government wasted taxpayer money in the last week of FY2017:

[...]

5. Insect and Rodent Control at the VA – The federal government did some end-of-the-year cleaning, paying \$152.5 million in “housekeeping” bills. While agencies paid \$114 million to guards and facilities operations support, they also signed for custodial janitorial (\$24.3 million); laundry and dry cleaning (\$2.9 million); surveillance (\$2.7 million); trash and garbage collection (\$1 million); carpet cleaning (\$630,943); interior plantscaping (\$154,458); and snow removal/salt (\$127,373). “Housekeeping” contracts included insect and rodent control, which cost \$111,000 at the Department of Veterans Affairs.

6. Redecorating Allowance – For the new fiscal year, many federal agencies decided to redecorate. In one week, the government spent \$83.4 million on furniture plus another \$23 million on office supplies and equipment. The Department of Veterans Affairs spent \$15.6 million on new office furniture including \$4.7 million to a veteran-owned company, American Veteran Office Furniture, LLC. The largest furniture contractor across all agencies, however, was Knoll, Inc. (\$6.2 million) – a luxury furniture company that has 40 pieces permanently displayed in the American Museum of Modern Art in New York City.

7. Self-Promotion (PR) Machine – The government spent tens of millions of dollars on last-minute self-promotion. Agencies spent \$18.6 million on public relations, \$11.7 million on market research and public opinion, and \$5.5 million on communications. Further, \$28.8 million went to advertising efforts – the Department of Homeland Security spent \$15 million on advertising, including a \$6.7 million deal with Lempugh, Inc., and a \$4 million contract with the Ogilvy Group. Further, the Department of Veterans Affairs spent \$3.2 million on signs and advertising displays with S2 Ventures, LLC.

[...]

In the midst of the government's year-end spending spree, Senator Rand Paul (R-KY) introduced the Bonuses for Cost-Cutters Act to curb "use it or lose it" spending. Paul's bill would expand current law to pay bonus happy bureaucrats who identify unneeded or surplus funds and redirect 90 percent of those savings to deficit reduction.

The private-sector uses zero-based budgeting - where all expenses need to be justified from the ground up and every function within an organization is audited for cost. As a businessman, the president should know this.

Whether it's passing legislation or finding another way to address this taxpayer abuse, Congress needs to crack down on "use it lose it" spending. When agencies engage in this wasteful practice, we all lose.

Adam Andrzejewski (say: Angie-eff-ski) is the Founder and CEO of OpenTheBooks.com – a national transparency organization with a database of 4 billion federal, state and local expenditures.

[Back to Top](#)

7.2 - EHR Intelligence: [VA to Award Cerner EHR Implementation Contract Within 30 Days, The federal agency will migrate or abandon 240 of its 299 other IT projects to allocate funding toward the Cerner EHR implementation.](#) (3 October, Kate Monica, 50k online visitors/mo; Danvers, MA)

VA Secretary David Shulkin announced the federal agency will award its EHR implementation contract to Cerner Corporation in the next thirty days.

The announcement came during the recent Senate Veterans Affairs Committee hearing last week. The new VA EHR system will operate on a similar platform as the Department of Defense (DoD) EHR system—MHS Genesis—in an effort to improve interoperability between agencies.

"We released to Congress—to you—30-day notice of award of a contract," said Shulkin. "We are keeping on the timeline that we talked about. We're marching forward. We have the principles. I have some updates to share with you on the strategic IT plan, because I think we are making a lot of progress with that."

In June, three senators submitted a letter to Shulkin and DoD Secretary James Mattis requesting more information about the Cerner EHR replacement, as well as a projected timeline.

Senators John McCain (R-AZ), Johnny Isakson (R-GA), and Jerry Moran (R-KS) emphasized the importance of an efficient integrated health system.

In this most recent discussion of the upcoming project, Shulkin stated part of VA's strategic plan will involve phasing out 80 percent of VA's other projects currently in development. The federal department will migrate or cease work on 240 of its 299 projects.

"By concentrating on some specific IT modernization initiatives, like [electronic health record modernization, financial management business transformation], etc., and leveraging cloud and digital platforms, the 80 percent reduction of ongoing development projects is expected to occur within 18 months, which is part of the overall IT modernization roadmap," VA Press Secretary Curt Cashour told Federal News Radio in an email.

VA has not stated how much the Cerner EHR implementation will cost. However, the VA IT office must contend with the \$215 million budget cut in the President's fiscal 2018 proposal. An appropriations bill for 2018 designated \$78.6 billion in discretionary funding for VA healthcare modernization and improvements.

In an effort to better utilize funds, a source close to the department stated VA is ceasing development on less pressing projects and instead allocating those funds to the new Cerner system.

While VA has not released any information about how much the system will cost, the federal department has outlined its priorities for the new Cerner EHR and indicated other tools necessary to optimize the system.

"We haven't gotten to defining which specific tools they are yet, and how we're going to meet those needs," Shulkin said. "We've talked about the days of VA being a software developer are over, and we're going to be looking at off the shelf, current technologies. There's going to be a lot more definition on that."

Shulkin also emphasized the need for experienced political leadership and assistance from the private sector to offer guidance during the implementation process.

"This is a big, complex organization," Shulkin told reporters following the hearing. "I need the best team possible. I need my nominees, all my political appointments to clear through the vetting process and then to go through their confirmation if it's required. And I need additional people from the private sector who want to come and serve their country to get in touch, because we need the A team on this."

Toward this end, Cerner created an Advisory Group last month to offer insights and recommendations during the EHR modernization that includes former government, military, and private sector leaders.

"Our Veterans deserve continuous access to their medical records while in the service and afterward, whether they are seen in VA or a private health care system," said former Nebraska

Senator and Governor Bob Kerrey, who will chair the group. “I received years of treatment from VA and have firsthand experience with the challenges veterans often face when receiving care.”

Other members of the group include Former VA CEO and Assistant Secretary of Information and Technology Roger Baker and former National Coordinator and Acting Assistant Secretary for Health Karen DeSalvo, MD.

7.3 - ExecutiveGov: [Report: VA Inches Closer to Cerner EHR Devt Contract Award](#) (3 October, Jane Edwards, 20k online visitors/mo; Tysons Corner, VA)

The Department of Veterans Affairs expects to award Cerner a contract to build a new electronic health record system for VA as early as this month, Federal News Radio reported Friday.

VA Secretary David Shulkin told members of the Senate Veterans Affairs Committee at a hearing Wednesday that the department issued to Congress a 30-day notice of contract award for the new EHR platform.

His statement came months after he announced plans in June to issue a direct solicitation to Cerner to implement the same EHR system – MHS Genesis – that the Defense Department currently deploys.

VA Press Secretary Curt Cashour told the station in an email that the department will end 80 percent of its ongoing information technology development projects over the next 18 months as part of VA’s IT strategic plan.

A source said the agency’s move to reduce its current projects seeks to help fund the implementation of the new EHR system, the report added.

Cerner collaborates with Leidos and Accenture as part an industry team that won a potential 10-year, \$4.3 billion contract in 2015 to help DoD integrate a commercial EHR platform across the Military Health System.

8.1 - The Washington Post (AP): [Tennessee mail carrier sentenced for stealing opioids](#) (3 October, 43.9M online visitors/mo; Washington, DC)

GREENEVILLE, Tenn. — A Tennessee mail carrier who pleaded guilty to stealing at least 33 packages of medications intended for veterans has been sentenced to probation.

The Kingsport Times-News reports that Bronson Cobble was sentenced last week to three years' probation and ordered to pay \$1,154 in restitution following his June plea to one count of theft of mail.

Prosecutors in a sentencing memorandum recommended a bottom-range sentence, saying his admission of guilt and request for court-appointed counsel makes him unlike most defendants and suggests a low risk of recidivism.

Court records state that between August 2016 and March, Cobble stole the packages mailed from the U.S. Department of Veterans Affairs to patients in East Tennessee and used the narcotics himself because of a severe opioid addiction.

[Back to Top](#)

8.2 - The Buffalo News: [Alden companies accused in fraud case agree to pay \\$3 million](#) (3 October, Phil Fairbanks, 1.6M online visitors/mo; Buffalo, NY)

An Alden company used a figurehead to qualify for contracts set aside for disabled veteran-owned small businesses and on Tuesday agreed to pay \$3 million to settle a whistleblower's lawsuit, according to federal prosecutors.

The monetary settlement ends a civil suit that accused Zoladz Construction Company, Arsenal Contracting LLC and Alliance Contracting, all of Alden, of recruiting a service-disabled veteran to serve as a front for Arsenal, a sham company controlled by two other individuals.

Those two men, John Zoladz of Darien and David Lyons of Grand Island, also were named in the suit and in the agreement settling allegations that they violated the federal False Claims Act. Neither Zoladz nor Lyons is a service-disabled veteran.

The government, in its suit, claimed Arsenal was a front company that had few employees of its own and relied almost exclusively on Zoladz Construction and Alliance to operate.

"Every time an ineligible contractor knowingly pursues and obtains such set-aside contracts, they are cheating American taxpayers at the expense of service-disabled veterans," said acting Assistant Attorney General Chad A. Readler in a statement.

A woman answering the phone at Zoladz said the company would not comment.

The scheme that Zoladz and Lyons carried out included false statements regarding Arsenal's qualifications for the small business program to the U.S. Department of Veterans' Affairs.

"The multi-million dollar civil judgment ensures that those involved pay a heavy price for their decision to divert to themselves resources intended for the benefit of those who have made supreme sacrifices on behalf of all," said acting U.S. Attorney James P. Kennedy.

The settlement also resolves a whistleblower lawsuit filed in 2011 by the Western New York Foundation for Fair Contracting, a labor-management group acting as watchdog on public contracts.

Under the settlement, the foundation will receive \$450,000.

“The contracting companies and principals allowed greed to corrupt a federal process intended to benefit service-disabled, veteran-owned small businesses,” said Special Agent in Charge Adam S. Cohen of FBI Buffalo Field Office.

The settlement is the result of investigation by the FBI, Assistant U.S. Attorney Kathleen A. Lynch, the VA Office of Inspector General and the Small Business Administrations's Office of Inspector General.

1 October 2017

[1. Top Stories](#)

1.1 - Washington Times (AP): [Prosecutors: Veteran Threatened to Kill Congressman, Staff](#) (30 September, 24M online visitors/mo; Washington, DC)

Federal prosecutors say a New Jersey veteran who suffers from post-traumatic stress disorder threatened to assault and kill a congressman and the lawmaker's staff. Joseph Brodie allegedly made the threats via telephone and email on Sept. 15 and 19.

[Hyperlink to Above](#)

1.2 - Portland Press Herald: [Maine veterans given substandard care are told it's too late to sue](#) (1 October, Edward D. Murphy, 2.1M online visitors/mo; Portland, ME)

After crushing her ankle in a fall during ropes training at Fort Leonard Wood in Missouri, April Wood for years sought relief from the pain she endured after leaving the Army in 2004. Doctors with the Department of Veterans Affairs ultimately determined that the only way to get rid of her pain was to amputate her leg a few inches below the knee.

[Hyperlink to Above](#)

1.3 - The Day: [VA groups, services tackle high suicide rates among female veterans](#) (30 September, Julia Bergman, 440k online visitors/mo; New London, CT)

Female veterans are committing suicide at 250 percent the rate of female civilians, according to the Department of Veterans Affairs. In Connecticut, at least 10 of the 50 veterans who committed suicide in 2014, the most recent data available, were women. And that's only counting veterans receiving care at the VA.

[Hyperlink to Above](#)

1.4 - ESPN: [Sean Doolittle on Bruce Maxwell, respecting veterans and defining patriotism in a polarized America](#) (30 September, Jerry Crasnick, 429k online visitors/mo; Bristol, CT)

Long before Oakland Athletics catcher Bruce Maxwell took a knee in protest during the playing of the national anthem last weekend, Sean Doolittle was giving sincere thought to patriotic displays at baseball games and the surrounding symbolism.

[2. Veteran and Employee Experience](#)

2.1 - FOX News: [Creators of lifesaving body armor, artificial pancreas among federal workers honored](#) (30 September, Joseph Weber, 32.5M online visitors/mo; New York, NY)

Rory Cooper, a Department of Veterans Affairs researcher, received a Sammie for designing wheelchairs and other assistive technology equipment that has improved the mobility and quality of life for hundreds of thousands of disabled veterans and other Americans.

[Hyperlink to Above](#)

2.2 - The Hill: [Trump's Cabinet and charter flights: What we know and don't know](#) (30 September, Nathaniel Weixel, 11.8M online visitors/mo; Washington, DC)

Health and Human Services Secretary Tom Price resigned Friday following a series of public rebukes from President Trump and GOP lawmakers over his repeated use of charter and military aircraft, at public expense, for official travel. Price is far from the only Cabinet member to take private flights however, so his resignation isn't likely to stem the controversy.

[Hyperlink to Above](#)

2.3 - Sun Herald: [Cruise-in to salute veterans goes back to its roots with return to Centennial Plaza](#) (30 September, Scott Hawkins, 858k online visitors/mo; Gulfport, MS)
One of the most meaningful and memorable events at Cruisin' The Coast each year is the Salute To Our Veterans cruise-ins. "The whole purpose is to have the vets enjoy the cars," said Woody Bailey, executive director of Cruisin' The Coast.

[Hyperlink to Above](#)

2.4 - Herald-Mail Media: [Cruise-in unites community, veterans in common passion](#) (30 September, Richard Belisle, 158k online visitors/mo; Hagerstown, MD)
The main parking lot at the VA Medical Center shined bright in paint and chrome from a hundred sport and muscle cars, street rods, vintage Detroit autos and trucks lined up for Saturday's annual Country Roads Car Club Cruise-in. This was the third year for the event.

[Hyperlink to Above](#)

2.5 - Little India: [Undersecretary Poonam Alaigh Caught Up in Veterans Affairs Travel Scandal](#) (30 September, 44k online visitors/mo; Torrington, CT)
Acting Undersecretary Poonam Alaigh and her husband accompanied Veterans Affairs chief David Shulkin and his wife on a 10-day trip to Europe in July this year, which is being criticized as a taxpayer paid holiday junket. Shuklin and his entourage attended a Wimbledon tennis match, toured Westminster Abbey and took a cruise on the Thames, all while on an official visit for meetings with Danish and British officials.

[Hyperlink to Above](#)

2.6 - WOAY (ABC-50): [Beckley's Inaugural VAMC Veterans Art Show](#) (30 September, Daniella Hankey, Oak Hill, WV)
The Beckley VA Medical Center hosted its inaugural art show this Saturday at the Medical Center auditorium. The Veteran's Council planned the art show as one of its projects. Using the tag line "healing through creativity", the art show features projects that have helped Veterans to heal. Nationwide, VA medical facilities use the creative arts as one form of rehabilitative treatment to help Veterans recover from and cope with physical and emotional disabilities.

[Hyperlink to Above](#)

[3. Access to Healthcare](#)

3.1 - Times Union: [What's the point of jailing this veteran?](#) (30 September, Chris Churchill, 1.5M online visitors/mo; Albany, NY)
Scott Gilligan had just turned 26. He was a guy from Cohoes and a Navy petty officer stationed in Puerto Rico. One day, he took a drive that would change his life. Gilligan was stopped at a

light when a man walked up to his car and stuck a gun in his face. A second armed man climbed into the back seat.

[Hyperlink to Above](#)

3.2 - The Olympian: [How we can help improve the quality of life for military veterans](#) (30 September, Dr. Rachel Wood, 851k online visitors/mo; Olympia, WA)

There are many things that contribute to our quality of life here in Thurston County: where you live or work, what you eat for breakfast, or how much stress you have in your day-to-day life. It's common sense that your health affects your quality of life, but it's also true that your quality of life can affect your health.

[Hyperlink to Above](#)

3.3 - Los Angeles Daily News: [L.A. veterans' health care has room to improve](#) (29 September, Editorial Board, 883k online visitors/mo; Woodland Hills, CA)

A Veterans Administration regional health care system is more than a corner of the federal bureaucracy. It's a promise to the men and women who served this country in the military. It's part of Americans' bargain with young people who sign up for duty.

[Hyperlink to Above](#)

3.4 - La Crosse Tribune: [Thanks to VA for great service](#) (30 September, Eugene Smithart, 823k online visitors/mo; La Crosse, WI)

I recently retired from Trane after more than 40 years. As a former U.S. Marine who served in Vietnam, I was able to get coverage from the Veterans Administration to replace the health coverage Trane had provided for all those years. With all I had heard about the Tomah VA, I didn't know what to expect in the way of quality of service I would receive.

[Hyperlink to Above](#)

3.5 - WHAM (ABC-13): [Groundwork underway for new VA clinic in Henrietta](#) (29 September, 817k online visitors/mo; Rochester, NY)

There will soon be a new location for local veterans to go for services and healthcare. A ceremonial groundbreaking took place Friday afternoon in the drizzle for the new VA clinic on Calkins Road in Henrietta. The 84,000-square-foot building will expand primary care services, along with mental health assessments and social work support.

[Hyperlink to Above](#)

3.6 - WSBT (CBS-22): [Local veterans say they're glad to see new VA clinic in Mishawaka officially open](#) (30 September, Cassidy Williams, 449k online visitors/day; Mishawaka, IN)

The new St. Joseph County VA Clinic in Mishawaka is officially open. The 90,000 square foot facility offers a variety of services. The \$38 million dollar project finished on time and on budget. Senator Joe Donnelly and Congresswoman Jackie Walorski were there to get a tour of the new facility.

[Hyperlink to Above](#)

3.7 - The Post and Courier: [South Carolina veterans react sharply to Ken Burns Vietnam documentary](#) (30 September, Bo Petersen, 319k online visitors/mo; Charleston, SC)

Jerry Davis won't watch the Ken Burns' documentary on the Vietnam War, he tells you. The bayonet scar still plainly shows on his eye. "I saw it 'real time' and I don't want to see what someone else thinks," said the 76-year-old Marine Corps veteran from West Ashley, who set up communications under fire on hilltops in Vietnam.

[Hyperlink to Above](#)

3.8 - South Bend Tribune: [Viewpoint: St. Joseph County clinic's grand opening fulfills a promise to our veterans](#) (29 September, Sen. Joe Donnelly (D-Ind.), 274k online visitors/mo; South Bend, IN)

When we care for our veterans, we both honor their service, and we reinforce our values. Yet for too long, it was a struggle to provide veterans in our community convenient access to quality health care. Veterans from South Bend, Mishawaka, Elkhart, LaPorte and Plymouth have regularly had to make a two-hour trip to VA facilities in Chicago or Fort Wayne to see a doctor.

The Department of Veterans Affairs has issued a proposed rule that would allow VA providers to treat patients in any state via telehealth, regardless of where they are licensed to practice. The proposed rule would override state licensing restrictions that the agency says are limiting its telehealth program and allow VA physicians to treat patients anywhere in the country using the VA's telehealth technology.

1.1 - Washington Times (AP): [Prosecutors: Veteran Threatened to Kill Congressman, Staff](#) (30 September, 10.8M online visitors/mo; Washington, DC)

CAMDEN, N.J. — Federal prosecutors say a New Jersey veteran who suffers from post-traumatic stress disorder threatened to assault and kill a congressman and the lawmaker's staff.

Joseph Brodie allegedly made the threats via telephone and email on Sept. 15 and 19.

Prosecutors say the 38-year-old Millville man was initially arrested on weapons charges Sept. 20 after state police went to his home to do a welfare check. They say Brodie fled out the front door with an assault rifle and tried unsuccessfully to fire it.

Brodie was charged Friday with threatening to assault a U.S. official. But the name of the congressman has not been disclosed.

Authorities say Brodie contacted the lawmaker to complain about a Department of Veterans Affairs clinic

It wasn't known Saturday if Brodie has retained an attorney.

1.2 - Portland Press Herald: [Maine veterans given substandard care are told it's too late to sue](#) (1 October, Edward D. Murphy, 2.1M online visitors/mo; Portland, ME)

After crushing her ankle in a fall during ropes training at Fort Leonard Wood in Missouri, April Wood for years sought relief from the pain she endured after leaving the Army in 2004.

Doctors with the Department of Veterans Affairs ultimately determined that the only way to get rid of her pain was to amputate her leg a few inches below the knee.

But less than a year after the amputation, officials at the VA hospital in Togus, where she was initially treated, called her in to admit that her care there was substandard and the reason for her amputation was, at least in part, due to the poor care she had received at the Maine VA hospital, which has 230 doctors and serves 42,000 veterans annually.

"I was sitting there crying because, up to that point, I thought maybe my bones just cracked and there was something wrong with me," said Wood, who is no longer able to work because of her disability. "They said, 'No, your doctor sucked.' "

Now, Wood and five other Maine veterans are suing, claiming that the VA fraudulently concealed that a podiatrist at the VA hospital in Togus gave them substandard care, subjecting them to years of pain that hospital officials now say could have been avoided. Their case is currently before U.S. District Judge Jon D. Levy in Portland, who will decide whether the lawsuits can move forward.

Federal lawyers, however, have moved to dismiss the cases, arguing that the veterans waited too long to file the suits, even though the VA has admitted that the podiatrist, Dr. Thomas Franchini, provided poor care and the VA took years to notify the veterans that there were problems in their treatment.

The suits come against a backdrop of sharp criticism of the Department of Veterans Affairs over the standards of care given to veterans, including issues such as monthslong wait lists for care and mismanagement that led to veteran deaths.

The first suit was filed by Wood, now 42, a Maine native now living in Missouri, who was in Army basic training in early 2004 when she fell about 20 feet from the ropes course, smashing her ankle. Franchini, who treated her after her honorable discharge and is now in private practice in New York, performed surgery on Wood twice. Neither surgery provided any relief from the pain, and she eventually underwent the amputation, performed by other surgeons in 2012.

VETS CITE PAIN, LACK OF MOBILITY

The suits filed by the five other veterans have since been combined with Wood's and allege the same lack of effective treatment by Franchini, although no one else was subject to such a drastic remedy as Wood's amputation. Franchini's treatment of the other vets included plates and screws inserted into their feet and ankles – with some of the hardware allegedly incorrectly placed – joints fused improperly and bones from other parts of their bodies implanted poorly, the suits say.

All of the vets said they have limited mobility, and pain in their feet, ankles and legs. In some cases, doctors outside the VA system have recommended additional procedures, but the vets fear those operations will only worsen their conditions.

Jack Downs, 77, of Fairfield said doctors have told him further surgery would worsen the osteoarthritis in the foot that Franchini operated on in 2008.

The Marine Corps veteran said he can feel one of the screws that Franchini inserted during that surgery. He still suffers numbness in his foot, and pain that shoots up his leg to his hip when he walks or drives.

But, he said, "I'm afraid if they take the screw out, my foot will collapse."

Franchini began working at Togus, the oldest veterans' facility in the country, in 2004 after a career as a Navy doctor – in fact, one of the people suing him was treated for a different ailment by Franchini in Rhode Island while both were in the Navy. Franchini is still a licensed podiatrist, even though he resigned from the VA after the agency told him to step down or he would be fired in early 2010, according to Chris Cashour, a spokesman for the VA.

In addition to substandard care, a VA investigation said it appeared that Franchini was "falsifying some medical records," according to an affidavit filed in the veterans' suits by Yuri Walker, the VA's director of risk management.

Franchini is now listed as one of three doctors in a private podiatry practice on Fifth Avenue in New York City. His Maine podiatrist's license lapsed in 2011, but he has an active New York license. Records in both states show that there have been no complaints filed against him, although Cashour said the VA has "broad authority" to report doctors in cases where care was

substandard or caused injuries. Cashour would not say whether the VA reported Franchini to medical boards, citing privacy laws.

DOCTOR DEFENDS HIS TECHNIQUE

In most cases in Maine and New York, complaints that have not been validated are not recorded in state licensing records available to the public.

Through a representative of his office in New York, Franchini said he would not comment on the suits, and the government, not Franchini, is named as the defendant.

However, in a 2016 post on his personal blog, he complained that the review of his performance at Togus came about after one patient complained, although the VA said it was an official with the hospital who raised concerns about the doctor's care. That complaint, Franchini said, led to a "second wave" in which VA officials reviewed the care for more than 100 of his patients. He alleged the VA review only found that his record-keeping was deficient, not his surgical techniques or patient care, although the VA called in dozens of patients in January 2013 to admit that the care provided by Franchini was subpar.

Letters were sent at that time to Franchini's patients in what the VA terms a "large-scale disclosure event," but Franchini described the complaints as unfounded.

"Now the true fact (is) that my notes were brief, but not my care," Franchini wrote in his blog, in which he also complains about the difficulty of finding a new job. "They could not find something that was wrong other than (sic) brief note-taking."

In an affidavit filed in one of the suits last week, Franchini again denied that his care was subpar and said he tried to give his patients "accurate and truthful information" about their conditions and the results of his surgical procedures.

Vets and politicians have been critical of the quality of the care provided by the VA nationwide. The criticisms include allegations of mismanagement that led to veteran deaths, wait times as long as six months for VA hospital care, and VA officials' attempts to hide substandard care. In 2014, auditors discovered that employees at 110 VA facilities kept secret waiting lists to hide the delays veterans faced when seeking care. In July, Veterans Affairs Secretary David J. Shulkin fired two top officials at the Manchester, New Hampshire, VA Medical Center and ordered a review of the hospital.

Legislators and advocates have since pushed to reform the VA medical system, including changes that would make it easier for vets to see doctors outside the VA system or go to hospitals nearer to their homes.

The VA began examining the care it provided in recent years and rated the hospitals it ran on the quality of care offered.

TOGUS WAS RATED 2 ON A 5 SCALE

A critical report in 2015 commissioned by the Office of the Inspector General in the U.S. Department of Veterans Affairs found scheduling problems at Togus mirroring those at veterans hospitals nationwide, saying employees didn't enter appointment requests for some patients who weren't willing to be seen within 14 days, the VA benchmark for a comprehensive

examination for first-time patients. Employees were directed at times not to log referrals in their computerized system.

In 2016, care at Togus was rated a 2 on a 5-point scale, with 1 the lowest rank and 5 the highest. The rankings used some of the same variables used to evaluate other hospitals, such as surveys of patient experiences and outcomes, complications, readmissions and deaths, as well as some measures more geared toward VA hospitals, such as access to care and the quality of mental health care.

The VA rankings said Togus has made a “large improvement” from 2015, the baseline year for the rankings.

“We are proud of our improvements in all of our care programs, including podiatry,” said Ryan Lilly, director of the VA Maine Healthcare system.

The suits, however, allege that Franchini provided substandard care from early on in his tenure at the hospital.

Andy Korsiak, 58, who settled in Maine after he was assigned to Brunswick Naval Air Station, said he suffered for years from a bone spur that was pressing into his Achilles tendon. He went to Togus, where Franchini recommended surgery. The day of the operation, Korsiak said, Franchini decided at the last second to also remove a second bone spur lower on his heel that had not been causing any problems.

“We’re going to be in there, why don’t we do that as well?” Korsiak said he was told by Franchini.

He never saw Franchini again after the surgery in 2007, Korsiak said. A nurse removed his stitches and essentially sent him on his way.

Korsiak, who lives in Troy, said he still deals with pain and problems resulting from the surgery. A VA doctor in Massachusetts found bone fragments left behind in his ankle and heel, Korsiak said, but “there was absolute silence from the VA” until six years later, when the VA wrote to say there may have been problems with his care by Franchini and asked him to return to Togus to discuss his case.

The other cases contain similar accusations, but the most egregious appears to be Wood’s.

Wood said joining the Army was a lifelong dream. But she reluctantly accepted an honorable discharge in September 2004 when the Army determined that her effectiveness as a soldier would be reduced because of the injuries she suffered in the fall. After her discharge, she went to Togus to deal with continuing problems in her ankle and was assigned to Franchini for care.

“He said he could fix it,” she said of her ankle, and she believed him.

Franchini operated to fuse the ankle joint to reduce the movement of the joint, surgery that took four hours instead of the two she had been told to expect. A metal plate and eight screws were inserted into her ankle, she said, but after the surgery, Franchini told Wood and her family said that he wasn’t sure of a good outcome because she had “mushy bones,” Wood said.

When the pain didn't subside, Franchini operated again to insert more screws to immobilize the joint. When that failed to provide relief, Wood consulted VA doctors in Massachusetts, who decided to remove all the hardware Franchini had inserted and put in a piece of bone from a cadaver and more screws.

But in 2012, another VA doctor performed the amputation after the determination was made that it was the only way to alleviate the constant pain Wood was experiencing.

In early 2013, she was called back to Togus to discuss her case, where officials told her that Franchini's care was substandard.

Ultimately, the VA determined that her care had resulted in a full disability. Wood said she no longer works outside her home, but makes a few hundred dollars a year writing adult romance books.

BETRAYED BY THE SYSTEM

Timothy Mansir, now 36, injured his foot after falling while in Iraq with the Marine Corps. After he was discharged in 2007, he went to the VA, where Franchini diagnosed an unstable ankle and performed an ankle reconstruction in 2008.

Finally, he saw a podiatrist who lived down the street from him in Oxford. A surgical procedure that doctor performed helped some, Mansir said, but "my ankle was severely messed up."

Finally he was called in to Togus in 2013, where VA officials told him that Franchini's initial care was to blame and the ankle reconstruction was "overly aggressive."

Mansir has since had additional surgeries by doctors outside the VA system, but still experiences pain and said he feels "hurt and betrayed" by the system. Mansir said he worked as a commercial electrician and then a testing technician, but he lost both jobs when the pain interfered with his work. He still has a severe limp, has to take frequent breaks when he walks and lives with his wife on Social Security and military disability.

"I held up my end of the bargain and went and served my country, and I expected to be taken care of," he said. Being told that his care was substandard "was like a huge slap in the face."

Mark Prescott said pain that developed in his regular runs led him to seek help, initially while on active duty in the Navy and later as a veteran.

He said he had always been a runner, which continued after he joined the Navy out of high school in 1983. But in the late 1990s, Prescott started experiencing pain in his ankle and learned he had broken a bone in the joint years earlier and never had it treated. He had surgery twice while still on active duty and then was treated at Togus after retiring.

"He had a very good bedside manner," Prescott said of Franchini. "He was always available to talk to and seemed like a guy you wanted to hang out with." Prescott noted, however, that Franchini never seemed to write anything down.

Franchini operated on Prescott twice, transplanting a piece of bone taken from his foot into his ankle to stabilize it, but Prescott only experienced more pain. Franchini gave him a brace,

Prescott said, but he was unable to use it because he had to tighten it on the inside of his ankle, which caused too much pain.

Still, Franchini told him he was “progressing normally,” the suit alleges. Prescott said he never suspected anything might be amiss until VA officials told him that he might not have been treated well.

A doctor from the VA in Boston showed him an X-ray that, he said, indicated that Franchini had overly tightened the piece of transplanted bone, creating a ridge that caused his pain, Prescott said.

KICKED WHEN YOU'RE DOWN

Like the others, Prescott was told he could file a claim with the VA that might result in a finding of a greater disability with an increased pension and guarantee of care going forward. That claim was rejected.

“They admitted that they had harmed me, but the other office said, ‘Well, there’s nothing we’re going to do for you,’ ” Prescott said. “That’s sort of like kicking you when you’re down. To listen to the government, they should have known that we were improperly treated.”

In his suit, veteran Kenneth Myrick of South Portland said Franchini operated on his ankle at Togus in 2005 but he continued to experience “severe pain” in his left leg after the procedure despite additional surgeries at the VA in Boston. The VA told him in 2013 that the original surgery by Franchini resulted in “nerve entrapment,” which Franchini and other doctors failed to see in examinations after the original surgery. Franchini’s original surgery was “substandard,” the VA told Myrick.

Both Myrick and his lawyer, David Kreisler, have declined to comment on the suit.

Downs, the Marine from Fairfield, said his issues with the care provided by the VA go beyond the surgery Franchini performed on his foot in 2008.

Downs, who served in the Marine Corps for two years in the late 1950s, said the top of his foot had collapsed. Franchini told him it could be fixed by fusing a bone and operated in 2008.

Downs had follow-up appointments during which X-rays and scans were taken, but when Downs and his wife moved to Florida, Franchini didn’t contact him and never got in touch with VA doctors in Florida. According to his suit, the X-rays and scans indicated that the fusion had not succeeded and that a screw might have been improperly placed, but Downs was never told about those findings.

After the couple moved back to Maine, Togus officials told Downs that his care may have been inadequate and an outside doctor told him that the metal plate Franchini put in was too small to allow the bones to fuse.

Now, Downs – who used to walk 5 miles a day – suffers numbness in his foot when he tries to walk. If he drives, the pain starts in his foot and then travels up his leg to his hip.

Downs said he thinks Franchini never ordered physical therapy for him because he knew the therapists would discover that the surgery wasn’t right.

After the surgery, Downs said, he believes the VA dragged its feet on informing him and other Franchini patients that their care might have been substandard in order to run out the clock on time limits for filing a suit.

"I truthfully feel they stalled me," he said. "I was being stalled by the VA."

WHEN DOES THE TIMER START?

Levy, the judge over the ongoing cases, ruled in February 2016 that Maine's three-year time on malpractice suits is a "statute of repose," meaning the window of time on when the plaintiffs can file suit starts from when the alleged malpractice occurred. For most of the vets, their surgeries were performed in the mid- or late-2000s.

Attorneys for the veterans argued that the VA should be tried under a federal malpractice law with a two-year limit, but a clock that begins to run when the patients discover they may have received substandard care. The six vets were told by Togus officials in January 2013 that their care might have been substandard and most filed their suits within a year.

In his ruling in early 2016, however, Levy allowed the veterans' lawyers to pursue a claim that the VA had "fraudulently concealed" the findings of poor care, which would allow the suits to move ahead, regardless of the time limits. He's expected to rule in October or November.

Togus officials have admitted that they took a long time to disclose the findings of their investigation into Franchini's cases, but deny that they did so on purpose to limit the veterans' ability to sue.

Dr. Timothy Richardson, the former chief of staff at Togus, said he ordered another doctor to review Franchini's cases after a compensation and pension examiner raised concerns in early 2010. In an affidavit filed in the case, Richardson – who was demoted as chief of staff over the length of time it took to review the Franchini cases – said the pace of the review and notification of patients was "admittedly slow" and said he should have devoted more resources to investigating Franchini's cases.

But it wasn't a ruse, he said.

"At no time during the process did I ever deliberately delay the reviews to minimize or avoid potential legal liability from any claims that patients might assert against the Togus VAMC," Richardson said. "In fact, I never once considered the applicability of any statute of limitations to those claims, and had never even heard of the 'statute of repose' until the government raised the issue in the pending lawsuits. Based on my own personal experience, the issue of 'timing' or 'time limits' for potential tort claims was never discussed by anyone at the Togus VAMC. Nor did anyone say or even suggest that we should 'conceal' the results of our reviews from patients."

Walker, the VA's director of risk management who was involved in the Franchini investigation, also denied that the review was deliberately delayed.

U.S. attorneys in Portland who are defending the government in the suit said they had no comment because the case is in active litigation.

David Lipman, who represents Wood and Prescott, said the VA's argument, boiled down, is "we didn't fraudulently conceal it, we incompetently concealed it."

"That's just so frustrating and ridiculous," said Celine Boyle, of the Shaheen and Gordon law firm, who represents Korsiak, Downs and Mansir.

Both Lipman and Boyle indicated that they will likely file appeals if Levy's next ruling, on the fraudulent concealment claims, goes against them. In that case, they would likely appeal the ruling that the time limit is a statute of repose and that the state law, rather than the federal statute, should be followed in determining filing deadlines.

1.3 - The Day: [VA groups, services tackle high suicide rates among female veterans](#) (30 September, Julia Bergman, 440k online visitors/mo; New London, CT)

Female veterans are committing suicide at 250 percent the rate of female civilians, according to the Department of Veterans Affairs.

In Connecticut, at least 10 of the 50 veterans who committed suicide in 2014, the most recent data available, were women. And that's only counting veterans receiving care at the VA.

Nationally, the suicide rate for female veterans from 2001 to 2014 increased by a greater degree than the suicide rate among male veterans.

The data was part of an update to a 2016 VA report that analyzed more than 55 million records from 1979 to 2014, the most comprehensive look at veteran suicides in the U.S.

Women are one of the fastest growing groups of veterans. Of Connecticut's 200,000-plus veterans, more than 16,500 are female. The number of female veterans in the state has grown by 10 percent in the past five years.

A 2016 survey of active-duty women and female veterans by the Service Women's Action Network found that they view gender bias as a major obstacle to success, and feel underappreciated by society. They listed their top community challenge as access to women-specific health care.

"I often hear from women 'I just wish I could meet other women veterans. I don't know how to meet other women veterans,'" said Lynette Adams, women veterans program manager at VA Connecticut. "Social support is a really large protective factor for people at risk of suicide."

As more women are entering the military, there may be an increase in the number of women accessing care at the VA. That, in turn, allows the VA to continue to build more programs geared toward women, Adams said.

From 2001 to 2014, the suicide rate for female veterans overall increased, but the rate decreased by 2.6 percent for those accessing services at the VA.

About 25 percent of female veterans in Connecticut are enrolled at the VA. This number has increased steadily over time, according to Adams, but there's still a large percentage of female veterans who are not going to the VA in Connecticut.

The VA, on a national level, has stepped up its outreach to women, letting them know about resources and programs specific to them. And it has "greatly expanded" its women-specific programming in the past five to 10 years, according to Adams.

"So I hope one of the reasons for those (VA enrollment) numbers going up is that women are realizing 'the VA can provide me with the gender-specific services that I need,'" she said.

There's a women veterans liaison at each of the VA's veterans centers in Connecticut, for example. And there's a number of mental health programs for women, such as support groups.

A few years ago, there was one only one group at the Connecticut VA for women who've experienced sexual assault or sexual harassment during their military service, commonly referred to as military sexual trauma or MST. A recent VA study found the rate of suicide to be higher among women who've experienced military sexual trauma.

Today, there are three such support groups.

"We find that women who are able to engage in these gender-specific programs are happier with their care," Adams said.

These programs can also provide female veterans with the social support that they might otherwise feel that they don't have, she added.

While the VA has expanded its offerings for women, veteran organizations are lacking in this regard, an op-ed written recently by two female veterans points out. The SWAN survey found that 71 percent of female veterans don't belong to a veterans service organization, and 30 percent said they don't feel welcome in existing veterans organizations.

A 2015 law directed the Connecticut's Department of Veterans Affairs, within existing resources, to create a women veterans program to let them know about federal and state benefits and services and to study their unique needs. A group meet twice that year, but hasn't met since, according to Emily Hein, spokeswoman for the state's Department of Veterans Affairs.

As was the case back then, the department's Office of Advocacy and Assistance has three female veteran services offices who act as liaisons for female vets, Hein said.

The national Women Veterans Hotline is 1 (855) VA-WOMEN (829-6636). The website is www.va.gov/WOMENVET.

[Back to Top](#)

1.4 - ESPN: [Sean Doolittle on Bruce Maxwell, respecting veterans and defining patriotism in a polarized America](#) (30 September, Jerry Crasnick, 429k online visitors/mo; Bristol, CT)

Long before Oakland Athletics catcher Bruce Maxwell took a knee in protest during the playing of the national anthem last weekend, Sean Doolittle was giving sincere thought to patriotic displays at baseball games and the surrounding symbolism.

Doolittle, who played with Maxwell in Oakland before being traded to the Washington Nationals in July, is the product of a military family. His father, Rory, served in the Air Force for 26 years and currently teaches aerospace science to high school ROTC students in New Jersey.

During his time in the majors, Doolittle has become a strong advocate for veterans and used his visibility to help them with everything from housing and employment to substance abuse-related issues. In May, Doolittle and his fiancée, Eireann Dolan, wrote a Sports Illustrated op-ed piece to raise awareness of the plight of veterans with "bad paper"-- those who've fallen through the cracks and failed to receive care after less-than-honorable discharges from the military because of alleged misconduct.

Doolittle and Dolan have also taken an interest in lesbian, gay, bisexual and transgender issues, and in November 2015 they hosted 17 Syrian refugee families for Thanksgiving dinner in Chicago. The Athletics nominated Doolittle for the Branch Rickey Award in 2013-2014 and the Roberto Clemente Award in 2016.

During a stop in Philadelphia this week, Doolittle shared his thoughts on the furor swirling around athletes and the national anthem in a conversation with ESPN.com.

Were you surprised when you saw Bruce Maxwell take a knee in Oakland?

Sean Doolittle: "I was a little bit surprised, mainly because it was a young guy that did it -- a guy that still has so much to prove in this league and so much to lose at the same time. [It's harder] for a guy like that to put himself out there. I hope we get to a point whether people agree with him or not, or wherever they fall on the issue, they can respect somebody for standing up for what they believe in."

What did you learn about Maxwell during your time in Oakland?

SD: "He's a very thoughtful guy. He's really matured a lot as a person and a player over his last couple of years. He had some big league time and got to be around some really good veteran guys in that clubhouse who really helped his development. He has talent, and he's starting to mature and work really well with that pitching staff.

"Bruce is a super nuanced guy. We want to put people in boxes. Words like 'conservative' or 'liberal' or 'Republican' or 'Democrat' have become pejoratives that people use to define and use against other people now. We want to label them before we even get to know them."

There has been a lot of conversation about how NFL and NBA players have jumped into the political fray while baseball players have remained largely silent. Some people point to the racial makeup of MLB rosters or the game's established clubhouse culture. What do you think?

SD: "I have theories, but I don't know. It's touchy."

Does it strike you that the national anthem is becoming such a flash point for debate?

SD: "A lot of these questions are being posed to people for the first time, like, 'What does it mean to you to stand for the anthem?' I think if you asked 10 people, you might get 10 different answers. You might see one guy standing at attention and other people walking around the concourse buying food or whatever."

What does the playing of the national anthem mean to you personally?

SD: "I came from a military family, so there are a lot of things I think about when the anthem is playing. One thing that bothers me is the way that people use veterans and troops almost as a shield. They say that's the reason they stand and that veterans deserve to be honored and respected during the anthem. But where is that outrage in taking better care of veterans? The most recent statistics say that we still lose 20 veterans to suicide every day.

"If you want to have that conversation, if that's your reason for standing, then let's talk. Let's have a conversation about putting that into action, because they deserve a heck of a lot more than people standing at attention during the flag or giving them discounts on food or hotels.

"It's really nice that we honor them at games sometimes. They'll bring a veteran on the field and he'll get a standing ovation, and that's important. We're in the 16th or 17th year of this war [in Afghanistan], and it keeps a reminder that we are still a country at war. But we need to follow through on those thoughts and actions."

How are you involved personally?

SD: "My fiancée and I do a lot of work with veterans' issues. Earlier this year, we wrote an op-ed that ran in Sports Illustrated about some of the things we found regarding veterans being wrongly excluded from VA care at a time when they're experiencing a mental health crisis and a suicide epidemic the way they are now. We need to be figuring out ways to expand VA care to take better care of veterans.

"We've worked very closely with three big organizations. We've also gotten closely connected with people in and around D.C. When we were writing the op-ed, we talked to policy makers and policy groups about it. We've learned a lot about veterans' issues and we stay super informed about it. Anytime people use vets and the military as a political football or a prop, it's kind of bothersome.

"The VA works, it really does. For some of the negative press they've gotten in the past few years, when the veterans are able to access it, it really works and saves lives, because they're the ones that are really equipped to handle the unique needs that veterans have."

Do you think there's a distinction to be made between symbolism and action here?

SD: "I don't want it to be a hollow gesture. I think it's a very valid reason to stand for the anthem. But if people are going to point to veterans and use them as the reason, then let's follow through on that.

"There are a lot of veterans being left out. It takes more than standing for the anthem or 'God Bless America' to stand up for them in a [real] sense. As long as we have a volunteer-only military, a lot of the responsibility falls on the general public to make sure they're getting the care

they need when they're done with their service. The veterans raise these questions with Congress and policymakers, but it's going to take the general public to raise their voices in order to really move the needle."

Some people say that athletes who kneel are disrespecting veterans and their service. Others maintain that veterans have fought to give people the right to peacefully protest in such a manner. Can you understand both arguments?

SD: "I worry sometimes in this country that we conflate patriotism exclusively with love of the military and militarism and the strength of our armed forces. That's not the only way that you can be patriotic."

"People draw a direct line between the national anthem and the military, or patriotism and the military. But there are a lot of things that we're not doing for veterans."

Have you seen any positive changes since you've been doing advocacy work for veterans?

SD: "It's getting better. [Veterans Affairs] Secretary [David] Shulkin, who was appointed last year, is doing a good job. But it's almost like we have to capture some of the momentum so that we don't lose any of that progress. He said his priority is bringing down the suicide numbers and reducing that rate."

Can the current debate be a "teachable moment"?

SD: "I think it's important to realize that the players who are protesting aren't protesting the anthem. They're not protesting the flag. People kind of move the goalposts on them and try to tell them what they're protesting. But as they keep saying, that's not what they're protesting."

As someone who stands for the anthem, what's your response to athletes who kneel?

SD: "I think American democracy is strong enough to have that conversation. I think my patriotism is strong enough to not be offended when somebody takes a knee during the anthem. That's not something I take personally. It's something that makes me want to reach out to that person and have a conversation with them and say, 'Let's talk about some of these issues. Tell me about certain things that have caused you to take such a stand.'

"I want to have these conversations with guys like Bruce Maxwell and guys in other leagues, and maybe someday we can get to a point where we give them a reason to stand, and they're proud to stand along the other guys that are standing."

2. Veteran and Employee Experience

2.1 - FOX News: [Creators of lifesaving body armor, artificial pancreas among federal workers honored](#) (30 September, Joseph Weber, 32.5M online visitors/mo; New York, NY)

Marine Corps engineer Flora Jordan was honored this week at a Washington, black-tie gala for creating body armor that's nearly half the weight of older models yet equally protective.

While humbled for winning the 2017 Service to America Medal, Jordan admitted that her mind was already focused on next-generation armor that will better help soldiers in combat and keep them healthier.

"This is so humbling, especially among all the accomplishments being recognized here," Jordan, the youngest recipient of the award, formally known as the Samuel J. Heyman Service to America Medal, said Wednesday at the awards ceremony, inside the neoclassic Andrew W. Mellon Auditorium on Constitution Avenue.

The 28-year-old Jordan said she and others at Marine Corps Systems Command in Quantico, Va., are now working on integrating the award-winning vests with other soldier-gear like helmets and hydration packs "in a more holistic way," which she said will also help with back and shoulder problems.

The annual gala, in which hundreds of not-so-famous federal employees pay tribute to coworkers' vital-yet-frequently-unheralded efforts, was not without star power and laughter this year.

Award-winning writer Michael Lewis -- who's had several books turned into movies -- was among those who spoke at the ceremonies, known around the nation's capital as the "Sammies."

"This is way more efficient" than the Oscars, Lewis said in a nod to federal workers' pride in no-waste efficiency.

Joshua Van Eaton, a Justice Department attorney honored with EPA investigators Phillip Brooks and Bryon Bunker for their lead work in the 2016 Volkswagen emission case, thanked Robert Muller for his efforts in negotiating the landmark, \$17.4 billion settlement with the German automaker.

The case, in which the company rigged more than a half-million vehicles to evade pollution regulations, also led to billions more in civil and criminal penalties.

"It should be obvious why I'd want to stay in (former FBI Director) Mueller's good graces," Eaton said about Mueller, who now leads a Justice probe into whether Trump campaign officials colluded with Russia in the 2016 White House race.

"Our nation relies on dedicated public servants like those we honor here tonight," Max Stier, president and CEO of the nonprofit, nonpartisan Partnership for Public Service, which runs the awards program, said in joint statement with Tom Bernstein, the partnership's chairman.

This year's lifetime achievement award went to Dr. Tedd Ellerbrock from the Centers for Disease Control and Prevention.

Ellerbrock played a vital role in building, expanding and improving the U.S.-led program that provides medicine and assistance to 11 million people worldwide living with HIV/AIDS.

Like many who won awards, Ellerbrock thanked his wife and family for their support and acknowledge how their work forced them to miss so many dance recitals and youth soccer games.

Ellerbrock said about his wife, "Without Pamela, I wouldn't be here today. Thank you for your love and support."

The other 2017 winners were the FDA's Courtney Lias and Stayce Beck who paved the way for the first artificial pancreas device to receive agency approval, three years faster than expected, which has helped those living with Type 1 diabetes.

Timothy Camus, a Treasury Department inspector general, and the IRS Impersonation Scam Team won for leading a multi-agency investigation and public awareness campaign to stop a massive fraud that conned thousands of Americans into paying millions of dollars in bogus tax bills.

Alex Mahoney and the Middle East Crisis Humanitarian Response Team for leading the U.S. humanitarian relief effort in war-torn Syria and parts of Iraq -- delivering food, medicine, safe drinking water and other assistance to millions of victims.

Rory Cooper, a Department of Veterans Affairs researcher, received a Sammie for designing wheelchairs and other assistive technology equipment that has improved the mobility and quality of life for hundreds of thousands of disabled veterans and other Americans.

[Back to Top](#)

2.2 - The Hill: [Trump's Cabinet and charter flights: What we know and don't know](#) (30 September, Nathaniel Weixel, 11.8M online visitors/mo; Washington, DC)

Health and Human Services Secretary Tom Price resigned Friday following a series of public rebukes from President Trump and GOP lawmakers over his repeated use of charter and military aircraft, at public expense, for official travel.

Price is far from the only Cabinet member to take private flights however, so his resignation isn't likely to stem the controversy.

Here's what we know, and what we don't know.

Who is involved?

There are at least four Cabinet secretaries under fire for their use of charter or military flights.

Price was the most extreme case, as his flights cost taxpayers about \$1 million, according to estimates by Politico.

The Treasury Department inspector general is reviewing department head Steven Mnuchin's use of a private jet in August, as well as why he requested a government plane to take him and his wife, Louise Linton, on their European honeymoon.

Environmental Protection Agency Administrator Scott Pruitt has also been using private planes for government duties. The Washington Post reported on Wednesday that Pruitt's private flights have cost taxpayers more than \$58,000.

On Thursday, Politico and The Washington Post reported Interior Secretary Ryan Zinke took a \$12,000 charter flight aboard a plane owned by oil-and-gas executives.

They also reported on at least three other occasions of private jet travel since Zinke was confirmed, including to the Virgin Islands, before hurricanes Irma and Maria hit.

Veterans Affairs Secretary David Shulkin is also coming under scrutiny for combining personal travel in Europe with an official trip, all paid for with taxpayer money. While Shulkin flew commercial, the government paid for both he and his wife's flight and a per-diem for both their meals.

The trip also came less than two weeks after he signed a memo instructing top VA staffers to determine whether "employee travel in their organization is essential."

Apologizing might not be enough

Price apologized for his decision and offered to pay back tax payers for the cost of his seat on his private flights.

That wasn't enough to stem the controversy or the president's ire.

Zinke on Friday was more combative, telling an audience at the Heritage Foundation that the outrage was "a little B.S."

Mnuchin hasn't apologized either, and on Thursday he declined to promise that he would only ever fly commercial.

"I can promise the American taxpayer that the only time that I will be using mil air is when there are issues either for national security or we have to get to various different things where there's no other means," Mnuchin said on CBS "This Morning."

Price's pledge to pay back "his share of the travel" amounts to \$51,887.31. According to Politico, which broke the stories about his private flights, Price took at least 26 flights on private jets at an estimated cost to the taxpayers of over \$400,000.

On Thursday night, Politico reported that the White House approved flights on U.S. military aircraft to travel to Europe, Asia and Africa for official events, at a cost of more than \$500,000.

Congressional Republicans are taking notice.

Price's trips managed to earn bipartisan outrage.

Democrats were fuming, but Republicans also gave him a dressing down.

"[Everything] that happens around here is based on appearances. And if it just appears wrong, don't do it," Sen. Lisa Murkowski (R-Alaska) told reporters this week.

Sen. John Kennedy (R-La.) had harsher words.

“Taking these charter flights, playing the big shot on the taxpayer's dime when you can go by bus or train or regular commercial air, can't put lipstick on this pig,” Kennedy said Thursday on Fox News Channel's “America's Newsroom.”

More broadly, the charter flights by Cabinet members are also the subject of an investigation by the House Oversight Committee.

Judiciary Committee Chairman Chuck Grassley (R-Iowa) on Thursday urged Trump to curb the spending of Cabinet secretaries.

He called on Trump to “emphasize to cabinet secretaries the necessity of using reasonable and cost-effective modes of travel,” especially “considering the many travel options to and from Washington, D.C.”

Will the flights cost anyone else their jobs?

Trump was reportedly incensed at Price for being a distraction, and was annoyed the reports about Price's air travel have undercut his “swamp draining” image.

But there was also speculation that Trump blamed Price for the failure of Congress to repeal ObamaCare.

If tax reform suffers a similar fate, one couldn't blame Mnuchin for being worried.

On the other hand, Mnuchin is a confidante and friend to Trump. Price was seen as a loyalist to Vice President Pence, and lacked a more personal connection to Trump.

Trump has also been cleaning house at the VA, firing more than 500 employees since he took office. It's not clear yet how the latest scandal will impact Shulkin.

Zinke has already come under fire from Democrats, and his initial defense shows he may be painting the issue as a partisan attack, which doesn't necessarily reflect poorly on Trump.

Trump has also been trying to combat the image of a White House in chaos, and while the scandals have not gotten positive cable news coverage, more staff resignations or firings could be even worse.

[Back to Top](#)

2.3 - Sun Herald: [Cruise-in to salute veterans goes back to its roots with return to Centennial Plaza](#) (30 September, Scott Hawkins, 858k online visitors/mo; Gulfport, MS)

One of the most meaningful and memorable events at Cruisin' The Coast each year is the Salute To Our Veterans cruise-ins.

“The whole purpose is to have the vets enjoy the cars,” said Woody Bailey, executive director of Cruisin' The Coast.

This year, the event, which features Cruisers converging on the location to honor veterans, will be held 10 a.m. to 2 p.m. Tuesday, Oct. 3, at Centennial Plaza, 200 E. Beach Blvd., Gulfport. In recent years, it has been held at the Biloxi VA facility.

“The change of venue is going back to its original roots,” Bailey said.

Prior to Hurricane Katrina, the event was held under the oaks at the old Veterans Affairs facility at Centennial Plaza, which is now Cruise Central, but after the storm damaged the property, organizers moved the veterans cruise-in to the Biloxi VA facility.

In the following years, construction and other issues forced the event to move around for a few years.

“The vets event started at the Gulfport VA property a number of years ago,” Bailey said, “to have the vets at the VA home in Gulfport enjoy Cruisin’ The Coast.”

Now the veterans are living in Gulfport’s new VA retirement facility near Centennial Plaza, so moving the event back to the original location makes sense. Bailey said veterans from both the Gulfport and Biloxi VA facilities will be bused to Cruise Central for the Tuesday, Oct. 3, Salute to Veterans event.

“The vets have served their country,” he said. “We want to honor that service and feel like this is a way Cruisin’ The Coast can help do that.”

This year’s Salute to Our Veterans event also will feature a celebrity appearance by Cristy Lee and the Crusin’ The Coast Feature car.

SALUTE TO OUR VETERANS

Where: Cruise Central, Centennial Plaza, 200 E. Beach Blvd., Gulfport

When: 10 a.m.-2 p.m. Tuesday, Oct. 3

The event will feature a celebrity appearance by Cristy Lee and an appearance of the Cruisin’ The Coast Feature Car

Cruisin’ The Coast

2.4 - Herald-Mail Media: [Cruise-in unites community, veterans in common passion](#) (30 September, Richard Belisle, 158k online visitors/mo; Hagerstown, MD)

MARTINSBURG, W.Va. — The main parking lot at the VA Medical Center shined bright in paint and chrome from a hundred sport and muscle cars, street rods, vintage Detroit autos and trucks lined up for Saturday’s annual Country Roads Car Club Cruise-in.

This was the third year for the event.

It's stated goal, VA and club organizers said, is to bring the community and military veterans together in a common passion — the love of things automotive.

Veterans themselves judged the vehicles and chose the winners in about a dozen categories. The biggest trophy, the Director's Choice, was a 1978 Corvette, picked by Timothy J. Cooke, the medical center's director. He once owned a 1978 Corvette, according Mike McAleer, public affairs officer.

The cruise-in is hosted every year by the Jefferson County, W.Va., car club. Member Bill Crawford said the club has its headquarters in Harpers Ferry, W.Va. It hosts two shows a year — the one at the VA and one in Ranson, W.Va.

Among the vehicles getting attention from veterans and visitors was a vintage 1959 British-made Turner MK 1 sports racing car. It was brought to the cruise-in by David Thomas, president of High Performance Heroes of Clarksburg, W.Va.

Heroes is a group of race fans who help combat-wounded veterans become active in motorsports.

Thomas's wife, Ashley Thomas, said the organization restores and modifies vintage sports cars, including a 1962 Austin Healey Sprite and 1972 MG Midget. Two combat-wounded veterans, Liam Dwyer of Litchfield, Conn., and Patrick Brown of Chesapeake, Va., have benefitted from the group's help.

Dwyer lost his left leg from an improvised explosive device in Afghanistan in 2011. In 2013, through the efforts of High Performance Heroes, he won the Pittsburgh Vintage Grand Prix Group 2 in the Austin Healey Sprite.

Brown was able to drive the MG Midget because the mechanics at High Performance Heroes were able to convert a window crank from a Ford F-150 into an automatic clutch for the MG's manual transmission, Ashley Thomas said.

"We are the only ones doing vintage sports car racing with combat-wounded veterans," she said.

Jim Boyer of Kearneysville, W.Va., who was wounded in action in Korea, was at the VA showing off his 1959 Plymouth Fury. He said he had bought a brand new iceberg-white Fury with a yellow roof in 1959. He drove the car for years before he sold it. The one on display Saturday was purchased in Franklin, W.Va. It's owner had died and his widow was trying to sell it.

"It was just like my first one. It had the same color, same 318-cubic-inch motor and it only had 28,000 miles on it," he said. "I bought it for \$23,000. My first one cost, new, less than \$3,000. I didn't have to do anything to it. I only get it out for occasions like this."

Steve Hummer of Star Tannery, Va., has a similar story, but with an "all original" 1929 Ford Model A pickup truck. An Army Ranger, he was seriously wounded in 1968 during the Tet Offensive in Vietnam. Today, Hummer is a certified peer recovery specialist in a veteran-to-veteran program at the Hope Center at the Martinsburg VA.

Jocelyn Doyle of Boonsboro is a dental assistant at the VA. On Saturday she was one of a cadre of volunteers who transported veterans in wheelchairs from their rooms to the cruise-in to see the cars up close.

"I transported six of them today," she said. "I do this so I can give something back."

[Back to Top](#)

2.5 - Little India: [Undersecretary Poonam Alaigh Caught Up in Veterans Affairs Travel Scandal](#) (30 September, 44k online visitors/mo; Torrington, CT)

Acting Undersecretary Poonam Alaigh and her husband accompanied Veterans Affairs chief David Shulkin and his wife on a 10-day trip to Europe in July this year, which is being criticized as a taxpayer paid holiday junket.

Shuklin and his entourage attended a Wimbledon tennis match, toured Westminster Abbey and took a cruise on the Thames, all while on an official visit for meetings with Danish and British officials.

Besides the Alaighs, Shulkin's travel team included his chief of staff, and another aide. They were accompanied by a team of six security personnel.

Controversial Europe Trip

Shulkin was visiting the continent for meetings on veterans' health issues, but he spent more than half the time in sightseeing and shopping, the Washington Post reported.

The report comes on the heels of the resignation of Tom Price, the Health and Human Services Secretary, who was forced to resign on Sept. 29 following allegations of taxpayer-funded air travel.

VA revealed on Sept. 29 that the federal government paid for the flights for Shulkin and his wife, Merle Bari. The government also provided per-diem reimbursement for their meals and other expenses.

The VA representative did not respond to the Washington Post on how Bari became eligible for reimbursements and taxpayer-funded airfare, saying that she was traveling on "approved invitational orders." The spokesperson also refused to reveal the flight fare and the total reimbursement amount. Under federal guidelines, Bari could have been eligible for per diem reimbursement of \$3,600.

Alaigh defended the trip, telling the newspaper it enabled valuable exchange of ideas with their British and Danish counterparts.

"Were there some breaks we got? Sure. But they were reasonable. They were not at the expense of what we had committed to do: representing our country and showing our commitment to veterans," Alaigh told the Washington Post.

A travel itinerary released by the Department of Veterans Affairs shows that Alaigh and her husband accompanied the secretary on a separate flight.

The Indian American physician is reported to have submitted her resignation for family reasons on Sept. 25, effective Oct 7, according to the Military Times . It reported that Alaigh, who assumed the post in February, said in a letter to staff: "I want you to know that it has been my greatest honor to serve (VA) Secretary (David) Shulkin, each one of you and all of our veterans.

"As I prepare to now leave Washington, I thank you sincerely for what you have helped us to accomplish, moving from being the country's largest integrated healthcare system into, truly, America's greatest healthcare system."

Her resignation, however, has not been publicly announced, and Alaigh made no reference to it in her interview with the Washington Post.

Alaigh is an internist, who completed her residency at the State University of New York in Stony Brook. She earlier served as national medical director for GlaxoSmithKline, was cofounder of the Atlantic Accountable Care Organization in New Jersey, and a senior advisor to the Under Secretary for Health.

The Military Times reported that Carolyn Clancy, the deputy undersecretary of health for organizational excellence, will assume her post next month.

VA Press Secretary Curt Cashour defended the trip, saying that the visit, including the trip to the Wimbledon game, was reviewed and approved by the ethics counsel. He added that Alaigh's husband paid his expenses for the trip.

"These were important trips with our allies to discuss best practices for taking care of veterans. The secretary has been transparent on his down-time activities that were similar to what he would have done with his family over a weekend in the U.S.," Cashour said.

Shulkin attended a conference in London on July 19 to discuss mental health issues with representatives of Britain, Canada, Australia and New Zealand, following meetings in Denmark from July 12-14.

During the trip, Shulkin and his team also visited Copenhagen's Christiansborg and Amalienborg, and London's Buckingham and Kensington.

Travel Scandals in Trump Administration

Many senior members of Congress, including two key Republicans, have expressed concerns over the travel scandals involving members of the Trump administration. House Oversight Committee Chairman Trey Gowdy and Democrat Rep. Elijah E. Cummings wrote to the White House that official travel should not be connected to personal use.

Sen. Charles E. Grassley, the Chairman of the Senate Judiciary Committee, wrote to Trump asking what steps the government has taken to "ensure Cabinet secretaries use the most fiscally responsible travel in accordance with the public trust they hold."

[Back to Top](#)

2.6 - WOAY (ABC-50): [Beckley's Inaugural VAMC Veterans Art Show](#) (30 September, Daniella Hankey, Oak Hill, WV)

The Beckley VA Medical Center hosted its inaugural art show this Saturday at the Medical Center auditorium.

The Veteran's Council planned the art show as one of its projects. Using the tag line "healing through creativity", the art show features projects that have helped Veterans to heal. Nationwide, VA medical facilities use the creative arts as one form of rehabilitative treatment to help Veterans recover from and cope with physical and emotional disabilities.

"It helps our veterans heal through our PTSD, military trauma and whatever else we have gone through and we're having an art show displaying it," said Melissa Burnett, Vice President of the Veteran's Council.

Veterans submitted their pieces including paintings, models, wood crafts, needlework and more. The art submissions will be judged by fellow veterans who will vote for their favorite piece of art.

Vern Hughes, a Navy Veteran and volunteer at the Beckley VA, submitted five of his pieces for the show.

"I'm trying to help people through their healing a little bit and give them a place to display their artwork and hopefully this will become an annual event," said Vern Hughes, a Navy Veteran.

In the past, Hughes has given his handmade cards to patients, employees and visitors at the VA.

"One veteran that use to be upstairs, his roommate got a card from his granddaughter and he said, I've never gotten a home made card, so his birthday came around and I made him one and he was just so excited. I make about 150 cards and hand them out to veterans, visitors and patients," said Hughes.

Awards were presented for first, second and third place. Veterans were able to submit up to five pieces. Additionally, all winners of the show were encouraged to submit their pieces to the 2017 National Veterans Creative Arts Festival to be held later this year.

[Back to Top](#)

3. Access to Healthcare

3.1 - Times Union: [What's the point of jailing this veteran?](#) (30 September, Chris Churchill, 1.5M online visitors/mo; Albany, NY)

Scott Gilligan had just turned 26. He was a guy from Cohoes and a Navy petty officer stationed in Puerto Rico. One day, he took a drive that would change his life.

Gilligan was stopped at a light when a man walked up to his car and stuck a gun in his face. A second armed man climbed into the back seat.

As Gilligan thought of his pregnant wife, the men ordered him to drive to an isolated section of rain forest. There, they savagely beat the soldier and left him for dead. He walked six hours to call for help.

That was on Good Friday in 1995.

Gilligan returned to civilian life in Cohoes soon after, but struggled despite keeping steady jobs. He drank too much. He got divorced. His two sons became men. He was often anxious or depressed, but he held it together.

Then, two years ago, everything fell apart.

He lost his job at the Von Roll factory in Rotterdam, which meant he lost his health insurance. He couldn't afford the prescriptions that made his life bearable.

So he drank more. He started smoking crack. He slid into addiction.

"It was the only way I could make it through the day," Gilligan told me. "I wasn't in my right mind."

Gilligan hit bottom on Jan. 22, 2016.

That was the day he broke into a friend's house and stole a TV, two iPads and a laptop. He was arrested within hours and immediately confessed to the crime.

The arrest was a blessing — the jolt that turned Gilligan around.

He devoted himself to treatment and got clean. Doctors at the VA hospital in Albany told him he had post-traumatic stress disorder from the attack in Puerto Rico. It was like a revelation, an explanation for so much of what he'd been feeling.

Gilligan has been sober for 17 months now. He works at Saratoga National Cemetery, where he digs and maintains the graves of veterans.

"We make sure they get the respect they deserve," he said. "It's like therapy to me."

Gilligan typically attends seven Alcoholics Anonymous meetings a week. When he rises to speak, the 48-year-old hopes he's a role model, especially for veterans. That's what he wants his life to be now. He wants to help.

But there's a problem.

Gilligan still faces a second-degree burglary charge. His trial starts Monday. If convicted, he could face at least three-and-a-half years in prison.

But why? What good will that really do? Doesn't the veteran deserve a break?

"None of this would have happened to him, nor would he be suffering the effects, but for volunteering to serve his country," Gary Horton, director of the Veterans Defense Program at the New York State Defenders Association, wrote in a letter supporting Gilligan.

"He deserves the consideration and leniency of the justice system."

That seems obvious. And hardly groundbreaking. Some New York counties have Veterans Courts to deal with precisely these scenarios — to recognize the special difficulties faced by military veterans and to give them the understanding they deserve.

Albany County doesn't have a veterans court, but Gilligan would seem an ideal candidate for its drug court. There, he could avoid prison time and continue his treatment under supervision.

A lesser burglary charge would also keep him out of prison.

But District Attorney David Soares has refused to cut Gilligan any slack. As of Friday afternoon, he had offered no deals that don't involve prison time. He has insisted on criminal charges that mandate a prison sentence if Gilligan is convicted.

That led Gilligan's exasperated attorney, Michael Feit, to take an unusual step: He asked the court to remove Soares' office from the case, arguing the district attorney has no valid reason to oppose treatment as an alternative to prison.

"Everything Mr. Gilligan has done shows that he should not be locked in a cage," Feit said.

Gilligan has no criminal record, save for a drunken-driving conviction in 1996. He was an exemplary soldier.

Albany County Judge William Carter was sympathetic.

"I'm very well aware of Mr. Gilligan's plight," he said during a recent hearing on Feit's request. "I'm very well aware about how hard he has worked in treatment. And I don't disagree that he is the poster child for a veterans court."

But Carter found no legal reason to remove Soares' office from the case.

"I can't do that any more than I can make them actually care about the things they profess to care about and put into action some of the words that they speak," said the judge, who has tangled with Soares before.

Soares' office declined to comment, so I can't say why the district attorney is taking so harsh a position. I can't comprehend why he would.

[Back to Top](#)

3.2 - The Olympian: [How we can help improve the quality of life for military veterans](#) (30 September, Dr. Rachel Wood, 851k online visitors/mo; Olympia, WA)

There are many things that contribute to our quality of life here in Thurston County: where you live or work, what you eat for breakfast, or how much stress you have in your day-to-day life.

It's common sense that your health affects your quality of life, but it's also true that your quality of life can affect your health. To improve our quality of life, we can change what we're eating, where we're living, or even where we work. But for many, those changes are difficult; for others, such as our military veterans, there are unique hurdles that can be holding them back.

According to the National Homeless Veteran Coalition, nearly 200,000 American veterans face this reality every year. Military service members may have been away from home for long stretches of time. They may be dealing with Post-Traumatic Stress Disorder, pain or depression. There may be injuries (visible or not visible) they have to overcome. This is all on top of the stress of navigating health care, finances and family life.

But there are tools and programs in Thurston County that are designed to help veterans address these issues, and get the support they need.

Finding work can be a major hurdle for veterans, and one that affects all areas of their lives, including their health. Service members entering the job market after serving with distinction and honor and carrying out their missions regardless of the circumstances often find it difficult to translate their skillset into the civilian equivalent. Many feel they have to re-invent themselves. Their skills, although sharp, are hard to define to a new employer. They may need to find a new industry, learn new jargon, or even move to a new place. Worse, they may have to start at a near entry-level positions.

Transitioning out of the military can be the hardest mission that a service member will have to endure. In those circumstances, stress and depression may become issues, and veterans may feel alone and isolated. The stress it causes resonates through the entire family, straining relationships.

But there are numerous programs to help veterans make this transition as smooth as possible while maintaining their dignity in the process. While it's true that the civilian world lacks machine gunners and nuclear weapons technicians, many managers are seeking leadership, initiative and motivation in their workers. Luckily for us, there is a deluge of veterans with these intangible qualities seeking employment each day. Both veterans and civilian managers can benefit greatly by simply learning to speak a similar language.

There are tools, and people, that can help. Veterans looking to find a new job can use a "skills translator tool" to help reframe their experience in a way civilian employers will understand. Titles such as "Squad Leader" and "Section Chief" can be retooled to highlight leadership qualities, for example, and provide an understanding of the responsibilities that are embedded in those unfamiliar titles.

Among the resources:

National Center for PTSD: <https://www.ptsd.va.gov/public/types/war/index.asp>

U.S. Department of Veterans Affairs resource locator: <https://maketheconnection.net/resources>

Veterans Administration military skills translator: <https://www.vets.gov/employment/job-seekers/skills-translator>

Lacey Veterans Services Hub: <https://www.laceyveteranshub.org/>

Veterans have worked diligently for their country around the globe. With the right tools and resources, we can support veterans re-integrating to civilian society and help them attain the quality of life they are seeking.

3.3 - Los Angeles Daily News: [L.A. veterans' health care has room to improve](#) (29 September, Editorial Board, 883k online visitors/mo; Woodland Hills, CA)

A Veterans Administration regional health care system is more than a corner of the federal bureaucracy. It's a promise to the men and women who served this country in the military. It's part of Americans' bargain with young people who sign up for duty.

You take care of us; we'll take care of you.

That's why it causes more than the usual disappointment in government to learn the VA health-care system in our area isn't as good as it could be.

The VA has released results from the rating system it uses to assess medical service delivery at its 140 service centers. The system assigns regional systems scores from 1 to a glistening 5. So, what score did the VA Greater Los Angeles Healthcare System receive?

That puts the L.A. VA in the bottom 10 percent of the nation's VA systems.

VA officials emphasize that a relatively low score like L.A.'s doesn't mean veterans don't get good care. Regions' scores are meant to compare one to the other. The goal is for low scorers to learn from high scorers — and improve.

Evidently, there's a considerable range of quality within one rating. According to the list on the VA website, although L.A. got a "1" this year, it actually has shown "large improvement" from the last time scores were assigned under the VA's Strategic Analytics for Improvement and Learning (SAIL) rating formula, which rates the systems on metrics used by the private sector and special metrics measuring access and quality of care.

Still, people in Greater L.A. should be sorry to see that medical service delivery isn't as good as it is in other places. Next door, the Long Beach Veterans Healthcare System rated a 3, while San Diego, San Francisco and Sacramento also got 3s. Among the nation's other big cities earning top-shelf 5s were Boston, Cleveland and Pittsburgh.

All American remember the scandal a few years ago when long delays for VA care were revealed.

That scandal led to Congress infusing the VA with funding, including billions for hires. An NPR report last January showed staffing additions have come inconsistently, and L.A. was among the systems getting less than needed.

VA officials here vow to continue their progress. We can see there's room for improvement.

3.4 - La Crosse Tribune: [Thanks to VA for great service](#) (30 September, Eugene Smithart, 823k online visitors/mo; La Crosse, WI)

I recently retired from Trane after more than 40 years. As a former U.S. Marine who served in Vietnam, I was able to get coverage from the Veterans Administration to replace the health coverage Trane had provided for all those years.

With all I had heard about the Tomah VA, I didn't know what to expect in the way of quality of service I would receive.

Well, I am pleased to report that the service I have received has been nothing short of amazing from both the Tomah and La Crosse VA personnel.

In talking to a number of people, this reflects a remarkable turnaround in the past nine months and I want to thank everyone involved.

To everyone at the VA, thank you. Keep up your wonderful efforts.

Eugene Smithart, Onalaska

3.5 - WHAM (ABC-13): [Groundwork underway for new VA clinic in Henrietta](#) (29 September, 817k online visitors/mo; Rochester, NY)

Henrietta, N.Y. - There will soon be a new location for local veterans to go for services and healthcare.

A ceremonial groundbreaking took place Friday afternoon in the drizzle for the new VA clinic on Calkins Road in Henrietta.

The 84,000-square-foot building will expand primary care services, along with mental health assessments and social work support.

The bigger facility will also have room for an eye clinic, women's healthcare and diagnostic imaging.

Carnegie Management and Development Corporation will construct the new facility and lease it to the VA for 20 years.

The new clinic should be fully constructed in the spring of 2019.

[Back to Top](#)

3.6 - WSBT (CBS-22): [Local veterans say they're glad to see new VA clinic in Mishawaka officially open](#) (30 September, Cassidy Williams, 449k online visitors/day; Mishawaka, IN)

The new St. Joseph County VA Clinic in Mishawaka is officially open.

The 90,000 square foot facility offers a variety of services.

The \$38 million dollar project finished on time and on budget

Senator Joe Donnelly and Congresswoman Jackie Walorski were there to get a tour of the new facility.

They both see this is as just the start.

"This is just the beginning," said Walorski. "You know this isn't the end of taking care of veterans. This is the beginning of taking care of veterans in our district and throughout Michigan as well."

Dozens of veterans also came out to see it. The facility will serve almost 9,000.

Each veteran will save travel time for some procedures and exams.

The new Mishawaka facility offers more services than the old clinic in South Bend. Meaning they won't always need to leave this area.

George Proctor spent a large portion of his life serving in both the Marines and the Army.

"23 years, 9 months, and 18 days. I say 24 because that's close enough."

Despite his decades of service, George says he rarely used the benefits provided by the VA.

Living in Mishawaka, the services in Indianapolis or Fort Wayne were just too far away.

"I'm what you call a busted wing," Proctor said. "I broke up my back on third jump at Fort Bragg. It's just too far for me to drive and be comfortable." "

Now that is no longer a problem.

Proctor got his first look at the new facility in Mishawaka. Not only is it closer, but the city has added a bus stop to serve the clinic.

Mishawaka's Mayor also says plowing the road will be a priority in the winter.

Proctor already has ideas for how to use it.

"probably for prosthetics, orthopedics, dermatology, my eyes, whatever."

The facility can also be used as a place to socialize.

A coffee shop inside hopes to bring veterans together, and the socializing has already begun.

The veterans say they are happy to have it for themselves, and for the veterans yet to serve.

"I'm very glad to see it, because it is in my backyard."

Half of the services offered at the facility have already begun.

The final part -- urology and podiatry services -- are expected to open on Decemeber 11.

Address: 1540 Trinity Pl, Mishawaka, IN 46545

Phone: (574) 272-9000

3.7 - The Post and Courier: [South Carolina veterans react sharply to Ken Burns Vietnam documentary](#) (30 September, Bo Petersen, 319k online visitors/mo; Charleston, SC)

Jerry Davis won't watch the Ken Burns' documentary on the Vietnam War, he tells you. The bayonet scar still plainly shows on his eye.

"I saw it 'real time' and I don't want to see what someone else thinks," said the 76-year-old Marine Corps veteran from West Ashley, who set up communications under fire on hilltops in Vietnam.

Chuck Blankin did watch.

"I just want to see somebody held accountable for what they turned their back on," said the 65-year-old Navy veteran from James Island, his gregarious smile gone grim. He had a river patrol boat blown out from under him.

Emotions flared and nightmares re-awoke for veterans across South Carolina as the 10-episode, public television special "The Vietnam War" finished last week.

Among the more than 130,000 veterans of the era still living in the state, many opted to ignore it. For the others who did watch, the broadcast was more than a documentation. It was an affirmation — reassuring or not — of what happened in front of their eyes.

"The vets have wanted to talk about it," said Sonya Campbell, director of the Columbia Vet Center, about the uptick in sessions in the show's aftermath.

The centers are an outreach, counseling and referral service for troubled veterans. The Charleston Vet Center put together round table sessions at some veterans' request so they could talk it out.

"It has brought up a lot of issues for them," said Director Emily Shannon.

"They're saying, 'This has validated a lot of what I've been saying and believing for years,'" said Curtis Lucas, a psychologist with the Myrtle Beach Vet Center.

But it's been difficult, Lucas acknowledged. A lot of the vets he works with bought the video set or taped the show, wanting to watch only as much as they could handle at a time.

Some veterans who watched came away with new insights about the divisive conflict. Much of the thrust of the PBS documentary is how U.S. leaders across multiple presidential administrations knew there was little chance of U.S. victory in Southeast Asia but kept pouring men and materials into the conflict.

"Why you were there, it made sense at the time," said Eugene E. Coakley, 72, of North Charleston, an Air Force veteran who did maintenance work on F-4 fighter jets launching from a base in Thailand.

"I learned some things I never heard about before," said Craig Burnette, 71, of Inman in the Upstate. He led an Army platoon into firefights against the Viet Cong and North Vietnam army.

"I was very angry. I was sad. I was frustrated. I saw all these people making political decisions (in contradiction to what people on the ground were telling them)," he said.

Burnette stopped watching episodes when American troops like his began to be featured. He had trouble falling asleep.

"I'm worried for the (reactions of) other vets and their families, plus the families with names on the Wall," he said, referring to the Vietnam Veterans Memorial on the National Mall in Washington, D.C., which lists the names of some 58,220 U.S. service people who died in the war.

An estimated 895 South Carolinians died in Vietnam.

During a recent interview, Davis and Blankin sat at a table in the American Legion Post 147 on James Island. The bar chatter quieted as they talk. Like a lot of combat veterans, they don't go to fireworks shows. Seemingly mundane things can set off memories that, as Davis said, many thought had been buried. Davis recoils from the smell of coconut. For Blankin, it's burning rubber.

When Davis' eight-man crew was attacked on a hilltop, he was gashed in the face as an enemy fighter leaped over him. He thought he had been butted by a rifle until it started to bleed.

"I pulled out my .45 pistol and shot him," he said.

Blankin commanded a "river rat" patrol boat through the jungle when a rocket-propelled grenade blew the hull apart under him, killing one of his seven-man crew.

"You don't know what's around the next bend. The banks are sprayed bare by Agent Orange. You know, you go into the Navy, you just don't think you're going to be doing things like that," he said.

Like a lot of others, both men struggled with post-traumatic stress disorder but have come to their own acceptances.

"Some things are just right there. They will always be right there," Davis said. "The only thing, you can't dwell on it. That was then. This is now. When we came back, we didn't call it going home. We called it going back to the real world."

At times, the television special irritated Blankin, he said. Jane Fonda (featured protesting in North Vietnam in support of the enemy during the war) and John Kerry (featured testifying to Congress about American atrocities after he returned from combat), "They just stick in my craw," he said.

Both veterans returned home on transports also carrying the caskets of other service people — Davis on a boat "with a hull full of bodies," Blankin on a C-130 plane with caskets set in the cargo hold the soldiers' seats lined.

"Everything that left had bodies on it," he said. "When I felt that plane come off the ground (in Vietnam), that was the best I'd felt in a long time."

[Back to Top](#)

3.8 - South Bend Tribune: [Viewpoint: St. Joseph County clinic's grand opening fulfills a promise to our veterans](#) (29 September, Sen. Joe Donnelly (D-Ind.), 274k online visitors/mo; South Bend, IN)

When we care for our veterans, we both honor their service, and we reinforce our values.

Yet for too long, it was a struggle to provide veterans in our community convenient access to quality health care. Veterans from South Bend, Mishawaka, Elkhart, LaPorte and Plymouth have regularly had to make a two-hour trip to VA facilities in Chicago or Fort Wayne to see a doctor. Veterans, family members and their caregivers often have to fight traffic and bad weather to get the health care they earned through their service to our nation. For those veterans unable to drive themselves, making the trip often involved taking a Disabled Americans Veterans van all the way to Fort Wayne, possibly spending an entire day in transit, receiving care, and waiting hours for other DAV passengers to receive their care too.

For the last 10 years — in the U.S. House of Representatives and in the U.S. Senate — it has been my mission to work alongside veterans in north central Indiana to provide the finest VA care possible, and I am proud that today we will officially open the St. Joseph County VA Clinic.

And while the promise we are fulfilling today seems simple, the process was long and full of challenges. Alongside our local veterans, we began working on the clinic in 2007, holding roundtables and meetings to understand the specific needs of Hoosiers. Through each step of the decade-long process — gathering the facts necessary to make our case for a new VA clinic; securing VA approval, congressional authorizations, as well as funding; cutting through red tape to contract, permit, and build the new clinic; and even locating a Transpo bus stop at the clinic to accommodate local veterans and employees — our community stood up, answering the call to make good on our promise to provide access to quality health.

I want to recognize our entire community, the VA, veterans service officers and other veterans advocates, and local elected officials, for their persistence and tireless work that made the St. Joseph County VA Clinic a reality.

Today we officially open a new 89,000-square foot, state-of-the-art St. Joseph County VA Clinic that is expected to serve up to 13,000 area veterans. Our veterans will be able to receive a range of services from primary medical care, mental health care, audiology, radiology, physical therapy, podiatry, care for post-traumatic stress disorder, substance abuse counseling, traumatic brain injury care, tele-health, and many other services. Perhaps, more importantly, they will receive these services right here in north central Indiana.

Today's grand opening is a significant milestone. It's the culmination of the dedication and determination of the entire community, and it's an example of what we can accomplish when we work together. More importantly, it fulfills an important part of our promise to our veterans.

Joe Donnelly, D-Indiana, is a U.S. senator.

[Back to Top](#)

3.9 - The Herald-Dispatch: [Look for these warning signs to help prevent suicide](#) (1 October, Debbie Brammer, 192k online visitors/mo; Huntington, WV)

Thirty-nine stones lay scattered beneath the leafy branches of a young maple tree. Each stone bears the name of a loved one who was lost to suicide. Billy, Rita, Scott are among the names painted on the stones, representing both male and female, young and old, because suicide has no respect for gender or age.

This Tree of Remembrance, planted on the lawn of the Huntington VA Medical Center (VAMC), stands as a solemn reminder of lives cut short and the families and friends who were left behind to grieve. The tree is not only a memorial, but it also supports the healing of the families and friends.

Suicide prevention is a top priority of the Department of Veterans Affairs. In a recent message to employees, Huntington VAMC Director Brian Nimmo pointed out that suicide is preventable. September was designated Suicide Prevention Month and now is a perfect opportunity to change the way the public thinks about suicide through education about warning signs

"The statistics are startling," Nimmo said. "An average of 20 veterans die from suicide each day, and 67 percent of those deaths were a result of firearm injuries. But, did you know only six of the 20 were users of VA health services." He encouraged staff, who encounter hundreds of veterans and their friends and family members each day, to not only reach out to educate the public but to make sure they know the warning signs, too.

The warning signs include significant changes in behavior or mood such as:

>> sleeping a lot more or a lot less.

>> quick to anger, more withdrawn.

>> drinking more or using drugs.

>> engaging in high risk behavior.

>> expressing feeling of hopelessness or saying loved ones would be better off without them around.

If these changes are noticed, encourage the veteran to contact the Veterans Crisis Line or make the contact yourself. The toll- free number is 1-800-273-8255, and press 1, or chat online at VeteransCrisisLine.net, or send a text to 838255.

The Huntington VA has two suicide prevention coordinators, Deanna Stump and Julie Brawn, who work to raise awareness of VA's resources and foster communication and education among veterans, community organizations and the public at large. They provide intensive case management for those identified as being at risk.

Unfortunately, VA and our suicide prevention coordinators cannot do it alone, we need the help of our communities. To learn more about suicide awareness and prevention go online to <http://www.VeteransCrisisLine.net/BeThere>, or <http://maketheconnection.net>.

Debbie Brammer is public affairs officer at the Huntington VA Medical Center.

[Back to Top](#)

3.10 - FierceHealthcare: [VA proposed rule would override state licensing restrictions to expand access to telehealth](#) (29 September, Evan Sweeney, 140k online visitors/mo; Washington, DC)

The Department of Veterans Affairs has issued a proposed rule that would allow VA providers to treat patients in any state via telehealth, regardless of where they are licensed to practice.

The proposed rule would override state licensing restrictions that the agency says are limiting its telehealth program and allow VA physicians to treat patients anywhere in the country using the VA's telehealth technology.

That change is a critical part of the VA's "Anywhere to Anywhere VA Health Care" program, unveiled by VA Secretary David Shulkin, M.D., and President Donald Trump last month. During that announcement, Shulkin said he was working with the White House's Office of American Innovation and the Department of Justice to issue a new medical practice regulation to support telehealth initiatives.

According to the proposal, "many VA medical centers" have not expanded telehealth programs because of state laws, and "many physicians" refuse to practice telehealth out of fear they will jeopardize their medical license.

"As VA's telehealth program expands and successfully provides increased access to high quality healthcare to all beneficiaries, it is increasingly important for VA health care providers to be able to practice telehealth across State lines and within states free of restrictions imposed by State law or regulations, including conditions attached to their State licenses," the rule states.

Rather than lobby each state to remove licensure restrictions, the VA argues that preempting state law would allow the agency to quickly expand telehealth services.

“By allowing VA telehealth providers to more easily treat patients across state lines, we can ensure that recent advances in technology-enabled care reach the most deserved among us and spur better outcomes for the 20 million veterans in the VA system today,” Health IT Now Executive Director Joel White said in a statement supporting the regulatory change.

Currently, VA providers can waive state licensing requirements if both the physician and the patient are in a federally owned facility. But with the development of a new mobile app, the VA wants to reach veterans in their homes to expand access to mental health services and make it easier for those with limited mobility to get necessary medical care.

This week, behavioral health advocates came out in support of the VETS Act of 2017, which proposes similar regulatory changes. But the VA’s rulemaking process could move faster. The proposed rule will be open for comments for 30 days.

[Back to Top](#)

3.11 - The Sun News: [VA hospitals must be fixed - now](#) (30 September, Stephen Sherwood, 140k online visitors/mo; Myrtle Beach, SC)

I have written all my senators and one congressman, and yet nothing changes with the VA hospital.

I had major neck surgery in July and was prescribed four different opiates for pain. Now I cannot get anyone to prescribe any of these opiates, so along with being in pain, I am withdrawing from the opiates cold turkey. I would be willing to bet that if you and all your staff looked into this situation, you would find that there are countless other veterans who are also receiving this unethical and immoral treatment from VA hospitals nationwide.

Please do something other than what you haven't been doing. I am begging you as a proud veteran and a resident of the great state of South Carolina that you immediately do more than send them a letter or a phone call - that you actually look into this terrible treatment that myself and countless other veterans continue to receive at the hands of the VA.

STEPHEN SHERWOOD, MYRTLE BEACH

[Back to Top](#)

3.12 - The Joplin Globe: [Missouri's U.S. senators note bipartisan efforts](#) (29 September, Susan Redden, 76k online visitors/mo; Joplin, MO)

On the federal front, Missouri's U.S. Sen. Roy Blunt this week announced he and Sen. Richard Blumenthal had introduced bipartisan legislation to expand veterans' access to peer counseling specialists to better combat the risks of suicide and treat associated mental health conditions.

"Our nation has a responsibility to ensure our veterans have access to quality behavioral and mental health treatment," Blunt said. "Given their shared experiences, peer specialists are uniquely positioned to provide veterans the support they need in their recovery."

The Veteran Peer Act would establish peer specialists in patient aligned-care teams within the Veterans Affairs medical system to undertake veteran outreach, according to Blumenthal, a Democrat from Connecticut.

The Department of Veterans Affairs employs peer specialists to assist veterans in treatment for mental health and substance abuse disorders. The specialists support their fellow veterans and encourage recovery by helping them access veterans' health services and navigate the VA health care system and by teaching coping and positive behavior.

The VA was instructed by a 2012 executive order to hire and train 800 peer specialists by the end of 2013 to treat the estimated 1.5 million veterans needing mental health services.

Blunt's bill would expand veterans' access to the services by addressing current shortcomings that restrict specialists' participation in primary care services, along with the persistent stigma attached to seeking mental health treatment.

The measure would implement the program in 50 locations across the nation over a two-year period. It would also require consideration of rural and underserved areas when seeking locations.

Missouri's U.S. Sen. Claire McCaskill, a Democrat, on Thursday announced she had joined a GOP colleague to introduce what she described as "commonsense fixes" aimed at providing relief to some regional banks affected by burdensome requirements of the Dodd-Frank financial reform bill.

In a release, McCaskill said the proposed rules are aimed at small, regional banks to modify Dodd-Frank regulations that were never intended for banks that engage in ordinary consumer banking practices.

David Perdue, a Republican from Georgia, is co-sponsor of the measure. It serves as the Senate companion to a measure sponsored by U.S. Rep. Blaine Leutkemeyer, of Missouri, and passed in the House last year.

"When even some of the architects of Dodd-Frank agree the law is overly burdensome on regional banks, you know we've got a problem on our hands," McCaskill said. "This commonsense fix will untie the hands of our small regional banks and return to them to the flexibility to lend to Missouri customers who want to buy a house or start a business. I'm glad to join Congressman Leutkemeyer's efforts to help get this bill across the finish line in the Senate."

Perdue pointed out that Dodd-Frank overregulated regional banks by placing them in the same category as huge banks with a global reach, increasing their costs and limiting their ability to support their communities.

The legislation would lower the regulatory burden on regional banks by giving the Federal Reserve the flexibility to exempt them from certain Dodd-Frank rules that limit their lending

ability. Under the measure passed in the wake of the 2008 financial crisis, banks with assets over \$50 billion are subject to stronger regulations.

The proposed measure would relax rules for banks over the \$50 billion threshold if they are not designated as a Global Systemically Important Bank that, according to the Federal Reserve, could have an impact on international financial systems.

McCaskill said the threshold being applied to regional banks had been criticized by everyone from governors for the Federal Reserve to Barney Frank, the former lawmaker who authorized the legislation.

[Back to Top](#)

3.13 - Daily Messenger: [Improvements reported at Veterans Crisis Line](#) (29 September, Julie Sherwood, 74k online visitors/mo; Canandaigua, NY)

The Veterans Crisis Line — which has been criticized for calls rolling to voicemail, dropped calls and veterans put on hold for long periods — received a glowing report Friday.

U.S. Reps. Chris Collins, R-Clarence and Phil Roe, a Republican from Tennessee who chairs the House Committee on Veterans Affairs, discussed improvements following a tour of the crisis center at the Canandaigua VA Medical Center.

“The biggest problem we’ve had is timely access to care, so this is basically the front porch to that,” said Roe, after seeing the crisis center that opened in 2007 and is now one of two centers at the forefront of the VA’s efforts to address the alarming rate of veteran suicide. The call centers, in Canandaigua and Atlanta, Georgia, answer phone calls, texts and online messages from veterans, military members and their families.

“It’s very disturbing to me, the number of veterans we are losing to suicide, and not just veterans but Americans,” said Roe, a Vietnam veteran and physician. “When you lose more men and women to suicide than combat, something needs to be done.”

Roe and Collins were pleased with what they saw and heard. A panel of VA staff involved with the Crisis Line in Building 37, where dispatchers work the center, discussed improvements with the congressmen. Among those: the Veterans Crisis Line averaged 2,300 calls in the month of September at both call centers. Of those, an average of 1.3 percent of calls (about 30 calls) rolled over to a backup center. When phone lines are busy, calls are routed to another contracted call center. In the past few days that percentage dropped to less than half a percent.

The crisis line is now answering calls, on average, in 7.5 seconds, with 99 percent of calls answered within 20 seconds.

“I am very impressed, it was a great tour,” said Collins, whose district covers much of Western New York and part of the Finger Lakes including Canandaigua. “Folks here care about our veterans, their dedication is clear,” he said.

The VA plans to open a third call center this fall on the VA campus in Topeka, Kansas.

About 200 responders work at the Atlanta facility, and 310 work at the Canandaigua center, according to a Sept. 14 report by the military publication Stars and Stripes. The Topeka facility will bring the number of employees staffing the veterans crisis line to 610.

During the press conference, the congressmen were also asked about a federal funding cut of millions of dollars for the Veterans Outreach Center in Rochester. At issue is a \$2.1 million grant that the VOC has received annually for the last six years that was not renewed for 2018. The VOC of Rochester was one of 36 previous recipients of the funds through the VA's Supportive Services for Veteran Families program that did not get renewed.

The center in Rochester helps veterans in seven local counties and their families find reliable housing. The lack of funds would scale back services, and a satellite office at the Veteran's Outreach Center in Buffalo could close with staff losing jobs or being reassigned.

Roe said he couldn't say why the funds were cut. Collins mentioned a possible "paperwork snafu." Collins said this is not a partisan issue and he was going to fix the problem, beginning that afternoon, working with others in Congress.

3.14 - KXRM (FOX-21, Video, Updated): [VFW raises concerns over VA care](#) (30 September, Carly Moore, 60k online visitors/mo; Colorado Springs, CO)

A fallen service member has a group from the Veterans of Foreign Wars organization speaking out. Some members of the VFW are attributing his death to lack of care from the Colorado Springs Veterans Affairs hospital.

The widow of the service member was left overwhelmed and unprepared. She was concerned about her financial situation and was worried she would lose her house.

The VFW said it's extremely common for people to not have plans, to not know their benefits, and to not have documents on hand.

A small group of commanders at VFW Post 3917 turned it around.

Ray Belasco was a 20-year Vietnam veteran. He passed away at age 65, and some VFW members believe his death could have been avoided.

"It sound to me, people didn't really take him serious, didn't feel that he was really sick," said VFW Sr. Vice Commander Steve Kjonaas.

He went to the VA in Colorado Springs over the Labor Day holiday and was sent to an emergency room.

“Veterans have very unique diseases, illness and problems,” said Kjonaas. “That’s the difference between the Department of Veterans Affairs and any other civilian healthcare that you see.”

The VA facility in Colorado Springs doesn’t have an emergency room specifically for veterans. For that, they must go to Denver or to a local civilian emergency room.

“As with other outpatient clinics in the community, emergency services are not available at the PFC Floyd K Lindstrom VA Clinic in Colorado Springs,” the VA said in a statement. “We encourage anyone in an emergency situation to seek immediate treatment and care at their nearest emergency department, where appropriate services are available.”

After the emergency room released him, hospice care he was searching for wasn’t enough. He died just days later.

Belasco’s widow, Ute, was left with nothing: no money or plans for her husband’s funeral. She tried to sort things out, but was shut down without documentation.

“Once a service member dies, they cut off his pay,” said VFW Jr. Vice Commander Cindy Galvin. “If you don’t have the paperwork to go in and say, ‘Hey, I’m a spouse,’ then you don’t get the survivors pay.”

VFW members helped expedite the process. Something that could take one to three months was done in about two weeks.

“As a veteran myself, it makes me very happy to help,” said Galvin.

When Galvin was asked why she is also helping plan a funeral this Saturday, she said, “He’s a comrade and we never leave a vet behind.”

The American Legion Post 38 at 6685 Southmoor Drive in Fountain is hosting a memorial service starting at 11 a.m. Saturday. They want other former service members to come out and help support this fallen veteran.

Those close to Ute have released the following statement on her behalf:

Ute would like them to know about her being misquoted. She never said she was afraid nobody would show up for Ray’s funeral. Not a funeral, but to attend a memorial. She only reached out for help with this process, not for anything for her. She also wanted help with the way Ray was treated at Cheyenne Mountain Care Facility (Center) hospice provider. They showed extreme lack of care, compassion and dignity with his care. Ute wants to thank the Veterans of Foreign Wars for their help and all who have supported her and helped during this time.”

[Back to Top](#)

3.15 - KXRM (FOX-21, Video): [Colorado Springs widow gives final salute to veteran husband who died suddenly](#) (30 September, Sarah Ferguson, 60k online visitors/mo; Colorado Springs, CO)

The widow of a fallen Service Member left overwhelmed after he suddenly died, is able to give her husband, a Vietnam Veteran, the honorary send-off he deserves.

His wife, Ute was shocked when her husband Ray Belasco suddenly passed away at 65-year's-old.

Recently a local Veterans of Foreign Wars group heard the widow's story, with Members attributing his death to a lack of care from the Colorado Springs Veterans Affairs hospital.

"When we found out that the funeral home wanted to hold the funeral in the parking lot we couldn't have that," said VFW Jr. Vice Commander Cindy Galvin.

Saying because Ute didn't have the proper documentation complete after Ray's death, she was turned away from any funeral plans.

Fortunately, VFW Post 3917 took matters into their own hands and set-up a memorial at the American Legion Post 38 in Fountain.

"So many valued people; so many honorable people from different walks of life, from different organizations, different motivations who come here to honor the veterans," said VFW Sr. Vice Commander Steve Kjonaas.

Prior to the memorial, VFW Post 3917 also helped Ute collect the benefits her husband deserves, while assisting her with filling out the proper documentation.

"They weren't asking for anything; they weren't expecting anything, they didn't beg for anything, they just are very grateful, they didn't realize we were going to do all of this," said Galvin.

If you'd like to read more about Ute's story and her concern with the Colorado Springs Veterans Affairs hospital, click here.

3.16 - Finger Lakes Daily News: [VA Crisis Line Reports Improvements in Call Handling](#) (30 September, Joe Lasky, 53k online visitors/mo; Geneva, NY)

The Daily Messenger reports Congressman Chris Collins and Tennessee Representative Phil Roe toured the facility Friday, and reported that only 1.3% of calls are now rolling over to a backup center, with 99% of calls answered within 8 seconds.

The Crisis Line had come under fire in recent years for allowing as many as 30% of calls to go to backup centers.

The suicide hotline employs 310 at the Canandaigua center, with an additional 200 workers out of Atlanta, and an additional center in Topeka, Kansas set to go online later this fall.

3.17 - Inquirer.net: [US lawmaker files bill for full benefits for Filipino WWII veterans](#) (29 September, 14k online visitors/mo; Daly City, CA)

WASHINGTON, DC – Congresswoman Jackie Speier (CA-14) introduced H.R. 3865, the Filipino Veterans Fairness Act of 2017 on Thursday, September 28.

During World War II, about 250,000 Filipinos volunteered to fight alongside U.S. troops. As citizens of a commonwealth of the United States before and during the war, Filipinos were legally American nationals.

With American nationality, they were promised all the benefits afforded to those serving in the U.S. Armed Forces. But in 1946, Congress stripped many Filipinos of the benefits that had been promised by President Franklin D. Roosevelt. Of veterans of the 66 countries allied with the United States during World War II, only Filipinos were denied benefits.

Speier's legislation eliminates the distinction between the Regular or "Old" Philippine Scouts and the other three groups of veterans—Commonwealth Army of the Philippines, Recognized Guerrilla Forces, and New Philippine Scouts. Widows and children of Filipino veterans would be eligible for Dependency and Indemnity Compensation just like any other veteran.

"This bill rights a shameful wrong created when Congress rescinded a promise to Filipino veterans of World War II over 70 years ago," Speier said. "I will not rest until these heroes, and their families, receive the benefits they need and deserve. If America won't live up to its honor and duty to our allies and friends we may find ourselves alone in our next hour of need."

The 2009 American Recovery and Reinvestment Act contained a provision that provided a lump sum payment of \$15,000 for Filipino veterans who are now U.S. citizens and \$9,000 for non-citizens. But there have been problems with the implementation of this payment program. To be eligible, a veteran has to be on the so-called "Missouri List," an Army roster of eligible veterans.

The Missouri List is incomplete. A 1973 fire destroyed 80 percent of the records for Army personnel from 1912 to 1960. As a result, over 17,000 Filipino veterans have had their claims denied. The Filipino Veterans Fairness Act directs the VA to take into account alternative military documentation to determine eligibility.

"The Recovery Act payments were a start, but our nation must bestow the full status it promised these veterans in wartime," Speier concluded. "Their average age is 90. Fewer than 15,000 are still alive today, and they are dying at a rate of over 10 a day. For these veterans and their loved ones the time to act is now."

3.18 - Montgomery Herald: [VA awards grants to help at-risk Southern W.Va. vets, families](#) (29 September, 7k online visitors/mo; Montgomery, WV)

BECKLEY — Earlier this month, the Department of Veterans Affairs (VA) announced it has awarded \$343 million in grants to 288 nonprofit organizations to help low-income veterans and their families. More than \$2 million will go towards a community partner that assists veterans across the state, including southern West Virginia.

The grants were awarded under VA's Supportive Services for Veteran Families (SSVF) program.

In West Virginia, three SSVF programs received money from the \$343 million grants. One of them, West Virginia Community Action Partnerships, supports the entire state.

SSVF funding, which supports outreach, case management and other flexible assistance to rapidly re-house veterans who become homeless or to prevent veterans from becoming homeless. The funding helps the most economically vulnerable veterans avoid or exit homelessness.

In 2016, SSVF funding through WVCAP supported 589 veterans who were homeless or at-risk in West Virginia. As of July 31, 461 veterans had been helped, according to Leah Willis, SSVF coordinator for WVCAP.

"We are projecting to assist 600 veterans during the 2018 program year," Willis said.

"No veteran that served our country should be without a home or be facing that reality," said Stacy Vasquez, Beckley VAMC director and Army veteran. "Our homeless, health care and social work teams, along with community partners, successfully reduced the overall homeless Veteran rate in this region by more than 51 percent in 2016."

This year's recipients competed successfully for grants under a Dec. 7, 2016, Notice of Fund Availability. The funding will support SSVF services in fiscal 2018.

6. Strategic Partnerships

6.1 - WFED (AM-1500): [Major changes coming to DoD's TRICARE system Jan. 1](#) (29 September, Jared Serbu, 831k online visitors/mo; Washington, DC)

The Defense Department published new rules Friday that will make significant changes to the health insurance system that serves military family members and retirees on Jan. 1, altering the structure and fees of benefit plans, and, according to Defense health officials, making care more accessible.

Most significantly, new beneficiaries will have to make an affirmative decision to enroll in the TRICARE system and will only be able to do so during an annual open enrollment period. The open enrollment schedule will be the same as the one used by the Federal Employee Health Benefits Program that serves civilian DoD employees: November and December of each year.

The policy differs substantially from the one in place today, in which TRICARE-eligible beneficiaries receive health benefits automatically. With a few exceptions, family members and retirees who do not sign up during the open enrollment period will lose coverage in TRICARE's "purchased care" market for the following year. They would still be able to seek care in military-run hospitals and clinics, but only on a space-available basis.

The change was one of several Defense health reforms Congress ordered as part of the 2017 Defense authorization bill. But Vice Adm. Raquel Bono, the director of the Defense Health Agency, said the move to open enrollment made sense from DHA's perspective as well.

"We need to make sure that we have as much information as possible in order to design our provider network," she told reporters on a conference call. "We wanted to also come as close as we could to what's happening in the commercial sector, and we're intent on being able to create some efficiencies in the administration of our health plans. We see this as one of the mechanisms to do that."

But officials said the open enrollment change will not have any meaningful effect on beneficiaries for another year; 2018 will be treated as a "transition year," and anyone who's covered by TRICARE as of Jan. 1, 2018 will be automatically enrolled in the plan that most closely matches the one that serves them today.

The plans are changing as well, effective Jan. 1. Also at the direction of Congress, DoD is merging the existing TRICARE Standard and Extra benefits — the department's fee-for-service options — into a single plan called TRICARE Select.

Like Standard and Extra, Select will let patients use any authorized medical provider, but cost shares are lower when beneficiaries see in-network providers. In most ways, it will operate like the plans it's replacing, but with changes to the ways in which patients pay out-of-pocket costs.

Currently, the cost shares are based on a percentage of TRICARE's negotiated costs with a network provider (or of that provider's "allowable costs" if they're out-of-network). Starting next year, patients will pay a fixed, per-visit rate for in-network providers that varies according to the type of medical care they're receiving.

For example, under Standard and Extra, a family member of an active-duty service member is responsible for 15 percent of the bill for an outpatient visit from an in-network doctor and 20 percent for an out-of-network doctor. The new Standard plan would charge a flat \$27 fee for an in-network provider. The fees for TRICARE-covered retirees are higher: the same visit would cost \$35.

“We thought this was something that would be a little more predictable and a little more patient-friendly, and we also thought it was an easier construct for our providers to use,” Bono said. “What we tried to do was take an average, so it should be close to what people are currently paying.”

Another change: The rules set a new requirement that TRICARE Select’s provider network cover enough geographic territory to provide services to at least 85 percent of its beneficiaries, up from just over 60 percent under the existing Standard and Extra plans.

The fee structure for TRICARE’s Prime plan, the managed care option that primarily serves areas with large concentrations of military members, remains largely unchanged, but the rule makes several changes that officials said were designed to improve access to care.

For instance, if TRICARE’s contractors don’t offer an appointment with a managed care provider within a timeframe that meets DoD’s access standards, the patient will be allowed to see an out-of-network provider without paying additional fees. The department says it will also waive some of its previous requirements that patients get referrals or pre-authorizations before patients visit specialty care providers or urgent care clinics, and treatments for obesity are specifically called out in the rule as covered care.

None of the changes are applicable to currently-serving military members, whose medical care remains a government obligation for as long as they continue to serve on active duty, but the fees for family members whose sponsors join the military after 2018 will be different from those that are currently serving, depending on which TRICARE plan they enroll in.

The changes to TRICARE’s health plans were only a few of the tweaks Congress made to the military health system as part of the 2017 Defense bill.

The rules DoD published on Friday nominally implement some of them, but Bono said the department will have to undertake more careful study before the other changes take effect.

Among those changes, Congress ordered DoD to treat expenses for telehealth in the same way it covers in-person visits, adjust the staffing in its military treatment facilities so that the health specialists the military employs more closely matches the medical expertise the military is likely to need in wartime environments, and to start creating “high-performance” treatment networks in pockets of the country that are underserved by DoD’s system by partnering with the Department of Veterans Affairs and private-sector hospital networks.

“The rule gives us an opportunity to implement some of these things, but it’s going to be an iterative process,” Bono said. “We will be looking specifically at where it makes the most sense to partner with the civilian health care systems that are in the particular areas where we have our beneficiaries. It’s part of our network development and it’s an opportunity to build partnerships. We’ll be evaluating it, and this is one of the things that the open enrollment requirement if going to help us with in terms of understanding where those opportunities might exist.”

Veterans Affairs Media Summary and News Clips

1 October 2017

1. Top Stories

1.1 - Washington Times (AP): Prosecutors: Veteran Threatened to Kill Congressman, Staff (30 September, 24M online visitors/mo; Washington, DC)

Federal prosecutors say a New Jersey veteran who suffers from post-traumatic stress disorder threatened to assault and kill a congressman and the lawmaker's staff. Joseph Brodie allegedly made the threats via telephone and email on Sept. 15 and 19.

[Hyperlink to Above](#)

1.2 - Portland Press Herald: Maine veterans given substandard care are told it's too late to sue (1 October, Edward D. Murphy, 2.1M online visitors/mo; Portland, ME)

After crushing her ankle in a fall during ropes training at Fort Leonard Wood in Missouri, April Wood for years sought relief from the pain she endured after leaving the Army in 2004. Doctors with the Department of Veterans Affairs ultimately determined that the only way to get rid of her pain was to amputate her leg a few inches below the knee.

1.3 - The Day: VA groups, services tackle high suicide rates among female veterans (30 September, Julia Bergman, 440k online visitors/mo; New London, CT)

Female veterans are committing suicide at 250 percent the rate of female civilians, according to the Department of Veterans Affairs. In Connecticut, at least 10 of the 50 veterans who committed suicide in 2014, the most recent data available, were women. And that's only counting veterans receiving care at the VA.

2. Veteran and Employee Experience

2.1 - FOX News: Creators of lifesaving body armor, artificial pancreas among federal workers honored (30 September, Joseph Weber, 32.5M online visitors/mo; New York, NY)

Rory Cooper, a Department of Veterans Affairs researcher, received a Sammie for designing wheelchairs and other assistive technology equipment that has improved the mobility and quality of life for hundreds of thousands of disabled veterans and other Americans.

[Hyperlink to Above](#)

2.2 - The Hill: Trump's Cabinet and charter flights: What we know and don't know (30 September, Nathaniel Weixel, 11.8M online visitors/mo; Washington, DC)

Health and Human Services Secretary Tom Price resigned Friday following a series of public rebukes from President Trump and GOP lawmakers over his repeated use of charter and military aircraft, at public expense, for official travel. Price is far from the only Cabinet member to take private flights however, so his resignation isn't likely to stem the controversy.

[Hyperlink to Above](#)

2.3 - Sun Herald: [Cruise-in to salute veterans goes back to its roots with return to Centennial Plaza](#) (30 September, Scott Hawkins, 858k online visitors/mo; Gulfport, MS)
One of the most meaningful and memorable events at Cruisin' The Coast each year is the Salute To Our Veterans cruise-ins. "The whole purpose is to have the vets enjoy the cars," said Woody Bailey, executive director of Cruisin' The Coast.

[Hyperlink to Above](#)

2.4 - Herald-Mail Media: [Cruise-in unites community, veterans in common passion](#) (30 September, Richard Belisle, 158k online visitors/mo; Hagerstown, MD)
The main parking lot at the VA Medical Center shined bright in paint and chrome from a hundred sport and muscle cars, street rods, vintage Detroit autos and trucks lined up for Saturday's annual Country Roads Car Club Cruise-in. This was the third year for the event.

[Hyperlink to Above](#)

2.5 - Little India: [Undersecretary Poonam Alaigh Caught Up in Veterans Affairs Travel Scandal](#) (30 September, 44k online visitors/mo; Torrington, CT)
Acting Undersecretary Poonam Alaigh and her husband accompanied Veterans Affairs chief David Shulkin and his wife on a 10-day trip to Europe in July this year, which is being criticized as a taxpayer paid holiday junket. Shuklin and his entourage attended a Wimbledon tennis match, toured Westminster Abbey and took a cruise on the Thames, all while on an official visit for meetings with Danish and British officials.

[Hyperlink to Above](#)

2.6 - WOAY (ABC-50): [Beckley's Inaugural VAMC Veterans Art Show](#) (30 September, Daniella Hankey, Oak Hill, WV)
The Beckley VA Medical Center hosted its inaugural art show this Saturday at the Medical Center auditorium. The Veteran's Council planned the art show as one of its projects. Using the tag line "healing through creativity", the art show features projects that have helped Veterans to heal. Nationwide, VA medical facilities use the creative arts as one form of rehabilitative treatment to help Veterans recover from and cope with physical and emotional disabilities.

[3. Access to Healthcare](#)

3.1 - Times Union: [What's the point of jailing this veteran?](#) (30 September, Chris Churchill, 1.5M online visitors/mo; Albany, NY)
Scott Gilligan had just turned 26. He was a guy from Cohoes and a Navy petty officer stationed in Puerto Rico. One day, he took a drive that would change his life. Gilligan was stopped at a

light when a man walked up to his car and stuck a gun in his face. A second armed man climbed into the back seat.

[Hyperlink to Above](#)

3.2 - The Olympian: [How we can help improve the quality of life for military veterans](#) (30 September, Dr. Rachel Wood, 851k online visitors/mo; Olympia, WA)

There are many things that contribute to our quality of life here in Thurston County: where you live or work, what you eat for breakfast, or how much stress you have in your day-to-day life. It's common sense that your health affects your quality of life, but it's also true that your quality of life can affect your health.

[Hyperlink to Above](#)

3.3 - Los Angeles Daily News: [L.A. veterans' health care has room to improve](#) (29 September, Editorial Board, 883k online visitors/mo; Woodland Hills, CA)

A Veterans Administration regional health care system is more than a corner of the federal bureaucracy. It's a promise to the men and women who served this country in the military. It's part of Americans' bargain with young people who sign up for duty.

[Hyperlink to Above](#)

3.4 - La Crosse Tribune: [Thanks to VA for great service](#) (30 September, Eugene Smithart, 823k online visitors/mo; La Crosse, WI)

I recently retired from Trane after more than 40 years. As a former U.S. Marine who served in Vietnam, I was able to get coverage from the Veterans Administration to replace the health coverage Trane had provided for all those years. With all I had heard about the Tomah VA, I didn't know what to expect in the way of quality of service I would receive.

[Hyperlink to Above](#)

3.5 - WHAM (ABC-13): [Groundwork underway for new VA clinic in Henrietta](#) (29 September, 817k online visitors/mo; Rochester, NY)

There will soon be a new location for local veterans to go for services and healthcare. A ceremonial groundbreaking took place Friday afternoon in the drizzle for the new VA clinic on Calkins Road in Henrietta. The 84,000-square-foot building will expand primary care services, along with mental health assessments and social work support.

[Hyperlink to Above](#)

3.6 - WSBT (CBS-22): [Local veterans say they're glad to see new VA clinic in Mishawaka officially open](#) (30 September, Cassidy Williams, 449k online visitors/day; Mishawaka, IN)

The new St. Joseph County VA Clinic in Mishawaka is officially open. The 90,000 square foot facility offers a variety of services. The \$38 million dollar project finished on time and on budget. Senator Joe Donnelly and Congresswoman Jackie Walorski were there to get a tour of the new facility.

[Hyperlink to Above](#)

3.7 - The Post and Courier: [South Carolina veterans react sharply to Ken Burns Vietnam documentary](#) (30 September, Bo Petersen, 319k online visitors/mo; Charleston, SC)

Jerry Davis won't watch the Ken Burns' documentary on the Vietnam War, he tells you. The bayonet scar still plainly shows on his eye. "I saw it 'real time' and I don't want to see what someone else thinks," said the 76-year-old Marine Corps veteran from West Ashley, who set up communications under fire on hilltops in Vietnam.

[Hyperlink to Above](#)

3.8 - South Bend Tribune: [Viewpoint: St. Joseph County clinic's grand opening fulfills a promise to our veterans](#) (29 September, Sen. Joe Donnelly (D-Ind.), 274k online visitors/mo; South Bend, IN)

When we care for our veterans, we both honor their service, and we reinforce our values. Yet for too long, it was a struggle to provide veterans in our community convenient access to quality health care. Veterans from South Bend, Mishawaka, Elkhart, LaPorte and Plymouth have regularly had to make a two-hour trip to VA facilities in Chicago or Fort Wayne to see a doctor.

[Hyperlink to Above](#)

3.9 - The Herald-Dispatch: [Look for these warning signs to help prevent suicide](#) (1 October, Debbie Brammer, 192k online visitors/mo; Huntington, WV)

Thirty-nine stones lay scattered beneath the leafy branches of a young maple tree. Each stone bears the name of a loved one who was lost to suicide. Billy, Rita, Scott are among the names painted on the stones, representing both male and female, young and old, because suicide has no respect for gender or age.

[Hyperlink to Above](#)

3.10 - FierceHealthcare: [VA proposed rule would override state licensing restrictions to expand access to telehealth](#) (29 September, Evan Sweeney, 140k online visitors/mo; Washington, DC)

The Department of Veterans Affairs has issued a proposed rule that would allow VA providers to treat patients in any state via telehealth, regardless of where they are licensed to practice. The proposed rule would override state licensing restrictions that the agency says are limiting its telehealth program and allow VA physicians to treat patients anywhere in the country using the VA's telehealth technology.

[Hyperlink to Above](#)

3.11 - The Sun News: [VA hospitals must be fixed - now](#) (30 September, Stephen Sherwood, 140k online visitors/mo; Myrtle Beach, SC)

I have written all my senators and one congressman, and yet nothing changes with the VA hospital. I had major neck surgery in July and was prescribed four different opiates for pain. Now I cannot get anyone to prescribe any of these opiates, so along with being in pain, I am withdrawing from the opiates cold turkey.

[Hyperlink to Above](#)

3.12 - The Joplin Globe: [Missouri's U.S. senators note bipartisan efforts](#) (29 September, Susan Redden, 76k online visitors/mo; Joplin, MO)

On the federal front, Missouri's U.S. Sen. Roy Blunt this week announced he and Sen. Richard Blumenthal had introduced bipartisan legislation to expand veterans' access to peer counseling specialists to better combat the risks of suicide and treat associated mental health conditions.

[Hyperlink to Above](#)

3.13 - Daily Messenger: [Improvements reported at Veterans Crisis Line](#) (29 September, Julie Sherwood, 74k online visitors/mo; Canandaigua, NY)

The Veterans Crisis Line — which has been criticized for calls rolling to voicemail, dropped calls and veterans put on hold for long periods — received a glowing report Friday. U.S. Reps. Chris Collins, R-Clarence and Phil Roe, a Republican from Tennessee who chairs the House Committee on Veterans Affairs, discussed improvements following a tour of the crisis center at the Canandaigua VA Medical Center.

1.1 - Washington Times (AP): [Prosecutors: Veteran Threatened to Kill Congressman, Staff](#) (30 September, 10.8M online visitors/mo; Washington, DC)

CAMDEN, N.J. — Federal prosecutors say a New Jersey veteran who suffers from post-traumatic stress disorder threatened to assault and kill a congressman and the lawmaker's staff.

Joseph Brodie allegedly made the threats via telephone and email on Sept. 15 and 19.

Prosecutors say the 38-year-old Millville man was initially arrested on weapons charges Sept. 20 after state police went to his home to do a welfare check. They say Brodie fled out the front door with an assault rifle and tried unsuccessfully to fire it.

Brodie was charged Friday with threatening to assault a U.S. official. But the name of the congressman has not been disclosed.

Authorities say Brodie contacted the lawmaker to complain about a Department of Veterans Affairs clinic

It wasn't known Saturday if Brodie has retained an attorney.

[Back to Top](#)

1.2 - Portland Press Herald: [Maine veterans given substandard care are told it's too late to sue](#) (1 October, Edward D. Murphy, 2.1M online visitors/mo; Portland, ME)

After crushing her ankle in a fall during ropes training at Fort Leonard Wood in Missouri, April Wood for years sought relief from the pain she endured after leaving the Army in 2004.

Doctors with the Department of Veterans Affairs ultimately determined that the only way to get rid of her pain was to amputate her leg a few inches below the knee.

But less than a year after the amputation, officials at the VA hospital in Togus, where she was initially treated, called her in to admit that her care there was substandard and the reason for her amputation was, at least in part, due to the poor care she had received at the Maine VA hospital, which has 230 doctors and serves 42,000 veterans annually.

"I was sitting there crying because, up to that point, I thought maybe my bones just cracked and there was something wrong with me," said Wood, who is no longer able to work because of her disability. "They said, 'No, your doctor sucked.' "

Now, Wood and five other Maine veterans are suing, claiming that the VA fraudulently concealed that a podiatrist at the VA hospital in Togus gave them substandard care, subjecting them to years of pain that hospital officials now say could have been avoided. Their case is currently before U.S. District Judge Jon D. Levy in Portland, who will decide whether the lawsuits can move forward.

Federal lawyers, however, have moved to dismiss the cases, arguing that the veterans waited too long to file the suits, even though the VA has admitted that the podiatrist, Dr. Thomas Franchini, provided poor care and the VA took years to notify the veterans that there were problems in their treatment.

The suits come against a backdrop of sharp criticism of the Department of Veterans Affairs over the standards of care given to veterans, including issues such as monthslong wait lists for care and mismanagement that led to veteran deaths.

The first suit was filed by Wood, now 42, a Maine native now living in Missouri, who was in Army basic training in early 2004 when she fell about 20 feet from the ropes course, smashing her ankle. Franchini, who treated her after her honorable discharge and is now in private practice in New York, performed surgery on Wood twice. Neither surgery provided any relief from the pain, and she eventually underwent the amputation, performed by other surgeons in 2012.

VETS CITE PAIN, LACK OF MOBILITY

The suits filed by the five other veterans have since been combined with Wood's and allege the same lack of effective treatment by Franchini, although no one else was subject to such a drastic remedy as Wood's amputation. Franchini's treatment of the other vets included plates and screws inserted into their feet and ankles – with some of the hardware allegedly incorrectly placed – joints fused improperly and bones from other parts of their bodies implanted poorly, the suits say.

All of the vets said they have limited mobility, and pain in their feet, ankles and legs. In some cases, doctors outside the VA system have recommended additional procedures, but the vets fear those operations will only worsen their conditions.

Jack Downs, 77, of Fairfield said doctors have told him further surgery would worsen the osteoarthritis in the foot that Franchini operated on in 2008.

The Marine Corps veteran said he can feel one of the screws that Franchini inserted during that surgery. He still suffers numbness in his foot, and pain that shoots up his leg to his hip when he walks or drives.

But, he said, "I'm afraid if they take the screw out, my foot will collapse."

Franchini began working at Togus, the oldest veterans' facility in the country, in 2004 after a career as a Navy doctor – in fact, one of the people suing him was treated for a different ailment by Franchini in Rhode Island while both were in the Navy. Franchini is still a licensed podiatrist, even though he resigned from the VA after the agency told him to step down or he would be fired in early 2010, according to Chris Cashour, a spokesman for the VA.

In addition to substandard care, a VA investigation said it appeared that Franchini was "falsifying some medical records," according to an affidavit filed in the veterans' suits by Yuri Walker, the VA's director of risk management.

Franchini is now listed as one of three doctors in a private podiatry practice on Fifth Avenue in New York City. His Maine podiatrist's license lapsed in 2011, but he has an active New York license. Records in both states show that there have been no complaints filed against him, although Cashour said the VA has "broad authority" to report doctors in cases where care was

substandard or caused injuries. Cashour would not say whether the VA reported Franchini to medical boards, citing privacy laws.

DOCTOR DEFENDS HIS TECHNIQUE

In most cases in Maine and New York, complaints that have not been validated are not recorded in state licensing records available to the public.

Through a representative of his office in New York, Franchini said he would not comment on the suits, and the government, not Franchini, is named as the defendant.

However, in a 2016 post on his personal blog, he complained that the review of his performance at Togus came about after one patient complained, although the VA said it was an official with the hospital who raised concerns about the doctor's care. That complaint, Franchini said, led to a "second wave" in which VA officials reviewed the care for more than 100 of his patients. He alleged the VA review only found that his record-keeping was deficient, not his surgical techniques or patient care, although the VA called in dozens of patients in January 2013 to admit that the care provided by Franchini was subpar.

Letters were sent at that time to Franchini's patients in what the VA terms a "large-scale disclosure event," but Franchini described the complaints as unfounded.

"Now the true fact (is) that my notes were brief, but not my care," Franchini wrote in his blog, in which he also complains about the difficulty of finding a new job. "They could not find something that was wrong other than (sic) brief note-taking."

In an affidavit filed in one of the suits last week, Franchini again denied that his care was subpar and said he tried to give his patients "accurate and truthful information" about their conditions and the results of his surgical procedures.

Vets and politicians have been critical of the quality of the care provided by the VA nationwide. The criticisms include allegations of mismanagement that led to veteran deaths, wait times as long as six months for VA hospital care, and VA officials' attempts to hide substandard care. In 2014, auditors discovered that employees at 110 VA facilities kept secret waiting lists to hide the delays veterans faced when seeking care. In July, Veterans Affairs Secretary David J. Shulkin fired two top officials at the Manchester, New Hampshire, VA Medical Center and ordered a review of the hospital.

Legislators and advocates have since pushed to reform the VA medical system, including changes that would make it easier for vets to see doctors outside the VA system or go to hospitals nearer to their homes.

The VA began examining the care it provided in recent years and rated the hospitals it ran on the quality of care offered.

TOGUS WAS RATED 2 ON A 5 SCALE

A critical report in 2015 commissioned by the Office of the Inspector General in the U.S. Department of Veterans Affairs found scheduling problems at Togus mirroring those at veterans hospitals nationwide, saying employees didn't enter appointment requests for some patients who weren't willing to be seen within 14 days, the VA benchmark for a comprehensive

examination for first-time patients. Employees were directed at times not to log referrals in their computerized system.

In 2016, care at Togus was rated a 2 on a 5-point scale, with 1 the lowest rank and 5 the highest. The rankings used some of the same variables used to evaluate other hospitals, such as surveys of patient experiences and outcomes, complications, readmissions and deaths, as well as some measures more geared toward VA hospitals, such as access to care and the quality of mental health care.

The VA rankings said Togus has made a “large improvement” from 2015, the baseline year for the rankings.

“We are proud of our improvements in all of our care programs, including podiatry,” said Ryan Lilly, director of the VA Maine Healthcare system.

The suits, however, allege that Franchini provided substandard care from early on in his tenure at the hospital.

Andy Korsiak, 58, who settled in Maine after he was assigned to Brunswick Naval Air Station, said he suffered for years from a bone spur that was pressing into his Achilles tendon. He went to Togus, where Franchini recommended surgery. The day of the operation, Korsiak said, Franchini decided at the last second to also remove a second bone spur lower on his heel that had not been causing any problems.

“We’re going to be in there, why don’t we do that as well?” Korsiak said he was told by Franchini.

He never saw Franchini again after the surgery in 2007, Korsiak said. A nurse removed his stitches and essentially sent him on his way.

Korsiak, who lives in Troy, said he still deals with pain and problems resulting from the surgery. A VA doctor in Massachusetts found bone fragments left behind in his ankle and heel, Korsiak said, but “there was absolute silence from the VA” until six years later, when the VA wrote to say there may have been problems with his care by Franchini and asked him to return to Togus to discuss his case.

The other cases contain similar accusations, but the most egregious appears to be Wood’s.

Wood said joining the Army was a lifelong dream. But she reluctantly accepted an honorable discharge in September 2004 when the Army determined that her effectiveness as a soldier would be reduced because of the injuries she suffered in the fall. After her discharge, she went to Togus to deal with continuing problems in her ankle and was assigned to Franchini for care.

“He said he could fix it,” she said of her ankle, and she believed him.

Franchini operated to fuse the ankle joint to reduce the movement of the joint, surgery that took four hours instead of the two she had been told to expect. A metal plate and eight screws were inserted into her ankle, she said, but after the surgery, Franchini told Wood and her family said that he wasn’t sure of a good outcome because she had “mushy bones,” Wood said.

When the pain didn't subside, Franchini operated again to insert more screws to immobilize the joint. When that failed to provide relief, Wood consulted VA doctors in Massachusetts, who decided to remove all the hardware Franchini had inserted and put in a piece of bone from a cadaver and more screws.

But in 2012, another VA doctor performed the amputation after the determination was made that it was the only way to alleviate the constant pain Wood was experiencing.

In early 2013, she was called back to Togus to discuss her case, where officials told her that Franchini's care was substandard.

Ultimately, the VA determined that her care had resulted in a full disability. Wood said she no longer works outside her home, but makes a few hundred dollars a year writing adult romance books.

BETRAYED BY THE SYSTEM

Timothy Mansir, now 36, injured his foot after falling while in Iraq with the Marine Corps. After he was discharged in 2007, he went to the VA, where Franchini diagnosed an unstable ankle and performed an ankle reconstruction in 2008.

Finally, he saw a podiatrist who lived down the street from him in Oxford. A surgical procedure that doctor performed helped some, Mansir said, but "my ankle was severely messed up."

Finally he was called in to Togus in 2013, where VA officials told him that Franchini's initial care was to blame and the ankle reconstruction was "overly aggressive."

Mansir has since had additional surgeries by doctors outside the VA system, but still experiences pain and said he feels "hurt and betrayed" by the system. Mansir said he worked as a commercial electrician and then a testing technician, but he lost both jobs when the pain interfered with his work. He still has a severe limp, has to take frequent breaks when he walks and lives with his wife on Social Security and military disability.

"I held up my end of the bargain and went and served my country, and I expected to be taken care of," he said. Being told that his care was substandard "was like a huge slap in the face."

Mark Prescott said pain that developed in his regular runs led him to seek help, initially while on active duty in the Navy and later as a veteran.

He said he had always been a runner, which continued after he joined the Navy out of high school in 1983. But in the late 1990s, Prescott started experiencing pain in his ankle and learned he had broken a bone in the joint years earlier and never had it treated. He had surgery twice while still on active duty and then was treated at Togus after retiring.

"He had a very good bedside manner," Prescott said of Franchini. "He was always available to talk to and seemed like a guy you wanted to hang out with." Prescott noted, however, that Franchini never seemed to write anything down.

Franchini operated on Prescott twice, transplanting a piece of bone taken from his foot into his ankle to stabilize it, but Prescott only experienced more pain. Franchini gave him a brace,

Prescott said, but he was unable to use it because he had to tighten it on the inside of his ankle, which caused too much pain.

Still, Franchini told him he was “progressing normally,” the suit alleges. Prescott said he never suspected anything might be amiss until VA officials told him that he might not have been treated well.

A doctor from the VA in Boston showed him an X-ray that, he said, indicated that Franchini had overly tightened the piece of transplanted bone, creating a ridge that caused his pain, Prescott said.

KICKED WHEN YOU'RE DOWN

Like the others, Prescott was told he could file a claim with the VA that might result in a finding of a greater disability with an increased pension and guarantee of care going forward. That claim was rejected.

“They admitted that they had harmed me, but the other office said, ‘Well, there’s nothing we’re going to do for you,’ ” Prescott said. “That’s sort of like kicking you when you’re down. To listen to the government, they should have known that we were improperly treated.”

In his suit, veteran Kenneth Myrick of South Portland said Franchini operated on his ankle at Togus in 2005 but he continued to experience “severe pain” in his left leg after the procedure despite additional surgeries at the VA in Boston. The VA told him in 2013 that the original surgery by Franchini resulted in “nerve entrapment,” which Franchini and other doctors failed to see in examinations after the original surgery. Franchini’s original surgery was “substandard,” the VA told Myrick.

Both Myrick and his lawyer, David Kreisler, have declined to comment on the suit.

Downs, the Marine from Fairfield, said his issues with the care provided by the VA go beyond the surgery Franchini performed on his foot in 2008.

Downs, who served in the Marine Corps for two years in the late 1950s, said the top of his foot had collapsed. Franchini told him it could be fixed by fusing a bone and operated in 2008.

Downs had follow-up appointments during which X-rays and scans were taken, but when Downs and his wife moved to Florida, Franchini didn’t contact him and never got in touch with VA doctors in Florida. According to his suit, the X-rays and scans indicated that the fusion had not succeeded and that a screw might have been improperly placed, but Downs was never told about those findings.

After the couple moved back to Maine, Togus officials told Downs that his care may have been inadequate and an outside doctor told him that the metal plate Franchini put in was too small to allow the bones to fuse.

Now, Downs – who used to walk 5 miles a day – suffers numbness in his foot when he tries to walk. If he drives, the pain starts in his foot and then travels up his leg to his hip.

Downs said he thinks Franchini never ordered physical therapy for him because he knew the therapists would discover that the surgery wasn’t right.

After the surgery, Downs said, he believes the VA dragged its feet on informing him and other Franchini patients that their care might have been substandard in order to run out the clock on time limits for filing a suit.

"I truthfully feel they stalled me," he said. "I was being stalled by the VA."

WHEN DOES THE TIMER START?

Levy, the judge over the ongoing cases, ruled in February 2016 that Maine's three-year time on malpractice suits is a "statute of repose," meaning the window of time on when the plaintiffs can file suit starts from when the alleged malpractice occurred. For most of the vets, their surgeries were performed in the mid- or late-2000s.

Attorneys for the veterans argued that the VA should be tried under a federal malpractice law with a two-year limit, but a clock that begins to run when the patients discover they may have received substandard care. The six vets were told by Togus officials in January 2013 that their care might have been substandard and most filed their suits within a year.

In his ruling in early 2016, however, Levy allowed the veterans' lawyers to pursue a claim that the VA had "fraudulently concealed" the findings of poor care, which would allow the suits to move ahead, regardless of the time limits. He's expected to rule in October or November.

Togus officials have admitted that they took a long time to disclose the findings of their investigation into Franchini's cases, but deny that they did so on purpose to limit the veterans' ability to sue.

Dr. Timothy Richardson, the former chief of staff at Togus, said he ordered another doctor to review Franchini's cases after a compensation and pension examiner raised concerns in early 2010. In an affidavit filed in the case, Richardson – who was demoted as chief of staff over the length of time it took to review the Franchini cases – said the pace of the review and notification of patients was "admittedly slow" and said he should have devoted more resources to investigating Franchini's cases.

But it wasn't a ruse, he said.

"At no time during the process did I ever deliberately delay the reviews to minimize or avoid potential legal liability from any claims that patients might assert against the Togus VAMC," Richardson said. "In fact, I never once considered the applicability of any statute of limitations to those claims, and had never even heard of the 'statute of repose' until the government raised the issue in the pending lawsuits. Based on my own personal experience, the issue of 'timing' or 'time limits' for potential tort claims was never discussed by anyone at the Togus VAMC. Nor did anyone say or even suggest that we should 'conceal' the results of our reviews from patients."

Walker, the VA's director of risk management who was involved in the Franchini investigation, also denied that the review was deliberately delayed.

U.S. attorneys in Portland who are defending the government in the suit said they had no comment because the case is in active litigation.

David Lipman, who represents Wood and Prescott, said the VA's argument, boiled down, is "we didn't fraudulently conceal it, we incompetently concealed it."

"That's just so frustrating and ridiculous," said Celine Boyle, of the Shaheen and Gordon law firm, who represents Korsiak, Downs and Mansir.

Both Lipman and Boyle indicated that they will likely file appeals if Levy's next ruling, on the fraudulent concealment claims, goes against them. In that case, they would likely appeal the ruling that the time limit is a statute of repose and that the state law, rather than the federal statute, should be followed in determining filing deadlines.

1.3 - The Day: [VA groups, services tackle high suicide rates among female veterans](#) (30 September, Julia Bergman, 440k online visitors/mo; New London, CT)

Female veterans are committing suicide at 250 percent the rate of female civilians, according to the Department of Veterans Affairs.

In Connecticut, at least 10 of the 50 veterans who committed suicide in 2014, the most recent data available, were women. And that's only counting veterans receiving care at the VA.

Nationally, the suicide rate for female veterans from 2001 to 2014 increased by a greater degree than the suicide rate among male veterans.

The data was part of an update to a 2016 VA report that analyzed more than 55 million records from 1979 to 2014, the most comprehensive look at veteran suicides in the U.S.

Women are one of the fastest growing groups of veterans. Of Connecticut's 200,000-plus veterans, more than 16,500 are female. The number of female veterans in the state has grown by 10 percent in the past five years.

A 2016 survey of active-duty women and female veterans by the Service Women's Action Network found that they view gender bias as a major obstacle to success, and feel underappreciated by society. They listed their top community challenge as access to women-specific health care.

"I often hear from women 'I just wish I could meet other women veterans. I don't know how to meet other women veterans,'" said Lynette Adams, women veterans program manager at VA Connecticut. "Social support is a really large protective factor for people at risk of suicide."

As more women are entering the military, there may be an increase in the number of women accessing care at the VA. That, in turn, allows the VA to continue to build more programs geared toward women, Adams said.

From 2001 to 2014, the suicide rate for female veterans overall increased, but the rate decreased by 2.6 percent for those accessing services at the VA.

About 25 percent of female veterans in Connecticut are enrolled at the VA. This number has increased steadily over time, according to Adams, but there's still a large percentage of female veterans who are not going to the VA in Connecticut.

The VA, on a national level, has stepped up its outreach to women, letting them know about resources and programs specific to them. And it has "greatly expanded" its women-specific programming in the past five to 10 years, according to Adams.

"So I hope one of the reasons for those (VA enrollment) numbers going up is that women are realizing 'the VA can provide me with the gender-specific services that I need,'" she said.

There's a women veterans liaison at each of the VA's veterans centers in Connecticut, for example. And there's a number of mental health programs for women, such as support groups.

A few years ago, there was one only one group at the Connecticut VA for women who've experienced sexual assault or sexual harassment during their military service, commonly referred to as military sexual trauma or MST. A recent VA study found the rate of suicide to be higher among women who've experienced military sexual trauma.

Today, there are three such support groups.

"We find that women who are able to engage in these gender-specific programs are happier with their care," Adams said.

These programs can also provide female veterans with the social support that they might otherwise feel that they don't have, she added.

While the VA has expanded its offerings for women, veteran organizations are lacking in this regard, an op-ed written recently by two female veterans points out. The SWAN survey found that 71 percent of female veterans don't belong to a veterans service organization, and 30 percent said they don't feel welcome in existing veterans organizations.

A 2015 law directed the Connecticut's Department of Veterans Affairs, within existing resources, to create a women veterans program to let them know about federal and state benefits and services and to study their unique needs. A group meet twice that year, but hasn't met since, according to Emily Hein, spokeswoman for the state's Department of Veterans Affairs.

As was the case back then, the department's Office of Advocacy and Assistance has three female veteran services offices who act as liaisons for female vets, Hein said.

The national Women Veterans Hotline is 1 (855) VA-WOMEN (829-6636). The website is www.va.gov/WOMENVET.

For free, confidential support for veterans in crisis, call the Veterans Crisis Line at 1 (800) 273-8255 and press 1, or text to 838255, or chat online 24 hours a day at www.veteranscrisisline.net.

1.4 - ESPN: [Sean Doolittle on Bruce Maxwell, respecting veterans and defining patriotism in a polarized America](#) (30 September, Jerry Crasnick, 429k online visitors/mo; Bristol, CT)

Long before Oakland Athletics catcher Bruce Maxwell took a knee in protest during the playing of the national anthem last weekend, Sean Doolittle was giving sincere thought to patriotic displays at baseball games and the surrounding symbolism.

Doolittle, who played with Maxwell in Oakland before being traded to the Washington Nationals in July, is the product of a military family. His father, Rory, served in the Air Force for 26 years and currently teaches aerospace science to high school ROTC students in New Jersey.

During his time in the majors, Doolittle has become a strong advocate for veterans and used his visibility to help them with everything from housing and employment to substance abuse-related issues. In May, Doolittle and his fiancée, Eireann Dolan, wrote a Sports Illustrated op-ed piece to raise awareness of the plight of veterans with "bad paper"-- those who've fallen through the cracks and failed to receive care after less-than-honorable discharges from the military because of alleged misconduct.

Doolittle and Dolan have also taken an interest in lesbian, gay, bisexual and transgender issues, and in November 2015 they hosted 17 Syrian refugee families for Thanksgiving dinner in Chicago. The Athletics nominated Doolittle for the Branch Rickey Award in 2013-2014 and the Roberto Clemente Award in 2016.

During a stop in Philadelphia this week, Doolittle shared his thoughts on the furor swirling around athletes and the national anthem in a conversation with ESPN.com.

Were you surprised when you saw Bruce Maxwell take a knee in Oakland?

Sean Doolittle: "I was a little bit surprised, mainly because it was a young guy that did it -- a guy that still has so much to prove in this league and so much to lose at the same time. [It's harder] for a guy like that to put himself out there. I hope we get to a point whether people agree with him or not, or wherever they fall on the issue, they can respect somebody for standing up for what they believe in."

What did you learn about Maxwell during your time in Oakland?

SD: "He's a very thoughtful guy. He's really matured a lot as a person and a player over his last couple of years. He had some big league time and got to be around some really good veteran guys in that clubhouse who really helped his development. He has talent, and he's starting to mature and work really well with that pitching staff.

"Bruce is a super nuanced guy. We want to put people in boxes. Words like 'conservative' or 'liberal' or 'Republican' or 'Democrat' have become pejoratives that people use to define and use against other people now. We want to label them before we even get to know them."

There has been a lot of conversation about how NFL and NBA players have jumped into the political fray while baseball players have remained largely silent. Some people point to the racial makeup of MLB rosters or the game's established clubhouse culture. What do you think?

SD: "I have theories, but I don't know. It's touchy."

Does it strike you that the national anthem is becoming such a flash point for debate?

SD: "A lot of these questions are being posed to people for the first time, like, 'What does it mean to you to stand for the anthem?' I think if you asked 10 people, you might get 10 different answers. You might see one guy standing at attention and other people walking around the concourse buying food or whatever."

What does the playing of the national anthem mean to you personally?

SD: "I came from a military family, so there are a lot of things I think about when the anthem is playing. One thing that bothers me is the way that people use veterans and troops almost as a shield. They say that's the reason they stand and that veterans deserve to be honored and respected during the anthem. But where is that outrage in taking better care of veterans? The most recent statistics say that we still lose 20 veterans to suicide every day.

"If you want to have that conversation, if that's your reason for standing, then let's talk. Let's have a conversation about putting that into action, because they deserve a heck of a lot more than people standing at attention during the flag or giving them discounts on food or hotels.

"It's really nice that we honor them at games sometimes. They'll bring a veteran on the field and he'll get a standing ovation, and that's important. We're in the 16th or 17th year of this war [in Afghanistan], and it keeps a reminder that we are still a country at war. But we need to follow through on those thoughts and actions."

How are you involved personally?

SD: "My fiancée and I do a lot of work with veterans' issues. Earlier this year, we wrote an op-ed that ran in Sports Illustrated about some of the things we found regarding veterans being wrongly excluded from VA care at a time when they're experiencing a mental health crisis and a suicide epidemic the way they are now. We need to be figuring out ways to expand VA care to take better care of veterans.

"We've worked very closely with three big organizations. We've also gotten closely connected with people in and around D.C. When we were writing the op-ed, we talked to policy makers and policy groups about it. We've learned a lot about veterans' issues and we stay super informed about it. Anytime people use vets and the military as a political football or a prop, it's kind of bothersome.

"The VA works, it really does. For some of the negative press they've gotten in the past few years, when the veterans are able to access it, it really works and saves lives, because they're the ones that are really equipped to handle the unique needs that veterans have."

Do you think there's a distinction to be made between symbolism and action here?

SD: "I don't want it to be a hollow gesture. I think it's a very valid reason to stand for the anthem. But if people are going to point to veterans and use them as the reason, then let's follow through on that.

"There are a lot of veterans being left out. It takes more than standing for the anthem or 'God Bless America' to stand up for them in a [real] sense. As long as we have a volunteer-only military, a lot of the responsibility falls on the general public to make sure they're getting the

care they need when they're done with their service. The veterans raise these questions with Congress and policymakers, but it's going to take the general public to raise their voices in order to really move the needle."

Some people say that athletes who kneel are disrespecting veterans and their service. Others maintain that veterans have fought to give people the right to peacefully protest in such a manner. Can you understand both arguments?

SD: "I worry sometimes in this country that we conflate patriotism exclusively with love of the military and militarism and the strength of our armed forces. That's not the only way that you can be patriotic."

"People draw a direct line between the national anthem and the military, or patriotism and the military. But there are a lot of things that we're not doing for veterans."

Have you seen any positive changes since you've been doing advocacy work for veterans?

SD: "It's getting better. [Veterans Affairs] Secretary [David] Shulkin, who was appointed last year, is doing a good job. But it's almost like we have to capture some of the momentum so that we don't lose any of that progress. He said his priority is bringing down the suicide numbers and reducing that rate."

Can the current debate be a "teachable moment"?

SD: "I think it's important to realize that the players who are protesting aren't protesting the anthem. They're not protesting the flag. People kind of move the goalposts on them and try to tell them what they're protesting. But as they keep saying, that's not what they're protesting."

As someone who stands for the anthem, what's your response to athletes who kneel?

SD: "I think American democracy is strong enough to have that conversation. I think my patriotism is strong enough to not be offended when somebody takes a knee during the anthem. That's not something I take personally. It's something that makes me want to reach out to that person and have a conversation with them and say, 'Let's talk about some of these issues. Tell me about certain things that have caused you to take such a stand.'"

"I want to have these conversations with guys like Bruce Maxwell and guys in other leagues, and maybe someday we can get to a point where we give them a reason to stand, and they're proud to stand along the other guys that are standing."

2. Veteran and Employee Experience

2.1 - FOX News: [Creators of lifesaving body armor, artificial pancreas among federal workers honored](#) (30 September, Joseph Weber, 32.5M online visitors/mo; New York, NY)

Marine Corps engineer Flora Jordan was honored this week at a Washington, black-tie gala for creating body armor that's nearly half the weight of older models yet equally protective.

While humbled for winning the 2017 Service to America Medal, Jordan admitted that her mind was already focused on next-generation armor that will better help soldiers in combat and keep them healthier.

"This is so humbling, especially among all the accomplishments being recognized here," Jordan, the youngest recipient of the award, formally known as the Samuel J. Heyman Service to America Medal, said Wednesday at the awards ceremony, inside the neoclassic Andrew W. Mellon Auditorium on Constitution Avenue.

The 28-year-old Jordan said she and others at Marine Corps Systems Command in Quantico, Va., are now working on integrating the award-winning vests with other soldier-gear like helmets and hydration packs "in a more holistic way," which she said will also help with back and shoulder problems.

The annual gala, in which hundreds of not-so-famous federal employees pay tribute to coworkers' vital-yet-frequently-unheralded efforts, was not without star power and laughter this year.

Award-winning writer Michael Lewis -- who's had several books turned into movies -- was among those who spoke at the ceremonies, known around the nation's capital as the "Sammies."

"This is way more efficient" than the Oscars, Lewis said in a nod to federal workers' pride in no-waste efficiency.

Joshua Van Eaton, a Justice Department attorney honored with EPA investigators Phillip Brooks and Bryon Bunker for their lead work in the 2016 Volkswagen emission case, thanked Robert Muller for his efforts in negotiating the landmark, \$17.4 billion settlement with the German automaker.

The case, in which the company rigged more than a half-million vehicles to evade pollution regulations, also led to billions more in civil and criminal penalties.

"It should be obvious why I'd want to stay in (former FBI Director) Mueller's good graces," Eaton said about Mueller, who now leads a Justice probe into whether Trump campaign officials colluded with Russia in the 2016 White House race.

"Our nation relies on dedicated public servants like those we honor here tonight," Max Stier, president and CEO of the nonprofit, nonpartisan Partnership for Public Service, which runs the awards program, said in joint statement with Tom Bernstein, the partnership's chairman.

This year's lifetime achievement award went to Dr. Tedd Ellerbrock from the Centers for Disease Control and Prevention.

Ellerbrock played a vital role in building, expanding and improving the U.S.-led program that provides medicine and assistance to 11 million people worldwide living with HIV/AIDS.

Like many who won awards, Ellerbrock thanked his wife and family for their support and acknowledge how their work forced them to miss so many dance recitals and youth soccer games.

Ellerbrock said about his wife, "Without Pamela, I wouldn't be here today. Thank you for your love and support."

The other 2017 winners were the FDA's Courtney Lias and Stayce Beck who paved the way for the first artificial pancreas device to receive agency approval, three years faster than expected, which has helped those living with Type 1 diabetes.

Timothy Camus, a Treasury Department inspector general, and the IRS Impersonation Scam Team won for leading a multi-agency investigation and public awareness campaign to stop a massive fraud that conned thousands of Americans into paying millions of dollars in bogus tax bills.

Alex Mahoney and the Middle East Crisis Humanitarian Response Team for leading the U.S. humanitarian relief effort in war-torn Syria and parts of Iraq -- delivering food, medicine, safe drinking water and other assistance to millions of victims.

Rory Cooper, a Department of Veterans Affairs researcher, received a Sammie for designing wheelchairs and other assistive technology equipment that has improved the mobility and quality of life for hundreds of thousands of disabled veterans and other Americans.

[Back to Top](#)

2.2 - The Hill: [Trump's Cabinet and charter flights: What we know and don't know](#) (30 September, Nathaniel Weixel, 11.8M online visitors/mo; Washington, DC)

Health and Human Services Secretary Tom Price resigned Friday following a series of public rebukes from President Trump and GOP lawmakers over his repeated use of charter and military aircraft, at public expense, for official travel.

Price is far from the only Cabinet member to take private flights however, so his resignation isn't likely to stem the controversy.

Here's what we know, and what we don't know.

Who is involved?

There are at least four Cabinet secretaries under fire for their use of charter or military flights.

Price was the most extreme case, as his flights cost taxpayers about \$1 million, according to estimates by Politico.

The Treasury Department inspector general is reviewing department head Steven Mnuchin's use of a private jet in August, as well as why he requested a government plane to take him and his wife, Louise Linton, on their European honeymoon. Environmental Protection Agency Administrator Scott Pruitt has also been using private planes for government duties. The Washington Post reported on Wednesday that Pruitt's private flights have cost taxpayers more than \$58,000.

On Thursday, Politico and The Washington Post reported Interior Secretary Ryan Zinke took a \$12,000 charter flight aboard a plane owned by oil-and-gas executives.

They also reported on at least three other occasions of private jet travel since Zinke was confirmed, including to the Virgin Islands, before hurricanes Irma and Maria hit.

Veterans Affairs Secretary David Shulkin is also coming under scrutiny for combining personal travel in Europe with an official trip, all paid for with taxpayer money. While Shulkin flew commercial, the government paid for both he and his wife's flight and a per-diem for both their meals.

The trip also came less than two weeks after he signed a memo instructing top VA staffers to determine whether "employee travel in their organization is essential."

Apologizing might not be enough

Price apologized for his decision and offered to pay back tax payers for the cost of his seat on his private flights.

That wasn't enough to stem the controversy or the president's ire.

Zinke on Friday was more combative, telling an audience at the Heritage Foundation that the outrage was "a little B.S."

Mnuchin hasn't apologized either, and on Thursday he declined to promise that he would only ever fly commercial.

"I can promise the American taxpayer that the only time that I will be using mil air is when there are issues either for national security or we have to get to various different things where there's no other means," Mnuchin said on CBS "This Morning."

Price's pledge to pay back "his share of the travel" amounts to \$51,887.31. According to Politico, which broke the stories about his private flights, Price took at least 26 flights on private jets at an estimated cost to the taxpayers of over \$400,000.

On Thursday night, Politico reported that the White House approved flights on U.S. military aircraft to travel to Europe, Asia and Africa for official events, at a cost of more than \$500,000.

Congressional Republicans are taking notice.

Price's trips managed to earn bipartisan outrage.

Democrats were fuming, but Republicans also gave him a dressing down.

"[Everything] that happens around here is based on appearances. And if it just appears wrong, don't do it," Sen. Lisa Murkowski (R-Alaska) told reporters this week.

Sen. John Kennedy (R-La.) had harsher words.

“Taking these charter flights, playing the big shot on the taxpayer's dime when you can go by bus or train or regular commercial air, can't put lipstick on this pig,” Kennedy said Thursday on Fox News Channel's “America's Newsroom.”

More broadly, the charter flights by Cabinet members are also the subject of an investigation by the House Oversight Committee.

Judiciary Committee Chairman Chuck Grassley (R-Iowa) on Thursday urged Trump to curb the spending of Cabinet secretaries.

He called on Trump to “emphasize to cabinet secretaries the necessity of using reasonable and cost-effective modes of travel,” especially “considering the many travel options to and from Washington, D.C.”

Will the flights cost anyone else their jobs?

Trump was reportedly incensed at Price for being a distraction, and was annoyed the reports about Price's air travel have undercut his “swamp draining” image.

But there was also speculation that Trump blamed Price for the failure of Congress to repeal ObamaCare.

If tax reform suffers a similar fate, one couldn't blame Mnuchin for being worried.

On the other hand, Mnuchin is a confidante and friend to Trump. Price was seen as a loyalist to Vice President Pence, and lacked a more personal connection to Trump.

Trump has also been cleaning house at the VA, firing more than 500 employees since he took office. It's not clear yet how the latest scandal will impact Shulkin.

Zinke has already come under fire from Democrats, and his initial defense shows he may be painting the issue as a partisan attack, which doesn't necessarily reflect poorly on Trump.

Trump has also been trying to combat the image of a White House in chaos, and while the scandals have not gotten positive cable news coverage, more staff resignations or firings could be even worse.

2.3 - Sun Herald: [Cruise-in to salute veterans goes back to its roots with return to Centennial Plaza](#) (30 September, Scott Hawkins, 858k online visitors/mo; Gulfport, MS)

One of the most meaningful and memorable events at Cruisin' The Coast each year is the Salute To Our Veterans cruise-ins.

“The whole purpose is to have the vets enjoy the cars,” said Woody Bailey, executive director of Cruisin' The Coast.

This year, the event, which features Cruisers converging on the location to honor veterans, will be held 10 a.m. to 2 p.m. Tuesday, Oct. 3, at Centennial Plaza, 200 E. Beach Blvd., Gulfport. In recent years, it has been held at the Biloxi VA facility.

“The change of venue is going back to its original roots,” Bailey said.

Prior to Hurricane Katrina, the event was held under the oaks at the old Veterans Affairs facility at Centennial Plaza, which is now Cruise Central, but after the storm damaged the property, organizers moved the veterans cruise-in to the Biloxi VA facility.

In the following years, construction and other issues forced the event to move around for a few years.

“The vets event started at the Gulfport VA property a number of years ago,” Bailey said, “to have the vets at the VA home in Gulfport enjoy Cruisin’ The Coast.”

Now the veterans are living in Gulfport’s new VA retirement facility near Centennial Plaza, so moving the event back to the original location makes sense. Bailey said veterans from both the Gulfport and Biloxi VA facilities will be bused to Cruise Central for the Tuesday, Oct. 3, Salute to Veterans event.

“The vets have served their country,” he said. “We want to honor that service and feel like this is a way Cruisin’ The Coast can help do that.”

This year’s Salute to Our Veterans event also will feature a celebrity appearance by Cristy Lee and the Crusin’ The Coast Feature car.

SALUTE TO OUR VETERANS

Where: Cruise Central, Centennial Plaza, 200 E. Beach Blvd., Gulfport

When: 10 a.m.-2 p.m. Tuesday, Oct. 3

The event will feature a celebrity appearance by Cristy Lee and an appearance of the Cruisin’ The Coast Feature Car

Cruisin’ The Coast

2.4 - Herald-Mail Media: [Cruise-in unites community, veterans in common passion](#) (30 September, Richard Belisle, 158k online visitors/mo; Hagerstown, MD)

MARTINSBURG, W.Va. — The main parking lot at the VA Medical Center shined bright in paint and chrome from a hundred sport and muscle cars, street rods, vintage Detroit autos and trucks lined up for Saturday’s annual Country Roads Car Club Cruise-in.

This was the third year for the event.

It's stated goal, VA and club organizers said, is to bring the community and military veterans together in a common passion — the love of things automotive.

Veterans themselves judged the vehicles and chose the winners in about a dozen categories. The biggest trophy, the Director's Choice, was a 1978 Corvette, picked by Timothy J. Cooke, the medical center's director. He once owned a 1978 Corvette, according Mike McAleer, public affairs officer.

The cruise-in is hosted every year by the Jefferson County, W.Va., car club. Member Bill Crawford said the club has its headquarters in Harpers Ferry, W.Va. It hosts two shows a year — the one at the VA and one in Ranson, W.Va.

Among the vehicles getting attention from veterans and visitors was a vintage 1959 British-made Turner MK 1 sports racing car. It was brought to the cruise-in by David Thomas, president of High Performance Heroes of Clarksburg, W.Va.

Heroes is a group of race fans who help combat-wounded veterans become active in motorsports.

Thomas's wife, Ashley Thomas, said the organization restores and modifies vintage sports cars, including a 1962 Austin Healey Sprite and 1972 MG Midget. Two combat-wounded veterans, Liam Dwyer of Litchfield, Conn., and Patrick Brown of Chesapeake, Va., have benefitted from the group's help.

Dwyer lost his left leg from an improvised explosive device in Afghanistan in 2011. In 2013, through the efforts of High Performance Heroes, he won the Pittsburgh Vintage Grand Prix Group 2 in the Austin Healey Sprite.

Brown was able to drive the MG Midget because the mechanics at High Performance Heroes were able to convert a window crank from a Ford F-150 into an automatic clutch for the MG's manual transmission, Ashley Thomas said.

"We are the only ones doing vintage sports car racing with combat-wounded veterans," she said.

Jim Boyer of Kearneysville, W.Va., who was wounded in action in Korea, was at the VA showing off his 1959 Plymouth Fury. He said he had bought a brand new iceberg-white Fury with a yellow roof in 1959. He drove the car for years before he sold it. The one on display Saturday was purchased in Franklin, W.Va. It's owner had died and his widow was trying to sell it.

"It was just like my first one. It had the same color, same 318-cubic-inch motor and it only had 28,000 miles on it," he said. "I bought it for \$23,000. My first one cost, new, less than \$3,000. I didn't have to do anything to it. I only get it out for occasions like this."

Steve Hummer of Star Tannery, Va., has a similar story, but with an "all original" 1929 Ford Model A pickup truck. An Army Ranger, he was seriously wounded in 1968 during the Tet Offensive in Vietnam. Today, Hummer is a certified peer recovery specialist in a veteran-to-veteran program at the Hope Center at the Martinsburg VA.

Jocelyn Doyle of Boonsboro is a dental assistant at the VA. On Saturday she was one of a cadre of volunteers who transported veterans in wheelchairs from their rooms to the cruise-in to see the cars up close.

"I transported six of them today," she said. "I do this so I can give something back."

[Back to Top](#)

2.5 - Little India: [Undersecretary Poonam Alaigh Caught Up in Veterans Affairs Travel Scandal](#) (30 September, 44k online visitors/mo; Torrington, CT)

Acting Undersecretary Poonam Alaigh and her husband accompanied Veterans Affairs chief David Shulkin and his wife on a 10-day trip to Europe in July this year, which is being criticized as a taxpayer paid holiday junket.

Shuklin and his entourage attended a Wimbledon tennis match, toured Westminster Abbey and took a cruise on the Thames, all while on an official visit for meetings with Danish and British officials.

Besides the Alaighs, Shulkin's travel team included his chief of staff, and another aide. They were accompanied by a team of six security personnel.

Controversial Europe Trip

Shulkin was visiting the continent for meetings on veterans' health issues, but he spent more than half the time in sightseeing and shopping, the Washington Post reported.

The report comes on the heels of the resignation of Tom Price, the Health and Human Services Secretary, who was forced to resign on Sept. 29 following allegations of taxpayer-funded air travel.

VA revealed on Sept. 29 that the federal government paid for the flights for Shulkin and his wife, Merle Bari. The government also provided per-diem reimbursement for their meals and other expenses.

The VA representative did not respond to the Washington Post on how Bari became eligible for reimbursements and taxpayer-funded airfare, saying that she was traveling on "approved invitational orders." The spokesperson also refused to reveal the flight fare and the total reimbursement amount. Under federal guidelines, Bari could have been eligible for per diem reimbursement of \$3,600.

Alaigh defended the trip, telling the newspaper it enabled valuable exchange of ideas with their British and Danish counterparts.

"Were there some breaks we got? Sure. But they were reasonable. They were not at the expense of what we had committed to do: representing our country and showing our commitment to veterans," Alaigh told the Washington Post.

A travel itinerary released by the Department of Veterans Affairs shows that Alaigh and her husband accompanied the secretary on a separate flight.

The Indian American physician is reported to have submitted her resignation for family reasons on Sept. 25, effective Oct 7, according to the Military Times . It reported that Alaigh, who assumed the post in February, said in a letter to staff: "I want you to know that it has been my greatest honor to serve (VA) Secretary (David) Shulkin, each one of you and all of our veterans.

"As I prepare to now leave Washington, I thank you sincerely for what you have helped us to accomplish, moving from being the country's largest integrated healthcare system into, truly, America's greatest healthcare system."

Her resignation, however, has not been publicly announced, and Alaigh made no reference to it in her interview with the Washington Post.

Alaigh is an internist, who completed her residency at the State University of New York in Stony Brook. She earlier served as national medical director for GlaxoSmithKline, was cofounder of the Atlantic Accountable Care Organization in New Jersey, and a senior advisor to the Under Secretary for Health.

The Military Times reported that Carolyn Clancy, the deputy undersecretary of health for organizational excellence, will assume her post next month.

VA Press Secretary Curt Cashour defended the trip, saying that the visit, including the trip to the Wimbledon game, was reviewed and approved by the ethics counsel. He added that Alaigh's husband paid his expenses for the trip.

"These were important trips with our allies to discuss best practices for taking care of veterans. The secretary has been transparent on his down-time activities that were similar to what he would have done with his family over a weekend in the U.S.," Cashour said.

Shulkin attended a conference in London on July 19 to discuss mental health issues with representatives of Britain, Canada, Australia and New Zealand, following meetings in Denmark from July 12-14.

During the trip, Shulkin and his team also visited Copenhagen's Christiansborg and Amalienborg, and London's Buckingham and Kensington.

Travel Scandals in Trump Administration

Many senior members of Congress, including two key Republicans, have expressed concerns over the travel scandals involving members of the Trump administration. House Oversight Committee Chairman Trey Gowdy and Democrat Rep. Elijah E. Cummings wrote to the White House that official travel should not be connected to personal use.

Sen. Charles E. Grassley, the Chairman of the Senate Judiciary Committee, wrote to Trump asking what steps the government has taken to "ensure Cabinet secretaries use the most fiscally responsible travel in accordance with the public trust they hold."

2.6 - WOAY (ABC-50): [Beckley's Inaugural VAMC Veterans Art Show](#) (30 September, Daniella Hankey, Oak Hill, WV)

The Beckley VA Medical Center hosted its inaugural art show this Saturday at the Medical Center auditorium.

The Veteran's Council planned the art show as one of its projects. Using the tag line "healing through creativity", the art show features projects that have helped Veterans to heal. Nationwide, VA medical facilities use the creative arts as one form of rehabilitative treatment to help Veterans recover from and cope with physical and emotional disabilities.

"It helps our veterans heal through our PTSD, military trauma and whatever else we have gone through and we're having an art show displaying it," said Melissa Burnett, Vice President of the Veteran's Council.

Veterans submitted their pieces including paintings, models, wood crafts, needlework and more. The art submissions will be judged by fellow veterans who will vote for their favorite piece of art.

Vern Hughes, a Navy Veteran and volunteer at the Beckley VA, submitted five of his pieces for the show.

"I'm trying to help people through their healing a little bit and give them a place to display their artwork and hopefully this will become an annual event," said Vern Hughes, a Navy Veteran.

In the past, Hughes has given his handmade cards to patients, employees and visitors at the VA.

"One veteran that use to be upstairs, his roommate got a card from his granddaughter and he said, I've never gotten a home made card, so his birthday came around and I made him one and he was just so excited. I make about 150 cards and hand them out to veterans, visitors and patients," said Hughes.

Awards were presented for first, second and third place. Veterans were able to submit up to five pieces. Additionally, all winners of the show were encouraged to submit their pieces to the 2017 National Veterans Creative Arts Festival to be held later this year.

3. Access to Healthcare

3.1 - Times Union: [What's the point of jailing this veteran?](#) (30 September, Chris Churchill, 1.5M online visitors/mo; Albany, NY)

Scott Gilligan had just turned 26. He was a guy from Cohoes and a Navy petty officer stationed in Puerto Rico. One day, he took a drive that would change his life.

Gilligan was stopped at a light when a man walked up to his car and stuck a gun in his face. A second armed man climbed into the back seat.

As Gilligan thought of his pregnant wife, the men ordered him to drive to an isolated section of rain forest. There, they savagely beat the soldier and left him for dead. He walked six hours to call for help.

That was on Good Friday in 1995.

Gilligan returned to civilian life in Cohoes soon after, but struggled despite keeping steady jobs. He drank too much. He got divorced. His two sons became men. He was often anxious or depressed, but he held it together.

Then, two years ago, everything fell apart.

He lost his job at the Von Roll factory in Rotterdam, which meant he lost his health insurance. He couldn't afford the prescriptions that made his life bearable.

So he drank more. He started smoking crack. He slid into addiction.

"It was the only way I could make it through the day," Gilligan told me. "I wasn't in my right mind."

Gilligan hit bottom on Jan. 22, 2016.

That was the day he broke into a friend's house and stole a TV, two iPads and a laptop. He was arrested within hours and immediately confessed to the crime.

The arrest was a blessing — the jolt that turned Gilligan around.

He devoted himself to treatment and got clean. Doctors at the VA hospital in Albany told him he had post-traumatic stress disorder from the attack in Puerto Rico. It was like a revelation, an explanation for so much of what he'd been feeling.

Gilligan has been sober for 17 months now. He works at Saratoga National Cemetery, where he digs and maintains the graves of veterans.

"We make sure they get the respect they deserve," he said. "It's like therapy to me."

Gilligan typically attends seven Alcoholics Anonymous meetings a week. When he rises to speak, the 48-year-old hopes he's a role model, especially for veterans. That's what he wants his life to be now. He wants to help.

But there's a problem.

Gilligan still faces a second-degree burglary charge. His trial starts Monday. If convicted, he could face at least three-and-a-half years in prison.

But why? What good will that really do? Doesn't the veteran deserve a break?

"None of this would have happened to him, nor would he be suffering the effects, but for volunteering to serve his country," Gary Horton, director of the Veterans Defense Program at the New York State Defenders Association, wrote in a letter supporting Gilligan.

"He deserves the consideration and leniency of the justice system."

That seems obvious. And hardly groundbreaking. Some New York counties have Veterans Courts to deal with precisely these scenarios — to recognize the special difficulties faced by military veterans and to give them the understanding they deserve.

Albany County doesn't have a veterans court, but Gilligan would seem an ideal candidate for its drug court. There, he could avoid prison time and continue his treatment under supervision.

A lesser burglary charge would also keep him out of prison.

But District Attorney David Soares has refused to cut Gilligan any slack. As of Friday afternoon, he had offered no deals that don't involve prison time. He has insisted on criminal charges that mandate a prison sentence if Gilligan is convicted.

That led Gilligan's exasperated attorney, Michael Feit, to take an unusual step: He asked the court to remove Soares' office from the case, arguing the district attorney has no valid reason to oppose treatment as an alternative to prison.

"Everything Mr. Gilligan has done shows that he should not be locked in a cage," Feit said.

Gilligan has no criminal record, save for a drunken-driving conviction in 1996. He was an exemplary soldier.

Albany County Judge William Carter was sympathetic.

"I'm very well aware of Mr. Gilligan's plight," he said during a recent hearing on Feit's request. "I'm very well aware about how hard he has worked in treatment. And I don't disagree that he is the poster child for a veterans court."

But Carter found no legal reason to remove Soares' office from the case.

"I can't do that any more than I can make them actually care about the things they profess to care about and put into action some of the words that they speak," said the judge, who has tangled with Soares before.

Soares' office declined to comment, so I can't say why the district attorney is taking so harsh a position. I can't comprehend why he would.

[Back to Top](#)

3.2 - The Olympian: [How we can help improve the quality of life for military veterans](#) (30 September, Dr. Rachel Wood, 851k online visitors/mo; Olympia, WA)

There are many things that contribute to our quality of life here in Thurston County: where you live or work, what you eat for breakfast, or how much stress you have in your day-to-day life.

It's common sense that your health affects your quality of life, but it's also true that your quality of life can affect your health. To improve our quality of life, we can change what we're eating, where we're living, or even where we work. But for many, those changes are difficult; for others, such as our military veterans, there are unique hurdles that can be holding them back.

According to the National Homeless Veteran Coalition, nearly 200,000 American veterans face this reality every year. Military service members may have been away from home for long stretches of time. They may be dealing with Post-Traumatic Stress Disorder, pain or depression. There may be injuries (visible or not visible) they have to overcome. This is all on top of the stress of navigating health care, finances and family life.

But there are tools and programs in Thurston County that are designed to help veterans address these issues, and get the support they need.

Finding work can be a major hurdle for veterans, and one that affects all areas of their lives, including their health. Service members entering the job market after serving with distinction and honor and carrying out their missions regardless of the circumstances often find it difficult to translate their skillset into the civilian equivalent. Many feel they have to re-invent themselves. Their skills, although sharp, are hard to define to a new employer. They may need to find a new industry, learn new jargon, or even move to a new place. Worse, they may have to start at a near entry-level positions.

Transitioning out of the military can be the hardest mission that a service member will have to endure. In those circumstances, stress and depression may become issues, and veterans may feel alone and isolated. The stress it causes resonates through the entire family, straining relationships.

But there are numerous programs to help veterans make this transition as smooth as possible while maintaining their dignity in the process. While it's true that the civilian world lacks machine gunners and nuclear weapons technicians, many managers are seeking leadership, initiative and motivation in their workers. Luckily for us, there is a deluge of veterans with these intangible qualities seeking employment each day. Both veterans and civilian managers can benefit greatly by simply learning to speak a similar language.

There are tools, and people, that can help. Veterans looking to find a new job can use a "skills translator tool" to help reframe their experience in a way civilian employers will understand. Titles such as "Squad Leader" and "Section Chief" can be retooled to highlight leadership qualities, for example, and provide an understanding of the responsibilities that are embedded in those unfamiliar titles.

Among the resources:

National Center for PTSD: <https://www.ptsd.va.gov/public/types/war/index.asp>

U.S. Department of Veterans Affairs resource locator: <https://maketheconnection.net/resources>

Veterans Administration military skills translator: <https://www.vets.gov/employment/job-seekers/skills-translator>

Lacey Veterans Services Hub: <https://www.laceyveteranshub.org/>

Veterans have worked diligently for their country around the globe. With the right tools and resources, we can support veterans re-integrating to civilian society and help them attain the quality of life they are seeking.

[Back to Top](#)

3.3 - Los Angeles Daily News: [L.A. veterans' health care has room to improve](#) (29 September, Editorial Board, 883k online visitors/mo; Woodland Hills, CA)

A Veterans Administration regional health care system is more than a corner of the federal bureaucracy. It's a promise to the men and women who served this country in the military. It's part of Americans' bargain with young people who sign up for duty.

You take care of us; we'll take care of you.

That's why it causes more than the usual disappointment in government to learn the VA health-care system in our area isn't as good as it could be.

The VA has released results from the rating system it uses to assess medical service delivery at its 140 service centers. The system assigns regional systems scores from 1 to a glistening 5. So, what score did the VA Greater Los Angeles Healthcare System receive?

That puts the L.A. VA in the bottom 10 percent of the nation's VA systems.

VA officials emphasize that a relatively low score like L.A.'s doesn't mean veterans don't get good care. Regions' scores are meant to compare one to the other. The goal is for low scorers to learn from high scorers — and improve.

Evidently, there's a considerable range of quality within one rating. According to the list on the VA website, although L.A. got a "1" this year, it actually has shown "large improvement" from the last time scores were assigned under the VA's Strategic Analytics for Improvement and Learning (SAIL) rating formula, which rates the systems on metrics used by the private sector and special metrics measuring access and quality of care.

Still, people in Greater L.A. should be sorry to see that medical service delivery isn't as good as it is in other places. Next door, the Long Beach Veterans Healthcare System rated a 3, while San Diego, San Francisco and Sacramento also got 3s. Among the nation's other big cities earning top-shelf 5s were Boston, Cleveland and Pittsburgh.

All American remember the scandal a few years ago when long delays for VA care were revealed.

That scandal led to Congress infusing the VA with funding, including billions for hires. An NPR report last January showed staffing additions have come inconsistently, and L.A. was among the systems getting less than needed.

VA officials here vow to continue their progress. We can see there's room for improvement.

[Back to Top](#)

3.4 - La Crosse Tribune: [Thanks to VA for great service](#) (30 September, Eugene Smithart, 823k online visitors/mo; La Crosse, WI)

I recently retired from Trane after more than 40 years. As a former U.S. Marine who served in Vietnam, I was able to get coverage from the Veterans Administration to replace the health coverage Trane had provided for all those years.

With all I had heard about the Tomah VA, I didn't know what to expect in the way of quality of service I would receive.

Well, I am pleased to report that the service I have received has been nothing short of amazing from both the Tomah and La Crosse VA personnel.

In talking to a number of people, this reflects a remarkable turnaround in the past nine months and I want to thank everyone involved.

To everyone at the VA, thank you. Keep up your wonderful efforts.

Eugene Smithart, Onalaska

[Back to Top](#)

3.5 - WHAM (ABC-13): [Groundwork underway for new VA clinic in Henrietta](#) (29 September, 817k online visitors/mo; Rochester, NY)

Henrietta, N.Y. - There will soon be a new location for local veterans to go for services and healthcare.

A ceremonial groundbreaking took place Friday afternoon in the drizzle for the new VA clinic on Calkins Road in Henrietta.

The 84,000-square-foot building will expand primary care services, along with mental health assessments and social work support.

The bigger facility will also have room for an eye clinic, women's healthcare and diagnostic imaging.

Carnegie Management and Development Corporation will construct the new facility and lease it to the VA for 20 years.

The new clinic should be fully constructed in the spring of 2019.

[Back to Top](#)

3.6 - WSBT (CBS-22): [Local veterans say they're glad to see new VA clinic in Mishawaka officially open](#) (30 September, Cassidy Williams, 449k online visitors/day; Mishawaka, IN)

The new St. Joseph County VA Clinic in Mishawaka is officially open.

The 90,000 square foot facility offers a variety of services.

The \$38 million dollar project finished on time and on budget

Senator Joe Donnelly and Congresswoman Jackie Walorski were there to get a tour of the new facility.

They both see this is as just the start.

"This is just the beginning," said Walorski. "You know this isn't the end of taking care of veterans. This is the beginning of taking care of veterans in our district and throughout Michigan as well."

Dozens of veterans also came out to see it. The facility will serve almost 9,000.

Each veteran will save travel time for some procedures and exams.

The new Mishawaka facility offers more services than the old clinic in South Bend. Meaning they won't always need to leave this area.

George Proctor spent a large portion of his life serving in both the Marines and the Army.

"23 years, 9 months, and 18 days. I say 24 because that's close enough."

Despite his decades of service, George says he rarely used the benefits provided by the VA.

Living in Mishawaka, the services in Indianapolis or Fort Wayne were just too far away.

"I'm what you call a busted wing," Proctor said. "I broke up my back on third jump at Fort Bragg. It's just too far for me to drive and be comfortable." "

Now that is no longer a problem.

Proctor got his first look at the new facility in Mishawaka. Not only is it closer, but the city has added a bus stop to serve the clinic.

Mishawaka's Mayor also says plowing the road will be a priority in the winter.

Proctor already has ideas for how to use it.

"probably for prosthetics, orthopedics, dermatology, my eyes, whatever."

The facility can also be used as a place to socialize.

A coffee shop inside hopes to bring veterans together, and the socializing has already begun.

The veterans say they are happy to have it for themselves, and for the veterans yet to serve.

"I'm very glad to see it, because it is in my backyard."

Half of the services offered at the facility have already begun.

The final part -- urology and podiatry services -- are expected to open on Decemeber 11.

Address: 1540 Trinity Pl, Mishawaka, IN 46545

Phone: (574) 272-9000

[Back to Top](#)

3.7 - The Post and Courier: [South Carolina veterans react sharply to Ken Burns Vietnam documentary](#) (30 September, Bo Petersen, 319k online visitors/mo; Charleston, SC)

Jerry Davis won't watch the Ken Burns' documentary on the Vietnam War, he tells you. The bayonet scar still plainly shows on his eye.

"I saw it 'real time' and I don't want to see what someone else thinks," said the 76-year-old Marine Corps veteran from West Ashley, who set up communications under fire on hilltops in Vietnam.

Chuck Blankin did watch.

"I just want to see somebody held accountable for what they turned their back on," said the 65-year-old Navy veteran from James Island, his gregarious smile gone grim. He had a river patrol boat blown out from under him.

Emotions flared and nightmares re-awoke for veterans across South Carolina as the 10-episode, public television special "The Vietnam War" finished last week.

Among the more than 130,000 veterans of the era still living in the state, many opted to ignore it. For the others who did watch, the broadcast was more than a documentation. It was an affirmation — reassuring or not — of what happened in front of their eyes.

"The vets have wanted to talk about it," said Sonya Campbell, director of the Columbia Vet Center, about the uptick in sessions in the show's aftermath.

The centers are an outreach, counseling and referral service for troubled veterans. The Charleston Vet Center put together round table sessions at some veterans' request so they could talk it out.

"It has brought up a lot of issues for them," said Director Emily Shannon.

"They're saying, 'This has validated a lot of what I've been saying and believing for years,'" said Curtis Lucas, a psychologist with the Myrtle Beach Vet Center.

But it's been difficult, Lucas acknowledged. A lot of the vets he works with bought the video set or taped the show, wanting to watch only as much as they could handle at a time.

Some veterans who watched came away with new insights about the divisive conflict. Much of the thrust of the PBS documentary is how U.S. leaders across multiple presidential administrations knew there was little chance of U.S. victory in Southeast Asia but kept pouring men and materials into the conflict.

"Why you were there, it made sense at the time," said Eugene E. Coakley, 72, of North Charleston, an Air Force veteran who did maintenance work on F-4 fighter jets launching from a base in Thailand.

"I learned some things I never heard about before," said Craig Burnette, 71, of Inman in the Upstate. He led an Army platoon into firefights against the Viet Cong and North Vietnam army.

"I was very angry. I was sad. I was frustrated. I saw all these people making political decisions (in contradiction to what people on the ground were telling them)," he said.

Burnette stopped watching episodes when American troops like his began to be featured. He had trouble falling asleep.

"I'm worried for the (reactions of) other vets and their families, plus the families with names on the Wall," he said, referring to the Vietnam Veterans Memorial on the National Mall in Washington, D.C., which lists the names of some 58,220 U.S. service people who died in the war.

An estimated 895 South Carolinians died in Vietnam.

During a recent interview, Davis and Blankin sat at a table in the American Legion Post 147 on James Island. The bar chatter quieted as they talk. Like a lot of combat veterans, they don't go to fireworks shows. Seemingly mundane things can set off memories that, as Davis said, many thought had been buried. Davis recoils from the smell of coconut. For Blankin, it's burning rubber.

When Davis' eight-man crew was attacked on a hilltop, he was gashed in the face as an enemy fighter leaped over him. He thought he had been butted by a rifle until it started to bleed.

"I pulled out my .45 pistol and shot him," he said.

Blankin commanded a "river rat" patrol boat through the jungle when a rocket-propelled grenade blew the hull apart under him, killing one of his seven-man crew.

"You don't know what's around the next bend. The banks are sprayed bare by Agent Orange. You know, you go into the Navy, you just don't think you're going to be doing things like that," he said.

Like a lot of others, both men struggled with post-traumatic stress disorder but have come to their own acceptances.

"Some things are just right there. They will always be right there," Davis said. "The only thing, you can't dwell on it. That was then. This is now. When we came back, we didn't call it going home. We called it going back to the real world."

At times, the television special irritated Blankin, he said. Jane Fonda (featured protesting in North Vietnam in support of the enemy during the war) and John Kerry (featured testifying to Congress about American atrocities after he returned from combat), "They just stick in my craw," he said.

Both veterans returned home on transports also carrying the caskets of other service people — Davis on a boat "with a hull full of bodies," Blankin on a C-130 plane with caskets set in the cargo hold the soldiers' seats lined.

"Everything that left had bodies on it," he said. "When I felt that plane come off the ground (in Vietnam), that was the best I'd felt in a long time."

3.8 - South Bend Tribune: [Viewpoint: St. Joseph County clinic's grand opening fulfills a promise to our veterans](#) (29 September, Sen. Joe Donnelly (D-Ind.), 274k online visitors/mo; South Bend, IN)

When we care for our veterans, we both honor their service, and we reinforce our values.

Yet for too long, it was a struggle to provide veterans in our community convenient access to quality health care. Veterans from South Bend, Mishawaka, Elkhart, LaPorte and Plymouth have regularly had to make a two-hour trip to VA facilities in Chicago or Fort Wayne to see a doctor. Veterans, family members and their caregivers often have to fight traffic and bad weather to get the health care they earned through their service to our nation. For those veterans unable to drive themselves, making the trip often involved taking a Disabled Americans Veterans van all the way to Fort Wayne, possibly spending an entire day in transit, receiving care, and waiting hours for other DAV passengers to receive their care too.

For the last 10 years — in the U.S. House of Representatives and in the U.S. Senate — it has been my mission to work alongside veterans in north central Indiana to provide the finest VA care possible, and I am proud that today we will officially open the St. Joseph County VA Clinic.

And while the promise we are fulfilling today seems simple, the process was long and full of challenges. Alongside our local veterans, we began working on the clinic in 2007, holding roundtables and meetings to understand the specific needs of Hoosiers. Through each step of the decade-long process — gathering the facts necessary to make our case for a new VA clinic; securing VA approval, congressional authorizations, as well as funding; cutting through red tape to contract, permit, and build the new clinic; and even locating a Transpo bus stop at the clinic to accommodate local veterans and employees — our community stood up, answering the call to make good on our promise to provide access to quality health.

I want to recognize our entire community, the VA, veterans service officers and other veterans advocates, and local elected officials, for their persistence and tireless work that made the St. Joseph County VA Clinic a reality.

Today we officially open a new 89,000-square foot, state-of-the-art St. Joseph County VA Clinic that is expected to serve up to 13,000 area veterans. Our veterans will be able to receive a range of services from primary medical care, mental health care, audiology, radiology, physical therapy, podiatry, care for post-traumatic stress disorder, substance abuse counseling, traumatic brain injury care, tele-health, and many other services. Perhaps, more importantly, they will receive these services right here in north central Indiana.

Today's grand opening is a significant milestone. It's the culmination of the dedication and determination of the entire community, and it's an example of what we can accomplish when we work together. More importantly, it fulfills an important part of our promise to our veterans.

Joe Donnelly, D-Indiana, is a U.S. senator.

3.9 - The Herald-Dispatch: [Look for these warning signs to help prevent suicide](#) (1 October, Debbie Brammer, 192k online visitors/mo; Huntington, WV)

Thirty-nine stones lay scattered beneath the leafy branches of a young maple tree. Each stone bears the name of a loved one who was lost to suicide. Billy, Rita, Scott are among the names painted on the stones, representing both male and female, young and old, because suicide has no respect for gender or age.

This Tree of Remembrance, planted on the lawn of the Huntington VA Medical Center (VAMC), stands as a solemn reminder of lives cut short and the families and friends who were left behind to grieve. The tree is not only a memorial, but it also supports the healing of the families and friends.

Suicide prevention is a top priority of the Department of Veterans Affairs. In a recent message to employees, Huntington VAMC Director Brian Nimmo pointed out that suicide is preventable. September was designated Suicide Prevention Month and now is a perfect opportunity to change the way the public thinks about suicide through education about warning signs

"The statistics are startling," Nimmo said. "An average of 20 veterans die from suicide each day, and 67 percent of those deaths were a result of firearm injuries. But, did you know only six of the 20 were users of VA health services." He encouraged staff, who encounter hundreds of veterans and their friends and family members each day, to not only reach out to educate the public but to make sure they know the warning signs, too.

The warning signs include significant changes in behavior or mood such as:

>> sleeping a lot more or a lot less.

>> quick to anger, more withdrawn.

>> drinking more or using drugs.

>> engaging in high risk behavior.

>> expressing feeling of hopelessness or saying loved ones would be better off without them around.

If these changes are noticed, encourage the veteran to contact the Veterans Crisis Line or make the contact yourself. The toll- free number is 1-800-273-8255, and press 1, or chat online at VeteransCrisisLine.net, or send a text to 838255.

The Huntington VA has two suicide prevention coordinators, Deanna Stump and Julie Brawn, who work to raise awareness of VA's resources and foster communication and education among veterans, community organizations and the public at large. They provide intensive case management for those identified as being at risk.

Unfortunately, VA and our suicide prevention coordinators cannot do it alone, we need the help of our communities. To learn more about suicide awareness and prevention go online to <http://www.VeteransCrisisLine.net/BeThere>, or <http://maketheconnection.net>.

Debbie Brammer is public affairs officer at the Huntington VA Medical Center.

3.10 - FierceHealthcare: [VA proposed rule would override state licensing restrictions to expand access to telehealth](#) (29 September, Evan Sweeney, 140k online visitors/mo; Washington, DC)

The Department of Veterans Affairs has issued a proposed rule that would allow VA providers to treat patients in any state via telehealth, regardless of where they are licensed to practice.

The proposed rule would override state licensing restrictions that the agency says are limiting its telehealth program and allow VA physicians to treat patients anywhere in the country using the VA's telehealth technology.

That change is a critical part of the VA's "Anywhere to Anywhere VA Health Care" program, unveiled by VA Secretary David Shulkin, M.D., and President Donald Trump last month. During that announcement, Shulkin said he was working with the White House's Office of American Innovation and the Department of Justice to issue a new medical practice regulation to support telehealth initiatives.

According to the proposal, "many VA medical centers" have not expanded telehealth programs because of state laws, and "many physicians" refuse to practice telehealth out of fear they will jeopardize their medical license.

"As VA's telehealth program expands and successfully provides increased access to high quality healthcare to all beneficiaries, it is increasingly important for VA health care providers to be able to practice telehealth across State lines and within states free of restrictions imposed by State law or regulations, including conditions attached to their State licenses," the rule states.

Rather than lobby each state to remove licensure restrictions, the VA argues that preempting state law would allow the agency to quickly expand telehealth services.

“By allowing VA telehealth providers to more easily treat patients across state lines, we can ensure that recent advances in technology-enabled care reach the most deserved among us and spur better outcomes for the 20 million veterans in the VA system today,” Health IT Now Executive Director Joel White said in a statement supporting the regulatory change.

Currently, VA providers can waive state licensing requirements if both the physician and the patient are in a federally owned facility. But with the development of a new mobile app, the VA wants to reach veterans in their homes to expand access to mental health services and make it easier for those with limited mobility to get necessary medical care.

This week, behavioral health advocates came out in support of the VETS Act of 2017, which proposes similar regulatory changes. But the VA’s rulemaking process could move faster. The proposed rule will be open for comments for 30 days.

3.11 - The Sun News: [VA hospitals must be fixed - now](#) (30 September, Stephen Sherwood, 140k online visitors/mo; Myrtle Beach, SC)

I have written all my senators and one congressman, and yet nothing changes with the VA hospital.

I had major neck surgery in July and was prescribed four different opiates for pain. Now I cannot get anyone to prescribe any of these opiates, so along with being in pain, I am withdrawing from the opiates cold turkey. I would be willing to bet that if you and all your staff looked into this situation, you would find that there are countless other veterans who are also receiving this unethical and immoral treatment from VA hospitals nationwide.

Please do something other than what you haven't been doing. I am begging you as a proud veteran and a resident of the great state of South Carolina that you immediately do more than send them a letter or a phone call - that you actually look into this terrible treatment that myself and countless other veterans continue to receive at the hands of the VA.

STEPHEN SHERWOOD, MYRTLE BEACH

[Back to Top](#)

3.12 - The Joplin Globe: [Missouri's U.S. senators note bipartisan efforts](#) (29 September, Susan Redden, 76k online visitors/mo; Joplin, MO)

On the federal front, Missouri's U.S. Sen. Roy Blunt this week announced he and Sen. Richard Blumenthal had introduced bipartisan legislation to expand veterans' access to peer counseling specialists to better combat the risks of suicide and treat associated mental health conditions.

"Our nation has a responsibility to ensure our veterans have access to quality behavioral and mental health treatment," Blunt said. "Given their shared experiences, peer specialists are uniquely positioned to provide veterans the support they need in their recovery."

The Veteran Peer Act would establish peer specialists in patient aligned-care teams within the Veterans Affairs medical system to undertake veteran outreach, according to Blumenthal, a Democrat from Connecticut.

The Department of Veterans Affairs employs peer specialists to assist veterans in treatment for mental health and substance abuse disorders. The specialists support their fellow veterans and encourage recovery by helping them access veterans' health services and navigate the VA health care system and by teaching coping and positive behavior.

The VA was instructed by a 2012 executive order to hire and train 800 peer specialists by the end of 2013 to treat the estimated 1.5 million veterans needing mental health services.

Blunt's bill would expand veterans' access to the services by addressing current shortcomings that restrict specialists' participation in primary care services, along with the persistent stigma attached to seeking mental health treatment.

The measure would implement the program in 50 locations across the nation over a two-year period. It would also require consideration of rural and underserved areas when seeking locations.

Missouri's U.S. Sen. Claire McCaskill, a Democrat, on Thursday announced she had joined a GOP colleague to introduce what she described as "commonsense fixes" aimed at providing relief to some regional banks affected by burdensome requirements of the Dodd-Frank financial reform bill.

In a release, McCaskill said the proposed rules are aimed at small, regional banks to modify Dodd-Frank regulations that were never intended for banks that engage in ordinary consumer banking practices.

David Perdue, a Republican from Georgia, is co-sponsor of the measure. It serves as the Senate companion to a measure sponsored by U.S. Rep. Blaine Leutkemeyer, of Missouri, and passed in the House last year.

"When even some of the architects of Dodd-Frank agree the law is overly burdensome on regional banks, you know we've got a problem on our hands," McCaskill said. "This commonsense fix will untie the hands of our small regional banks and return to them to the flexibility to lend to Missouri customers who want to buy a house or start a business. I'm glad to join Congressman Leutkemeyer's efforts to help get this bill across the finish line in the Senate."

Perdue pointed out that Dodd-Frank overregulated regional banks by placing them in the same category as huge banks with a global reach, increasing their costs and limiting their ability to support their communities.

The legislation would lower the regulatory burden on regional banks by giving the Federal Reserve the flexibility to exempt them from certain Dodd-Frank rules that limit their lending

ability. Under the measure passed in the wake of the 2008 financial crisis, banks with assets over \$50 billion are subject to stronger regulations.

The proposed measure would relax rules for banks over the \$50 billion threshold if they are not designated as a Global Systemically Important Bank that, according to the Federal Reserve, could have an impact on international financial systems.

McCaskill said the threshold being applied to regional banks had been criticized by everyone from governors for the Federal Reserve to Barney Frank, the former lawmaker who authorized the legislation.

3.13 - Daily Messenger: [Improvements reported at Veterans Crisis Line](#) (29 September, Julie Sherwood, 74k online visitors/mo; Canandaigua, NY)

The Veterans Crisis Line — which has been criticized for calls rolling to voicemail, dropped calls and veterans put on hold for long periods — received a glowing report Friday.

U.S. Reps. Chris Collins, R-Clarence and Phil Roe, a Republican from Tennessee who chairs the House Committee on Veterans Affairs, discussed improvements following a tour of the crisis center at the Canandaigua VA Medical Center.

“The biggest problem we’ve had is timely access to care, so this is basically the front porch to that,” said Roe, after seeing the crisis center that opened in 2007 and is now one of two centers at the forefront of the VA’s efforts to address the alarming rate of veteran suicide. The call centers, in Canandaigua and Atlanta, Georgia, answer phone calls, texts and online messages from veterans, military members and their families.

“It’s very disturbing to me, the number of veterans we are losing to suicide, and not just veterans but Americans,” said Roe, a Vietnam veteran and physician. “When you lose more men and women to suicide than combat, something needs to be done.”

Roe and Collins were pleased with what they saw and heard. A panel of VA staff involved with the Crisis Line in Building 37, where dispatchers work the center, discussed improvements with the congressmen. Among those: the Veterans Crisis Line averaged 2,300 calls in the month of September at both call centers. Of those, an average of 1.3 percent of calls (about 30 calls) rolled over to a backup center. When phone lines are busy, calls are routed to another contracted call center. In the past few days that percentage dropped to less than half a percent.

The crisis line is now answering calls, on average, in 7.5 seconds, with 99 percent of calls answered within 20 seconds.

“I am very impressed, it was a great tour,” said Collins, whose district covers much of Western New York and part of the Finger Lakes including Canandaigua. “Folks here care about our veterans, their dedication is clear,” he said.

The VA plans to open a third call center this fall on the VA campus in Topeka, Kansas.

About 200 responders work at the Atlanta facility, and 310 work at the Canandaigua center, according to a Sept. 14 report by the military publication Stars and Stripes. The Topeka facility will bring the number of employees staffing the veterans crisis line to 610.

During the press conference, the congressmen were also asked about a federal funding cut of millions of dollars for the Veterans Outreach Center in Rochester. At issue is a \$2.1 million grant that the VOC has received annually for the last six years that was not renewed for 2018. The VOC of Rochester was one of 36 previous recipients of the funds through the VA's Supportive Services for Veteran Families program that did not get renewed.

The center in Rochester helps veterans in seven local counties and their families find reliable housing. The lack of funds would scale back services, and a satellite office at the Veteran's Outreach Center in Buffalo could close with staff losing jobs or being reassigned.

Roe said he couldn't say why the funds were cut. Collins mentioned a possible "paperwork snafu." Collins said this is not a partisan issue and he was going to fix the problem, beginning that afternoon, working with others in Congress.

3.14 - KXRM (FOX-21, Video, Updated): [VFW raises concerns over VA care](#) (30 September, Carly Moore, 60k online visitors/mo; Colorado Springs, CO)

A fallen service member has a group from the Veterans of Foreign Wars organization speaking out. Some members of the VFW are attributing his death to lack of care from the Colorado Springs Veterans Affairs hospital.

The widow of the service member was left overwhelmed and unprepared. She was concerned about her financial situation and was worried she would lose her house.

The VFW said it's extremely common for people to not have plans, to not know their benefits, and to not have documents on hand.

A small group of commanders at VFW Post 3917 turned it around.

Ray Belasco was a 20-year Vietnam veteran. He passed away at age 65, and some VFW members believe his death could have been avoided.

"It sound to me, people didn't really take him serious, didn't feel that he was really sick," said VFW Sr. Vice Commander Steve Kjonaas.

He went to the VA in Colorado Springs over the Labor Day holiday and was sent to an emergency room.

“Veterans have very unique diseases, illness and problems,” said Kjonaas. “That’s the difference between the Department of Veterans Affairs and any other civilian healthcare that you see.”

The VA facility in Colorado Springs doesn’t have an emergency room specifically for veterans. For that, they must go to Denver or to a local civilian emergency room.

“As with other outpatient clinics in the community, emergency services are not available at the PFC Floyd K Lindstrom VA Clinic in Colorado Springs,” the VA said in a statement. “We encourage anyone in an emergency situation to seek immediate treatment and care at their nearest emergency department, where appropriate services are available.”

After the emergency room released him, hospice care he was searching for wasn’t enough. He died just days later.

Belasco’s widow, Ute, was left with nothing: no money or plans for her husband’s funeral. She tried to sort things out, but was shut down without documentation.

“Once a service member dies, they cut off his pay,” said VFW Jr. Vice Commander Cindy Galvin. “If you don’t have the paperwork to go in and say, ‘Hey, I’m a spouse,’ then you don’t get the survivors pay.”

VFW members helped expedite the process. Something that could take one to three months was done in about two weeks.

“As a veteran myself, it makes me very happy to help,” said Galvin.

When Galvin was asked why she is also helping plan a funeral this Saturday, she said, “He’s a comrade and we never leave a vet behind.”

The American Legion Post 38 at 6685 Southmoor Drive in Fountain is hosting a memorial service starting at 11 a.m. Saturday. They want other former service members to come out and help support this fallen veteran.

Those close to Ute have released the following statement on her behalf:

Ute would like them to know about her being misquoted. She never said she was afraid nobody would show up for Ray’s funeral. Not a funeral, but to attend a memorial. She only reached out for help with this process, not for anything for her. She also wanted help with the way Ray was treated at Cheyenne Mountain Care Facility (Center) hospice provider. They showed extreme lack of care, compassion and dignity with his care. Ute wants to thank the Veterans of Foreign Wars for their help and all who have supported her and helped during this time.”

[Back to Top](#)

3.15 - KXRM (FOX-21, Video): [Colorado Springs widow gives final salute to veteran husband who died suddenly](#) (30 September, Sarah Ferguson, 60k online visitors/mo; Colorado Springs, CO)

The widow of a fallen Service Member left overwhelmed after he suddenly died, is able to give her husband, a Vietnam Veteran, the honorary send-off he deserves.

His wife, Ute was shocked when her husband Ray Belasco suddenly passed away at 65-year's-old.

Recently a local Veterans of Foreign Wars group heard the widow's story, with Members attributing his death to a lack of care from the Colorado Springs Veterans Affairs hospital.

"When we found out that the funeral home wanted to hold the funeral in the parking lot we couldn't have that," said VFW Jr. Vice Commander Cindy Galvin.

Saying because Ute didn't have the proper documentation complete after Ray's death, she was turned away from any funeral plans.

Fortunately, VFW Post 3917 took matters into their own hands and set-up a memorial at the American Legion Post 38 in Fountain.

"So many valued people; so many honorable people from different walks of life, from different organizations, different motivations who come here to honor the veterans," said VFW Sr. Vice Commander Steve Kjonaas.

Prior to the memorial, VFW Post 3917 also helped Ute collect the benefits her husband deserves, while assisting her with filling out the proper documentation.

"They weren't asking for anything; they weren't expecting anything, they didn't beg for anything, they just are very grateful, they didn't realize we were going to do all of this," said Galvin.

If you'd like to read more about Ute's story and her concern with the Colorado Springs Veterans Affairs hospital, click here.

3.16 - Finger Lakes Daily News: [VA Crisis Line Reports Improvements in Call Handling](#) (30 September, Joe Lasky, 53k online visitors/mo; Geneva, NY)

The Daily Messenger reports Congressman Chris Collins and Tennessee Representative Phil Roe toured the facility Friday, and reported that only 1.3% of calls are now rolling over to a backup center, with 99% of calls answered within 8 seconds.

The Crisis Line had come under fire in recent years for allowing as many as 30% of calls to go to backup centers.

The suicide hotline employs 310 at the Canandaigua center, with an additional 200 workers out of Atlanta, and an additional center in Topeka, Kansas set to go online later this fall.

[Back to Top](#)

3.17 - Inquirer.net: [US lawmaker files bill for full benefits for Filipino WWII veterans](#) (29 September, 14k online visitors/mo; Daly City, CA)

WASHINGTON, DC – Congresswoman Jackie Speier (CA-14) introduced H.R. 3865, the Filipino Veterans Fairness Act of 2017 on Thursday, September 28.

During World War II, about 250,000 Filipinos volunteered to fight alongside U.S. troops. As citizens of a commonwealth of the United States before and during the war, Filipinos were legally American nationals.

With American nationality, they were promised all the benefits afforded to those serving in the U.S. Armed Forces. But in 1946, Congress stripped many Filipinos of the benefits that had been promised by President Franklin D. Roosevelt. Of veterans of the 66 countries allied with the United States during World War II, only Filipinos were denied benefits.

Speier's legislation eliminates the distinction between the Regular or "Old" Philippine Scouts and the other three groups of veterans—Commonwealth Army of the Philippines, Recognized Guerrilla Forces, and New Philippine Scouts. Widows and children of Filipino veterans would be eligible for Dependency and Indemnity Compensation just like any other veteran.

"This bill rights a shameful wrong created when Congress rescinded a promise to Filipino veterans of World War II over 70 years ago," Speier said. "I will not rest until these heroes, and their families, receive the benefits they need and deserve. If America won't live up to its honor and duty to our allies and friends we may find ourselves alone in our next hour of need."

The 2009 American Recovery and Reinvestment Act contained a provision that provided a lump sum payment of \$15,000 for Filipino veterans who are now U.S. citizens and \$9,000 for non-citizens. But there have been problems with the implementation of this payment program. To be eligible, a veteran has to be on the so-called "Missouri List," an Army roster of eligible veterans.

The Missouri List is incomplete. A 1973 fire destroyed 80 percent of the records for Army personnel from 1912 to 1960. As a result, over 17,000 Filipino veterans have had their claims denied. The Filipino Veterans Fairness Act directs the VA to take into account alternative military documentation to determine eligibility.

"The Recovery Act payments were a start, but our nation must bestow the full status it promised these veterans in wartime," Speier concluded. "Their average age is 90. Fewer than 15,000 are still alive today, and they are dying at a rate of over 10 a day. For these veterans and their loved ones the time to act is now."

3.18 - Montgomery Herald: [VA awards grants to help at-risk Southern W.Va. vets, families](#) (29 September, 7k online visitors/mo; Montgomery, WV)

BECKLEY — Earlier this month, the Department of Veterans Affairs (VA) announced it has awarded \$343 million in grants to 288 nonprofit organizations to help low-income veterans and their families. More than \$2 million will go towards a community partner that assists veterans across the state, including southern West Virginia.

The grants were awarded under VA's Supportive Services for Veteran Families (SSVF) program.

In West Virginia, three SSVF programs received money from the \$343 million grants. One of them, West Virginia Community Action Partnerships, supports the entire state.

SSVF funding, which supports outreach, case management and other flexible assistance to rapidly re-house veterans who become homeless or to prevent veterans from becoming homeless. The funding helps the most economically vulnerable veterans avoid or exit homelessness.

In 2016, SSVF funding through WVCAP supported 589 veterans who were homeless or at-risk in West Virginia. As of July 31, 461 veterans had been helped, according to Leah Willis, SSVF coordinator for WVCAP.

"We are projecting to assist 600 veterans during the 2018 program year," Willis said.

"No veteran that served our country should be without a home or be facing that reality," said Stacy Vasquez, Beckley VAMC director and Army veteran. "Our homeless, health care and social work teams, along with community partners, successfully reduced the overall homeless Veteran rate in this region by more than 51 percent in 2016."

This year's recipients competed successfully for grants under a Dec. 7, 2016, Notice of Fund Availability. The funding will support SSVF services in fiscal 2018.

6.1 - WFED (AM-1500): [Major changes coming to DoD's TRICARE system Jan. 1](#) (29 September, Jared Serbu, 831k online visitors/mo; Washington, DC)

The Defense Department published new rules Friday that will make significant changes to the health insurance system that serves military family members and retirees on Jan. 1, altering the structure and fees of benefit plans, and, according to Defense health officials, making care more accessible.

Most significantly, new beneficiaries will have to make an affirmative decision to enroll in the TRICARE system and will only be able to do so during an annual open enrollment period. The open enrollment schedule will be the same as the one used by the Federal Employee Health Benefits Program that serves civilian DoD employees: November and December of each year.

The policy differs substantially from the one in place today, in which TRICARE-eligible beneficiaries receive health benefits automatically. With a few exceptions, family members and retirees who do not sign up during the open enrollment period will lose coverage in TRICARE's "purchased care" market for the following year. They would still be able to seek care in military-run hospitals and clinics, but only on a space-available basis.

The change was one of several Defense health reforms Congress ordered as part of the 2017 Defense authorization bill, But Vice Adm. Raquel Bono, the director of the Defense Health Agency, said the move to open enrollment made sense from DHA's perspective as well.

"We need to make sure that we have as much information as possible in order to design our provider network," she told reporters on a conference call. "We wanted to also come as close as we could to what's happening in the commercial sector, and we're intent on being able to create some efficiencies in the administration of our health plans. We see this as one of the mechanisms to do that."

But officials said the open enrollment change will not have any meaningful effect on beneficiaries for another year; 2018 will be treated as a "transition year," and anyone who's covered by TRICARE as of Jan. 1, 2018 will be automatically enrolled in the plan that most closely matches the one that serves them today.

The plans are changing as well, effective Jan. 1. Also at the direction of Congress, DoD is merging the existing TRICARE Standard and Extra benefits — the department's fee-for-service options — into a single plan called TRICARE Select.

Like Standard and Extra, Select will let patients use any authorized medical provider, but cost shares are lower when beneficiaries see in-network providers. In most ways, it will operate like the plans it's replacing, but with changes to the ways in which patients pay out-of-pocket costs.

Currently, the cost shares are based on a percentage of TRICARE's negotiated costs with a network provider (or of that provider's "allowable costs" if they're out-of-network). Starting next year, patients will pay a fixed, per-visit rate for in-network providers that varies according to the type of medical care they're receiving.

For example, under Standard and Extra, a family member of an active-duty service member is responsible for 15 percent of the bill for an outpatient visit from an in-network doctor and 20 percent for an out-of-network doctor. The new Standard plan would charge a flat \$27 fee for an in-network provider. The fees for TRICARE-covered retirees are higher: the same visit would cost \$35.

“We thought this was something that would be a little more predictable and a little more patient-friendly, and we also thought it was an easier construct for our providers to use,” Bono said. “What we tried to do was take an average, so it should be close to what people are currently paying.”

Another change: The rules set a new requirement that TRICARE Select’s provider network cover enough geographic territory to provide services to at least 85 percent of its beneficiaries, up from just over 60 percent under the existing Standard and Extra plans.

The fee structure for TRICARE’s Prime plan, the managed care option that primarily serves areas with large concentrations of military members, remains largely unchanged, but the rule makes several changes that officials said were designed to improve access to care.

For instance, if TRICARE’s contractors don’t offer an appointment with a managed care provider within a timeframe that meets DoD’s access standards, the patient will be allowed to see an out-of-network provider without paying additional fees. The department says it will also waive some of its previous requirements that patients get referrals or pre-authorizations before patients visit specialty care providers or urgent care clinics, and treatments for obesity are specifically called out in the rule as covered care.

None of the changes are applicable to currently-serving military members, whose medical care remains a government obligation for as long as they continue to serve on active duty, but the fees for family members whose sponsors join the military after 2018 will be different from those that are currently serving, depending on which TRICARE plan they enroll in.

The changes to TRICARE’s health plans were only a few of the tweaks Congress made to the military health system as part of the 2017 Defense bill.

The rules DoD published on Friday nominally implement some of them, but Bono said the department will have to undertake more careful study before the other changes take effect.

Among those changes, Congress ordered DoD to treat expenses for telehealth in the same way it covers in-person visits, adjust the staffing in its military treatment facilities so that the health specialists the military employs more closely matches the medical expertise the military is likely to need in wartime environments, and to start creating “high-performance” treatment networks in pockets of the country that are underserved by DoD’s system by partnering with the Department of Veterans Affairs and private-sector hospital networks.

“The rule gives us an opportunity to implement some of these things, but it’s going to be an iterative process,” Bono said. “We will be looking specifically at where it makes the most sense to partner with the civilian health care systems that are in the particular areas where we have our beneficiaries. It’s part of our network development and it’s an opportunity to build partnerships. We’ll be evaluating it, and this is one of the things that the open enrollment requirement if going to help us with in terms of understanding where those opportunities might exist.”

Veterans Affairs Media Summary and News Clips

30 September 2017

[1. Top Stories](#)

1.1 - The Washington Post (Video): [VA chief took in Wimbledon, river cruise on European work trip; wife's expenses covered by taxpayers](#) (29 September, Jack Gillum, Alex Horton, Drew Harwell and Lisa Rein, 43.9M online visitors/mo; Washington, DC)

Nearly three days into a trip to Europe this past July, Veterans Affairs Secretary David Shulkin had attended a Wimbledon championship tennis match, toured Westminster Abbey and taken a cruise on the Thames. The 10-day trip was not entirely a vacation. Shulkin was in Europe for meetings with Danish and British officials about veterans' health issues, so taxpayers picked up part of the tab.

[Hyperlink to Above](#)

1.2 - Reuters: [Under pressure from Trump, Price resigns as health secretary over private plane uproar](#) (29 September, Steve Holland, 43.6M online visitors/mo; New York, NY)

U.S. Health and Human Services Secretary Tom Price resigned under pressure from President Donald Trump on Friday in an uproar over Price's use of costly private charter planes for government business. His abrupt departure was announced an hour after Trump told reporters he was disappointed in Price's use of private aircraft and did not like the way it reflected on his administration.

[Hyperlink to Above](#)

1.3 - The New York Times: [Veterans Agency Seeks to Scrap Ethics Law on For-Profit Colleges](#) (29 September, Patricia Cohen, 29.8M online visitors/mo; New York, NY)

The Department of Veterans Affairs is pushing to suspend a 50-year-old ethics law that prevents employees from receiving money or owning a stake in for-profit colleges that pocket hundreds of millions of dollars in tuition paid through the G.I. Bill of Rights.

[Hyperlink to Above](#)

1.4 - U.S. News & World Report (AP): [Alaska VA Office Gets Mixed Report From Watchdog](#) (29 September, Becky Bohrer, 24M online visitors/mo; Washington, DC)

A government watchdog says the U.S. Department of Veterans Affairs regional office in Anchorage has made strides in processing claims but has work to do in other areas. The VA's inspector general said the accuracy of the claims processing it reviewed earlier this year was significantly better than a prior inspection in 2013.

[Hyperlink to Above](#)

1.5 - Stars and Stripes: [VA publicizes Shulkin's travel schedule amid scrutiny over Cabinet spending](#) (29 September, Nikki Wentling, 1.5M online visitors/mo; Washington, DC)

The Department of Veterans Affairs made moves Friday to publicize Secretary David Shulkin's travel schedule, following scrutiny over the cost of government-funded travel by other Cabinet members. The VA announced it will post Shulkin's itineraries of international and domestic trips, as well as who accompanies him and whether he uses private or government aircraft.

[Hyperlink to Above](#)

1.6 - The Clarion-Ledger (Video): [Mississippi treating 11 Hurricane Maria victims, more coming](#)

(29 September, Anna Wolfe, 849k online visitors/mo; Jackson, MS)

So far, 11 hurricane victims from Puerto Rico and St. Croix have been transported to metro Jackson hospitals in the aftermath of Hurricanes Irma and Maria. The storms devastated Puerto Rico's hospitals, a majority of which are without electricity or fuel for generators and beginning to run out of oxygen and clean water.

[Hyperlink to Above](#)

1.7 - The San Diego Union-Tribune: [Does a soldier's best friend belong in VA research labs? A fight at the heart of the veterans community](#)

(29 September, Jeanette Steele, 494k online visitors/mo; San Diego, CA)

America loves dogs, but many veterans have an extra bond after serving with canine units on the battlefield and increasingly depending on service dogs back at home. Now the U.S. Department of Veterans Affairs and some of the nation's largest veterans groups are in a scrap with a government watchdog organization and some in Congress over VA medical research programs that inflict harm on man's best friend in the name of science.

[Hyperlink to Above](#)

[2. Veteran and Employee Experience](#)**2.1 - USA Today: [VA Secretary David Shulkin discloses official travel details](#)**

(29 September, Jessica Estepa, 36.7M online visitors/mo; McLean, VA)

Veterans Affairs Secretary David Shulkin announced Friday that his department would disclose details about his official travels, in an attempt to be transparent as the travels of other members of the administration come under scrutiny. The department will regularly update a page that includes any travels by private and government aircraft, as well as itineraries of official international and domestic trips.

[Hyperlink to Above](#)

2.2 - ABC News: [VA secretary spent half of official London trip sightseeing](#)

(29 September, Luis Martinez, 24.1M online visitors/mo; New York, NY)

Veterans Affairs Secretary David Shulkin flew a commercial airline to London this past July to attend a veterans conference, but half his time there was spent on sightseeing and a stop at Wimbledon tennis tournament. Shulkin's wife's commercial travel costs were also paid for by the federal government because she was under "approved invitational orders"

[Hyperlink to Above](#)

2.3 - Politico: [Who will replace Tom Price? A dozen names are circulating as possible successors](#)

(29 September, Joanne Kenen and Jennifer Haberkorn, 23.9M online visitors/mo; Arlington, VA)

The VA secretary is a Trump favorite, and the only cabinet nominee to be unanimously confirmed. However, Shulkin has come under criticism for combining leisure with business on his official travel — he attended a Wimbledon championship tennis match, toured Westminster Abbey and took a cruise on the Thames while meeting this summer with European officials about veterans' issues, The Washington Post reported Friday.

[Hyperlink to Above](#)

2.4 - The Huffington Post: [Yet Another Trump Administration Official Took Questionable Liberties With Work Travel](#) (29 September, Mollie Reilly, 23M online visitors/mo; New York, NY)

Veterans Affairs Secretary David Shulkin used his downtime on a recent international trip for several leisure activities, including a tennis match and river cruise, The Washington Post reported Friday. According to the report, Shulkin spent roughly half of a 10-day trip to the U.K. and Denmark to sightsee, watch a high-profile Wimbledon match and take in other activities more typical of a vacation than a work trip.

[Hyperlink to Above](#)

2.5 - The Hill: [Trump VA chief went sightseeing, shopping with wife on government trip: report](#) (29 September, Brandon Carter, 11.8M online visitors/mo; Washington, DC)

Veterans Affairs Secretary David Shulkin spent nearly half his time on a recent international trip sightseeing and shopping with his wife, according to The Washington Post. Shulkin traveled to Europe in July to attend a conference in London with representatives of several countries on veterans' health issues, as well as a series of meetings in Denmark.

[Hyperlink to Above](#)

2.6 - Washington Examiner: [VA secretary saw Wimbledon match during taxpayer-funded trip to Europe: Report](#) (29 September, Melissa Quinn, 4.8M online visitors/mo; Washington, DC)

Secretary of Veterans Affairs David Shulkin and his wife, accompanied by other VA officials, attended a tennis match at Wimbledon, toured Westminster Abbey, and cruised the Thames River as part of a taxpayer-funded, 10-day work trip to Europe this summer, according to a report.

[Hyperlink to Above](#)

2.7 - Pittsburgh Post-Gazette: [Pittsburgh VA nurse is finalist for national caregiver award](#) (29 September, Gary Rotstein, 4.8M online visitors/mo; Pittsburgh, PA)

A nurse for the VA Pittsburgh Healthcare System is one of six national finalists for an annual award given to a medical professional who shows an exemplary caregiving approach on the job. Victor Fagan, a licensed practical nurse from Butler, won recognition from among nearly 200 nominees who were submitted to the Boston-based Schwartz Center for Compassionate Healthcare.

[Hyperlink to Above](#)

2.8 - PennLive (Video): [VA chief mixed business with pleasure at taxpayer expense: Media report](#) (29 September, Ivey DeJesus, 3.1M online visitors/mo; New Bloomfield, PA)

President Donald Trump's veterans affairs chief is the latest administration official in hot water for reportedly tapping into taxpayer money to pay for vacation outings and non-official business. Veterans Affairs Secretary David Shulkin in July took in a Wimbledon championship tennis match and a Thames River cruise on taxpayer money. That's according to a report published Friday by The Washington Post.

[Hyperlink to Above](#)

2.9 - Military Times: [Amid Cabinet controversies, VA promises to post secretary's travel details online](#) (29 September, Leo Shane III, 2.1M online visitors/mo; Springfield, VA)
In response to the growing scandal of Cabinet officials using pricey private aircraft for business trips, Veterans Affairs officials announced Friday they will post details of all official travel by department Secretary David Shulkin online to provide transparency about his travels. "Veterans and taxpayers have a right to know about my official travel as secretary, and posting this information online for all to see will do just that," Shulkin said in a statement.

[Hyperlink to Above](#)

2.10 - Providence Journal (The Enterprise): [Providence VA official relieved of duties amid allegations of racism, homophobia](#) (29 September, Paul Edward Parker, 1.2M online visitors/mo; Providence, RI)
A manager at the Veterans Affairs Regional Office in Providence has been relieved of his duties pending disciplinary action, following a complaint from a co-worker that he created a "toxic work atmosphere."

[Hyperlink to Above](#)

2.11 - KATV (ABC-7, Video): [Troubles at the VA: Nurses speaking out about culture](#) (29 September, Elisabeth Armstrong, 448k online visitors/mo; Little Rock, AR)
Two former nurses who have filed EEO complaints against the CAVHS are speaking out about problems. In July, Channel 7 brought you this report out of the VA. In it, some thirty nurses filed a complaint against the hospital - alleging that under-staffing was impacting patient care.

[Hyperlink to Above](#)

2.12 - WQAD (ABC-8, Video): [Moline man shocked after job training center for veterans shuts down](#) (29 September, Chris Minor, 450k online visitors/mo; Moline, IL)
A Moline, Illinois man is one of more than 300 veterans left in the dark after a job training school they paid for through the GI bill abruptly shut its doors. "Three weeks before graduation, we were told goodbye.

[Hyperlink to Above](#)

2.13 - FedSmith: [VA to Begin Disclosing Agency Secretary's Official Travel](#) (29 September, Ian Smith, 277k online visitors/mo; Washington, DC)
The Department of Veterans Affairs announced today that it will begin publishing all of the agency secretary's official travel on its website. The lists include all official travel taken by Dr. David J. Shulkin since January 20, and the site will be updated within five days after the conclusion of each trip.

[Hyperlink to Above](#)

2.14 - Leavenworth Times: [Sentencing continued for former VA physician assistant](#) (29 September, 46k online visitors/mo; Leavenworth, KS)
A former physician assistant who was convicted of sexually abusing patients at the Leavenworth veterans hospital will not be sentenced until November. Mark E. Wisner was scheduled to be

sentenced today in Leavenworth County District Court. But the sentencing and arguments for post trial motions have been continued until Nov. 3.

[Hyperlink to Above](#)

2.15 - Pahrump Valley Times: [Plaques at Pahrump VA clinic recognize veterans of U.S. armed forces](#) (29 September, Jeffrey Meehan, 1k online visitors/day; Pahrump, NV)

A group of local veterans of the U.S. armed forces gathered to recognize the installation of several plaques at the Pahrump VA Community Based Outpatient Clinic in September. Each plaque bore the symbol of one of the five branches of the U.S. armed forces and another was hung for prisoners of war.

[Hyperlink to Above](#)

[3. Access to Healthcare](#)

3.1 - WBBM (CBS-2, Video): [2 Investigators: Disabled Vets Face Tough Parking At VA Hospital](#) (29 September, Dave Savini, 27.5M online visitors/mo; Chicago, IL)

A major problem at Hines VA Medical Center: Some sick and wounded veterans are struggling to get to their medical appointments because of parking violators. CBS 2's Dave Savini has the story. James Dahan, a Marine Corps veteran, gets angry when fellow wounded vets struggle to find a parking spot.

[Hyperlink to Above](#)

3.2 - The News & Observer: [Vietnam vet happy to be back in Durham's VA hospital, but for how long?](#) (29 September, Thomasi McDonald, 3.9M online visitors/mo; Raleigh, NC)

A Vietnam veteran and double-amputee said things are "perfect" now that he is back in Durham's Veterans Administration Medical Center, where he has lived for a little more than three years. But James Donald Francis, 69, said he's worried because VA officials have not told him or given him any documentation about how long he will be able to stay at the VA's Community Living Center.

[Hyperlink to Above](#)

3.3 - Newsday (Video): [House vet chair Roe tours Northport VA after maintenance issues](#) (29 September, Martin C. Evans, 3.2M online visitors/mo; Melville, NY)

The head of the House Committee on Veterans Affairs came to Long Island for an up-close look at the troubled Northport VA Medical Center Thursday, saying the facility should "find the right size" to address maintenance problems straining its budget and impacting patient care.

[Hyperlink to Above](#)

3.4 - Stars and Stripes: [Stage set in Congress for debate on Choice program reform](#) (29 September, Nikki Wentling, 1.5M online visitors/mo; Washington, DC)

The Department of Veterans Affairs estimated the funds that allow veterans to receive health care in the private sector will last until the end of the year – a projection that establishes a new deadline for when Congress needs to come up with a long-term solution for the Veterans Choice Program.

[Hyperlink to Above](#)

3.5 - WNDU (NBC-16, Video): [New VA clinic in Mishawaka will 'quadruple services'](#) (29 September, Mark Peterson, 833k online visitors/mo; South Bend, IN)
Ribbon cutting ceremonies in Mishawaka on Friday marked the completion of a \$38 million medical clinic for veterans. About ten years ago, the Veterans Administration was first asked to study how often local vets had to travel long distances to get needed medical care. "I'll be able to come here for my eye appointments, I'll be able to come here for my hearing appointments, and those are all things I have to go to Fort Wayne for," said veteran Chuck Damp.

[Hyperlink to Above](#)

3.6 - WNDU (NBC-16, Video): [Sen. Joe Donnelly on tax overhaul, health care and new VA clinic](#) (29 September, Jason Krug, 833k online visitors/mo; South Bend, IN)
President Donald Trump visited Indianapolis on Wednesday, pitching his tax overhaul plan. Traveling with the president from Washington D.C. that day was Sen. Joe Donnelly. A question some had is why the Democrat would travel on Air Force One with the Republican president.

[Hyperlink to Above](#)

3.7 - WFLA (NBC-8, Video): [Veteran suicides, VA corruption focus of rally and protest](#) (29 September, Steve Andrews, 702k online visitors/mo; Tampa, FL)
In the United States, 22 veterans take their lives every day. In front of the Veterans Affairs office at Bay Pines, 22 mannequins stood to serve as a reminder of this American tragedy. Army veteran Mike Ford admits he's come close to ending his life. "Idea was to just go ahead and just kill yourself on V-A property right, maybe if they see, if maybe people like, wow, there's something really going on here," he told News Channel 8.

[Hyperlink to Above](#)

3.8 - Modern Healthcare: [VA looks to ease telehealth regulations](#) (29 September, Rachel Z. Arndt, 460k online visitors/mo; Chicago, IL)
The Veterans Affairs Department proposed a rule Friday that would allow VA providers anywhere in the country to conduct telehealth visits with VA patients across state borders, regardless of state licensing.

[Hyperlink to Above](#)

3.9 - KMVT (FOX-14, Video): [As Suicide Prevention Month comes to a close, the search continues for solutions to veteran suicide](#) (29 September, Peter Zampa, 71k online visitors/mo; Twin Falls, ID)
Suicide prevention month is highlighting how the U.S. Can better address the issue. A specific focus currently in Washington is a push to end veteran suicide. Senators are examining what is being done to help veterans in need, and what other efforts are necessary. One veteran says it is not easy to solve this tragic problem.

[Hyperlink to Above](#)

3.10 - mHealth Intelligence: [New Rule Would Give VA Doctors National Telehealth Privileges](#) (29 September, Eric Wicklund, 53k online visitors/mo; Danvers, MA)

The Department of Veterans Affairs is moving forward with a plan to enable VA doctors to treat veterans through telehealth no matter where the doctor or patient are located, essentially overriding state laws.

[Hyperlink to Above](#)

3.11 - WLTZ (NBC-38, WSB/ABC-2, Video): [Hospital Evacuees from Caribbean Arrive in Atlanta](#) (28 September, Nami Dockery, 44k online visitors/mo; Columbus, GA)

Hospital patients evacuated from the Caribbean due to hurricane Maria are finding refuge in Georgia. Doctors and nurses welcomed the patients after a plane carrying roughly 40 medical evacuees landed Wednesday night. It comes after the hurricane caused widespread power outages, including a loss of electricity at hospitals.

[Hyperlink to Above](#)

3.12 - Marion Republican: [Bost 'not happy' with VA investigation; vows to look further into allegations at Marion VAMC](#) (29 September, Holly Lee, 14k online visitors/mo; Marion, IL)

The conclusion of a Veterans Affairs inquiry into allegations of nepotism, employee intimidation and why some patients died at the VA Medical Center in Marion leaves one southern Illinois congressman "not happy" with the answers and vowing further action.

[Hyperlink to Above](#)

[4. Women Veterans](#)

4.1 - The Mercury: [Expo will focus on women entrepreneurs and female veterans](#) (29 September, Donna Rovins, 187k online visitors/mo; Pottstown, PA)

A unique expo highlighting women entrepreneurs and female veterans is scheduled for Saturday, Oct. 7, at Phoenixville Area Middle School. The 2017 Women Entrepreneur & Women Veteran Expo will give women from different business areas the opportunity to connect with each other to educate, share information and inspire other women to become business owners, according to organizer Dolores Winston, founder and CEO of Here to Apparel.

[Hyperlink to Above](#)

4.2 - KSFY (ABC-13, Video): [Sioux Falls conference puts spotlight on women veterans](#) (29 September, 4k online visitors/day; Sioux Falls, SD)

The annual Women Veteran Conference was held Friday in Sioux Falls. The event was put on by the Sioux Falls VA. About 86 women veterans attended this year's event. Organizers said it is important to recognize women veterans and honor their service and sacrifice.

7.1 - WFED (AM-1500): VA close to awarding Cerner contract for new EHR (29 September, Nicole Ogrysko, 831k online visitors/mo; Washington, DC)

The Veterans Affairs Department is preparing to award its contract with Cerner Corporation for a new electronic health record in the next month or so. The award comes after the department announced its decision abandon its own, existing Veterans Information Systems and Technology Architecture (VistA) and adopt MHS Genesis, the same EHR system that DoD is deploying.

[Hyperlink to Above](#)

8. Other

8.1 - ABC News (AP): The Latest: John Kelly given authority over Cabinet travel (29 September, 24.1M online visitors/mo; New York, NY)

The secretary of the Department of Veterans Affairs says information about his official travel will be posted on the department's website. Secretary David Shulkin says he has not used private aircraft for official business, but has taken six trips on military aircraft. The trip details will include the type of aircraft, members of the traveling party and information about the events he was attending.

[Hyperlink to Above](#)

8.2 - ABC News (AP): A look at questions over Cabinet members' travel (29 September, 24.1M online visitors/mo; New York, NY)

Health and Human Services Secretary Tom Price has resigned amid controversy over his use of costly private charter flights on government business. But other Cabinet members are also facing congressional scrutiny over their travel. Interior Secretary Ryan Zinke dismissed the controversy over charters as "a little BS over travel," but he acknowledged taxpayers do have the right to know official travel costs.

[Hyperlink to Above](#)

8.3 - The Washington Times (AP): Couple gets jail for keeping veteran's dead body in home (29 September, 10.8M online visitors/mo; Washington, DC)

An Ohio couple criminally charged for keeping a Vietnam veteran's decomposing body in their home for several months to steal his Social Security and veteran benefits have received six months in jail. The New Philadelphia Times Reporter reports 50-year-old Brian Sorohan and 46-year-old Stacy Sorohan also received two years' probation Thursday in Tuscarawas County.

[Hyperlink to Above](#)

1. Top Stories

1.1 - The Washington Post (Video): [VA chief took in Wimbledon, river cruise on European work trip; wife's expenses covered by taxpayers](#) (29 September, Jack Gillum, Alex Horton, Drew Harwell and Lisa Rein, 43.9M online visitors/mo; Washington, DC)

Nearly three days into a trip to Europe this past July, Veterans Affairs Secretary David Shulkin had attended a Wimbledon championship tennis match, toured Westminster Abbey and taken a cruise on the Thames.

The 10-day trip was not entirely a vacation. Shulkin was in Europe for meetings with Danish and British officials about veterans' health issues, so taxpayers picked up part of the tab.

Yet he and his wife spent about half their time sightseeing, including shopping and touring historic sites, according to an itinerary obtained by The Washington Post and confirmed by a U.S. official familiar with their activities.

The federal government paid for the flights for Shulkin and his wife, Merle Bari, and provided a per-diem reimbursement for their meals and other expenses, VA said Friday. An agency spokesman did not respond to questions about why Bari qualified for the reimbursements and taxpayer-funded airfare, other than to say she was traveling on "approved invitational orders" and had "temporary duty" travel expenses.

The agency also did not respond to questions about the cost of the flights and the total reimbursement. If Bari took the full per diem every day of the trip, she could have been reimbursed as much as \$3,600 under federal guidelines.

Trump administration Cabinet members have faced mounting scrutiny over their use of private and government jets in recent days, and Health and Human Services Secretary Tom Price resigned Friday amid criticism of his use of taxpayer-funded charter flights. Shulkin traveled on a commercial flight, though, and he was seated in coach on at least one leg.

The European visit, however, puts a focus on the mixing of business and leisure during these trips, which can come at considerable taxpayer expense. Shulkin's immediate predecessor, Robert McDonald, took no foreign work trips, according to a former VA official who spoke on the condition of anonymity.

Shulkin's six-person traveling party included his acting undersecretary of health and her husband, Shulkin's chief of staff and another aide, the itinerary says. They were accompanied by a security detail of as many as six people.

Shulkin's trip came less than two weeks after he signed a memo instructing top VA staffers to determine whether "employee travel in their organization is essential."

"I expect this will result in decreased employee travel and generate savings within the Department of Veterans Affairs," Shulkin wrote.

In response to questions from The Post, VA announced Friday that the agency will begin posting details of the secretary's travel online, including itineraries, and disclosing any use of government or private aircraft. That information had not previously been disclosed publicly.

All of Shulkin's activities on the European trip, including his attendance at Wimbledon, "were reviewed and approved by ethics counsel," VA press secretary Curt Cashour said in an emailed statement.

"These were important trips with our allies to discuss best practices for taking care of veterans," Cashour said. "The secretary has been transparent on his down-time activities that were similar to what he would have done with his family over a weekend in the U.S."

Cashour said the husband of Poonam Alaigh, the acting undersecretary for health, paid his own expenses.

In an interview Friday, Alaigh defended the trip as a "tremendous and valuable exchange of ideas" with British and Danish counterparts.

"Were there some breaks we got? Sure," she said. "But they were reasonable. They were not at the expense of what we had committed to do: representing our country and showing our commitment to veterans."

Alaigh said the delegation took an unplanned trip across the border to Sweden one evening.

Senior members of Congress, including two key Republicans, have expressed concerns about travel by officials in President Trump's Cabinet. The leaders of the House Oversight Committee, Chairman Trey Gowdy (R-S.C.) and Rep. Elijah E. Cummings (D-Md.), wrote to the White House this week to demand records on air travel for executive officials since Trump's inauguration, saying that official travel "by no means should include personal use."

Sen. Charles E. Grassley (R-Iowa), chairman of the Senate Judiciary Committee, also wrote Trump a letter Thursday asking what steps the administration has taken to "ensure Cabinet secretaries use the most fiscally responsible travel in accordance with the public trust they hold."

One ethics expert said the trip sends the wrong message to taxpayers, especially if spouses' expenses were paid by the government.

"That's kind of a long trip for the secretary to be gone," said Walter M. Shaub Jr., a vocal critic of the Trump administration who resigned in July as the federal government's top ethics watchdog. "The cost has got to be extravagant."

Shulkin was invited to attend a July 19 conference in London to discuss veterans' mental health issues with representatives of Britain, Canada, Australia and New Zealand. In past years, the VA secretary has attended the conference.

He also arranged to attend meetings in Denmark from July 12 to 14. Officials in Denmark said VA officials approached them about the meetings.

The bookend events left Shulkin with four days in between, according to his itinerary. He attended a ceremony one of those nights at which a British veteran of the war in Afghanistan was honored, and a meeting the next night at the British prime minister's residence.

Over the course of the trip, Shulkin and his entourage visited four palaces — Copenhagen's Christiansborg and Amalienborg and London's Buckingham and Kensington — and included times for walks, self-guided tours and photo stops.

On one calendar item, a canal tour of Copenhagen, the itinerary specifically noted the group “Will See Little Mermaid Statue,” one of the city’s most iconic public artworks. During the London visit, Shulkin and his wife shared a meal at a restaurant overlooking a tennis court with Victoria Gosling, a British leader of the Invictus Games, a sports tournament for wounded veterans. Gosling posted a photo of the gathering on Twitter.

“Great honour and a pleasure to host US Secretary of the VA and his lovely family,” Gosling wrote.

The Wimbledon event was one of the prized moments of the tennis year: In the women’s final, American Venus Williams would lose her chance at a sixth title to Spain’s Garbiñe Muguruza.

It is not clear whether the London invitation came before or after the scheduling of the events in Copenhagen, which included speaking with several Danish health-care executives at a luncheon organized by a Danish business group. A spokesman for one company in attendance, Leo Pharma, said the executives were asked by the Danish Foreign Affairs Ministry to attend.

In any event, the Copenhagen meetings occurred at a time the business group said was inconvenient, because it was a holiday period for Danes.

“It was quite difficult for us to accommodate,” said Kasper Ernest, a director at the Confederation of Danish Enterprise, noting that his group’s chief executive could not attend. “I was also on holiday.”

Shulkin’s relationship with Danish government leaders has grown over the past year, Danish officials said, and Denmark’s military had been heavily involved in the war in Afghanistan.

In a statement, the Danish Embassy in Washington said it has had “a close dialogue with the U.S. Department of Veterans Affairs for a couple of years based on the long-standing partnership between Denmark and the USA on global conflicts. Over this period, there has been a standing invitation to visit Denmark.”

[Back to Top](#)

1.2 - Reuters: [Under pressure from Trump, Price resigns as health secretary over private plane uproar](#) (29 September, Steve Holland, 43.6M online visitors/mo; New York, NY)

WASHINGTON - U.S. Health and Human Services Secretary Tom Price resigned under pressure from President Donald Trump on Friday in an uproar over Price’s use of costly private charter planes for government business.

His abrupt departure was announced an hour after Trump told reporters he was disappointed in Price’s use of private aircraft and did not like the way it reflected on his administration.

“Secretary of Health and Human Services Thomas Price offered his resignation earlier today and the president accepted,” the White House said in a statement.

Trump named Don Wright to serve as acting secretary. Wright is currently the deputy assistant secretary for health and director of the office of disease prevention and health promotion.

"I'm not happy. OK? I'm not happy," Trump told reporters on the White House South Lawn.

Candidates to succeed Price included Seema Verma, who is administrator of the Centers for Medicare and Medicaid Services and who is close to Vice President Mike Pence, and Scott Gottlieb, a physician who serves as commissioner of the Food and Drug Administration, according to industry analysts.

Several sources saw Gottlieb as a clear front runner. They said he got along well with the White House and is viewed favourably there.

Price's resignation leaves Trump with a second Cabinet position to fill. He has yet to pick a secretary for homeland security after hiring former Secretary John Kelly as his White House chief of staff.

It was the latest blow to the Trump White House, which has struggled to get major legislative achievements passed by Congress and has been embroiled in one controversy after another since Trump took office in January.

Price, a former congressman, was instrumental in the Trump administration's policies aimed at undercutting Obamacare, as well as working with governors across the country to slowly begin unravelling parts of the law.

In a resignation letter, Price offered little in the way of contrition. He said he had been working to reform the U.S. healthcare system and reduce regulatory burdens, among other goals.

"I have spent forty years both as a doctor and public servant putting people first. I regret that the recent events have created a distraction from these important objectives," he said.

Trump, currently trying to sell his tax cut plan and oversee the federal response to devastation wreaked by three hurricanes, saw the Price drama as an unnecessary distraction and behind the scenes was telling aides "what was he thinking?," a source close to the president said.

Price promised on Thursday to repay the nearly \$52,000 cost of his seats on private charter flights. "The taxpayers won't pay a dime for my seat on those planes," Price said.

But that was not enough to satisfy Trump.

Trump told reporters that the "optics" of Price's travel were not good, since, as president he was trying to renegotiate U.S. contracts to get a better deal for taxpayers.

"Look, I think he's a very fine person. I certainly don't like the optics," Trump said.

Price had also been seen in the White House as having been ineffective in getting Congress to pass healthcare reform legislation, an effort that has fizzled on Capitol Hill.

Price was one of a handful of senior officials in Trump's administration put on the defensive over reports about their use of charter flights and government aircraft, sometimes for personal travel, when they could have flown commercial for less money.

The White House issued an order late on Friday saying use of private planes required approval from White House Chief of Staff John Kelly and that the commercial air system was appropriate even for very senior officials with few exceptions.

The Washington Post on Friday reported that Veterans Affairs Secretary David Shulkin attended a Wimbledon tennis match, toured Westminster Abbey and took a cruise on the Thames this summer during a 10-day trip to discuss veterans' health issues in Britain and Denmark.

Shulkin, who travelled on a commercial airline, was accompanied on the trip by his wife, whose airfare was paid for by the government and who received a per diem for meals, the Post said, noting that the Department of Veterans Affairs said she was travelling on "approved invitational orders."

His six-person travelling party included an acting undersecretary of health and her husband as well as two aides. They were accompanied by a security detail of as many as six people, the Post said.

Washington news media outlet Politico has reported that Price had taken at least two dozen private charter flights since May at a cost to U.S. taxpayers of more than \$400,000. Politico also reported he took approved military flights to Africa and Europe costing \$500,000.

Senior U.S. government officials travel frequently, but are generally expected to keep costs down by taking commercial flights or the train when possible.

Environmental Protection Agency Administrator Scott Pruitt and Treasury Secretary Steve Mnuchin have also been in the spotlight for their travel habits.

1.3 - The New York Times: [Veterans Agency Seeks to Scrap Ethics Law on For-Profit Colleges](#) (29 September, Patricia Cohen, 29.8M online visitors/mo; New York, NY)

The Department of Veterans Affairs is pushing to suspend a 50-year-old ethics law that prevents employees from receiving money or owning a stake in for-profit colleges that pocket hundreds of millions of dollars in tuition paid through the G.I. Bill of Rights.

The agency says the conflict-of-interest law — enacted after scandals enveloped the for-profit education industry — is now redundant and outdated, with "illogical and unintended consequences" affecting employees who have no real conflict of interest, such as a V.A. doctor teaching a course at a school attended by veterans with educational benefits.

But veterans' groups and ethics experts reject those arguments and say the department is abandoning protections for veterans and taxpayers. They worry that the effort is part of a larger rollback of federal safeguards that were instituted before President Trump took office to combat abuses and fraud by for-profit colleges.

Several officials who worked in the for-profit college industry and had criticized the Obama-era crackdown as excessive, for example, have joined the Education Department, which administers and polices the federal student loan program and the industry.

The proposal to suspend the ethics law was published in the Federal Register in mid-September and is scheduled to take effect on Oct. 16, but no public hearings have been scheduled and no public comments have yet been submitted.

“It’s just reckless and sloppy,” said Walter M. Shaub Jr., a former director of the Office of Government Ethics, said of the agency’s action. He questioned why such a blanket exception for more than 330,000 agency employees should exist when the law allows waivers for individuals or even classes of individuals, like those teaching courses. Invoking the waiver also requires public hearings, he said.

Most troubling to Mr. Shaub, now senior counsel at the nonpartisan Campaign Legal Center, is that the move seems like an attempt by the executive branch to overrule the legislative branch. “They are saying the statute is unreasonable, but that’s not for them to say,” he said of agency officials.

Curtis Cashour, a V.A. spokesman, said officials had focused on the ethics law after the agency’s inspector general investigated complaints this year that two V.A. employees were teaching at a for-profit institution. There were no significant conflicts and a waiver was ultimately granted, he said, but the report led to worries among many employees about the impact of more rigorous enforcement.

“Our response was aimed at easing the concerns of numerous V.A. employees,” Mr. Cashour said in an email, adding that the ethics law had been superseded by subsequent conflict-of-interest statutes.

One concern of critics is that officials at the organization’s upper levels could be making decisions about a college in which they have a financial interest, like permitting a school with a record of abuses to recruit at military bases. Another is that people advising veterans about their educational benefits could steer students to a particular school because they were on the payroll.

“There’s no good that can come from allowing colleges to have unseemly financial entanglements with V.A. employees,” Carrie Wofford, director of Veterans Education Success, a nonprofit advocacy group. “Congress enacted a zero tolerance for financial conflicts of interest for V.A. employees precisely because Congress uncovered massive fraud by for-profit colleges targeting veterans.”

She added that “student veterans were already facing an aggressive rollback of their protections under the Trump administration’s Education Department.”

Two months ago, the Republican-led Senate Appropriations Committee issued a report during its debate over the military budget instructing the department to review the statute — but its concern was that the current rules “may be inadequate to identify conflicts of interest that can develop” because of gifts or expensive meals.

Veterans are particularly valuable as potential students: There are limits on the federal funds that for-profit schools can receive, but money from the G.I. Bill is not counted.

Even before last year's presidential election, some of the biggest veterans and military organizations were urging the department to better monitor for-profit colleges that were misleading veterans about the costs and benefits of enrolling, and violating legal and regulatory standards.

And a report issued in July by the director of the agency's Education Service found that financial issues involving tuition and fees were by far the leading complaint among students who had called the agency's G.I. Bill hotline since 2014.

Some ethics experts disagreed with the department's contention that other federal statutes made the ethics law unnecessary, saying the agency's rule sets a higher bar, requiring, for example, more public review.

Dozens of other agencies also have supplemental ethics rules that have been written to address potential problems specific to those agencies.

Senator Patty Murray, Democrat of Washington, and a longtime advocate for veterans, said she planned to look into the agency's decision. "I am deeply concerned the V.A. is opening the door for predatory for-profits to take advantage of men and women who have bravely served our country," she said.

1.4 - U.S. News & World Report (AP): [Alaska VA Office Gets Mixed Report From Watchdog](#) (29 September, Becky Bohrer, 24M online visitors/mo; Washington, DC)

JUNEAU, Alaska — A government watchdog says the U.S. Department of Veterans Affairs regional office in Anchorage has made strides in processing claims but has work to do in other areas.

The VA's inspector general said the accuracy of the claims processing it reviewed earlier this year was significantly better than a prior inspection in 2013.

But it found delays in processing benefit reductions or discontinuations, resulting in about \$16,800 in overpayments for care, and inaccuracies in how staff entered claim information. The inspector general said such overpayments due to administrative errors aren't recoverable.

The watchdog recommended that the office prioritize the processing of benefit changes and improve oversight to ensure information is accurate when claims are established.

The VA, in responses included with the report, agreed with the findings and recommendations.

[Back to Top](#)

1.5 - Stars and Stripes: [VA publicizes Shulkin's travel schedule amid scrutiny over Cabinet spending](#) (29 September, Nikki Wentling, 1.5M online visitors/mo; Washington, DC)

The Department of Veterans Affairs made moves Friday to publicize Secretary David Shulkin's travel schedule, following scrutiny over the cost of government-funded travel by other Cabinet members.

The VA announced it will post Shulkin's itineraries of international and domestic trips, as well as who accompanies him and whether he uses private or government aircraft. On Friday, the information was online at the VA's new "Secretary's Travel" page.

"Veterans and taxpayers have a right to know about my official travel as secretary, and posting this information online for all to see will do just that," Shulkin said in a prepared statement.

The announcement came two days after the House Oversight Committee initiated an investigation into the travel of President Donald Trump's administration.

Rep. Trey Gowdy, R-S.C., and Rep. Elijah Cummings, D-Md., leaders of the committee, sent letters Wednesday to the White House and 24 federal agencies, including the VA, asking for senior officials' travel details. The lawmakers cited federal law that official travel should be "expeditious" and "by no means should include personal use."

Gowdy and Cummings requested responses from each agency by 5 p.m. on Oct. 10.

In August, Treasury Secretary Steve Mnuchin used military aircraft to fly from New York City to Washington, D.C., costing about \$25,000, ABC News reported. The Treasury's Office of Inspector General is reviewing another of Mnuchin's trips, in which he used government aircraft to fly to Kentucky, where he spoke to business leaders and viewed the solar eclipse.

According to several reports, Mnuchin also requested to use a military jet to fly him and his wife, Louise Linton, to their European honeymoon. The request was later withdrawn.

Another cabinet member, Health and Human Services Secretary Tom Price, promised Thursday to repay about \$52,000 for his travel on private charter planes, which costs thousands of dollars more than commercial flights.

Interior Secretary Ryan Zinke took a charter plane to Montana and the Caribbean at a price of \$12,000, Politico reported. Multiple news outlets reported Scott Pruitt, who leads the Environmental Protection Agency, has taken at least four noncommercial flights since February, costing taxpayers more than \$58,000.

As of Friday afternoon, the VA posted Shulkin had taken five trips on Air Force 1 and Air Force 2, two of them to Texas to see damage caused by Hurricane Harvey. He also used a military aircraft last week for a trip to the Invictus Games in Toronto with First Lady Melania Trump. Shulkin has not used any private aircraft for official travel, according to information on the VA website.

According to one itinerary posted on the VA website Friday, Shulkin, his wife, Merle Bari, and other VA officials traveled July 11 to Denmark, where Shulkin was briefed on the Danish health care system for veterans, toured a veterans home and met the Danish ministers of defense and health. The group then traveled to London, where Shulkin and Bari spent July 15 at the Wimbledon tennis tournament with friends. On July 16, they visited Buckingham Palace, Kensington Palace, Westminster Abbey and took a cruise of the Thames River, followed by an

evening in Piccadilly Circus. Later during the week, Shulkin attended a conference in London on veterans issues.

The VA said it would update the site five days after the conclusion of every trip. The agency tied the move to other attempts at transparency since Shulkin took over as secretary. In July, the VA made public a list of employee terminations, demotions and suspensions, which is updated weekly.

[Back to Top](#)

1.6 - The Clarion-Ledger (Video): [Mississippi treating 11 Hurricane Maria victims, more coming](#) (29 September, Anna Wolfe, 849k online visitors/mo; Jackson, MS)

So far, 11 hurricane victims from Puerto Rico and St. Croix have been transported to metro Jackson hospitals in the aftermath of Hurricanes Irma and Maria.

The storms devastated Puerto Rico's hospitals, a majority of which are without electricity or fuel for generators and beginning to run out of oxygen and clean water.

"You're talking about a hospital that has one week of oxygen left, one day of drinkable water. It's a level of devastation I don't think we could ever begin to imagine," said state Department of Health spokeswoman Liz Sharlot.

The Health Department has partnered with the G.V. "Sonny" Montgomery Veterans Affairs Medical Center, Air National Guard and the University of Mississippi Medical Center to accept patients at 13 local hospitals. UMMC is treating four patients, some of whom are children and infants.

On Sept. 22, the department set up a patient reception area — a federal coordinating center at the Jackson-Medgar Wiley Evers International Airport — where doctors and nurses from the VA are assessing each patient's needs, providing any emergency care, then transporting them to a local hospital. Ambulances are on standby.

The first patients arrived Monday. By Thursday night, they'd seen 11 patients with a range of conditions, including one high-risk pregnancy, a double amputee, one on a ventilator with respiratory failure and a neonatal intensive care unit patient.

"These are serious medical needs and high-risk patients," Sharlot said. "We're just grateful we're able to do what we can."

VA Medical Center Director Dr. David Walker, commander of the federal coordinating center, described the scene at the airport as stressful, but rewarding "knowing you're helping people at their most vulnerable."

"You never know what you're going to get until the plane doors open," Walker said.

The plane ride on the commercial air ambulance is between four and six hours, at which point a patient's condition can change.

One of Walker's staffers is from Puerto Rico and hasn't been able to speak with her family. She's volunteered to do any translation at the coordinating center.

The goal is to transfer patients back home when they've been stabilized, but considering the conditions in Puerto Rico, that hasn't happened yet. Walker said he only knows of patients leaving the hospitals to stay with relatives in the United States.

The Health Department expected more arrivals Friday. Shreveport, Atlanta and Columbia, South Carolina, are also receiving patients from Puerto Rico and the U.S. Virgin Islands.

"It's not over," Sharlot said. "I think this is going to be going on for a while."

[Back to Top](#)

1.7 - The San Diego Union-Tribune: [Does a soldier's best friend belong in VA research labs? A fight at the heart of the veterans community](#) (29 September, Jeanette Steele, 494k online visitors/mo; San Diego, CA)

America loves dogs, but many veterans have an extra bond after serving with canine units on the battlefield and increasingly depending on service dogs back at home.

Now the U.S. Department of Veterans Affairs and some of the nation's largest veterans groups are in a scrap with a government watchdog organization and some in Congress over VA medical research programs that inflict harm on man's best friend in the name of science.

A VA investigation found problems at a Richmond, Virginia, program where researchers do heart surgery on dogs to study the development of cardiac abnormalities.

Techniques include inserting pacemakers and catheters into the hearts of dogs, destroying heart tissue and creating heart attacks by injecting liquid latex into an artery. At the end, dogs are killed and their tissues studied.

One of the reasons that dogs are considered good for these experiments is they are easy to train to run on a treadmill while their hearts are monitored.

As a result of botched procedures, one lead researcher was removed from the studies this spring and the VA tightened its research protocols at Richmond's Hunter Holmes McGuire VA Medical Center, one of at least three sites nationwide where the VA does invasive medical research on dogs.

Changes include additional reviews by the VA's chief veterinarian of proposed dog research, more stringent scientific scrutiny of VA funding requests involving dogs and increased frequency of site visits for VA programs that have canines, a VA official told The San Diego Union-Tribune.

These moves come atop questioning of research at the Los Angeles VA on narcoleptic Doberman pinschers. The approved protocol called for dosing dogs with antidepressants or methamphetamine, then killing them and studying how the drugs affect their brains.

Now, at the highest levels, the VA is battling to save its canine research programs, which have come under assault in Congress.

“Part of our mission is to push the envelope constantly in search of medical advancements that will help improve the lives of disabled veterans,” VA Secretary David Shulkin wrote in an opinion piece this month in USA Today.

“If this legislation passes ... it would stop potential VA canine research-related medical advancements that offer seriously disabled veterans the hope of a better future,” wrote Shulkin, a practicing physician.

A spending bill that unanimously passed the House in July would ban funding for two categories of invasive dog experimentation at the VA in the coming fiscal year.

Separately, the “PUPPERS Act” (Preventing Unkind and Painful Procedures and Experiments on Respected Species) would permanently ban money for invasive dog research by the VA.

Rep. Dave Brat, the Virginia Republican who sponsored the act, called the experiments in Richmond “horrific and inhumane” in a statement.

“These dog testing experiments at the VA are consuming limited taxpayer dollars, medical staff time and office space that could be better utilized to deliver health care for veterans,” Brat said.

But the VA has rallied an important chunk of the veterans community to its defense.

The American Legion, Iraq and Afghanistan Veterans of America and Vietnam Veterans of America have written letters to Congress in support of the VA’s canine research.

“There are many pet owners and animal lovers in the American Legion,” the legion’s statement said. “Sometimes animal research is needed for the greater good of protecting human life.”

The executive director of Paralyzed Veterans of America said he’d like to see Congress strike a balance on the issue.

“On one hand, understand and acknowledge the tremendous gains in medicine and treatment,” said Sherman Gillums Jr., in response to a query from the Union-Tribune. “On the other hand, if it is warranted, Congress should call for greater accountability and transparency to confront waste and deviation from humane protocols in scientific research funded by taxpayers.”

Dogs accounted for less than 0.05 percent of animals used in VA research in 2016, an official said. Almost all are mice or rats.

Not all veterans agree with the nation’s most established organizations.

“I’m not going to say canine research should or shouldn’t be done at all, I just don’t think the VA should do it,” said Ben Krause, creator of the contrarian website Disabledveterans.org. “VA has a hard enough time not withholding health care from veterans on a regular basis.”

A major player in this conflict is White Coat Waste Project, a four-year-old Washington, D.C. nonprofit group whose philosophy is a marriage of fiscal conservatism and animal protection

sentiment. The group offers \$1,000 rewards to whistleblowers with evidence of animal abuse or wasteful spending at VA dog labs.

Founded by a Republican strategist, the group argues that taxpayers are spending over \$15 billion a year on wasteful dog, cat, monkey and other animal experiments that are irrelevant, slow and expensive.

It was White Coat Waste's complaint in March that spurred the VA's investigation of the Richmond facility. The group filed Freedom of Information Act requests for records from the McGuire VA.

"We had known that the VA was one of the few agencies conducting painful experiments on dogs. And through our research into the details of those projects, we uncovered these series of violations at Richmond," said Justin Goodman, White Coat Waste's vice president.

According to Goodman, the VA has 79 sites that do animal experiments, but only three are doing "significantly painful" research on dogs.

Aside from Richmond, the others are Stokes Veterans Affairs Medical Center in Cleveland and Zablocki Veterans Affairs Medical Center in Milwaukee.

In Milwaukee, according to the watchdog group, the VA is using 150 dogs, including beagle puppies, for lung research that includes collapsing the dogs' lungs and dissecting their necks and heads.

"The use of dogs has been decreasing in the United States," Goodman said this week.

"Most people would probably be alarmed that, in 2017, there are still 60,000 dogs being used in experiments. I think that for many people, even one dog being used in an experiment that they are forced to pay for is too many," he said, adding that research outside of federal agencies is often funded by government grants.

One expert said the VA's research is not an anomaly in the biomedical industry.

"Work with dogs is happening all over the place," said Cindy Buckmaster, chairwoman of Americans for Medical Progress, a nonprofit group that advocates for the role of laboratory animals.

"Any time they are the optimal model, they are part of the study," said Buckmaster, also a Ph.D. at Baylor University College of Medicine.

She said researchers are required to give dogs pain medication during invasive procedures, just like in human surgeries, but the majority of animal subjects are eventually killed as part of the study.

"That's because the answers are in the tissues," Buckmaster said.

The VA argues that its animal research has saved lives and will save more in the future. It issued a list of past accomplishments: development of the cardiac pacemaker, the first liver transplant, the nicotine patch, the discovery of insulin and, most recently, the first FDA-approved artificial pancreas.

White Coat Waste disputes that list as ancient history, saying the artificial pancreas is the only 21st century accomplishment of the bunch.

A University of California San Diego pathology professor said experts are going to disagree about whether dog research, and animal research in general, is effective. Dr. Lawrence Hansen, who is involved with White Coat Waste, led a successful campaign nearly 15 years ago to end surgery on dogs as a mandatory part of the medical school's curriculum.

"We have created creatures that are hard-wired to love and trust us," Hansen said. "It is a betrayal to then turn around and keep them in cages, cut them up and kill them."

To him, it comes down to an ethical question: If dog research does work to expand science, is it worth it?

It's a question Congress may take up in the coming year, with the plight and opinions of America's veterans as added weight.

Current VA research using dogs

- Studying ways of preventing lung infections in people with spinal cord injuries because they are unable to cough effectively
- Developing glucose sensors that diabetic human patients can wear to allow continuous monitoring and insulin delivery
- Understanding and treating dysfunction in the brain circuits that control breathing
- Meeting a congressional mandate to establish scientific evidence as to whether service dogs reliably reduce the symptoms of post-traumatic stress disorder
- Gaining insights into narcolepsy through studies of a unique colony of naturally narcoleptic dogs
- Studies to develop novel treatments for human heart conditions like atrial fibrillation and heart failure

2. Veteran and Employee Experience

2.1 - USA Today: [VA Secretary David Shulkin discloses official travel details](#) (29 September, Jessica Estepa, 36.7M online visitors/mo; McLean, VA)

Veterans Affairs Secretary David Shulkin announced Friday that his department would disclose details about his official travels, in an attempt to be transparent as the travels of other members of the administration come under scrutiny.

The department will regularly update a page that includes any travels by private and government aircraft, as well as itineraries of official international and domestic trips.

"Under this administration, VA is committed to becoming the most transparent organization in government, and I'm pleased to take another step in that direction with this move," Shulkin said in a statement. "Veterans and taxpayers have a right to know about my official travel as secretary, and posting this information online for all to see will do just that."

Shulkin's announcement comes as Health and Human Services Secretary Tom Price faces criticism for his own use of private planes for official business. Price has apologized for the chartered flights and vowed to put an end to the practice.

According to the VA, Shulkin has not yet taken any private aircraft for official business.

He has taken six domestic trips on government aircraft, four of which were on Air Force One.

He has also taken two international trips: a September trip to Toronto for the Invictus Games and another to Copenhagen and London. The Copenhagen and London trip included tours of palaces and a river cruise down the Thames.

The Washington Post reported that the VA's decision to start disclosing Shulkin's travels came after it obtained a copy of the Europe itinerary.

The Post reported that the department covered the airfare of and provided per diem for Shulkin's wife, Merle Bari. The agency told the Post that she was traveling on "approved invitational orders."

[Back to Top](#)

2.2 - ABC News: [VA secretary spent half of official London trip sightseeing](#) (29 September, Luis Martinez, 24.1M online visitors/mo; New York, NY)

Veterans Affairs Secretary David Shulkin flew a commercial airline to London this past July to attend a veterans conference, but half his time there was spent on sightseeing and a stop at Wimbledon tennis tournament.

Shulkin's wife's commercial travel costs were also paid for by the federal government because she was under "approved invitational orders"

As questions have swirled about other Trump cabinet officials' use of government aircraft, the Department of Veterans Affairs has decided that in the interest of transparency it will post all of Shulkin's travel details on a VA website.

Those documents show Shulkin has flown six times on U.S. military aircraft. Four of the flights were on Air Force One as he accompanied President Trump, one was on Air Force Two accompanying Vice President Pence and a flight earlier this week accompanying the first lady to this week's Invictus Games in Toronto. Shulkin has never flown a private plane to travel for his official duties, according to a Veterans Affairs spokesman.

The Department also posted the itineraries of Shulkin's trip in mid-July to Denmark and the United Kingdom and earlier this week to Canada with first lady Melania Trump.

Shulkin and his delegation of six, including his wife Dr. Merle Bari, traveled commercial airlines to Copenhagen and London.

But that trip itinerary to Denmark and London has raised questions about the amount of time Shulkin spent sightseeing.

The itinerary shows that on July 12, the first day of his first three days in Copenhagen, Shulkin visited multiple tourist stops. The next two days were spent on meetings with Danish government and health care officials to discuss veterans issues.

The first half of the six-day stay in London was dedicated to sightseeing before his full participation in a two-day veterans summit.

Shulkin arrived in London on Saturday, July 15 and according to the itinerary he spent the afternoon at the "Wimbledon Tennis Tournament with Friends." That would have been the day of the Women's singles final.

He spent the next two days visiting notable tourist sites in London including Buckingham Palace, Kensington Palace, Westminster Abbey, St. Paul's Cathedral, the Tower of London and took a "Thames River cruise to Greenwich Pier/Followed by dinner/evening in Piccadilly Circus."

But from the afternoon of Wednesday, July 19, through Friday, July 21, Shulkin was immersed in full-day participation in the veterans conference.

"All activities on the itinerary were reviewed and approved by ethics counsel," said Curt Cashour, the VA Press Secretary.

Cashour said the rules permit government reimbursement for a spouse's "temporary duty" travel expenses.

According to a VA press release, the department is the first federal agency to make public the travel details of its top official. "The information will also include what VA staff and spouses accompany him on each trip, if any, but for security reasons, members of the Secretary's security detail will not be listed by name or number," said the release.

"Under this Administration, VA is committed to becoming the most transparent organization in government, and I'm pleased to take another step in that direction with this move," Secretary Shulkin said. "Veterans and taxpayers have a right to know about my official travel as Secretary, and posting this information online for all to see will do just that."

According to the release, Shulkin "pointed to the move as the fourth major step in long-sought transparency and accountability actions at VA." Previous actions include the VA's public listing of wait times and quality/satisfaction data at all VA medical centers, adverse employee actions and employee settlements.

[Back to Top](#)

2.3 - Politico: [Who will replace Tom Price? A dozen names are circulating as possible successors](#) (29 September, Joanne Kenen and Jennifer Haberkorn, 23.9M online visitors/mo; Arlington, VA)

Tom Price hadn't even stepped down when the Washington policy world was buzzing about who was likely to replace him.

A dozen names are being talked about, including several belonging to those already serving in the administration. Of course, President Donald Trump often does the opposite of what insiders expect.

The rumored short-list includes former Sen. Judd Gregg (R-N.H.), who would sail through Senate confirmation but would probably be considered too moderate on Obamacare, to Dr. Mehmet Oz, a cardiothoracic surgeon known through his talk show. Other current or former members of Congress who could be considered include Rep. Fred Upton and former Rep. Dave Camp.

Here are a few others who may be in the mix:

[...]

David Shulkin: The VA secretary is a Trump favorite, and the only cabinet nominee to be unanimously confirmed. However, Shulkin has come under criticism for combining leisure with business on his official travel — he attended a Wimbledon championship tennis match, toured Westminster Abbey and took a cruise on the Thames while meeting this summer with European officials about veterans' issues, The Washington Post reported Friday. Shulkin did fly commercial but his wife's expenses were covered by taxpayers, according to the Post.

A physician and former health administrator, Shulkin is also the only member of Trump's cabinet who is a holdover from the Obama years; he served as the VA's undersecretary of health in that administration. Now he's trying to get the massive, scandal-plagued VA health care back on track to serve around 9 million Americans a year. He has made the agency's performance and improvement programs public and transparent. He still sees patients — in person and via telemedicine.

[...]

[Back to Top](#)

2.4 - The Huffington Post: [Yet Another Trump Administration Official Took Questionable Liberties With Work Travel](#) (29 September, Mollie Reilly, 23M online visitors/mo; New York, NY)

Veterans Affairs Secretary David Shulkin used his downtime on a recent international trip for several leisure activities, including a tennis match and river cruise, The Washington Post reported Friday.

According to the report, Shulkin spent roughly half of a 10-day trip to the U.K. and Denmark to sightsee, watch a high-profile Wimbledon match and take in other activities more typical of a vacation than a work trip.

Shulkin flew commercial for the July trip, a notable difference from other officials who have recently come under scrutiny for opting to use charter or military planes for their travel. However, the government did pay for his wife's airfare as well as some of the cost of her meals while abroad.

Read the full report [here](#).

When asked for comment on the Post story and the agency's ethics review process, a Department of Veterans Affairs spokesman pointed to a Friday announcement that the agency will now make all of Shulkin's travel itineraries publicly available and will note what kind of aircraft he used on each trip.

The revelations about Shulkin, a holdover from President Barack Obama's Cabinet, are just the latest in a series of reports regarding Trump administration officials' conduct and financial choices while traveling on official business.

Health and Human Services Secretary Tom Price has received by far the most criticism for his use of private planes and military aircraft to travel both domestically and abroad. According to a series of reports in Politico, the secretary's travel has come at an expense of more than \$1 million to taxpayers.

On Thursday, after President Donald Trump said he was "not happy" with Price, the secretary announced he would no longer take private planes and vowed to reimburse taxpayers for the expenses he's incurred. However, he plans to pay just for "his seat" — or about \$50,000.

Interior Secretary Ryan Zinke has also faced criticism for chartering a plane to travel from Las Vegas to Montana, costing taxpayers more than \$12,000.

Environmental Protection Agency Administrator Scott Pruitt and Treasury Secretary Steven Mnuchin are also under scrutiny for similar travel expenses.

The White House has said it's looking into these expenses, and on Wednesday the House Oversight and Government Reform Committee announced it had requested information from 24 federal agencies on officials' travel.

"Under 5 U.S.C. § 5733, official travel on the part of federal employees must be 'by the most expeditious means of transportation practicable' and 'commensurate with the nature and purpose of the [employee's] duties,' and by no means should include personal use," reads a letter from the committee's leadership to the agencies.

[Back to Top](#)

2.5 - The Hill: [Trump VA chief went sightseeing, shopping with wife on government trip: report](#) (29 September, Brandon Carter, 11.8M online visitors/mo; Washington, DC)

Veterans Affairs Secretary David Shulkin spent nearly half his time on a recent international trip sightseeing and shopping with his wife, according to The Washington Post.

Shulkin traveled to Europe in July to attend a conference in London with representatives of several countries on veterans' health issues, as well as a series of meetings in Denmark.

The VA chief's traveling party included his acting undersecretary of health and her husband, his chief of staff, another aide and a security detail, according to the Post.

Shulkin's wife, who also accompanied him on the trip, had her airfare paid for by the government because she was traveling on "approved invitational orders," a VA spokesperson told the Post. Shulkin's wife also received a per diem for her meals.

The newspaper reports Shulkin attended a Wimbledon tennis tournament match and visited multiple palaces in both London and Denmark. Shulkin also reportedly took a cruise on the River Thames in London during the trip.

Shulkin took commercial flights for the trip and sat in coach on at least one flight, according to the Post.

VA press secretary Curt Cashour told the Post that the entire itinerary for Shulkin's trip was "reviewed and approved by ethics counsel."

"These were important trips with our allies to discuss best practices for taking care of veterans," Cashour told the Post. "The secretary has been transparent on his downtime activities that were similar to what he would have done with his family over a weekend in the U.S."

In a statement Friday, the VA said it would begin making public a list of Shulkin's official travel, including trip itineraries and his use of private and government aircraft.

"Veterans and taxpayers have a right to know about my official travel as Secretary, and posting this information online for all to see will do just that," Shulkin, a holdover from the Obama administration who President Trump tapped for the top VA spot this year, said in the statement.

Other Trump administration officials have come under fire for their travel while in office.

Health and Human Services Secretary Tom Price has reportedly racked up over \$1 million in travel costs with his use of private and military planes since May. Price said Thursday he would reimburse taxpayers just under \$52,000 for charter jet travels he's used for government business.

President Trump said Wednesday he was "not happy" with Price's use of private planes and said "we'll see" when asked if he planned to fire Price.

Interior Secretary Ryan Zinke and Environmental Protection Agency Administrator Scott Pruitt have also come under scrutiny for their use of private aircraft for government business in recent days.

2.6 - Washington Examiner: [VA secretary saw Wimbledon match during taxpayer-funded trip to Europe: Report](#) (29 September, Melissa Quinn, 4.8M online visitors/mo; Washington, DC)

Secretary of Veterans Affairs David Shulkin and his wife, accompanied by other VA officials, attended a tennis match at Wimbledon, toured Westminster Abbey, and cruised the Thames River as part of a taxpayer-funded, 10-day work trip to Europe this summer, according to a report.

Shulkin and a group of six people, including his wife, traveled to London and Denmark in July, where Shulkin met with Danish and British officials to discuss veterans' health issues, according to an itinerary of the trip obtained by the Washington Post. The VA secretary traveled in coach on a commercial flight during at least one part of the trip.

The VA secretary attended a conference in London on July 19, one previous secretaries have also attended, that included representatives from Britain, Canada, Australia and New Zealand. He also scheduled a series of meetings in Copenhagen, Denmark, that took place from July 12 to July 14.

On two nights between the official events in London and Copenhagen, Shulkin spent one at a ceremony where a British veteran who served in Afghanistan was honored, and another meeting with British Prime Minister Theresa May.

But during the day, Shulkin, his wife, Merle Bari, Acting Undersecretary For Health Poonam Alaigh, her husband, Shulkin's chief of staff, and another aide, as well as a security detail, saw the sights and shopped.

The government covered the cost of Bari's airfare and gave her a per diem for meals, the VA told the Washington Post. Bari, the agency said, was traveling on "approved invitational orders."

"These were important trips with our allies to discuss best practices for taking care of veterans," VA spokesman Curt Cashour told the Washington Post. "The secretary has been transparent on his down-time activities that were similar to what he would have done with his family over a weekend in the U.S."

It's unclear whether the government or Alaigh covered the expenses for Alaigh's husband.

According to the itinerary of the trip, Shulkin had no official business scheduled during the days in between his meetings in London and Copenhagen.

Rather, Shulkin and his group attended the women's final at Wimbledon, where Venus Williams lost to Garbine Muguruza.

The group also visited two palaces in London, Buckingham Palace and Kensington Palace, and two in Copenhagen, Christiansborg Palace and Amalienborg Palace.

Revelations of Shulkin's trip come as four of President Trump's Cabinet officials are under scrutiny for their use of private and government planes to travel.

Secretary of Health and Human Services Tom Price is facing calls for his resignation after it was revealed he's taken at least 24 trips aboard private jets, as well as trips on military aircraft, costing taxpayers more than \$1 million.

Treasury Secretary Steven Mnuchin's travel on government planes has also come under fire.

Both Price and Mnuchin are facing probes from the inspectors general at their respective agencies, and numerous congressional committees are requesting information on administration officials' travel.

Interior Secretary Ryan Zinke and EPA Administrator Scott Pruitt have also traveled via private or military aircraft.

2.7 - Pittsburgh Post-Gazette: [Pittsburgh VA nurse is finalist for national caregiver award](#)
(29 September, Gary Rotstein, 4.8M online visitors/mo; Pittsburgh, PA)

A nurse for the VA Pittsburgh Healthcare System is one of six national finalists for an annual award given to a medical professional who shows an exemplary caregiving approach on the job.

Victor Fagan, a licensed practical nurse from Butler, won recognition from among nearly 200 nominees who were submitted to the Boston-based Schwartz Center for Compassionate Healthcare. It will announce the winner of its 2017 National Compassionate Caregiver of the Year Award at a dinner on Nov. 16.

Mr. Fagan has worked with veterans the past five years at the VA's primary care clinic on University Drive in Oakland. He was nominated for the Schwartz Center award by co-workers who noted the unusual level of compassion and respect he brings to his role of helping others.

Examples of his efforts that were cited included his purchasing shoes for a low-income veteran's child; connecting a homeless veteran to helpful resources; celebrating patients' milestones such as birthdays; working to develop a Wall of Heroes that will honor local vets; and encouraging his fellow staff to do their own similar good work.

"Victor is always thinking of others first and incorporates caring and respect into every interaction with the veterans for whom he provides care," Christin Durham, the VA Pittsburgh primary care nursing manager, wrote in endorsing Mr. Fagan for the award.

2.8 - PennLive (Video): [VA chief mixed business with pleasure at taxpayer expense: Media report](#)
(29 September, Ivey DeJesus, 3.1M online visitors/mo; New Bloomfield, PA)

President Donald Trump's veterans affairs chief is the latest administration official in hot water for reportedly tapping into taxpayer money to pay for vacation outings and non-official business.

Veterans Affairs Secretary David Shulkin in July took in a Wimbledon championship tennis match and a Thames River cruise on taxpayer money. That's according to a report published Friday by The Washington Post.

Shulkin was in Europe for 10 days for meetings with Danish and British officials about veterans' health issues, but during that time, the Post reports, he and his wife spent about half their time sightseeing, including shopping and touring historic sites.

The Washington Post cited an itinerary obtained by the news outlet, and which was confirmed by a U.S. official familiar with it.

Shulkin last week visited the Harrisburg area, meeting with veterans at a local VFW to outline what he said was the right direction for the embattled agency. Shulkin said to veterans that accountability was one of his top priorities.

News of Shulkin's multi-purpose trip comes on the heels of that of Health and Human Services Secretary Tom Price, who is at the center of White House- approved trips outside the bounds of protocol. The Trump administration this spring and summer approved the use of military aircraft for multi-national trips by Price to Africa, Europe and Asia at a cost of more than \$500,000 to taxpayers.

The overseas trips bring the total cost to taxpayers of Price's travels to more than \$1 million since May, according to a POLITICO review.

Price this week pledged to reimburse the government for the cost of his own seat on his domestic trips using private aircraft -- reportedly around \$52,000 -- but that would not include the cost of the military flights, Politico reported.

Shulkin's six-person traveling party included his acting undersecretary of health and her husband, his chief of staff and another aide, the Post reports. A security detail of as many as six agents was assigned to the entourage.

The Post reported that the VA said that the government paid airfare for Merle Bari, Shulkin's wife, because she was traveling on "approved invitational orders." The government also provided a per diem for her meals, the agency said.

Wimbledon tickets for final matches can run into the thousands of dollars - as can a river cruise. Shulkin also toured Westminster Abbey. Those tickets run about £22 (sterling) or approximately \$30 a person.

[Back to Top](#)

2.9 - Military Times: [Amid Cabinet controversies, VA promises to post secretary's travel details online](#) (29 September, Leo Shane III, 2.1M online visitors/mo; Springfield, VA)

WASHINGTON — In response to the growing scandal of Cabinet officials using pricey private aircraft for business trips, Veterans Affairs officials announced Friday they will post details of all official travel by department Secretary David Shulkin online to provide transparency about his travels.

“Veterans and taxpayers have a right to know about my official travel as secretary, and posting this information online for all to see will do just that,” Shulkin said in a statement.

The move comes one day after Health and Human Services Secretary Tom Price announced he would reimburse the government about \$52,000 for charter flights made in recent months for government duties, a sum that amounts to only a small portion of the flights' costs.

The White House announced Friday afternoon that Price resigned.

Reports of Price's charter flights have prompted congressional investigators to look into travel expenses for all of Trump's Cabinet.

The VA's announcement also comes on the same day as a Washington Post article that details a trip Shulkin and his wife took to Europe last summer that included government business but also sightseeing and other non-work activities.

The VA told the Post that the government paid for Shulkin's wife's airfare because she was traveling on “approved invitational orders.” The VA added that all of Shulkin's activities were reviewed and approved by ethics counsel. The couple flew commercial, including at least one leg in coach, according to the Post.

VA officials said Shulkin has not used any private aircraft for travel to date, but will list them on the department's website if he employs that option in the future.

In addition, the new site will list all use of government aircraft by the secretary, along with itineraries of all official trips. That information will be available within five days of any travel, starting in mid-October.

Officials will start posting some of those details on the VA's “Secretary Travel” site later today.

Shulkin has used government aircraft for transportation six times so far this year. Five of them were aboard Air Force One, accompanying the president to events.

The sixth was a recent trip to the Invictus Games in Toronto, where he traveled with first lady Melania Trump to see wounded U.S. troops and veterans participate in athletic competitions against teams from other countries.

Shulkin has made department transparency one of the key focuses of his department reform efforts. Earlier this year, the department began posting online information on medical center wait times, employee firings and workplace settlements.

[Back to Top](#)

2.10 - Providence Journal (The Enterprise): [Providence VA official relieved of duties amid allegations of racism, homophobia](#) (29 September, Paul Edward Parker, 1.2M online visitors/mo; Providence, RI)

A manager at the Veterans Affairs Regional Office in Providence has been relieved of his duties pending disciplinary action, following a complaint from a co-worker that he created a “toxic work atmosphere.”

Stephen V. Pina, the Veterans Services Center manager, who also has been embroiled in controversy after a Facebook post suggesting that New England Patriots players who knelt during the national anthem on Sunday were dancing monkeys, is “no longer engaged in processing benefits claims,” according to Mark Ramos, a spokesman for the Providence VA office.

Ramos said that disciplinary action against Pina has been proposed and that, to afford due process rights, it can’t be imposed for 15 business days. Ramos said he was not aware of the nature of the proposed discipline. In the interim, Pina has been assigned to other job duties.

Peter Rogers, who was a human resources specialist at the Providence office, said he left for another government job two years ago due to insensitive remarks made at work by Pina.

“The work environment there is awful because of him,” said Rogers, who now works for the U.S. Department of Homeland Security.

Rogers said he is an openly gay veteran who served 23 years in the military, including a tour in Afghanistan as an air traffic controller for the Air Force.

The 44-year-old Virginia native said he recalled one moment when he was driving Pina and other colleagues to an event at a VFW in Warwick. Rogers claimed that Pina made homophobic remarks during the ride.

“He was pounding on the dashboard, yelling all kinds of obscenities and f-bombs,” said Rogers. “I was completely blown away by his behavior.”

Pina, who lives in Brockton, Massachusetts, landed in hot water this week after making a comment under a Facebook story about Patriots players who knelt during the national anthem on Sunday. In the post, Pina called the players “turds” and added, “dance monkey dance.”

Pina has since resigned from his position on the Brockton Parks and Recreation Commission, after Mayor Bill Carpenter called on him to do so. A Pop Warner football team, the Brockton Junior Boxers, said Pina had stepped down as a coach after the youth football league made a statement calling for him to do so.

Pina received a \$120,000 salary last year as manager of the Veterans Service Center, overseeing 157 government employees at the downtown office on Westminster Street.

[Back to Top](#)

2.11 - KATV (ABC-7, Video): [Troubles at the VA: Nurses speaking out about culture](#) (29 September, Elisabeth Armstrong, 448k online visitors/mo; Little Rock, AR)

Two former nurses who have filed EEO complaints against the CAVHS are speaking out about problems. In July, Channel 7 brought you this report out of the VA. In it, some thirty nurses filed a complaint against the hospital - alleging that under-staffing was impacting patient care.

After that story aired, more than a dozen staffers reached out to the newsroom, saying that poor management, unsafe working conditions, even claims of harassment are behind the issue.

Lyn Gardner and Brandy Ballard: both former nurses at the VA, both saying there's something wrong with the Central Arkansas Veteran's Healthcare System. Lyn is a veteran who served in the military for six years, before pursuing her dream of becoming a nurse in the VA system.

But she says that dream, turned into a nightmare: "It actually upsets me to this day, talking about it, because it was very traumatic."

In her claim she alleges that she was subjected to a hostile work environment - dealing with screaming supervisors, limited equipment, and in one case, an issue where she passed out while assisting during surgery, and never received medical attention.

"I walked out of the unit, pretty much all on my own, receiving no treatment. And that's very upsetting. As a veteran, and as an employee of a facility that's supposed to care for veterans."

Lyn says, it's this culture that creates problems for patient care: "Not having the support from management, not being able to articulate issues, is scary, because you're dealing with people's lives." Adding, changes need to be made.

Brandy Ballard agrees. She has several veterans in her family, and credits the VA with providing her grandfather life-saving cancer treatment. But she says her family members are now expressing fear about the care they're receiving.

"Another family member, more recently, voiced his concerns to me about that very VA because he didn't feel he would get the treatment he deserved with stage 4 cancer," she explains.

She says the culture at the VA has truly taken a toll on her life, alleging that nurses are punished for speaking out about patient care: "It really has affected my family. I mean, a failed marriage as a result of this, just mental anguish, physical ailments as a result of the constant stress."

This is why she says she filed a complaint. And these nurses are not the only ones - two other staffers at the VA provided me with copies of their EEO complaints. None of these have been ruled on yet, as the EEO is currently investigating several of the claims.

So, Channel 7 dug into data out of the national VA Administration. It shows that Central Arkansas Veterans Healthcare System has one of the highest nurse turnover rates in the entire VA System. They're just under the 90th percentile.

But Medical Director Dr. Margie Scott, says this is not due to workplace harassment or discrimination: "Well if you look at our exit interviews, Elisabeth, for nurses who are leaving the workforce, the top number of nurses who are leaving is due to number one taking a higher level position, and advancement in position, or number two retiring... The third most common is actually to go back to school."

Channel 7 requested those numbers and the VA complied 47% of employees said they left for those reasons (along with "relocating with a spouse") during exit interviews. But KATV also took a look at employee satisfaction scores.

When it comes to employee satisfaction, the Little Rock VA comes in at 3.8 out of 5. Dr Scott breaks down this statistic, "Over 60% of our staff think this is not only a good, but a great place to work. There's always a spectrum in any survey of low scores and high scores, but a 3.8 out of 5 is an excellent score. It's not where we want to be - we always want to be higher - so we'll continue to work on that."

But a 3.8 is also around the 50th percentile - that means 50% of other VA facilities have higher employee satisfaction rates.

And when it comes to veterans' experience, in the four categories the VA looks at, Central Arkansas comes in near the bottom of each. When it comes to comprehensiveness of care, the system scores as one of the worst.

Channel 7's Elisabeth Armstrong asked, "I probably spoke to 15 or twenty people. and a number of them said, 'I'm a veteran or I have veterans in my family, and I would not take them to the Little Rock VA. Does that concern you?'"

Dr. Scott says, "Absolutely that concerns me, and I would love to talk to those individuals and hear what they have to say as far as ways we can improve our work environment."

Dr. Scott and Acting Deputing Medical Center Director Salena Wright-Brown say the VA is implementing several new ways for employees to make their voices heard: through listening sessions, surveys, a video blog, and being selected as an "Innovation Hub."

"I think that's the key," explains Dr. Wright-Brown. "To open those communication avenues, we reassure people that nothing is going to happen negative, only positive - only improvement for our veterans."

The VA has filled 102 of the 149 open nursing positions since our first piece aired in July. However, we do not have numbers on how many have left since that time.

The system held another job fair last Saturday.

*Correction: An earlier version of this story stated the job fair was this upcoming weekend. However, it was last weekend, and officials say it was successful.

[Back to Top](#)

2.12 - WQAD (ABC-8, Video): [Moline man shocked after job training center for veterans shuts down](#) (29 September, Chris Minor, 450k online visitors/mo; Moline, IL)

GARLAND, Texas - A Moline, Illinois man is one of more than 300 veterans left in the dark after a job training school they paid for through the GI bill abruptly shut its doors.

"Three weeks before graduation, we were told goodbye. They sent a senior instructor around to each class and he just came in front of the school and said, 'I need everyone to pack your bags, the schools been officially shut down and everyone needs to vacate the premises' ," said Dallas Wild, who had enrolled in the career center after hitting dead ends looking for a decent paying job in the Quad Cities.

The Retail Ready Career Center catered to veterans interested in a career in heating and air conditioning.

"They called and offered us a \$23 dollar an hour job after we got out, guaranteed job placement," said Wild.

Tuition was \$21,000 for the six week program, which included food, lodging, and round-trip air-fare. Most tuition bills were paid through the GI bill.

The Department of Veterans Affairs is investigating the job training center for unknown reasons.

The owner John Davis, is seen on video telling the students that the investigation was launched after a former employee who embezzled money from a school fund went to authorities.

Wild says he had hoped to graduate so that he could find a better job in the Quad Cities, and is uncertain what happens next.

"I spent 30 minutes on the phone with the VA. It seems they don't want to hand out information because of the investigation. Everyone is in the dark. I plan on trying to find a local company that supports vets that will give me a shot," he said.

[Back to Top](#)

2.13 - FedSmith: [VA to Begin Disclosing Agency Secretary's Official Travel](#) (29 September, Ian Smith, 277k online visitors/mo; Washington, DC)

The Department of Veterans Affairs announced today that it will begin publishing all of the agency secretary's official travel on its website.

The lists include all official travel taken by Dr. David J. Shulkin since January 20, and the site will be updated within five days after the conclusion of each trip.

The webpage (which will be available at <http://www.va.gov/opa/secvatravel>) will list the use of private and government aircraft by the Secretary, and also itineraries of international and domestic trips. The details on domestic trips will be added to the website by October 15.

The information posted will also include what VA staff and spouses accompany Shulkin on each trip, if any, but for security reasons, members of the Secretary's security detail will not be listed by name or number.

Shulkin notes that the VA is the first agency to make this kind of data public. The agency also recently began posting all disciplinary actions taken against agency employees on its website in an effort to spotlight actions the agency is taking to reform its culture.

“Under this Administration, VA is committed to becoming the most transparent organization in government, and I’m pleased to take another step in that direction with this move,” Secretary Shulkin said. “Veterans and taxpayers have a right to know about my official travel as Secretary, and posting this information online for all to see will do just that.”

Increased Scrutiny of Agency Officials’ Travels

The announcement from the VA comes right after an article appeared in the Washington Post that was critical of a recent trip that Shulkin took to Europe with several individuals, including his wife, that mixed business and pleasure, the latter part including shopping trips and a Wimbledon tennis match.

The investigation conducted by the Post noted that although all aspects of the trip were approved by the agency, the VA paid for the airfare and meal per diems for Shulkin’s wife. It noted, however, that Shulkin flew on a commercial aircraft with at least one leg of the trip in coach seating.

VA press secretary Curt Cashour told the Post, “These were important trips with our allies to discuss best practices for taking care of veterans. The secretary has been transparent on his down-time activities that were similar to what he would have done with his family over a weekend in the U.S.”

The Post takes at least some credit for the VA now disclosing details about the Secretary’s travel. “In response to questions from the Post, VA announced Friday that the agency will begin posting details of the secretary’s travel online, including itineraries, and disclosing any use of government or private aircraft. That information had not previously been disclosed publicly,” according to the Post article.

The VA’s announcement also comes after news that Health and Human Services Secretary Tom Price came under heavy criticism for trips he took using a private charter jet using taxpayer money. Price has said he will repay the Treasury for costs incurred from the trips and also resigned from his position as HHS Secretary over the situation.

[Back to Top](#)

2.14 - Leavenworth Times: [Sentencing continued for former VA physician assistant](#) (29 September, 46k online visitors/mo; Leavenworth, KS)

A former physician assistant who was convicted of sexually abusing patients at the Leavenworth veterans hospital will not be sentenced until November.

Mark E. Wisner was scheduled to be sentenced today in Leavenworth County District Court. But the sentencing and arguments for post trial motions have been continued until Nov. 3.

Last month, a jury convicted Wisner of one felony count of aggravated sexual battery, one felony count of aggravated criminal sodomy and three misdemeanor charges of sexual battery. The crimes occurred between 2012 and 2014 while Wisner was working at the Eisenhower VA Medical Center.

The judge in the case had something come up, and he had to reschedule all of the cases that were on his docket for Friday, according to Assistant County Attorney Michael Jones.

[Back to Top](#)

2.15 - Pahrump Valley Times: [Plaques at Pahrump VA clinic recognize veterans of U.S. armed forces](#) (29 September, Jeffrey Meehan, 1k online visitors/day; Pahrump, NV)

A group of local veterans of the U.S. armed forces gathered to recognize the installation of several plaques at the Pahrump VA Community Based Outpatient Clinic in September.

Each plaque bore the symbol of one of the five branches of the U.S. armed forces and another was hung for prisoners of war.

The group, led by U.S. Army veteran Bernie Cusimano, gathered at the Pahrump VA clinic at 220 Lola Lane on Sept. 22, 2017 to recognize the plaques being hung. Cusimano was joined by several other veterans who worked to see the plaques hung at the clinic.

"We started it, and I want to acknowledge all the people that started it and thank everybody," Cusimano said.

The group was also joined by Nye County Commissioner John Koenig, District II, former Nye County Commissioner Frank Carbone and Michelle Leavitt, executive assistant/business license tech for the town of Pahrump.

The symbols were hung behind the check-in area at the Pahrump VA clinic in order of the Army, Navy, Marines and the Air Force, from left to right, which is mandatory. The prisoners of war symbol sits on another wall adjacent to the other symbols.

Cusimano said it was the end of the long process.

It took nearly two years for the group to realize the end goal, he said.

Some of the original veterans involved in the process were Pahrump Veterans of Foreign Wars Commander Tom Vick, Cusimano and Kyler Samuel Escalera, just to mention a few.

The cost of the plaques was funded by the town of Pahrump, which cost roughly \$200 each or a total of \$1,200.

[Back to Top](#)

3. Access to Healthcare

3.1 - WBBM (CBS-2, Video): [2 Investigators: Disabled Vets Face Tough Parking At VA Hospital](#) (29 September, Dave Savini, 27.5M online visitors/mo; Chicago, IL)

A major problem at Hines VA Medical Center: Some sick and wounded veterans are struggling to get to their medical appointments because of parking violators.

CBS 2's Dave Savini has the story.

James Dahan, a Marine Corps veteran, gets angry when fellow wounded vets struggle to find a parking spot.

"It's clearly a violation. They need to be ticketed," Dahan says of a vehicle illegally parked near the entrance to the VA.

He says seriously injured veterans going to the Edward Hines, Jr. VA Hospital in Maywood are forced to wheel or walk long distances. This is because parking spots for those with disabilities are taken by motorists not permitted to use them.

"That really ticks me off," Dahan says.

The 2 Investigators found plenty of examples of cars, without required placards in windows, snagging the handicapped-designated spots. Even the lot reserved for spinal cord injury victims had problems. Yet CBS 2 never saw a single ticket issued.

"Seeing veterans pushing from the back of the parking lot with a wheelchair or a walker, it's disgusting," Dahan says. "They deserve a lot better than that."

There is valet service, but those lines can be long and cause delays, he says.

"If you're 15 minutes late, they cancel your appointment," Dahan says.

CBS 2 also found numerous fire lane and loading zone violators, too.

Dahan injured his foot while serving in Iraq. He has had three surgeries and suffers from nerve damage. Because of his time using a wheelchair, Dahan says he can understand how difficult it can be when parking.

"Transferring in and out of a wheelchair takes a lot more than people can understand," he says.

The 2 Investigators found a vehicle parked next to a disabled spot, in a loading zone designed to help a person in a wheelchair get in and out of their vehicle.

"They do that all the time," one driver with disabilities says.

Dahan says Hines VA needs to better patrol the lots and ticket illegal parkers. He also said they need more spaces and could use a parking structure, similar to those found at other hospitals.

A spokesperson from Hines says they are now upgrading the spinal cord lot with new signs and new striping. They are also considering hiring more valet workers, along with opening an overflow lot for employees.

The hospital's full statement:

“At Hines VA Hospital we provide outpatient care to about 2,000 Veterans on an average week day and parking is often their first and last experience with the VA. With several construction projects underway, parking is stretched to its capacity, even with more than 250 handicap accessible parking spaces available. We have 76 accessible parking spaces in our dedicated lot for Spinal Cord Injury rehabilitation. We also offer free valet services to all of our patients.

We are monitoring the parking situation and have recently taken additional steps that include:

- * Making every attempt to complete clinic visits when patients are delayed because of parking
- * Opening an overflow gravel parking lot for employees to help ensure patients and visitors have access to the most convenient spaces
- * Adding signage that identifies where patients can find additional parking and promoting the availability of free valet parking for our patients and visitors
- * Working with our volunteers to provide more frequent shuttles for patients parking in more distant lots
- * Upgrading handicap parking in our Spinal Cord Injury parking lot (additional striping & signage)

We are considering additional valet staff as needed and looking at the possibility of adding another gravel lot on the north end of the campus.

As our construction projects continue to progress, we will continue to inform our patients of any impact on parking areas via on-site signage, direct mail, social media and face-to-face communications.”

[Back to Top](#)

3.2 - The News & Observer: [Vietnam vet happy to be back in Durham's VA hospital, but for how long?](#) (29 September, Thomasi McDonald, 3.9M online visitors/mo; Raleigh, NC)

DURHAM - A Vietnam veteran and double-amputee said things are “perfect” now that he is back in Durham’s Veterans Administration Medical Center, where he has lived for a little more than three years.

But James Donald Francis, 69, said he’s worried because VA officials have not told him or given him any documentation about how long he will be able to stay at the VA’s Community Living Center.

“I haven’t signed anything,” he said. “I could be here for a good night’s sleep and the next morning they could put me out of here. I haven’t seen anything. I’m in limbo. That’s where I am.”

Francis spent two days this week staying in the lobby of the facility. He refused to leave when the VA told him he had to go to an assisted living facility.

Durham VA officials have not commented about where Francis will be staying in the future, except to say it probably won’t be at their facility.

A statement from the Durham VA on Friday afternoon said, "Prior to release, we provided Mr. Francis several assisted living options within the community, however, over time it became apparent that he did not feel comfortable with those choices and wished only to remain at Durham VA. Medical care and treatment is ever-changing and that transition at times can be very difficult for our patients. We will continue to work side-by-side with Mr. Francis to provide him the proper care he has earned and deserves while we search for a suitable follow-on solution that meets his health and social needs."

Francis lost his legs after he was stricken with Agent Orange-related diabetes while fighting in Vietnam.

Sharonda Pearson, a Durham VA spokeswoman, said Francis, who undergoes dialysis treatment three times a week at the VA hospital, no longer met the medical criteria for acute in-patient care. He was discharged Monday. Francis said he returned from dialysis that day to find the door to his room locked and his belongings stuffed in several bags.

Francis then camped out in his motorized wheelchair at the patient entrance from Monday until Wednesday. By late Wednesday afternoon, the VA had a change of heart and said he would be allowed to move back into the hospital's community-based living center, at least momentarily.

The combat veteran is currently living on the second floor of the Community Living Center.

"Everything is going fine right now, for the next five minutes," he said Thursday. "You know how things can change."

He said he has been able to assume the daily routine he had before his discharge Monday.

According to the U.S. Department of Veterans Affairs website, the Community Living Center resembles "home" as much as possible. There are activities for veterans of all ages and family friendly places for visiting. Veterans are invited to decorate their rooms, and pets are allowed to visit or live at the facility.

The website said veterans may stay for a short time or, in rare instances, for the rest of their life, while receiving a nursing home-level of care that includes help with activities of daily living such as bathing and getting dressed.

On Thursday, a nurse visited Francis' room, provided him with a bedpan and rolled him to the side so he could relieve himself. The nurse, after bathing and clothing him, hoisted Francis out of bed and into his wheelchair. He rolled into the bathroom to brush his teeth and shave before going to breakfast. He was given an insulin shot, and his blood sugar level was checked for the first time since Monday.

"I been listening to the blues, but mostly talking to people here who I hadn't seen. It's been pretty much a normal day," he said. "But once I go to the bathroom and come out, I don't know if my bags are going to be packed up or what."

[Back to Top](#)

3.3 - Newsday (Video): [House vet chair Roe tours Northport VA after maintenance issues](#)
(29 September, Martin C. Evans, 3.2M online visitors/mo; Melville, NY)

The head of the House Committee on Veterans Affairs came to Long Island for an up-close look at the troubled Northport VA Medical Center Thursday, saying the facility should “find the right size” to address maintenance problems straining its budget and impacting patient care.

“That’s the challenge we have, is how to provide the most economic care because money is not infinite, it is finite and budgets are tight,” said Rep. Phil Roe (R-Tenn).

Roe said he decided to visit the medical center because of reports of serious problems with maintenance at the nearly 90-year-old facility.

Roe, a physician himself, said Northport would benefit from centralizing its operations into a few core buildings, as well as pushing more of its clinical operations into satellite facilities scattered across Long Island.

The lawmaker spent about three hours touring the Northport facility, which includes more than 70 buildings, including dozens that are mostly unused. Roe was accompanied by Reps. Thomas Suozzi, (D-Glen Cove) and Lee Zeldin, (R-Shirley), and Northport director Scott Guermonprez — all of whom said they could support the concept of consolidation.

Thursday’s congressional visit also came on the heels of two internal VA investigations which concluded that repeated lapses in the facility’s engineering department led to a host of problems at Northport.

Among those problems was the failure of an air-conditioning unit at Northport’s main hospital building, which forced a months-long closure of its surgical facility, and meant that veterans requiring emergency surgery had to seek treatment at VA hospitals in Manhattan or the Bronx.

The reports also concluded that the failings of the engineering department at Northport were a financial drain on a facility already struggling against recent budgetary shortfalls.

Northport has long been viewed with near reverential regard among the area’s roughly 140,000 veterans, who typically laud its medical care for its quality and availability.

But in the past two years, veteran leaders have expressed increasing alarm over the physical condition of the medical center.

Hutch DuBosque, president of the PTSD Veterans Association of Northport, whose members use the facility for self-care meetings, said mold caused by leaking roofs and frequently-flooded underground walkways has forced his group to move therapy sessions because of respiratory distress twice in the past three months.

“Our concern is the toxic environment,” said DuBosque. “A lot of us older guys have respiratory problems, and we can’t take this stuff.”

Guermonprez, a retired Air Force officer, came on as Northport’s new director in late June, expressed agreement that some of Northport’s maintenance problems could be mitigated by consolidating to fewer buildings.

Roe said he was encouraged that Guernonprez had initiated staffing changes in the leadership of Northport's engineering, nursing and medical staff.

"I think he is headed in the right direction," Roe said.

3.4 - Stars and Stripes: [Stage set in Congress for debate on Choice program reform](#) (29 September, Nikki Wentling, 1.5M online visitors/mo; Washington, DC)

The Department of Veterans Affairs estimated the funds that allow veterans to receive health care in the private sector will last until the end of the year – a projection that establishes a new deadline for when Congress needs to come up with a long-term solution for the Veterans Choice Program.

President Donald Trump signed legislation Aug. 12 immediately providing \$2.1 billion for the Choice program to prevent a funding crisis. VA Secretary David Shulkin had told lawmakers in June that the account was quickly and unexpectedly running out of money because of increased demand. Now, the money – originally estimated to last until February 2018 – is again being spent faster than predicted.

Shulkin told reporters Wednesday that he's confident Choice funding will last at least through the end of the year and rebuked a report from The Associated Press that the program would run out of money as early as December. The VA is spending about \$280 million each month to send veterans into the private sector for health care, he said.

"It's a very, very hard program to do accurate financial projections," Shulkin said. "We've always said it's important that Congress needs to act this fall, this legislative session so we do not get into a funding crisis."

Sen. John McCain, R-Ariz., sent a letter to Shulkin on Wednesday asking for an accounting of the program, expressing concern about another unexpected shortfall. McCain helped create the Choice program in 2014 in response to the VA wait-time scandal that originated at the Phoenix VA hospital.

Tiffany Haverly, communications director for the House Committee on Veterans' Affairs and the group's chairman, Rep. Phil Roe, R-Tenn., said Roe's office is receiving regular updates on Choice program spending. At the same time, the House committee is working on legislation to reform how the VA balances private-sector care, Haverly said Friday.

"We are continuing to monitor the account and working to move legislation to reform VA's community care programs so veterans can continue accessing care should funding be expended sooner than expected," she said.

House and Senate lawmakers undertook reform efforts following complaints from veterans that the Choice program is complex and bureaucratic. Current rules allow veterans to seek care outside the VA only if they can't receive an appointment within 30 days or they live more than 40 miles from a VA facility.

Shulkin said Wednesday that in order to avoid another funding shortfall, he wants legislation passed before Congress leaves for Thanksgiving break in mid-November.

"I expect we will get this done," he said. "We are in close communication with Congress and the White House on this. No one wants to see us putting veterans at risk."

It's expected the House and Senate will introduce their versions of Choice program reform in the next few weeks.

Shulkin has devised his own proposal, which is under review by the White House Office of Management and Budget. An early discussion draft of Shulkin's proposal describes a performance-based system in which veterans would be allowed to seek private-sector health care if the quality of VA care in a certain area isn't up to par with other providers in that community.

The issue is likely to be subject to intense debate about whether the VA is sliding too far into the private sector.

When the legislation was introduced in the summer to provide \$2.1 billion to the Choice program, eight major veterans groups railed against it. Then, they successfully pushed for another \$1.8 billion to be included in the legislation for VA hiring and infrastructure. The coalition -- comprising AMVETS, Veterans of Foreign Wars, Disabled American Veterans, Iraq and Afghanistan Veterans of America and other groups -- viewed the original plan as prioritizing private-sector health care while neglecting VA services, and as setting a dangerous precedent.

In preparation for the Choice reform debate, groups on each side of the political divide have already started advocacy efforts.

VoteVets, a left-leaning political action committee, ran a \$400,000 ad campaign in September pleading with viewers to "Tell Congress, don't let Trump privatize my VA." The advertisement aired in Alaska, Florida, Kansas, Louisiana, Maine, Minnesota, Montana, Nevada, Ohio, South Dakota, Tennessee, Texas and West Virginia.

Concerned Veterans for America, a conservative veterans advocacy group in the Koch brothers' political network, is also speaking out. The group, which gained more influence since the presidential election, has lobbied to transfer VA oversight to a government-chartered nonprofit and expand veterans' private-sector health care options.

"The Trump Administration and Congress should not be dissuaded from keeping their campaign promises to offer veterans more health care choices by Washington special interests that want to preserve the status quo at the VA," said Dan Caldwell, the policy director for CVA. "There is no excuse for Congress not to put forward a VA choice reform plan that would give all veterans who use the VA the ability to access care in the private sector."

3.5 - WNDU (NBC-16, Video): [New VA clinic in Mishawaka will 'quadruple services'](#) (29 September, Mark Peterson, 833k online visitors/mo; South Bend, IN)

Ribbon cutting ceremonies in Mishawaka on Friday marked the completion of a \$38 million medical clinic for veterans.

About ten years ago, the Veterans Administration was first asked to study how often local vets had to travel long distances to get needed medical care.

"I'll be able to come here for my eye appointments, I'll be able to come here for my hearing appointments, and those are all things I have to go to Fort Wayne for," said veteran Chuck Damp.

"So we have most every medical every medical service you could possibly think of," said Sen. Joseph Donnelly, (D) Indiana. "Mental health services, audiology, cardiology, so many things are here for our veterans."

"The services that are provided out of here really kind of quadruple what the services were available in Michiana before," added U.S. Rep. Jackie Walorski, ® Indiana's Second District.

The hope is, with all those additional medical services available closer to those who served, trips to the doctor will no longer be something local vets dread, and could become something they grow to love.

"They said this is our home, I mean, besides being home with their family, this is their second home, with their brothers and sisters who served together with them, meeting other veterans," said Sen. Donnelly.

Veteran Chuck Damp agrees: "It's going to be so much better than veterans having to travel, like I said, Fort Wayne, Indianapolis, Marion. It's right here, right in our neighborhood."

Sen. Donnelly noted how dramatically things have changed in the past ten years when the local VA clinic was housed on the south side of South Bend in a residential neighborhood, in a building no bigger than a house.

The new facility at 1540 Trinity Place has a coffee and sandwich shop tucked away near the front entrance. A spacious lobby has high ceilings with skylights.

"I talked to so many veterans, outside as we all came rushing in the door and you could hear the ooh's and the ah's and the excitement of something that's been promised for so long, it's taken years to actually make this happen," said Rep. Walorski.

3.6 - WNDU (NBC-16, Video): [Sen. Joe Donnelly on tax overhaul, health care and new VA clinic](#) (29 September, Jason Krug, 833k online visitors/mo; South Bend, IN)

President Donald Trump visited Indianapolis on Wednesday, pitching his tax overhaul plan.

Traveling with the president from Washington D.C. that day was Sen. Joe Donnelly.

A question some had is why the Democrat would travel on Air Force One with the Republican president.

"He's the President of the United States and whether the president was President Bush or President Obama or President Trump, I try to show respect to the position," says Donnelly on 16 Morning News. "When I have a chance to come back to my home state and to be with everybody from Indiana and welcome the president, I try to do so."

When it comes to Trump's new tax plan, there is still a lot of details to be filled in according to Donnelly, but there a few things he is working to make sure happens.

"My focus has been on keeping jobs that are here, here, making sure we create more jobs and more opportunity and making sure that middle class families' paychecks get a little bit bigger."

Republicans moved their focus to a tax overhaul after failed attempts to repeal and replace the Affordable Care Act, the latest try falling apart earlier this week. Donnelly says it did not come as a surprise to him.

"It was a terrible bill that would have taken health care away from over 400,000 Hoosiers. But I've been working behind the scenes with about 31 other senators on some bipartisan legislation that we're trying to bring up next week that I think has a great chance of passage that'll stabilize our health care programs."

The Senator also briefly touched on the new VA clinic in Mishawaka, something that he has been working 10 years to help complete. It opened last Monday, but Friday is its grand opening.

"The reason it's such a great thing is because it helps our vets and they deserve everything."

The facility is opening in three phases over the next two months, and is expected to see over 8,500 veterans per year.

3.7 - WFLA (NBC-8, Video): [Veteran suicides, VA corruption focus of rally and protest](#) (29 September, Steve Andrews, 702k online visitors/mo; Tampa, FL)

PINELLAS COUNTY, Fla. — In the United States, 22 veterans take their lives every day.

In front of the Veterans Affairs office at Bay Pines, 22 mannequins stood to serve as a reminder of this American tragedy.

Army veteran Mike Ford admits he's come close to ending his life.

"Idea was to just go ahead and just kill yourself on V-A property right, maybe if they see, if maybe people like, wow, there's something really going on here," he told News Channel 8.

Ford was diagnosed with post-traumatic stress disorder after serving in Grenada and claims he suffered physical and mental pain for years while struggling with the VA for treatment.

After waiting nine months for an appointment, Ford left his ailing father to drive across the state to finally see a doctor at the VA.

"I go there, oh you didn't get our message, we canceled your appointment," Ford recalled.

When Ford returned home, his father was gone.

"Wasting my time with the VA when I should've been with my father. He was my hero," he said.

"If I was going to kill myself, it was going to be out here," another veteran Keith Hansford said as he pointed to the grounds at Bay Pines.

Hansford also struggles with PTSD, and said sometimes he thinks he would welcome death. "My pain, my anxiety, my nightmares all of that will stop," Keith explained.

According to Hansford, harassment by Bay Pines Police administration while he worked there, pushed him to the brink.

Hansford has organized rallies condemning police corruption and promoting suicide awareness.

In August, we told you VA police removed signs promoting Keith's rally, which were placed on a state right of way. We helped him get them back.

Hansford believes without his wife, he'd be gone.

"I'm not stronger or weaker than the ones that have killed themselves. I just had the right help at the right time," said Keith. "The help they needed didn't come when they needed it."

[Back to Top](#)

3.8 - Modern Healthcare: [VA looks to ease telehealth regulations](#) (29 September, Rachel Z. Arndt, 460k online visitors/mo; Chicago, IL)

The Veterans Affairs Department proposed a rule Friday that would allow VA providers anywhere in the country to conduct telehealth visits with VA patients across state borders, regardless of state licensing.

Giving patients access to providers across state lines is necessary for the VA to grow its telehealth program and increase the number of sites where the VA provides care, wrote Michael Shores, director of regulation policy and management in the VA secretary's office. This rule would amend VA medical regulations to do so. "Eliminating veteran suicide and providing access to mental health care is VA's number one clinical priority, and this proposed rulemaking would improve VA's ability to reach its most vulnerable beneficiaries," Shores wrote.

In fiscal 2016, VA providers saw 702,000 patients via telemedicine in 2.17 million episodes of care. Nearly half of those who received telemedicine care live in rural areas.

"By increasing VA's capabilities to provide telehealth services, VA would be able to expand these services," Shores wrote.

The rule would complement the VA's push to increase the use of technology in veterans' healthcare, an effort VA Secretary Dr. David Shulkin called "anywhere to anywhere VA healthcare" when President Donald Trump announced the initiative in August.

Right now, VA telehealth care is limited by state restrictions. If a physician were to see a patient via telemedicine in a state in which the physician is not licensed to practice, that physician could lose his or her credentials and be fined.

Under the proposed rule, physicians wouldn't be penalized for providing telemedicine outside the states where they're currently allowed to practice.

A federal rule is necessary to relax these restrictions because it would take too long for every state to nix the penalties, according to Shore.

"While the VA's rule is limited, in that it would apply only to VA providers and VA patients, it could be the first step towards a national medical practice licensing concept," said Nathaniel Lacktman, a healthcare lawyer with Foley and Lardner. "Overall, I predict providers will look upon this new rule favorably."

[Back to Top](#)

3.9 - KMVT (FOX-14, Video): [As Suicide Prevention Month comes to a close, the search continues for solutions to veteran suicide](#) (29 September, Peter Zampa, 71k online visitors/mo; Twin Falls, ID)

WASHINGTON (Gray DC) -- Suicide prevention month is highlighting how the U.S. Can better address the issue. A specific focus currently in Washington is a push to end veteran suicide. Senators are examining what is being done to help veterans in need, and what other efforts are necessary.

One veteran says it is not easy to solve this tragic problem.

"There's such a stigma with mental health," said Kayda Keleher, Associate Director at Veterans of Foreign Wars.

20 veterans take their own lives every day. As Suicide Prevention Month comes to a close, Keleher says addressing mental health for all Americans is the right approach to getting these veterans the help they need.

"We have to get to a point where we better understand it, and we're definitely working on that," said Keleher.

She served in the Marine Corps for five years. It's an issue dear to her heart. She says great strides are being made in areas like telehealth, but there is much more work to be done, especially helping veterans in rural areas.

"It's important that we don't forget about the basics. The proven, empirically proven, necessities of face-to-face therapy options and just being there for one another as veterans," said Keleher.

The Senate Veterans' Affairs Committee held a hearing to look at what the VA is doing to combat veteran suicide. Senator Dan Sullivan (R-AK) sits on the committee and is currently in the Marine Corps reserves. He says as a country, we need to be able to get help to every veteran in the U.S.

"I lost one of my Marines to suicide, you know, after he reached out to me. It's a very hard issue," said Sullivan.

Sullivan says key parts of the hearing with VA Secretary David Shulkin were the ability to identify mental health issues and to reach veterans in remote areas who require help. Senator Joe Manchin (D-WV), who also sits on the committee, says the VA has a shortage in qualified mental health specialists.

"We need help. We need professionals. We need psychiatry help, we need to be able to get these people and give them the assistance they're needing," said Manchin.

The senators say implementing these new ideas will be key in saving lives. If you or someone you know is a veteran struggling with suicidal thoughts you can dial 1-800-273-8255 and press one.

[Back to Top](#)

3.10 - mHealth Intelligence: [New Rule Would Give VA Doctors National Telehealth Privileges](#) (29 September, Eric Wicklund, 53k online visitors/mo; Danvers, MA)

The Department of Veterans Affairs is moving forward with a plan to enable VA doctors to treat veterans through telehealth no matter where the doctor or patient are located, essentially overriding state laws.

Officials said the 28-page proposed order, unveiled on Sept. 29 under the VA's Anywhere to Anywhere VA Health Care Initiative, aims to boost the number of veterans using telehealth and telemedicine to access needed healthcare services, especially mental health services. It would give VA doctors the authority to use telehealth and telemedicine to treat veterans regardless of state guidelines on originating sites or licensing requirements.

It also could be seen as a veiled criticism of the mishmash of state laws regulating telehealth and telemedicine, which often do more to curb new healthcare services than promote them.

"In an effort to furnish care to all beneficiaries and use its resources most efficiently, VA needs to operate its telehealth program with healthcare providers who will provide services via telehealth to beneficiaries in states in which they are not licensed, registered, certified, or located, or where they are not authorized to furnish care using telehealth," the proposed order states. "Currently, doing so may jeopardize these providers' credentials, including fines and imprisonment for unauthorized practice of medicine, because of conflicts between VA's need to provide telehealth across the VA system and some states' laws or licensure, registration, certification, or other requirements that restrict or limit the practice of telehealth. A number of states have already enacted legislation or regulations that restrict the practice of interstate telehealth, as discussed below in the Administrative Procedure Act section."

As a result, VA officials say, many VA centers aren't expanding their telehealth and telemedicine programs to non-federal locations, such as the patient's home or the doctor's home. And VA doctors are reluctant to take on telehealth for fear of running into conflicts with state laws.

"This proposed rulemaking would clarify that VA healthcare providers may exercise their authority to provide care through the use of telehealth, notwithstanding any state laws, rules, or licensure, registration, or certification requirements to the contrary," the proposed rule states. "In so doing, VA would exercise federal preemption of state licensure, registration, and certification laws, rules, regulations, or requirements to the extent such state laws conflict with the ability of VA healthcare providers to engage in the practice of telehealth while acting within the scope of their VA employment."

"Preemption would be the minimum necessary action for VA to furnish effectively telehealth services because it would be impractical for VA to lobby each state to remove its restrictions that impair VA's ability to furnish telehealth services to beneficiaries and then wait for the state to implement appropriate changes," the rule continues. "That process would delay the growth of telehealth services in VA, thereby delaying delivery of healthcare to beneficiaries. It would be costly and time-consuming for VA and would not guarantee a successful result."

According to the VA, some 702,000 veterans, or 12 percent of the country's veteran population, used telehealth or telemedicine in FY 2016, accounting for 2.17 million telehealth episodes. Of that group, 45 percent were living in rural communities.

"The data collected in FY 2016 demonstrates that telehealth, particularly in the mental health context, improves patient care and improves patient outcomes," the proposed order points out. "In FY 2016, there was a 31 percent decrease in VA hospital admissions for beneficiaries enrolled in the Home Telehealth monitoring program for non-institutional care needs and chronic care management. Also, beneficiaries who received mental health services through synchronous video telehealth in FY 2016 saw a reduction in the number of acute psychiatric VA bed days of care by 39 percent."

Other benefits, the VA said, include improvements to remote monitoring for veterans with limited mobility or difficulties traveling to a healthcare provider, and its use as an incentive to recruit more VA healthcare providers, thereby reducing a national shortage.

The proposal surfaced when VA Secretary David Shulkin unveiled the Anywhere to Anywhere VA Healthcare Initiative in August, in a ceremony attended by President Donald Trump. At that time he also announced the nationwide roll-out of the Veteran Appointment Request (VAR) app, which allows veterans to use their smartphone, tablet or computer to schedule or modify appointments at VA facilities.

"What we're really doing is, we're removing regulations that have prevented us from doing this," he said. "We're removing geography as a barrier so that we can speed up access to Veterans and really honor our commitment to them."

Shulkin garnered support from, among others, the American Telemedicine Association – which has scheduled him as a keynote speaker at its ATA Edge conference next week in Washington D.C. – and Sen. Joni Ernst (R-Iowa), whose bill, the Veterans E-Health & Telemedicine Support (VETS) Act of 2017, seeks to give VA doctors that same authority.

“The VA’s decision to allow veterans to access care from the comfort of, or closer to, their own homes is necessary to improving quality and timely care for the more than 200,000 veterans in Iowa, particularly those who are disabled or reside in rural communities,” Ernst, a National Guard veteran, said. “It is critical that we continue to create opportunities for veterans to receive the best care out there, including potentially life-saving mental healthcare. Improving the VA’s telehealth program is critical, and I am thrilled to see this common-sense measure will be put into action to benefit Iowans and veterans across the country.”

The industry trade group Health IT Now also supports the measure.

“This proposed rule will be instrumental in breaking down geographic barriers that, for too long, have prevented our nation’s heroes from accessing the care they need where they need it,” Joel White, the group’s executive director, said in a Sept. 29 blog post. “By allowing VA telehealth providers to more easily treat patients across state lines, we can ensure that recent advances in technology-enabled care reach the most deserved among us and spur better outcomes for the 20 million veterans in the VA system today.”

Supporters also say the success of such a program could help spur efforts to create a national licensing framework for healthcare providers, such as the Interstate Medical Licensure Compact for doctors and similar compacts for nurses and physical therapists. It might also spur state medical boards to collaborate more freely on national telehealth and telemedicine standards.

But the proposal may draw complaints from state officials and national physicians’ groups interested in preserving each state’s right to regulate telemedicine and telehealth inside its borders.

During Congressional deliberation last September on the National Defense Authorization Act for FY 2017, the American Medical Association and American Academy of Family Physicians lobbied against a telehealth benefit for the TRICARE program that would have designated the originating location for certain telehealth services to be the physician’s location, instead of the patient’s location. They argued the legislation would enable physicians treating military personnel and veterans to skip state licensing laws when treating patients via telehealth.

In a Sept. 1 letter to Congressional leaders, AAFP Board Chairman Robert L. Wergin, MD, warned that the Senate version of the bill “portends a troubling scenario under which state licensing boards will lack the authority to discipline physicians who are practicing medicine within that state’s borders.”

“While this language would indeed ease barriers that hinder the free flow of telehealth services, it also would undermine the existing system of medical licensure, under which each state governs the practice of medicine within its borders,” Wergin wrote. “Allowing physicians with a single license to treat TRICARE beneficiaries in any state via telemedicine would create episodes of medical care that the state in which the patient resides cannot readily regulate, if at all.”

The Defense bill was eventually passed without the telehealth provision.

The proposed order is scheduled to be published in the National Register on Monday, Oct. 2. The public comment period will last 30 days.

3.11 - WLTZ (NBC-38, WSB/ABC-2, Video): [Hospital Evacuees from Caribbean Arrive in Atlanta](#) (28 September, Nami Dockery, 44k online visitors/mo; Columbus, GA)

Cobb County, GA – Hospital patients evacuated from the Caribbean due to hurricane Maria are finding refuge in Georgia.

Doctors and nurses welcomed the patients after a plane carrying roughly 40 medical evacuees landed Wednesday night.

It comes after the hurricane caused widespread power outages, including a loss of electricity at hospitals.

A VA Medical Center official says medics will triage the patients to ensure proper care.

Some evacuees will travel to Atlanta area hospitals, while others will stay in hotels.

Three flights carrying evacuees have landed so far, and more are expected over the next few days.

[Back to Top](#)

3.12 - Marion Republican: [Bost 'not happy' with VA investigation; vows to look further into allegations at Marion VAMC](#) (29 September, Holly Lee, 14k online visitors/mo; Marion, IL)

The conclusion of a Veterans Affairs inquiry into allegations of nepotism, employee intimidation and why some patients died at the VA Medical Center in Marion leaves one southern Illinois congressman "not happy" with the answers and vowing further action.

Rep. Mike Bost (R-Murphysboro), vice chairman of the Oversight and Investigations subcommittee of the House Committee on Veterans Affairs, said he doesn't believe the VA's investigation into complaints at the Marion VA Hospital went far enough.

Bost received the VA's analysis Sept. 22, about two months after his initial inquiry. Neither he nor the VA has made the Sept. 22 report public, citing the privacy of individual veterans mentioned within.

Even so, Bost said, he was "really not happy with the response," especially the VA's explanation for the deaths associated with the 54-bed Community Living Center, the nursing home facility on the VA campus. He characterized the VA's overall answers as "vague," with no real plan for correcting issues going forward, and "almost like they aren't sure these issues are that big of a problem."

Neither the Department of Veterans Affairs nor the Marion VA responded to calls for comment on Bost's criticisms.

Bost said that for the most part, "the Marion VA does a good job and people like them." The Marion VA provides care to nearly 44,000 veterans annually in 27 southern Illinois counties, as well as eight counties in southwest Indiana and 17 in northwest Kentucky. It also operates 10 outpatient clinics around the region.

"We just need more answers than we are getting," Bost added. "The incidents we have been hearing about ... I think they need to be looked into more."

Bost said his first step will be to discuss his concerns with the VA report in a face-to-face meeting with VA Secretary David Shulkin. If he is not satisfied with those answers, he said, he and subcommittee Chairman Jack Bergman (R-Michigan) could proceed with a congressional hearing. There, the committee would call its own witnesses.

In July, Bost and Bergman wrote to Shulkin asking for information on specific allegations related to the Marion VA Hospital. They also questioned why the results of a 2016 employee "culture" survey at Marion, routinely done at all VA facilities every two years, was so dramatically worse than the one taken in 2014, specifically in the areas of patient safety and employee morale.

The allegations Bost and Bergman asked the VA to investigate include:

- Reported staff concerns about patient safety that either "disappeared" or did not make it up the chain to the VAMC director;
- Why the Veterans Integrated Service Network (VISN) did not fully investigate complaints from Marion VA employees, despite calls by the VA National Center for Patient Safety to do so;
- The deaths of 15 veterans since October 2016, either while they were patients in the Community Living Center or shortly after discharge, and whether inadequate care played a role in any of them;
- Reports of "retaliation, unprofessional conduct and bullying" toward employees by Marion leadership;
- That one Marion administrator is alleged to have hired his wife as an administrative officer for the surgery department.

Bost said he and Bergman are hoping to get their meeting with Shulkin within two weeks. If a congressional hearing follows, he said it would include ranking members of both parties.

"This is a huge concern," Bost said, adding the Marion VA is not the only one in the nation undergoing scrutiny at the moment. In May 2016, Bost sponsored a bipartisan House bill addressing the issue of VA medical centers operating without permanent directors -- an instability that makes it more difficult to implement long-term reforms affecting patient care. That bill, which passed the House unanimously, is now in the Senate.

"Continual uncertainty at the top of any organization is destructive, and it certainly makes it tougher to fix problems," he said.

The Marion VA has had three directors in about five years. That's not as big a turnaround as at some VA hospitals, Bost said, but not as consistent as he would like.

"I want to make sure that all of our VAs are operating at a certain level, and taking care of our veterans, our heroes," he said. "With the problems in the VA around the nation, we need a response. This is not the last chapter."

4. Women Veterans

4.1 - The Mercury: [Expo will focus on women entrepreneurs and female veterans](#) (29 September, Donna Rovins, 187k online visitors/mo; Pottstown, PA)

Phoenixville >> A unique expo highlighting women entrepreneurs and female veterans is scheduled for Saturday, Oct. 7, at Phoenixville Area Middle School.

The 2017 Women Entrepreneur & Women Veteran Expo will give women from different business areas the opportunity to connect with each other to educate, share information and inspire other women to become business owners, according to organizer Dolores Winston, founder and CEO of Here to Apparel. The online shop specializes in sports attire and souvenirs that promote positive thinking, according to the company's website.

"We're bringing women entrepreneurs and women veterans together to spend the day connecting with each other and supporting each other," Winston said. "This is about sharing the knowledge to help another woman."

Winston said she had organized an entrepreneur expo in 2011. But this year's event is different because it focuses on women entrepreneurs and women veterans.

The expo will include panel discussions, the opportunity to visit with vendors promoting products and services, the chance to network with potential new customers and entertainment. At the end of the day, the group will name a woman entrepreneur of the year from the Phoenixville area. That award will be presented by state Rep. Warren Kampf, R-157th Dist.

"My dream is to bring women entrepreneurs together. On this day motivated women will share, educate, encourage, inspire, and rejuvenate us to bring out the best in ourselves," Winston said on the website for the event.

A highlight of the event, according to Winston, will be the presentation of two youth entrepreneurs: Jenna Swymelar, a fifth grade student at Renaissance Academy Charter School in Phoenixville and Jessica Meyers, a fifth grade student at Schuylkill Elementary School in Phoenixville.

Winston said the young entrepreneurs will present their businesses to the group. Swymelar has a business called Sweet Dream Pillows by Jenna, while Meyers' business is balloon creations.

Keynote speaker for the event will be Dr. Betty Moseley Brown, associate director, Center for Women Veterans at the Department of Veterans Affairs in Washington, D.C., and 19th president of the Women Marines Association.

"I met her at an event in Indiana, and when she heard what we were doing in bringing women entrepreneurs and women veterans together, she wanted to be part of it," Winston added.

Another speaker will be Jason Raia, executive vice president of the Freedoms Foundation of Valley Forge, a national educational non-profit that encourages "engaged, responsible citizenship," according to the organization's website. Winston said Raia will speak about the organization's youth outreach.

Two panel discussions will be held during the day. The first will feature six Phoenixville-area businesswomen, who will share stories about starting their own businesses.

The second panel discussion will focus on empowerment. Winston said the group of five women, "come from different areas of experiences and we'll share what we're doing and how we're empowering women," she said.

In addition to Kampf's presentation of the Woman Entrepreneur of the Year award, citations will be presented to the winner by state Sen. Andrew Dinniman, D-19th Dist., and U.S. Rep. Ryan Costello, R-6th Dist.

The event will be held from 2-7 p.m. Oct. 7 at the Phoenixville Area Middle School, 1000 Purple Pride Parkway in Phoenixville. Winston said more than 20 vendors have signed up to attend will attend the event. The 2017 Women Entrepreneur & Women Veteran Expo is free, and while registration is not required, people planning to attend can register at <https://weexpo.eventbrite.com>.

4.2 - KSFY (ABC-13, Video): [Sioux Falls conference puts spotlight on women veterans](#) (29 September, 4k online visitors/day; Sioux Falls, SD)

The annual Women Veteran Conference was held Friday in Sioux Falls.

The event was put on by the Sioux Falls VA.

About 86 women veterans attended this year's event.

Organizers said it is important to recognize women veterans and honor their service and sacrifice.

"They tend to be invisible and under recognized by the general public, by VA staff, by other veterans, and so this is just a way to bring them into the spotlight and say 'thank you,'" Brenda Fredericks, Women Veteran program manager, said.

The event also featured artwork by women veterans. The artwork is traveling around to different VA centers throughout the country.

6. Strategic Partnerships

7. Supply Chain Modernization

7.1 - WFED (AM-1500): [VA close to awarding Cerner contract for new EHR](#) (29 September, Nicole Ogrysko, 831k online visitors/mo; Washington, DC)

The Veterans Affairs Department is preparing to award its contract with Cerner Corporation for a new electronic health record in the next month or so.

The award comes after the department announced its decision abandon its own, existing Veterans Information Systems and Technology Architecture (VistA) and adopt MHS Genesis, the same EHR system that DoD is deploying. All patient data will reside in one common Cerner Millennium system.

“We released to Congress, to you, a 30-day notice of award of a contract,” VA Secretary David Shulkin said of the EHR during Wednesday’s Senate Veterans Affairs Committee hearing. “We are keeping on the timeline that we talked about. We’re marching forward. We have the principles. I have some updates to share with you on the strategic IT plan, because I think we are making a lot of progress with that.”

Shulkin signed a “determination and findings” (D&F) form back in June, which grants special permission for VA to issue a direct solicitation to Cerner Corporation for the acquisition of MHS Genesis.

Initial discussions with Cerner were expected to take three to six months, Shulkin said when he announced his decision in early June.

Shulkin said part of the department’s IT strategic plan will include a sunset of 80 percent of VA’s current projects under development.

“By concentrating on some specific IT modernization initiatives, like [electronic health record modernization, financial management business transformation], etc., and leveraging cloud and digital platforms, the 80 percent reduction of ongoing development projects is expected to occur within 18 months, which is part of the overall IT modernization roadmap,” VA Press Secretary Curt Cashour wrote in an email.

VA will migrate or stop 240 out of 299 current projects, Cashour added.

A government source familiar with VA said the department is ending development on projects that aren’t going anywhere. The plan is shift those funds to the new EHR, the source said.

It’s still unclear just how much the new electronic health record will cost, but VA’s IT office faced a \$215 million budget cut in the president’s fiscal 2018 proposal.

Shulkin told lawmakers in May that he'd likely need to return to Congress to work with appropriators after he decides on the department's direction for a new EHR.

The EHR project is a massive undertaking for VA. The department has more than 100 versions of VistA. Those versions exist because VA hospitals largely had the freedom over the past 40 years to change the software to conform to the standards their leaders and doctors wanted to see, former VA IT executives have said.

The department has also outlined the broad principles it envisions it will need in a new EHR, in addition to the other tools and pieces it may need to complement the Cerner system.

"We haven't gotten to defining which specific tools they are yet, and how we're going to meet those needs," Shulkin said. "We've talked about the days of VA being a software developer are over, and we're going to be looking at off the shelf, current technologies. There's going to be a lot more definition on that."

This all comes as the VA's current chief information officer and acting assistant secretary for information and technology, Rob Thomas, announced his retirement next month.

Thomas, who has 35 years of federal experience, took on the CIO position in January, after Laverne Council left because of the change in administration.

VA has been struggling to fill the position since then. Shulkin said during a June budget hearing that a candidate for the CIO position withdrew his name but did not offer a more detailed expansion.

"I need help," Shulkin told reporters after Wednesday's hearing when asked about the leadership vacancies. "This is a big, complex organization. I need the best team possible. I need my nominees, all my political appointments to clear through the vetting process and then to go through their confirmation if it's required. And I need additional people from the private sector who want to come and serve their country to get in touch, because we need the A team on this."

8.1 - ABC News (AP): [The Latest: John Kelly given authority over Cabinet travel](#) (29 September, 24.1M online visitors/mo; New York, NY)

The Latest on Health and Human Services Secretary Tom Price's resignation from the Trump Cabinet (all times local):

7:45 p.m.

The White House is giving chief of staff John Kelly authority to sign off on government travel on government-owned, rented, leased or chartered aircraft.

The change comes after Tom Price resigned Friday as President Donald Trump's health secretary over his costly travel.

White House budget director Mick Mulvaney has issued the new guidance, reminding the heads of executive branch departments and agencies that they are public servants and that every penny they spend comes from taxpayers.

Mulvaney tells Cabinet secretaries and department heads to consider whether commercial travel would be a more appropriate use of public funds even when the guidelines allow for the use of government-owned or chartered aircraft.

Mulvaney says that just because something is legal doesn't make it right.

5:55 p.m.

The resignation of Tom Price as secretary of Health and Human Services is drawing partisan responses from Republican and Democratic lawmakers.

Price resigned Friday amid investigations into his costly travel on charter flights.

The Republican House speaker, Paul Ryan, is praising Price, saying that the former Georgia congressman and House Budget Committee chairman is a "good man."

The top House Democrat, Minority Leader Nancy Pelosi, says Price should never have become health secretary because the country needs someone in the job "who believes in health care for all Americans."

Pelosi says President Donald Trump should pick a replacement who will stop the administration's sabotage of health care programs.

Price has been a top Democratic target because he's been a point man in Trump administration efforts to scrap and undermine "Obamacare."

[...]

12:01 p.m.

The secretary of the Department of Veterans Affairs says information about his official travel will be posted on the department's website.

Secretary David Shulkin says he has not used private aircraft for official business, but has taken six trips on military aircraft.

The trip details will include the type of aircraft, members of the traveling party and information about the events he was attending.

His decision to post his travel information comes as Health and Human Services Secretary Tom Price finds his job in jeopardy over his use of costly charters. Price has said he would reimburse the U.S. Treasury nearly \$52,000 for the cost of his seat on the charter flights. He has not addressed the overall cost of the flights, which are estimated to cost hundreds of thousands of dollars.

[Back to Top](#)

8.2 - ABC News (AP): [A look at questions over Cabinet members' travel](#) (29 September, 24.1M online visitors/mo; New York, NY)

Health and Human Services Secretary Tom Price has resigned amid controversy over his use of costly private charter flights on government business. But other Cabinet members are also facing congressional scrutiny over their travel.

Interior Secretary Ryan Zinke dismissed the controversy over charters as "a little BS over travel," but he acknowledged taxpayers do have the right to know official travel costs.

The Price controversy was a catalyst for the House Oversight and Government Reform Committee to launch a government-wide travel investigation. The panel is seeking detailed records from the White House and 24 departments and agencies on the use of government planes as well as private charters.

Here's a look at what other Cabinet members are saying:

—Interior's Zinke said he's taken three charter flights while in office, including a \$12,375 late-night trip from Las Vegas to his home state of Montana in June. Zinke said no commercial flight was available at the time he planned to fly for a speech to Western governors. He also went on a military flight with Agriculture Secretary Sonny Perdue to view wildfires in Montana. All of his travel was approved in advance by Interior's ethics officials "after extensive due diligence," Zinke said.

—Veterans Affairs Secretary David Shulkin said he has not used private aircraft for official business but has taken six trips on military aircraft. Information about his official travel will be posted on the department's website, he said.

—At the Treasury Department, the inspector general is investigating all requests for and use of government aircraft, including those by Secretary Steven Mnuchin, who came under fire for requesting a government aircraft to use on his honeymoon. The request was later withdrawn.

—The EPA said four non-commercial flights taken by Administrator Scott Pruitt were pre-approved by ethics lawyers. The agency's inspector general opened an inquiry last month into Pruitt's frequent taxpayer-funded travel on commercial planes. The Associated Press reported earlier this year that Pruitt often spends weekends at his Tulsa home.

— The Pentagon said Defense Secretary Jim Mattis has never requested or used charter aircraft. Mattis has reimbursed the government for the cost of some unofficial travel, but the Pentagon did not immediately provide the number of trips or the total costs repaid. The secretary of defense is required to travel on military aircraft wherever he goes so he can be in contact with the president and the chairman of the Joint Chiefs of Staff. Military planes carry the secure communications equipment required for classified calls and video teleconferences. In addition, the military flights of top defense leaders often double as training missions for Air Force crew.

[Back to Top](#)

8.3 - The Washington Times (AP): [Couple gets jail for keeping veteran's dead body in home](#) (29 September, 10.8M online visitors/mo; Washington, DC)

NEW PHILADELPHIA, Ohio - An Ohio couple criminally charged for keeping a Vietnam veteran's decomposing body in their home for several months to steal his Social Security and veteran benefits have received six months in jail.

The New Philadelphia Times Reporter reports 50-year-old Brian Sorohan and 46-year-old Stacy Sorohan also received two years' probation Thursday in Tuscarawas County.

The Wainwright residents pleaded no contest to gross abuse of a corpse and theft in a plea agreement. The couple must pay \$1,300 in restitution to the Veterans Administration and \$4,100 to the Social Security Administration.

Seventy-one-year-old Robert Harris' body was found in the couple's home March 22. Authorities searched the home that day after relatives became concerned about Harris' well-being.

Attorneys for the couple said in court the Sorohans regretted what they did.

30 September 2017

[1. Top Stories](#)

1.1 - The Washington Post (Video): [VA chief took in Wimbledon, river cruise on European work trip; wife's expenses covered by taxpayers](#) (29 September, Jack Gillum, Alex Horton, Drew Harwell and Lisa Rein, 43.9M online visitors/mo; Washington, DC)

Nearly three days into a trip to Europe this past July, Veterans Affairs Secretary David Shulkin had attended a Wimbledon championship tennis match, toured Westminster Abbey and taken a cruise on the Thames. The 10-day trip was not entirely a vacation. Shulkin was in Europe for meetings with Danish and British officials about veterans' health issues, so taxpayers picked up part of the tab.

[Hyperlink to Above](#)

1.2 - Reuters: [Under pressure from Trump, Price resigns as health secretary over private plane uproar](#) (29 September, Steve Holland, 43.6M online visitors/mo; New York, NY)

U.S. Health and Human Services Secretary Tom Price resigned under pressure from President Donald Trump on Friday in an uproar over Price's use of costly private charter planes for government business. His abrupt departure was announced an hour after Trump told reporters he was disappointed in Price's use of private aircraft and did not like the way it reflected on his administration.

[Hyperlink to Above](#)

1.3 - The New York Times: [Veterans Agency Seeks to Scrap Ethics Law on For-Profit Colleges](#) (29 September, Patricia Cohen, 29.8M online visitors/mo; New York, NY)

The Department of Veterans Affairs is pushing to suspend a 50-year-old ethics law that prevents employees from receiving money or owning a stake in for-profit colleges that pocket hundreds of millions of dollars in tuition paid through the G.I. Bill of Rights.

[Hyperlink to Above](#)

1.4 - U.S. News & World Report (AP): [Alaska VA Office Gets Mixed Report From Watchdog](#) (29 September, Becky Bohrer, 24M online visitors/mo; Washington, DC)

A government watchdog says the U.S. Department of Veterans Affairs regional office in Anchorage has made strides in processing claims but has work to do in other areas. The VA's inspector general said the accuracy of the claims processing it reviewed earlier this year was significantly better than a prior inspection in 2013.

[Hyperlink to Above](#)

1.5 - Stars and Stripes: [VA publicizes Shulkin's travel schedule amid scrutiny over Cabinet spending](#) (29 September, Nikki Wentling, 1.5M online visitors/mo; Washington, DC)

The Department of Veterans Affairs made moves Friday to publicize Secretary David Shulkin's travel schedule, following scrutiny over the cost of government-funded travel by other Cabinet members. The VA announced it will post Shulkin's itineraries of international and domestic trips, as well as who accompanies him and whether he uses private or government aircraft.

[Hyperlink to Above](#)

1.6 - The Clarion-Ledger (Video): [Mississippi treating 11 Hurricane Maria victims, more coming](#) (29 September, Anna Wolfe, 849k online visitors/mo; Jackson, MS)

So far, 11 hurricane victims from Puerto Rico and St. Croix have been transported to metro Jackson hospitals in the aftermath of Hurricanes Irma and Maria. The storms devastated Puerto Rico's hospitals, a majority of which are without electricity or fuel for generators and beginning to run out of oxygen and clean water.

[Hyperlink to Above](#)

1.7 - The San Diego Union-Tribune: [Does a soldier's best friend belong in VA research labs? A fight at the heart of the veterans community](#) (29 September, Jeanette Steele, 494k online visitors/mo; San Diego, CA)

America loves dogs, but many veterans have an extra bond after serving with canine units on the battlefield and increasingly depending on service dogs back at home. Now the U.S. Department of Veterans Affairs and some of the nation's largest veterans groups are in a scrap with a government watchdog organization and some in Congress over VA medical research programs that inflict harm on man's best friend in the name of science.

[Hyperlink to Above](#)

[2. Veteran and Employee Experience](#)

2.1 - USA Today: [VA Secretary David Shulkin discloses official travel details](#) (29 September, Jessica Estepa, 36.7M online visitors/mo; McLean, VA)

Veterans Affairs Secretary David Shulkin announced Friday that his department would disclose details about his official travels, in an attempt to be transparent as the travels of other members of the administration come under scrutiny. The department will regularly update a page that includes any travels by private and government aircraft, as well as itineraries of official international and domestic trips.

[Hyperlink to Above](#)

2.2 - ABC News: [VA secretary spent half of official London trip sightseeing](#) (29 September, Luis Martinez, 24.1M online visitors/mo; New York, NY)

Veterans Affairs Secretary David Shulkin flew a commercial airline to London this past July to attend a veterans conference, but half his time there was spent on sightseeing and a stop at Wimbledon tennis tournament. Shulkin's wife's commercial travel costs were also paid for by the federal government because she was under "approved invitational orders"

[Hyperlink to Above](#)

2.3 - Politico: [Who will replace Tom Price? A dozen names are circulating as possible successors](#) (29 September, Joanne Kenen and Jennifer Haberkorn, 23.9M online visitors/mo; Arlington, VA)

The VA secretary is a Trump favorite, and the only cabinet nominee to be unanimously confirmed. However, Shulkin has come under criticism for combining leisure with business on his official travel — he attended a Wimbledon championship tennis match, toured Westminster Abbey and took a cruise on the Thames while meeting this summer with European officials about veterans' issues, The Washington Post reported Friday.

[Hyperlink to Above](#)

2.4 - The Huffington Post: [Yet Another Trump Administration Official Took Questionable Liberties With Work Travel](#) (29 September, Mollie Reilly, 23M online visitors/mo; New York, NY)

Veterans Affairs Secretary David Shulkin used his downtime on a recent international trip for several leisure activities, including a tennis match and river cruise, The Washington Post reported Friday. According to the report, Shulkin spent roughly half of a 10-day trip to the U.K. and Denmark to sightsee, watch a high-profile Wimbledon match and take in other activities more typical of a vacation than a work trip.

[Hyperlink to Above](#)

2.5 - The Hill: [Trump VA chief went sightseeing, shopping with wife on government trip: report](#) (29 September, Brandon Carter, 11.8M online visitors/mo; Washington, DC)

Veterans Affairs Secretary David Shulkin spent nearly half his time on a recent international trip sightseeing and shopping with his wife, according to The Washington Post. Shulkin traveled to Europe in July to attend a conference in London with representatives of several countries on veterans' health issues, as well as a series of meetings in Denmark.

[Hyperlink to Above](#)

2.6 - Washington Examiner: [VA secretary saw Wimbledon match during taxpayer-funded trip to Europe: Report](#) (29 September, Melissa Quinn, 4.8M online visitors/mo; Washington, DC)

Secretary of Veterans Affairs David Shulkin and his wife, accompanied by other VA officials, attended a tennis match at Wimbledon, toured Westminster Abbey, and cruised the Thames River as part of a taxpayer-funded, 10-day work trip to Europe this summer, according to a report.

[Hyperlink to Above](#)

2.7 - Pittsburgh Post-Gazette: [Pittsburgh VA nurse is finalist for national caregiver award](#) (29 September, Gary Rotstein, 4.8M online visitors/mo; Pittsburgh, PA)

A nurse for the VA Pittsburgh Healthcare System is one of six national finalists for an annual award given to a medical professional who shows an exemplary caregiving approach on the job. Victor Fagan, a licensed practical nurse from Butler, won recognition from among nearly 200 nominees who were submitted to the Boston-based Schwartz Center for Compassionate Healthcare.

[Hyperlink to Above](#)

2.8 - PennLive (Video): [VA chief mixed business with pleasure at taxpayer expense: Media report](#) (29 September, Ivey DeJesus, 3.1M online visitors/mo; New Bloomfield, PA)

President Donald Trump's veterans affairs chief is the latest administration official in hot water for reportedly tapping into taxpayer money to pay for vacation outings and non-official business. Veterans Affairs Secretary David Shulkin in July took in a Wimbledon championship tennis match and a Thames River cruise on taxpayer money. That's according to a report published Friday by The Washington Post.

[Hyperlink to Above](#)

2.9 - Military Times: [Amid Cabinet controversies, VA promises to post secretary's travel details online](#) (29 September, Leo Shane III, 2.1M online visitors/mo; Springfield, VA)

In response to the growing scandal of Cabinet officials using pricey private aircraft for business trips, Veterans Affairs officials announced Friday they will post details of all official travel by department Secretary David Shulkin online to provide transparency about his travels. "Veterans and taxpayers have a right to know about my official travel as secretary, and posting this information online for all to see will do just that," Shulkin said in a statement.

[Hyperlink to Above](#)

2.10 - Providence Journal (The Enterprise): [Providence VA official relieved of duties amid allegations of racism, homophobia](#) (29 September, Paul Edward Parker, 1.2M online visitors/mo; Providence, RI)

A manager at the Veterans Affairs Regional Office in Providence has been relieved of his duties pending disciplinary action, following a complaint from a co-worker that he created a "toxic work atmosphere."

[Hyperlink to Above](#)

2.11 - KATV (ABC-7, Video): [Troubles at the VA: Nurses speaking out about culture](#) (29 September, Elisabeth Armstrong, 448k online visitors/mo; Little Rock, AR)

Two former nurses who have filed EEO complaints against the CAVHS are speaking out about problems. In July, Channel 7 brought you this report out of the VA. In it, some thirty nurses filed a complaint against the hospital - alleging that under-staffing was impacting patient care.

[Hyperlink to Above](#)

2.12 - WQAD (ABC-8, Video): [Moline man shocked after job training center for veterans shuts down](#) (29 September, Chris Minor, 450k online visitors/mo; Moline, IL)

A Moline, Illinois man is one of more than 300 veterans left in the dark after a job training school they paid for through the GI bill abruptly shut its doors. "Three weeks before graduation, we were told goodbye.

[Hyperlink to Above](#)

2.13 - FedSmith: [VA to Begin Disclosing Agency Secretary's Official Travel](#) (29 September, Ian Smith, 277k online visitors/mo; Washington, DC)

The Department of Veterans Affairs announced today that it will begin publishing all of the agency secretary's official travel on its website. The lists include all official travel taken by Dr. David J. Shulkin since January 20, and the site will be updated within five days after the conclusion of each trip.

[Hyperlink to Above](#)

2.14 - Leavenworth Times: [Sentencing continued for former VA physician assistant](#) (29 September, 46k online visitors/mo; Leavenworth, KS)

A former physician assistant who was convicted of sexually abusing patients at the Leavenworth veterans hospital will not be sentenced until November. Mark E. Wisner was scheduled to be

sentenced today in Leavenworth County District Court. But the sentencing and arguments for post trial motions have been continued until Nov. 3.

[Hyperlink to Above](#)

2.15 - Pahrump Valley Times: [Plaques at Pahrump VA clinic recognize veterans of U.S. armed forces](#) (29 September, Jeffrey Meehan, 1k online visitors/day; Pahrump, NV)

A group of local veterans of the U.S. armed forces gathered to recognize the installation of several plaques at the Pahrump VA Community Based Outpatient Clinic in September. Each plaque bore the symbol of one of the five branches of the U.S. armed forces and another was hung for prisoners of war.

[3. Access to Healthcare](#)

3.1 - WBBM (CBS-2, Video): [2 Investigators: Disabled Vets Face Tough Parking At VA Hospital](#) (29 September, Dave Savini, 27.5M online visitors/mo; Chicago, IL)

A major problem at Hines VA Medical Center: Some sick and wounded veterans are struggling to get to their medical appointments because of parking violators. CBS 2's Dave Savini has the story. James Dahan, a Marine Corps veteran, gets angry when fellow wounded vets struggle to find a parking spot.

[Hyperlink to Above](#)

3.2 - The News & Observer: [Vietnam vet happy to be back in Durham's VA hospital, but for how long?](#) (29 September, Thomasi McDonald, 3.9M online visitors/mo; Raleigh, NC)

A Vietnam veteran and double-amputee said things are "perfect" now that he is back in Durham's Veterans Administration Medical Center, where he has lived for a little more than three years. But James Donald Francis, 69, said he's worried because VA officials have not told him or given him any documentation about how long he will be able to stay at the VA's Community Living Center.

[Hyperlink to Above](#)

3.3 - Newsday (Video): [House vet chair Roe tours Northport VA after maintenance issues](#) (29 September, Martin C. Evans, 3.2M online visitors/mo; Melville, NY)

The head of the House Committee on Veterans Affairs came to Long Island for an up-close look at the troubled Northport VA Medical Center Thursday, saying the facility should "find the right size" to address maintenance problems straining its budget and impacting patient care.

[Hyperlink to Above](#)

3.4 - Stars and Stripes: [Stage set in Congress for debate on Choice program reform](#) (29 September, Nikki Wentling, 1.5M online visitors/mo; Washington, DC)

The Department of Veterans Affairs estimated the funds that allow veterans to receive health care in the private sector will last until the end of the year – a projection that establishes a new deadline for when Congress needs to come up with a long-term solution for the Veterans Choice Program.

[Hyperlink to Above](#)

3.5 - WNDU (NBC-16, Video): [New VA clinic in Mishawaka will 'quadruple services'](#) (29 September, Mark Peterson, 833k online visitors/mo; South Bend, IN)

Ribbon cutting ceremonies in Mishawaka on Friday marked the completion of a \$38 million medical clinic for veterans. About ten years ago, the Veterans Administration was first asked to study how often local vets had to travel long distances to get needed medical care. "I'll be able to come here for my eye appointments, I'll be able to come here for my hearing appointments, and those are all things I have to go to Fort Wayne for," said veteran Chuck Damp.

[Hyperlink to Above](#)

3.6 - WNDU (NBC-16, Video): [Sen. Joe Donnelly on tax overhaul, health care and new VA clinic](#) (29 September, Jason Krug, 833k online visitors/mo; South Bend, IN)

President Donald Trump visited Indianapolis on Wednesday, pitching his tax overhaul plan. Traveling with the president from Washington D.C. that day was Sen. Joe Donnelly. A question some had is why the Democrat would travel on Air Force One with the Republican president.

[Hyperlink to Above](#)

3.7 - WFLA (NBC-8, Video): [Veteran suicides, VA corruption focus of rally and protest](#) (29 September, Steve Andrews, 702k online visitors/mo; Tampa, FL)

In the United States, 22 veterans take their lives every day. In front of the Veterans Affairs office at Bay Pines, 22 mannequins stood to serve as a reminder of this American tragedy. Army veteran Mike Ford admits he's come close to ending his life. "Idea was to just go ahead and just kill yourself on V-A property right, maybe if they see, if maybe people like, wow, there's something really going on here," he told News Channel 8.

[Hyperlink to Above](#)

3.8 - Modern Healthcare: [VA looks to ease telehealth regulations](#) (29 September, Rachel Z. Arndt, 460k online visitors/mo; Chicago, IL)

The Veterans Affairs Department proposed a rule Friday that would allow VA providers anywhere in the country to conduct telehealth visits with VA patients across state borders, regardless of state licensing.

[Hyperlink to Above](#)

3.9 - KMYT (FOX-14, Video): [As Suicide Prevention Month comes to a close, the search continues for solutions to veteran suicide](#) (29 September, Peter Zampa, 71k online visitors/mo; Twin Falls, ID)

Suicide prevention month is highlighting how the U.S. Can better address the issue. A specific focus currently in Washington is a push to end veteran suicide. Senators are examining what is being done to help veterans in need, and what other efforts are necessary. One veteran says it is not easy to solve this tragic problem.

[Hyperlink to Above](#)

3.10 - mHealth Intelligence: [New Rule Would Give VA Doctors National Telehealth Privileges](#) (29 September, Eric Wicklund, 53k online visitors/mo; Danvers, MA)

The Department of Veterans Affairs is moving forward with a plan to enable VA doctors to treat veterans through telehealth no matter where the doctor or patient are located, essentially overriding state laws.

[Hyperlink to Above](#)

3.11 - WLTZ (NBC-38, WSB/ABC-2, Video): [Hospital Evacuees from Caribbean Arrive in Atlanta](#) (28 September, Nami Dockery, 44k online visitors/mo; Columbus, GA)

Hospital patients evacuated from the Caribbean due to hurricane Maria are finding refuge in Georgia. Doctors and nurses welcomed the patients after a plane carrying roughly 40 medical evacuees landed Wednesday night. It comes after the hurricane caused widespread power outages, including a loss of electricity at hospitals.

[Hyperlink to Above](#)

3.12 - Marion Republican: [Bost 'not happy' with VA investigation; vows to look further into allegations at Marion VAMC](#) (29 September, Holly Lee, 14k online visitors/mo; Marion, IL)

The conclusion of a Veterans Affairs inquiry into allegations of nepotism, employee intimidation and why some patients died at the VA Medical Center in Marion leaves one southern Illinois congressman "not happy" with the answers and vowing further action.

8.3 - The Washington Times (AP): [Couple gets jail for keeping veteran's dead body in home](#) (29 September, 10.8M online visitors/mo; Washington, DC)

An Ohio couple criminally charged for keeping a Vietnam veteran's decomposing body in their home for several months to steal his Social Security and veteran benefits have received six months in jail. The New Philadelphia Times Reporter reports 50-year-old Brian Sorohan and 46-year-old Stacy Sorohan also received two years' probation Thursday in Tuscarawas County.

1.1 - The Washington Post (Video): [VA chief took in Wimbledon, river cruise on European work trip; wife's expenses covered by taxpayers](#) (29 September, Jack Gillum, Alex Horton, Drew Harwell and Lisa Rein, 43.9M online visitors/mo; Washington, DC)

Nearly three days into a trip to Europe this past July, Veterans Affairs Secretary David Shulkin had attended a Wimbledon championship tennis match, toured Westminster Abbey and taken a cruise on the Thames.

The 10-day trip was not entirely a vacation. Shulkin was in Europe for meetings with Danish and British officials about veterans' health issues, so taxpayers picked up part of the tab.

Yet he and his wife spent about half their time sightseeing, including shopping and touring historic sites, according to an itinerary obtained by The Washington Post and confirmed by a U.S. official familiar with their activities.

The federal government paid for the flights for Shulkin and his wife, Merle Bari, and provided a per-diem reimbursement for their meals and other expenses, VA said Friday. An agency spokesman did not respond to questions about why Bari qualified for the reimbursements and taxpayer-funded airfare, other than to say she was traveling on "approved invitational orders" and had "temporary duty" travel expenses.

The agency also did not respond to questions about the cost of the flights and the total reimbursement. If Bari took the full per diem every day of the trip, she could have been reimbursed as much as \$3,600 under federal guidelines.

Trump administration Cabinet members have faced mounting scrutiny over their use of private and government jets in recent days, and Health and Human Services Secretary Tom Price resigned Friday amid criticism of his use of taxpayer-funded charter flights. Shulkin traveled on a commercial flight, though, and he was seated in coach on at least one leg.

The European visit, however, puts a focus on the mixing of business and leisure during these trips, which can come at considerable taxpayer expense. Shulkin's immediate predecessor, Robert McDonald, took no foreign work trips, according to a former VA official who spoke on the condition of anonymity.

Shulkin's six-person traveling party included his acting undersecretary of health and her husband, Shulkin's chief of staff and another aide, the itinerary says. They were accompanied by a security detail of as many as six people.

Shulkin's trip came less than two weeks after he signed a memo instructing top VA staffers to determine whether "employee travel in their organization is essential."

"I expect this will result in decreased employee travel and generate savings within the Department of Veterans Affairs," Shulkin wrote.

In response to questions from The Post, VA announced Friday that the agency will begin posting details of the secretary's travel online, including itineraries, and disclosing any use of government or private aircraft. That information had not previously been disclosed publicly.

All of Shulkin's activities on the European trip, including his attendance at Wimbledon, "were reviewed and approved by ethics counsel," VA press secretary Curt Cashour said in an emailed statement.

"These were important trips with our allies to discuss best practices for taking care of veterans," Cashour said. "The secretary has been transparent on his down-time activities that were similar to what he would have done with his family over a weekend in the U.S."

Cashour said the husband of Poonam Alaigh, the acting undersecretary for health, paid his own expenses.

In an interview Friday, Alaigh defended the trip as a "tremendous and valuable exchange of ideas" with British and Danish counterparts.

"Were there some breaks we got? Sure," she said. "But they were reasonable. They were not at the expense of what we had committed to do: representing our country and showing our commitment to veterans."

Alaigh said the delegation took an unplanned trip across the border to Sweden one evening.

Senior members of Congress, including two key Republicans, have expressed concerns about travel by officials in President Trump's Cabinet. The leaders of the House Oversight Committee, Chairman Trey Gowdy (R-S.C.) and Rep. Elijah E. Cummings (D-Md.), wrote to the White House this week to demand records on air travel for executive officials since Trump's inauguration, saying that official travel "by no means should include personal use."

Sen. Charles E. Grassley (R-Iowa), chairman of the Senate Judiciary Committee, also wrote Trump a letter Thursday asking what steps the administration has taken to "ensure Cabinet secretaries use the most fiscally responsible travel in accordance with the public trust they hold."

One ethics expert said the trip sends the wrong message to taxpayers, especially if spouses' expenses were paid by the government.

"That's kind of a long trip for the secretary to be gone," said Walter M. Shaub Jr., a vocal critic of the Trump administration who resigned in July as the federal government's top ethics watchdog. "The cost has got to be extravagant."

Shulkin was invited to attend a July 19 conference in London to discuss veterans' mental health issues with representatives of Britain, Canada, Australia and New Zealand. In past years, the VA secretary has attended the conference.

He also arranged to attend meetings in Denmark from July 12 to 14. Officials in Denmark said VA officials approached them about the meetings.

The bookend events left Shulkin with four days in between, according to his itinerary. He attended a ceremony one of those nights at which a British veteran of the war in Afghanistan was honored, and a meeting the next night at the British prime minister's residence.

Over the course of the trip, Shulkin and his entourage visited four palaces — Copenhagen's Christiansborg and Amalienborg and London's Buckingham and Kensington — and included times for walks, self-guided tours and photo stops.

On one calendar item, a canal tour of Copenhagen, the itinerary specifically noted the group "Will See Little Mermaid Statue," one of the city's most iconic public artworks. During the London visit, Shulkin and his wife shared a meal at a restaurant overlooking a tennis court with Victoria Gosling, a British leader of the Invictus Games, a sports tournament for wounded veterans. Gosling posted a photo of the gathering on Twitter.

"Great honour and a pleasure to host US Secretary of the VA and his lovely family," Gosling wrote.

The Wimbledon event was one of the prized moments of the tennis year: In the women's final, American Venus Williams would lose her chance at a sixth title to Spain's Garbiñe Muguruza.

It is not clear whether the London invitation came before or after the scheduling of the events in Copenhagen, which included speaking with several Danish health-care executives at a luncheon organized by a Danish business group. A spokesman for one company in attendance, Leo Pharma, said the executives were asked by the Danish Foreign Affairs Ministry to attend.

In any event, the Copenhagen meetings occurred at a time the business group said was inconvenient, because it was a holiday period for Danes.

"It was quite difficult for us to accommodate," said Kasper Ernest, a director at the Confederation of Danish Enterprise, noting that his group's chief executive could not attend. "I was also on holiday."

Shulkin's relationship with Danish government leaders has grown over the past year, Danish officials said, and Denmark's military had been heavily involved in the war in Afghanistan.

In a statement, the Danish Embassy in Washington said it has had "a close dialogue with the U.S. Department of Veterans Affairs for a couple of years based on the long-standing partnership between Denmark and the USA on global conflicts. Over this period, there has been a standing invitation to visit Denmark."

[Back to Top](#)

1.2 - Reuters: [Under pressure from Trump, Price resigns as health secretary over private plane uproar](#) (29 September, Steve Holland, 43.6M online visitors/mo; New York, NY)

WASHINGTON - U.S. Health and Human Services Secretary Tom Price resigned under pressure from President Donald Trump on Friday in an uproar over Price's use of costly private charter planes for government business.

His abrupt departure was announced an hour after Trump told reporters he was disappointed in Price's use of private aircraft and did not like the way it reflected on his administration.

“Secretary of Health and Human Services Thomas Price offered his resignation earlier today and the president accepted,” the White House said in a statement.

Trump named Don Wright to serve as acting secretary. Wright is currently the deputy assistant secretary for health and director of the office of disease prevention and health promotion.

“I’m not happy. OK? I’m not happy,” Trump told reporters on the White House South Lawn.

Candidates to succeed Price included Seema Verma, who is administrator of the Centers for Medicare and Medicaid Services and who is close to Vice President Mike Pence, and Scott Gottlieb, a physician who serves as commissioner of the Food and Drug Administration, according to industry analysts.

Several sources saw Gottlieb as a clear front runner. They said he got along well with the White House and is viewed favourably there.

Price’s resignation leaves Trump with a second Cabinet position to fill. He has yet to pick a secretary for homeland security after hiring former Secretary John Kelly as his White House chief of staff.

It was the latest blow to the Trump White House, which has struggled to get major legislative achievements passed by Congress and has been embroiled in one controversy after another since Trump took office in January.

Price, a former congressman, was instrumental in the Trump administration’s policies aimed at undercutting Obamacare, as well as working with governors across the country to slowly begin unravelling parts of the law.

In a resignation letter, Price offered little in the way of contrition. He said he had been working to reform the U.S. healthcare system and reduce regulatory burdens, among other goals.

“I have spent forty years both as a doctor and public servant putting people first. I regret that the recent events have created a distraction from these important objectives,” he said.

Trump, currently trying to sell his tax cut plan and oversee the federal response to devastation wreaked by three hurricanes, saw the Price drama as an unnecessary distraction and behind the scenes was telling aides “what was he thinking?,” a source close to the president said.

Price promised on Thursday to repay the nearly \$52,000 cost of his seats on private charter flights. “The taxpayers won’t pay a dime for my seat on those planes,” Price said.

But that was not enough to satisfy Trump.

Trump told reporters that the “optics” of Price’s travel were not good, since, as president he was trying to renegotiate U.S. contracts to get a better deal for taxpayers.

“Look, I think he’s a very fine person. I certainly don’t like the optics,” Trump said.

Price had also been seen in the White House as having been ineffective in getting Congress to pass healthcare reform legislation, an effort that has fizzled on Capitol Hill.

Price was one of a handful of senior officials in Trump's administration put on the defensive over reports about their use of charter flights and government aircraft, sometimes for personal travel, when they could have flown commercial for less money.

The White House issued an order late on Friday saying use of private planes required approval from White House Chief of Staff John Kelly and that the commercial air system was appropriate even for very senior officials with few exceptions.

The Washington Post on Friday reported that Veterans Affairs Secretary David Shulkin attended a Wimbledon tennis match, toured Westminster Abbey and took a cruise on the Thames this summer during a 10-day trip to discuss veterans' health issues in Britain and Denmark.

Shulkin, who travelled on a commercial airline, was accompanied on the trip by his wife, whose airfare was paid for by the government and who received a per diem for meals, the Post said, noting that the Department of Veterans Affairs said she was travelling on "approved invitational orders."

His six-person travelling party included an acting undersecretary of health and her husband as well as two aides. They were accompanied by a security detail of as many as six people, the Post said.

Washington news media outlet Politico has reported that Price had taken at least two dozen private charter flights since May at a cost to U.S. taxpayers of more than \$400,000. Politico also reported he took approved military flights to Africa and Europe costing \$500,000.

Senior U.S. government officials travel frequently, but are generally expected to keep costs down by taking commercial flights or the train when possible.

Environmental Protection Agency Administrator Scott Pruitt and Treasury Secretary Steve Mnuchin have also been in the spotlight for their travel habits.

[Back to Top](#)

1.3 - The New York Times: [Veterans Agency Seeks to Scrap Ethics Law on For-Profit Colleges](#) (29 September, Patricia Cohen, 29.8M online visitors/mo; New York, NY)

The Department of Veterans Affairs is pushing to suspend a 50-year-old ethics law that prevents employees from receiving money or owning a stake in for-profit colleges that pocket hundreds of millions of dollars in tuition paid through the G.I. Bill of Rights.

The agency says the conflict-of-interest law — enacted after scandals enveloped the for-profit education industry — is now redundant and outdated, with "illogical and unintended consequences" affecting employees who have no real conflict of interest, such as a V.A. doctor teaching a course at a school attended by veterans with educational benefits.

But veterans' groups and ethics experts reject those arguments and say the department is abandoning protections for veterans and taxpayers. They worry that the effort is part of a larger rollback of federal safeguards that were instituted before President Trump took office to combat abuses and fraud by for-profit colleges.

Several officials who worked in the for-profit college industry and had criticized the Obama-era crackdown as excessive, for example, have joined the Education Department, which administers and polices the federal student loan program and the industry.

The proposal to suspend the ethics law was published in the Federal Register in mid-September and is scheduled to take effect on Oct. 16, but no public hearings have been scheduled and no public comments have yet been submitted.

“It’s just reckless and sloppy,” said Walter M. Shaub Jr., a former director of the Office of Government Ethics, said of the agency’s action. He questioned why such a blanket exception for more than 330,000 agency employees should exist when the law allows waivers for individuals or even classes of individuals, like those teaching courses. Invoking the waiver also requires public hearings, he said.

Most troubling to Mr. Shaub, now senior counsel at the nonpartisan Campaign Legal Center, is that the move seems like an attempt by the executive branch to overrule the legislative branch. “They are saying the statute is unreasonable, but that’s not for them to say,” he said of agency officials.

Curtis Cashour, a V.A. spokesman, said officials had focused on the ethics law after the agency’s inspector general investigated complaints this year that two V.A. employees were teaching at a for-profit institution. There were no significant conflicts and a waiver was ultimately granted, he said, but the report led to worries among many employees about the impact of more rigorous enforcement.

“Our response was aimed at easing the concerns of numerous V.A. employees,” Mr. Cashour said in an email, adding that the ethics law had been superseded by subsequent conflict-of-interest statutes.

One concern of critics is that officials at the organization’s upper levels could be making decisions about a college in which they have a financial interest, like permitting a school with a record of abuses to recruit at military bases. Another is that people advising veterans about their educational benefits could steer students to a particular school because they were on the payroll.

“There’s no good that can come from allowing colleges to have unseemly financial entanglements with V.A. employees,” Carrie Wofford, director of Veterans Education Success, a nonprofit advocacy group. “Congress enacted a zero tolerance for financial conflicts of interest for V.A. employees precisely because Congress uncovered massive fraud by for-profit colleges targeting veterans.”

She added that “student veterans were already facing an aggressive rollback of their protections under the Trump administration’s Education Department.”

Two months ago, the Republican-led Senate Appropriations Committee issued a report during its debate over the military budget instructing the department to review the statute — but its concern was that the current rules “may be inadequate to identify conflicts of interest that can develop” because of gifts or expensive meals.

Veterans are particularly valuable as potential students: There are limits on the federal funds that for-profit schools can receive, but money from the G.I. Bill is not counted.

Even before last year's presidential election, some of the biggest veterans and military organizations were urging the department to better monitor for-profit colleges that were misleading veterans about the costs and benefits of enrolling, and violating legal and regulatory standards.

And a report issued in July by the director of the agency's Education Service found that financial issues involving tuition and fees were by far the leading complaint among students who had called the agency's G.I. Bill hotline since 2014.

Some ethics experts disagreed with the department's contention that other federal statutes made the ethics law unnecessary, saying the agency's rule sets a higher bar, requiring, for example, more public review.

Dozens of other agencies also have supplemental ethics rules that have been written to address potential problems specific to those agencies.

Senator Patty Murray, Democrat of Washington, and a longtime advocate for veterans, said she planned to look into the agency's decision. "I am deeply concerned the V.A. is opening the door for predatory for-profits to take advantage of men and women who have bravely served our country," she said.

1.4 - U.S. News & World Report (AP): [Alaska VA Office Gets Mixed Report From Watchdog](#) (29 September, Becky Bohrer, 24M online visitors/mo; Washington, DC)

JUNEAU, Alaska — A government watchdog says the U.S. Department of Veterans Affairs regional office in Anchorage has made strides in processing claims but has work to do in other areas.

The VA's inspector general said the accuracy of the claims processing it reviewed earlier this year was significantly better than a prior inspection in 2013.

But it found delays in processing benefit reductions or discontinuations, resulting in about \$16,800 in overpayments for care, and inaccuracies in how staff entered claim information. The inspector general said such overpayments due to administrative errors aren't recoverable.

The watchdog recommended that the office prioritize the processing of benefit changes and improve oversight to ensure information is accurate when claims are established.

The VA, in responses included with the report, agreed with the findings and recommendations.

[Back to Top](#)

1.5 - Stars and Stripes: [VA publicizes Shulkin's travel schedule amid scrutiny over Cabinet spending](#) (29 September, Nikki Wentling, 1.5M online visitors/mo; Washington, DC)

The Department of Veterans Affairs made moves Friday to publicize Secretary David Shulkin's travel schedule, following scrutiny over the cost of government-funded travel by other Cabinet members.

The VA announced it will post Shulkin's itineraries of international and domestic trips, as well as who accompanies him and whether he uses private or government aircraft. On Friday, the information was online at the VA's new "Secretary's Travel" page.

"Veterans and taxpayers have a right to know about my official travel as secretary, and posting this information online for all to see will do just that," Shulkin said in a prepared statement.

The announcement came two days after the House Oversight Committee initiated an investigation into the travel of President Donald Trump's administration.

Rep. Trey Gowdy, R-S.C., and Rep. Elijah Cummings, D-Md., leaders of the committee, sent letters Wednesday to the White House and 24 federal agencies, including the VA, asking for senior officials' travel details. The lawmakers cited federal law that official travel should be "expeditious" and "by no means should include personal use."

Gowdy and Cummings requested responses from each agency by 5 p.m. on Oct. 10.

In August, Treasury Secretary Steve Mnuchin used military aircraft to fly from New York City to Washington, D.C., costing about \$25,000, ABC News reported. The Treasury's Office of Inspector General is reviewing another of Mnuchin's trips, in which he used government aircraft to fly to Kentucky, where he spoke to business leaders and viewed the solar eclipse.

According to several reports, Mnuchin also requested to use a military jet to fly him and his wife, Louise Linton, to their European honeymoon. The request was later withdrawn.

Another cabinet member, Health and Human Services Secretary Tom Price, promised Thursday to repay about \$52,000 for his travel on private charter planes, which costs thousands of dollars more than commercial flights.

Interior Secretary Ryan Zinke took a charter plane to Montana and the Caribbean at a price of \$12,000, Politico reported. Multiple news outlets reported Scott Pruitt, who leads the Environmental Protection Agency, has taken at least four noncommercial flights since February, costing taxpayers more than \$58,000.

As of Friday afternoon, the VA posted Shulkin had taken five trips on Air Force 1 and Air Force 2, two of them to Texas to see damage caused by Hurricane Harvey. He also used a military aircraft last week for a trip to the Invictus Games in Toronto with First Lady Melania Trump. Shulkin has not used any private aircraft for official travel, according to information on the VA website.

According to one itinerary posted on the VA website Friday, Shulkin, his wife, Merle Bari, and other VA officials traveled July 11 to Denmark, where Shulkin was briefed on the Danish health care system for veterans, toured a veterans home and met the Danish ministers of defense and health. The group then traveled to London, where Shulkin and Bari spent July 15 at the

Wimbledon tennis tournament with friends. On July 16, they visited Buckingham Palace, Kensington Palace, Westminster Abbey and took a cruise of the Thames River, followed by an evening in Piccadilly Circus. Later during the week, Shulkin attended a conference in London on veterans issues.

The VA said it would update the site five days after the conclusion of every trip. The agency tied the move to other attempts at transparency since Shulkin took over as secretary. In July, the VA made public a list of employee terminations, demotions and suspensions, which is updated weekly.

[Back to Top](#)

1.6 - The Clarion-Ledger (Video): [Mississippi treating 11 Hurricane Maria victims, more coming](#) (29 September, Anna Wolfe, 849k online visitors/mo; Jackson, MS)

So far, 11 hurricane victims from Puerto Rico and St. Croix have been transported to metro Jackson hospitals in the aftermath of Hurricanes Irma and Maria.

The storms devastated Puerto Rico's hospitals, a majority of which are without electricity or fuel for generators and beginning to run out of oxygen and clean water.

"You're talking about a hospital that has one week of oxygen left, one day of drinkable water. It's a level of devastation I don't think we could ever begin to imagine," said state Department of Health spokeswoman Liz Sharlot.

The Health Department has partnered with the G.V. "Sonny" Montgomery Veterans Affairs Medical Center, Air National Guard and the University of Mississippi Medical Center to accept patients at 13 local hospitals. UMMC is treating four patients, some of whom are children and infants.

On Sept. 22, the department set up a patient reception area — a federal coordinating center at the Jackson-Medgar Wiley Evers International Airport — where doctors and nurses from the VA are assessing each patient's needs, providing any emergency care, then transporting them to a local hospital. Ambulances are on standby.

The first patients arrived Monday. By Thursday night, they'd seen 11 patients with a range of conditions, including one high-risk pregnancy, a double amputee, one on a ventilator with respiratory failure and a neonatal intensive care unit patient.

"These are serious medical needs and high-risk patients," Sharlot said. "We're just grateful we're able to do what we can."

VA Medical Center Director Dr. David Walker, commander of the federal coordinating center, described the scene at the airport as stressful, but rewarding "knowing you're helping people at their most vulnerable."

"You never know what you're going to get until the plane doors open," Walker said.

The plane ride on the commercial air ambulance is between four and six hours, at which point a patient's condition can change.

One of Walker's staffers is from Puerto Rico and hasn't been able to speak with her family. She's volunteered to do any translation at the coordinating center.

The goal is to transfer patients back home when they've been stabilized, but considering the conditions in Puerto Rico, that hasn't happened yet. Walker said he only knows of patients leaving the hospitals to stay with relatives in the United States.

The Health Department expected more arrivals Friday. Shreveport, Atlanta and Columbia, South Carolina, are also receiving patients from Puerto Rico and the U.S. Virgin Islands.

"It's not over," Sharlot said. "I think this is going to be going on for a while."

[Back to Top](#)

1.7 - The San Diego Union-Tribune: [Does a soldier's best friend belong in VA research labs? A fight at the heart of the veterans community](#) (29 September, Jeanette Steele, 494k online visitors/mo; San Diego, CA)

America loves dogs, but many veterans have an extra bond after serving with canine units on the battlefield and increasingly depending on service dogs back at home.

Now the U.S. Department of Veterans Affairs and some of the nation's largest veterans groups are in a scrap with a government watchdog organization and some in Congress over VA medical research programs that inflict harm on man's best friend in the name of science.

A VA investigation found problems at a Richmond, Virginia, program where researchers do heart surgery on dogs to study the development of cardiac abnormalities.

Techniques include inserting pacemakers and catheters into the hearts of dogs, destroying heart tissue and creating heart attacks by injecting liquid latex into an artery. At the end, dogs are killed and their tissues studied.

One of the reasons that dogs are considered good for these experiments is they are easy to train to run on a treadmill while their hearts are monitored.

As a result of botched procedures, one lead researcher was removed from the studies this spring and the VA tightened its research protocols at Richmond's Hunter Holmes McGuire VA Medical Center, one of at least three sites nationwide where the VA does invasive medical research on dogs.

Changes include additional reviews by the VA's chief veterinarian of proposed dog research, more stringent scientific scrutiny of VA funding requests involving dogs and increased frequency of site visits for VA programs that have canines, a VA official told The San Diego Union-Tribune.

These moves come atop questioning of research at the Los Angeles VA on narcoleptic Doberman pinschers. The approved protocol called for dosing dogs with antidepressants or methamphetamine, then killing them and studying how the drugs affect their brains.

Now, at the highest levels, the VA is battling to save its canine research programs, which have come under assault in Congress.

“Part of our mission is to push the envelope constantly in search of medical advancements that will help improve the lives of disabled veterans,” VA Secretary David Shulkin wrote in an opinion piece this month in USA Today.

“If this legislation passes ... it would stop potential VA canine research-related medical advancements that offer seriously disabled veterans the hope of a better future,” wrote Shulkin, a practicing physician.

A spending bill that unanimously passed the House in July would ban funding for two categories of invasive dog experimentation at the VA in the coming fiscal year.

Separately, the “PUPPERS Act” (Preventing Unkind and Painful Procedures and Experiments on Respected Species) would permanently ban money for invasive dog research by the VA.

Rep. Dave Brat, the Virginia Republican who sponsored the act, called the experiments in Richmond “horrific and inhumane” in a statement.

“These dog testing experiments at the VA are consuming limited taxpayer dollars, medical staff time and office space that could be better utilized to deliver health care for veterans,” Brat said.

But the VA has rallied an important chunk of the veterans community to its defense.

The American Legion, Iraq and Afghanistan Veterans of America and Vietnam Veterans of America have written letters to Congress in support of the VA’s canine research.

“There are many pet owners and animal lovers in the American Legion,” the legion’s statement said. “Sometimes animal research is needed for the greater good of protecting human life.”

The executive director of Paralyzed Veterans of America said he’d like to see Congress strike a balance on the issue.

“On one hand, understand and acknowledge the tremendous gains in medicine and treatment,” said Sherman Gillums Jr., in response to a query from the Union-Tribune. “On the other hand, if it is warranted, Congress should call for greater accountability and transparency to confront waste and deviation from humane protocols in scientific research funded by taxpayers.”

Dogs accounted for less than 0.05 percent of animals used in VA research in 2016, an official said. Almost all are mice or rats.

Not all veterans agree with the nation’s most established organizations.

“I’m not going to say canine research should or shouldn’t be done at all, I just don’t think the VA should do it,” said Ben Krause, creator of the contrarian website Disabledveterans.org. “VA has a hard enough time not withholding health care from veterans on a regular basis.”

A major player in this conflict is White Coat Waste Project, a four-year-old Washington, D.C. nonprofit group whose philosophy is a marriage of fiscal conservatism and animal protection sentiment. The group offers \$1,000 rewards to whistleblowers with evidence of animal abuse or wasteful spending at VA dog labs.

Founded by a Republican strategist, the group argues that taxpayers are spending over \$15 billion a year on wasteful dog, cat, monkey and other animal experiments that are irrelevant, slow and expensive.

It was White Coat Waste's complaint in March that spurred the VA's investigation of the Richmond facility. The group filed Freedom of Information Act requests for records from the McGuire VA.

"We had known that the VA was one of the few agencies conducting painful experiments on dogs. And through our research into the details of those projects, we uncovered these series of violations at Richmond," said Justin Goodman, White Coat Waste's vice president.

According to Goodman, the VA has 79 sites that do animal experiments, but only three are doing "significantly painful" research on dogs.

Aside from Richmond, the others are Stokes Veterans Affairs Medical Center in Cleveland and Zablocki Veterans Affairs Medical Center in Milwaukee.

In Milwaukee, according to the watchdog group, the VA is using 150 dogs, including beagle puppies, for lung research that includes collapsing the dogs' lungs and dissecting their necks and heads.

"The use of dogs has been decreasing in the United States," Goodman said this week.

"Most people would probably be alarmed that, in 2017, there are still 60,000 dogs being used in experiments. I think that for many people, even one dog being used in an experiment that they are forced to pay for is too many," he said, adding that research outside of federal agencies is often funded by government grants.

One expert said the VA's research is not an anomaly in the biomedical industry.

"Work with dogs is happening all over the place," said Cindy Buckmaster, chairwoman of Americans for Medical Progress, a nonprofit group that advocates for the role of laboratory animals.

"Any time they are the optimal model, they are part of the study," said Buckmaster, also a Ph.D. at Baylor University College of Medicine.

She said researchers are required to give dogs pain medication during invasive procedures, just like in human surgeries, but the majority of animal subjects are eventually killed as part of the study.

"That's because the answers are in the tissues," Buckmaster said.

The VA argues that its animal research has saved lives and will save more in the future. It issued a list of past accomplishments: development of the cardiac pacemaker, the first liver transplant, the nicotine patch, the discovery of insulin and, most recently, the first FDA-approved artificial pancreas.

White Coat Waste disputes that list as ancient history, saying the artificial pancreas is the only 21st century accomplishment of the bunch.

A University of California San Diego pathology professor said experts are going to disagree about whether dog research, and animal research in general, is effective. Dr. Lawrence Hansen, who is involved with White Coat Waste, led a successful campaign nearly 15 years ago to end surgery on dogs as a mandatory part of the medical school's curriculum.

"We have created creatures that are hard-wired to love and trust us," Hansen said. "It is a betrayal to then turn around and keep them in cages, cut them up and kill them."

To him, it comes down to an ethical question: If dog research does work to expand science, is it worth it?

It's a question Congress may take up in the coming year, with the plight and opinions of America's veterans as added weight.

Current VA research using dogs

- Studying ways of preventing lung infections in people with spinal cord injuries because they are unable to cough effectively
- Developing glucose sensors that diabetic human patients can wear to allow continuous monitoring and insulin delivery
- Understanding and treating dysfunction in the brain circuits that control breathing
- Meeting a congressional mandate to establish scientific evidence as to whether service dogs reliably reduce the symptoms of post-traumatic stress disorder
- Gaining insights into narcolepsy through studies of a unique colony of naturally narcoleptic dogs
- Studies to develop novel treatments for human heart conditions like atrial fibrillation and heart failure

2. Veteran and Employee Experience

2.1 - USA Today: [VA Secretary David Shulkin discloses official travel details](#) (29 September, Jessica Estepa, 36.7M online visitors/mo; McLean, VA)

Veterans Affairs Secretary David Shulkin announced Friday that his department would disclose details about his official travels, in an attempt to be transparent as the travels of other members of the administration come under scrutiny.

The department will regularly update a page that includes any travels by private and government aircraft, as well as itineraries of official international and domestic trips.

"Under this administration, VA is committed to becoming the most transparent organization in government, and I'm pleased to take another step in that direction with this move," Shulkin said in a statement. "Veterans and taxpayers have a right to know about my official travel as secretary, and posting this information online for all to see will do just that."

Shulkin's announcement comes as Health and Human Services Secretary Tom Price faces criticism for his own use of private planes for official business. Price has apologized for the chartered flights and vowed to put an end to the practice.

According to the VA, Shulkin has not yet taken any private aircraft for official business.

He has taken six domestic trips on government aircraft, four of which were on Air Force One.

He has also taken two international trips: a September trip to Toronto for the Invictus Games and another to Copenhagen and London. The Copenhagen and London trip included tours of palaces and a river cruise down the Thames.

The Washington Post reported that the VA's decision to start disclosing Shulkin's travels came after it obtained a copy of the Europe itinerary.

The Post reported that the department covered the airfare of and provided per diem for Shulkin's wife, Merle Bari. The agency told the Post that she was traveling on "approved invitational orders."

2.2 - ABC News: [VA secretary spent half of official London trip sightseeing](#) (29 September, Luis Martinez, 24.1M online visitors/mo; New York, NY)

Veterans Affairs Secretary David Shulkin flew a commercial airline to London this past July to attend a veterans conference, but half his time there was spent on sightseeing and a stop at Wimbledon tennis tournament.

Shulkin's wife's commercial travel costs were also paid for by the federal government because she was under "approved invitational orders"

As questions have swirled about other Trump cabinet officials' use of government aircraft, the Department of Veterans Affairs has decided that in the interest of transparency it will post all of Shulkin's travel details on a VA website.

Those documents show Shulkin has flown six times on U.S. military aircraft. Four of the flights were on Air Force One as he accompanied President Trump, one was on Air Force Two accompanying Vice President Pence and a flight earlier this week accompanying the first lady to this week's Invictus Games in Toronto. Shulkin has never flown a private plane to travel for his official duties, according to a Veterans Affairs spokesman.

The Department also posted the itineraries of Shulkin's trip in mid-July to Denmark and the United Kingdom and earlier this week to Canada with first lady Melania Trump.

Shulkin and his delegation of six, including his wife Dr. Merle Bari, traveled commercial airlines to Copenhagen and London.

But that trip itinerary to Denmark and London has raised questions about the amount of time Shulkin spent sightseeing.

The itinerary shows that on July 12, the first day of his first three days in Copenhagen, Shulkin visited multiple tourist stops. The next two days were spent on meetings with Danish government and health care officials to discuss veterans issues.

The first half of the six-day stay in London was dedicated to sightseeing before his full participation in a two-day veterans summit.

Shulkin arrived in London on Saturday, July 15 and according to the itinerary he spent the afternoon at the "Wimbledon Tennis Tournament with Friends." That would have been the day of the Women's singles final.

He spent the next two days visiting notable tourist sites in London including Buckingham Palace, Kensington Palace, Westminster Abbey, St. Paul's Cathedral, the Tower of London and took a "Thames River cruise to Greenwich Pier/Followed by dinner/evening in Piccadilly Circus."

But from the afternoon of Wednesday, July 19, through Friday, July 21, Shulkin was immersed in full-day participation in the veterans conference.

"All activities on the itinerary were reviewed and approved by ethics counsel," said Curt Cashour, the VA Press Secretary.

Cashour said the rules permit government reimbursement for a spouse's "temporary duty" travel expenses.

According to a VA press release, the department is the first federal agency to make public the travel details of its top official. "The information will also include what VA staff and spouses accompany him on each trip, if any, but for security reasons, members of the Secretary's security detail will not be listed by name or number," said the release.

"Under this Administration, VA is committed to becoming the most transparent organization in government, and I'm pleased to take another step in that direction with this move," Secretary Shulkin said. "Veterans and taxpayers have a right to know about my official travel as Secretary, and posting this information online for all to see will do just that."

According to the release, Shulkin "pointed to the move as the fourth major step in long-sought transparency and accountability actions at VA." Previous actions include the VA's public listing of wait times and quality/satisfaction data at all VA medical centers, adverse employee actions and employee settlements.

2.3 - Politico: [Who will replace Tom Price? A dozen names are circulating as possible successors](#) (29 September, Joanne Kenen and Jennifer Haberkorn, 23.9M online visitors/mo; Arlington, VA)

Tom Price hadn't even stepped down when the Washington policy world was buzzing about who was likely to replace him.

A dozen names are being talked about, including several belonging to those already serving in the administration. Of course, President Donald Trump often does the opposite of what insiders expect.

The rumored short-list includes former Sen. Judd Gregg (R-N.H.), who would sail through Senate confirmation but would probably be considered too moderate on Obamacare, to Dr. Mehmet Oz, a cardiothoracic surgeon known through his talk show. Other current or former members of Congress who could be considered include Rep. Fred Upton and former Rep. Dave Camp.

Here are a few others who may be in the mix:

[...]

David Shulkin: The VA secretary is a Trump favorite, and the only cabinet nominee to be unanimously confirmed. However, Shulkin has come under criticism for combining leisure with business on his official travel — he attended a Wimbledon championship tennis match, toured Westminster Abbey and took a cruise on the Thames while meeting this summer with European officials about veterans' issues, The Washington Post reported Friday. Shulkin did fly commercial but his wife's expenses were covered by taxpayers, according to the Post.

A physician and former health administrator, Shulkin is also the only member of Trump's cabinet who is a holdover from the Obama years; he served as the VA's undersecretary of health in that administration. Now he's trying to get the massive, scandal-plagued VA health care back on track to serve around 9 million Americans a year. He has made the agency's performance and improvement programs public and transparent. He still sees patients — in person and via telemedicine.

[...]

[Back to Top](#)

2.4 - The Huffington Post: [Yet Another Trump Administration Official Took Questionable Liberties With Work Travel](#) (29 September, Mollie Reilly, 23M online visitors/mo; New York, NY)

Veterans Affairs Secretary David Shulkin used his downtime on a recent international trip for several leisure activities, including a tennis match and river cruise, The Washington Post reported Friday.

According to the report, Shulkin spent roughly half of a 10-day trip to the U.K. and Denmark to sightsee, watch a high-profile Wimbledon match and take in other activities more typical of a vacation than a work trip.

Shulkin flew commercial for the July trip, a notable difference from other officials who have recently come under scrutiny for opting to use charter or military planes for their travel. However, the government did pay for his wife's airfare as well as some of the cost of her meals while abroad.

Read the full report [here](#).

When asked for comment on the Post story and the agency's ethics review process, a Department of Veterans Affairs spokesman pointed to a Friday announcement that the agency will now make all of Shulkin's travel itineraries publicly available and will note what kind of aircraft he used on each trip.

The revelations about Shulkin, a holdover from President Barack Obama's Cabinet, are just the latest in a series of reports regarding Trump administration officials' conduct and financial choices while traveling on official business.

Health and Human Services Secretary Tom Price has received by far the most criticism for his use of private planes and military aircraft to travel both domestically and abroad. According to a series of reports in Politico, the secretary's travel has come at an expense of more than \$1 million to taxpayers.

On Thursday, after President Donald Trump said he was "not happy" with Price, the secretary announced he would no longer take private planes and vowed to reimburse taxpayers for the expenses he's incurred. However, he plans to pay just for "his seat" — or about \$50,000.

Interior Secretary Ryan Zinke has also faced criticism for chartering a plane to travel from Las Vegas to Montana, costing taxpayers more than \$12,000.

Environmental Protection Agency Administrator Scott Pruitt and Treasury Secretary Steven Mnuchin are also under scrutiny for similar travel expenses.

The White House has said it's looking into these expenses, and on Wednesday the House Oversight and Government Reform Committee announced it had requested information from 24 federal agencies on officials' travel.

"Under 5 U.S.C. § 5733, official travel on the part of federal employees must be 'by the most expeditious means of transportation practicable' and 'commensurate with the nature and purpose of the [employee's] duties,' and by no means should include personal use," reads a letter from the committee's leadership to the agencies.

[Back to Top](#)

2.5 - The Hill: [Trump VA chief went sightseeing, shopping with wife on government trip: report](#) (29 September, Brandon Carter, 11.8M online visitors/mo; Washington, DC)

Veterans Affairs Secretary David Shulkin spent nearly half his time on a recent international trip sightseeing and shopping with his wife, according to The Washington Post.

Shulkin traveled to Europe in July to attend a conference in London with representatives of several countries on veterans' health issues, as well as a series of meetings in Denmark.

The VA chief's traveling party included his acting undersecretary of health and her husband, his chief of staff, another aide and a security detail, according to the Post.

Shulkin's wife, who also accompanied him on the trip, had her airfare paid for by the government because she was traveling on "approved invitational orders," a VA spokesperson told the Post. Shulkin's wife also received a per diem for her meals.

The newspaper reports Shulkin attended a Wimbledon tennis tournament match and visited multiple palaces in both London and Denmark. Shulkin also reportedly took a cruise on the River Thames in London during the trip.

Shulkin took commercial flights for the trip and sat in coach on at least one flight, according to the Post.

VA press secretary Curt Cashour told the Post that the entire itinerary for Shulkin's trip was "reviewed and approved by ethics counsel."

"These were important trips with our allies to discuss best practices for taking care of veterans," Cashour told the Post. "The secretary has been transparent on his downtime activities that were similar to what he would have done with his family over a weekend in the U.S."

In a statement Friday, the VA said it would begin making public a list of Shulkin's official travel, including trip itineraries and his use of private and government aircraft.

"Veterans and taxpayers have a right to know about my official travel as Secretary, and posting this information online for all to see will do just that," Shulkin, a holdover from the Obama administration who President Trump tapped for the top VA spot this year, said in the statement.

Other Trump administration officials have come under fire for their travel while in office.

Health and Human Services Secretary Tom Price has reportedly racked up over \$1 million in travel costs with his use of private and military planes since May. Price said Thursday he would reimburse taxpayers just under \$52,000 for charter jet travels he's used for government business.

President Trump said Wednesday he was "not happy" with Price's use of private planes and said "we'll see" when asked if he planned to fire Price.

Interior Secretary Ryan Zinke and Environmental Protection Agency Administrator Scott Pruitt have also come under scrutiny for their use of private aircraft for government business in recent days.

[Back to Top](#)

2.6 - Washington Examiner: [VA secretary saw Wimbledon match during taxpayer-funded trip to Europe: Report](#) (29 September, Melissa Quinn, 4.8M online visitors/mo; Washington, DC)

Secretary of Veterans Affairs David Shulkin and his wife, accompanied by other VA officials, attended a tennis match at Wimbledon, toured Westminster Abbey, and cruised the Thames River as part of a taxpayer-funded, 10-day work trip to Europe this summer, according to a report.

Shulkin and a group of six people, including his wife, traveled to London and Denmark in July, where Shulkin met with Danish and British officials to discuss veterans' health issues, according to an itinerary of the trip obtained by the Washington Post. The VA secretary traveled in coach on a commercial flight during at least one part of the trip.

The VA secretary attended a conference in London on July 19, one previous secretaries have also attended, that included representatives from Britain, Canada, Australia and New Zealand. He also scheduled a series of meetings in Copenhagen, Denmark, that took place from July 12 to July 14.

On two nights between the official events in London and Copenhagen, Shulkin spent one at a ceremony where a British veteran who served in Afghanistan was honored, and another meeting with British Prime Minister Theresa May.

But during the day, Shulkin, his wife, Merle Bari, Acting Undersecretary For Health Poonam Alaigh, her husband, Shulkin's chief of staff, and another aide, as well as a security detail, saw the sights and shopped.

The government covered the cost of Bari's airfare and gave her a per diem for meals, the VA told the Washington Post. Bari, the agency said, was traveling on "approved invitational orders."

"These were important trips with our allies to discuss best practices for taking care of veterans," VA spokesman Curt Cashour told the Washington Post. "The secretary has been transparent on his down-time activities that were similar to what he would have done with his family over a weekend in the U.S."

It's unclear whether the government or Alaigh covered the expenses for Alaigh's husband.

According to the itinerary of the trip, Shulkin had no official business scheduled during the days in between his meetings in London and Copenhagen.

Rather, Shulkin and his group attended the women's final at Wimbledon, where Venus Williams lost to Garbine Muguruza.

The group also visited two palaces in London, Buckingham Palace and Kensington Palace, and two in Copenhagen, Christiansborg Palace and Amalienborg Palace.

Revelations of Shulkin's trip come as four of President Trump's Cabinet officials are under scrutiny for their use of private and government planes to travel.

Secretary of Health and Human Services Tom Price is facing calls for his resignation after it was revealed he's taken at least 24 trips aboard private jets, as well as trips on military aircraft, costing taxpayers more than \$1 million.

Treasury Secretary Steven Mnuchin's travel on government planes has also come under fire.

Both Price and Mnuchin are facing probes from the inspectors general at their respective agencies, and numerous congressional committees are requesting information on administration officials' travel.

Interior Secretary Ryan Zinke and EPA Administrator Scott Pruitt have also traveled via private or military aircraft.

2.7 - Pittsburgh Post-Gazette: [Pittsburgh VA nurse is finalist for national caregiver award](#)
(29 September, Gary Rotstein, 4.8M online visitors/mo; Pittsburgh, PA)

A nurse for the VA Pittsburgh Healthcare System is one of six national finalists for an annual award given to a medical professional who shows an exemplary caregiving approach on the job.

Victor Fagan, a licensed practical nurse from Butler, won recognition from among nearly 200 nominees who were submitted to the Boston-based Schwartz Center for Compassionate Healthcare. It will announce the winner of its 2017 National Compassionate Caregiver of the Year Award at a dinner on Nov. 16.

Mr. Fagan has worked with veterans the past five years at the VA's primary care clinic on University Drive in Oakland. He was nominated for the Schwartz Center award by co-workers who noted the unusual level of compassion and respect he brings to his role of helping others.

Examples of his efforts that were cited included his purchasing shoes for a low-income veteran's child; connecting a homeless veteran to helpful resources; celebrating patients' milestones such as birthdays; working to develop a Wall of Heroes that will honor local vets; and encouraging his fellow staff to do their own similar good work.

"Victor is always thinking of others first and incorporates caring and respect into every interaction with the veterans for whom he provides care," Christin Durham, the VA Pittsburgh primary care nursing manager, wrote in endorsing Mr. Fagan for the award.

[Back to Top](#)

2.8 - PennLive (Video): [VA chief mixed business with pleasure at taxpayer expense: Media report](#)
(29 September, Ivey DeJesus, 3.1M online visitors/mo; New Bloomfield, PA)

President Donald Trump's veterans affairs chief is the latest administration official in hot water for reportedly tapping into taxpayer money to pay for vacation outings and non-official business.

Veterans Affairs Secretary David Shulkin in July took in a Wimbledon championship tennis match and a Thames River cruise on taxpayer money. That's according to a report published Friday by The Washington Post.

Shulkin was in Europe for 10 days for meetings with Danish and British officials about veterans' health issues, but during that time, the Post reports, he and his wife spent about half their time sightseeing, including shopping and touring historic sites.

The Washington Post cited an itinerary obtained by the news outlet, and which was confirmed by a U.S. official familiar with it.

Shulkin last week visited the Harrisburg area, meeting with veterans at a local VFW to outline what he said was the right direction for the embattled agency. Shulkin said to veterans that accountability was one of his top priorities.

News of Shulkin's multi-purpose trip comes on the heels of that of Health and Human Services Secretary Tom Price, who is at the center of White House- approved trips outside the bounds of protocol. The Trump administration this spring and summer approved the use of military aircraft for multi-national trips by Price to Africa, Europe and Asia at a cost of more than \$500,000 to taxpayers.

The overseas trips bring the total cost to taxpayers of Price's travels to more than \$1 million since May, according to a POLITICO review.

Price this week pledged to reimburse the government for the cost of his own seat on his domestic trips using private aircraft -- reportedly around \$52,000 -- but that would not include the cost of the military flights, Politico reported.

Shulkin's six-person traveling party included his acting undersecretary of health and her husband, his chief of staff and another aide, the Post reports. A security detail of as many as six agents was assigned to the entourage.

The Post reported that the VA said that the government paid airfare for Merle Bari, Shulkin's wife, because she was traveling on "approved invitational orders." The government also provided a per diem for her meals, the agency said.

Wimbledon tickets for final matches can run into the thousands of dollars - as can a river cruise. Shulkin also toured Westminster Abbey. Those tickets run about £22 (sterling) or approximately \$30 a person.

[Back to Top](#)

2.9 - Military Times: [Amid Cabinet controversies, VA promises to post secretary's travel details online](#) (29 September, Leo Shane III, 2.1M online visitors/mo; Springfield, VA)

WASHINGTON — In response to the growing scandal of Cabinet officials using pricey private aircraft for business trips, Veterans Affairs officials announced Friday they will post details of all official travel by department Secretary David Shulkin online to provide transparency about his travels.

“Veterans and taxpayers have a right to know about my official travel as secretary, and posting this information online for all to see will do just that,” Shulkin said in a statement.

The move comes one day after Health and Human Services Secretary Tom Price announced he would reimburse the government about \$52,000 for charter flights made in recent months for government duties, a sum that amounts to only a small portion of the flights' costs.

The White House announced Friday afternoon that Price resigned.

Reports of Price's charter flights have prompted congressional investigators to look into travel expenses for all of Trump's Cabinet.

The VA's announcement also comes on the same day as a Washington Post article that details a trip Shulkin and his wife took to Europe last summer that included government business but also sightseeing and other non-work activities.

The VA told the Post that the government paid for Shulkin's wife's airfare because she was traveling on “approved invitational orders.” The VA added that all of Shulkin's activities were reviewed and approved by ethics counsel. The couple flew commercial, including at least one leg in coach, according to the Post.

VA officials said Shulkin has not used any private aircraft for travel to date, but will list them on the department's website if he employs that option in the future.

In addition, the new site will list all use of government aircraft by the secretary, along with itineraries of all official trips. That information will be available within five days of any travel, starting in mid-October.

Officials will start posting some of those details on the VA's “Secretary Travel” site later today.

Shulkin has used government aircraft for transportation six times so far this year. Five of them were aboard Air Force One, accompanying the president to events.

The sixth was a recent trip to the Invictus Games in Toronto, where he traveled with first lady Melania Trump to see wounded U.S. troops and veterans participate in athletic competitions against teams from other countries.

Shulkin has made department transparency one of the key focuses of his department reform efforts. Earlier this year, the department began posting online information on medical center wait times, employee firings and workplace settlements.

[Back to Top](#)

2.10 - Providence Journal (The Enterprise): [Providence VA official relieved of duties amid allegations of racism, homophobia](#) (29 September, Paul Edward Parker, 1.2M online visitors/mo; Providence, RI)

A manager at the Veterans Affairs Regional Office in Providence has been relieved of his duties pending disciplinary action, following a complaint from a co-worker that he created a “toxic work atmosphere.”

Stephen V. Pina, the Veterans Services Center manager, who also has been embroiled in controversy after a Facebook post suggesting that New England Patriots players who knelt during the national anthem on Sunday were dancing monkeys, is “no longer engaged in processing benefits claims,” according to Mark Ramos, a spokesman for the Providence VA office.

Ramos said that disciplinary action against Pina has been proposed and that, to afford due process rights, it can’t be imposed for 15 business days. Ramos said he was not aware of the nature of the proposed discipline. In the interim, Pina has been assigned to other job duties.

Peter Rogers, who was a human resources specialist at the Providence office, said he left for another government job two years ago due to insensitive remarks made at work by Pina.

“The work environment there is awful because of him,” said Rogers, who now works for the U.S. Department of Homeland Security.

Rogers said he is an openly gay veteran who served 23 years in the military, including a tour in Afghanistan as an air traffic controller for the Air Force.

The 44-year-old Virginia native said he recalled one moment when he was driving Pina and other colleagues to an event at a VFW in Warwick. Rogers claimed that Pina made homophobic remarks during the ride.

“He was pounding on the dashboard, yelling all kinds of obscenities and f-bombs,” said Rogers. “I was completely blown away by his behavior.”

Pina, who lives in Brockton, Massachusetts, landed in hot water this week after making a comment under a Facebook story about Patriots players who knelt during the national anthem on Sunday. In the post, Pina called the players “turds” and added, “dance monkey dance.”

Pina has since resigned from his position on the Brockton Parks and Recreation Commission, after Mayor Bill Carpenter called on him to do so. A Pop Warner football team, the Brockton Junior Boxers, said Pina had stepped down as a coach after the youth football league made a statement calling for him to do so.

Pina received a \$120,000 salary last year as manager of the Veterans Service Center, overseeing 157 government employees at the downtown office on Westminster Street.

[Back to Top](#)

2.11 - KATV (ABC-7, Video): [Troubles at the VA: Nurses speaking out about culture](#) (29 September, Elisabeth Armstrong, 448k online visitors/mo; Little Rock, AR)

Two former nurses who have filed EEO complaints against the CAVHS are speaking out about problems. In July, Channel 7 brought you this report out of the VA. In it, some thirty nurses filed a complaint against the hospital - alleging that under-staffing was impacting patient care.

After that story aired, more than a dozen staffers reached out to the newsroom, saying that poor management, unsafe working conditions, even claims of harassment are behind the issue.

Lyn Gardner and Brandy Ballard: both former nurses at the VA, both saying there's something wrong with the Central Arkansas Veteran's Healthcare System. Lyn is a veteran who served in the military for six years, before pursuing her dream of becoming a nurse in the VA system.

But she says that dream, turned into a nightmare: "It actually upsets me to this day, talking about it, because it was very traumatic."

In her claim she alleges that she was subjected to a hostile work environment - dealing with screaming supervisors, limited equipment, and in one case, an issue where she passed out while assisting during surgery, and never received medical attention.

"I walked out of the unit, pretty much all on my own, receiving no treatment. And that's very upsetting. As a veteran, and as an employee of a facility that's supposed to care for veterans."

Lyn says, it's this culture that creates problems for patient care: "Not having the support from management, not being able to articulate issues, is scary, because you're dealing with people's lives." Adding, changes need to be made.

Brandy Ballard agrees. She has several veterans in her family, and credits the VA with providing her grandfather life-saving cancer treatment. But she says her family members are now expressing fear about the care they're receiving.

"Another family member, more recently, voiced his concerns to me about that very VA because he didn't feel he would get the treatment he deserved with stage 4 cancer," she explains.

She says the culture at the VA has truly taken a toll on her life, alleging that nurses are punished for speaking out about patient care: "It really has affected my family. I mean, a failed marriage as a result of this, just mental anguish, physical ailments as a result of the constant stress."

This is why she says she filed a complaint. And these nurses are not the only ones - two other staffers at the VA provided me with copies of their EEO complaints. None of these have been ruled on yet, as the EEO is currently investigating several of the claims.

So, Channel 7 dug into data out of the national VA Administration. It shows that Central Arkansas Veterans Healthcare System has one of the highest nurse turnover rates in the entire VA System. They're just under the 90th percentile.

But Medical Director Dr. Margie Scott, says this is not due to workplace harassment or discrimination: "Well if you look at our exit interviews, Elisabeth, for nurses who are leaving the workforce, the top number of nurses who are leaving is due to number one taking a higher level position, and advancement in position, or number two retiring... The third most common is actually to go back to school."

Channel 7 requested those numbers and the VA complied 47% of employees said they left for those reasons (along with "relocating with a spouse") during exit interviews. But KATV also took a look at employee satisfaction scores.

When it comes to employee satisfaction, the Little Rock VA comes in at 3.8 out of 5. Dr Scott breaks down this statistic, "Over 60% of our staff think this is not only a good, but a great place to work. There's always a spectrum in any survey of low scores and high scores, but a 3.8 out of 5 is an excellent score. It's not where we want to be - we always want to be higher - so we'll continue to work on that."

But a 3.8 is also around the 50th percentile - that means 50% of other VA facilities have higher employee satisfaction rates.

And when it comes to veterans' experience, in the four categories the VA looks at, Central Arkansas comes in near the bottom of each. When it comes to comprehensiveness of care, the system scores as one of the worst.

Channel 7's Elisabeth Armstrong asked, "I probably spoke to 15 or twenty people. and a number of them said, 'I'm a veteran or I have veterans in my family, and I would not take them to the Little Rock VA. Does that concern you?'"

Dr. Scott says, "Absolutely that concerns me, and I would love to talk to those individuals and hear what they have to say as far as ways we can improve our work environment."

Dr. Scott and Acting Deputing Medical Center Director Salena Wright-Brown say the VA is implementing several new ways for employees to make their voices heard: through listening sessions, surveys, a video blog, and being selected as an "Innovation Hub."

"I think that's the key," explains Dr. Wright-Brown. "To open those communication avenues, we reassure people that nothing is going to happen negative, only positive - only improvement for our veterans."

The VA has filled 102 of the 149 open nursing positions since our first piece aired in July. However, we do not have numbers on how many have left since that time.

The system held another job fair last Saturday.

*Correction: An earlier version of this story stated the job fair was this upcoming weekend. However, it was last weekend, and officials say it was successful.

[Back to Top](#)

2.12 - WQAD (ABC-8, Video): [Moline man shocked after job training center for veterans shuts down](#) (29 September, Chris Minor, 450k online visitors/mo; Moline, IL)

GARLAND, Texas - A Moline, Illinois man is one of more than 300 veterans left in the dark after a job training school they paid for through the GI bill abruptly shut its doors.

"Three weeks before graduation, we were told goodbye. They sent a senior instructor around to each class and he just came in front of the school and said, 'I need everyone to pack your bags, the schools been officially shut down and everyone needs to vacate the premises' ," said Dallas Wild, who had enrolled in the career center after hitting dead ends looking for a decent paying job in the Quad Cities.

The Retail Ready Career Center catered to veterans interested in a career in heating and air conditioning.

"They called and offered us a \$23 dollar an hour job after we got out, guaranteed job placement," said Wild.

Tuition was \$21,000 for the six week program, which included food, lodging, and round-trip air-fare. Most tuition bills were paid through the GI bill.

The Department of Veterans Affairs is investigating the job training center for unknown reasons.

The owner John Davis, is seen on video telling the students that the investigation was launched after a former employee who embezzled money from a school fund went to authorities.

Wild says he had hoped to graduate so that he could find a better job in the Quad Cities, and is uncertain what happens next.

"I spent 30 minutes on the phone with the VA. It seems they don't want to hand out information because of the investigation. Everyone is in the dark. I plan on trying to find a local company that supports vets that will give me a shot," he said.

[Back to Top](#)

2.13 - FedSmith: [VA to Begin Disclosing Agency Secretary's Official Travel](#) (29 September, Ian Smith, 277k online visitors/mo; Washington, DC)

The Department of Veterans Affairs announced today that it will begin publishing all of the agency secretary's official travel on its website.

The lists include all official travel taken by Dr. David J. Shulkin since January 20, and the site will be updated within five days after the conclusion of each trip.

The webpage (which will be available at <http://www.va.gov/opa/secvatravel>) will list the use of private and government aircraft by the Secretary, and also itineraries of international and domestic trips. The details on domestic trips will be added to the website by October 15.

The information posted will also include what VA staff and spouses accompany Shulkin on each trip, if any, but for security reasons, members of the Secretary's security detail will not be listed by name or number.

Shulkin notes that the VA is the first agency to make this kind of data public. The agency also recently began posting all disciplinary actions taken against agency employees on its website in an effort to spotlight actions the agency is taking to reform its culture.

“Under this Administration, VA is committed to becoming the most transparent organization in government, and I’m pleased to take another step in that direction with this move,” Secretary Shulkin said. “Veterans and taxpayers have a right to know about my official travel as Secretary, and posting this information online for all to see will do just that.”

Increased Scrutiny of Agency Officials’ Travels

The announcement from the VA comes right after an article appeared in the Washington Post that was critical of a recent trip that Shulkin took to Europe with several individuals, including his wife, that mixed business and pleasure, the latter part including shopping trips and a Wimbledon tennis match.

The investigation conducted by the Post noted that although all aspects of the trip were approved by the agency, the VA paid for the airfare and meal per diems for Shulkin’s wife. It noted, however, that Shulkin flew on a commercial aircraft with at least one leg of the trip in coach seating.

VA press secretary Curt Cashour told the Post, “These were important trips with our allies to discuss best practices for taking care of veterans. The secretary has been transparent on his down-time activities that were similar to what he would have done with his family over a weekend in the U.S.”

The Post takes at least some credit for the VA now disclosing details about the Secretary’s travel. “In response to questions from the Post, VA announced Friday that the agency will begin posting details of the secretary’s travel online, including itineraries, and disclosing any use of government or private aircraft. That information had not previously been disclosed publicly,” according to the Post article.

The VA’s announcement also comes after news that Health and Human Services Secretary Tom Price came under heavy criticism for trips he took using a private charter jet using taxpayer money. Price has said he will repay the Treasury for costs incurred from the trips and also resigned from his position as HHS Secretary over the situation.

[Back to Top](#)

2.14 - Leavenworth Times: [Sentencing continued for former VA physician assistant](#) (29 September, 46k online visitors/mo; Leavenworth, KS)

A former physician assistant who was convicted of sexually abusing patients at the Leavenworth veterans hospital will not be sentenced until November.

Mark E. Wisner was scheduled to be sentenced today in Leavenworth County District Court. But the sentencing and arguments for post trial motions have been continued until Nov. 3.

Last month, a jury convicted Wisner of one felony count of aggravated sexual battery, one felony count of aggravated criminal sodomy and three misdemeanor charges of sexual battery. The crimes occurred between 2012 and 2014 while Wisner was working at the Eisenhower VA Medical Center.

The judge in the case had something come up, and he had to reschedule all of the cases that were on his docket for Friday, according to Assistant County Attorney Michael Jones.

[Back to Top](#)

2.15 - Pahrump Valley Times: [Plaques at Pahrump VA clinic recognize veterans of U.S. armed forces](#) (29 September, Jeffrey Meehan, 1k online visitors/day; Pahrump, NV)

A group of local veterans of the U.S. armed forces gathered to recognize the installation of several plaques at the Pahrump VA Community Based Outpatient Clinic in September.

Each plaque bore the symbol of one of the five branches of the U.S. armed forces and another was hung for prisoners of war.

The group, led by U.S. Army veteran Bernie Cusimano, gathered at the Pahrump VA clinic at 220 Lola Lane on Sept. 22, 2017 to recognize the plaques being hung. Cusimano was joined by several other veterans who worked to see the plaques hung at the clinic.

"We started it, and I want to acknowledge all the people that started it and thank everybody," Cusimano said.

The group was also joined by Nye County Commissioner John Koenig, District II, former Nye County Commissioner Frank Carbone and Michelle Leavitt, executive assistant/business license tech for the town of Pahrump.

The symbols were hung behind the check-in area at the Pahrump VA clinic in order of the Army, Navy, Marines and the Air Force, from left to right, which is mandatory. The prisoners of war symbol sits on another wall adjacent to the other symbols.

Cusimano said it was the end of the long process.

It took nearly two years for the group to realize the end goal, he said.

Some of the original veterans involved in the process were Pahrump Veterans of Foreign Wars Commander Tom Vick, Cusimano and Kyler Samuel Escalera, just to mention a few.

The cost of the plaques was funded by the town of Pahrump, which cost roughly \$200 each or a total of \$1,200.

3. Access to Healthcare

3.1 - WBBM (CBS-2, Video): [2 Investigators: Disabled Vets Face Tough Parking At VA Hospital](#) (29 September, Dave Savini, 27.5M online visitors/mo; Chicago, IL)

A major problem at Hines VA Medical Center: Some sick and wounded veterans are struggling to get to their medical appointments because of parking violators.

CBS 2's Dave Savini has the story.

James Dahan, a Marine Corps veteran, gets angry when fellow wounded vets struggle to find a parking spot.

"It's clearly a violation. They need to be ticketed," Dahan says of a vehicle illegally parked near the entrance to the VA.

He says seriously injured veterans going to the Edward Hines, Jr. VA Hospital in Maywood are forced to wheel or walk long distances. This is because parking spots for those with disabilities are taken by motorists not permitted to use them.

"That really ticks me off," Dahan says.

The 2 Investigators found plenty of examples of cars, without required placards in windows, snagging the handicapped-designated spots. Even the lot reserved for spinal cord injury victims had problems. Yet CBS 2 never saw a single ticket issued.

"Seeing veterans pushing from the back of the parking lot with a wheelchair or a walker, it's disgusting," Dahan says. "They deserve a lot better than that."

There is valet service, but those lines can be long and cause delays, he says.

"If you're 15 minutes late, they cancel your appointment," Dahan says.

CBS 2 also found numerous fire lane and loading zone violators, too.

Dahan injured his foot while serving in Iraq. He has had three surgeries and suffers from nerve damage. Because of his time using a wheelchair, Dahan says he can understand how difficult it can be when parking.

"Transferring in and out of a wheelchair takes a lot more than people can understand," he says.

The 2 Investigators found a vehicle parked next to a disabled spot, in a loading zone designed to help a person in a wheelchair get in and out of their vehicle.

"They do that all the time," one driver with disabilities says.

Dahan says Hines VA needs to better patrol the lots and ticket illegal parkers. He also said they need more spaces and could use a parking structure, similar to those found at other hospitals.

A spokesperson from Hines says they are now upgrading the spinal cord lot with new signs and new striping. They are also considering hiring more valet workers, along with opening an overflow lot for employees.

The hospital's full statement:

“At Hines VA Hospital we provide outpatient care to about 2,000 Veterans on an average week day and parking is often their first and last experience with the VA. With several construction projects underway, parking is stretched to its capacity, even with more than 250 handicap accessible parking spaces available. We have 76 accessible parking spaces in our dedicated lot for Spinal Cord Injury rehabilitation. We also offer free valet services to all of our patients.

We are monitoring the parking situation and have recently taken additional steps that include:

- * Making every attempt to complete clinic visits when patients are delayed because of parking
- * Opening an overflow gravel parking lot for employees to help ensure patients and visitors have access to the most convenient spaces
- * Adding signage that identifies where patients can find additional parking and promoting the availability of free valet parking for our patients and visitors
- * Working with our volunteers to provide more frequent shuttles for patients parking in more distant lots
- * Upgrading handicap parking in our Spinal Cord Injury parking lot (additional striping & signage)

We are considering additional valet staff as needed and looking at the possibility of adding another gravel lot on the north end of the campus.

As our construction projects continue to progress, we will continue to inform our patients of any impact on parking areas via on-site signage, direct mail, social media and face-to-face communications.”

3.2 - The News & Observer: [Vietnam vet happy to be back in Durham's VA hospital, but for how long?](#) (29 September, Thomasi McDonald, 3.9M online visitors/mo; Raleigh, NC)

DURHAM - A Vietnam veteran and double-amputee said things are “perfect” now that he is back in Durham’s Veterans Administration Medical Center, where he has lived for a little more than three years.

But James Donald Francis, 69, said he’s worried because VA officials have not told him or given him any documentation about how long he will be able to stay at the VA’s Community Living Center.

“I haven’t signed anything,” he said. “I could be here for a good night’s sleep and the next morning they could put me out of here. I haven’t seen anything. I’m in limbo. That’s where I am.”

Francis spent two days this week staying in the lobby of the facility. He refused to leave when the VA told him he had to go to an assisted living facility.

Durham VA officials have not commented about where Francis will be staying in the future, except to say it probably won’t be at their facility.

A statement from the Durham VA on Friday afternoon said, "Prior to release, we provided Mr. Francis several assisted living options within the community, however, over time it became apparent that he did not feel comfortable with those choices and wished only to remain at Durham VA. Medical care and treatment is ever-changing and that transition at times can be very difficult for our patients. We will continue to work side-by-side with Mr. Francis to provide him the proper care he has earned and deserves while we search for a suitable follow-on solution that meets his health and social needs."

Francis lost his legs after he was stricken with Agent Orange-related diabetes while fighting in Vietnam.

Sharonda Pearson, a Durham VA spokeswoman, said Francis, who undergoes dialysis treatment three times a week at the VA hospital, no longer met the medical criteria for acute in-patient care. He was discharged Monday. Francis said he returned from dialysis that day to find the door to his room locked and his belongings stuffed in several bags.

Francis then camped out in his motorized wheelchair at the patient entrance from Monday until Wednesday. By late Wednesday afternoon, the VA had a change of heart and said he would be allowed to move back into the hospital's community-based living center, at least momentarily.

The combat veteran is currently living on the second floor of the Community Living Center.

"Everything is going fine right now, for the next five minutes," he said Thursday. "You know how things can change."

He said he has been able to assume the daily routine he had before his discharge Monday.

According to the U.S. Department of Veterans Affairs website, the Community Living Center resembles "home" as much as possible. There are activities for veterans of all ages and family friendly places for visiting. Veterans are invited to decorate their rooms, and pets are allowed to visit or live at the facility.

The website said veterans may stay for a short time or, in rare instances, for the rest of their life, while receiving a nursing home-level of care that includes help with activities of daily living such as bathing and getting dressed.

On Thursday, a nurse visited Francis' room, provided him with a bedpan and rolled him to the side so he could relieve himself. The nurse, after bathing and clothing him, hoisted Francis out of bed and into his wheelchair. He rolled into the bathroom to brush his teeth and shave before going to breakfast. He was given an insulin shot, and his blood sugar level was checked for the first time since Monday.

"I been listening to the blues, but mostly talking to people here who I hadn't seen. It's been pretty much a normal day," he said. "But once I go to the bathroom and come out, I don't know if my bags are going to be packed up or what."

[Back to Top](#)

3.3 - Newsday (Video): [House vet chair Roe tours Northport VA after maintenance issues](#)
(29 September, Martin C. Evans, 3.2M online visitors/mo; Melville, NY)

The head of the House Committee on Veterans Affairs came to Long Island for an up-close look at the troubled Northport VA Medical Center Thursday, saying the facility should “find the right size” to address maintenance problems straining its budget and impacting patient care.

“That’s the challenge we have, is how to provide the most economic care because money is not infinite, it is finite and budgets are tight,” said Rep. Phil Roe (R-Tenn).

Roe said he decided to visit the medical center because of reports of serious problems with maintenance at the nearly 90-year-old facility.

Roe, a physician himself, said Northport would benefit from centralizing its operations into a few core buildings, as well as pushing more of its clinical operations into satellite facilities scattered across Long Island.

The lawmaker spent about three hours touring the Northport facility, which includes more than 70 buildings, including dozens that are mostly unused. Roe was accompanied by Reps. Thomas Suozzi, (D-Glen Cove) and Lee Zeldin, (R-Shirley), and Northport director Scott Guermonprez — all of whom said they could support the concept of consolidation.

Thursday’s congressional visit also came on the heels of two internal VA investigations which concluded that repeated lapses in the facility’s engineering department led to a host of problems at Northport.

Among those problems was the failure of an air-conditioning unit at Northport’s main hospital building, which forced a months-long closure of its surgical facility, and meant that veterans requiring emergency surgery had to seek treatment at VA hospitals in Manhattan or the Bronx.

The reports also concluded that the failings of the engineering department at Northport were a financial drain on a facility already struggling against recent budgetary shortfalls.

Northport has long been viewed with near reverential regard among the area’s roughly 140,000 veterans, who typically laud its medical care for its quality and availability.

But in the past two years, veteran leaders have expressed increasing alarm over the physical condition of the medical center.

Hutch DuBosque, president of the PTSD Veterans Association of Northport, whose members use the facility for self-care meetings, said mold caused by leaking roofs and frequently-flooded underground walkways has forced his group to move therapy sessions because of respiratory distress twice in the past three months.

“Our concern is the toxic environment,” said DuBosque. “A lot of us older guys have respiratory problems, and we can’t take this stuff.”

Guermonprez, a retired Air Force officer, came on as Northport’s new director in late June, expressed agreement that some of Northport’s maintenance problems could be mitigated by consolidating to fewer buildings.

Roe said he was encouraged that Guernonprez had initiated staffing changes in the leadership of Northport's engineering, nursing and medical staff.

"I think he is headed in the right direction," Roe said.

3.4 - Stars and Stripes: [Stage set in Congress for debate on Choice program reform](#) (29 September, Nikki Wentling, 1.5M online visitors/mo; Washington, DC)

The Department of Veterans Affairs estimated the funds that allow veterans to receive health care in the private sector will last until the end of the year – a projection that establishes a new deadline for when Congress needs to come up with a long-term solution for the Veterans Choice Program.

President Donald Trump signed legislation Aug. 12 immediately providing \$2.1 billion for the Choice program to prevent a funding crisis. VA Secretary David Shulkin had told lawmakers in June that the account was quickly and unexpectedly running out of money because of increased demand. Now, the money – originally estimated to last until February 2018 – is again being spent faster than predicted.

Shulkin told reporters Wednesday that he's confident Choice funding will last at least through the end of the year and rebuked a report from The Associated Press that the program would run out of money as early as December. The VA is spending about \$280 million each month to send veterans into the private sector for health care, he said.

"It's a very, very hard program to do accurate financial projections," Shulkin said. "We've always said it's important that Congress needs to act this fall, this legislative session so we do not get into a funding crisis."

Sen. John McCain, R-Ariz., sent a letter to Shulkin on Wednesday asking for an accounting of the program, expressing concern about another unexpected shortfall. McCain helped create the Choice program in 2014 in response to the VA wait-time scandal that originated at the Phoenix VA hospital.

Tiffany Haverly, communications director for the House Committee on Veterans' Affairs and the group's chairman, Rep. Phil Roe, R-Tenn., said Roe's office is receiving regular updates on Choice program spending. At the same time, the House committee is working on legislation to reform how the VA balances private-sector care, Haverly said Friday.

"We are continuing to monitor the account and working to move legislation to reform VA's community care programs so veterans can continue accessing care should funding be expended sooner than expected," she said.

House and Senate lawmakers undertook reform efforts following complaints from veterans that the Choice program is complex and bureaucratic. Current rules allow veterans to seek care outside the VA only if they can't receive an appointment within 30 days or they live more than 40 miles from a VA facility.

Shulkin said Wednesday that in order to avoid another funding shortfall, he wants legislation passed before Congress leaves for Thanksgiving break in mid-November.

"I expect we will get this done," he said. "We are in close communication with Congress and the White House on this. No one wants to see us putting veterans at risk."

It's expected the House and Senate will introduce their versions of Choice program reform in the next few weeks.

Shulkin has devised his own proposal, which is under review by the White House Office of Management and Budget. An early discussion draft of Shulkin's proposal describes a performance-based system in which veterans would be allowed to seek private-sector health care if the quality of VA care in a certain area isn't up to par with other providers in that community.

The issue is likely to be subject to intense debate about whether the VA is sliding too far into the private sector.

When the legislation was introduced in the summer to provide \$2.1 billion to the Choice program, eight major veterans groups railed against it. Then, they successfully pushed for another \$1.8 billion to be included in the legislation for VA hiring and infrastructure. The coalition -- comprising AMVETS, Veterans of Foreign Wars, Disabled American Veterans, Iraq and Afghanistan Veterans of America and other groups -- viewed the original plan as prioritizing private-sector health care while neglecting VA services, and as setting a dangerous precedent.

In preparation for the Choice reform debate, groups on each side of the political divide have already started advocacy efforts.

VoteVets, a left-leaning political action committee, ran a \$400,000 ad campaign in September pleading with viewers to "Tell Congress, don't let Trump privatize my VA." The advertisement aired in Alaska, Florida, Kansas, Louisiana, Maine, Minnesota, Montana, Nevada, Ohio, South Dakota, Tennessee, Texas and West Virginia.

Concerned Veterans for America, a conservative veterans advocacy group in the Koch brothers' political network, is also speaking out. The group, which gained more influence since the presidential election, has lobbied to transfer VA oversight to a government-chartered nonprofit and expand veterans' private-sector health care options.

"The Trump Administration and Congress should not be dissuaded from keeping their campaign promises to offer veterans more health care choices by Washington special interests that want to preserve the status quo at the VA," said Dan Caldwell, the policy director for CVA. "There is no excuse for Congress not to put forward a VA choice reform plan that would give all veterans who use the VA the ability to access care in the private sector."

[Back to Top](#)

3.5 - WNDU (NBC-16, Video): [New VA clinic in Mishawaka will 'quadruple services'](#) (29 September, Mark Peterson, 833k online visitors/mo; South Bend, IN)

Ribbon cutting ceremonies in Mishawaka on Friday marked the completion of a \$38 million medical clinic for veterans.

About ten years ago, the Veterans Administration was first asked to study how often local vets had to travel long distances to get needed medical care.

"I'll be able to come here for my eye appointments, I'll be able to come here for my hearing appointments, and those are all things I have to go to Fort Wayne for," said veteran Chuck Damp.

"So we have most every medical every medical service you could possibly think of," said Sen. Joseph Donnelly, (D) Indiana. "Mental health services, audiology, cardiology, so many things are here for our veterans."

"The services that are provided out of here really kind of quadruple what the services were available in Michiana before," added U.S. Rep. Jackie Walorski, ® Indiana's Second District.

The hope is, with all those additional medical services available closer to those who served, trips to the doctor will no longer be something local vets dread, and could become something they grow to love.

"They said this is our home, I mean, besides being home with their family, this is their second home, with their brothers and sisters who served together with them, meeting other veterans," said Sen. Donnelly.

Veteran Chuck Damp agrees: "It's going to be so much better than veterans having to travel, like I said, Fort Wayne, Indianapolis, Marion. It's right here, right in our neighborhood."

Sen. Donnelly noted how dramatically things have changed in the past ten years when the local VA clinic was housed on the south side of South Bend in a residential neighborhood, in a building no bigger than a house.

The new facility at 1540 Trinity Place has a coffee and sandwich shop tucked away near the front entrance. A spacious lobby has high ceilings with skylights.

"I talked to so many veterans, outside as we all came rushing in the door and you could hear the ooh's and the ah's and the excitement of something that's been promised for so long, it's taken years to actually make this happen," said Rep. Walorski.

[Back to Top](#)

3.6 - WNDU (NBC-16, Video): [Sen. Joe Donnelly on tax overhaul, health care and new VA clinic](#) (29 September, Jason Krug, 833k online visitors/mo; South Bend, IN)

President Donald Trump visited Indianapolis on Wednesday, pitching his tax overhaul plan.

Traveling with the president from Washington D.C. that day was Sen. Joe Donnelly.

A question some had is why the Democrat would travel on Air Force One with the Republican president.

"He's the President of the United States and whether the president was President Bush or President Obama or President Trump, I try to show respect to the position," says Donnelly on 16 Morning News. "When I have a chance to come back to my home state and to be with everybody from Indiana and welcome the president, I try to do so."

When it comes to Trump's new tax plan, there is still a lot of details to be filled in according to Donnelly, but there a few things he is working to make sure happens.

"My focus has been on keeping jobs that are here, here, making sure we create more jobs and more opportunity and making sure that middle class families' paychecks get a little bit bigger."

Republicans moved their focus to a tax overhaul after failed attempts to repeal and replace the Affordable Care Act, the latest try falling apart earlier this week. Donnelly says it did not come as a surprise to him.

"It was a terrible bill that would have taken health care away from over 400,000 Hoosiers. But I've been working behind the scenes with about 31 other senators on some bipartisan legislation that we're trying to bring up next week that I think has a great chance of passage that'll stabilize our health care programs."

The Senator also briefly touched on the new VA clinic in Mishawaka, something that he has been working 10 years to help complete. It opened last Monday, but Friday is its grand opening.

"The reason it's such a great thing is because it helps our vets and they deserve everything."

The facility is opening in three phases over the next two months, and is expected to see over 8,500 veterans per year.

[Back to Top](#)

3.7 - WFLA (NBC-8, Video): [Veteran suicides, VA corruption focus of rally and protest](#) (29 September, Steve Andrews, 702k online visitors/mo; Tampa, FL)

PINELLAS COUNTY, Fla. — In the United States, 22 veterans take their lives every day.

In front of the Veterans Affairs office at Bay Pines, 22 mannequins stood to serve as a reminder of this American tragedy.

Army veteran Mike Ford admits he's come close to ending his life.

"Idea was to just go ahead and just kill yourself on V-A property right, maybe if they see, if maybe people like, wow, there's something really going on here," he told News Channel 8.

Ford was diagnosed with post-traumatic stress disorder after serving in Grenada and claims he suffered physical and mental pain for years while struggling with the VA for treatment.

After waiting nine months for an appointment, Ford left his ailing father to drive across the state to finally see a doctor at the VA.

"I go there, oh you didn't get our message, we canceled your appointment," Ford recalled.

When Ford returned home, his father was gone.

"Wasting my time with the VA when I should've been with my father. He was my hero," he said.

"If I was going to kill myself, it was going to be out here," another veteran Keith Hansford said as he pointed to the grounds at Bay Pines.

Hansford also struggles with PTSD, and said sometimes he thinks he would welcome death. "My pain, my anxiety, my nightmares all of that will stop," Keith explained.

According to Hansford, harassment by Bay Pines Police administration while he worked there, pushed him to the brink.

Hansford has organized rallies condemning police corruption and promoting suicide awareness.

In August, we told you VA police removed signs promoting Keith's rally, which were placed on a state right of way. We helped him get them back.

Hansford believes without his wife, he'd be gone.

"I'm not stronger or weaker than the ones that have killed themselves. I just had the right help at the right time," said Keith. "The help they needed didn't come when they needed it."

[Back to Top](#)

3.8 - Modern Healthcare: [VA looks to ease telehealth regulations](#) (29 September, Rachel Z. Arndt, 460k online visitors/mo; Chicago, IL)

The Veterans Affairs Department proposed a rule Friday that would allow VA providers anywhere in the country to conduct telehealth visits with VA patients across state borders, regardless of state licensing.

Giving patients access to providers across state lines is necessary for the VA to grow its telehealth program and increase the number of sites where the VA provides care, wrote Michael Shores, director of regulation policy and management in the VA secretary's office. This rule would amend VA medical regulations to do so. "Eliminating veteran suicide and providing access to mental health care is VA's number one clinical priority, and this proposed rulemaking would improve VA's ability to reach its most vulnerable beneficiaries," Shores wrote.

In fiscal 2016, VA providers saw 702,000 patients via telemedicine in 2.17 million episodes of care. Nearly half of those who received telemedicine care live in rural areas.

"By increasing VA's capabilities to provide telehealth services, VA would be able to expand these services," Shores wrote.

The rule would complement the VA's push to increase the use of technology in veterans' healthcare, an effort VA Secretary Dr. David Shulkin called "anywhere to anywhere VA healthcare" when President Donald Trump announced the initiative in August.

Right now, VA telehealth care is limited by state restrictions. If a physician were to see a patient via telemedicine in a state in which the physician is not licensed to practice, that physician could lose his or her credentials and be fined.

Under the proposed rule, physicians wouldn't be penalized for providing telemedicine outside the states where they're currently allowed to practice.

A federal rule is necessary to relax these restrictions because it would take too long for every state to nix the penalties, according to Shore.

"While the VA's rule is limited, in that it would apply only to VA providers and VA patients, it could be the first step towards a national medical practice licensing concept," said Nathaniel Lacktman, a healthcare lawyer with Foley and Lardner. "Overall, I predict providers will look upon this new rule favorably."

[Back to Top](#)

3.9 - KMVT (FOX-14, Video): [As Suicide Prevention Month comes to a close, the search continues for solutions to veteran suicide](#) (29 September, Peter Zampa, 71k online visitors/mo; Twin Falls, ID)

WASHINGTON (Gray DC) -- Suicide prevention month is highlighting how the U.S. Can better address the issue. A specific focus currently in Washington is a push to end veteran suicide. Senators are examining what is being done to help veterans in need, and what other efforts are necessary.

One veteran says it is not easy to solve this tragic problem.

"There's such a stigma with mental health," said Kayda Keleher, Associate Director at Veterans of Foreign Wars.

20 veterans take their own lives every day. As Suicide Prevention Month comes to a close, Keleher says addressing mental health for all Americans is the right approach to getting these veterans the help they need.

"We have to get to a point where we better understand it, and we're definitely working on that," said Keleher.

She served in the Marine Corps for five years. It's an issue dear to her heart. She says great strides are being made in areas like telehealth, but there is much more work to be done, especially helping veterans in rural areas.

"It's important that we don't forget about the basics. The proven, empirically proven, necessities of face-to-face therapy options and just being there for one another as veterans," said Keleher.

The Senate Veterans' Affairs Committee held a hearing to look at what the VA is doing to combat veteran suicide. Senator Dan Sullivan (R-AK) sits on the committee and is currently in the Marine Corps reserves. He says as a country, we need to be able to get help to every veteran in the U.S.

"I lost one of my Marines to suicide, you know, after he reached out to me. It's a very hard issue," said Sullivan.

Sullivan says key parts of the hearing with VA Secretary David Shulkin were the ability to identify mental health issues and to reach veterans in remote areas who require help. Senator Joe Manchin (D-WV), who also sits on the committee, says the VA has a shortage in qualified mental health specialists.

"We need help. We need professionals. We need psychiatry help, we need to be able to get these people and give them the assistance they're needing," said Manchin.

The senators say implementing these new ideas will be key in saving lives. If you or someone you know is a veteran struggling with suicidal thoughts you can dial 1-800-273-8255 and press one.

[Back to Top](#)

3.10 - mHealth Intelligence: [New Rule Would Give VA Doctors National Telehealth Privileges](#) (29 September, Eric Wicklund, 53k online visitors/mo; Danvers, MA)

The Department of Veterans Affairs is moving forward with a plan to enable VA doctors to treat veterans through telehealth no matter where the doctor or patient are located, essentially overriding state laws.

Officials said the 28-page proposed order, unveiled on Sept. 29 under the VA's Anywhere to Anywhere VA Health Care Initiative, aims to boost the number of veterans using telehealth and telemedicine to access needed healthcare services, especially mental health services. It would give VA doctors the authority to use telehealth and telemedicine to treat veterans regardless of state guidelines on originating sites or licensing requirements.

It also could be seen as a veiled criticism of the mishmash of state laws regulating telehealth and telemedicine, which often do more to curb new healthcare services than promote them.

"In an effort to furnish care to all beneficiaries and use its resources most efficiently, VA needs to operate its telehealth program with healthcare providers who will provide services via telehealth to beneficiaries in states in which they are not licensed, registered, certified, or located, or where they are not authorized to furnish care using telehealth," the proposed order states. "Currently, doing so may jeopardize these providers' credentials, including fines and imprisonment for unauthorized practice of medicine, because of conflicts between VA's need to provide telehealth across the VA system and some states' laws or licensure, registration, certification, or other requirements that restrict or limit the practice of telehealth. A number of states have already enacted legislation or regulations that restrict the practice of interstate telehealth, as discussed below in the Administrative Procedure Act section."

As a result, VA officials say, many VA centers aren't expanding their telehealth and telemedicine programs to non-federal locations, such as the patient's home or the doctor's home. And VA doctors are reluctant to take on telehealth for fear of running into conflicts with state laws.

"This proposed rulemaking would clarify that VA healthcare providers may exercise their authority to provide care through the use of telehealth, notwithstanding any state laws, rules, or licensure, registration, or certification requirements to the contrary," the proposed rule states. "In so doing, VA would exercise federal preemption of state licensure, registration, and certification laws, rules, regulations, or requirements to the extent such state laws conflict with the ability of VA healthcare providers to engage in the practice of telehealth while acting within the scope of their VA employment."

"Preemption would be the minimum necessary action for VA to furnish effectively telehealth services because it would be impractical for VA to lobby each state to remove its restrictions that impair VA's ability to furnish telehealth services to beneficiaries and then wait for the state to implement appropriate changes," the rule continues. "That process would delay the growth of telehealth services in VA, thereby delaying delivery of healthcare to beneficiaries. It would be costly and time-consuming for VA and would not guarantee a successful result."

According to the VA, some 702,000 veterans, or 12 percent of the country's veteran population, used telehealth or telemedicine in FY 2016, accounting for 2.17 million telehealth episodes. Of that group, 45 percent were living in rural communities.

"The data collected in FY 2016 demonstrates that telehealth, particularly in the mental health context, improves patient care and improves patient outcomes," the proposed order points out. "In FY 2016, there was a 31 percent decrease in VA hospital admissions for beneficiaries enrolled in the Home Telehealth monitoring program for non-institutional care needs and chronic care management. Also, beneficiaries who received mental health services through synchronous video telehealth in FY 2016 saw a reduction in the number of acute psychiatric VA bed days of care by 39 percent."

Other benefits, the VA said, include improvements to remote monitoring for veterans with limited mobility or difficulties traveling to a healthcare provider, and its use as an incentive to recruit more VA healthcare providers, thereby reducing a national shortage.

The proposal surfaced when VA Secretary David Shulkin unveiled the Anywhere to Anywhere VA Healthcare Initiative in August, in a ceremony attended by President Donald Trump. At that time he also announced the nationwide roll-out of the Veteran Appointment Request (VAR) app, which allows veterans to use their smartphone, tablet or computer to schedule or modify appointments at VA facilities.

"What we're really doing is, we're removing regulations that have prevented us from doing this," he said. "We're removing geography as a barrier so that we can speed up access to Veterans and really honor our commitment to them."

Shulkin garnered support from, among others, the American Telemedicine Association – which has scheduled him as a keynote speaker at its ATA Edge conference next week in Washington D.C. – and Sen. Joni Ernst (R-Iowa), whose bill, the Veterans E-Health & Telemedicine Support (VETS) Act of 2017, seeks to give VA doctors that same authority.

“The VA’s decision to allow veterans to access care from the comfort of, or closer to, their own homes is necessary to improving quality and timely care for the more than 200,000 veterans in Iowa, particularly those who are disabled or reside in rural communities,” Ernst, a National Guard veteran, said. “It is critical that we continue to create opportunities for veterans to receive the best care out there, including potentially life-saving mental healthcare. Improving the VA’s telehealth program is critical, and I am thrilled to see this common-sense measure will be put into action to benefit Iowans and veterans across the country.”

The industry trade group Health IT Now also supports the measure.

“This proposed rule will be instrumental in breaking down geographic barriers that, for too long, have prevented our nation’s heroes from accessing the care they need where they need it,” Joel White, the group’s executive director, said in a Sept. 29 blog post. “By allowing VA telehealth providers to more easily treat patients across state lines, we can ensure that recent advances in technology-enabled care reach the most deserved among us and spur better outcomes for the 20 million veterans in the VA system today.”

Supporters also say the success of such a program could help spur efforts to create a national licensing framework for healthcare providers, such as the Interstate Medical Licensure Compact for doctors and similar compacts for nurses and physical therapists. It might also spur state medical boards to collaborate more freely on national telehealth and telemedicine standards.

But the proposal may draw complaints from state officials and national physicians’ groups interested in preserving each state’s right to regulate telemedicine and telehealth inside its borders.

During Congressional deliberation last September on the National Defense Authorization Act for FY 2017, the American Medical Association and American Academy of Family Physicians lobbied against a telehealth benefit for the TRICARE program that would have designated the originating location for certain telehealth services to be the physician’s location, instead of the patient’s location. They argued the legislation would enable physicians treating military personnel and veterans to skip state licensing laws when treating patients via telehealth.

In a Sept. 1 letter to Congressional leaders, AAFP Board Chairman Robert L. Wergin, MD, warned that the Senate version of the bill “portends a troubling scenario under which state licensing boards will lack the authority to discipline physicians who are practicing medicine within that state’s borders.”

“While this language would indeed ease barriers that hinder the free flow of telehealth services, it also would undermine the existing system of medical licensure, under which each state governs the practice of medicine within its borders,” Wergin wrote. “Allowing physicians with a single license to treat TRICARE beneficiaries in any state via telemedicine would create episodes of medical care that the state in which the patient resides cannot readily regulate, if at all.”

The Defense bill was eventually passed without the telehealth provision.

The proposed order is scheduled to be published in the National Register on Monday, Oct. 2. The public comment period will last 30 days.

3.11 - WLTZ (NBC-38, WSB/ABC-2, Video): [Hospital Evacuees from Caribbean Arrive in Atlanta](#) (28 September, Nami Dockery, 44k online visitors/mo; Columbus, GA)

Cobb County, GA – Hospital patients evacuated from the Caribbean due to hurricane Maria are finding refuge in Georgia.

Doctors and nurses welcomed the patients after a plane carrying roughly 40 medical evacuees landed Wednesday night.

It comes after the hurricane caused widespread power outages, including a loss of electricity at hospitals.

A VA Medical Center official says medics will triage the patients to ensure proper care.

Some evacuees will travel to Atlanta area hospitals, while others will stay in hotels.

Three flights carrying evacuees have landed so far, and more are expected over the next few days.

[Back to Top](#)

3.12 - Marion Republican: [Bost 'not happy' with VA investigation; vows to look further into allegations at Marion VAMC](#) (29 September, Holly Lee, 14k online visitors/mo; Marion, IL)

The conclusion of a Veterans Affairs inquiry into allegations of nepotism, employee intimidation and why some patients died at the VA Medical Center in Marion leaves one southern Illinois congressman "not happy" with the answers and vowing further action.

Rep. Mike Bost (R-Murphysboro), vice chairman of the Oversight and Investigations subcommittee of the House Committee on Veterans Affairs, said he doesn't believe the VA's investigation into complaints at the Marion VA Hospital went far enough.

Bost received the VA's analysis Sept. 22, about two months after his initial inquiry. Neither he nor the VA has made the Sept. 22 report public, citing the privacy of individual veterans mentioned within.

Even so, Bost said, he was "really not happy with the response," especially the VA's explanation for the deaths associated with the 54-bed Community Living Center, the nursing home facility on the VA campus. He characterized the VA's overall answers as "vague," with no real plan for correcting issues going forward, and "almost like they aren't sure these issues are that big of a problem."

Neither the Department of Veterans Affairs nor the Marion VA responded to calls for comment on Bost's criticisms.

Bost said that for the most part, "the Marion VA does a good job and people like them." The Marion VA provides care to nearly 44,000 veterans annually in 27 southern Illinois counties, as well as eight counties in southwest Indiana and 17 in northwest Kentucky. It also operates 10 outpatient clinics around the region.

"We just need more answers than we are getting," Bost added. "The incidents we have been hearing about ... I think they need to be looked into more."

Bost said his first step will be to discuss his concerns with the VA report in a face-to-face meeting with VA Secretary David Shulkin. If he is not satisfied with those answers, he said, he and subcommittee Chairman Jack Bergman (R-Michigan) could proceed with a congressional hearing. There, the committee would call its own witnesses.

In July, Bost and Bergman wrote to Shulkin asking for information on specific allegations related to the Marion VA Hospital. They also questioned why the results of a 2016 employee "culture" survey at Marion, routinely done at all VA facilities every two years, was so dramatically worse than the one taken in 2014, specifically in the areas of patient safety and employee morale.

The allegations Bost and Bergman asked the VA to investigate include:

- Reported staff concerns about patient safety that either "disappeared" or did not make it up the chain to the VAMC director;
- Why the Veterans Integrated Service Network (VISN) did not fully investigate complaints from Marion VA employees, despite calls by the VA National Center for Patient Safety to do so;
- The deaths of 15 veterans since October 2016, either while they were patients in the Community Living Center or shortly after discharge, and whether inadequate care played a role in any of them;
- Reports of "retaliation, unprofessional conduct and bullying" toward employees by Marion leadership;
- That one Marion administrator is alleged to have hired his wife as an administrative officer for the surgery department.

Bost said he and Bergman are hoping to get their meeting with Shulkin within two weeks. If a congressional hearing follows, he said it would include ranking members of both parties.

"This is a huge concern," Bost said, adding the Marion VA is not the only one in the nation undergoing scrutiny at the moment. In May 2016, Bost sponsored a bipartisan House bill addressing the issue of VA medical centers operating without permanent directors -- an instability that makes it more difficult to implement long-term reforms affecting patient care. That bill, which passed the House unanimously, is now in the Senate.

"Continual uncertainty at the top of any organization is destructive, and it certainly makes it tougher to fix problems," he said.

The Marion VA has had three directors in about five years. That's not as big a turnaround as at some VA hospitals, Bost said, but not as consistent as he would like.

"I want to make sure that all of our VAs are operating at a certain level, and taking care of our veterans, our heroes," he said. "With the problems in the VA around the nation, we need a response. This is not the last chapter."

4. Women Veterans

4.1 - The Mercury: [Expo will focus on women entrepreneurs and female veterans](#) (29 September, Donna Rovins, 187k online visitors/mo; Pottstown, PA)

Phoenixville >> A unique expo highlighting women entrepreneurs and female veterans is scheduled for Saturday, Oct. 7, at Phoenixville Area Middle School.

The 2017 Women Entrepreneur & Women Veteran Expo will give women from different business areas the opportunity to connect with each other to educate, share information and inspire other women to become business owners, according to organizer Dolores Winston, founder and CEO of Here to Apparel. The online shop specializes in sports attire and souvenirs that promote positive thinking, according to the company's website.

"We're bringing women entrepreneurs and women veterans together to spend the day connecting with each other and supporting each other," Winston said. "This is about sharing the knowledge to help another woman."

Winston said she had organized an entrepreneur expo in 2011. But this year's event is different because it focuses on women entrepreneurs and women veterans.

The expo will include panel discussions, the opportunity to visit with vendors promoting products and services, the chance to network with potential new customers and entertainment. At the end of the day, the group will name a woman entrepreneur of the year from the Phoenixville area. That award will be presented by state Rep. Warren Kampf, R-157th Dist.

"My dream is to bring women entrepreneurs together. On this day motivated women will share, educate, encourage, inspire, and rejuvenate us to bring out the best in ourselves," Winston said on the website for the event.

A highlight of the event, according to Winston, will be the presentation of two youth entrepreneurs: Jenna Swymelar, a fifth grade student at Renaissance Academy Charter School in Phoenixville and Jessica Meyers, a fifth grade student at Schuylkill Elementary School in Phoenixville.

Winston said the young entrepreneurs will present their businesses to the group. Swymelar has a business called Sweet Dream Pillows by Jenna, while Meyers' business is balloon creations.

Keynote speaker for the event will be Dr. Betty Moseley Brown, associate director, Center for Women Veterans at the Department of Veterans Affairs in Washington, D.C., and 19th president of the Women Marines Association.

"I met her at an event in Indiana, and when she heard what we were doing in bringing women entrepreneurs and women veterans together, she wanted to be part of it," Winston added.

Another speaker will be Jason Raia, executive vice president of the Freedoms Foundation of Valley Forge, a national educational non-profit that encourages "engaged, responsible citizenship," according to the organization's website. Winston said Raia will speak about the organization's youth outreach.

Two panel discussions will be held during the day. The first will feature six Phoenixville-area businesswomen, who will share stories about starting their own businesses.

The second panel discussion will focus on empowerment. Winston said the group of five women, "come from different areas of experiences and we'll share what we're doing and how we're empowering women," she said.

In addition to Kampf's presentation of the Woman Entrepreneur of the Year award, citations will be presented to the winner by state Sen. Andrew Dinniman, D-19th Dist., and U.S. Rep. Ryan Costello, R-6th Dist.

The event will be held from 2-7 p.m. Oct. 7 at the Phoenixville Area Middle School, 1000 Purple Pride Parkway in Phoenixville. Winston said more than 20 vendors have signed up to attend will attend the event. The 2017 Women Entrepreneur & Women Veteran Expo is free, and while registration is not required, people planning to attend can register at <https://weexpo.eventbrite.com>.

4.2 - KSFY (ABC-13, Video): [Sioux Falls conference puts spotlight on women veterans](#) (29 September, 4k online visitors/day; Sioux Falls, SD)

The annual Women Veteran Conference was held Friday in Sioux Falls.

The event was put on by the Sioux Falls VA.

About 86 women veterans attended this year's event.

Organizers said it is important to recognize women veterans and honor their service and sacrifice.

"They tend to be invisible and under recognized by the general public, by VA staff, by other veterans, and so this is just a way to bring them into the spotlight and say 'thank you,'" Brenda Fredericks, Women Veteran program manager, said.

The event also featured artwork by women veterans. The artwork is traveling around to different VA centers throughout the country.

5. Appeals Modernization

6. Strategic Partnerships

7. Supply Chain Modernization

7.1 - WFED (AM-1500): [VA close to awarding Cerner contract for new EHR](#) (29 September, Nicole Ogrysko, 831k online visitors/mo; Washington, DC)

The Veterans Affairs Department is preparing to award its contract with Cerner Corporation for a new electronic health record in the next month or so.

The award comes after the department announced its decision abandon its own, existing Veterans Information Systems and Technology Architecture (VistA) and adopt MHS Genesis, the same EHR system that DoD is deploying. All patient data will reside in one common Cerner Millennium system.

“We released to Congress, to you, a 30-day notice of award of a contract,” VA Secretary David Shulkin said of the EHR during Wednesday’s Senate Veterans Affairs Committee hearing. “We are keeping on the timeline that we talked about. We’re marching forward. We have the principles. I have some updates to share with you on the strategic IT plan, because I think we are making a lot of progress with that.”

Shulkin signed a “determination and findings” (D&F) form back in June, which grants special permission for VA to issue a direct solicitation to Cerner Corporation for the acquisition of MHS Genesis.

Initial discussions with Cerner were expected to take three to six months, Shulkin said when he announced his decision in early June.

Shulkin said part of the department’s IT strategic plan will include a sunset of 80 percent of VA’s current projects under development.

“By concentrating on some specific IT modernization initiatives, like [electronic health record modernization, financial management business transformation], etc., and leveraging cloud and digital platforms, the 80 percent reduction of ongoing development projects is expected to occur within 18 months, which is part of the overall IT modernization roadmap,” VA Press Secretary Curt Cashour wrote in an email.

VA will migrate or stop 240 out of 299 current projects, Cashour added.

A government source familiar with VA said the department is ending development on projects that aren’t going anywhere. The plan is shift those funds to the new EHR, the source said.

It’s still unclear just how much the new electronic health record will cost, but VA’s IT office faced a \$215 million budget cut in the president’s fiscal 2018 proposal.

Shulkin told lawmakers in May that he'd likely need to return to Congress to work with appropriators after he decides on the department's direction for a new EHR.

The EHR project is a massive undertaking for VA. The department has more than 100 versions of VistA. Those versions exist because VA hospitals largely had the freedom over the past 40 years to change the software to conform to the standards their leaders and doctors wanted to see, former VA IT executives have said.

The department has also outlined the broad principles it envisions it will need in a new EHR, in addition to the other tools and pieces it may need to complement the Cerner system.

"We haven't gotten to defining which specific tools they are yet, and how we're going to meet those needs," Shulkin said. "We've talked about the days of VA being a software developer are over, and we're going to be looking at off the shelf, current technologies. There's going to be a lot more definition on that."

This all comes as the VA's current chief information officer and acting assistant secretary for information and technology, Rob Thomas, announced his retirement next month.

Thomas, who has 35 years of federal experience, took on the CIO position in January, after Laverne Council left because of the change in administration.

VA has been struggling to fill the position since then. Shulkin said during a June budget hearing that a candidate for the CIO position withdrew his name but did not offer a more detailed expansion.

"I need help," Shulkin told reporters after Wednesday's hearing when asked about the leadership vacancies. "This is a big, complex organization. I need the best team possible. I need my nominees, all my political appointments to clear through the vetting process and then to go through their confirmation if it's required. And I need additional people from the private sector who want to come and serve their country to get in touch, because we need the A team on this."

8. Other

8.1 - ABC News (AP): [The Latest: John Kelly given authority over Cabinet travel](#) (29 September, 24.1M online visitors/mo; New York, NY)

The Latest on Health and Human Services Secretary Tom Price's resignation from the Trump Cabinet (all times local):

7:45 p.m.

The White House is giving chief of staff John Kelly authority to sign off on government travel on government-owned, rented, leased or chartered aircraft.

The change comes after Tom Price resigned Friday as President Donald Trump's health secretary over his costly travel.

White House budget director Mick Mulvaney has issued the new guidance, reminding the heads of executive branch departments and agencies that they are public servants and that every penny they spend comes from taxpayers.

Mulvaney tells Cabinet secretaries and department heads to consider whether commercial travel would be a more appropriate use of public funds even when the guidelines allow for the use of government-owned or chartered aircraft.

Mulvaney says that just because something is legal doesn't make it right.

5:55 p.m.

The resignation of Tom Price as secretary of Health and Human Services is drawing partisan responses from Republican and Democratic lawmakers.

Price resigned Friday amid investigations into his costly travel on charter flights.

The Republican House speaker, Paul Ryan, is praising Price, saying that the former Georgia congressman and House Budget Committee chairman is a "good man."

The top House Democrat, Minority Leader Nancy Pelosi, says Price should never have become health secretary because the country needs someone in the job "who believes in health care for all Americans."

Pelosi says President Donald Trump should pick a replacement who will stop the administration's sabotage of health care programs.

Price has been a top Democratic target because he's been a point man in Trump administration efforts to scrap and undermine "Obamacare."

[...]

12:01 p.m.

The secretary of the Department of Veterans Affairs says information about his official travel will be posted on the department's website.

Secretary David Shulkin says he has not used private aircraft for official business, but has taken six trips on military aircraft.

The trip details will include the type of aircraft, members of the traveling party and information about the events he was attending.

His decision to post his travel information comes as Health and Human Services Secretary Tom Price finds his job in jeopardy over his use of costly charters. Price has said he would reimburse the U.S. Treasury nearly \$52,000 for the cost of his seat on the charter flights. He has not addressed the overall cost of the flights, which are estimated to cost hundreds of thousands of dollars.

[...]

[Back to Top](#)

8.2 - ABC News (AP): [A look at questions over Cabinet members' travel](#) (29 September, 24.1M online visitors/mo; New York, NY)

Health and Human Services Secretary Tom Price has resigned amid controversy over his use of costly private charter flights on government business. But other Cabinet members are also facing congressional scrutiny over their travel.

Interior Secretary Ryan Zinke dismissed the controversy over charters as "a little BS over travel," but he acknowledged taxpayers do have the right to know official travel costs.

The Price controversy was a catalyst for the House Oversight and Government Reform Committee to launch a government-wide travel investigation. The panel is seeking detailed records from the White House and 24 departments and agencies on the use of government planes as well as private charters.

Here's a look at what other Cabinet members are saying:

—Interior's Zinke said he's taken three charter flights while in office, including a \$12,375 late-night trip from Las Vegas to his home state of Montana in June. Zinke said no commercial flight was available at the time he planned to fly for a speech to Western governors. He also went on a military flight with Agriculture Secretary Sonny Perdue to view wildfires in Montana. All of his travel was approved in advance by Interior's ethics officials "after extensive due diligence," Zinke said.

—Veterans Affairs Secretary David Shulkin said he has not used private aircraft for official business but has taken six trips on military aircraft. Information about his official travel will be posted on the department's website, he said.

—At the Treasury Department, the inspector general is investigating all requests for and use of government aircraft, including those by Secretary Steven Mnuchin, who came under fire for requesting a government aircraft to use on his honeymoon. The request was later withdrawn.

—The EPA said four non-commercial flights taken by Administrator Scott Pruitt were pre-approved by ethics lawyers. The agency's inspector general opened an inquiry last month into Pruitt's frequent taxpayer-funded travel on commercial planes. The Associated Press reported earlier this year that Pruitt often spends weekends at his Tulsa home.

— The Pentagon said Defense Secretary Jim Mattis has never requested or used charter aircraft. Mattis has reimbursed the government for the cost of some unofficial travel, but the Pentagon did not immediately provide the number of trips or the total costs repaid. The secretary of defense is required to travel on military aircraft wherever he goes so he can be in contact with the president and the chairman of the Joint Chiefs of Staff. Military planes carry the secure communications equipment required for classified calls and video teleconferences. In addition, the military flights of top defense leaders often double as training missions for Air Force crew.

[Back to Top](#)

8.3 - The Washington Times (AP): [Couple gets jail for keeping veteran's dead body in home](#) (29 September, 10.8M online visitors/mo; Washington, DC)

NEW PHILADELPHIA, Ohio - An Ohio couple criminally charged for keeping a Vietnam veteran's decomposing body in their home for several months to steal his Social Security and veteran benefits have received six months in jail.

The New Philadelphia Times Reporter reports 50-year-old Brian Sorohan and 46-year-old Stacy Sorohan also received two years' probation Thursday in Tuscarawas County.

The Wainwright residents pleaded no contest to gross abuse of a corpse and theft in a plea agreement. The couple must pay \$1,300 in restitution to the Veterans Administration and \$4,100 to the Social Security Administration.

Seventy-one-year-old Robert Harris' body was found in the couple's home March 22. Authorities searched the home that day after relatives became concerned about Harris' well-being.

Attorneys for the couple said in court the Sorohans regretted what they did.

1.2 - HuffPost: [VA Loan Program May Be Letting Veterans Down, A shortage of home appraisers is gumming up the works.](#)

(4 October, Ann Brenoff, 22.9M online visitors/mo; New York, NY)

One of the promises we make members of the military is that in exchange for their service, we promise to ease their transition back into civilian life when the time comes. For over seven decades, a major element of that deal has been the VA loans that veterans can use to buy a home.

[Hyperlink to Above](#)

1.3 - The Hill: [House Dems boycott VA reform discussion over inclusion of right-leaning group: report](#)

(4 October, Ellen Mitchell, 11.8M online visitors/mo; Washington, DC)
House Democrats boycotted a veterans health care reform discussion Tuesday over the inclusion of an advocacy group with ties to Republican Party donors, Military Times reported. House Veterans' Affairs Committee Democrats would not attend the meeting because Concerned Veterans for America (CVA) would be there. Democrats accused the group of being more interested in political attacks than creating new policy.

1.4 - Military.com: [VA Photo ID Cards for All Veterans Coming in November](#)

(4 October, Amy Bushatz, 9M online visitors/mo; San Francisco, CA)
All honorably discharged veterans of every era will be able to get a photo identification card from the Department of Veterans Affairs starting in November due to a law passed in 2015. The law, known as the Veterans Identification Card Act 2015, orders the VA to issue a hard-copy photo ID to any honorably discharged veteran who applies. The card must contain the veteran's name, photo and a non-Social Security identification number...

2. Veteran and Employee Experience

2.1 - The Hill: The VA's woes cannot be pinned on any singular administration (4 October, Rory E. Riley-Topping, 11.8M online visitors/mo; Washington, DC)
Actions express priorities. Unfortunately, for the nation's veterans, the current priorities of the U.S. Department of Veterans Affairs have not changed much in the Trump era. As much as blaming Trump's populist policies or rousing rhetoric is an easy answer for any problem currently facing the nation, in the interest of fairness, it is important to note that the VA's woes cannot be pinned on any singular administration or political party, including the Trump administration.

[Hyperlink to Above](#)

2.2 - Dayton Daily News: Dayton VA gets primary care director; Lima clinic to open at new site (4 October, Barrie Barber, 1.1M online visitors/mo; Dayton, OH)
The Dayton VA Medical Center has appointed a former Air Force medical officer to director of primary care and a larger clinic will open next spring in Lima, the federal health agency said. Edward P. Syron, a medical administrator, will earn the \$120,900-a-year overseeing primary and home-based care outpatient services, the VA reported. He replaces Dr. Kavita Peddireddi, who served in the job temporarily until a permanent replacement was found.

[Hyperlink to Above](#)

2.3 - Military Times: House Democrats boycott VA health event, complicating reform plans (4 October, Leo Shane III, 2.1M online visitors/mo; Springfield, VA)
Plans to overhaul veterans health care this fall could be in jeopardy after House Democrats boycotted a supposedly friendly roundtable discussion on the issue Tuesday over the inclusion of a Republican-linked advocacy group they insist is more interested in political attacks than policy crafting. The controversy comes just a few weeks before House lawmakers are planning to fast-track new legislation surrounding outside care programs at the Department of Veterans Affairs...

[Hyperlink to Above](#)

2.4 - The State Journal-Register: 'Unaccompanied' veterans honored at Camp Butler National Cemetery (4 October, 834k online visitors/mo; Springfield, IL)
Ten "unaccompanied" veterans were honored at Camp Butler National Cemetery on Tuesday. The veterans were recently buried at the cemetery but either had no relatives or no relatives who could travel to the cemetery at the time of burial. The twice-annual ceremony includes the presentation of colors, a ceremonial flag folding, rifle volley and the playing of "Taps" presented by the Sangamon County Interveterans Burial Detail.

[Hyperlink to Above](#)

2.5 - New Hampshire Union Leader: VAMC volunteers recognized (4 October, 318k online visitors/mo; Manchester, NH)
The Manchester VA Medical Center recently held a volunteer recognition ceremony in honor of its 320 registered volunteers, who serve in more than 28 departments within the facility. The Medical Center's volunteers work directly with veterans as drivers, welcome ambassadors and

recreation aides to behind-the-scenes work in the warehouse, in the research department and in management.

[Hyperlink to Above](#)

2.6 - The Augusta Chronicle: [Club Car donates new golf cart to help disabled at Charlie Norwood VA Medical Center](#) (4 October, Nefeteria Brewster, 240k online visitors/mo; Augusta, GA)

Club Car dedicated a 2017 golf cart, valued at more than \$16,000, to the Charlie Norwood VA Medical Center to help get disabled veterans from the parking lot to the front of the facility. Although the uptown medical center holds two rows of handicapped spaces around the facility, Fred Palmer, a Club Car spokesman, said the new golf cart can further help those who are unable to secure those spots.

[Hyperlink to Above](#)

2.7 - WRDW (CBS-12, Video): [Solution to VA Uptown Parking Problem](#) (4 October, Celia Palermo, 914k online visitors/mo; North Augusta, SC)

The distance from the parking lot to the hospital doors can be pretty far depending on where you park. Veterans say they're sick of walking the distance. The VA says they know and they're fixing it. "A lot of us have difficulty walking...be it bad hips...bad knees...or bad ankles." He walks with a cane because he has arthritis. It's a price he paid, he says, for serving his country.

[Hyperlink to Above](#)

2.8 - WTAJ (CBS-10): [New director at Altoona VA Hospital](#) (4 October, Charlotte Ames, 192k online visitors/mo; Altoona, PA)

The new director at Altoona's Van Zandt VA Medical Center says she hopes to increase the number of services available to area veterans. Currently, the facility doesn't provide specialty services such as cardiology and cancer treatment, so veterans must travel to Pittsburgh for treatment. Sigrid Andrew said her goal is to offer those services in Altoona through the use of telemedicine and visiting clinics.

[Hyperlink to Above](#)

2.9 - Foster's Daily Democrat: [UNH veterans adaptive sports program receives federal grant](#) (4 October, 191k online visitors/mo; Dover, NH)

The University of New Hampshire's Northeast Passage Program will receive a \$172,974.49 grant from the Department of Veterans Affairs (VA) to support adaptive sports opportunities for veterans and servicemembers with disabilities, according to Congresswomen Carol Shea-Porter and Annie Kuster.

[Hyperlink to Above](#)

2.10 - Altoona Mirror: [Van Zandt director makes debut, Andrew said she chose job because veterans seem happy, staff respectful](#) (5 October, William Kibler, 74k online visitors/mo; Altoona, PA)

After Sigrid Andrew applied to become director of the Van Zandt VA Medical Center, but before she was offered the job, she came here and sat in various lobbies and waiting rooms, observing interactions between employees and veterans. She noticed that the veterans seemed happy, that the employees were kind and that they were respectful of each other.

[Hyperlink to Above](#)

2.11 - WAND (NBC-17, Video): [Camp Butler National Cemetery honors 10 unaccompanied veterans](#) (4 October, Meredith Hackler, 68k online visitors/mo; Decatur, IL)

The gloomy weather matched the somber tone 10 veterans were honored for their sacrifice to our country. "The unaccompanied honors veterans ceremony is a way we show respect to veterans that come to our cemetery without family members or without being accompanied by their loved ones," said Antonio Henderson, assistant director of Camp Butler National Cemetery.

[Hyperlink to Above](#)

2.12 - KXRM (FOX-21, Video): [Veteran students speak out after Career Center shuts down](#) (3 October, Carly Moore, 58k online visitors/mo; Colorado Springs, CO)

Dozens of veterans are out of luck after a school they were attending for a technical degree has been shut down. The school in North Texas is called Retail Ready Career Center (RRCC) which focuses on giving veterans hands-on training and professional job placement assistance in the HVAC industry. Two Colorado Springs veterans were enrolled in the class and both of their stories are exactly the same.

[Hyperlink to Above](#)

2.13 - The Daily News: [Staller retires from VA Medical Center](#) (4 October, 54k online visitors/mo; Iron Mountain, MI)

After 24 years of federal service, Patricia Staller of Iron Mountain has retired from the Oscar G. Johnson VA Medical Center. Staller was born and raised in Fort Atkinson, Wis., and is the daughter of Donald and Marie Peterson. She graduated from the University of Wisconsin-Milwaukee with a master's degree in social work.

[Hyperlink to Above](#)

2.14 - FEDweek: [Improving Policy-Making at VA a Complex Task, GAO Finds](#) (4 October, 51k online visitors/mo; Glen Allen, VA)

The Veterans Health Administration, the largest arm of the VA, is encountering several difficulties as it attempts to improve its policy-making, GAO has said. Under a policy issued last year, directives and notices are now the sole documents for establishing national agency policy; other types of documents, such as program office memos, are considered guidance.

[Hyperlink to Above](#)

2.15 - Journal Express: [Residents seek answers at VA town hall](#) (4 October, Pat Finan, 9.2k online visitors/mo; Knoxville, IA)

A town hall meeting about the Veterans Administration campus on Thursday, Sept. 28, focused not only on the site's future but on vets themselves. The quality of their health care drew nearly as much attention as the 170-acre site during the two-hour discussion among about 125 people at the Knoxville Performing Arts Center. Many participants sought details of the process by which the government rids itself of the property. Others were frustrated about depressed or suicidal military comrades.

[Hyperlink to Above](#)

3. Access to Healthcare

3.1 - WDBJ (CBS-7): VA expanding use of tele-medicine to improve access for veterans (4 October, Joe Dashiell, 833k online visitors/mo; Roanoke, VA)

The VA Medical Center in Salem is expanding the use of tele-medicine, as a way to improve veterans' access to health care. Wednesday, a company that provides the technology to the Department of Veterans Affairs demonstrated some of the newest equipment in Salem. Lindsay Gill is the Facility Telehealth Coordinator at the Salem VA Medical Center.

[Hyperlink to Above](#)

3.2 - The National Law Review: Department of Veterans Affairs Aims to Trump State Telemedicine Rules (4 October, 475k online visitors/mo; New York, NY)

The U.S. Department of Veterans Affairs ("VA") is taking a significant step towards expanding needed services to Veterans by proposing a rule to preempt state restrictions on telehealth. Most states currently restrict providers (including VA employees) from treating patients that are located in that state if the provider is not licensed there. As a result, the VA has had difficulty getting a sufficient number of providers to furnish services via telemedicine for fear that they will face discipline from those states for the unlicensed practice of medicine.

1. Top Stories

1.1 - U.S. News & World Report (AP): [Unclean Floors, Kitchens Found at Colorado Veterans Hospital](#) (4 October, Dan Elliott, 24M online visitors/mo; Washington, DC)

DENVER (AP) — Dirty floors, unclean kitchens and dusty vents were found by inspectors who checked a veterans hospital in Denver and a small veterans clinic in southern Colorado, according to a government report.

Made public Wednesday by the Veterans Affairs Department's inspector general, the report did not say whether the conditions caused any health problems for patients.

The report , dated Sept. 29, said a February inspection found cleanliness problems in eight patient care areas, two areas where instruments are sterilized and in some ice machines and refrigerators in kitchens.

It also said some ventilation grills and horizontal surfaces were dusty.

The report did not specify whether the problems were at the aging Denver hospital or a small outpatient clinic in Salida, Colorado, which inspectors also visited. Kristen Schabert, a spokeswoman for the VA's Denver-based Eastern Colorado Health Care System, said inspectors focused on the Denver hospital.

A new veterans medical center is under construction in suburban Aurora to replace the Denver facility and is expected to open next year. The February inspection did not include that facility.

In a written statement, the VA said plans are in place to address the problems the inspectors found.

The VA nationwide is under scrutiny over spending, long wait times for care and other problems.

Last month, The Associated Press reported the VA program that pays for veterans to get health care in the private sector could run out of money this year, despite getting \$2.1 billion in emergency funding in August. Another shortfall could force the VA to limit referrals to outside doctors, causing delays in medical care for hundreds of thousands of veterans.

In Colorado, the cost of the medical center being built outside Denver has nearly tripled to almost \$1.7 billion. That so infuriated lawmakers that they stripped the department of the authority to oversee large construction projects and put the Army Corps of Engineers in charge.

Other problems found in the February inspections in Colorado:

- Two doors in a mental health treatment facility were found unlocked and the alarms were not turned on.
- Inspectors found no record that some new employees were given required security training.
- Inspectors found no evidence that security personnel were compiling or analyzing data on violent or disruptive incidents.

-- Staff did not compile adequate reports on some patients who were transferred to other facilities, including whether the patients were stable enough to be moved and whether the new facility was told the patients' history, symptoms and test results.

1.2 - HuffPost: [VA Loan Program May Be Letting Veterans Down, A shortage of home appraisers is gumming up the works.](#) (4 October, Ann Brenoff, 22.9M online visitors/mo; New York, NY)

One of the promises we make members of the military is that in exchange for their service, we promise to ease their transition back into civilian life when the time comes. For over seven decades, a major element of that deal has been the VA loans that veterans can use to buy a home.

These loans require no money down and can be obtained with much lower credit scores than other mortgages. But the much-vaunted program, which began under the GI Bill of 1944, has hit a snag.

The Mortgage Bankers Association recently warned the Department of Veterans Affairs that the program may be hurting the very vets it was designed to help.

Here's The Deal

Under the VA loan program, veterans can borrow up to \$417,000 — or \$625,000 in designated “high cost areas,” like parts of California — without putting any money down for a house that will be their principal residence. That's a good deal considering the median home value in the U.S. is currently \$200,700, according to Zillow.

Among the program's other attractions, there is no maximum debt ratio — meaning that the borrower's monthly mortgage payment can exceed the typical lender's restriction of no more than 28 percent of gross monthly income. There is no minimum credit score requirement either, while most other home mortgages require a credit score of at least 620 for conventional loans or 580 for most Federal Housing Administration loans. A VA loan can also be used to refinance an existing loan. And vets can get these loans more than once.

The VA home loan program is one of the key reasons that 79 percent of veterans own their own homes, compared with just 63 percent of the non-veteran population, according to Trulia.com.

But recent vets don't seem to be taking advantage of the program in large numbers. Just 36 percent said they had applied for a VA home loan in a 2014 survey of 2,000 members of Iraq and Afghanistan Veterans of America.

Pressured Not To Use VA Loans

Real estate agents have long complained that the VA's hurry-up-and-wait requirements when it comes to appraisals and inspections, associated red tape and extra hoops to jump through compared with conventional loan programs ultimately hurt veterans' efforts to purchase homes in a competitive market.

Now the Mortgage Bankers Association is highlighting the problem of delays in the appraisals that the VA requires. There is a shortage of available appraisers, which has led to longer wait times and missed contract deadlines.

Add the appraiser shortage to the fact that it's just faster and simpler to work with other buyers, and some home sellers and their agents shy away from dealing with VA loans. As a result, the mortgage bankers group said, veterans are under pressure to bypass the benefits of a VA loan and seek conventional financing instead.

Steve O'Connor, senior vice president of the Mortgage Bankers Association, laid out his group's concerns in a Sept. 5 letter to the executive director of the VA's Loan Guaranty Service, who oversees the loan program. He said that veterans often can't close a VA loan and are forced "to choose other loan programs to meet certain deadlines or face other adverse outcomes."

Finding alternate home funding means having to come up with as much as a 20 percent down payment, meeting tighter credit standards and walking away from a promised benefit they earned when they put their lives on the line for their country. A non-VA loan can also cost the veteran an additional "tens of thousands of dollars of interest payments over the life of the loan," O'Connor wrote.

The VA did not respond to questions emailed by HuffPost or make a spokesperson available for comment by publication time.

Appraisers Are Upset

While the Mortgage Bankers Association letter was sparked by anecdotal evidence provided by its members, the group is not the first to note the impact of changes to the appraisal industry — changes that have not set well with current appraisers and may have discouraged new ones from entering the field.

Almost 75 percent of the 2,248 appraisers surveyed in a 2017 study from the National Association of Realtors said they planned to leave or have already left the business because of greater regulation and an industry shift away from working directly for lenders to working for larger companies that manage groups of appraisers. These appraisal management companies take as much as 50 percent of what home buyers pay in appraisal fees.

The Dodd–Frank Wall Street reform law of 2010 put in place new federal guidelines that required banks to have a "firewall" between lenders and appraisers to avoid conflicts of interest. These appraisal management companies blossomed as the new middlemen, but the actual appraisers — the people who do the hands-on work — saw their pay cut. Appraisers also contend they're unfairly taking the blame when the companies "gouge" buyers with excessive fees, according to housing writer Kenneth R. Harney.

So appraisers are unhappy these days, and the assignments they most don't want to accept are those involving VA loans, according to the National Association of Realtors study. The double whammy of red tape and low compensation was the given reason.

To address the problem, the Mortgage Bankers Association offered a series of recommendations to the VA: use a virtual desktop appraiser to supplement the traditional

process of on-site visits, grant property inspection waivers, and lend its support to a proposal from the Appraisal Qualifications Board to reduce licensing requirements.

“The damaging impact to the veteran community is clear and the VA should act quickly,” the group wrote.

1.3 - The Hill: [House Dems boycott VA reform discussion over inclusion of right-leaning group: report](#) (4 October, Ellen Mitchell, 11.8M online visitors/mo; Washington, DC)

House Democrats boycotted a veterans health care reform discussion Tuesday over the inclusion of an advocacy group with ties to Republican Party donors, Military Times reported.

House Veterans’ Affairs Committee Democrats would not attend the meeting because Concerned Veterans for America (CVA) would be there. Democrats accused the group of being more interested in political attacks than creating new policy.

CVA was one of 18 veterans groups invited to the event, including the American Legion, AMVETS, Iraq and Afghanistan Veterans of America and Wounded Warrior Project.

“The chairman has the right to invite any organization he pleases, but to pretend that CVA is anything other than a partisan organization that invests time and money into discrediting Democratic members of Congress, and specifically the ranking member of this committee, is disingenuous,” Griffin Anderson, press secretary for the committee’s Democrats, told Military Times.

“We will not pretend it is anything else.”

House lawmakers are looking to quickly move new legislation on outside care programs at the Department of Veterans Affairs (VA), including the Veterans Choice Program.

Under the three-year-old Choice program, the VA pays for veterans who live too far away from the nearest Veterans Health Administration (VHA) facility or need a quicker medical appointment to use private doctors and hospitals.

Critics of several proposals to replace the Choice program are afraid that will lead to privatizing the VA. Outsourcing veteran care to the private sector, they fear, will divert billions of dollars from VHA services to medical providers that can’t be as well supervised and that have limited experience caring for veterans.

VA Secretary David Shulkin has promised to replace the Choice program with the Coordinated Access and Rewarding Experiences program (CARE) to be revealed this month.

The closed roundtable discussion which Democrats refused to attend covered broad outlines of the upcoming proposals.

"It is disappointing that the Democrat members of the committee did not want to hear ideas on how to fix the VA from a group of veterans, including many patients of the VA and combat veterans like myself," said Dan Caldwell, the policy director for CVA.

A spokeswoman for House VA Committee Chairman Phil Roe (R-Tenn.) told Military Times that attendees for the event "were invited to participate because of their interest in and serious study of VA's community care programs. They were invited for that reason and that reason only."

[Back to Top](#)

1.4 - Military.com: [VA Photo ID Cards for All Veterans Coming in November](#) (4 October, Amy Bushatz, 9M online visitors/mo; San Francisco, CA)

All honorably discharged veterans of every era will be able to get a photo identification card from the Department of Veterans Affairs starting in November due to a law passed in 2015.

The law, known as the Veterans Identification Card Act 2015, orders the VA to issue a hard-copy photo ID to any honorably discharged veteran who applies. The card must contain the veteran's name, photo and a non-Social Security identification number, the law states.

A VA official on Wednesday confirmed the cards are on track to be available nationwide starting in November. Veterans may apply for the card online, but a timeline for how long it will take to receive a card after application has not been finalized, the official said.

Although the law states that the VA may charge a fee for the card, the official said no fee is planned.

The change comes as the military exchange stores prepare to open online shopping to all honorably discharged veterans starting Nov. 11. Veterans who wish to use that new benefit must be verified through VetVerify.org.

Congress passed the ID law as a way to help veterans prove their service without showing a copy of their DD-214.

"Goods, services and promotional activities are often offered by public and private institutions to veterans who demonstrate proof of service in the military, but it is impractical for a veteran to always carry Department of Defense form DD-214 discharge papers to demonstrate such proof," the law states.

Some veterans already carry such proof of service.

Those who receive health care from the VA or have a disability rating can get a photo ID VA health card, also known as a Veteran Identification Card. Military retirees also hold an ID card issued by the Defense Department.

Veterans are also able to get a proof of service letter through the VA's ebenefits website. And some states will include a veteran designation on driver's licenses if requested.

Editor's Note: The fourth and fifth graphs have been updated with additional information from the VA.

1.5 - Stars and Stripes: [‘Alzheimer’s is a veterans’ disease:’ New group tries to improve support for vets with dementia](#) (4 October, Nikki Wentling, 1.5M online visitors/mo; Washington, DC)

WASHINGTON — Shawn Taylor knows the strain that Alzheimer’s can put on a family.

Her grandmother developed Alzheimer’s in the early 1980s. Then, her grandfather was diagnosed with the disease. Then her mother and father.

At age 21, as an only child and grandchild, the deadly form of dementia forced Taylor to become a caregiver for the next 35 years.

“I understand the intense caregiver needs,” she said. “And as I watch my mother slip away -- unable to recognize me, unable to take care of her most basic needs -- I realized I needed to do more.”

It was part of Taylor’s motivation to help create VeteransAgainstAlzheimer’s, which officially launched Tuesday. The group is partnering with the Department of Veterans Affairs and Veterans of Foreign Wars to increase funding for Alzheimer’s research, boost support for caregivers and enroll more veterans who are affected by dementia into the VA.

Her decision to focus her attention on veterans -- a group disproportionately at risk for dementia -- was personal, too. Taylor’s grandfather, John Gavin, was an Army colonel and West Point graduate, and her father, Bernard Landau, is a retired lieutenant colonel and Vietnam War veteran.

The veterans-focused group is a new segment of UsAgainstAlzheimer’s, which lobbies to increase research for a cure. George Vradenburg, a cofounder of UsAgainstAlzheimer’s, described the organization as “small, feisty and fearless.”

“We’re learning far too often veterans are disproportionately affected by this disease and are at a greater risk for Alzheimer’s because of their war-related brain impairments,” Vradenburg said. “Alzheimer’s is a veterans’ disease.”

article continues below

Veterans are at higher risk for Alzheimer’s for several reasons, explained David Cifu, a researcher and traumatic brain injury specialist at the VA. There’s a higher prevalence of mental health disorders in the veterans community, he said, which creates more likelihood of developing dementia. According to a study in the Journal of the American Geriatrics Society, the risk of Alzheimer’s doubles for veterans with post-traumatic stress disorder.

Traumatic brain injury also increases the risk of dementia, and of developing it earlier in life, according to a 2014 study published by the American Academy of Neurology. Older veterans

with TBI are 60 percent more likely to develop dementia than other veterans, according to the study.

Iraq and Afghanistan veterans are at higher risk to develop Alzheimer's sometime in their lives because they've sustained more brain injuries, VeteransAgainstAlzheimer's wrote in a report Monday. Of all combat wounds in Iraq and Afghanistan, 22 percent were brain injuries – nearly double the brain injuries sustained during the Vietnam War.

"Now more than ever, we need to redouble our efforts," Cifu said.

One study published by the National Institute of Health estimates 420,000 veterans will have developed Alzheimer's between 2010 and 2020.

About 270,000 veterans with dementia are enrolled in the VA, Cifu said. The number enrolled in the VA represents only about 35 percent of the 774,000 veterans estimated to have dementia.

The VFW got involved in order to improve the numbers, said Ryan Gallucci, a director with the VFW. Some veterans and families don't realize they qualify for VA benefits, such as caregiver support, Gallucci said.

Others are barred from those services because of VA regulations. For instance, some caregiver benefits are available only to family members of veterans wounded post-9/11. There's legislation in Congress, H.R. 1472 and S. 591, that would expand the services to all veterans.

Karen Garner, who was a caregiver to her husband, Senior Master Sgt. Jim Garner, said she didn't qualify for VA assistance because of income restrictions. She said her husband, who died of Alzheimer's last year at age 52, was confused and hurt that the VA wouldn't provide help.

"With the low enrollment numbers in VA... we have to do better than this," Gallucci said. "This is where we can help make a difference."

Increasing funding for Alzheimer's research is also key, said Cifu. In 2016, the VA conducted 157 research projects on Alzheimer's disease across 44 locations, at a cost of \$30 million.

"This sounds like a lot, and it is, but we need to do even more," he said.

Cifu is part of a consortium of specialists at the VA and Defense Department starting a new study to find connections between brain injury and dementia, he said. The group is looking to get as many veterans and servicemembers involved as possible.

At age 56, Taylor is still a primary caregiver. Her mother is in the late stages of Alzheimer's, and her father was just diagnosed with the disease last fall.

Taylor is hoping improvements in research and support could help Vietnam War-era veterans such as her father -- who's now 87 and living in a nursing home -- as well as the potential surge of Iraq and Afghanistan veterans who could develop the disease in the next 20 to 30 years.

"What we want to do is start the conversation," Taylor said. "Nobody wants to talk about it, but we have to talk about it. It's happening, and what's ahead of us is going to be devastating."

[Back to Top](#)

2. Veteran and Employee Experience

2.1 - The Hill: [The VA's woes cannot be pinned on any singular administration](#) (4 October, Rory E. Riley-Topping, 11.8M online visitors/mo; Washington, DC)

Actions express priorities. Unfortunately, for the nation's veterans, the current priorities of the U.S. Department of Veterans Affairs have not changed much in the Trump era.

As much as blaming Trump's populist policies or rousing rhetoric is an easy answer for any problem currently facing the nation, in the interest of fairness, it is important to note that the VA's woes cannot be pinned on any singular administration or political party, including the Trump administration.

Entrenched accountability issues such as those that are plaguing the VA take time to resolve. But, it appears that, thus far, the Trump administration may have over-promised and under-delivered.

Trump campaigned on a platform of overhauling the VA, and despite a robust legislative agenda aimed at following through on those campaign promises, the VA's priorities over the last several months have included gallivanting through Europe, defending questionable research programs, and delaying the release of a much-needed strategic plan on the future of the Veterans Choice program.

Wasting taxpayer funding seems to be at the route of many of the VA's problems. As explained by Avik Roy, a health care policy advisor and president of the Foundation for Research on Equal Opportunity, "[i]f you look at the budget of the VA and simply divide it by the number of people enrolled . . . there's more than enough money to fund veterans' healthcare. The problem is too much of the money is being spent not on veterans' healthcare, but on other institutional priorities."

The first institutional priority distracting top VA officials from veterans' healthcare relates to splurging on travel. Although VA Secretary David Shulkin's travel indiscretions pale in comparison to other members of the Trump cabinet, such as recently-resigned Health and Human Services Secretary Tom Price who spent over \$1 million of taxpayer funds on charter flights, a Washington Post investigation into Shulkin's travel revealed that, while veterans continued to struggle with the improved access to care promised by the Trump administration, he attended Wimbledon, toured Westminster Abbey, and took a cruise along the Thames at taxpayer expense. The VA's Office of the Inspector General is now conducting its own investigation into the propriety of these travel expenses.

The revelations regarding Shulkin's travel were particularly egregious in light of the fact that, less than two weeks prior, Shulkin signed a memo instructing VA staff to curtail travel in order to "generate savings" within the department. Ironically, the memo went on to state that providing clearly documented rationale on the necessity of official travel was required to promote "accountability in determining whether employee travel in their organization is essential."

Assuming that leadership starts from the top, Shulkin has failed to provide the type of leadership necessary to promote the type of accountability and cost savings that are essential to reforming the department he oversees.

The second institutional priority distracting the VA from veterans' healthcare is in regard to the department's controversial canine research program. Many in the veterans community found it bizarre that, during the month of September, which is National Suicide Prevention Awareness Month, the only public opinion authored by Shulkin for a major media outlet was an opinion piece defending this program in USA Today, while he remained relatively silent publicly on internal data released the same week on the high rates of veteran suicide in rural states and among female veterans, until the Senate Committee on Veterans' Affairs scheduled a hearing on the topic at the end of the month.

As noted by Ben Krause, disabled veteran and founder of the website Disabledveterans.org in a San Diego Tribune article discussing this topic, "I'm not going to say canine research should or shouldn't be done at all, I just don't think the VA should do it. VA has a hard enough time not withholding healthcare from veterans on a regular basis." If VA could redirect its zealotry in defending this program to providing better access to care, veterans would certainly be better off.

Finally, the third institutional priority distracting VA from veterans' healthcare is its inability to effectively implement the Veterans Choice Program. Although the Choice Program is relatively new, having been first signed in to law in 2014, VA has consistently struggled with the role of private sector care in conjunction with VA-care, with some equating the Choice Program with the demise of the department and full-scale privatization of the VA.

As VA continues to find a balance between its own existence and the role of private sector care, it nonetheless asked Congress for an emergency increase in funding for the program due to increased demand.

Despite legislation in August that provided the program with an additional \$2.1 billion in funding, the money continues to be spent faster than expected because of a combination of the popularity of the program and VA's inability to properly account for the money. As a result, VA has slowed down veterans' referrals for medical appointments outside the VA, thus causing additional delays in needed care.

In requesting additional funding, Shulkin acknowledged to a Senate subcommittee in charge of VA funding that "we do not want to see veterans impacted at all because of our inability to manage budgets." However, this is exactly what is continuing to happen.

As Sen. John McCain (R-Ariz.) said in a scolding to Shulkin in a letter dated Sept. 27

"On June 21 of this year, I joined several of my colleagues in writing to you to express our serious concerns about reports of financial mismanagement at the VA. We said at the time that it was essential, given the growing demand for care under the Choice program, that the VA immediately correct the failures that created such a serious shortfall. It appears as if you have not done so."

It should go without saying that VA's top priority should be veterans, but as the current administration's actions have demonstrated to date, this is not always the case. Only when the VA embraces a culture of veterans first, rather than entrenched bureaucracy first, can they

overcome the many institutional detriments distracting them from effectively using its taxpayer funded budget to provide veterans with first class care.

Rory E. Riley-Topping has dedicated her career to ensuring accountability within the Department of Veterans Affairs (VA) to care for our nation's veterans. She is the principal at Riley-Topping Consulting and has served in a legal capacity for the U.S. House of Representatives Committee on Veterans' Affairs, the National Veterans Legal Services Program, the U.S. Court of Appeals for Veterans Claims, and the Department of Veterans Affairs, and can be reached on Twitter @RileyTopping.

2.2 - Dayton Daily News: [Dayton VA gets primary care director; Lima clinic to open at new site](#) (4 October, Barrie Barber, 1.1M online visitors/mo; Dayton, OH)

DAYTON - The Dayton VA Medical Center has appointed a former Air Force medical officer to director of primary care and a larger clinic will open next spring in Lima, the federal health agency said.

Edward P. Syron, a medical administrator, will earn the \$120,900-a-year overseeing primary and home-based care outpatient services, the VA reported. He replaces Dr. Kavita Peddireddi, who served in the job temporarily until a permanent replacement was found.

Syron, who joined the VA staff three years ago, was a former chief of non-VA care coordination and a group practice manager at the medical facility.

He's also an assistant adjunct professor in medicine at the Wright State University Boonshoft School of Medicine, according to the VA.

Next spring, a larger VA outpatient clinic is scheduled to open at 750 High St. in Lima. The renovated 9,750-square-foot leased facility will handle a growing patient case load that has risen 10.5 percent over two years, figures show.

The new facility will have about 100 more parking spaces than the current location at 1303 Bellfontaine Ave., the VA said.

The clinic has served about 4,200 veterans and counted more than 22,000 outpatient visits within the past year, the VA reported.

The VA also plans a \$1 million expansion of an outpatient clinic in Springfield, officials announced in August. Proposals to expand on site or move to a new location were due this December. The VA has targeted an opening in 2018.

The Dayton VA Medical Center has a more than \$425 million budget and employs about 2,100 employees at the medical center and four outpatient clinics in Lima, Middletown and Springfield, Ohio and Richmond, Indiana. The facilities treated about 39,300 patients in the past fiscal year, said spokesman Ted Froats.

2.3 - Military Times: [House Democrats boycott VA health event, complicating reform plans](#) (4 October, Leo Shane III, 2.1M online visitors/mo; Springfield, VA)

WASHINGTON — Plans to overhaul veterans health care this fall could be in jeopardy after House Democrats boycotted a supposedly friendly roundtable discussion on the issue Tuesday over the inclusion of a Republican-linked advocacy group they insist is more interested in political attacks than policy crafting.

The controversy comes just a few weeks before House lawmakers are planning to fast-track new legislation surrounding outside care programs at the Department of Veterans Affairs, including the problematic Choice program.

The topic was already sensitive within the veterans community before the boycott, with concerns about shifting funding to private-sector physicians and the possibility of a slow dismantling of VA responsibilities.

But tensions grew this week when Democrats on the House Veterans' Affairs Committee refused to attend Tuesday's event because of the presence of Concerned Veterans for America, an advocacy group with ties to Republican Party donors.

"The chairman has the right to invite any organization he pleases, but to pretend that CVA is anything other than a partisan organization that invests time and money into discrediting Democratic members of Congress, and specifically the ranking member of this committee, is disingenuous," said Griffin Anderson, press secretary for the committee's Democrats.

"We will not pretend it is anything else."

CVA was one of 18 veterans groups invited to the event, a group that included the large legacy organizations such as the American Legion and AMVETS as well as newer organizations like Iraq and Afghanistan Veterans of America and Wounded Warrior Project.

Several VA officials also attended, including soon-to-be acting VA Undersecretary for Health Carolyn Clancy. Committee Chairman Rep. Phil Roe, R-Tenn., moderated the discussion.

Individuals in the closed roundtable characterized the discussion as largely non-eventful, covering broad outlines of the proposals to come. Dan Caldwell, policy director for CVA, criticized the Democratic members for turning it into a political issue.

"It is disappointing that the Democrat members of the committee did not want to hear ideas on how to fix the VA from a group of veterans, including many patients of the VA and combat veterans like myself," he said. "We have worked for years to develop comprehensive and bipartisan solutions to the VA's problems and appreciate that Chairman Roe invited us."

Tiffany Haverly, communications director for Roe, said attendees for the event "were invited to participate because of their interest in and serious study of VA's community care programs. They were invited for that reason and that reason only."

CVA is a controversial force within the veterans community. Earlier this year, the group ran ads in Minnesota blasting committee ranking member Rep. Tim Walz, D-Minn., for blocking VA reform proposals favored by Republicans, saying that he “let veterans down.”

Group officials have declined to release funding sources and trustee information for the group, but numerous news reports have linked the group to the Koch brothers network of conservative activist organizations. They’ve also enjoyed significantly better access to policy talks and events under President Donald Trump than they did under former President Barack Obama.

Unlike most veteran advocacy groups, CVA’s non-profit designation allows them to spend significant amounts on political or lobbying efforts. Haverly said committee precedent has included organizations like CVA in the Capitol Hill discussions.

Groups like IAVA and the Veterans of Foreign Wars have had similar lobbying arms in the past.

CVA’s main focus in recent years has been pushing for an expansion of outside care options for veterans. Officials there insist the current VA system is too overwhelmed and archaic to provide reliable, swift service for veterans’ medical needs, and have advocated for widespread changes to the system to allow more competition between VA hospitals and private-sector medical centers.

Some Democrats have labeled that approach a step toward privatizing the department. The health care reforms this fall are expected to center around the fight, balancing access issues with upgrades to the existing VA infrastructure.

VA Secretary David Shulkin has pushed for significant changes to the Choice program, including changing eligibility criteria to open the program to more veterans. He promised the replacement to the program — the Coordinated Access and Rewarding Experiences program, or Veterans CARE — is expected to be rolled out later this month.

In the meantime, House and Senate lawmakers have been meeting with veterans groups to try and work out potential challenges to those proposals early.

An extension of the Choice program was signed into law in August, but money for tens of thousands of veterans’ medical appointments outside the department is expected to run out by the end of the year, giving lawmakers a tight legislative timeline for reforms.

Whether the Democrats boycott in the House hurts that timeline — or leads to similar fights in the Senate, where Democrats there have voiced similar complaints about CVA — remains to be seen.

Haverly said Roe “remains committed to a bipartisan process for community care reform” despite the brewing fight. Griffin voiced similar optimism.

“The veterans committee is known for its bipartisanship, and while this invitation was a speedbump in that relationship, it is our hope we can get back on track so we can find a long-term solution to VA care in the community in the coming weeks,” he said.

CVA officials said they hope to remain heavily involved in the work as well. Public hearings on the issue are expected by the end of this month.

2.4 - The State Journal-Register: [‘Unaccompanied’ veterans honored at Camp Butler National Cemetery](#) (4 October, 834k online visitors/mo; Springfield, IL)

Ten “unaccompanied” veterans were honored at Camp Butler National Cemetery on Tuesday.

The veterans were recently buried at the cemetery but either had no relatives or no relatives who could travel to the cemetery at the time of burial.

The twice-annual ceremony includes the presentation of colors, a ceremonial flag folding, rifle volley and the playing of “Taps” presented by the Sangamon County Interveterans Burial Detail.

[Back to Top](#)

2.5 - New Hampshire Union Leader: [VAMC volunteers recognized](#) (4 October, 318k online visitors/mo; Manchester, NH)

The Manchester VA Medical Center recently held a volunteer recognition ceremony in honor of its 320 registered volunteers, who serve in more than 28 departments within the facility.

The Medical Center’s volunteers work directly with veterans as drivers, welcome ambassadors and recreation aides to behind-the-scenes work in the warehouse, in the research department and in management.

“Appreciating these volunteers is important to veterans and the staff, (who) are proud to work day in and day out with these selfless servants,” said Alfred Montoya, acting Medical Center director at the Manchester VA.

Madeline Dreusicke, a volunteer representing the VFW Auxiliary, was on the 2017 volunteer recognition ceremony planning committee and received an award herself for having worked 1,750 volunteer hours. When asked what drives her to give so much, she said, “Just because it is the right thing to do. They served us and we should serve them. They come home changed, and when they come to the (Manchester VA) they are in a safe zone, and I want to be a part of providing that. These brave men and women are always on my mind. Serving them is an honor.”

It is with a heavy heart that the Medical Center says goodbye to Richard Dobbyn, Charles Mesurvey Sr., Gerard Provencher and Preston Lawrance, who passed away within the past year.

“Richie, Charlie, Gerry and Preston made such a difference at the Medical Center,” said Debra Krinsky, chief of voluntary service at the VA. “They truly improved the lives of so many of the veterans we serve. We are better for having shared our lives with these wonderful men. They will forever be remembered as our family, and for their contribution to the wellness of the veterans we serve.”

[Back to Top](#)

2.6 - The Augusta Chronicle: [Club Car donates new golf cart to help disabled at Charlie Norwood VA Medical Center](#) (4 October, Nefeteria Brewster, 240k online visitors/mo; Augusta, GA)

Club Car dedicated a 2017 golf cart, valued at more than \$16,000, to the Charlie Norwood VA Medical Center to help get disabled veterans from the parking lot to the front of the facility.

Although the uptown medical center holds two rows of handicapped spaces around the facility, Fred Palmer, a Club Car spokesman, said the new golf cart can further help those who are unable to secure those spots.

“Transportation on both campuses in downtown and here in uptown is very important to get around,” he said. “They have parking and then they have transportation needs within the campus so I just see this as a fulfillment in partnership with that.”

Bob Frasier, a Voluntary Service Chief for the medical center who received the key to the new cart Wednesday, said the unique valet service is effective immediately.

Phones will also be added to poles in the parking lot by the end of the year for visitors who plan to use the new door-to-door service, he said.

“We’re going to continue to monitor the parking situation here and take steps as needed to make it the best possible experience for our veterans when they get here,” Frasier said. “So what we’re hoping to do eventually is we’re going to add phones and we’re going to have a phone number for veterans and when they park they can actually call and identify their location and then we can have a car clerk meet them at their car and have door-to-door service that way.”

Asked how services will be maintained, Frasier said it would depend significantly on those who are willing to volunteer as drivers for up to four hours each week.

“That would help us out greatly,” he said. “This is a pretty big step for us so of course in order for us to continue to do this we’re going to need people volunteer their hours.”

Those interested in volunteering can visit the Charlie Norwood VA Medical Center website for more information.

[Back to Top](#)

2.7 - WRDW (CBS-12, Video): [Solution to VA Uptown Parking Problem](#) (4 October, Celia Palermo, 914k online visitors/mo; North Augusta, SC)

The distance from the parking lot to the hospital doors can be pretty far depending on where you park.

Veterans say they’re sick of walking the distance. The VA says they know and they’re fixing it.

"A lot of us have difficulty walking...be it bad hips...bad knees...or bad ankles."

He walks with a cane because he has arthritis. It's a price he paid, he says, for serving his country.

He's a Vietnam War Veteran and he travels for miles to come here for his medical needs.

"This is the best facility for miles around."

Well, he loves the facility, but he doesn't love having to walk so far from his car just to get seen.

"You gotta struggle across, what? About two football fields?"

The VA and community leaders like Fred Palmer with Club Car are noticing.

"This uptown campus is quite the place...the parking looks like it could be challenging."

It is, but here's how they're helping you. Club Car and the VA teamed up to add another vehicle to their fleet, a golf cart. Except this one is dedicated to the busy and big parking lots at the VA Uptown Division, not the medical district.

"If someone does need a little extra help, our vehicle can provide that comfortably."

It'll take you from wherever you park to the front door of the facility, quite the trek.

"The distance from here to there, this is the short distance. That's about one football field. Then you gotta get inside and then you gotta walk upstairs."

But once the cart hits the streets...

"Anytime I can take pressure off the bone, I'll be riding. The driver won't have to be alone, I'll ride with him."

Officials say they hope to have the cart up and running as soon as possible so they can start helping people. But to do that, they say they need even more volunteers to drive the new cart, and others.

[Back to Top](#)

2.8 - WTAJ (CBS-10): [New director at Altoona VA Hospital](#) (4 October, Charlotte Ames, 192k online visitors/mo; Altoona, PA)

Altoona, Blair County, Pa. - The new director at Altoona's Van Zandt VA Medical Center says she hopes to increase the number of services available to area veterans. Currently, the facility doesn't provide specialty services such as cardiology and cancer treatment, so veterans must travel to Pittsburgh for treatment.

Sigrid Andrew said her goal is to offer those services in Altoona through the use of telemedicine and visiting clinics.

"If we can establish clinics whether it be four hours a week, two days a week, bring that provider in from the Pittsburgh VA, we would like to do that as well. But we need to establish what our needs are here in Altoona," she explained.

Andrew said the chief of staff from the Pittsburgh VA Medical Center is in Altoona to assess which specialty services are needed. She said she's already requested iPads for exam rooms, so that telemedicine can be used for consults with specialists in Pittsburgh.

The director said her background as a nurse impacts how she makes decisions as an administrator.

"I think when you're dealing with the costs and the budget and when you have to make choices, being a nurse does allow you to fairly balance and to fairly assess what the needs really are, because, at the end of the day, the patient, the veteran, is at the center of all decisions and you will always weigh on the side of the patient," Andrew said.

[Back to Top](#)

2.9 - Foster's Daily Democrat: [UNH veterans adaptive sports program receives federal grant](#) (4 October, 191k online visitors/mo; Dover, NH)

WASHINGTON, D.C. — The University of New Hampshire's Northeast Passage Program will receive a \$172,974.49 grant from the Department of Veterans Affairs (VA) to support adaptive sports opportunities for veterans and servicemembers with disabilities, according to Congresswomen Carol Shea-Porter and Annie Kuster.

"As a leader in the field of recreational therapy, UNH's Northeast Passage Program empowers military men and women who are living with disabilities, and today's grant will help them continue their important work," Shea-Porter said. "I have always been proud to support this excellent program. Congratulations to the staff and volunteers at Northeast Passage on this recognition of the important work they do for our servicemembers, veterans, and so many Granite Staters living with disabilities."

"Recreational therapy holds tremendous potential for our men and women who have served in uniform," said Kuster, a member of the House Committee on Veterans' Affairs. "The University of New Hampshire Northeast Passage Program supports veterans and servicemembers with disabilities who wish to pursue adaptive sports as a means of therapy. I'm proud of the work being done by UNH to support our veterans and servicemembers and will continue to advocate on behalf this important program."

"We are very pleased that the VA has once again recognized Northeast Passage as a leader in providing adaptive sports opportunities for veterans and servicemembers with disabilities," said Northeast Passage Director Jill Gravink. "Our programs enable veterans to come together and share their experiences with people with similar interests, building social networks where veterans and servicemembers can connect with each other and enjoy recreation with the same independence as their non-disabled peers."

Founded in 1990 as a non-profit organization, NEP merged with UNH in 2000 and specializes in recreational therapy (RT) and adaptive sports for children, adults, servicemembers, and veterans with disabilities. RT interventions help people with disabilities cope with the stress of their illness or disability and prepare individuals for managing their disabilities in order to achieve and maintain independence, productivity, health, and well-being.

In March, Shea-Porter and Kuster wrote to the House Appropriations Subcommittee on Military Construction and Veterans Affairs requesting increased funding for the Adaptive Sports Grant program. In their letter to appropriators, the Congresswomen requested that the committee include report language recommending \$10,000,000 for adaptive sports programs.

[Back to Top](#)

2.10 - Altoona Mirror: [Van Zandt director makes debut, Andrew said she chose job because veterans seem happy, staff respectful](#) (5 October, William Kibler, 74k online visitors/mo; Altoona, PA)

After Sigrid Andrew applied to become director of the Van Zandt VA Medical Center, but before she was offered the job, she came here and sat in various lobbies and waiting rooms, observing interactions between employees and veterans.

She noticed that the veterans seemed happy, that the employees were kind and that they were respectful of each other.

It's a "buyer's market" in the VA for managerial posts, and Andrew had a choice about whether to come to Altoona.

She ended up coming here largely because of those observations, she said Wednesday at an introductory meeting with local media.

"It was the people of Altoona who lured me," she said.

A native of the Newark, Del., area who spent time as a child in Vermont, she also appreciated the region's four distinct seasons. "And you can't discount the mountains," she said.

Van Zandt territory — extending to DuBois, Johnstown, Huntingdon and State College — is also drivable, in contrast to some larger VA hospital territories where airplane flights are necessary, she added.

Andrew is coming to a hospital that hasn't had a permanent director for 20 months, following William Mills' departure for Memphis, and that has been roiled by accusations of whistleblower retaliation examined during recent hearings before the Merit System Protection Board — a quasi-judicial body that ensures federal employees are treated based on performance.

The whistleblowers testified about a poisonous atmosphere created because of their mandated reporting of what they said was the impairment from dementia of a doctor in their department.

Andrew intends to deal with those issues by moving "forward," she said.

"I'm hoping for a healing-type future," she said.

She hopes to establish good relationships with employees — and with veterans, the overall community and the media, she said.

Two employee meetings have already been held, said Andrew, who hadn't yet completed her third day on the job.

She plans to be "transparent, direct and open" and to tell the truth, she said.

She has a track record for that, she said — giving as evidence that at a facility where she worked, a union president called a counterpart at another facility — presumably where she was going to work — and said of Andrew, "You may not always like the decisions she makes, but you will always know what she stands for."

She stands for the veterans, she said.

One recurrent issue raised in Van Zandt town hall meetings in recent times has been what veterans say is a shortage of specialist services.

Some of those veterans remember when there were 200 acute beds at Van Zandt, said hospital spokeswoman Andrea Young. Now there are only 11 acute beds, she said, to go with 40 nursing home beds. Those old ways aren't coming back, Young said.

But, channeling Regional VA Director Michael Adelman, Andrew said there are modern ways to remedy the problem.

She plans to work with recently appointed Acting Chief of Staff Ali Sonel — who remains Chief of Staff at the Pittsburgh VA — to recruit doctors here and increase the number of telemedicine consultations from Pittsburgh, of visits to Altoona from specialists in Pittsburgh and of "fee-based" visits from private providers in this area to Van Zandt, as well as fee-based visits by veterans to those providers in their community settings.

Thanks to Sonel, it's already happening, Andrew said.

Sonel's position in Pittsburgh — his "connections" — can help make it all work, she said.

To make it work well, however, the hospital will do a market analysis to identify how those changes can serve the needs of 26,000 veterans on the hospital's roster, she said.

[Back to Top](#)

2.11 - WAND (NBC-17, Video): [Camp Butler National Cemetery honors 10 unaccompanied veterans](#) (4 October, Meredith Hackler, 68k online visitors/mo; Decatur, IL)

SPRINGFIELD, Ill. (WAND)-The gloomy weather matched the somber tone 10 veterans were honored for their sacrifice to our country.

"The unaccompanied honors veterans ceremony is a way we show respect to veterans that come to our cemetery without family members or without being accompanied by their loved ones," said Antonio Henderson, assistant director of Camp Butler National Cemetery.

A 21-gun salute, and the playing of tap, pays homage to those who were lost.

"We are honoring and respecting the selfless service that the veterans gave to our nation," added Henderson.

"Every veteran should have a ceremony like this and for whatever reason many don't get that opportunity," said Sam Montalbano with the Inter Veterans Burial Detail.

Many of those who took part in the ceremony are veterans themselves.

"I'm a veteran as well," added Henderson. "I feel that it is also my duty and responsibility to give back for those who have laid the ultimate sacrifice,"

"It's giving back for all the things that they do while they are in the service," says Montalbano. "So, it's a good feeling for me personally."

While there's nothing we can do to bring them back, those involved say they hope the lost are always remembered.

"We are their brothers and sisters. It's our responsibility to let them know that they are not alone on their final salute," added Henderson.

The next unaccompanied veteran's ceremony will be held on April 5th, 2018 and Camp Butler National Cemetery.

[Back to Top](#)

2.12 - KXRM (FOX-21, Video): [Veteran students speak out after Career Center shuts down](#)
(3 October, Carly Moore, 58k online visitors/mo; Colorado Springs, CO)

Dozens of veterans are out of luck after a school they were attending for a technical degree has been shut down.

The school in North Texas is called Retail Ready Career Center (RRCC) which focuses on giving veterans hands-on training and professional job placement assistance in the HVAC industry.

Two Colorado Springs veterans were enrolled in the class and both of their stories are exactly the same. The Career Center approached them about the HVAC program and just about a week ago, without much notice the school was shut down and now their futures are uncertain.

One of those vets was Steve Pattillo who says two weeks ago his future career looked totally different after signing up for a 6-week certification class at RRCC.

"They convinced everyone to quit their jobs. I had a good paying job, at the time, they promised me something better. So, I moved my family here," said Pattillo, an Army veteran.

On September 20, students were abruptly told the school was closed for the day and to go home but class would resume the next day.

"I did feel a little bit weird I felt a little uneasy because, it's my families life basically in that schools hand," said Pattillo.

Then on that Friday, September 22, students say the school's president, John Davis, made an announcement to the group saying the Department of Veterans Affairs was investigating the school. This information left another classmate and Colorado Springs veteran, Charles Autry, with even more questions.

"[He] Basically assured us this was nothing more than an administrative review, that the school was in no danger of closing," said Autry, a Navy veteran.

Davis went on to say an employee had been fired for stealing \$20,000 of scholarship funds and the school illegally had too many student veterans.

"Less than a week later, we were in class doing some lecture lessons. In the middle of that, we had some school officials, come in and interrupt the class session and say 'you had 5 minutes to get your stuff and get off the property'," said Autry.

With no other answers, these two veterans along with more than 300 other students were sent home without their certificate or money back.

Right now both fathers want the same thing.

"I hope myself and other veterans are restored what they are owed," said Autry.

"I'd basically like to see every body get back out on their feet and recuperate from what the school's done to them and I'd like to prevent veterans from going through this again," said Pattillo.

Autry is reaching out to Congressman Doug Lamborn's office to see if they could help. They said the following in response:

"Congressman Lamborn's office routinely helps veterans in our community. We have heard from one veteran about this school and are currently awaiting paperwork that will allow us to advocate on his behalf."

The school was thought to be violating the 85/15 rule, meaning that only 85 percent of the student body can use their GI bill to pay for tuition; the other 15 percent had to be non-service members or fund the program themselves. Davis said it turns out 98 percent of the people enrolled were former service members.

Pattillo and Autry did use \$21,000 and 9 months of their VA benefits. They're concerned what will happen next.

“Basically what the VA has told us, or told me, is that it’s up in the air if we’ll have our benefits restored, fully or partially restored, as it stand right now we are out 9 months of our benefits,” Autry said.

“They said that’s a big maybe and they are not 100 percent sure, so it’s basically a big waiting game for all the veterans involved if we get anything back or not,” Pattillo said.

FOX21 attempted to reach out to the Career Center, but no one answered the phone or returned the voicemail. The veterans said most of their classmates are also joining in on a class action lawsuit.

[Back to Top](#)

2.13 - The Daily News: [Staller retires from VA Medical Center](#) (4 October, 54k online visitors/mo; Iron Mountain, MI)

IRON MOUNTAIN — After 24 years of federal service, Patricia Staller of Iron Mountain has retired from the Oscar G. Johnson VA Medical Center.

Staller was born and raised in Fort Atkinson, Wis., and is the daughter of Donald and Marie Peterson. She graduated from the University of Wisconsin-Milwaukee with a master’s degree in social work.

After completing her graduate work at the Milwaukee VA Medical Center, Staller started her career at the Waco VA Medical Center in Texas. She later worked at the Central Texas VA Health Care System in Temple, Texas, and then transferred to the Iron Mountain VA Medical Center in 2001.

During her tenure in Texas, Staller worked in many medical areas and piloted the first Patient Orientation Program to help new veterans and their families coming into the VA. At the Iron Mountain VA, she worked in various clinical social work areas, including acute care, student education, low vision and ethics. Most recently, she served as social worker for geriatric and extended care in the medical center’s Community Living Center.

Staller has been involved in many local theater productions, and she is a member of Zonta and the local chapter of Toastmasters of the Northwoods.

She is a widow and has one son, Curtis Staller; a daughter-in-law, Olga; and a granddaughter, Natasha, residing in Round Rock, Texas.

[Back to Top](#)

2.14 - FEDweek: [Improving Policy-Making at VA a Complex Task, GAO Finds](#) (4 October, 51k online visitors/mo; Glen Allen, VA)

The Veterans Health Administration, the largest arm of the VA, is encountering several difficulties as it attempts to improve its policy-making, GAO has said.

Under a policy issued last year, directives and notices are now the sole documents for establishing national agency policy; other types of documents, such as program office memos, are considered guidance. VHA is reviewing about 800 existing national policy documents to eliminate those that no longer meet its new definitions, and to rescind or recertify those that are outdated, GAO said.

However, it found that “VHA is not planning to review guidance documents, such as program office memos and standard operating procedures, to assess whether they align with its updated directive, because there is no central repository for these documents and it would be too resource intensive to locate all of them.”

“Further, GAO’s review found—contrary to VHA’s updated directive—that program offices are continuing to use memos to issue policy. The continued use of program office memos to establish national policy undermines VHA’s efforts to improve its policy management,” it said.

It added that program offices do not track or consistently disseminate the guidance documents they issue. And while the VHA has process for making national policy documents accessible to its medical centers and the veterans integrated service networks that oversee those centers, it lacks a process for making guidance documents accessible at the local level. The result is that “VHA lacks assurance that staff receive and follow the same guidance, as intended.”

Nor does the VHA routinely collect information on local challenges in complying with national policies—such as resource constraints and undefined time frames—or on waivers of those requirements that program offices can approve “on an ad hoc basis.”

[Back to Top](#)

2.15 - Journal Express: [Residents seek answers at VA town hall](#) (4 October, Pat Finan, 9.2k online visitors/mo; Knoxville, IA)

KNOXVILLE - A town hall meeting about the Veterans Administration campus on Thursday, Sept. 28, focused not only on the site’s future but on vets themselves. The quality of their health care drew nearly as much attention as the 170-acre site during the two-hour discussion among about 125 people at the Knoxville Performing Arts Center.

Many participants sought details of the process by which the government rids itself of the property. Others were frustrated about depressed or suicidal military comrades. Still more expressed worries about their own health, or about the eyesore they fear the campus will become.

The VA sent three people to the stage, mostly to discuss patient care. Gail Graham, medical director for the VA’s Central Iowa Health Care System, touted its new outpatient clinic at 1607 N. Lincoln St. While she accepted accountability for moldy, deteriorating buildings at the old site, she eventually drew the line.

“I’m in the business of delivering health care, not in the business of maintaining buildings,” Graham said.

The government won't sink money into the upkeep or the teardown of the buildings, officials said. Its main interest is getting the most money it can from the property and returning it to productive use, they said.

Those jobs fall to the General Services Administration, the real estate arm of the federal government. Jennifer Mollenshott, branch chief of the VA's Fort Worth, Texas, office, is in charge of the process for the next year or so.

Mollenshott said the VA is completing a review of the property and its potential, which she expects to see by the end of 2017. When GSA gets that report, a process of screenings is launched. Government agencies can express interest in the property, though that's not likely, she said. Other screenings include a look at the site's suitability to serve homeless people.

In similar situations, the process usually leads to the land being sold as-is, Mollenshott said. While many in the audience expressed eagerness for action, their waiting will continue as the process plays out through 2018.

"If all goes well, soup to nuts, you're looking at about a year," Mollenshott said.

The government's appraisal process considers what it calls "the highest and best use" for the property as well as local market conditions as it determines fair market value, Mollenshott said. The results of that appraisal will not be available to the public, she added.

Mollenshott tried to dispel concerns that potential buyers won't be interested in land that's dotted with large, dilapidated buildings.

"Trust me, I have seen a lot worse, and we still make a lot of money," she said.

Knoxville resident Park Woodle asked whether the site could be split into smaller parcels, contrary to what Knoxville has been told in the past. He mentioned several parts of the property that hold potential for housing or other uses. Such splits likely will be part of the marketing strategy, Mollenshott responded.

Would the city get a chance to get some parcels? Would it have to pay for them? Those were Knoxville resident Mike Lane's questions. Mollenshott and Mayor Brian Hatch both had answers.

The city and other government entities get dibs earlier in the screening process, Mollenshott said, though it would have to pay fair market price. Hatch said Knoxville might be interested in getting some of the land, while expressing wariness about the burden such a move could bring.

"We're like to have some control of that situation so that we can get something in there that's good for the community," he said.

With five days to reflect on takeaways from the two-hour meeting, Hatch described himself Tuesday as hopeful but cautious, given the history of the campus. The town hall was a good step, he said, and city and federal officials will continue to meet regularly.

"There were no real surprises," Hatch said. "I was hoping we would know what direction GSA was thinking of going. I think that once we have a better direction from GSA on selling the

property, we can then begin to formulate a little better strategy for the community to move forward.”

3. Access to Healthcare

3.1 - WDBJ (CBS-7): [VA expanding use of tele-medicine to improve access for veterans](#) (4 October, Joe Dashiell, 833k online visitors/mo; Roanoke, VA)

The VA Medical Center in Salem is expanding the use of tele-medicine, as a way to improve veterans' access to health care.

Wednesday, a company that provides the technology to the Department of Veterans Affairs demonstrated some of the newest equipment in Salem.

Lindsay Gill is the Facility Telehealth Coordinator at the Salem VA Medical Center.

"It means improved access," Gill told WDBJ7. "It allows our veterans to be seen at a distance, so they don't have to travel to the Salem VA. A lot of our veterans live hours away and this will allow them to seek care closer to home, but from the Salem Medical Center so it's really exciting."

A new program that will let veterans consult with health professionals from their homes should be coming on line in the next year.

3.2 - The National Law Review: [Department of Veterans Affairs Aims to Trump State Telemedicine Rules](#) (4 October, 475k online visitors/mo; New York, NY)

The U.S. Department of Veterans Affairs ("VA") is taking a significant step towards expanding needed services to Veterans by proposing a rule to preempt state restrictions on telehealth.

Most states currently restrict providers (including VA employees) from treating patients that are located in that state if the provider is not licensed there. As a result, the VA has had difficulty getting a sufficient number of providers to furnish services via telemedicine for fear that they will face discipline from those states for the unlicensed practice of medicine.

The VA has a real need for expanding its telemedicine capabilities as many of its patients are located in rural and underserved areas. The VA's top clinical priority is mental health, and having more robust telemedicine capabilities could help improve timeliness of treatment (a reputational sore spot for the VA). The VA could also use telemedicine to reach more people in need that may not otherwise seek help. The rule would allow the VA to more evenly distribute care by hiring providers in urban areas where there is larger pool and have them treat in rural areas (via telemedicine).

Not everyone is happy about the proposed rule, however. Organizations such as the American Medical Association oppose the rule as undermining each state's ability to govern the practice of medicine within its borders. The concern is that states would have no ability to regulate their citizens' care under this new framework.

While this rule is limited only to VA patients and providers, the hope is that other federal agencies or even states will follow the VA's lead. Given the importance of increasing access to care and the advances in the delivery of care via telemedicine, it might be time for states to reexamine their restrictive approach to professional licensure.

3.3 - WCSH (NBC-6, Video): [Lawsuit targets Togus VA for botched operations](#) (4 October, Don Carrigan, 442k online visitors/mo; Portland, ME)

AUGUSTA, Maine (NEWS CENTER) — Six Maine military veterans are waiting for a federal judge in Portland to decide if they will be allowed to sue the Veterans Administration.

Those veterans all say they had foot or ankle surgery at the Togus VA hospital, and that the doctor botched the operations. That doctor left in 2008, but the veterans say they still suffer pain and other problems.

Army veteran Steve Turner of Topsham isn't involved in the lawsuit but said Wednesday he also suffered at the hands of the same doctor.

Turner told NEWS CENTER his foot was operated on in early 2008 because of injuries sustained during his 13 years in the Army. He said there were problems soon after the first surgery and the doctor did a second operation. He said the foot then became badly infected and swollen and that only an emergency operation by a different doctor saved his foot.

Turner said it still causes him pain. He said the VA contacted him in 2010 and arranged a meeting, at which time it apologized, and blamed the doctor.

"They were very apologetic about what happened to me," he said, "and went step by step what [the doctor's] discrepancies were during surgery, what he should have done., and not done."

VA officials on Wednesday would not answer questions about the situation, referring all inquiries to the U.S. attorney's office.

In 2014, NEWS CENTER reported on a similar case involving a Hampden man, who said he had also suffered pain and continuing problems because of a failed ankle surgery by the same doctor. At that time, VA Togus director Ryan Lilly confirmed it had been dealing with a number of foot and ankle surgeries that had turned out badly.

Lilly said the staff had been alerted to the problems by patients, had contacted the doctor's patients to apologize and offer to pay for whatever further care was required.

Lilly was asked how many patients suffered problems. "We're talking less than 100," he replied at that time.

Neither the VA nor the U.S. Attorney would say Thursday how many total patients were affected.

Steve Turner said he does not blame the VA, but blames the doctor, and would "like to sue him personally," if he could.

Lawyers knowledgeable about the case told NEWS CENTER the doctor cannot be sued personally because he was working for the VA at the time.

That doctor is believed to be living in the New York City area, where an internet search showed he has been working at a medical practice. A receptionist at that practice said Wednesday the doctor no longer worked there.

The lawsuits by the six veterans are aimed at the VA, seeking permission to sue the government even though Maine's statute of limitations has expired. Lawyers said oral arguments are scheduled for later this month and a ruling could come this fall.

3.4 - WHAS (ABC-11, Video): [Annual event offers one-stop shop for homeless](#) (4 October, Sara Wagner, 439k online visitors/mo; Louisville, KY)

The latest numbers show more than 6,000 people are struggling with homelessness in Louisville. Wednesday, a group of people put their talents together to help drastically reduce those numbers. Homeless Connect is an annual event aiming to serve hundreds of homeless individuals by offering dozens of free resources.

The Salvation Army is no stranger to helping those in need. Inside the building, you'll find many stories of service and success, with plenty of new chapters being added at Wednesday's event.

"It's a lot of work to do, and it can't be done by one agency. It's got to be done by everybody in a group effort. It's got to be done by a community," Salvation Army Commander Major Roy Williams said.

More than 80 partners came together to help those who need it most.

"There's one thing they need and they come here and they say, oh, I didn't know that was there. They get that and they start lifting themselves up out of poverty," Williams said.

The organizations offered everything from IDs to eye and ear exams to haircuts and clothes. There were selfless acts at every corner, even feet washing.

"You can tell a lot about a person's health by washing their feet and then they can direct them to the medical center," Williams said.

Acts like that help to wipe away some of the struggle and stereotypes that come with homelessness.

"It's not all about people who just want to sit outside and lay around all day. There's homeless that want to help themselves every day," Williams said.

Organizers said this event has the ability to reach many who won't seek it otherwise.

"A lot of people don't feel safe in the shelter, particularly veterans who may have had trauma," Healthcare for Homeless Veterans supervisor Jamie Watts said.

Having everything set up in a one-stop shop makes a major difference when you're used to anything but convenience.

"Anybody who has ever been homeless or been at the point where you're almost homeless knows you spend a lot of time waiting in lines, being in waiting rooms, and getting on a waiting list. So, our hope is that today you can get a lot of that done in one place and get moving faster toward getting a place of your own," Coalition for Homeless Executive Director Natalie Harris said.

Veteran Jack Jones knows that all too well.

"I've been homeless off and on for several years, but at this time, I've been homeless for about three months," Jones said.

Thanks to the VA, Jones has housing now and is getting ready to work again.

"I signed up for a library card so I can learn computers. I don't know computers yet, but they're going to teach me," Jones said.

Homelessness can take away so much, but these acts of kindness can help life get back on track.

"It's amazing what they do and so far, I haven't met a negative person yet," Jones said.

Organizers said the number of homeless has consistently dropped every year in Louisville for the last five years. They expect to serve around 600 people at this year's event and hope that number continues to go down each and every year, eventually eliminating the need for the event altogether.

[Back to Top](#)

3.5 - KRGV (ABC-5, Video): [Local Organizations Provide Options for Homeless Valley Veterans](#) (4 October, Cecillia Gutierrez, 275k online visitors/mo; Weslaco, TX)

HARLINGEN – One homeless veteran is one too many. On any given night, 39,000 veterans in the U.S. find themselves without a permanent roof over their head, according to the U.S. Department of Housing and Urban Development.

Clifford Briggs is one of those veterans. From looking at him you would never know he was homeless with his big smile, positive attitude and contagious laughter.

Briggs comes from a military family, but now the ex-Navy firefighter goes to work during the day and sleeps at Loaves and Fishes in Harlingen.

"I moved down from Portland and it didn't work out too well, so I ended up at Loaves and Fishes. It's just a place to lay your head, stay out the weather at night to sleep," he said.

Briggs said he doesn't let life's unexpected turns get the best of him.

CHANNEL 5 NEWS spoke to Tommy Martinez, the Loaves and Fishes director of Family Emergency Assistance, to see if homeless veterans in their shelter are seen often.

"It ranges. Sometimes we have one to two homeless veterans in a month during the summer months or maybe even December we might have maybe three to four homeless veterans in our shelter at one point." Felix Rodriguez, a veteran service officer with the Hidalgo County Veterans Service.

He explained to us why veterans are more likely to face homelessness.

"Well, many of these veterans that are having issues with finding a place to stay, a home are coming back with issues that civilians don't have to deal with," he said. "And some of these issues and conditions run the gamut between post-traumatic stress disorder, traumatic brain injury, depressive disorders and other conditions secondary to that."

He said there are several ways you can help a homeless veteran.

"My first advice to them is to call the VA homeless hotline, it's a HUD hotline," he said.

Rodriguez added other ways to help homeless veterans are through Family Endeavors and other organizations.

You can contact the VA Homeless Hotline at 877-424-3838. For a full list of resources click [here](#).

[Back to Top](#)

3.6 - KRGV (ABC-5, Video): [Valley Vietnam Veteran Battles Diabetes Linked to Agent Orange Exposure](#) (4 October, Ryan Nelson, 275k online visitors/mo; Weslaco, TX)

PHARR – Vietnam veteran Gabriel Avendano said a part of him will always remain overseas.

"What can I tell you? We never come back," said Avendano, "but I'm here."

Avendano is one of the 2.6 million U.S. military personnel possibly exposed to Agent Orange from January 1965 to April 1970.

"They just flew it through the C-130's and they killed a lot of the jungle," said Avendano.

He was formally diagnosed with diabetes in the year 2000. He said he may have lived with the disease for many years before the discovery was made.

"I have to inject my body twice a day," said Avendano, "in the morning and at night."

Diabetes is one of the many diseases considered a presumptive illness by Veterans Affairs.

These are diseases presumed to be linked to Agent Orange exposure, or a Veteran's qualified military service. Veterans do not have to prove these illnesses were spawned by their military service.

The long list of diseases includes several forms of cancer.

Veterans who believe they are suffering from an illness linked to Agent Orange may have health care options through the VA.

"One of the most important things that they need to do when they believe that they've been exposed to Agent Orange is to come by either the McAllen outpatient clinic or the Harlingen outpatient clinic," said VA Texas Valley Coastal Bend spokesperson Reynaldo Leal.

By taking their DD FORM 214 and driver's license to an outpatient clinic, they can begin to explore these options.

"Once we register them as Agent Orange exposed veterans, they'll be given an assessment. They'll be scheduled for an assessment and they'll be input into the Agent Orange registry," said Leal.

These veterans may also qualify for benefits such as disability compensation.

"They can go to any number of veterans service officers, they can go through the county, the state with the Texas Veterans Commission," said Leal.

"Keep going and they'll help you," said Avendano. "You got to keep on going. You have to keep on going to the centers and they will sooner or later help you."

Avendano also urges veterans to consume a healthy, balanced diet.

A complete list of presumed diseases linked to Agent Orange exposure can be found at the U.S. Department of Veterans Affairs website.

3.7 - KOLO (ABC-8, Video): [Reno physician helps Veterans in Puerto Rico](#) (4 October, Terri Russell, 274k online visitors/mo; Reno, NV)

RENO, (Nev) KOLO Under normal circumstances, Dr. Ivan Correa is the chief of staff at the Veterans Affairs Sierra Nevada Health Care System.

He is also a Puerto Rican native, and decided to fly to the island to check on the status of his parents, after two devastating hurricanes hit the area.

"They tell me they are ok. But ok is a relative term. You know ok is that they are alive, and that they are being able to eat some food, and that they go to bed, they wake up in the morning. It is not that everything is fine," says Dr. Correa.

But as a physician locally, taking care of vets, Dr. Correa says he couldn't help but answer the call to attend to veterans on the island both at a Veterans home of 100 patients, and other veterans who for now cannot leave their homes because of the massive damage around the island.

"476 Veterans. We have either laid eyes in a vast majority of them we have laid eyes, but almost to 90% of those.... going house to house and seeing individuals that are already set up with the VA and depend upon us to provide primary care at home. It's called home based primary care," says Dr. Correa.

Fuel is tough to come by, he says the Veteran's Hospital is running off of generators, but it is in a limited capacity.

While he feels good about the care given to veterans during these tough times, he is also surprisingly optimistic about the civilians on the island as well,

"They are going to be able to get over this, and being able to see that there is a bright future for Puerto Rico," says Dr. Correa.

He'll be headed home early next week.

[Back to Top](#)

3.8 - KRIS (NBC-6, Video): [Mobile veterans services center touring county](#) (4 October, Roland Rodriguez, 197k online visitors/mo; Corpus Christi, TX)

With more than 30,000 veterans in Nueces County, the Veterans Affairs Office has come up with a way to make serving those who served our country a little easier by going mobile.

The mobile unit will be traveling throughout the county over three days next week, and it's equipped to provide a variety of services to local veterans.

This a great way to help veterans who live out in rural areas.

The Nueces County Veterans Services will have mobile centers in rural areas three times in the month of October.

Mobile veteran centers will be at:

October 11: VFW Post 3837, 12030 Leopard Street in Corpus Christi, TX

October 12: Driscoll Community Center, 200 East 6th Street in Driscoll, TX

October 13: VFW Post 8932, 702 Jester in Flour Bluff

Representatives will be available 10 a.m. to 2 p.m.

If you're a veteran, and you're going to school or working, this is an opportunity where the Nueces County Veterans Services comes to your area, and you don't have to drive all the way to Corpus Christi office to get help.

The VA Texas Valley Coastal Bend Health Care system, along with the Nueces County Veterans Services will reach out and provide counseling for individual readjustment, bereavement, marital and family issues, employment and career guidance and military sexual trauma (not all locations).

There will be representatives on hand for benefits assistance and referral, substance abuse assistance and referral and community education.

Specific health care, disability, pension, burial and survivors benefit information will be given by the U.S. Department of Veterans Affairs.

For more information, call county veteran services at 361-888-0820.

Many Veterans who rely on VA for their health care live in remote areas. Our nation's rural and highly rural Veteran population is large and dispersed. It is also racially, ethnically, and culturally diverse. Providing comprehensive, high-quality health care to these Veterans is a challenge.

VA's Office of Rural Health (ORH), created in 2007, strives to eliminate the barriers between rural Veterans and the services they have earned and deserve, thus improving Veterans' health and well-being by increasing access to care.

According to ORH, 5.2 million Veterans live in rural communities across the United States, and more than 32.9 million rural Veterans rely on VA for their health care. Veterans are more likely to live in rural areas than Americans who did not serve in the military. While 18 percent of Americans live in rural areas, 23 percent a quarter of Veterans do.

More than half (57 percent) of rural Veterans enrolled in VA health care are 65 years old or older. In addition, 6 percent are women; 9 percent report being members of racial and ethnic minorities; and nearly 435,000 are Veterans of our recent conflicts in Iraq and Afghanistan. About 44 percent of rural Veterans have one or more service-related disabilities.

Rural Veterans have lower than average household incomes than other Veterans; they often face long driving distances to access quality health care; and there are fewer health care providers and nurses per capita in rural areas.

[Back to Top](#)

3.9 - The Robesonian: [Battaglia's death latest proof of veterans' neglect](#) (4 October, Editorial Board, 72k online visitors/mo; Lumberton, NC)

It looks as if an SBI investigation will conclude that Kevin Anthony Battaglia, retired Army, just 33 years old, someone's son, and the father of three young children, died when he was struck by an officer's bullet during a standoff at his Parkton home on Sunday.

But make no mistake: This was suicide by cop, and Battaglia is only the latest veteran of our Middle East wars to pick that poison after returning to this country a shattered self, unable to deny his demons. In a very real sense, it was all of us who pulled the trigger that sent the bullet hurtling that would take Battaglia's life, ending his suffering, but robbing him of so much that life could have offered.

A mix of family, neighbors and Army buddies portrayed Battaglia as a respectful guy who was struggling to assimilate back into society after seeing duty overseas. He had multiple brushes with the law, some minor, but also a serious brawl in a bar that sent him to prison. He was facing two DWI charges in Cumberland County, so it's clear that alcohol was his medication of choice.

Battaglia was medically retired, presumably for a bad back, and he claimed to have been suffering from post traumatic stress disorder, PTSD, that is so prevalent among veterans who experience first hand the horror of war. PTSD was first ascribed to Vietnam War veterans, and now the word is universally recognized.

We were told that Battaglia was frustrated by the Department of Veterans Affairs, believing he wasn't receiving the kind of care he needed and deserved. The VA's problems have been well-documented in recent years, so it's easy to believe Battaglia's gripe was legitimate.

Those who knew him saw his behavior deteriorating in recent weeks, and it could be seen on Facebook where his religious leanings were becoming cult-like. The American flag, Bible and weapons were prominent there — and in recent days he took to wearing camouflage.

There have been many studies concerning the number of veterans with PTSD, and one by RAND in 2014 found at least 20 percent of the 2.7 million Americans who served in Iraq or Afghanistan suffered with it or depression — and half never seek any treatment. That many more were suffering with traumatic brain injury, and about 7 percent both PTSD and TBI.

Those numbers are most likely low.

Last year a study for the Department of Veteran Affairs found that about 20 veterans commit suicide a day in this country. pushing the number to almost 7,500 a year.

So the evidence is overwhelming that this country continues to send its young people to war, and when they return we are ill-equipped to provide the care they deserve.

Often, as with Battaglia, the problems are apparent. But no one could stop this train wreck no matter how leisurely its pace. Friends, especially fellow military, apparently tried — and that included trying to talk him out of the house on the day he died.

Somehow, somehow, this country has to do better for those who step forward and put themselves in harm's way to preserve the ways of life and liberties that the rest of us enjoy.

It's too late for Battaglia, but his death, which was explosive and public, can be given greater meaning should it move the needle at all in the direction of better care for our veterans.

[Back to Top](#)

3.10 - KXLH (CBS-25, MTN News, Video): [VA Montana hosts Fall Health Festival](#) (4 October, John Riley, 57k online visitors/mo; Helena, MT)

Over 550 Veterans received their Flu immunization today along with community members and V-A staff.

VA Montana staff braved the cold temperatures outside to kick off the flu season with the annual Fall Health Festival and Drive Thru Flu Clinic.

The shots were free for enrolled veterans and VA employees and the County Health Department were on hand to supply flu shots for a fee for everyone else.

People 65 years and older, young children, and people with certain health conditions are at higher risk for serious flu complications.

Each year around 200,000 people are hospitalized and around 32,000 people die from Influenza.

The best way to prevent the flu is by getting vaccinated each year.

Veterans attending the event said that they love the ease of the clinic considering they didn't even have to leave their vehicles.

"I've never had to wait long," said veteran Louie Stiles, "When I was doing it privately getting these private shots they'd just take a lot of time, this doesn't."

If you are an enrolled veteran and missed the clinic you can still get your shot at the VA medical Center.

3.11 - HealthTech: [NHIT Week 2017: Technology Improves Care Options for Veterans - Telehealth and predictive analytics are among the tools being deployed more strategically by the VA, Secretary David Shulkin says.](#) (4 October, Dan Bowman, 20k online visitors/mo; Vernon Hills, IL)

One day after publication of a rule that would let doctors at Department of Veterans Affairs facilities leverage telemedicine to provide care to patients anywhere, VA Secretary David Shulkin discussed his agency's goals for using technology moving forward.

Speaking Tuesday at the American Telemedicine Association's Edge 2017 Fall Forum in Washington, D.C., Shulkin outlined five priorities for "fixing" the VA: greater patient choice, systems modernization, improved service timeliness, world-class foundational service and suicide prevention.

"Our mission is to take care of those who serve the country," Shulkin said.

Expanding Telehealth to Improve Access

Telehealth is a big part of the agency's plans for remedying its timeliness and access issues, Shulkin said.

"This is a strategy that VA is growing and investing in and believes is essential to solving this priority of timeliness of services," Shulkin said.

Its new initiative centers on allowing veterans to receive care wherever they are, as long as they have access to an internet connection. Individuals can access provider services on any device in any location, Shulkin said. However, he also noted that moving ahead was less of a technology challenge and more of a legal and regulatory issue.

"Very conservative interpretations interpreted current law as saying that we needed to provide telehealth services from one VA facility to another, which just didn't make a lot of sense to me," Shulkin said. "I was making my patients drive 80 miles from their home to a VA facility waiting room so they could get into an exam room to see me using telehealth; it just didn't make any sense."

The rule change will allow innovators within the agency to do a lot more with its technology now that all VA doctors will be able to take advantage, Shulkin said. To aid in the expansion, in August, the agency announced it would start a nationwide rollout of its VA Video Connect app, which allows providers and patients to connect via live video on a computer, smartphone or tablet.

The American Medical Association offered early praise for the rule, with Dr. Jack Resneck Jr., chairman-elect of the AMA's Board of Trustees, saying in a statement that the VA "has a unique federally controlled healthcare system with essential safeguards" that can ensure high care quality for patients.

Using Analytics for Suicide Prevention

Shulkin also noted that the VA is deploying Big Data and predictive analytics technology to try to proactively identify veterans who may be at risk for suicide.

"This is an American public health crisis, not just a VA crisis," he said. "The number of Americans committing suicide each year is growing, but among veterans it's growing even more."

Access to care through the VA stems such rates, Shulkin said. Over the last 15 years, the rate of veterans committing suicide has gone up 5.4 percent for those accessing VA care; for veterans who don't use the VA, the suicide rate has gone up 38.4 percent. In particular, for female veterans who accessed the VA for care over the last 15 years, the suicide rate decreased 2.6 percent, but increased 81.6 percent for those not using the VA.

"We are really trying to outreach to veterans to let them know that they have options and that treatment works," Shulkin said.

6. Strategic Partnerships

6.1 - WIBW (CBS-13, Video): [Visually impaired veterans tour Kansas Statehouse](#) (4 October, Deneysa Richard, 484k online visitors/mo; Topeka, KS)

The VA of Eastern Kansas sponsored an event on Tuesday that left a long lasting impact.

The Topeka and Leavenworth VA campuses partnered with The Kansas State Capitol to host a tour for veterans who are visually impaired.

Over 40 veterans were in attendance, some of who visited the Capitol for the first time.

"I'm glad to be here," veteran Keith Sese said, "It's the first time I've been at the Capitol, and I have been here since 1982."

The event aimed towards promoting the inclusion of individuals of all abilities in recreational activities.

"With the support of the staff that is here today and their family members, we're going to be able to get them through the tour and to be able to be a part of it, even if they don't have much sight, at least they are here with everybody and just take part in something in the community," said VA Visual Impairment Services Team Coordinator, Dawn Clouse.

Veterans who attended the event also learned about the Kansas Commission for Veteran Affairs, as well as the state and federal benefits available to veterans who are visually impaired.

8.1 - CNN: [Investigations opened into Zinke's meeting with Golden Knights hockey team](#)
(4 October, Miranda Green, 29.7M online visitors/mo; Atlanta, GA)

Washington (CNN)A summer visit that Interior Secretary Ryan Zinke made to the Vegas Golden Knights hockey team is now under two investigations by federal watchdogs.

The Interior Department's inspector general has added concerns about Zinke's meeting with the new NHL team and use of a private jet from Las Vegas to an investigation it opened Friday looking into the secretary's travel, an IG spokesperson confirmed to CNN Wednesday.

The Office of Special Counsel has also opened a Hatch Act investigation into Zinke's meeting with the hockey team.

Zinke met with players on the hockey team at a hotel across the street from their practice facility June 26, a Golden Knights spokesman said.

The meeting was added to the IG probe at the behest of Democratic Reps. Raul Grijalva and Donald McEachin. Grijalva criticized Zinke's need to hire a chartered plane to return home to Montana following the Nevada meeting as well as the purpose of the meeting itself.

"Claims that the secretary's full schedule required the use of chartered aircraft deserve scrutiny. It appears as though Secretary Zinke and his staff could have taken a commercial flight from Las Vegas to Montana if he did not attend the motivational speech to the hockey team owned by his friend and campaign donor, Bill Foley," read Grijalva's letter.

The OSC probe came after a complaint filed by the government watchdog group, Campaign for Accountability and was first reported by Reuters.

An OSC spokesperson told the watchdog group that the Hatch complaint had been "received" and they will "open a case file to address this matter."

An Interior Department spokesperson told CNN that Zinke's late night private flight to Montana from the Nevada meeting cost taxpayers \$12,375. The spokesperson maintained that the flight was booked after no suitable commercial alternative was available and was approved by the Interior's ethics office.

Zinke's meeting with the Vegas Golden Knights is also being scrutinized since it is owned by someone Zinke called "a major donor" when he was running for Congress in 2014.

Bill Foley, a billionaire businessman and owner of the Golden Knights, is also board chairman of Fidelity National Financial Inc. FEC filings show that Foley was responsible for heavily bankrolling Zinke's first congressional campaign in Montana. He personally donated \$2,600 in 2013 and again 2014 -- the maximum contribution amount.

Fidelity donated \$154,823 to Zinke between the years of 2013 and 2018. Fidelity also owns Chicago Title Services, which donated 23,900 to Zinke.

The OSC probe is the sixth known investigation into travel by the administration's cabinet members.

The most recent investigation opened was into Veterans Affairs Secretary David Shulkin's July business trip to London and Denmark, which included meetings with Danish and UK officials as well as a stop at Wimbledon.

[Back to Top](#)

8.2 - ABC News (Video): [Top Democrat questions Kellyanne Conway's air travel](#) (4 October, Benjamin Siegel, 24.1M online visitors/mo; New York, NY)

The top Democrat on the House Oversight Committee is raising questions about White House counselor Kellyanne Conway's air travel, and asking for proof that former Health and Human Services Secretary Tom Price has paid for his seats on controversial private flights.

In a letter to Conway obtained by ABC News, Rep. Elijah Cummings, D-Maryland, has asked Conway for information on all private, non-commercial and military flights she has taken.

Conway, who is the first White House official to be questioned regarding air travel, is coming under scrutiny after Price resigned Friday, and after reporting from Politico revealed that she joined Price on several chartered flights for events across the country.

"Despite the fact that you joined Secretary Price on several of these flights, you have not made any similar public statements indicating whether your own actions were appropriate, whether you will continue to take such flights at taxpayer expense in the future, or whether you plan to personally repay the taxpayers for the cost of your seats on these flights," Cummings wrote.

A White House official told ABC News in response to questions about Conway's travel: "Agencies are responsible for arranging appropriate transportation for their own events. Members of the President's Cabinet occasionally invite relevant White House staff for official travel for events promoting the President's agenda. When White House staff are invited, their travel plans are planned and secured by the inviting agency."

In addition to Price, Interior Secretary Ryan Zinke, Veterans Affairs Secretary David Shulkin and Treasury Secretary Steven Mnuchin have all come under fire for their use of government planes or private aircraft.

The White House is taking steps to crack down on travel and use of private charters in the administration instead of commercial air travel. John Kelly, the White House chief of staff, will

now sign off on all government and chartered air travel by agency leaders, according to a memo released by White House budget director Mick Mulvaney Friday.

“Every penny we spend comes from the taxpayer. We thus owe it to the taxpayer to work as hard managing that money wisely as the taxpayer must do to earn it in the first place,” he wrote.

On Friday, Price said in a statement that he plans to write a personal check to the Treasury for the expense of his travel.

According to a person familiar with the former secretary’s travel, Price’s seats on all the flights cost \$51,877.31. But Price’s total travel has cost the government an estimated \$400,000 in chartered aircraft expenses, according to Politico.

ABC News has reached out repeatedly to the Treasury Department and HHS asking if Price has actually written the promised check. A Treasury Department spokesman declined to reveal that information, citing privacy concerns, while HHS has declined to comment.

On Wednesday Cummings also sent a letter to Mnuchin and acting HHS Secretary Don Wright asking for proof of Price’s pledge: a copy of his check reimbursing the government.

ABC’s Justin Fishel and Katherine Faulders contributed to this report.

8.3 - WRIC (ABC-8, Video): [Virginia taxpayers funding deadly dog experiments at McGuire VA Medical Center](#) (4 October, Kerri O’Brien, 477k online visitors/mo; Richmond, VA)

We’ve known for months that federal tax dollars have been funding the deadly dog experiments at McGuire VA Medical Center. Now, 8News has learned that Virginia has funded those canine experiments, and it has some lawmakers calling for an end to the contributions.

Documents obtained through a Freedom of Information Act request show that the Commonwealth of Virginia contributed to the funding for the McGuire Medical Center’s dog experiments.

The information had been originally redacted but was recently disclosed after watchdog group White Coat Project sued to have the information disclosed.

“We cannot do this, we just can’t,” Virginia State Senator Bill Stanley said.

Sen. Stanley said he was appalled by the experiments, which have involved at least 39 dogs having pacemakers surgically implanted as part of a heart disease study. All of the dogs involved are eventually euthanized.

“I was truly shocked when I learned state funds, state taxpayer money is going to the cruel and inhumane treatment of dogs all in the name of science,” Stanley said.

8News dug further and confirmed that lawmakers allocate money from Virginia’s General Fund each year to the Center for Innovative Technology.

CIT then decides what research projects to fund.

In 2016, CIT awarded McGuire and Dr. Alex Tan nearly \$100,000 for dog research. Dr. Tan is the same doctor that a review committee called “reckless” and responsible for several botched surgeries resulting in dog’s deaths.

We shared what we found with lawmakers.

Stanley said he had no idea that this block grant was being used to conduct deadly tests on dogs.

“We can find better ways in 2017 to find the information that they need to make the lives of our veterans and other people better,” Sen. Stanley said.

The VA argues that dogs are only used in studies when rodents cannot provide the information needed. Other supporters say canine research has and can lead to future medical breakthroughs.

8News spoke with Sherman Gillums, Jr., the Executive Director of Paralyzed Veterans of America. He said the sacrifices involved in animal research are worth it.

“The chance we are taking though, by stopping animal research is you will in effect impact our ability to find new treatments for not just human beings, but animals,” Gillums said.

Still, Sen. Stanley and Sen. Glen Sturtevant have fired off a letter to the governor expressing “opposition to the commonwealth’s role in the funding.” They describe it as “abusive and wasteful.”

They demand to know how much total taxpayer money has been provided for the research, and what action the Commonwealth has taken to address violations at McGuire, including those botched surgeries.

Sen. Stanley tells 8News he has already drafted legislation that would ban the use of Virginia taxpayer money for any research projects that harm dogs.

8.4 - Fayetteville Observer: [Veteran charged in Gray’s Creek murder](#) (4 October, Drew Brooks, 439k online visitors/mo; Manchester, NH)

Air Force veteran, once praised for turning life around, is charged with first-degree murder after fatal shooting in Gray’s Creek

When Garrett Jordan Vann was last in a Cumberland County courtroom, the Air Force veteran was being celebrated for turning his life around.

Once homeless, estranged from his family, battling substance abuse and facing several felony charges, Vann appeared to have excelled under the strict regimen of the county's Veterans Treatment Court.

He was the court's first graduate during a ceremony in April 2016, earning praise from local judges, Veterans Affairs officials and others.

But a little more than a year later, Vann, 32, of the 300 block of Southern Comfort Drive in Parkton, was led into a courtroom under very different circumstances.

At the Cumberland County Detention Center, Vann made his first appearance on charges related to the killing of a Fayetteville man Tuesday night. Vann is charged with first-degree murder and shooting into an occupied vehicle, according to the Cumberland County Sheriff's Office.

He is accused of firing a 12-gauge shotgun into a Chevrolet Impala. Jason Ray Tyner, 40, of Fayetteville, was struck in the head and killed, an arrest warrant said.

Vann was initially charged with second-degree murder, but that charge was dismissed during his first appearance hearing Wednesday afternoon. Vann reportedly was served with the warrants for the newer charges just before appearing in court.

The Sheriff's Office has not issued any details about the incident that happened about 8 p.m. on the 3400 block of Nash Road, off Butler Nursery Road in the Gray's Creek community.

On Wednesday, family members of both Vann and Tyner filled one side of the small courtroom in the detention center. When Assistant District Attorney Robby Hicks announced that the second-degree murder charge was being dropped, there were gasps from some.

"Oh my God," one person said softly while another spoke a bit louder saying, "Thank you."

However, that was before they were told that Vann was being charged with first-degree murder.

Vann is being held without bail.

A 2004 graduate of Gray's Creek High, Vann enlisted in the Air Force in 2007 and served for about three years.

A spokesman for the Fayetteville VA Medical Center confirmed Wednesday that Vann works at the VA. He was hired at around the time he graduated from the Veterans Treatment Court, but the spokesman could not provide any other details.

In 2016, he told The Fayetteville Observer that he had turned his life around with the help of the Veterans Treatment Court team, which includes a judge, lawyers, law enforcement, substance abuse and mental health providers and a team of volunteer mentors.

A year earlier, the veteran who spent two tours in Afghanistan said he was at a low point in his life. But he said he regained control with the help of the court, which holds veterans charged with nonviolent crimes to strict standards, with regular court dates and drug tests.

In exchange, those who graduate can see their cases dismissed.

The Cumberland County veterans court was the second of its kind in North Carolina, following a similar court in Harnett County. Today, there are at least four such courts in the state.

[Back to Top](#)

8.5 - CBS News Radio (ConnectingVets.com): [Mr. Secretary, why is the VA abusing dogs?](#)
(4 October, Jonathan Kaupanger, 23k online visitors/mo; New York, NY)

Puppies having holes drilled into their heads, then parts of their brains removed. Latex injected into puppies' coronary arteries before they're forced to run on treadmills until they have a heart attack. Dogs with severed spinal cords, invasive lung experiments... it's all just another day at the Department of Veterans Affairs.

Each year taxpayers fund between \$15 to \$20 billion worth of animal experiments. What part of that number belongs to the VA is hard to say because Veterans Affairs refuses to report the amount it spends on these type of tests. With over 9,000 projects listed in the Federal Register database, not one has the costs associated with the project listed.

ConnectingVets reached out to the VA with our questions, but as of publishing this article, they have refused to respond. Even with the agency's new "transparency," catchphrase, it's almost impossible to find out what exactly is going on with dog tests at the VA. The only thing coming from the VA on the subject is that they will look into how these tests are being done.

"It's unclear to me," said Justin Goodman, White Coat Waste Project's Vice President for Advocacy and Public Policy. "They say they're going to improve the oversight process for dogs in particular. I know they haven't communicated to Congress what that looks like."

It's not clear that Veterans Affairs even knows what this looks like either. At every turn, VA obfuscates reality and even makes outright lies about this subject.

"It is important to note that almost 100 percent of the animals involved in VA research are mice or rats," said Dr. Michael Fallon, VA's Chief Veterinary Medical Officer, said in a statement recently. "Studies involving larger animals such as canines are rare exceptions; canines accounted for fewer than 0.05 percent of animals used in VA research in 2016."

He went on to say, "At VA we have a duty to do everything in our power to develop new treatments to help restore some of what veterans have lost on the battlefield. One of the most effective ways for VA to discover new treatments for diseases that affect veterans and non-veterans alike is the continuation of responsible animal research."

Fallon also said that VA's animal research program "sets the standard for accountability and transparency both inside and outside the government." I'm going to come back to this point in a minute, but first, you need to understand how animal tests – specifically testing on dogs – are categorized.

Dogs that are kept in a lab, maybe used for breeding but not used for tests, these are category B experiments. Category C would be anything that is non-invasive, a pinprick maybe, but nothing painful. Experiments with category D testing are painful, but relief is given to the dogs.

Category E tests are where dogs are under maximum pain and distress but are given nothing to reduce the pain.

Dr. Fallon's comment about accountability and transparency are just simply ridiculous. The VA doesn't publish anything at all on this, so if this is the "standard for accountability and transparency," it's not a good one. Now, his comment that dogs make up "fewer than 0.05 percent of animals used in VA" is technically true.

Last year there were about 60,000 dogs used in US labs, 0.05 percent of that is around 300, but what the VA doesn't tell us is that it's the ONLY government agency conducting category E tests on dogs.

One of the places conducting these painful tests is the Louis Stokes VA Medical Center in Cleveland, Ohio. Earlier this year, Cleveland announced that five of the dogs they were using in tests had been adopted out after the experiments were complete. Two of these dogs were able to find a home, but the VA gets real shady at this point. These two dogs were only marked for adoption the day a Freedom of Information request was made about the projects. Then, the same day reporters were told about the five adoptions, three of these dogs, it was later found out, had been killed.

This was admitted by the VA only after the facts were made public.

The burden is on the VA to prove veterans are getting something out of these tests, but they are simply quiet on the subject. Take for example the latex injected into puppies experiment. This has been going on for an estimated 20 years. Papers published on this don't even use the word veteran.

"If there's something that is truly valuable and might be promising, let the private sector fund it," said Goodman. "A private company isn't going to run dogs on treadmills for 20 years and not get anything to show for it."

Last month, VA Secretary Dr. David Shulkin wrote an opinion piece about the VA's dog testing programs. In it he discussed many life-changing medical advancements that are due to canine research. He also explains why dogs are used in biomedical research as well. These excuses worked before, but now that we're in the 21st Century, the excuses might explain why the VA is the least advanced federal agency when it comes to biomedical research.

To this, I have four words: Organ on a Chip.

Using this technology, tests can be simulated on the lung, heart, kidney, and arteries. Besides the cruelty factor of animal testing, using dogs often adds to the length of tests and can be expensive. The National Institute of Health estimates that 95 percent of drugs and treatments that pass animal tests fail when done on humans. This makes me wonder if this is the reason why VA refuses to follow the Federal Funding Accountability and Transparency Act.

New legislation has been introduced this year to stop Government funds from being spent on painful dog experiments. The Preventing Unkind and Painful Procedures and Experiments on Respected Species or PUPPERS Act, if signed into law, would only apply to D and E type animal experiments and would essentially stop the U.S. Government from paying to abuse animals.

Secretary Shulkin ends his opinion piece by saying, “The Senate should take a stand and preserve humane and carefully supervised canine research at VA.” Please, Mr. Secretary, can you first explain to your country what’s exactly going on with this research and how much it’s costing us?

And to paraphrase Janet Jackson, what exactly has this done for veterans, lately?

Veterans Affairs Media Summary and News Clips

5 October 2017

[1. Top Stories](#)

1.1 - U.S. News & World Report (AP): [Unclean Floors, Kitchens Found at Colorado](#)

[Veterans Hospital](#) (4 October, Dan Elliott, 24M online visitors/mo; Washington, DC)
Dirty floors, unclean kitchens and dusty vents were found by inspectors who checked a veterans hospital in Denver and a small veterans clinic in southern Colorado, according to a government report. Made public Wednesday by the Veterans Affairs Department's inspector general, the report did not say whether the conditions caused any health problems for patients.

[Hyperlink to Above](#)

1.2 - HuffPost: [VA Loan Program May Be Letting Veterans Down, A shortage of home appraisers is gumming up the works.](#) (4 October, Ann Brenoff, 22.9M online visitors/mo; New York, NY)

One of the promises we make members of the military is that in exchange for their service, we promise to ease their transition back into civilian life when the time comes. For over seven decades, a major element of that deal has been the VA loans that veterans can use to buy a home.

[Hyperlink to Above](#)

1.3 - The Hill: [House Dems boycott VA reform discussion over inclusion of right-leaning group: report](#) (4 October, Ellen Mitchell, 11.8M online visitors/mo; Washington, DC)

House Democrats boycotted a veterans health care reform discussion Tuesday over the inclusion of an advocacy group with ties to Republican Party donors, Military Times reported. House Veterans' Affairs Committee Democrats would not attend the meeting because Concerned Veterans for America (CVA) would be there. Democrats accused the group of being more interested in political attacks than creating new policy.

[Hyperlink to Above](#)

1.4 - Military.com: [VA Photo ID Cards for All Veterans Coming in November](#) (4 October, Amy Bushatz, 9M online visitors/mo; San Francisco, CA)

All honorably discharged veterans of every era will be able to get a photo identification card from the Department of Veterans Affairs starting in November due to a law passed in 2015. The law, known as the Veterans Identification Card Act 2015, orders the VA to issue a hard-copy photo ID to any honorably discharged veteran who applies. The card must contain the veteran's name, photo and a non-Social Security identification number...

[Hyperlink to Above](#)

1.5 - Stars and Stripes: ['Alzheimer's is a veterans' disease:' New group tries to improve support for vets with dementia](#) (4 October, Nikki Wentling, 1.5M online visitors/mo; Washington, DC)

It was part of Taylor's motivation to help create VeteransAgainstAlzheimer's, which officially launched Tuesday. The group is partnering with the Department of Veterans Affairs and Veterans of Foreign Wars to increase funding for Alzheimer's research, boost support for caregivers and enroll more veterans who are affected by dementia into the VA.

[Hyperlink to Above](#)

2. Veteran and Employee Experience

2.1 - The Hill: [The VA's woes cannot be pinned on any singular administration](#) (4 October, Rory E. Riley-Topping, 11.8M online visitors/mo; Washington, DC)

Actions express priorities. Unfortunately, for the nation's veterans, the current priorities of the U.S. Department of Veterans Affairs have not changed much in the Trump era. As much as blaming Trump's populist policies or rousing rhetoric is an easy answer for any problem currently facing the nation, in the interest of fairness, it is important to note that the VA's woes cannot be pinned on any singular administration or political party, including the Trump administration.

[Hyperlink to Above](#)

2.2 - Dayton Daily News: [Dayton VA gets primary care director; Lima clinic to open at new site](#) (4 October, Barrie Barber, 1.1M online visitors/mo; Dayton, OH)

The Dayton VA Medical Center has appointed a former Air Force medical officer to director of primary care and a larger clinic will open next spring in Lima, the federal health agency said. Edward P. Syron, a medical administrator, will earn the \$120,900-a-year overseeing primary and home-based care outpatient services, the VA reported. He replaces Dr. Kavita Peddireddi, who served in the job temporarily until a permanent replacement was found.

[Hyperlink to Above](#)

2.3 - Military Times: [House Democrats boycott VA health event, complicating reform plans](#) (4 October, Leo Shane III, 2.1M online visitors/mo; Springfield, VA)

Plans to overhaul veterans health care this fall could be in jeopardy after House Democrats boycotted a supposedly friendly roundtable discussion on the issue Tuesday over the inclusion of a Republican-linked advocacy group they insist is more interested in political attacks than policy crafting. The controversy comes just a few weeks before House lawmakers are planning to fast-track new legislation surrounding outside care programs at the Department of Veterans Affairs...

[Hyperlink to Above](#)

2.4 - The State Journal-Register: ['Unaccompanied' veterans honored at Camp Butler National Cemetery](#) (4 October, 834k online visitors/mo; Springfield, IL)

Ten "unaccompanied" veterans were honored at Camp Butler National Cemetery on Tuesday. The veterans were recently buried at the cemetery but either had no relatives or no relatives who could travel to the cemetery at the time of burial. The twice-annual ceremony includes the presentation of colors, a ceremonial flag folding, rifle volley and the playing of "Taps" presented by the Sangamon County Interveterans Burial Detail.

[Hyperlink to Above](#)

2.5 - New Hampshire Union Leader: [VAMC volunteers recognized](#) (4 October, 318k online visitors/mo; Manchester, NH)

The Manchester VA Medical Center recently held a volunteer recognition ceremony in honor of its 320 registered volunteers, who serve in more than 28 departments within the facility. The Medical Center's volunteers work directly with veterans as drivers, welcome ambassadors and

recreation aides to behind-the-scenes work in the warehouse, in the research department and in management.

[Hyperlink to Above](#)

2.6 - The Augusta Chronicle: [Club Car donates new golf cart to help disabled at Charlie Norwood VA Medical Center](#) (4 October, Nefeteria Brewster, 240k online visitors/mo; Augusta, GA)

Club Car dedicated a 2017 golf cart, valued at more than \$16,000, to the Charlie Norwood VA Medical Center to help get disabled veterans from the parking lot to the front of the facility. Although the uptown medical center holds two rows of handicapped spaces around the facility, Fred Palmer, a Club Car spokesman, said the new golf cart can further help those who are unable to secure those spots.

[Hyperlink to Above](#)

2.7 - WRDW (CBS-12, Video): [Solution to VA Uptown Parking Problem](#) (4 October, Celia Palermo, 914k online visitors/mo; North Augusta, SC)

The distance from the parking lot to the hospital doors can be pretty far depending on where you park. Veterans say they're sick of walking the distance. The VA says they know and they're fixing it. "A lot of us have difficulty walking...be it bad hips...bad knees...or bad ankles." He walks with a cane because he has arthritis. It's a price he paid, he says, for serving his country.

[Hyperlink to Above](#)

2.8 - WTAJ (CBS-10): [New director at Altoona VA Hospital](#) (4 October, Charlotte Ames, 192k online visitors/mo; Altoona, PA)

The new director at Altoona's Van Zandt VA Medical Center says she hopes to increase the number of services available to area veterans. Currently, the facility doesn't provide specialty services such as cardiology and cancer treatment, so veterans must travel to Pittsburgh for treatment. Sigrid Andrew said her goal is to offer those services in Altoona through the use of telemedicine and visiting clinics.

[Hyperlink to Above](#)

2.9 - Foster's Daily Democrat: [UNH veterans adaptive sports program receives federal grant](#) (4 October, 191k online visitors/mo; Dover, NH)

The University of New Hampshire's Northeast Passage Program will receive a \$172,974.49 grant from the Department of Veterans Affairs (VA) to support adaptive sports opportunities for veterans and servicemembers with disabilities, according to Congresswomen Carol Shea-Porter and Annie Kuster.

[Hyperlink to Above](#)

2.10 - Altoona Mirror: [Van Zandt director makes debut, Andrew said she chose job because veterans seem happy, staff respectful](#) (5 October, William Kibler, 74k online visitors/mo; Altoona, PA)

After Sigrid Andrew applied to become director of the Van Zandt VA Medical Center, but before she was offered the job, she came here and sat in various lobbies and waiting rooms, observing interactions between employees and veterans. She noticed that the veterans seemed happy, that the employees were kind and that they were respectful of each other.

[Hyperlink to Above](#)

2.11 - WAND (NBC-17, Video): [Camp Butler National Cemetery honors 10 unaccompanied veterans](#) (4 October, Meredith Hackler, 68k online visitors/mo; Decatur, IL)

The gloomy weather matched the somber tone 10 veterans were honored for their sacrifice to our country. "The unaccompanied honors veterans ceremony is a way we show respect to veterans that come to our cemetery without family members or without being accompanied by their loved ones," said Antonio Henderson, assistant director of Camp Butler National Cemetery.

[Hyperlink to Above](#)

2.12 - KXRM (FOX-21, Video): [Veteran students speak out after Career Center shuts down](#) (3 October, Carly Moore, 58k online visitors/mo; Colorado Springs, CO)

Dozens of veterans are out of luck after a school they were attending for a technical degree has been shut down. The school in North Texas is called Retail Ready Career Center (RRCC) which focuses on giving veterans hands-on training and professional job placement assistance in the HVAC industry. Two Colorado Springs veterans were enrolled in the class and both of their stories are exactly the same.

[Hyperlink to Above](#)

2.13 - The Daily News: [Staller retires from VA Medical Center](#) (4 October, 54k online visitors/mo; Iron Mountain, MI)

After 24 years of federal service, Patricia Staller of Iron Mountain has retired from the Oscar G. Johnson VA Medical Center. Staller was born and raised in Fort Atkinson, Wis., and is the daughter of Donald and Marie Peterson. She graduated from the University of Wisconsin-Milwaukee with a master's degree in social work.

[Hyperlink to Above](#)

2.14 - FEDweek: [Improving Policy-Making at VA a Complex Task, GAO Finds](#) (4 October, 51k online visitors/mo; Glen Allen, VA)

The Veterans Health Administration, the largest arm of the VA, is encountering several difficulties as it attempts to improve its policy-making, GAO has said. Under a policy issued last year, directives and notices are now the sole documents for establishing national agency policy; other types of documents, such as program office memos, are considered guidance.

[Hyperlink to Above](#)

2.15 - Journal Express: [Residents seek answers at VA town hall](#) (4 October, Pat Finan, 9.2k online visitors/mo; Knoxville, IA)

A town hall meeting about the Veterans Administration campus on Thursday, Sept. 28, focused not only on the site's future but on vets themselves. The quality of their health care drew nearly as much attention as the 170-acre site during the two-hour discussion among about 125 people at the Knoxville Performing Arts Center. Many participants sought details of the process by which the government rids itself of the property. Others were frustrated about depressed or suicidal military comrades.

[Hyperlink to Above](#)

3. Access to Healthcare

3.1 - WDBJ (CBS-7): VA expanding use of tele-medicine to improve access for veterans (4 October, Joe Dashiell, 833k online visitors/mo; Roanoke, VA)

The VA Medical Center in Salem is expanding the use of tele-medicine, as a way to improve veterans' access to health care. Wednesday, a company that provides the technology to the Department of Veterans Affairs demonstrated some of the newest equipment in Salem. Lindsay Gill is the Facility Telehealth Coordinator at the Salem VA Medical Center.

[Hyperlink to Above](#)

3.2 - The National Law Review: Department of Veterans Affairs Aims to Trump State Telemedicine Rules (4 October, 475k online visitors/mo; New York, NY)

The U.S. Department of Veterans Affairs ("VA") is taking a significant step towards expanding needed services to Veterans by proposing a rule to preempt state restrictions on telehealth. Most states currently restrict providers (including VA employees) from treating patients that are located in that state if the provider is not licensed there. As a result, the VA has had difficulty getting a sufficient number of providers to furnish services via telemedicine for fear that they will face discipline from those states for the unlicensed practice of medicine.

[Hyperlink to Above](#)

3.3 - WCSH (NBC-6, Video): Lawsuit targets Togus VA for botched operations (4 October, Don Carrigan, 442k online visitors/mo; Portland, ME)

Six Maine military veterans are waiting for a federal judge in Portland to decide if they will be allowed to sue the Veterans Administration. Those veterans all say they had foot or ankle surgery at the Togus VA hospital, and that the doctor botched the operations. That doctor left in 2008, but the veterans say they still suffer pain and other problems.

[Hyperlink to Above](#)

3.4 - WHAS (ABC-11, Video): Annual event offers one-stop shop for homeless (4 October, Sara Wagner, 439k online visitors/mo; Louisville, KY)

The latest numbers show more than 6,000 people are struggling with homelessness in Louisville. Wednesday, a group of people put their talents together to help drastically reduce those numbers. Homeless Connect is an annual event aiming to serve hundreds of homeless individuals by offering dozens of free resources.

[Hyperlink to Above](#)

3.5 - KRGV (ABC-5, Video): Local Organizations Provide Options for Homeless Valley Veterans (4 October, Cecilia Gutierrez, 275k online visitors/mo; Weslaco, TX)

One homeless veteran is one too many. On any given night, 39,000 veterans in the U.S. find themselves without a permanent roof over their head, according to the U.S. Department of Housing and Urban Development. Clifford Briggs is one of those veterans. From looking at him you would never know he was homeless with his big smile, positive attitude and contagious laughter.

[Hyperlink to Above](#)

3.6 - KRGV (ABC-5, Video): [Valley Vietnam Veteran Battles Diabetes Linked to Agent Orange Exposure](#) (4 October, Ryan Nelson, 275k online visitors/mo; Weslaco, TX)

Veterans who believe they are suffering from an illness linked to Agent Orange may have health care options through the VA. "One of the most important things that they need to do when they believe that they've been exposed to Agent Orange is to come by either the McAllen outpatient clinic or the Harlingen outpatient clinic," said VA Texas Valley Coastal Bend spokesperson Reynaldo Leal.

[Hyperlink to Above](#)

3.7 - KOLO (ABC-8, Video): [Reno physician helps Veterans in Puerto Rico](#) (4 October, Terri Russell, 274k online visitors/mo; Reno, NV)

Under normal circumstances, Dr. Ivan Correa is the chief of staff at the Veterans Affairs Sierra Nevada Health Care System. He is also a Puerto Rican native, and decided to fly to the island to check on the status of his parents, after two devastating hurricanes hit the area. "They tell me they are ok. But ok is a relative term..."

[Hyperlink to Above](#)

3.8 - KRIS (NBC-6, Video): [Mobile veterans services center touring county](#) (4 October, Roland Rodriguez, 197k online visitors/mo; Corpus Christi, TX)

With more than 30,000 veterans in Nueces County, the Veterans Affairs Office has come up with a way to make serving those who served our country a little easier by going mobile. The mobile unit will be traveling throughout the county over three days next week, and it's equipped to provide a variety of services to local veterans. This a great way to help veterans who live out in rural areas.

[Hyperlink to Above](#)

3.9 - The Robesonian: [Battaglia's death latest proof of veterans' neglect](#) (4 October, Editorial Board, 72k online visitors/mo; Lumberton, NC)

It looks as if an SBI investigation will conclude that Kevin Anthony Battaglia, retired Army, just 33 years old, someone's son, and the father of three young children, died when he was struck by an officer's bullet during a standoff at his Parkton home on Sunday. But make no mistake: This was suicide by cop, and Battaglia is only the latest veteran of our Middle East wars to pick that poison after returning to this country a shattered self...

[Hyperlink to Above](#)

3.10 - KXLH (CBS-25, MTN News, Video): [VA Montana hosts Fall Health Festival](#) (4 October, John Riley, 57k online visitors/mo; Helena, MT)

Over 550 Veterans received their Flu immunization today along with community members and V-A staff. VA Montana staff braved the cold temperatures outside to kick off the flu season with the annual Fall Health Festival and Drive Thru Flu Clinic. The shots were free for enrolled veterans and VA employees and the County Health Department were on hand to supply flu shots for a fee for everyone else.

[Hyperlink to Above](#)

3.11 - HealthTech: [NHIT Week 2017: Technology Improves Care Options for Veterans - Telehealth and predictive analytics are among the tools being deployed more](#)

strategically by the VA, Secretary David Shulkin says. (4 October, Dan Bowman, 20k online visitors/mo; Vernon Hills, IL)

One day after publication of a rule that would let doctors at Department of Veterans Affairs facilities leverage telemedicine to provide care to patients anywhere, VA Secretary David Shulkin discussed his agency's goals for using technology moving forward.

6. Strategic Partnerships

6.1 - WIBW (CBS-13, Video): Visually impaired veterans tour Kansas Statehouse (4 October, Deneysa Richard, 484k online visitors/mo; Topeka, KS)

The VA of Eastern Kansas sponsored an event on Tuesday that left a long lasting impact. The Topeka and Leavenworth VA campuses partnered with The Kansas State Capitol to host a tour for veterans who are visually impaired. Over 40 veterans were in attendance, some of who visited the Capitol for the first time.

[Hyperlink to Above](#)

7. Supply Chain Modernization

7.1 - Washington Technology: B3 Group wins \$156M VA financial, program management order (4 October, Ross Wilkers, Vienna, VA)

Leesburg, Va.-based small business B3 Group has won a five-year, \$156 million task order for financial and program management services to the Veterans Affairs Department. The VA awarded the order under its potential 10-year, \$22.3 billion T4NG IT services contract vehicle. Work under this order supports software development lifecycle tasks for the VA's financial services center, B3 Group said Tuesday.

8. Other

8.1 - CNN: Investigations opened into Zinke's meeting with Golden Knights hockey team (4 October, Miranda Green, 29.7M online visitors/mo; Atlanta, GA)

The OSC probe is the sixth known investigation into travel by the administration's cabinet members. The most recent investigation opened was into Veterans Affairs Secretary David Shulkin's July business trip to London and Denmark, which included meetings with Danish and UK officials as well as a stop at Wimbledon.

[Hyperlink to Above](#)

8.2 - ABC News (Video): [Top Democrat questions Kellyanne Conway's air travel](#) (4

October, Benjamin Siegel, 24.1M online visitors/mo; New York, NY)

In addition to Price, Interior Secretary Ryan Zinke, Veterans Affairs Secretary David Shulkin and Treasury Secretary Steven Mnuchin have all come under fire for their use of government planes or private aircraft.

[Hyperlink to Above](#)

8.3 - WRIC (ABC-8, Video): [Virginia taxpayers funding deadly dog experiments at McGuire VA Medical Center](#) (4 October, Kerri O'Brien, 477k online visitors/mo; Richmond, VA)

We've known for months that federal tax dollars have been funding the deadly dog experiments at McGuire VA Medical Center. Now, 8News has learned that Virginia has funded those canine experiments, and it has some lawmakers calling for an end to the contributions. Documents obtained through a Freedom of Information Act request show that the Commonwealth of Virginia contributed to the funding for the McGuire Medical Center's dog experiments.

[Hyperlink to Above](#)

8.4 - Fayetteville Observer: [Veteran charged in Gray's Creek murder](#) (4 October, Drew Brooks, 439k online visitors/mo; Manchester, NH)

A spokesman for the Fayetteville VA Medical Center confirmed Wednesday that Vann works at the VA. He was hired at around the time he graduated from the Veterans Treatment Court, but the spokesman could not provide any other details. In 2016, he told The Fayetteville Observer that he had turned his life around with the help of the Veterans Treatment Court team...

[Hyperlink to Above](#)

8.5 - CBS News Radio (ConnectingVets.com): [Mr. Secretary, why is the VA abusing dogs?](#) (4 October, Jonathan Kaupanger, 23k online visitors/mo; New York, NY)

Puppies having holes drilled into their heads, then parts of their brains removed. Latex injected into puppies' coronary arteries before they're forced to run on treadmills until they have a heart attack. Dogs with severed spinal cords, invasive lung experiments... it's all just another day at the Department of Veterans Affairs.

1. Top Stories

1.1 - U.S. News & World Report (AP): [Unclean Floors, Kitchens Found at Colorado Veterans Hospital](#) (4 October, Dan Elliott, 24M online visitors/mo; Washington, DC)

DENVER (AP) — Dirty floors, unclean kitchens and dusty vents were found by inspectors who checked a veterans hospital in Denver and a small veterans clinic in southern Colorado, according to a government report.

Made public Wednesday by the Veterans Affairs Department's inspector general, the report did not say whether the conditions caused any health problems for patients.

The report, dated Sept. 29, said a February inspection found cleanliness problems in eight patient care areas, two areas where instruments are sterilized and in some ice machines and refrigerators in kitchens.

It also said some ventilation grills and horizontal surfaces were dusty.

The report did not specify whether the problems were at the aging Denver hospital or a small outpatient clinic in Salida, Colorado, which inspectors also visited. Kristen Schabert, a spokeswoman for the VA's Denver-based Eastern Colorado Health Care System, said inspectors focused on the Denver hospital.

A new veterans medical center is under construction in suburban Aurora to replace the Denver facility and is expected to open next year. The February inspection did not include that facility.

In a written statement, the VA said plans are in place to address the problems the inspectors found.

The VA nationwide is under scrutiny over spending, long wait times for care and other problems.

Last month, The Associated Press reported the VA program that pays for veterans to get health care in the private sector could run out of money this year, despite getting \$2.1 billion in emergency funding in August. Another shortfall could force the VA to limit referrals to outside doctors, causing delays in medical care for hundreds of thousands of veterans.

In Colorado, the cost of the medical center being built outside Denver has nearly tripled to almost \$1.7 billion. That so infuriated lawmakers that they stripped the department of the authority to oversee large construction projects and put the Army Corps of Engineers in charge.

Other problems found in the February inspections in Colorado:

- Two doors in a mental health treatment facility were found unlocked and the alarms were not turned on.
- Inspectors found no record that some new employees were given required security training.
- Inspectors found no evidence that security personnel were compiling or analyzing data on violent or disruptive incidents.

-- Staff did not compile adequate reports on some patients who were transferred to other facilities, including whether the patients were stable enough to be moved and whether the new facility was told the patients' history, symptoms and test results.

1.2 - HuffPost: [VA Loan Program May Be Letting Veterans Down, A shortage of home appraisers is gumming up the works.](#) (4 October, Ann Brenoff, 22.9M online visitors/mo; New York, NY)

One of the promises we make members of the military is that in exchange for their service, we promise to ease their transition back into civilian life when the time comes. For over seven decades, a major element of that deal has been the VA loans that veterans can use to buy a home.

These loans require no money down and can be obtained with much lower credit scores than other mortgages. But the much-vaunted program, which began under the GI Bill of 1944, has hit a snag.

The Mortgage Bankers Association recently warned the Department of Veterans Affairs that the program may be hurting the very vets it was designed to help.

Here's The Deal

Under the VA loan program, veterans can borrow up to \$417,000 — or \$625,000 in designated “high cost areas,” like parts of California — without putting any money down for a house that will be their principal residence. That's a good deal considering the median home value in the U.S. is currently \$200,700, according to Zillow.

Among the program's other attractions, there is no maximum debt ratio — meaning that the borrower's monthly mortgage payment can exceed the typical lender's restriction of no more than 28 percent of gross monthly income. There is no minimum credit score requirement either, while most other home mortgages require a credit score of at least 620 for conventional loans or 580 for most Federal Housing Administration loans. A VA loan can also be used to refinance an existing loan. And vets can get these loans more than once.

The VA home loan program is one of the key reasons that 79 percent of veterans own their own homes, compared with just 63 percent of the non-veteran population, according to Trulia.com.

But recent vets don't seem to be taking advantage of the program in large numbers. Just 36 percent said they had applied for a VA home loan in a 2014 survey of 2,000 members of Iraq and Afghanistan Veterans of America.

Pressured Not To Use VA Loans

Real estate agents have long complained that the VA's hurry-up-and-wait requirements when it comes to appraisals and inspections, associated red tape and extra hoops to jump through compared with conventional loan programs ultimately hurt veterans' efforts to purchase homes in a competitive market.

Now the Mortgage Bankers Association is highlighting the problem of delays in the appraisals that the VA requires. There is a shortage of available appraisers, which has led to longer wait times and missed contract deadlines.

Add the appraiser shortage to the fact that it's just faster and simpler to work with other buyers, and some home sellers and their agents shy away from dealing with VA loans. As a result, the mortgage bankers group said, veterans are under pressure to bypass the benefits of a VA loan and seek conventional financing instead.

Steve O'Connor, senior vice president of the Mortgage Bankers Association, laid out his group's concerns in a Sept. 5 letter to the executive director of the VA's Loan Guaranty Service, who oversees the loan program. He said that veterans often can't close a VA loan and are forced "to choose other loan programs to meet certain deadlines or face other adverse outcomes."

Finding alternate home funding means having to come up with as much as a 20 percent down payment, meeting tighter credit standards and walking away from a promised benefit they earned when they put their lives on the line for their country. A non-VA loan can also cost the veteran an additional "tens of thousands of dollars of interest payments over the life of the loan," O'Connor wrote.

The VA did not respond to questions emailed by HuffPost or make a spokesperson available for comment by publication time.

Appraisers Are Upset

While the Mortgage Bankers Association letter was sparked by anecdotal evidence provided by its members, the group is not the first to note the impact of changes to the appraisal industry — changes that have not set well with current appraisers and may have discouraged new ones from entering the field.

Almost 75 percent of the 2,248 appraisers surveyed in a 2017 study from the National Association of Realtors said they planned to leave or have already left the business because of greater regulation and an industry shift away from working directly for lenders to working for larger companies that manage groups of appraisers. These appraisal management companies take as much as 50 percent of what home buyers pay in appraisal fees.

The Dodd–Frank Wall Street reform law of 2010 put in place new federal guidelines that required banks to have a "firewall" between lenders and appraisers to avoid conflicts of interest. These appraisal management companies blossomed as the new middlemen, but the actual appraisers — the people who do the hands-on work — saw their pay cut. Appraisers also contend they're unfairly taking the blame when the companies "gouge" buyers with excessive fees, according to housing writer Kenneth R. Harney.

So appraisers are unhappy these days, and the assignments they most don't want to accept are those involving VA loans, according to the National Association of Realtors study. The double whammy of red tape and low compensation was the given reason.

To address the problem, the Mortgage Bankers Association offered a series of recommendations to the VA: use a virtual desktop appraiser to supplement the traditional

process of on-site visits, grant property inspection waivers, and lend its support to a proposal from the Appraisal Qualifications Board to reduce licensing requirements.

“The damaging impact to the veteran community is clear and the VA should act quickly,” the group wrote.

1.3 - The Hill: [House Dems boycott VA reform discussion over inclusion of right-leaning group: report](#) (4 October, Ellen Mitchell, 11.8M online visitors/mo; Washington, DC)

House Democrats boycotted a veterans health care reform discussion Tuesday over the inclusion of an advocacy group with ties to Republican Party donors, Military Times reported.

House Veterans’ Affairs Committee Democrats would not attend the meeting because Concerned Veterans for America (CVA) would be there. Democrats accused the group of being more interested in political attacks than creating new policy.

CVA was one of 18 veterans groups invited to the event, including the American Legion, AMVETS, Iraq and Afghanistan Veterans of America and Wounded Warrior Project.

“The chairman has the right to invite any organization he pleases, but to pretend that CVA is anything other than a partisan organization that invests time and money into discrediting Democratic members of Congress, and specifically the ranking member of this committee, is disingenuous,” Griffin Anderson, press secretary for the committee’s Democrats, told Military Times.

“We will not pretend it is anything else.”

House lawmakers are looking to quickly move new legislation on outside care programs at the Department of Veterans Affairs (VA), including the Veterans Choice Program.

Under the three-year-old Choice program, the VA pays for veterans who live too far away from the nearest Veterans Health Administration (VHA) facility or need a quicker medical appointment to use private doctors and hospitals.

Critics of several proposals to replace the Choice program are afraid that will lead to privatizing the VA. Outsourcing veteran care to the private sector, they fear, will divert billions of dollars from VHA services to medical providers that can’t be as well supervised and that have limited experience caring for veterans.

VA Secretary David Shulkin has promised to replace the Choice program with the Coordinated Access and Rewarding Experiences program (CARE) to be revealed this month.

The closed roundtable discussion which Democrats refused to attend covered broad outlines of the upcoming proposals.

"It is disappointing that the Democrat members of the committee did not want to hear ideas on how to fix the VA from a group of veterans, including many patients of the VA and combat veterans like myself," said Dan Caldwell, the policy director for CVA.

A spokeswoman for House VA Committee Chairman Phil Roe (R-Tenn.) told Military Times that attendees for the event "were invited to participate because of their interest in and serious study of VA's community care programs. They were invited for that reason and that reason only."

[Back to Top](#)

1.4 - Military.com: [VA Photo ID Cards for All Veterans Coming in November](#) (4 October, Amy Bushatz, 9M online visitors/mo; San Francisco, CA)

All honorably discharged veterans of every era will be able to get a photo identification card from the Department of Veterans Affairs starting in November due to a law passed in 2015.

The law, known as the Veterans Identification Card Act 2015, orders the VA to issue a hard-copy photo ID to any honorably discharged veteran who applies. The card must contain the veteran's name, photo and a non-Social Security identification number, the law states.

A VA official on Wednesday confirmed the cards are on track to be available nationwide starting in November. Veterans may apply for the card online, but a timeline for how long it will take to receive a card after application has not been finalized, the official said.

Although the law states that the VA may charge a fee for the card, the official said no fee is planned.

The change comes as the military exchange stores prepare to open online shopping to all honorably discharged veterans starting Nov. 11. Veterans who wish to use that new benefit must be verified through VetVerify.org.

Congress passed the ID law as a way to help veterans prove their service without showing a copy of their DD-214.

"Goods, services and promotional activities are often offered by public and private institutions to veterans who demonstrate proof of service in the military, but it is impractical for a veteran to always carry Department of Defense form DD-214 discharge papers to demonstrate such proof," the law states.

Some veterans already carry such proof of service.

Those who receive health care from the VA or have a disability rating can get a photo ID VA health card, also known as a Veteran Identification Card. Military retirees also hold an ID card issued by the Defense Department.

Veterans are also able to get a proof of service letter through the VA's ebenefits website. And some states will include a veteran designation on driver's licenses if requested.

Editor's Note: The fourth and fifth graphs have been updated with additional information from the VA.

1.5 - Stars and Stripes: [‘Alzheimer’s is a veterans’ disease:’ New group tries to improve support for vets with dementia](#) (4 October, Nikki Wentling, 1.5M online visitors/mo; Washington, DC)

WASHINGTON — Shawn Taylor knows the strain that Alzheimer’s can put on a family.

Her grandmother developed Alzheimer’s in the early 1980s. Then, her grandfather was diagnosed with the disease. Then her mother and father.

At age 21, as an only child and grandchild, the deadly form of dementia forced Taylor to become a caregiver for the next 35 years.

“I understand the intense caregiver needs,” she said. “And as I watch my mother slip away -- unable to recognize me, unable to take care of her most basic needs -- I realized I needed to do more.”

It was part of Taylor’s motivation to help create VeteransAgainstAlzheimer’s, which officially launched Tuesday. The group is partnering with the Department of Veterans Affairs and Veterans of Foreign Wars to increase funding for Alzheimer’s research, boost support for caregivers and enroll more veterans who are affected by dementia into the VA.

Her decision to focus her attention on veterans -- a group disproportionately at risk for dementia -- was personal, too. Taylor’s grandfather, John Gavin, was an Army colonel and West Point graduate, and her father, Bernard Landau, is a retired lieutenant colonel and Vietnam War veteran.

The veterans-focused group is a new segment of UsAgainstAlzheimer’s, which lobbies to increase research for a cure. George Vradenburg, a cofounder of UsAgainstAlzheimer’s, described the organization as “small, feisty and fearless.”

“We’re learning far too often veterans are disproportionately affected by this disease and are at a greater risk for Alzheimer’s because of their war-related brain impairments,” Vradenburg said. “Alzheimer’s is a veterans’ disease.”

article continues below

Veterans are at higher risk for Alzheimer’s for several reasons, explained David Cifu, a researcher and traumatic brain injury specialist at the VA. There’s a higher prevalence of mental health disorders in the veterans community, he said, which creates more likelihood of developing dementia. According to a study in the Journal of the American Geriatrics Society, the risk of Alzheimer’s doubles for veterans with post-traumatic stress disorder.

Traumatic brain injury also increases the risk of dementia, and of developing it earlier in life, according to a 2014 study published by the American Academy of Neurology. Older veterans

with TBI are 60 percent more likely to develop dementia than other veterans, according to the study.

Iraq and Afghanistan veterans are at higher risk to develop Alzheimer's sometime in their lives because they've sustained more brain injuries, VeteransAgainstAlzheimer's wrote in a report Monday. Of all combat wounds in Iraq and Afghanistan, 22 percent were brain injuries – nearly double the brain injuries sustained during the Vietnam War.

"Now more than ever, we need to redouble our efforts," Cifu said.

One study published by the National Institute of Health estimates 420,000 veterans will have developed Alzheimer's between 2010 and 2020.

About 270,000 veterans with dementia are enrolled in the VA, Cifu said. The number enrolled in the VA represents only about 35 percent of the 774,000 veterans estimated to have dementia.

The VFW got involved in order to improve the numbers, said Ryan Gallucci, a director with the VFW. Some veterans and families don't realize they qualify for VA benefits, such as caregiver support, Gallucci said.

Others are barred from those services because of VA regulations. For instance, some caregiver benefits are available only to family members of veterans wounded post-9/11. There's legislation in Congress, H.R. 1472 and S. 591, that would expand the services to all veterans.

Karen Garner, who was a caregiver to her husband, Senior Master Sgt. Jim Garner, said she didn't qualify for VA assistance because of income restrictions. She said her husband, who died of Alzheimer's last year at age 52, was confused and hurt that the VA wouldn't provide help.

"With the low enrollment numbers in VA... we have to do better than this," Gallucci said. "This is where we can help make a difference."

Increasing funding for Alzheimer's research is also key, said Cifu. In 2016, the VA conducted 157 research projects on Alzheimer's disease across 44 locations, at a cost of \$30 million.

"This sounds like a lot, and it is, but we need to do even more," he said.

Cifu is part of a consortium of specialists at the VA and Defense Department starting a new study to find connections between brain injury and dementia, he said. The group is looking to get as many veterans and servicemembers involved as possible.

At age 56, Taylor is still a primary caregiver. Her mother is in the late stages of Alzheimer's, and her father was just diagnosed with the disease last fall.

Taylor is hoping improvements in research and support could help Vietnam War-era veterans such as her father -- who's now 87 and living in a nursing home -- as well as the potential surge of Iraq and Afghanistan veterans who could develop the disease in the next 20 to 30 years.

"What we want to do is start the conversation," Taylor said. "Nobody wants to talk about it, but we have to talk about it. It's happening, and what's ahead of us is going to be devastating."

2. Veteran and Employee Experience

2.1 - The Hill: [The VA's woes cannot be pinned on any singular administration](#) (4 October, Rory E. Riley-Topping, 11.8M online visitors/mo; Washington, DC)

Actions express priorities. Unfortunately, for the nation's veterans, the current priorities of the U.S. Department of Veterans Affairs have not changed much in the Trump era.

As much as blaming Trump's populist policies or rousing rhetoric is an easy answer for any problem currently facing the nation, in the interest of fairness, it is important to note that the VA's woes cannot be pinned on any singular administration or political party, including the Trump administration.

Entrenched accountability issues such as those that are plaguing the VA take time to resolve. But, it appears that, thus far, the Trump administration may have over-promised and under-delivered.

Trump campaigned on a platform of overhauling the VA, and despite a robust legislative agenda aimed at following through on those campaign promises, the VA's priorities over the last several months have included gallivanting through Europe, defending questionable research programs, and delaying the release of a much-needed strategic plan on the future of the Veterans Choice program.

Wasting taxpayer funding seems to be at the route of many of the VA's problems. As explained by Avik Roy, a health care policy advisor and president of the Foundation for Research on Equal Opportunity, "[i]f you look at the budget of the VA and simply divide it by the number of people enrolled . . . there's more than enough money to fund veterans' healthcare. The problem is too much of the money is being spent not on veterans' healthcare, but on other institutional priorities."

The first institutional priority distracting top VA officials from veterans' healthcare relates to splurging on travel. Although VA Secretary David Shulkin's travel indiscretions pale in comparison to other members of the Trump cabinet, such as recently-resigned Health and Human Services Secretary Tom Price who spent over \$1 million of taxpayer funds on charter flights, a Washington Post investigation into Shulkin's travel revealed that, while veterans continued to struggle with the improved access to care promised by the Trump administration, he attended Wimbledon, toured Westminster Abbey, and took a cruise along the Thames at taxpayer expense. The VA's Office of the Inspector General is now conducting its own investigation into the propriety of these travel expenses.

The revelations regarding Shulkin's travel were particularly egregious in light of the fact that, less than two weeks prior, Shulkin signed a memo instructing VA staff to curtail travel in order to "generate savings" within the department. Ironically, the memo went on to state that providing clearly documented rationale on the necessity of official travel was required to promote "accountability in determining whether employee travel in their organization is essential."

Assuming that leadership starts from the top, Shulkin has failed to provide the type of leadership necessary to promote the type of accountability and cost savings that are essential to reforming the department he oversees.

The second institutional priority distracting the VA from veterans' healthcare is in regard to the department's controversial canine research program. Many in the veterans community found it bizarre that, during the month of September, which is National Suicide Prevention Awareness Month, the only public opinion authored by Shulkin for a major media outlet was an opinion piece defending this program in USA Today, while he remained relatively silent publicly on internal data released the same week on the high rates of veteran suicide in rural states and among female veterans, until the Senate Committee on Veterans' Affairs scheduled a hearing on the topic at the end of the month.

As noted by Ben Krause, disabled veteran and founder of the website Disabledveterans.org in a San Diego Tribune article discussing this topic, "I'm not going to say canine research should or shouldn't be done at all, I just don't think the VA should do it. VA has a hard enough time not withholding healthcare from veterans on a regular basis." If VA could redirect its zealotry in defending this program to providing better access to care, veterans would certainly be better off.

Finally, the third institutional priority distracting VA from veterans' healthcare is its inability to effectively implement the Veterans Choice Program. Although the Choice Program is relatively new, having been first signed in to law in 2014, VA has consistently struggled with the role of private sector care in conjunction with VA-care, with some equating the Choice Program with the demise of the department and full-scale privatization of the VA.

As VA continues to find a balance between its own existence and the role of private sector care, it nonetheless asked Congress for an emergency increase in funding for the program due to increased demand.

Despite legislation in August that provided the program with an additional \$2.1 billion in funding, the money continues to be spent faster than expected because of a combination of the popularity of the program and VA's inability to properly account for the money. As a result, VA has slowed down veterans' referrals for medical appointments outside the VA, thus causing additional delays in needed care.

In requesting additional funding, Shulkin acknowledged to a Senate subcommittee in charge of VA funding that "we do not want to see veterans impacted at all because of our inability to manage budgets." However, this is exactly what is continuing to happen.

As Sen. John McCain (R-Ariz.) said in a scolding to Shulkin in a letter dated Sept. 27

"On June 21 of this year, I joined several of my colleagues in writing to you to express our serious concerns about reports of financial mismanagement at the VA. We said at the time that it was essential, given the growing demand for care under the Choice program, that the VA immediately correct the failures that created such a serious shortfall. It appears as if you have not done so."

It should go without saying that VA's top priority should be veterans, but as the current administration's actions have demonstrated to date, this is not always the case. Only when the VA embraces a culture of veterans first, rather than entrenched bureaucracy first, can they

overcome the many institutional detriments distracting them from effectively using its taxpayer funded budget to provide veterans with first class care.

Rory E. Riley-Topping has dedicated her career to ensuring accountability within the Department of Veterans Affairs (VA) to care for our nation's veterans. She is the principal at Riley-Topping Consulting and has served in a legal capacity for the U.S. House of Representatives Committee on Veterans' Affairs, the National Veterans Legal Services Program, the U.S. Court of Appeals for Veterans Claims, and the Department of Veterans Affairs, and can be reached on Twitter @RileyTopping.

2.2 - Dayton Daily News: [Dayton VA gets primary care director; Lima clinic to open at new site](#) (4 October, Barrie Barber, 1.1M online visitors/mo; Dayton, OH)

DAYTON - The Dayton VA Medical Center has appointed a former Air Force medical officer to director of primary care and a larger clinic will open next spring in Lima, the federal health agency said.

Edward P. Syron, a medical administrator, will earn the \$120,900-a-year overseeing primary and home-based care outpatient services, the VA reported. He replaces Dr. Kavita Peddireddi, who served in the job temporarily until a permanent replacement was found.

Syron, who joined the VA staff three years ago, was a former chief of non-VA care coordination and a group practice manager at the medical facility.

He's also an assistant adjunct professor in medicine at the Wright State University Boonshoft School of Medicine, according to the VA.

Next spring, a larger VA outpatient clinic is scheduled to open at 750 High St. in Lima. The renovated 9,750-square-foot leased facility will handle a growing patient case load that has risen 10.5 percent over two years, figures show.

The new facility will have about 100 more parking spaces than the current location at 1303 Bellfontaine Ave., the VA said.

The clinic has served about 4,200 veterans and counted more than 22,000 outpatient visits within the past year, the VA reported.

The VA also plans a \$1 million expansion of an outpatient clinic in Springfield, officials announced in August. Proposals to expand on site or move to a new location were due this December. The VA has targeted an opening in 2018.

The Dayton VA Medical Center has a more than \$425 million budget and employs about 2,100 employees at the medical center and four outpatient clinics in Lima, Middletown and Springfield, Ohio and Richmond, Indiana. The facilities treated about 39,300 patients in the past fiscal year, said spokesman Ted Froats.

[Back to Top](#)

2.3 - Military Times: [House Democrats boycott VA health event, complicating reform plans](#) (4 October, Leo Shane III, 2.1M online visitors/mo; Springfield, VA)

WASHINGTON — Plans to overhaul veterans health care this fall could be in jeopardy after House Democrats boycotted a supposedly friendly roundtable discussion on the issue Tuesday over the inclusion of a Republican-linked advocacy group they insist is more interested in political attacks than policy crafting.

The controversy comes just a few weeks before House lawmakers are planning to fast-track new legislation surrounding outside care programs at the Department of Veterans Affairs, including the problematic Choice program.

The topic was already sensitive within the veterans community before the boycott, with concerns about shifting funding to private-sector physicians and the possibility of a slow dismantling of VA responsibilities.

But tensions grew this week when Democrats on the House Veterans' Affairs Committee refused to attend Tuesday's event because of the presence of Concerned Veterans for America, an advocacy group with ties to Republican Party donors.

"The chairman has the right to invite any organization he pleases, but to pretend that CVA is anything other than a partisan organization that invests time and money into discrediting Democratic members of Congress, and specifically the ranking member of this committee, is disingenuous," said Griffin Anderson, press secretary for the committee's Democrats.

"We will not pretend it is anything else."

CVA was one of 18 veterans groups invited to the event, a group that included the large legacy organizations such as the American Legion and AMVETS as well as newer organizations like Iraq and Afghanistan Veterans of America and Wounded Warrior Project.

Several VA officials also attended, including soon-to-be acting VA Undersecretary for Health Carolyn Clancy. Committee Chairman Rep. Phil Roe, R-Tenn., moderated the discussion.

Individuals in the closed roundtable characterized the discussion as largely non-eventful, covering broad outlines of the proposals to come. Dan Caldwell, policy director for CVA, criticized the Democratic members for turning it into a political issue.

"It is disappointing that the Democrat members of the committee did not want to hear ideas on how to fix the VA from a group of veterans, including many patients of the VA and combat veterans like myself," he said. "We have worked for years to develop comprehensive and bipartisan solutions to the VA's problems and appreciate that Chairman Roe invited us."

Tiffany Haverly, communications director for Roe, said attendees for the event "were invited to participate because of their interest in and serious study of VA's community care programs. They were invited for that reason and that reason only."

CVA is a controversial force within the veterans community. Earlier this year, the group ran ads in Minnesota blasting committee ranking member Rep. Tim Walz, D-Minn., for blocking VA reform proposals favored by Republicans, saying that he “let veterans down.”

Group officials have declined to release funding sources and trustee information for the group, but numerous news reports have linked the group to the Koch brothers network of conservative activist organizations. They’ve also enjoyed significantly better access to policy talks and events under President Donald Trump than they did under former President Barack Obama.

Unlike most veteran advocacy groups, CVA’s non-profit designation allows them to spend significant amounts on political or lobbying efforts. Haverly said committee precedent has included organizations like CVA in the Capitol Hill discussions.

Groups like IAVA and the Veterans of Foreign Wars have had similar lobbying arms in the past.

CVA’s main focus in recent years has been pushing for an expansion of outside care options for veterans. Officials there insist the current VA system is too overwhelmed and archaic to provide reliable, swift service for veterans’ medical needs, and have advocated for widespread changes to the system to allow more competition between VA hospitals and private-sector medical centers.

Some Democrats have labeled that approach a step toward privatizing the department. The health care reforms this fall are expected to center around the fight, balancing access issues with upgrades to the existing VA infrastructure.

VA Secretary David Shulkin has pushed for significant changes to the Choice program, including changing eligibility criteria to open the program to more veterans. He promised the replacement to the program — the Coordinated Access and Rewarding Experiences program, or Veterans CARE — is expected to be rolled out later this month.

In the meantime, House and Senate lawmakers have been meeting with veterans groups to try and work out potential challenges to those proposals early.

An extension of the Choice program was signed into law in August, but money for tens of thousands of veterans’ medical appointments outside the department is expected to run out by the end of the year, giving lawmakers a tight legislative timeline for reforms.

Whether the Democrats boycott in the House hurts that timeline — or leads to similar fights in the Senate, where Democrats there have voiced similar complaints about CVA — remains to be seen.

Haverly said Roe “remains committed to a bipartisan process for community care reform” despite the brewing fight. Griffin voiced similar optimism.

“The veterans committee is known for its bipartisanship, and while this invitation was a speedbump in that relationship, it is our hope we can get back on track so we can find a long-term solution to VA care in the community in the coming weeks,” he said.

CVA officials said they hope to remain heavily involved in the work as well. Public hearings on the issue are expected by the end of this month.

2.4 - The State Journal-Register: [‘Unaccompanied’ veterans honored at Camp Butler National Cemetery](#) (4 October, 834k online visitors/mo; Springfield, IL)

Ten “unaccompanied” veterans were honored at Camp Butler National Cemetery on Tuesday.

The veterans were recently buried at the cemetery but either had no relatives or no relatives who could travel to the cemetery at the time of burial.

The twice-annual ceremony includes the presentation of colors, a ceremonial flag folding, rifle volley and the playing of “Taps” presented by the Sangamon County Interveterans Burial Detail.

[Back to Top](#)

2.5 - New Hampshire Union Leader: [VAMC volunteers recognized](#) (4 October, 318k online visitors/mo; Manchester, NH)

The Manchester VA Medical Center recently held a volunteer recognition ceremony in honor of its 320 registered volunteers, who serve in more than 28 departments within the facility.

The Medical Center’s volunteers work directly with veterans as drivers, welcome ambassadors and recreation aides to behind-the-scenes work in the warehouse, in the research department and in management.

“Appreciating these volunteers is important to veterans and the staff, (who) are proud to work day in and day out with these selfless servants,” said Alfred Montoya, acting Medical Center director at the Manchester VA.

Madeline Dreusicke, a volunteer representing the VFW Auxiliary, was on the 2017 volunteer recognition ceremony planning committee and received an award herself for having worked 1,750 volunteer hours. When asked what drives her to give so much, she said, “Just because it is the right thing to do. They served us and we should serve them. They come home changed, and when they come to the (Manchester VA) they are in a safe zone, and I want to be a part of providing that. These brave men and women are always on my mind. Serving them is an honor.”

It is with a heavy heart that the Medical Center says goodbye to Richard Dobbyn, Charles Meserve Sr., Gerard Provencher and Preston Lawrance, who passed away within the past year.

“Richie, Charlie, Gerry and Preston made such a difference at the Medical Center,” said Debra Krinsky, chief of voluntary service at the VA. “They truly improved the lives of so many of the veterans we serve. We are better for having shared our lives with these wonderful men. They will forever be remembered as our family, and for their contribution to the wellness of the veterans we serve.”

[Back to Top](#)

2.6 - The Augusta Chronicle: [Club Car donates new golf cart to help disabled at Charlie Norwood VA Medical Center](#) (4 October, Nefeteria Brewster, 240k online visitors/mo; Augusta, GA)

Club Car dedicated a 2017 golf cart, valued at more than \$16,000, to the Charlie Norwood VA Medical Center to help get disabled veterans from the parking lot to the front of the facility.

Although the uptown medical center holds two rows of handicapped spaces around the facility, Fred Palmer, a Club Car spokesman, said the new golf cart can further help those who are unable to secure those spots.

"Transportation on both campuses in downtown and here in uptown is very important to get around," he said. "They have parking and then they have transportation needs within the campus so I just see this as a fulfillment in partnership with that."

Bob Frasier, a Voluntary Service Chief for the medical center who received the key to the new cart Wednesday, said the unique valet service is effective immediately.

Phones will also be added to poles in the parking lot by the end of the year for visitors who plan to use the new door-to-door service, he said.

"We're going to continue to monitor the parking situation here and take steps as needed to make it the best possible experience for our veterans when they get here," Frasier said. "So what we're hoping to do eventually is we're going to add phones and we're going to have a phone number for veterans and when they park they can actually call and identify their location and then we can have a car clerk meet them at their car and have door-to-door service that way."

Asked how services will be maintained, Frasier said it would depend significantly on those who are willing to volunteer as drivers for up to four hours each week.

"That would help us out greatly," he said. "This is a pretty big step for us so of course in order for us to continue to do this we're going to need people volunteer their hours."

Those interested in volunteering can visit the Charlie Norwood VA Medical Center website for more information.

2.7 - WRDW (CBS-12, Video): [Solution to VA Uptown Parking Problem](#) (4 October, Celia Palermo, 914k online visitors/mo; North Augusta, SC)

The distance from the parking lot to the hospital doors can be pretty far depending on where you park.

Veterans say they're sick of walking the distance. The VA says they know and they're fixing it.

"A lot of us have difficulty walking...be it bad hips...bad knees...or bad ankles."

He walks with a cane because he has arthritis. It's a price he paid, he says, for serving his country.

He's a Vietnam War Veteran and he travels for miles to come here for his medical needs.

"This is the best facility for miles around."

Well, he loves the facility, but he doesn't love having to walk so far from his car just to get seen.

"You gotta struggle across, what? About two football fields?"

The VA and community leaders like Fred Palmer with Club Car are noticing.

"This uptown campus is quite the place...the parking looks like it could be challenging."

It is, but here's how they're helping you. Club Car and the VA teamed up to add another vehicle to their fleet, a golf cart. Except this one is dedicated to the busy and big parking lots at the VA Uptown Division, not the medical district.

"If someone does need a little extra help, our vehicle can provide that comfortably."

It'll take you from wherever you park to the front door of the facility, quite the trek.

"The distance from here to there, this is the short distance. That's about one football field. Then you gotta get inside and then you gotta walk upstairs."

But once the cart hits the streets...

"Anytime I can take pressure off the bone, I'll be riding. The driver won't have to be alone, I'll ride with him."

Officials say they hope to have the cart up and running as soon as possible so they can start helping people. But to do that, they say they need even more volunteers to drive the new cart, and others.

[Back to Top](#)

2.8 - WTAJ (CBS-10): [New director at Altoona VA Hospital](#) (4 October, Charlotte Ames, 192k online visitors/mo; Altoona, PA)

Altoona, Blair County, Pa. - The new director at Altoona's Van Zandt VA Medical Center says she hopes to increase the number of services available to area veterans. Currently, the facility doesn't provide specialty services such as cardiology and cancer treatment, so veterans must travel to Pittsburgh for treatment.

Sigrid Andrew said her goal is to offer those services in Altoona through the use of telemedicine and visiting clinics.

"If we can establish clinics whether it be four hours a week, two days a week, bring that provider in from the Pittsburgh VA, we would like to do that as well. But we need to establish what our needs are here in Altoona," she explained.

Andrew said the chief of staff from the Pittsburgh VA Medical Center is in Altoona to assess which specialty services are needed. She said she's already requested iPads for exam rooms, so that telemedicine can be used for consults with specialists in Pittsburgh.

The director said her background as a nurse impacts how she makes decisions as an administrator.

"I think when you're dealing with the costs and the budget and when you have to make choices, being a nurse does allow you to fairly balance and to fairly assess what the needs really are, because, at the end of the day, the patient, the veteran, is at the center of all decisions and you will always weigh on the side of the patient," Andrew said.

[Back to Top](#)

2.9 - Foster's Daily Democrat: [UNH veterans adaptive sports program receives federal grant](#) (4 October, 191k online visitors/mo; Dover, NH)

WASHINGTON, D.C. — The University of New Hampshire's Northeast Passage Program will receive a \$172,974.49 grant from the Department of Veterans Affairs (VA) to support adaptive sports opportunities for veterans and servicemembers with disabilities, according to Congresswomen Carol Shea-Porter and Annie Kuster.

"As a leader in the field of recreational therapy, UNH's Northeast Passage Program empowers military men and women who are living with disabilities, and today's grant will help them continue their important work," Shea-Porter said. "I have always been proud to support this excellent program. Congratulations to the staff and volunteers at Northeast Passage on this recognition of the important work they do for our servicemembers, veterans, and so many Granite Staters living with disabilities."

"Recreational therapy holds tremendous potential for our men and women who have served in uniform," said Kuster, a member of the House Committee on Veterans' Affairs. "The University of New Hampshire Northeast Passage Program supports veterans and servicemembers with disabilities who wish to pursue adaptive sports as a means of therapy. I'm proud of the work being done by UNH to support our veterans and servicemembers and will continue to advocate on behalf this important program."

"We are very pleased that the VA has once again recognized Northeast Passage as a leader in providing adaptive sports opportunities for veterans and servicemembers with disabilities," said Northeast Passage Director Jill Gravink. "Our programs enable veterans to come together and share their experiences with people with similar interests, building social networks where veterans and servicemembers can connect with each other and enjoy recreation with the same independence as their non-disabled peers."

Founded in 1990 as a non-profit organization, NEP merged with UNH in 2000 and specializes in recreational therapy (RT) and adaptive sports for children, adults, servicemembers, and veterans with disabilities. RT interventions help people with disabilities cope with the stress of their illness or disability and prepare individuals for managing their disabilities in order to achieve and maintain independence, productivity, health, and well-being.

In March, Shea-Porter and Kuster wrote to the House Appropriations Subcommittee on Military Construction and Veterans Affairs requesting increased funding for the Adaptive Sports Grant program. In their letter to appropriators, the Congresswomen requested that the committee include report language recommending \$10,000,000 for adaptive sports programs.

[Back to Top](#)

2.10 - Altoona Mirror: [Van Zandt director makes debut, Andrew said she chose job because veterans seem happy, staff respectful](#) (5 October, William Kibler, 74k online visitors/mo; Altoona, PA)

After Sigrid Andrew applied to become director of the Van Zandt VA Medical Center, but before she was offered the job, she came here and sat in various lobbies and waiting rooms, observing interactions between employees and veterans.

She noticed that the veterans seemed happy, that the employees were kind and that they were respectful of each other.

It's a "buyer's market" in the VA for managerial posts, and Andrew had a choice about whether to come to Altoona.

She ended up coming here largely because of those observations, she said Wednesday at an introductory meeting with local media.

"It was the people of Altoona who lured me," she said.

A native of the Newark, Del., area who spent time as a child in Vermont, she also appreciated the region's four distinct seasons. "And you can't discount the mountains," she said.

Van Zandt territory — extending to DuBois, Johnstown, Huntingdon and State College — is also drivable, in contrast to some larger VA hospital territories where airplane flights are necessary, she added.

Andrew is coming to a hospital that hasn't had a permanent director for 20 months, following William Mills' departure for Memphis, and that has been roiled by accusations of whistleblower retaliation examined during recent hearings before the Merit System Protection Board — a quasi-judicial body that ensures federal employees are treated based on performance.

The whistleblowers testified about a poisonous atmosphere created because of their mandated reporting of what they said was the impairment from dementia of a doctor in their department.

Andrew intends to deal with those issues by moving "forward," she said.

“I’m hoping for a healing-type future,” she said.

She hopes to establish good relationships with employees — and with veterans, the overall community and the media, she said.

Two employee meetings have already been held, said Andrew, who hadn’t yet completed her third day on the job.

She plans to be “transparent, direct and open” and to tell the truth, she said.

She has a track record for that, she said — giving as evidence that at a facility where she worked, a union president called a counterpart at another facility — presumably where she was going to work — and said of Andrew, “You may not always like the decisions she makes, but you will always know what she stands for.”

She stands for the veterans, she said.

One recurrent issue raised in Van Zandt town hall meetings in recent times has been what veterans say is a shortage of specialist services.

Some of those veterans remember when there were 200 acute beds at Van Zandt, said hospital spokeswoman Andrea Young. Now there are only 11 acute beds, she said, to go with 40 nursing home beds. Those old ways aren’t coming back, Young said.

But, channeling Regional VA Director Michael Adelman, Andrew said there are modern ways to remedy the problem.

She plans to work with recently appointed Acting Chief of Staff Ali Sonel — who remains Chief of Staff at the Pittsburgh VA — to recruit doctors here and increase the number of telemedicine consultations from Pittsburgh, of visits to Altoona from specialists in Pittsburgh and of “fee-based” visits from private providers in this area to Van Zandt, as well as fee-based visits by veterans to those providers in their community settings.

Thanks to Sonel, it’s already happening, Andrew said.

Sonel’s position in Pittsburgh — his “connections” — can help make it all work, she said.

To make it work well, however, the hospital will do a market analysis to identify how those changes can serve the needs of 26,000 veterans on the hospital’s roster, she said.

[Back to Top](#)

2.11 - WAND (NBC-17, Video): [Camp Butler National Cemetery honors 10 unaccompanied veterans](#) (4 October, Meredith Hackler, 68k online visitors/mo; Decatur, IL)

SPRINGFIELD, Ill. (WAND)-The gloomy weather matched the somber tone 10 veterans were honored for their sacrifice to our country.

"The unaccompanied honors veterans ceremony is a way we show respect to veterans that come to our cemetery without family members or without being accompanied by their loved ones," said Antonio Henderson, assistant director of Camp Butler National Cemetery.

A 21-gun salute, and the playing of tap, pays homage to those who were lost.

"We are honoring and respecting the selfless service that the veterans gave to our nation," added Henderson.

"Every veteran should have a ceremony like this and for whatever reason many don't get that opportunity," said Sam Montalbano with the Inter Veterans Burial Detail.

Many of those who took part in the ceremony are veterans themselves.

"I'm a veteran as well," added Henderson. "I feel that it is also my duty and responsibility to give back for those who have laid the ultimate sacrifice,"

"It's giving back for all the things that they do while they are in the service," says Montalbano. "So, it's a good feeling for me personally."

While there's nothing we can do to bring them back, those involved say they hope the lost are always remembered.

"We are their brothers and sisters. It's our responsibility to let them know that they are not alone on their final salute," added Henderson.

The next unaccompanied veteran's ceremony will be held on April 5th, 2018 and Camp Butler National Cemetery.

[Back to Top](#)

2.12 - KXRM (FOX-21, Video): [Veteran students speak out after Career Center shuts down](#)
(3 October, Carly Moore, 58k online visitors/mo; Colorado Springs, CO)

Dozens of veterans are out of luck after a school they were attending for a technical degree has been shut down.

The school in North Texas is called Retail Ready Career Center (RRCC) which focuses on giving veterans hands-on training and professional job placement assistance in the HVAC industry.

Two Colorado Springs veterans were enrolled in the class and both of their stories are exactly the same. The Career Center approached them about the HVAC program and just about a week ago, without much notice the school was shut down and now their futures are uncertain.

One of those vets was Steve Pattillo who says two weeks ago his future career looked totally different after signing up for a 6-week certification class at RRCC.

"They convinced everyone to quit their jobs. I had a good paying job, at the time, they promised me something better. So, I moved my family here," said Pattillo, an Army veteran.

On September 20, students were abruptly told the school was closed for the day and to go home but class would resume the next day.

"I did feel a little bit weird I felt a little uneasy because, it's my families life basically in that schools hand," said Pattillo.

Then on that Friday, September 22, students say the school's president, John Davis, made an announcement to the group saying the Department of Veterans Affairs was investigating the school. This information left another classmate and Colorado Springs veteran, Charles Autry, with even more questions.

"[He] Basically assured us this was nothing more than an administrative review, that the school was in no danger of closing," said Autry, a Navy veteran.

Davis went on to say an employee had been fired for stealing \$20,000 of scholarship funds and the school illegally had too many student veterans.

"Less than a week later, we were in class doing some lecture lessons. In the middle of that, we had some school officials, come in and interrupt the class session and say 'you had 5 minutes to get your stuff and get off the property'," said Autry.

With no other answers, these two veterans along with more than 300 other students were sent home without their certificate or money back.

Right now both fathers want the same thing.

"I hope myself and other veterans are restored what they are owed," said Autry.

"I'd basically like to see every body get back out on their feet and recuperate from what the school's done to them and I'd like to prevent veterans from going through this again," said Pattillo.

Autry is reaching out to Congressman Doug Lamborn's office to see if they could help. They said the following in response:

"Congressman Lamborn's office routinely helps veterans in our community. We have heard from one veteran about this school and are currently awaiting paperwork that will allow us to advocate on his behalf."

The school was thought to be violating the 85/15 rule, meaning that only 85 percent of the student body can use their GI bill to pay for tuition; the other 15 percent had to be non-service members or fund the program themselves. Davis said it turns out 98 percent of the people enrolled were former service members.

Pattillo and Autry did use \$21,000 and 9 months of their VA benefits. They're concerned what will happen next.

“Basically what the VA has told us, or told me, is that it’s up in the air if we’ll have our benefits restored, fully or partially restored, as it stand right now we are out 9 months of our benefits,” Autry said.

“They said that’s a big maybe and they are not 100 percent sure, so it’s basically a big waiting game for all the veterans involved if we get anything back or not,” Pattillo said.

FOX21 attempted to reach out to the Career Center, but no one answered the phone or returned the voicemail. The veterans said most of their classmates are also joining in on a class action lawsuit.

[Back to Top](#)

2.13 - The Daily News: [Staller retires from VA Medical Center](#) (4 October, 54k online visitors/mo; Iron Mountain, MI)

IRON MOUNTAIN — After 24 years of federal service, Patricia Staller of Iron Mountain has retired from the Oscar G. Johnson VA Medical Center.

Staller was born and raised in Fort Atkinson, Wis., and is the daughter of Donald and Marie Peterson. She graduated from the University of Wisconsin-Milwaukee with a master’s degree in social work.

After completing her graduate work at the Milwaukee VA Medical Center, Staller started her career at the Waco VA Medical Center in Texas. She later worked at the Central Texas VA Health Care System in Temple, Texas, and then transferred to the Iron Mountain VA Medical Center in 2001.

During her tenure in Texas, Staller worked in many medical areas and piloted the first Patient Orientation Program to help new veterans and their families coming into the VA. At the Iron Mountain VA, she worked in various clinical social work areas, including acute care, student education, low vision and ethics. Most recently, she served as social worker for geriatric and extended care in the medical center’s Community Living Center.

Staller has been involved in many local theater productions, and she is a member of Zonta and the local chapter of Toastmasters of the Northwoods.

She is a widow and has one son, Curtis Staller; a daughter-in-law, Olga; and a granddaughter, Natasha, residing in Round Rock, Texas.

[Back to Top](#)

2.14 - FEDweek: [Improving Policy-Making at VA a Complex Task, GAO Finds](#) (4 October, 51k online visitors/mo; Glen Allen, VA)

The Veterans Health Administration, the largest arm of the VA, is encountering several difficulties as it attempts to improve its policy-making, GAO has said.

Under a policy issued last year, directives and notices are now the sole documents for establishing national agency policy; other types of documents, such as program office memos, are considered guidance. VHA is reviewing about 800 existing national policy documents to eliminate those that no longer meet its new definitions, and to rescind or recertify those that are outdated, GAO said.

However, it found that “VHA is not planning to review guidance documents, such as program office memos and standard operating procedures, to assess whether they align with its updated directive, because there is no central repository for these documents and it would be too resource intensive to locate all of them.”

“Further, GAO’s review found—contrary to VHA’s updated directive—that program offices are continuing to use memos to issue policy. The continued use of program office memos to establish national policy undermines VHA’s efforts to improve its policy management,” it said.

It added that program offices do not track or consistently disseminate the guidance documents they issue. And while the VHA has process for making national policy documents accessible to its medical centers and the veterans integrated service networks that oversee those centers, it lacks a process for making guidance documents accessible at the local level. The result is that “VHA lacks assurance that staff receive and follow the same guidance, as intended.”

Nor does the VHA routinely collect information on local challenges in complying with national policies—such as resource constraints and undefined time frames—or on waivers of those requirements that program offices can approve “on an ad hoc basis.”

[Back to Top](#)

2.15 - Journal Express: [Residents seek answers at VA town hall](#) (4 October, Pat Finan, 9.2k online visitors/mo; Knoxville, IA)

KNOXVILLE - A town hall meeting about the Veterans Administration campus on Thursday, Sept. 28, focused not only on the site’s future but on vets themselves. The quality of their health care drew nearly as much attention as the 170-acre site during the two-hour discussion among about 125 people at the Knoxville Performing Arts Center.

Many participants sought details of the process by which the government rids itself of the property. Others were frustrated about depressed or suicidal military comrades. Still more expressed worries about their own health, or about the eyesore they fear the campus will become.

The VA sent three people to the stage, mostly to discuss patient care. Gail Graham, medical director for the VA’s Central Iowa Health Care System, touted its new outpatient clinic at 1607 N. Lincoln St. While she accepted accountability for moldy, deteriorating buildings at the old site, she eventually drew the line.

“I’m in the business of delivering health care, not in the business of maintaining buildings,” Graham said.

The government won't sink money into the upkeep or the teardown of the buildings, officials said. Its main interest is getting the most money it can from the property and returning it to productive use, they said.

Those jobs fall to the General Services Administration, the real estate arm of the federal government. Jennifer Mollenshott, branch chief of the VA's Fort Worth, Texas, office, is in charge of the process for the next year or so.

Mollenshott said the VA is completing a review of the property and its potential, which she expects to see by the end of 2017. When GSA gets that report, a process of screenings is launched. Government agencies can express interest in the property, though that's not likely, she said. Other screenings include a look at the site's suitability to serve homeless people.

In similar situations, the process usually leads to the land being sold as-is, Mollenshott said. While many in the audience expressed eagerness for action, their waiting will continue as the process plays out through 2018.

"If all goes well, soup to nuts, you're looking at about a year," Mollenshott said.

The government's appraisal process considers what it calls "the highest and best use" for the property as well as local market conditions as it determines fair market value, Mollenshott said. The results of that appraisal will not be available to the public, she added.

Mollenshott tried to dispel concerns that potential buyers won't be interested in land that's dotted with large, dilapidated buildings.

"Trust me, I have seen a lot worse, and we still make a lot of money," she said.

Knoxville resident Park Woodle asked whether the site could be split into smaller parcels, contrary to what Knoxville has been told in the past. He mentioned several parts of the property that hold potential for housing or other uses. Such splits likely will be part of the marketing strategy, Mollenshott responded.

Would the city get a chance to get some parcels? Would it have to pay for them? Those were Knoxville resident Mike Lane's questions. Mollenshott and Mayor Brian Hatch both had answers.

The city and other government entities get dibs earlier in the screening process, Mollenshott said, though it would have to pay fair market price. Hatch said Knoxville might be interested in getting some of the land, while expressing wariness about the burden such a move could bring.

"We're like to have some control of that situation so that we can get something in there that's good for the community," he said.

With five days to reflect on takeaways from the two-hour meeting, Hatch described himself Tuesday as hopeful but cautious, given the history of the campus. The town hall was a good step, he said, and city and federal officials will continue to meet regularly.

"There were no real surprises," Hatch said. "I was hoping we would know what direction GSA was thinking of going. I think that once we have a better direction from GSA on selling the

property, we can then begin to formulate a little better strategy for the community to move forward.”

[Back to Top](#)

3. Access to Healthcare

3.1 - WDBJ (CBS-7): [VA expanding use of tele-medicine to improve access for veterans](#) (4 October, Joe Dashiell, 833k online visitors/mo; Roanoke, VA)

The VA Medical Center in Salem is expanding the use of tele-medicine, as a way to improve veterans' access to health care.

Wednesday, a company that provides the technology to the Department of Veterans Affairs demonstrated some of the newest equipment in Salem.

Lindsay Gill is the Facility Telehealth Coordinator at the Salem VA Medical Center.

"It means improved access," Gill told WDBJ7. "It allows our veterans to be seen at a distance, so they don't have to travel to the Salem VA. A lot of our veterans live hours away and this will allow them to seek care closer to home, but from the Salem Medical Center so it's really exciting."

A new program that will let veterans consult with health professionals from their homes should be coming on line in the next year.

[Back to Top](#)

3.2 - The National Law Review: [Department of Veterans Affairs Aims to Trump State Telemedicine Rules](#) (4 October, 475k online visitors/mo; New York, NY)

The U.S. Department of Veterans Affairs ("VA") is taking a significant step towards expanding needed services to Veterans by proposing a rule to preempt state restrictions on telehealth.

Most states currently restrict providers (including VA employees) from treating patients that are located in that state if the provider is not licensed there. As a result, the VA has had difficulty getting a sufficient number of providers to furnish services via telemedicine for fear that they will face discipline from those states for the unlicensed practice of medicine.

The VA has a real need for expanding its telemedicine capabilities as many of its patients are located in rural and underserved areas. The VA's top clinical priority is mental health, and having more robust telemedicine capabilities could help improve timeliness of treatment (a reputational sore spot for the VA). The VA could also use telemedicine to reach more people in need that may not otherwise seek help. The rule would allow the VA to more evenly distribute care by hiring providers in urban areas where there is larger pool and have them treat in rural areas (via telemedicine).

Not everyone is happy about the proposed rule, however. Organizations such as the American Medical Association oppose the rule as undermining each state's ability to govern the practice of medicine within its borders. The concern is that states would have no ability to regulate their citizens' care under this new framework.

While this rule is limited only to VA patients and providers, the hope is that other federal agencies or even states will follow the VA's lead. Given the importance of increasing access to care and the advances in the delivery of care via telemedicine, it might be time for states to reexamine their restrictive approach to professional licensure.

[Back to Top](#)

3.3 - WCSH (NBC-6, Video): [Lawsuit targets Togus VA for botched operations](#) (4 October, Don Carrigan, 442k online visitors/mo; Portland, ME)

AUGUSTA, Maine (NEWS CENTER) — Six Maine military veterans are waiting for a federal judge in Portland to decide if they will be allowed to sue the Veterans Administration.

Those veterans all say they had foot or ankle surgery at the Togus VA hospital, and that the doctor botched the operations. That doctor left in 2008, but the veterans say they still suffer pain and other problems.

Army veteran Steve Turner of Topsham isn't involved in the lawsuit but said Wednesday he also suffered at the hands of the same doctor.

Turner told NEWS CENTER his foot was operated on in early 2008 because of injuries sustained during his 13 years in the Army. He said there were problems soon after the first surgery and the doctor did a second operation. He said the foot then became badly infected and swollen and that only an emergency operation by a different doctor saved his foot.

Turner said it still causes him pain. He said the VA contacted him in 2010 and arranged a meeting, at which time it apologized, and blamed the doctor.

"They were very apologetic about what happened to me," he said, "and went step by step what [the doctor's] discrepancies were during surgery, what he should have done., and not done."

VA officials on Wednesday would not answer questions about the situation, referring all inquiries to the U.S. attorney's office.

In 2014, NEWS CENTER reported on a similar case involving a Hampden man, who said he had also suffered pain and continuing problems because of a failed ankle surgery by the same doctor. At that time, VA Togus director Ryan Lilly confirmed it had been dealing with a number of foot and ankle surgeries that had turned out badly.

Lilly said the staff had been alerted to the problems by patients, had contacted the doctor's patients to apologize and offer to pay for whatever further care was required.

Lilly was asked how many patients suffered problems. "We're talking less than 100," he replied at that time.

Neither the VA nor the U.S. Attorney would say Thursday how many total patients were affected.

Steve Turner said he does not blame the VA, but blames the doctor, and would "like to sue him personally," if he could.

Lawyers knowledgeable about the case told NEWS CENTER the doctor cannot be sued personally because he was working for the VA at the time.

That doctor is believed to be living in the New York City area, where an internet search showed he has been working at a medical practice. A receptionist at that practice said Wednesday the doctor no longer worked there.

The lawsuits by the six veterans are aimed at the VA, seeking permission to sue the government even though Maine's statute of limitations has expired. Lawyers said oral arguments are scheduled for later this month and a ruling could come this fall.

[Back to Top](#)

3.4 - WHAS (ABC-11, Video): [Annual event offers one-stop shop for homeless](#) (4 October, Sara Wagner, 439k online visitors/mo; Louisville, KY)

The latest numbers show more than 6,000 people are struggling with homelessness in Louisville. Wednesday, a group of people put their talents together to help drastically reduce those numbers. Homeless Connect is an annual event aiming to serve hundreds of homeless individuals by offering dozens of free resources.

The Salvation Army is no stranger to helping those in need. Inside the building, you'll find many stories of service and success, with plenty of new chapters being added at Wednesday's event.

"It's a lot of work to do, and it can't be done by one agency. It's got to be done by everybody in a group effort. It's got to be done by a community," Salvation Army Commander Major Roy Williams said.

More than 80 partners came together to help those who need it most.

"There's one thing they need and they come here and they say, oh, I didn't know that was there. They get that and they start lifting themselves up out of poverty," Williams said.

The organizations offered everything from IDs to eye and ear exams to haircuts and clothes. There were selfless acts at every corner, even feet washing.

"You can tell a lot about a person's health by washing their feet and then they can direct them to the medical center," Williams said.

Acts like that help to wipe away some of the struggle and stereotypes that come with homelessness.

"It's not all about people who just want to sit outside and lay around all day. There's homeless that want to help themselves every day," Williams said.

Organizers said this event has the ability to reach many who won't seek it otherwise.

"A lot of people don't feel safe in the shelter, particularly veterans who may have had trauma," Healthcare for Homeless Veterans supervisor Jamie Watts said.

Having everything set up in a one-stop shop makes a major difference when you're used to anything but convenience.

"Anybody who has ever been homeless or been at the point where you're almost homeless knows you spend a lot of time waiting in lines, being in waiting rooms, and getting on a waiting list. So, our hope is that today you can get a lot of that done in one place and get moving faster toward getting a place of your own," Coalition for Homeless Executive Director Natalie Harris said.

Veteran Jack Jones knows that all too well.

"I've been homeless off and on for several years, but at this time, I've been homeless for about three months," Jones said.

Thanks to the VA, Jones has housing now and is getting ready to work again.

"I signed up for a library card so I can learn computers. I don't know computers yet, but they're going to teach me," Jones said.

Homelessness can take away so much, but these acts of kindness can help life get back on track.

"It's amazing what they do and so far, I haven't met a negative person yet," Jones said.

Organizers said the number of homeless has consistently dropped every year in Louisville for the last five years. They expect to serve around 600 people at this year's event and hope that number continues to go down each and every year, eventually eliminating the need for the event altogether.

[Back to Top](#)

3.5 - KRGV (ABC-5, Video): [Local Organizations Provide Options for Homeless Valley Veterans](#) (4 October, Cecillia Gutierrez, 275k online visitors/mo; Weslaco, TX)

HARLINGEN – One homeless veteran is one too many. On any given night, 39,000 veterans in the U.S. find themselves without a permanent roof over their head, according to the U.S. Department of Housing and Urban Development.

Clifford Briggs is one of those veterans. From looking at him you would never know he was homeless with his big smile, positive attitude and contagious laughter.

Briggs comes from a military family, but now the ex-Navy firefighter goes to work during the day and sleeps at Loaves and Fishes in Harlingen.

"I moved down from Portland and it didn't work out too well, so I ended up at Loaves and Fishes. It's just a place to lay your head, stay out the weather at night to sleep," he said.

Briggs said he doesn't let life's unexpected turns get the best of him.

CHANNEL 5 NEWS spoke to Tommy Martinez, the Loaves and Fishes director of Family Emergency Assistance, to see if homeless veterans in their shelter are seen often.

"It ranges. Sometimes we have one to two homeless veterans in a month during the summer months or maybe even December we might have maybe three to four homeless veterans in our shelter at one point." Felix Rodriguez, a veteran service officer with the Hidalgo County Veterans Service.

He explained to us why veterans are more likely to face homelessness.

"Well, many of these veterans that are having issues with finding a place to stay, a home are coming back with issues that civilians don't have to deal with," he said. "And some of these issues and conditions run the gamut between post-traumatic stress disorder, traumatic brain injury, depressive disorders and other conditions secondary to that."

He said there are several ways you can help a homeless veteran.

"My first advice to them is to call the VA homeless hotline, it's a HUD hotline," he said.

Rodriguez added other ways to help homeless veterans are through Family Endeavors and other organizations.

You can contact the VA Homeless Hotline at 877-424-3838. For a full list of resources click [here](#).

3.6 - KRGV (ABC-5, Video): [Valley Vietnam Veteran Battles Diabetes Linked to Agent Orange Exposure](#) (4 October, Ryan Nelson, 275k online visitors/mo; Weslaco, TX)

PHARR – Vietnam veteran Gabriel Avendano said a part of him will always remain overseas.

"What can I tell you? We never come back," said Avendano, "but I'm here."

Avendano is one of the 2.6 million U.S. military personnel possibly exposed to Agent Orange from January 1965 to April 1970.

"They just flew it through the C-130's and they killed a lot of the jungle," said Avendano.

He was formally diagnosed with diabetes in the year 2000. He said he may have lived with the disease for many years before the discovery was made.

"I have to inject my body twice a day," said Avendano, "in the morning and at night."

Diabetes is one of the many diseases considered a presumptive illness by Veterans Affairs.

These are diseases presumed to be linked to Agent Orange exposure, or a Veteran's qualified military service. Veterans do not have to prove these illnesses were spawned by their military service.

The long list of diseases includes several forms of cancer.

Veterans who believe they are suffering from an illness linked to Agent Orange may have health care options through the VA.

"One of the most important things that they need to do when they believe that they've been exposed to Agent Orange is to come by either the McAllen outpatient clinic or the Harlingen outpatient clinic," said VA Texas Valley Coastal Bend spokesperson Reynaldo Leal.

By taking their DD FORM 214 and driver's license to an outpatient clinic, they can begin to explore these options.

"Once we register them as Agent Orange exposed veterans, they'll be given an assessment. They'll be scheduled for an assessment and they'll be input into the Agent Orange registry," said Leal.

These veterans may also qualify for benefits such as disability compensation.

"They can go to any number of veterans service officers, they can go through the county, the state with the Texas Veterans Commission," said Leal.

"Keep going and they'll help you," said Avendano. "You got to keep on going. You have to keep on going to the centers and they will sooner or later help you."

Avendano also urges veterans to consume a healthy, balanced diet.

A complete list of presumed diseases linked to Agent Orange exposure can be found at the U.S. Department of Veterans Affairs website.

3.7 - KOLO (ABC-8, Video): [Reno physician helps Veterans in Puerto Rico](#) (4 October, Terri Russell, 274k online visitors/mo; Reno, NV)

RENO, (Nev) KOLO Under normal circumstances, Dr. Ivan Correa is the chief of staff at the Veterans Affairs Sierra Nevada Health Care System.

He is also a Puerto Rican native, and decided to fly to the island to check on the status of his parents, after two devastating hurricanes hit the area.

"They tell me they are ok. But ok is a relative term. You know ok is that they are alive, and that they are being able to eat some food, and that they go to bed, they wake up in the morning. It is not that everything is fine," says Dr. Correa.

But as a physician locally, taking care of vets, Dr. Correa says he couldn't help but answer the call to attend to veterans on the island both at a Veterans home of 100 patients, and other veterans who for now cannot leave their homes because of the massive damage around the island.

"476 Veterans. We have either laid eyes in a vast majority of them we have laid eyes, but almost to 90% of those.... going house to house and seeing individuals that are already set up with the VA and depend upon us to provide primary care at home. It's called home based primary care," says Dr. Correa.

Fuel is tough to come by, he says the Veteran's Hospital is running off of generators, but it is in a limited capacity.

While he feels good about the care given to veterans during these tough times, he is also surprisingly optimistic about the civilians on the island as well,

"They are going to be able to get over this, and being able to see that there is a bright future for Puerto Rico," says Dr. Correa.

He'll be headed home early next week.

[Back to Top](#)

3.8 - KRIS (NBC-6, Video): [Mobile veterans services center touring county](#) (4 October, Roland Rodriguez, 197k online visitors/mo; Corpus Christi, TX)

With more than 30,000 veterans in Nueces County, the Veterans Affairs Office has come up with a way to make serving those who served our country a little easier by going mobile.

The mobile unit will be traveling throughout the county over three days next week, and it's equipped to provide a variety of services to local veterans.

This a great way to help veterans who live out in rural areas.

The Nueces County Veterans Services will have mobile centers in rural areas three times in the month of October.

Mobile veteran centers will be at:

October 11: VFW Post 3837, 12030 Leopard Street in Corpus Christi, TX

October 12: Driscoll Community Center, 200 East 6th Street in Driscoll, TX

October 13: VFW Post 8932, 702 Jester in Flour Bluff

Representatives will be available 10 a.m. to 2 p.m.

If you're a veteran, and you're going to school or working, this is an opportunity where the Nueces County Veterans Services comes to your area, and you don't have to drive all the way to Corpus Christi office to get help.

The VA Texas Valley Coastal Bend Health Care system, along with the Nueces County Veterans Services will reach out and provide counseling for individual readjustment, bereavement, marital and family issues, employment and career guidance and military sexual trauma (not all locations).

There will be representatives on hand for benefits assistance and referral, substance abuse assistance and referral and community education.

Specific health care, disability, pension, burial and survivors benefit information will be given by the U.S. Department of Veterans Affairs.

For more information, call county veteran services at 361-888-0820.

Many Veterans who rely on VA for their health care live in remote areas. Our nation's rural and highly rural Veteran population is large and dispersed. It is also racially, ethnically, and culturally diverse. Providing comprehensive, high-quality health care to these Veterans is a challenge.

VA's Office of Rural Health (ORH), created in 2007, strives to eliminate the barriers between rural Veterans and the services they have earned and deserve, thus improving Veterans' health and well-being by increasing access to care.

According to ORH, 5.2 million Veterans live in rural communities across the United States, and more than 32.9 million rural Veterans rely on VA for their health care. Veterans are more likely to live in rural areas than Americans who did not serve in the military. While 18 percent of Americans live in rural areas, 23 percent a quarter of Veterans do.

More than half (57 percent) of rural Veterans enrolled in VA health care are 65 years old or older. In addition, 6 percent are women; 9 percent report being members of racial and ethnic minorities; and nearly 435,000 are Veterans of our recent conflicts in Iraq and Afghanistan. About 44 percent of rural Veterans have one or more service-related disabilities.

Rural Veterans have lower than average household incomes than other Veterans; they often face long driving distances to access quality health care; and there are fewer health care providers and nurses per capita in rural areas.

[Back to Top](#)

3.9 - The Robesonian: [Battaglia's death latest proof of veterans' neglect](#) (4 October, Editorial Board, 72k online visitors/mo; Lumberton, NC)

It looks as if an SBI investigation will conclude that Kevin Anthony Battaglia, retired Army, just 33 years old, someone's son, and the father of three young children, died when he was struck by an officer's bullet during a standoff at his Parkton home on Sunday.

But make no mistake: This was suicide by cop, and Battaglia is only the latest veteran of our Middle East wars to pick that poison after returning to this country a shattered self, unable to deny his demons. In a very real sense, it was all of us who pulled the trigger that sent the bullet hurtling that would take Battaglia's life, ending his suffering, but robbing him of so much that life could have offered.

A mix of family, neighbors and Army buddies portrayed Battaglia as a respectful guy who was struggling to assimilate back into society after seeing duty overseas. He had multiple brushes with the law, some minor, but also a serious brawl in a bar that sent him to prison. He was facing two DWI charges in Cumberland County, so it's clear that alcohol was his medication of choice.

Battaglia was medically retired, presumably for a bad back, and he claimed to have been suffering from post traumatic stress disorder, PTSD, that is so prevalent among veterans who experience first hand the horror of war. PTSD was first ascribed to Vietnam War veterans, and now the word is universally recognized.

We were told that Battaglia was frustrated by the Department of Veterans Affairs, believing he wasn't receiving the kind of care he needed and deserved. The VA's problems have been well-documented in recent years, so it's easy to believe Battaglia's gripe was legitimate.

Those who knew him saw his behavior deteriorating in recent weeks, and it could be seen on Facebook where his religious leanings were becoming cult-like. The American flag, Bible and weapons were prominent there — and in recent days he took to wearing camouflage.

There have been many studies concerning the number of veterans with PTSD, and one by RAND in 2014 found at least 20 percent of the 2.7 million Americans who served in Iraq or Afghanistan suffered with it or depression — and half never seek any treatment. That many more were suffering with traumatic brain injury, and about 7 percent both PTSD and TBI.

Those numbers are most likely low.

Last year a study for the Department of Veteran Affairs found that about 20 veterans commit suicide a day in this country. pushing the number to almost 7,500 a year.

So the evidence is overwhelming that this country continues to send its young people to war, and when they return we are ill-equipped to provide the care they deserve.

Often, as with Battaglia, the problems are apparent. But no one could stop this train wreck no matter how leisurely its pace. Friends, especially fellow military, apparently tried — and that included trying to talk him out of the house on the day he died.

Somehow, someday, this country has to do better for those who step forward and put themselves in harm's way to preserve the ways of life and liberties that the rest of us enjoy.

It's too late for Battaglia, but his death, which was explosive and public, can be given greater meaning should it move the needle at all in the direction of better care for our veterans.

3.10 - KXLH (CBS-25, MTN News, Video): [VA Montana hosts Fall Health Festival](#) (4 October, John Riley, 57k online visitors/mo; Helena, MT)

Over 550 Veterans received their Flu immunization today along with community members and V-A staff.

VA Montana staff braved the cold temperatures outside to kick off the flu season with the annual Fall Health Festival and Drive Thru Flu Clinic.

The shots were free for enrolled veterans and VA employees and the County Health Department were on hand to supply flu shots for a fee for everyone else.

People 65 years and older, young children, and people with certain health conditions are at higher risk for serious flu complications.

Each year around 200,000 people are hospitalized and around 32,000 people die from Influenza.

The best way to prevent the flu is by getting vaccinated each year.

Veterans attending the event said that they love the ease of the clinic considering they didn't even have to leave their vehicles.

"I've never had to wait long," said veteran Louie Stiles, "When I was doing it privately getting these private shots they'd just take a lot of time, this doesn't."

If you are an enrolled veteran and missed the clinic you can still get your shot at the VA medical Center.

3.11 - HealthTech: [NHIT Week 2017: Technology Improves Care Options for Veterans - Telehealth and predictive analytics are among the tools being deployed more strategically by the VA, Secretary David Shulkin says.](#) (4 October, Dan Bowman, 20k online visitors/mo; Vernon Hills, IL)

One day after publication of a rule that would let doctors at Department of Veterans Affairs facilities leverage telemedicine to provide care to patients anywhere, VA Secretary David Shulkin discussed his agency's goals for using technology moving forward.

Speaking Tuesday at the American Telemedicine Association's Edge 2017 Fall Forum in Washington, D.C., Shulkin outlined five priorities for "fixing" the VA: greater patient choice, systems modernization, improved service timeliness, world-class foundational service and suicide prevention.

"Our mission is to take care of those who serve the country," Shulkin said.

Expanding Telehealth to Improve Access

Telehealth is a big part of the agency's plans for remedying its timeliness and access issues, Shulkin said.

"This is a strategy that VA is growing and investing in and believes is essential to solving this priority of timeliness of services," Shulkin said.

Its new initiative centers on allowing veterans to receive care wherever they are, as long as they have access to an internet connection. Individuals can access provider services on any device in any location, Shulkin said. However, he also noted that moving ahead was less of a technology challenge and more of a legal and regulatory issue.

"Very conservative interpretations interpreted current law as saying that we needed to provide telehealth services from one VA facility to another, which just didn't make a lot of sense to me," Shulkin said. "I was making my patients drive 80 miles from their home to a VA facility waiting room so they could get into an exam room to see me using telehealth; it just didn't make any sense."

The rule change will allow innovators within the agency to do a lot more with its technology now that all VA doctors will be able to take advantage, Shulkin said. To aid in the expansion, in August, the agency announced it would start a nationwide rollout of its VA Video Connect app, which allows providers and patients to connect via live video on a computer, smartphone or tablet.

The American Medical Association offered early praise for the rule, with Dr. Jack Resneck Jr., chairman-elect of the AMA's Board of Trustees, saying in a statement that the VA "has a unique federally controlled healthcare system with essential safeguards" that can ensure high care quality for patients.

Using Analytics for Suicide Prevention

Shulkin also noted that the VA is deploying Big Data and predictive analytics technology to try to proactively identify veterans who may be at risk for suicide.

"This is an American public health crisis, not just a VA crisis," he said. "The number of Americans committing suicide each year is growing, but among veterans it's growing even more."

Access to care through the VA stems such rates, Shulkin said. Over the last 15 years, the rate of veterans committing suicide has gone up 5.4 percent for those accessing VA care; for veterans who don't use the VA, the suicide rate has gone up 38.4 percent. In particular, for female veterans who accessed the VA for care over the last 15 years, the suicide rate decreased 2.6 percent, but increased 81.6 percent for those not using the VA.

"We are really trying to outreach to veterans to let them know that they have options and that treatment works," Shulkin said.

6.1 - WIBW (CBS-13, Video): [Visually impaired veterans tour Kansas Statehouse](#) (4 October, Deneysa Richard, 484k online visitors/mo; Topeka, KS)

The VA of Eastern Kansas sponsored an event on Tuesday that left a long lasting impact.

The Topeka and Leavenworth VA campuses partnered with The Kansas State Capitol to host a tour for veterans who are visually impaired.

Over 40 veterans were in attendance, some of who visited the Capitol for the first time.

"I'm glad to be here," veteran Keith Sese said, "It's the first time I've been at the Capitol, and I have been here since 1982."

The event aimed towards promoting the inclusion of individuals of all abilities in recreational activities.

"With the support of the staff that is here today and their family members, we're going to be able to get them through the tour and to be able to be a part of it, even if they don't have much sight, at least they are here with everybody and just take part in something in the community," said VA Visual Impairment Services Team Coordinator, Dawn Clouse.

Veterans who attended the event also learned about the Kansas Commission for Veteran Affairs, as well as the state and federal benefits available to veterans who are visually impaired.

7. Supply Chain Modernization

7.1 - Washington Technology: [B3 Group wins \\$156M VA financial, program management order](#) (4 October, Ross Wilkers, Vienna, VA)

Leesburg, Va.-based small business B3 Group has won a five-year, \$156 million task order for financial and program management services to the Veterans Affairs Department.

The VA awarded the order under its potential 10-year, \$22.3 billion T4NG IT services contract vehicle. Work under this order supports software development lifecycle tasks for the VA's financial services center, B3 Group said Tuesday.

Only service-disabled, veteran-owned small businesses were eligible for this order and the VA received four offers, according to Deltek.

B3 Group's teammates for the order include AdapctiveStack Consulting, First-Tek, Grant Thornton, ISC, Longview International Technology Solutions, Rios Partners and Vets Inc.

8.1 - CNN: [Investigations opened into Zinke's meeting with Golden Knights hockey team](#)
(4 October, Miranda Green, 29.7M online visitors/mo; Atlanta, GA)

Washington (CNN)A summer visit that Interior Secretary Ryan Zinke made to the Vegas Golden Knights hockey team is now under two investigations by federal watchdogs.

The Interior Department's inspector general has added concerns about Zinke's meeting with the new NHL team and use of a private jet from Las Vegas to an investigation it opened Friday looking into the secretary's travel, an IG spokesperson confirmed to CNN Wednesday.

The Office of Special Counsel has also opened a Hatch Act investigation into Zinke's meeting with the hockey team.

Zinke met with players on the hockey team at a hotel across the street from their practice facility June 26, a Golden Knights spokesman said.

The meeting was added to the IG probe at the behest of Democratic Reps. Raul Grijalva and Donald McEachin. Grijalva criticized Zinke's need to hire a chartered plane to return home to Montana following the Nevada meeting as well as the purpose of the meeting itself.

"Claims that the secretary's full schedule required the use of chartered aircraft deserve scrutiny. It appears as though Secretary Zinke and his staff could have taken a commercial flight from Las Vegas to Montana if he did not attend the motivational speech to the hockey team owned by his friend and campaign donor, Bill Foley," read Grijalva's letter.

The OSC probe came after a complaint filed by the government watchdog group, Campaign for Accountability and was first reported by Reuters.

An OSC spokesperson told the watchdog group that the Hatch complaint had been "received" and they will "open a case file to address this matter."

An Interior Department spokesperson told CNN that Zinke's late night private flight to Montana from the Nevada meeting cost taxpayers \$12,375. The spokesperson maintained that the flight was booked after no suitable commercial alternative was available and was approved by the Interior's ethics office.

Zinke's meeting with the Vegas Golden Knights is also being scrutinized since it is owned by someone Zinke called "a major donor" when he was running for Congress in 2014.

Bill Foley, a billionaire businessman and owner of the Golden Knights, is also board chairman of Fidelity National Financial Inc. FEC filings show that Foley was responsible for heavily bankrolling Zinke's first congressional campaign in Montana. He personally donated \$2,600 in 2013 and again 2014 -- the maximum contribution amount.

Fidelity donated \$154,823 to Zinke between the years of 2013 and 2018. Fidelity also owns Chicago Title Services, which donated 23,900 to Zinke.

The OSC probe is the sixth known investigation into travel by the administration's cabinet members.

The most recent investigation opened was into Veterans Affairs Secretary David Shulkin's July business trip to London and Denmark, which included meetings with Danish and UK officials as well as a stop at Wimbledon.

[Back to Top](#)

8.2 - ABC News (Video): [Top Democrat questions Kellyanne Conway's air travel](#) (4 October, Benjamin Siegel, 24.1M online visitors/mo; New York, NY)

The top Democrat on the House Oversight Committee is raising questions about White House counselor Kellyanne Conway's air travel, and asking for proof that former Health and Human Services Secretary Tom Price has paid for his seats on controversial private flights.

In a letter to Conway obtained by ABC News, Rep. Elijah Cummings, D-Maryland, has asked Conway for information on all private, non-commercial and military flights she has taken.

Conway, who is the first White House official to be questioned regarding air travel, is coming under scrutiny after Price resigned Friday, and after reporting from Politico revealed that she joined Price on several chartered flights for events across the country.

"Despite the fact that you joined Secretary Price on several of these flights, you have not made any similar public statements indicating whether your own actions were appropriate, whether you will continue to take such flights at taxpayer expense in the future, or whether you plan to personally repay the taxpayers for the cost of your seats on these flights," Cummings wrote.

A White House official told ABC News in response to questions about Conway's travel: "Agencies are responsible for arranging appropriate transportation for their own events. Members of the President's Cabinet occasionally invite relevant White House staff for official travel for events promoting the President's agenda. When White House staff are invited, their travel plans are planned and secured by the inviting agency."

In addition to Price, Interior Secretary Ryan Zinke, Veterans Affairs Secretary David Shulkin and Treasury Secretary Steven Mnuchin have all come under fire for their use of government planes or private aircraft.

The White House is taking steps to crack down on travel and use of private charters in the administration instead of commercial air travel. John Kelly, the White House chief of staff, will

now sign off on all government and chartered air travel by agency leaders, according to a memo released by White House budget director Mick Mulvaney Friday.

“Every penny we spend comes from the taxpayer. We thus owe it to the taxpayer to work as hard managing that money wisely as the taxpayer must do to earn it in the first place,” he wrote.

On Friday, Price said in a statement that he plans to write a personal check to the Treasury for the expense of his travel.

According to a person familiar with the former secretary's travel, Price's seats on all the flights cost \$51,877.31. But Price's total travel has cost the government an estimated \$400,000 in chartered aircraft expenses, according to Politico.

ABC News has reached out repeatedly to the Treasury Department and HHS asking if Price has actually written the promised check. A Treasury Department spokesman declined to reveal that information, citing privacy concerns, while HHS has declined to comment.

On Wednesday Cummings also sent a letter to Mnuchin and acting HHS Secretary Don Wright asking for proof of Price's pledge: a copy of his check reimbursing the government.

ABC's Justin Fishel and Katherine Faulders contributed to this report.

[Back to Top](#)

8.3 - WRIC (ABC-8, Video): [Virginia taxpayers funding deadly dog experiments at McGuire VA Medical Center](#) (4 October, Kerri O'Brien, 477k online visitors/mo; Richmond, VA)

We've known for months that federal tax dollars have been funding the deadly dog experiments at McGuire VA Medical Center. Now, 8News has learned that Virginia has funded those canine experiments, and it has some lawmakers calling for an end to the contributions.

Documents obtained through a Freedom of Information Act request show that the Commonwealth of Virginia contributed to the funding for the McGuire Medical Center's dog experiments.

The information had been originally redacted but was recently disclosed after watchdog group White Coat Project sued to have the information disclosed.

“We cannot do this, we just can't,” Virginia State Senator Bill Stanley said.

Sen. Stanley said he was appalled by the experiments, which have involved at least 39 dogs having pacemakers surgically implanted as part of a heart disease study. All of the dogs involved are eventually euthanized.

“I was truly shocked when I learned state funds, state taxpayer money is going to the cruel and inhumane treatment of dogs all in the name of science,” Stanley said.

8News dug further and confirmed that lawmakers allocate money from Virginia's General Fund each year to the Center for Innovative Technology.

CIT then decides what research projects to fund.

In 2016, CIT awarded McGuire and Dr. Alex Tan nearly \$100,000 for dog research. Dr. Tan is the same doctor that a review committee called “reckless” and responsible for several botched surgeries resulting in dog’s deaths.

We shared what we found with lawmakers.

Stanley said he had no idea that this block grant was being used to conduct deadly tests on dogs.

“We can find better ways in 2017 to find the information that they need to make the lives of our veterans and other people better,” Sen. Stanley said.

The VA argues that dogs are only used in studies when rodents cannot provide the information needed. Other supporters say canine research has and can lead to future medical breakthroughs.

8News spoke with Sherman Gillums, Jr., the Executive Director of Paralyzed Veterans of America. He said the sacrifices involved in animal research are worth it.

“The chance we are taking though, by stopping animal research is you will in effect impact our ability to find new treatments for not just human beings, but animals,” Gillums said.

Still, Sen. Stanley and Sen. Glen Sturtevant have fired off a letter to the governor expressing “opposition to the commonwealth’s role in the funding.” They describe it as “abusive and wasteful.”

They demand to know how much total taxpayer money has been provided for the research, and what action the Commonwealth has taken to address violations at McGuire, including those botched surgeries.

Sen. Stanley tells 8News he has already drafted legislation that would ban the use of Virginia taxpayer money for any research projects that harm dogs.

[Back to Top](#)

8.4 - Fayetteville Observer: [Veteran charged in Gray’s Creek murder](#) (4 October, Drew Brooks, 439k online visitors/mo; Manchester, NH)

Air Force veteran, once praised for turning life around, is charged with first-degree murder after fatal shooting in Gray’s Creek

When Garrett Jordan Vann was last in a Cumberland County courtroom, the Air Force veteran was being celebrated for turning his life around.

Once homeless, estranged from his family, battling substance abuse and facing several felony charges, Vann appeared to have excelled under the strict regimen of the county's Veterans Treatment Court.

He was the court's first graduate during a ceremony in April 2016, earning praise from local judges, Veterans Affairs officials and others.

But a little more than a year later, Vann, 32, of the 300 block of Southern Comfort Drive in Parkton, was led into a courtroom under very different circumstances.

At the Cumberland County Detention Center, Vann made his first appearance on charges related to the killing of a Fayetteville man Tuesday night. Vann is charged with first-degree murder and shooting into an occupied vehicle, according to the Cumberland County Sheriff's Office.

He is accused of firing a 12-gauge shotgun into a Chevrolet Impala. Jason Ray Tyner, 40, of Fayetteville, was struck in the head and killed, an arrest warrant said.

Vann was initially charged with second-degree murder, but that charge was dismissed during his first appearance hearing Wednesday afternoon. Vann reportedly was served with the warrants for the newer charges just before appearing in court.

The Sheriff's Office has not issued any details about the incident that happened about 8 p.m. on the 3400 block of Nash Road, off Butler Nursery Road in the Gray's Creek community.

On Wednesday, family members of both Vann and Tyner filled one side of the small courtroom in the detention center. When Assistant District Attorney Robby Hicks announced that the second-degree murder charge was being dropped, there were gasps from some.

"Oh my God," one person said softly while another spoke a bit louder saying, "Thank you."

However, that was before they were told that Vann was being charged with first-degree murder.

Vann is being held without bail.

A 2004 graduate of Gray's Creek High, Vann enlisted in the Air Force in 2007 and served for about three years.

A spokesman for the Fayetteville VA Medical Center confirmed Wednesday that Vann works at the VA. He was hired at around the time he graduated from the Veterans Treatment Court, but the spokesman could not provide any other details.

In 2016, he told The Fayetteville Observer that he had turned his life around with the help of the Veterans Treatment Court team, which includes a judge, lawyers, law enforcement, substance abuse and mental health providers and a team of volunteer mentors.

A year earlier, the veteran who spent two tours in Afghanistan said he was at a low point in his life. But he said he regained control with the help of the court, which holds veterans charged with nonviolent crimes to strict standards, with regular court dates and drug tests.

In exchange, those who graduate can see their cases dismissed.

The Cumberland County veterans court was the second of its kind in North Carolina, following a similar court in Harnett County. Today, there are at least four such courts in the state.

[Back to Top](#)

8.5 - CBS News Radio (ConnectingVets.com): [Mr. Secretary, why is the VA abusing dogs?](#) (4 October, Jonathan Kaupanger, 23k online visitors/mo; New York, NY)

Puppies having holes drilled into their heads, then parts of their brains removed. Latex injected into puppies' coronary arteries before they're forced to run on treadmills until they have a heart attack. Dogs with severed spinal cords, invasive lung experiments... it's all just another day at the Department of Veterans Affairs.

Each year taxpayers fund between \$15 to \$20 billion worth of animal experiments. What part of that number belongs to the VA is hard to say because Veterans Affairs refuses to report the amount it spends on these type of tests. With over 9,000 projects listed in the Federal Register database, not one has the costs associated with the project listed.

ConnectingVets reached out to the VA with our questions, but as of publishing this article, they have refused to respond. Even with the agency's new "transparency," catchphrase, it's almost impossible to find out what exactly is going on with dog tests at the VA. The only thing coming from the VA on the subject is that they will look into how these tests are being done.

"It's unclear to me," said Justin Goodman, White Coat Waste Project's Vice President for Advocacy and Public Policy. "They say they're going to improve the oversight process for dogs in particular. I know they haven't communicated to Congress what that looks like."

It's not clear that Veterans Affairs even knows what this looks like either. At every turn, VA obfuscates reality and even makes outright lies about this subject.

"It is important to note that almost 100 percent of the animals involved in VA research are mice or rats," said Dr. Michael Fallon, VA's Chief Veterinary Medical Officer, said in a statement recently. "Studies involving larger animals such as canines are rare exceptions; canines accounted for fewer than 0.05 percent of animals used in VA research in 2016."

He went on to say, "At VA we have a duty to do everything in our power to develop new treatments to help restore some of what veterans have lost on the battlefield. One of the most effective ways for VA to discover new treatments for diseases that affect veterans and non-veterans alike is the continuation of responsible animal research."

Fallon also said that VA's animal research program "sets the standard for accountability and transparency both inside and outside the government." I'm going to come back to this point in a minute, but first, you need to understand how animal tests – specifically testing on dogs – are categorized.

Dogs that are kept in a lab, maybe used for breeding but not used for tests, these are category B experiments. Category C would be anything that is non-invasive, a pinprick maybe, but nothing painful. Experiments with category D testing are painful, but relief is given to the dogs.

Category E tests are where dogs are under maximum pain and distress but are given nothing to reduce the pain.

Dr. Fallon's comment about accountability and transparency are just simply ridiculous. The VA doesn't publish anything at all on this, so if this is the "standard for accountability and transparency," it's not a good one. Now, his comment that dogs make up "fewer than 0.05 percent of animals used in VA" is technically true.

Last year there were about 60,000 dogs used in US labs, 0.05 percent of that is around 300, but what the VA doesn't tell us is that it's the ONLY government agency conducting category E tests on dogs.

One of the places conducting these painful tests is the Louis Stokes VA Medical Center in Cleveland, Ohio. Earlier this year, Cleveland announced that five of the dogs they were using in tests had been adopted out after the experiments were complete. Two of these dogs were able to find a home, but the VA gets real shady at this point. These two dogs were only marked for adoption the day a Freedom of Information request was made about the projects. Then, the same day reporters were told about the five adoptions, three of these dogs, it was later found out, had been killed.

This was admitted by the VA only after the facts were made public.

The burden is on the VA to prove veterans are getting something out of these tests, but they are simply quiet on the subject. Take for example the latex injected into puppies experiment. This has been going on for an estimated 20 years. Papers published on this don't even use the word veteran.

"If there's something that is truly valuable and might be promising, let the private sector fund it," said Goodman. "A private company isn't going to run dogs on treadmills for 20 years and not get anything to show for it."

Last month, VA Secretary Dr. David Shulkin wrote an opinion piece about the VA's dog testing programs. In it he discussed many life-changing medical advancements that are due to canine research. He also explains why dogs are used in biomedical research as well. These excuses worked before, but now that we're in the 21st Century, the excuses might explain why the VA is the least advanced federal agency when it comes to biomedical research.

To this, I have four words: Organ on a Chip.

Using this technology, tests can be simulated on the lung, heart, kidney, and arteries. Besides the cruelty factor of animal testing, using dogs often adds to the length of tests and can be expensive. The National Institute of Health estimates that 95 percent of drugs and treatments that pass animal tests fail when done on humans. This makes me wonder if this is the reason why VA refuses to follow the Federal Funding Accountability and Transparency Act.

New legislation has been introduced this year to stop Government funds from being spent on painful dog experiments. The Preventing Unkind and Painful Procedures and Experiments on Respected Species or PUPPERS Act, if signed into law, would only apply to D and E type animal experiments and would essentially stop the U.S. Government from paying to abuse animals.

Secretary Shulkin ends his opinion piece by saying, “The Senate should take a stand and preserve humane and carefully supervised canine research at VA.” Please, Mr. Secretary, can you first explain to your country what’s exactly going on with this research and how much it’s costing us?

And to paraphrase Janet Jackson, what exactly has this done for veterans, lately?

Veterans Affairs Media Summary and News Clips

13 October 2017

1. Top Stories

1.1 - USA Today (Video): VA vows changes on bad health care providers, lawmakers take action after USA TODAY investigation (12 October, Donovan Slack, 37M online visitors/mo; McLean, VA)

The Department of Veterans Affairs is pledging to overhaul its reporting policies for bad medical workers and a group of lawmakers is introducing legislation following a USA TODAY investigation that found the VA has routinely concealed shoddy care and staff mistakes. VA Secretary David Shulkin directed agency officials to expand a nearly 30-year-old policy that limited what medical providers the agency would report to a national database created by Congress...

[Hyperlink to Above](#)

1.2 - U.S. News & World Report (AP): Congress OKs Expanded Protections for Federal Whistleblowers (12 October, Hope Yen, 24M online visitors/mo; Washington, DC)

Congress voted Thursday to boost the protection of federal whistleblowers from retaliation, part of a bid to uncover bad behavior at the Department of Veterans Affairs and other government agencies. The House easily cleared the bill, 420-0. It now goes to President Donald Trump for his signature, having previously passed the Senate in May.

[Hyperlink to Above](#)

1.3 - U.S. News & World Report (AP): Ex-Head of Tomah VA Allowed to Resign, Given Settlement (12 October, 24M online visitors/mo; Washington, DC)

The former head of the Tomah VA Medical Center was allowed to resign and given a settlement after allegations that painkillers were being overprescribed to patients. Mario DeSanctis was fired from the hospital in 2015. But a USA Today investigation found he fought his dismissal and reached a deal in which he was allowed to resign. He and his attorney were paid \$163,000.

[Hyperlink to Above](#)

1.4 - Reuters: Virtual interviewer prods veterans to reveal post-traumatic stress (12 October, Ronnie Cohen, 43.6M online visitors/mo; New York, NY)

Talking – to a computer-generated interviewer named Ellie – appears to free soldiers and veterans who served in war zones to disclose symptoms of post-traumatic stress, a new study finds. Warriors and veterans were up to three times more likely to reveal symptoms of post-traumatic stress to Ellie, the virtual chatbot, than on an official military survey called the post-deployment health assessment...

[Hyperlink to Above](#)

1.5 - The Washington Post: Virginia lawmakers say late VA payments jeopardize veterans' care (12 October, Jenna Portnoy, 43.9M online visitors/mo; Washington, DC)

Members of Congress from Virginia say chronic late payments from the Department of Veterans Affairs to doctors are jeopardizing care for the state's aging veteran population. The state's two senators and 11 House members urged VA administrators to fix a system that can leave health-care providers waiting more than four months for payments they should have received within 30 days. The delays can damage credit, they said.

[Hyperlink to Above](#)

1.6 - The Washington Post: [‘This is frightening’: Noxious gas has sickened VA workers for two years, with few solutions](#) (12 October, Alex Horton, 43.9M online visitors/mo;

Washington, DC)

Staff and patients at a D.C. medical facility for homeless military veterans have endured noxious gas exposure for nearly two years as top hospital administrators, though aware of the problem, have failed to remedy it, according to interviews with staff and documents obtained by The Washington Post. At least eight clinical workers at the Department of Veterans Affairs Community Resource and Referral Center have tested positive for elevated levels of carbon monoxide...

[Hyperlink to Above](#)

1.7 - The Denver Post: [Dozens of surgeries at Denver VA hospital put off because of doctor shortage, Too few anesthesiologists and competitive market to blame, VA says](#)

(12 October, David Migoya, 4.8M online visitors/mo; Denver, CO)

A shortage of anesthesiologists at Denver’s veterans hospital – despite salary offers reaching as high as \$400,000 a year – has forced a delay in dozens of surgeries just months after the institution was tagged with some of the nation’s worst waiting lists for care. Though the hospital employs eight anesthesiologists and eight nurse anesthetists, they’re short of the complement needed to meet surgery demands that run about 380 operations a month, a spokeswoman said...

[Hyperlink to Above](#)

1.8 - Military Times: [Lawmakers take first steps toward a BRAC for VA facilities](#) (12

October, Leo Shane III, 2.1M online visitors/mo; Springfield, VA)

House lawmakers took the first steps Thursday toward shutting down hundreds of Veterans Affairs facilities through a process similar to military base closure rounds, saying the move is critical to keep the department from wasting millions of dollars on underused, aging buildings. But some of the largest veterans groups said they have serious concerns with the proposal, saying it’s ripe for abuse and could tempt VA officials to outsource more veterans’ medical care to private-sector physicians.

[Hyperlink to Above](#)

1.9 - Stars and Stripes (Military Update): [VA, Congress crawl toward ending abuse of vet pensioners](#) (12 October, Tom Philpott, 1.5M online visitors/mo; Washington, DC)

In 2012, the Government Accountability Office found more than 200 financial planning firms and estate law offices enticing veterans or their survivors into costly annuities or irrevocable trusts intended to hide or reallocate their assets so they qualify for VA pensions that the claimants wouldn’t be eligible for otherwise. Since then, the Department of Veterans Affairs and Congress have been crawling toward actions to stop the abusive practices...

[Hyperlink to Above](#)

1.10 - Public Radio International (Audio): [Meet the women combing through Puerto Rico, searching for veterans in need](#) (12 October, Jasmine Garsd, 1.2M online visitors/mo;

Minneapolis, MN)

Lind, an occupational therapist for the VA Caribbean Healthcare System in San Juan, goes to the door, asking, "Are there any veterans here?" Every day since the hurricane hit, she and her team have been roaming from shelter to shelter, looking for veterans who need medical attention. There are somewhere around 75,000 US Army veterans living in Puerto Rico. Most served during the Vietnam War. After Hurricane Maria, many are now living in shelters.

2. Veteran and Employee Experience

2.1 - The Washington Post (PowerPost, Video): [House to vote on bill requiring discipline for officials who retaliate against whistleblowers](#) (12 October, Eric Yoder, 43.9M online visitors/mo; Washington, DC)

Federal agencies would be required to discipline officials who retaliate against whistleblowing employees, and to fire them on their second offense, under a bill up for a House vote Thursday. The bill, approved by the Senate in May, is one of many arising from the disclosures starting in 2014 of falsified patient records at the Department of Veterans Affairs.

[Hyperlink to Above](#)

2.2 - U.S. News & World Report (AP): [Alaska Veterans Affairs System to Add 100 Staff Members](#) (13 October, 24M online visitors/mo; Washington, DC)

The Alaska Veterans Affairs system has announced it's adding 100 staff members. KTVA-TV reported Wednesday that Dr. Timothy Ballard said the staff is being added in response to negative reviews from both patients and staff. Ballard said the new positions are focused on mental health care and support functions. The 100 new jobs boost the system's number of staff to 650 at a cost of \$6 million.

[Hyperlink to Above](#)

2.3 - Atlanta Journal-Constitution: [Roswell getting \\$21K for veterans adaptive sports](#) (12 October, David Ibata, 11.9M online visitors/mo; Atlanta, GA)

Roswell has agreed to accept \$21,080 from the federal government to purchase equipment and hire instructors for new VA Wheelchair Softball and Adaptive Cycling programs for disabled veterans. The City Council approved a resolution accepting the FY 201 Adaptive Sports Grant from the U.S. Department of Veterans Affairs. The grant does not require local matching funds, according to a staff report to the council.

[Hyperlink to Above](#)

2.4 - The Hill: [New whistleblower protections head to Trump's desk](#) (12 October, Cristina Marcos, 11.8M online visitors/mo; Washington, DC)

The House unanimously cleared legislation on Thursday to ensure protections for federal employees who disclose government waste, fraud and abuse. Passed 420-0, the measure would train federal workers so they understand their protections, as well as enhance penalties for supervisors who retaliate against whistleblowers. The bill is named after Chris Kirkpatrick, a psychologist was fired from a Department of Veterans Affairs (VA) medical center after raising concerns about patients' medications.

[Hyperlink to Above](#)

2.5 - Bangor Daily News: [‘Dangerous surgeon’ at Togus allegedly made mistakes in 88 cases, but VA kept it quiet](#) (12 October, 1.2M online visitors/mo; Bangor, ME)

An explosive USA Today investigation into medical mistakes allegedly made under the watch of the U.S. Department of Veterans Affairs highlighted what the newspaper described as one particularly egregious case in Maine. According to the report, podiatrist Thomas Franchini allegedly made mistakes in 88 cases while working at the Togus VA Medical Center near Augusta, the nation’s oldest veterans’ hospital.

[Hyperlink to Above](#)

2.6 - WFED (AM-1500, Audio): [House passes bill to give TSP participants more withdrawal options](#) (12 October, Eric White, 831k online visitors/mo; Washington, DC)

The Veterans Affairs Department stepped back a proposal to suspend a 50-year-old ethics law. The law, first passed in 1966, requires VA to fire any employee who also works for a school whose students receive VA benefits. The department had planned to completely stop enforcing that requirement by next Monday, since some of its employees also work as adjunct professors at for-profit colleges.

[Hyperlink to Above](#)

2.7 - La Crosse Tribune: [House approves whistleblower bill named for former Tomah VA doc](#) (12 October, 822k online visitors/mo; La Crosse, WI)

The U.S. House passed a federal whistle blower protection bill Thursday named for a former VA psychologist who questioned over-medication of patients at the Tomah VA Medical Center. The Dr. Chris Kirkpatrick Whistleblower Protection Act is designed to protect federal employees who come forward with allegations of waste, fraud and abuse and to set minimum disciplinary measures for supervisors found guilty of retaliation.

[Hyperlink to Above](#)

2.8 - WLOS (ABC-13, Video): [Protesters at Asheville VA say being understaffed is dangerous](#) (12 October, 480k online visitors/mo; Asheville, NC)

Veterans Affairs employees held a rally outside Asheville's Charles George VA Medical Center on Thursday to protest working conditions. Protesters said low staffing levels are creating risks to patient safety and a hazardous work environment. They said Congress has failed to fill open positions, putting veterans' health care at risk.

[Hyperlink to Above](#)

2.9 - HousingWire: [Ginnie Mae, VA launch task force to look into lenders targeting veterans for quick refinances - Comes on the heels of Ginnie Mae opening investigation](#) (12 October, Ben Lane, 438k online visitors/mo; Irving, TX)

Roughly one month ago, Ginnie Mae announced that it was launching an investigation into mortgage lenders that were aggressively targeting servicemembers and military veterans for quick and potentially risky refinances of their mortgages. The investigation came on the heels of a letter from Sen. Elizabeth Warren, D-Massachusetts, who cited a report from the Consumer Financial Protection Bureau, which covered complaints received from veterans about Department of Veterans Affairs mortgage refinancing.

[Hyperlink to Above](#)

2.10 - Citizen-Times: [Disappointed VA employees voice concerns, lack of staffing and support](#) (12 October, Alexandria Bordas, 318k online visitors/mo; Asheville, NC)

Ralliers gathered at Charles George VA Medical Center on Thursday afternoon to express disappointment in the 49,000 vacant staff positions nationwide, which veterans' supporters said are affecting local VA branches. Months of delays in appointments, overworked employees and lack of internal support can no longer be ignored, said Brandy Morris, executive vice president of the local American Federation of Government Employees labor union in Asheville.

[Hyperlink to Above](#)

2.11 - WEAU (NBC-13, Video): [House members pass Whistleblower Protection Bill](#) (12

October, Ruth Wendlandt, 276k online visitors/mo; Eau Claire, WI)

In a bi-partisan vote, House members unanimously passed Representative Sean Duffy's Whistleblower Protection Bill. The Dr. Chris Kirkpatrick Whistleblower Protection Act ensures no one is retaliated against for coming forward with concerns about waste, fraud, and abuse at the veteran affairs. It also requires the VA to come up with a plan to restrict unauthorized employee access to medical files.

[Hyperlink to Above](#)

2.12 - Parkersburg News & Sentinel: [Outrageous: VA culprit deserves more than a lecture](#)

(13 October, Editorial Board, 187k online visitors/mo; Parkersburg, WV)

How should a Department of Veterans Affairs manager who defrauded the government, took chances with veterans' health care, then devised a coverup be punished? Readers probably have their own ideas about that. But according to the federal government, the answer is ... counseling.

[Hyperlink to Above](#)

2.13 - WAGM (FOX-8): [After Report Shows VA's Failure to Disclose Medical Malpractice at Togus, Rep. Poliquin Acts to Make Changes](#) (12 October, 35k online visitors/mo; Presque

Isle, ME)

Congressman Bruce Poliquin, along with House Conference Chair Cathy McMorris Rodgers (WA-05) and House Veterans Affairs Committee Chairman Phil Roe (TN-01), today introduced the Ethical Patient Care for Veterans Act of 2017. This legislation requires Department of Veterans Affairs (VA) medical professionals to report directly to state licensing boards if they witness unacceptable or unethical behavior from other medical professionals at the VA.

[Hyperlink to Above](#)

2.14 - WAGM (FOX-8): [Rep. Poliquin's Bill to Ensure VA Headstones For Veterans' Families Buried in Cemeteries Advances in the House](#) (12 October, 35k online visitors/mo;

Presque Isle, ME)

Today, Congressman Bruce Poliquin had his Veterans bill pass out of committee with unanimous, bipartisan support. Congressman Poliquin's legislation would ensure that Veterans' family members who are buried at tribal Veterans cemeteries—such as the Houlton Band of Maliseet Indians Tribal Veterans Cemetery in Aroostook County—are provided government furnished headstones...

2.15 - KOB (NBC-5, Video): [Oregon politician concerned about Roseburg VA medical facility](#) (12 October, 27k online visitors/mo; Medford, OR)

An Oregon congressman is asking the U.S. Department of Veterans Affairs to address "substandard management" at the Roseburg VA hospital. Congressman Peter DeFazio (D-OR 4th District) said the VA Roseburg Health Care System (VARHS) is a source of concern for constituents, who complained to the governor about the lack of effective and accountable management.

[Hyperlink to Above](#)

2.16 - The M Report: [Ginnie Mae and VA Create Refinance Loan Task Force](#) (12 October, Nicole Casperson, 20k online visitors/mo; Dallas, TX)

Ginnie Mae and the Department of Veterans Affairs (VA) recently announced the shaping of the "Joint Ginnie Mae – VA Refinance Loan Task Force," in an effort to address loan churning and repeated refinancing issues. Specifically, the task force is set to focus on examining critical issues, important data, and lender behaviors related to refinancing loans. In addition, the task force will "determine what program and policy changes should be made by the agencies..."

[Hyperlink to Above](#)

2.17 - KSNW (NBC-3): [Kansas nurse in Puerto Rico to help Hurricane Maria victims](#) (12 October, 9.1k online visitors/day; Wichita, KS)

A Cheney nurse is in Puerto Rico helping victims of Hurricane Maria. Linda Sue Bayless is a provider at the Robert J. Dole VA Medical Center. As part of the VA's Disaster Emergency Medical Personnel Program System, she signed on to deploy where she was needed most. Bayless left October 4 and is due back on the 18.

[3. Access to Healthcare](#)**3.1 - Newsweek (Video): [PTSD Treatment: How Ai Is Helping Veterans With Post-Traumatic Stress Disorder](#)** (12 October, Joseph Frankel, 9.4M online visitors/mo; New York, NY)

The Institute for Creative Technologies at USC got lots of buzz for its original research, and introducing the world to Ellie, a digital diagnostic tool that strongly resembles, but cannot replace a human therapist. Ellie, an avatar of a woman in a cardigan with olive-toned skin and a soothing voice, listens to the people who come to her, and does what any human sounding board does. She listens to the content of their speech, and scans their facial expressions, tone, and voice, for cues that hint at meanings beyond speech.

[Hyperlink to Above](#)

3.2 - KTVU (FOX-2): [Services available for veterans at Napa Valley College evacuation center](#) (12 October, 2.1M online visitors/mo; Oakland, CA)

The Vet Center, a subsidiary of the U.S. Department of Veterans Affairs, deployed personnel today to the wildfire evacuation center at Napa Valley College from Concord and Fairfield to provide mental health services and paperwork assistance for any displaced veterans. They were

at the shelter today with a trailer set up for three separate counseling sessions to be conducted simultaneously.

[Hyperlink to Above](#)

3.3 - The Gazette: [Mayor, nonprofits plead for Colorado Springs landlords to help homeless vets](#) (12 October, Jakob Rodgers, 870k online visitors/mo; Colorado Springs, CO)

The vouchers include a caseworker for each veteran who can help them find jobs, access health care and, if need be, find addiction treatment. "We want to help you have success," said Erika Huelskamp, who coordinates the VA's local voucher program. "We are just a phone call away. We're here for you, just as much as that veteran."

[Hyperlink to Above](#)

3.4 - Daily Press: [Virginia lawmakers cite payment delays in veterans health program](#) (12 October, Hugh Lessig, 863k online visitors/mo; Newport News, VA)

The Department of Veterans Affairs owes Virginia health care providers millions of dollars for services provided to veterans who sought treatment outside the VA system, says the state's congressional delegation, who want the VA to pay its bills. At issue is Veterans Choice, a popular but controversial program that allows former service members to seek care in the community if they have to wait too long for an appointment or live too far from a Veterans' Affairs facility.

[Hyperlink to Above](#)

3.5 - KLTU (ABC-7, Video): [Veteran says medications from VA repeatedly lost in the mail](#) (12 October, Sophia Constantine, 837k online visitors/mo; Tyler, TX)

An East Texas woman who is a military veteran of over fifteen years is struggling after her medications have been misplaced in the mail twice over the past six months. Jill Morehouse receives mail order prescriptions from the VA once a month. Each time, a 240-count bottle of Vicodin. Over the past six months, she says two of those prescriptions never arrived.

[Hyperlink to Above](#)

3.6 - The Daily Reporter: [VA Clinic to stay in Spirit Lake](#) (12 October, Seth Boyes, 45k online visitors/mo; Spencer, IA)

Anticipation had been building as to where the Sioux Falls Veterans Affairs Medical Center would place its new clinic. Several locations in the region were considered, but Director Darwin Goodspeed with the Sioux Falls VA Health Care System announced Thursday a new clinic will be built in Spirit Lake, near the intersection of Highway 9 and Royal Avenue, just west of the Great Lakes Mall.

[Hyperlink to Above](#)

3.7 - BeyondChron: [New VA Privatization Threat To Vets](#) (12 October, Suzanne Gordon, 39k online visitors/mo; San Francisco, CA)

On Thursday October 5th, the American Federation of Government Employees (AFGE) the union that represents federal employees, held a briefing on the threat to privatize the Veterans Health Administration (VHA), on Capitol Hill in Washington, D.C. Veterans, VHA caregivers, and policy analysts warned Congressional staff and the media on the cost to veterans if more and more VHA care was outsourced to the private sector.

[Hyperlink to Above](#)

3.8 - The Laughlin Nevada Times: [VA clinic expands services](#) (12 October, Jennifer Denevan, 300 online visitors/mo; Bullhead City, AZ)

The MCPO Jesse Dean VA Clinic is getting some help in providing services to local veterans. The clinic will be expanding services via telemedicine to help ensure veterans are getting the care they need. Some services were recently expanded and more times offered and more services are coming at the end of the year. The big difference comes in expanding the number of slots available for care to be given.

[Hyperlink to Above](#)

3.9 - Northeastern Public Radio: [Young Meets With VA Officials To Discuss Veteran Wait Times](#) (12 October, Jill Sheridan, 900 online visitors/day; Fort Wayne, IN)

U.S. Sen. Todd Young (R-Ind.) met with federal Veterans Administration officials to discuss the long waits many veterans face to have claims processed, and says he wants to work directly with the office to make significant changes. Young says the amount of time veterans have to wait for a claim to be processed is around two years and appeals take even longer.

7. Supply Chain Modernization

7.1 - Stars and Stripes: BRAC for VA: Lawmakers search for ways to reduce the number of VA facilities (12 October, Nikki Wentling, 1.5M online visitors/mo; Washington, DC)

The House Committee on Veterans' Affairs on Thursday initiated what could be a long and politically arduous process to get rid of aging and underused Department of Veterans Affairs facilities nationwide. Committee Chairman Rep. Phil Roe, R-Tenn., and Rep. Tim Walz, D-Minn., the ranking Democrat, presented a draft bill that would create an 11-member, paid commission to recommend which facilities to close and where the VA should invest.

[Hyperlink to Above](#)

7.2 - Government Executive: Lawmakers Debate Bringing BRAC to VA Health Care Facilities (12 October, Eric Katz, 852k online visitors/mo; Washington, DC)

House lawmakers are pushing for the Veterans Affairs Department to go through a process to close down or realign underutilized medical facilities, similar to the Base Realignment and Closure process at the Defense Department. The measure would require the VA secretary to assess the department's current capacity to provide health care in each of its networks and ultimately recommend facilities to close, modernize or realign.

8. Other

8.1 - Stars and Stripes: Lawmakers consider pushing VA to sell Pershing Hall, its 5-star Paris hotel (12 October, Nikki Wentling, 1.5M online visitors/mo; Washington, DC)

There's an effort underway in Congress to have the Department of Veterans Affairs sell an 18th century building it owns in Paris that's leased as a five-star boutique hotel and spa. Members of the House Committee on Veterans' Affairs voiced support Thursday for a bill authorizing the sale of Pershing Hall, which was established as a World War I memorial by the American Legion in 1928 and transferred to the VA in 1991.

[Hyperlink to Above](#)

1. Top Stories

1.1 - USA Today (Video): [VA vows changes on bad health care providers, lawmakers take action after USA TODAY investigation](#) (12 October, Donovan Slack, 37M online visitors/mo; McLean, VA)

WASHINGTON — The Department of Veterans Affairs is pledging to overhaul its reporting policies for bad medical workers and a group of lawmakers is introducing legislation following a USA TODAY investigation that found the VA has routinely concealed shoddy care and staff mistakes.

VA Secretary David Shulkin directed agency officials to expand a nearly 30-year-old policy that limited what medical providers the agency would report to a national database created by Congress to prevent problem medical workers from crossing state lines to escape their pasts and keep practicing.

The agency will report all clinicians going forward, VA Press Secretary Curt Cashour said. Shulkin also asked staff to re-write 12-year-old guidelines for reporting them to state licensing boards in an effort to speed up the process.

“Under Secretary Shulkin, VA’s new direction is to hold employees accountable and to be transparent with our findings and actions,” Cashour said.

The legislation from Rep. Cathy McMorris Rogers, R-Wash., Rep. Phil Roe, R-Tenn., and Rep. Bruce Poliquin, R-Maine, would require VA doctors themselves to report directly to state licensing boards within five days of witnessing unacceptable behavior from fellow doctors.

“These newest reports out of the VA are deeply troubling,” McMorris Rodgers said. “This bill will help reform the culture at the VA by holding bad actors accountable and keeping them from continuing these mistakes at the VA or elsewhere.”

The USA TODAY investigation found the VA has frequently failed to ensure its hospitals reported problem health care providers to state licensing boards. Such reports can be delayed by years. The investigation also found the VA policy on reporting to the national database left out thousands of providers. The agency previously reported only physicians and dentists — no nurses, physicians’ assistants, or podiatrists.

The VA determined one podiatrist at its hospital in Maine harmed 88 veterans, including a woman who after two failed ankle surgeries chose to have her leg amputated rather than endure the pain. Still, the agency didn’t report the foot doctor to the database under its previous policy, and took two years to report him to state licensing boards.

In other cases, USA TODAY found VA hospitals signed secret settlement deals with dozens of doctors, nurses and other health care workers that included promises to conceal serious mistakes — from inappropriate relationships and breakdowns in supervision to dangerous medical errors — even after forcing them out of the VA.

Roe, chairman of the House Veterans Affairs Committee, said the committee has “long been concerned about VA’s settlement agreements, and even held a hearing on the topic last year.”

“The findings of the USA TODAY investigation are intolerable,” he said. “Malfeasance within the department will not be ignored, and it certainly cannot be rewarded and hidden from state licensing boards. As a physician, I find this deeply troubling.”

In response to USA TODAY’s findings, Shulkin directed that any future settlement agreements worth more than \$5,000 be approved by top VA officials in Washington. Previously, local and regional officials made decisions on the deals, which can cut short potentially costly employee challenges of VA disciplinary actions.

On Wednesday, the agency also said it planned to post publicly for the first time data on settlements that are approved. The first tranche of data shows that since President Trump took office in January, the VA has struck agreements with at least 160 employees involving payouts totaling \$4.2 million.

Poliquin said Thursday that USA TODAY’s findings were “appalling” and singled out the revelations about the podiatrist at the Togus VA hospital on the outskirts of Augusta, Maine.

“Our Maine veterans depend on their services at Togus and other VA facilities across our State for critical care, and it is absolutely unacceptable for them to ever be subjected to this kind of medical malpractice,” he said.

At least six patients of the podiatrist, Thomas Franchini, are suing the federal government over the care they received. Despite the VA taking years to tell patients about its findings on his surgeries, the government has argued their claims should be dismissed because they were filed after the three-year deadline for medical negligence claims in Maine. Oral arguments in the case are scheduled October 25.

[Back to Top](#)

1.2 - U.S. News & World Report (AP): [Congress OKs Expanded Protections for Federal Whistleblowers](#) (12 October, Hope Yen, 24M online visitors/mo; Washington, DC)

WASHINGTON (AP) — Congress voted Thursday to boost the protection of federal whistleblowers from retaliation, part of a bid to uncover bad behavior at the Department of Veterans Affairs and other government agencies.

The House easily cleared the bill, 420-0. It now goes to President Donald Trump for his signature, having previously passed the Senate in May.

The measure would extend whistleblower protections to federal employees who are in probationary periods and provide training to ensure workers know their rights. It also establishes minimum disciplinary standards for supervisors who retaliate against employees for seeking to disclose wrongdoing.

The legislation, introduced by Sen. Ron Johnson, R-Wis., is named after Dr. Chris Kirkpatrick, a psychologist at the VA Medical Center in Tomah, Wisconsin. Kirkpatrick committed suicide in 2009 on the day he was fired by VA for questioning the over-medication of veterans. A VA investigation later found Kirkpatrick’s concerns had been warranted.

House Speaker Paul Ryan, R-Wis., said the legislation provides much-needed protections to whistleblowers. "No one who stands up for our veterans should be marginalized, let alone targeted and fired," he said.

The bill also would require the VA to put together a plan within six months to prevent supervisors from improperly accessing an employee's medical files in retaliation.

VA Secretary David Shulkin has pledged to bring greater accountability to the government's second largest agency, which provides medical care to millions of veterans. In July, Shulkin began posting employee disciplinary actions and announced that he would require approval by a senior official of any settlement with a VA employee over the amount of \$5,000, citing unnecessary payments to bad employees. A month later, he ordered a review to expand VA reporting requirements for bad workers.

During the 2016 campaign, Trump described the VA as the "most corrupt," promising to "protect and promote honest employees" at VA who expose wrongdoing.

1.3 - U.S. News & World Report (AP): [Ex-Head of Tomah VA Allowed to Resign, Given Settlement](#) (12 October, 24M online visitors/mo; Washington, DC)

TOMAH, Wis. (AP) — The former head of the Tomah VA Medical Center was allowed to resign and given a settlement after allegations that painkillers were being overprescribed to patients.

Mario DeSanctis was fired from the hospital in 2015. But a USA Today investigation found he fought his dismissal and reached a deal in which he was allowed to resign. He and his attorney were paid \$163,000.

The Tomah VA hospital was rocked in January 2015 by reports of inappropriate dosages of narcotic pain killers and retaliation against employees who questioned the practice.

DeSanctis did not return a phone message left by The Associated Press on Thursday.

Jason Simcakoski was a Marine who died in 2014 from a fatal combination of drugs. His widow, Heather Simcakoski, told the La Crosse Tribune the settlement was "really disappointing."

1.4 - Reuters: [Virtual interviewer prods veterans to reveal post-traumatic stress](#) (12 October, Ronnie Cohen, 43.6M online visitors/mo; New York, NY)

Talking – to a computer-generated interviewer named Ellie – appears to free soldiers and veterans who served in war zones to disclose symptoms of post-traumatic stress, a new study finds.

Warriors and veterans were up to three times more likely to reveal symptoms of post-traumatic stress to Ellie, the virtual chatbot, than on an official military survey called the post-deployment health assessment (PDHA), even after being assured the assessment would remain anonymous, researchers report in *Frontiers in Robotics and AI*.

“We believe this could be of value to veterans,” said study leader Gale Lucas, a research psychologist at the University of Southern California’s Institute for Creative Technologies in Los Angeles. “Having a conversation, even if it’s with a computer, would help them open up and really realize they might be having some issues.”

Recognizing psychological battle wounds is a necessary first step toward healing them.

As many as one in five recent combat veterans develops post-traumatic stress disorder (PTSD), an overactive fear memory that triggers disturbing thoughts, feelings and dreams, according to the U.S. Department of Veterans Affairs.

Stigma around mental health problems frequently prevents soldiers and veterans from admitting symptoms or seeking help, Lucas said in a phone interview.

“Allowing PTSD to go untreated can potentially have disastrous consequences, including suicide attempts,” she said.

Since 2004, suicide rates among active U.S. Army personnel have been rising, but the military’s current PDHA assessment identifies only one in seven soldiers who are considering suicide, previous research has shown.

In an effort to identify early signs of psychological scars, Lucas would like for Ellie, who was developed with U.S. Department of Defense grant money, to be available in kiosks set up in Veterans Administration hospitals throughout the nation.

Ellie starts the conversation with simple questions, such as, ‘Where are you from originally?’ and ‘What do you like to do to relax?’ to develop rapport with soldiers and veterans, Lucas said. Then she asks if they have nightmares, feel on guard or experience other telltale signs of PTSD.

“She’s very nonjudgmental, supportive,” Lucas said.

“We’re not trying to make virtual-agent therapists. She’s not giving treatment. All she’s doing is having a conversation, having them think and open up about the mental health symptoms they might have,” she said.

Prior research has shown that establishing rapport and ensuring anonymity are key to war veterans’ admitting that they are experiencing emotional wounds.

But veterans are hesitant to discuss their psychological suffering with other people, Lucas said.

“If they are talking to a human, they feel judged,” she said. “People feel more comfortable opening up to a computer than a human.”

In two studies, Lucas and her team found that Ellie’s questions prompted soldiers and veterans to open up and reveal more of their mental health needs.

In the first, researchers tested 29 active-duty Colorado National Guard service members returning from Afghanistan.

One of every four service members reported post-traumatic stress symptoms on the official PDHA, and one of three reported symptoms when the questionnaire was made anonymous. In conversations with Ellie, far more – three of four – reported symptoms.

In a second study of 132 active-duty service members and veterans, participants were more than twice as likely to report PTSD symptoms to Ellie than on an anonymous survey.

Alan Peterson, a clinical psychologist and professor at the University of Texas Health Science Center in San Antonio, said fear that service members could lose their jobs often impedes their reporting of psychological symptoms.

“In reality, there can be negative career consequences associated with reporting certain symptoms and behaviors,” said Peterson, who was not involved with the study. “This can be especially true for individuals seeking treatment for conditions such as PTSD, if they are not successfully treated into remission and subsequently determined to be fully fit for military duty.”

Making successful treatments available to soldiers would go a long way to reducing the stigma of seeking psychological help, he said.

“Veterans go through a lot for our country, and I really believe that we should take care of them, not just their physical scars, but their mental scars,” Lucas said.

1.5 - The Washington Post: [Virginia lawmakers say late VA payments jeopardize veterans' care](#) (12 October, Jenna Portnoy, 43.9M online visitors/mo; Washington, DC)

Members of Congress from Virginia say chronic late payments from the Department of Veterans Affairs to doctors are jeopardizing care for the state's aging veteran population.

The state's two senators and 11 House members urged VA administrators to fix a system that can leave health-care providers waiting more than four months for payments they should have received within 30 days. The delays can damage credit, they said.

Congress created the Veterans Choice program in 2014 in response to a scandal exposing excessively long wait times at a Phoenix VA hospital that also had been a problem nationwide.

The program is intended to relieve pressure on VA hospitals by allowing veterans to receive care from private providers if they cannot book an appointment at their local VA facility within 30 days or access a facility within 40 miles of their home.

Since its inception, Veterans Choice has been hobbled by administrative errors, including tens of millions of dollars in overpayments, according to findings of the VA Office of the Inspector General.

“With many health care providers reporting accounts receivable in the millions of dollars, the level of late payments is unacceptable,” the Virginia delegation wrote in an Oct. 3 letter to Secretary of Veterans Affairs David Shulkin.

Rep. Rob Wittman (R-Va.) said Congress requires VA to pay bills in a timely manner.

“Everyone else in society has to do that,” he said in an interview. “If this program is going to work properly, then these bills need to be paid on time.”

Wittman, chairman of the House Armed Services subcommittee on sea power and projection forces, said he has talked to the committee chairman, Rep. Phil Roe (R-Tenn.), about calling Shulkin to testify if VA doesn’t reconcile outstanding bills soon. Virginia is home to 733,000 veterans.

“This is the law,” he said. “This is what you’re supposed to be doing. Why isn’t it getting done?”

VA spokeswoman Paula Paige said in a statement, “VA appreciates the lawmakers’ concerns and will respond to them directly.”

She referred specific questions to a May speech by Shulkin in which he said it takes more than 30 days to process 20 percent of VA claims from 25,000 providers nationwide. An additional \$50 million in charges are older than six months. He blamed the backlog in part on paperwork delays.

The latest stories and details on the 2017 Virginia general election and race for governor. Community care is handled through several federal programs, making it “too complex, and it’s confusing veterans and our employees alike,” he said.

Riverside Health System in eastern Virginia reported that 45 percent of claims totaling \$2 million went unpaid for more than 120 days. Private insurance companies as well as Medicare and Medicaid take about 60 days, said Mark Duncan, Riverside’s lobbyist.

Riverside considers it an honor to care for veterans, but “we need to have the tools the resources to provide that type of service to these folks over the long term,” Duncan said in an interview. “They’ve more than earned that service.”

The letter details a case relayed by the office of Rep. Barbara Comstock (R), who represents Northern Virginia, in which a veteran was denied dentures because VA failed to pay a private provider \$203,000. Comstock’s spokesman said the case has been resolved.

Veterans Choice allows veterans to avoid inconvenient travel to VA facilities in Martinsburg, W.Va., or the District, but VA “must get its house in order,” Comstock said in a statement.

In August, Congress approved \$2.1 billion in emergency funding intended to shore up the program until February.

Last month, Sen. John McCain (R-Ariz.), chairman of the Senate Armed Services Committee, wrote a letter to Shulkin demanding a full accounting of Veterans Choice spending after the Associated Press reported that the program could face another shortfall before the end of the year.

“We said at the time that it was essential, given the growing demand for care under the Choice program, that the VA immediately correct the failures that created such a serious shortfall,” McCain wrote. “It appears as if you have not done so.”

1.6 - The Washington Post: [‘This is frightening’: Noxious gas has sickened VA workers for two years, with few solutions](#) (12 October, Alex Horton, 43.9M online visitors/mo; Washington, DC)

Staff and patients at a D.C. medical facility for homeless military veterans have endured noxious gas exposure for nearly two years as top hospital administrators, though aware of the problem, have failed to remedy it, according to interviews with staff and documents obtained by The Washington Post.

At least eight clinical workers at the Department of Veterans Affairs Community Resource and Referral Center have tested positive for elevated levels of carbon monoxide, a March internal email said, describing a potentially dangerous condition that restricts oxygen circulation. As many as 30 employees, desperate to avoid further exposure, have sought reassignment or permission to work remotely.

One doctor resigned in protest after VA leaders were unable to produce solutions, clinic staffers said.

“Many of my colleagues, including myself, have experienced some type of illness while working in the CRRC,” one staffer wrote in an August email responding to a VA health official who appeared to play down symptoms of concerned workers. The most recent incident was Oct. 4, staffers said.

The Post reviewed dozens of emails and records, and conducted numerous interviews with clinical workers and others familiar with the problem. What emerged is an unsettling glimpse of VA’s struggle to mitigate a potentially significant health hazard, and raises questions about the agency’s ability to fulfill the promises it has made to improve accountability. The troubled agency was identified early on by President Trump as being in dire need of sweeping reform.

VA spokesman Curt Cashour said the hospital’s leadership “took aggressive steps to look into the problem” once complaints began to circulate. Tests conducted by VA health officials and the local fire department and gas company, among others, “discovered no leaks, hazardous fumes or health risks,” he said, adding that officials continue to monitor the situation.

But those who work at the facility say those tests may not have been performed quickly enough, before the gas dissipated, or if the contractors brought in to conduct them knew which gases to evaluate.

On a given day, the facility is staffed with about 40 employees who serve dozens of patients, all homeless and at-risk veterans who seek care at the clinic. The incidents — numbering in the dozens since winter 2015 — have occurred intermittently and without warning.

Though it remains unclear what's causing the issue, the clinic's staff members have speculated that it could be anything from vehicle exhaust entering the building's heating system intake valves to sewer gas surfacing through sinks and drains. They've reported a range of symptoms, including intense headaches, rashes, stinging eyes, nausea and others — all of which are consistent with sewer gas exposure, as defined by the Centers for Disease Control and Prevention.

Administrators have not only allowed the problem to fester, they have also ordered clinicians back into the building, staffers say.

"I felt devalued. It was like our health wasn't important and our concerns weren't heard," one staffer told The Post, saying morale cratered among those tasked with what they call a rewarding yet grueling effort to help homeless veterans find housing along with primary and mental health care. Those familiar with the facility's troubles spoke on the condition of anonymity, citing their fear of reprisal.

The Community Resource and Referral Center, off Rhode Island Avenue NE, is part of the Washington DC VA Medical Center, the sprawling federal agency's self-proclaimed "flagship" facility. Its acting director, Lawrence B. Connell, has known about the problems there since June, according to emails exchanged among staff. At least two incidents have occurred since then — with 19 verified in all since late 2015, according to partial records obtained by The Post and data provided by the D.C. fire department.

Local firefighters responded to four such calls between February and November 2016. The last time was Nov. 30. One day later, a clinic safety official notified staff that, in the future, they should refrain from pulling a fire alarm if they encounter "noxious fumes" and to alert Washington Gas instead.

A spokesman for the utility company said no gas leak was found.

Connell "has been briefed regularly on these complaints and has been personally involved in the comprehensive, multipronged response involving respected investigators from both inside and outside VA," said Cashour, VA's spokesman. He was a senior adviser to VA Secretary David Shulkin before becoming the medical center's acting director this past summer. Connell accepted the job after his predecessor, Brian A. Hawkins, was removed after an internal investigation found patients receiving treatment at the facility had been endangered by "the highest levels of chaos" created by managerial ineptitude, a VA inspector general's report concluded.

One months-long email chain exchanged among several clinicians reveals a problem so persistent that it had become banal. "Just wanted everyone to know the gas smell is back," a staffer wrote Feb. 21. Another chimed in nine minutes later: "We smell something also in our area." Two hours later a third staffer wrote, "Haven't smelled it in a couple hours but I do have a bad headache."

Two days later, on Feb. 23, a mental health clinician said she briefed then-director Hawkins on the issue, saying unspecified repairs were made.

Hawkins could not be reached for comment.

On March 30, the emails resumed, when the gas smell returned, and again on May 17, when a social worker reported smelling vehicle exhaust.

Nine days later, after another incident, one staff member wrote, "I can only say this is frightening."

Hawkins was gone by then, but the problem was inherited by his successor.

"I raised the issue with Mr. Connell and the staff . . . this morning again," a senior staffer told colleagues on June 10, a day after yet another incident.

It is unclear how many clinic staffers and veterans have been exposed to the gas or what, if any, permanent afflictions they may carry. Staffers say their symptoms seem to improve when they are away from the clinic. The documents don't indicate anyone's current medical status, including the eight who tested positive for carbon monoxide.

One staffer said the patients are thought to be less at risk because they come for appointments and then leave, though they may not make the connection between potential symptoms and their visit to the clinic.

Staff members, however, can inhale the gas for hours on end.

VA safety officials and senior leaders, discussing the issue internally, say they've tried to resolve the problem. They point to numerous air tests for carbon monoxide, carbon dioxide and other gases as indication of their effort.

Two outdoor pipes were adjusted after some speculated that vehicle exhaust was to blame. Access to a dumpster was blocked. Building contractors even dumped water into drains to flush any sewer gas. An environmental liaison for the building's owner, Lincoln Property Company, acknowledged in December that sewer gas was a contributing factor that had been resolved.

A senior VA official visited Oct. 4, when the most recent gas exposure occurred, but it is unclear whether he experienced the problem firsthand.

Staffers at the clinic point to Todd Williams, one of two acting assistant directors of the main VA hospital who report to Connell, alleging that he too has played down the problem.

On Aug. 12, he said in an email that relocating dumpsters and blocking off two parking spots near an intake pipe would "further mitigate risk associated" with vehicle exhaust circulating in the building. "Given these efforts," he wrote, "do we have a timeline for relocation of providers back to CRRC?"

Cashour declined to address questions about Williams's role in resolving the issue.

Williams does not work at the clinic. Leadership on site has been more sympathetic, staffers say. For instance, a nursing manager advised staff to seek doctor's notes if they feared contact with the gas would adversely impact their health, emails show.

Staffers asked for health officials to conduct an epidemiological analysis of symptoms and exposure rates over time.

VA said they completed assessments and found no link between the clinic and health concerns.

1.7 - The Denver Post: [Dozens of surgeries at Denver VA hospital put off because of doctor shortage, Too few anesthesiologists and competitive market to blame, VA says](#)
(12 October, David Migoya, 4.8M online visitors/mo; Denver, CO)

A shortage of anesthesiologists at Denver's veterans hospital – despite salary offers reaching as high as \$400,000 a year – has forced a delay in dozens of surgeries just months after the institution was tagged with some of the nation's worst waiting lists for care.

Though the hospital employs eight anesthesiologists and eight nurse anesthetists, they're short of the complement needed to meet surgery demands that run about 380 operations a month, a spokeswoman said, noting some staff has left for other jobs as well as taken paternity and maternity leaves.

"Currently we have had approximately 65 to 90 nonemergent surgeries rescheduled or postponed due to a shortage of anesthesiology staff," VA spokeswoman Kristen Schabert said. She offered no examples.

VA data show the average wait time for new-patient surgical appointments at the facilities that make up the Eastern Colorado Health Care System during the 2017 fiscal year that ended Sept. 30 is about 21.6 days, which is slightly better than the national average of 22.7 days. The average wait time at just the Denver facility is 18.6 days.

VA's waiting time in fiscal 2017 for surgery for established patients is 9.5 days, longer than the national average of 5.8 days, according to the VA. It is 8.3 days at the Denver facility.

The latest situation was first reported by FOX-31 News, and it's an extension of a problem that's plagued the Denver facility since the summer.

In July, The Denver Post reported that wait times for primary care medical appointments at veterans facilities in eastern Colorado and the Denver area were among the worst in the nation, and that Front Range veterans have seen little improvement in the three years since a national scandal erupted over the problem.

Colorado congressmen assailed the agency for its continued — and worsening — issues over veteran care, especially after the VA battled other controversies such as the massive delays and cost overruns in constructing a new \$1.7 billion facility in Aurora, which is expected to open in the spring.

Officials of VA's Eastern Colorado Health Care System at the time said critical shortages in medical personnel – including the doctors and nurses that are at the root of the surgery delays faced today – made it difficult to keep up with the growing demand Colorado has seen from an increasing veteran population.

Sometimes, chief of staff Dr. Ellen Mangione said, veterans would rather wait for a familiar face at the VA than be seen more immediately by a doctor outside the system, even when given the choice to do so.

The eastern system had a 16 percent vacancy rate — there were 336 physicians — during the summer crisis, even though it was offering some primary care doctors as much as \$200,000 a year in salary and additional training. Schabert did not immediately have current vacancy figures.

“Our leadership has been supportive and we were able to up our salary offerings to remain competitive,” Schabert said of the search for anesthesiology professionals, “but ... Denver is a competitive market.”

Until hires are made, the eastern system is contracting with temporary outside physicians, known as a “locum,” to fill the gaps, Schabert said.

And the eastern system is no longer among the nation’s worst waiting periods for an appointment to see a primary care physician, VA data show, although it still ranks high with an 11-day average compared with a 4.8-day national average.

It’s been replaced by the VA health care system in Grand Junction, where the average wait for a primary care visit is 18 days, data show. That system is nearly one-tenth the size of Denver’s.

[Back to Top](#)

1.8 - Military Times: [Lawmakers take first steps toward a BRAC for VA facilities](#) (12 October, Leo Shane III, 2.1M online visitors/mo; Springfield, VA)

WASHINGTON — House lawmakers took the first steps Thursday toward shutting down hundreds of Veterans Affairs facilities through a process similar to military base closure rounds, saying the move is critical to keep the department from wasting millions of dollars on underused, aging buildings.

But some of the largest veterans groups said they have serious concerns with the proposal, saying it’s ripe for abuse and could tempt VA officials to outsource more veterans’ medical care to private-sector physicians.

Even supporters admitted the plan will be a difficult sell on Capitol Hill.

“This bill is bold, transformative and controversial,” said Rep. Phil Roe, R-Tenn., chairman of the House Veterans’ Affairs Committee. “Moving forward with it will require a significant amount of political courage and, let’s face it, members of Congress are not known for that.”

At issue are the roughly 6,300 facilities owned VA spread across the country. Department officials have said more than 57 percent of those locations are more than 50 years old, and hundreds of others provide little value to veterans care or department management.

VA Secretary David Shulkin in June announced plans to close at least 430 vacant or mostly vacant buildings over the next year, a move that is expected to save about \$7 million annually.

But he also has pushed for further authorities to close other locations, to better match department resources with future needs.

The VA base-closure-style plan — dubbed the Asset and Infrastructure Review Commission — would establish an eleven-member outside panel to recommend facility closings and resource shifts based on facility needs criteria to be established by the VA secretary.

That would involve an in-depth review of VA real estate and health care strategies, complete with public hearings. The final commission recommendations would need to be approved by the president. Congress would have 45 days to override the White House decision if they disagree with the planned closings and moves.

Much like the military base closing commissions, the set-up is designed to separate facility closing choices from political whims. Roe and committee ranking member Rep. Tim Walz, D-Minn., said the commission could also recommend setting up new facilities in underserved areas, using savings from other closings to pay for the new sites.

But veterans groups who testified before Roe's committee on Thursday said they have serious concerns that an outside panel could focus on savings instead of seeking the best care options for veterans, creating major problems for a system already dealing with wait time and access challenges.

Carl Blake, associate executive director at Paralyzed Veterans of America, said his group could support the idea "assuming the intent is to right-size the VA and not simply use this opportunity to reduce the footprint of VA for the purpose of fulfilling a promise for greater community care access and cutting spending."

Officials from Disabled American Veterans said they support a full review of the department's national footprint but aren't convinced the base-closing commission is the right path for that discussion. Officials from the American Legion said their group would not support the plan unless veterans groups had the opportunity to veto recommendations they deem harmful to veterans care.

But even without those concerns, any federal facility closing process faces a difficult path in Congress. Defense Department officials have been petitioning lawmakers for five years to hold another military base closing round, only to have the proposal rebuffed annually.

Government Accountability Office researchers said the last five BRAC rounds have produced nearly \$12 billion in annual federal savings. But the last round conducted in 2005 still has not recouped its original costs, which has lead many in Congress to question the value of such cutbacks.

Roe insisted this plan is different, because the focus isn't on generating savings but instead better preparing the department to respond to veterans needs. The proposal for now is only draft legislation, but he said he hopes to move forward on the issue in coming weeks.

Veterans groups said they would continue to work on the issue with lawmakers but emphasized their skepticism.

Acting VA Deputy Under Secretary for Health for Policy Regan Crump said department officials are not backing the idea of an outside asset commission yet, but do support “the need for more flexibility” with VA facilities.

As the congressional debate continues, VA officials are reviewing another 784 non-vacant but underused facilities to determine if they can close or restructure them in coming months.

[Back to Top](#)

1.9 - Stars and Stripes (Military Update): [VA, Congress crawl toward ending abuse of vet pensioners](#) (12 October, Tom Philpott, 1.5M online visitors/mo; Washington, DC)

In 2012, the Government Accountability Office found more than 200 financial planning firms and estate law offices enticing veterans or their survivors into costly annuities or irrevocable trusts intended to hide or reallocate their assets so they qualify for VA pensions that the claimants wouldn't be eligible for otherwise.

Since then, the Department of Veterans Affairs and Congress have been crawling toward actions to stop the abusive practices, which twist the intent of the pension benefit in ways to help some veterans, put others in financial binds, and generate fees or profits or streams of residents for the schemers.

The crawl toward reform continues. The VA is still working on a draft rule first released for public comment in January 2015. Final publication of the “Net Worth, Asset Transfers and Income Exclusions for Needs-Based Benefits” rule was expected this past summer. However, it remains “in VA’s internal concurrence process,” a VA spokesman said Wednesday.

Meanwhile, the House veterans’ affairs subcommittee on disability assistance and memorial affairs held a first-ever hearing last month on legislation to address financial abuses of the pension program. The Veterans Care Financial Protection Act (now HR 3122) was first introduced in 2014.

The VA pension program exists to help veterans in financial distress if they served at least a day of wartime service, at least 90 consecutive days on active duty and earned an honorable or a general discharge. To be eligible for the basic VA pension, veterans also must have only modest annual incomes or none at all.

They can qualify for more VA financial help, however, if they are disabled and unable to leave their homes unassisted, or they have unmet daily living needs or they face exorbitant medical, assisted care or nursing home costs. The additional financial help is called the VA Aid and Attendance benefit.

“It’s an absolute lifeline for veterans who have significant health problems,” John Katz, the American Legion’s assistant director for pensions at the VA regional office in Philadelphia, told me late last year. “Many people who laid their lives on the line for their country are incapable today of taking care of themselves without housebound benefits or Aid and Attendance, in addition to the nonservice-connected [VA] pension. For them there’s no other way they’d survive.”

About 303,000 wartime veterans and 220,000 survivors draw VA pension benefits. Veteran advocates believe thousands more would qualify if they knew the program existed and applied. What has raised the profile of pensions recently, however, have been the reports of abuse and target marketing by unscrupulous financial planners, lawyers or even care facilities seeking vets who are ill or elderly.

The pension is a needs-based benefit with need determined using thresholds on annual incomes and on assets or net worth. For example, a wartime vet with no dependents can qualify for all or a portion of the basic pension benefit if he or she has income, including Social Security, less than \$12,907 annually. If income is \$10,000, for example, the benefit would be calculated by the maximum annual pension rate of \$12,907 minus \$10,000, for a total of \$2,907 annually.

However, the pension benefit is unique in that it allows veterans to apply medical expenses to offset income calculations and raise the benefit. Even higher amounts are payable if the veteran or surviving spouse is housebound, and more Aid and Attendance dollars are available if claimants need help with daily activities.

A married veteran needing Aid and Attendance can qualify for at least some pension monthly if his or her income doesn't exceed \$25,525. A survivor's pension is smaller but also based on need with consideration too of medical expenses.

The other threshold to determine eligibility is net worth. If assets other than primary residence and vehicle exceed \$80,000, then VA can't assume eligibility without a closer determination. Again, medical-related expenses can be critical. For example, if a veteran with assets totaling \$100,000 moves into an assisted-living facility that costs \$5,000 a month, a VA service officer could determine the asset threshold quickly will be reached and can find the veteran eligible for pension.

Veterans and survivors who believe they might qualify should contact the veterans' service office for their county to fill out required forms. More program information can be found online at: benefits.va.gov/PENSION/index.asp.

A key purpose of regulatory reforms aimed at VA pension benefits is to ensure they are used by low-income veterans or those facing exorbitant medical expenses they can't pay, rather than as a tool to preserve family wealth.

One provision in VA's draft rule would impose a three-year look-back provision on assets to discourage new claimants from hiding assets. Other changes would reset the asset ceiling to the higher and "brighter line" used by Medicaid, and more clearly define medical expenses that can reduce income calculations. The new rule would not leave the threshold on assets open to interpretation as it is now.

Legislative reforms, which show signs of life, take a different approach. As Rep. Matthew Cartwright, D-Pa., testified last month on behalf of his bill, HR 3122, his measure would direct the VA and other federal agencies to work with state officials and outside experts to establish state and federal standards to end "dishonest, predatory or otherwise unlawful practices" that target VA aid and attendance dollars.

"Unscrupulous actors are increasingly exploiting this assistance program by preying on our older veterans' vulnerability," to waste federal dollars and turn "this well-deserved benefit into a financial nightmare for those who can least afford it," said Cartwright.

Some charge veterans “a non-existent application fee to obtain the benefit,” he added. Others collect “consultation fees” with “promises to expedite the application process. Yet another scam is an offer to help veterans qualify for the benefit even when their net worth is too high to qualify.”

In this way, Cartwright explained, financial planners gain control of the veteran’s assets and “move them into an irrevocable trust or annuity, which the elderly veterans often cannot access for many years.”

Increasingly, he said, retirement homes are recruiting veteran residents with promises that they will qualify for VA aid and attendance to cover cost of the home.

“If the A&A claim is later denied, however, the nursing home then demands back payment from the veteran. This is a practice that leaves vulnerable elderly veterans with the undesirable choice of draining their own remaining assets or giving up their new home,” Cartwright said.

He first introduced his bill on learning of companion legislation in the Senate (now S. 1198) from Sen. Elizabeth Warren, D-Mass. The bill now has bipartisan support in the subcommittee. Witnesses for VA and veteran service organizations expressed support. Cartwright promised some changes to reflect concerns from the GAO that it shouldn’t be given a role in establishing the new protection standards given its existing responsibilities for reviewing how the standards are implemented.

With no costs attached, the bill is expected to clear the subcommittee this fall. Full committee action and passage by the House isn’t expected this year.

1.10 - Public Radio International (Audio): [Meet the women combing through Puerto Rico, searching for veterans in need](#) (12 October, Jasmine Garsd, 1.2M online visitors/mo; Minneapolis, MN)

It’s early in the morning, and the entire city of San Juan, Puerto Rico, seems to be gazing at the sky with concern. It looks like rain but the island just can’t handle any more flooding.

On the highway, under the dark, heavy clouds, a small car makes its way through traffic. In it are four women, Ghislaine Rivera, Mia Lind, Janine Smalley and Katie Blanker, with whom I’m spending the day — it’s Oct. 5.

Our first stop? A school that’s been turned into a hurricane shelter.

Lind, an occupational therapist for the VA Caribbean Healthcare System in San Juan, goes to the door, asking, “Are there any veterans here?”

Every day since the hurricane hit, she and her team have been roaming from shelter to shelter, looking for veterans who need medical attention.

There are somewhere around 75,000 US Army veterans living in Puerto Rico. Most served during the Vietnam War. After Hurricane Maria, many are now living in shelters. Thousands, overall, have been displaced by the storm, and the shelters are packed.

At the school, a supervisor answers: Yes, there's a veteran here.

The VA team finds 70-year-old Luis Torres lying in bed. His dress shirt is wide open and his baseball cap is flipped backward. His bed is surrounded by piles of clothing and some bags of food.

The Air Force veteran was honorably discharged; he has his military ID, but the other paperwork was lost in the storm. "My house ... it disappeared," he says, breaking down in tears.

His teenage son, Andrew Torres, who is also staying here, pulls out his phone to show us pictures of what's left of their house. It's like the roof and the walls were just plucked out. On the second floor, a toilet stands alone in the open.

Janine Smalley takes Luis Torres's vitals. His blood pressure is 130 over 80, so that's "perfect," she says, asking, "Do you take any meds?" Smalley is the VA team's registered nurse and Disaster Emergency Medical Personnel trained by the Federal Emergency Management Agency. She's here from Cleveland, Ohio. She volunteered to come help. She says when she saw what was happening in Puerto Rico, she asked to be sent here.

Meanwhile, Katie Blanker, who also volunteered for this assignment, brings Torres toothbrushes, heating pads and food. Blanker is from Stevens Point, Wisconsin. She's a social worker with the VA and a veteran herself.

Katie Blanker is working in Puerto Rico as a social worker with the VA. She's also a veteran. She's originally from Stevens Point, Wisconsin. Credit: Jasmine Garsd/PRI
Torres cheers up. "Where's the T-bone steak?" he jokes. At least for a few minutes, the mood has lightened up.

Lind says that she, too, had been thinking about steak, just the day before. There is a meat shortage on the island. "I really want to have a meal for my kids that includes beef. That was my goal. To get my kids not canned food. When you have chaos like this, the only right you have is to stay alive. You stay alive, and you survive," she says.

Lind fights back tears. The others from her team hug her. Then she smiles and announces the next neighborhood they're heading to: "Let's go to Rio Grande!"

Let's go "before we're all crying. I was hoping to wait till noon to cry again," Smalley says.

The next shelter is even more packed than the last one.

"May we come in and ask if anyone is a vet?" Lind asks.

A man says there aren't any vets there.

Lind asks the man how he knows.

The man bristles, saying, "I can't force them to talk to you."

Lind thanks him, and the team leaves. Later on, in the parking lot, Lind tells me she suspects some shelters just don't want the VA team coming in. She and her colleagues represent the federal government. And they have to report it if a hurricane shelter isn't providing enough food and water. Or if it's overcrowded.

A lot of these shelters are just repurposed schools, places for people to lie down and rest, with no running water or electricity. This is the new normal. Which is why the last shelter we go to takes us a little by surprise.

The team walks right in. There's a radio blasting pop music. There are kids painting murals. And then there's Benny Molina.

The residents cheer his name as he sits down for a checkup by nurse Smalley. Molina, 61, is a veteran — "National Guard in Riverdale, New Jersey. Specialized in tanks. Driving the tanks," he says.

"Benny that's perfect!" interrupts Smalley. Benny's blood pressure is normal. He jokingly offers to do pushups — in a while — he just had a big meal. The room erupts in laughter.

Ghislaine Rivera, a social worker, asks him what happened to his home. It's gone. Benny lost everything he owned to the storm. The team offers to give him aid packages, with basic supplies, but he refuses. "Right now, we have food and everything ... but some other people are sleeping on the street and they have nothing to eat."

As he fills out his paperwork, Smalley and Blanker take a quick break in the shade. They are red from the heat and visibly tired. They've come a long way, from Ohio and Wisconsin. But, they say, this is a responsibility they have. All of us do.

"We don't know them all, but we owe them all," says Smalley.

"All of the veterans we're here for served for the United States," says Blanker. "This is Americans helping Americans. These veterans were stationed in the US, went to war with the US. I think that's the thing that people forget."

2. Veteran and Employee Experience

2.1 - The Washington Post (PowerPost, Video): [House to vote on bill requiring discipline for officials who retaliate against whistleblowers](#) (12 October, Eric Yoder, 43.9M online visitors/mo; Washington, DC)

Federal agencies would be required to discipline officials who retaliate against whistleblowing employees, and to fire them on their second offense, under a bill up for a House vote Thursday.

The bill, approved by the Senate in May, is one of many arising from the disclosures starting in 2014 of falsified patient records at the Department of Veterans Affairs. The revelations drew a surge of complaints from lower-level employees who said they had suffered workplace reprisal

from managers for pointing out the problems and that managers were not being held accountable for violating the legal protections for whistleblowers.

“While retaliation at the VA has captured the public’s attention most recently, retaliation against whistleblowers is not confined to any one agency,” a Senate report on the bill says, adding that mandatory discipline is designed to “ensure accountability throughout the Federal Government.”

The bill would require at least a three-day suspension of a federal official found to have committed retaliation by an internal government legal process or by a federal judge and firing for a second offense. The time to contest a notice of proposed discipline would be shortened from 30 to 14 days, but once the firing became final, regular appeal rights would apply.

Congress last year enacted a similar requirement applying only to VA officials who retaliate against employees who disclose fraud, waste or misconduct, with at least a 12-day suspension for a first offense and firing for a second. This year, a law shortening and restricting appeal rights for VA employees was enacted, and on Wednesday the House passed a measure somewhat widening whistleblower protections.

The measure requiring firing for retaliation would create an exception to the general rule that agencies have wide discretion over disciplining their employees. Currently, mandatory firing also applies at the Internal Revenue Service under a long-standing policy known as the “10 deadly sins” involving abuse of authority.

The George W. Bush administration attempted to impose mandatory discipline for certain types of misconduct as part of alternative personnel policies at the departments of Defense and Homeland Security, but neither took effect in the face of lawsuits and opposition from Congress.

Also, under the latest bill, agencies would have to give priority to a request for a transfer on behalf of an employee — including one still in a probationary period — who alleges retaliation; it would be an act of retaliation for an agency official to access the employee’s medical records following a disclosure; and more training on whistleblower rights would be required for new employees and for supervisors.

[Back to Top](#)

2.2 - U.S. News & World Report (AP): [Alaska Veterans Affairs System to Add 100 Staff Members](#) (13 October, 24M online visitors/mo; Washington, DC)

ANCHORAGE, Alaska (AP) — The Alaska Veterans Affairs system has announced it's adding 100 staff members.

KTVA-TV reported Wednesday that Dr. Timothy Ballard said the staff is being added in response to negative reviews from both patients and staff.

Ballard said the new positions are focused on mental health care and support functions. The 100 new jobs boost the system's number of staff to 650 at a cost of \$6 million.

Ballard said money to pay the new workers is being repurposed from other places in the budget.

He said the system is also increasing the speed at which it fills vacancies, bringing the wait time down from six months to six weeks.

2.3 - Atlanta Journal-Constitution: [Roswell getting \\$21K for veterans adaptive sports](#) (12 October, David Ibata, 11.9M online visitors/mo; Atlanta, GA)

Roswell has agreed to accept \$21,080 from the federal government to purchase equipment and hire instructors for new VA Wheelchair Softball and Adaptive Cycling programs for disabled veterans.

The City Council approved a resolution accepting the FY 201 Adaptive Sports Grant from the U.S. Department of Veterans Affairs. The grant does not require local matching funds, according to a staff report to the council.

The Roswell Recreation, Parks, Historic and Cultural Affairs Department will be responsible for the adaptive sports program.

[Back to Top](#)

2.4 - The Hill: [New whistleblower protections head to Trump's desk](#) (12 October, Cristina Marcos, 11.8M online visitors/mo; Washington, DC)

The House unanimously cleared legislation on Thursday to ensure protections for federal employees who disclose government waste, fraud and abuse.

Passed 420-0, the measure would train federal workers so they understand their protections, as well as enhance penalties for supervisors who retaliate against whistleblowers.

The bill is named after Chris Kirkpatrick, a psychologist was fired from a Department of Veterans Affairs (VA) medical center after raising concerns about patients' medications. He committed suicide on the day he was dismissed.

The bill also orders the VA to create a plan for preventing unauthorized access to employee medical records and conduct outreach to employees about mental-health services.

The Senate passed the legislation, authored by Senate Homeland Security and Governmental Affairs Committee Chairman Ron Johnson (R-Wis.), in May. It now heads to President Trump's desk for his signature.

"Future whistleblowers who take a risk to expose wrongdoing and waste in the federal government deserve the respect and support of our nation. I urge the president to quickly sign these important reforms into law," Johnson said in a statement.

Before final passage, House Democrats offered a procedural motion to amend the bill by extending protections to federal workers who reveal wrongdoing by an agency head or political appointee violating rules or regulations regarding travel.

Democrats offered the motion in light of Tom Price's resignation as secretary of Health and Human Services in September after Politico revealed his extensive use of private jets, instead of commercial alternatives, at taxpayers' expense. Politico estimated Price's travel costs at possibly more than \$1 million.

"The resources invested to agencies to fulfill their missions of serving Americans should not be abused or frivolously flaunted for personal gain or convenience," said Rep. Tom O'Halleran (D-Ariz.), who offered the motion.

Rep. Rod Blum (R-Iowa) did not disagree with the substance of the proposal offered by Democrats, but urged swift passage of the underlying whistleblower legislation so Trump could sign it into law as soon as possible.

"Let's not let one good bill get in the way of another," Blum said.

The motion failed along party lines, as is typical in the House when it comes to procedural votes.

The House also passed two noncontroversial bills by voice vote on Wednesday to protect and encourage whistleblowers.

One measure, authored by Rep. Chuck Fleischmann (R-Tenn.), would allow federal agencies to pay up to \$20,000 in cash rewards to workers who report waste. The other, sponsored by Rep. Steve Russell (R-Okla.), would allow whistleblowers outside the intelligence community to disclose classified information to supervisors in their chain of command.

[Back to Top](#)

2.5 - Bangor Daily News: [‘Dangerous surgeon’ at Togus allegedly made mistakes in 88 cases, but VA kept it quiet](#) (12 October, 1.2M online visitors/mo; Bangor, ME)

An explosive USA Today investigation into medical mistakes allegedly made under the watch of the U.S. Department of Veterans Affairs highlighted what the newspaper described as one particularly egregious case in Maine.

According to the report, podiatrist Thomas Franchini allegedly made mistakes in 88 cases while working at the Togus VA Medical Center near Augusta, the nation's oldest veterans' hospital.

"We found that he was a dangerous surgeon," former hospital official Robert Sampson said during a deposition in a federal lawsuit against the department, according to the newspaper.

U.S. Rep. Bruce Poliquin, R-Maine, described the case as "unacceptable behavior" and called the situation "nothing short of appalling" in a Thursday statement.

USA Today's report describes myriad examples: Franchini allegedly drilled the wrong screw into the bone of one patient, severed a tendon in another, conducted unnecessary surgeries and twice failed to properly fuse a woman's ankle, for instance.

Instead of being fired, the newspaper's investigation found, the department didn't report him as a problem doctor or fire him, but rather allowed him to quietly resign and open a private practice in another state.

The Franchini case was revealed as part of an investigation that uncovered about 230 secret settlement deals in which VA officials quietly cut ties with problem doctors and other medical staff across the country, allegedly promising to conceal serious mistakes and allow many of the personnel in question to go into the private sector with unblemished records.

Franchini, who was reportedly placed on leave by the VA in 2010 and resigned soon thereafter, told USA Today he never got to respond to the department's findings that he'd made serious mistakes, and that his attorney submitted two outside reviews that contradicted those findings.

He also said he has performed many surgeries since leaving the VA without complications.

"If I was so bad, I would be bad all the time," he told USA Today.

Six veterans are now suing the VA accusing the agency of fraudulently concealing Franchini's mistakes.

In response to the report, Poliquin, who represents Maine's 2nd congressional district, announced Thursday he is joining fellow Reps. Cathy McMorris Rodgers of Washington and Phil Roe of Tennessee to introduce a bill that would force agency officials to report to state licensing boards if they discover "unacceptable or unethical behavior from other medical professionals at the VA."

"Our Maine veterans depend on their services at Togus and other VA facilities across our state for critical care, and it is absolutely unacceptable for them to ever be subjected to medical malpractice," Poliquin said in a statement. "We must have accountability at the VA, to ensure our veterans are always getting the best care possible, and I am proud to be working on the Veterans Affairs' Committee to do that."

2.6 - WFED (AM-1500, Audio): [House passes bill to give TSP participants more withdrawal options](#) (12 October, Eric White, 831k online visitors/mo; Washington, DC)

[...]

The Veterans Affairs Department stepped back a proposal to suspend a 50-year-old ethics law. The law, first passed in 1966, requires VA to fire any employee who also works for a school whose students receive VA benefits. The department had planned to completely stop enforcing that requirement by next Monday, since some of its employees also work as adjunct professors at for-profit colleges. But it abruptly walked back the regulatory change on Wednesday after

complaints from veterans groups who said the waivers should only be granted on a case-by-case basis. (Federal News Radio)

[Back to Top](#)

2.7 - La Crosse Tribune: [House approves whistleblower bill named for former Tomah VA doc](#) (12 October, 822k online visitors/mo; La Crosse, WI)

The U.S. House passed a federal whistle blower protection bill Thursday named for a former VA psychologist who questioned over-medication of patients at the Tomah VA Medical Center.

The Dr. Chris Kirkpatrick Whistleblower Protection Act is designed to protect federal employees who come forward with allegations of waste, fraud and abuse and to set minimum disciplinary measures for supervisors found guilty of retaliation.

The bill also requires the VA to put together a plan to prevent supervisors from improperly accessing an employee's medical files in retaliation.

Kirkpatrick killed himself in 2009 the same day he was fired after questioning over-medication practices at the Tomah VA, which earned the nickname "Candy Land" because doctors there prescribed such high doses of opiates. Investigations later blamed those prescription practices for the deaths of at least two veterans.

U.S. Rep. Ron Kind, whose district includes the Tomah VA, spoke on the House floor in favor of the bill.

"Dr. Kirkpatrick was dedicated to improving the lives (of) and serving our nation's veterans," Kind said. "The bill before us today will honor the memory of Dr. Kirkpatrick by helping to make sure no one will have to go through what he did."

The bill, introduced by Sen. Ron Johnson, passed the House unanimously and now heads to President's desk.

Johnson, a Wisconsin Republican, said the passage brings the nation "

one step closer to better protecting federal whistleblowers and providing better health care to the finest among us – our veterans."

VA Secretary David Shulkin has pledged to bring greater accountability to the government's second largest agency, which provides medical care to millions of veterans. In July, Shulkin began posting employee disciplinary actions and announced that he would require approval by a senior official of any settlement with a VA employee over the amount of \$5,000, citing unnecessary payments to bad employees. A month later, he ordered a review to expand VA reporting requirements for bad workers.

During the 2016 campaign, Trump described the VA as the "most corrupt," promising to "protect and promote honest employees" at the VA who expose wrongdoing.

2.8 - WLOS (ABC-13, Video): [Protesters at Asheville VA say being understaffed is dangerous](#) (12 October, 480k online visitors/mo; Asheville, NC)

ASHEVILLE, N.C. (WLOS) — Veterans Affairs employees held a rally outside Asheville's Charles George VA Medical Center on Thursday to protest working conditions.

Protesters said low staffing levels are creating risks to patient safety and a hazardous work environment. They said Congress has failed to fill open positions, putting veterans' health care at risk.

"We're trying to get the word out and let Congress know that we're here to support these veterans," Brandee Morris, of AFGE Local 446, said.

Protestors said there are nearly 50,000 open positions at VA centers across the country, and there's no plan in place to fill them.

[Back to Top](#)

2.9 - HousingWire: [Ginnie Mae, VA launch task force to look into lenders targeting veterans for quick refinances - Comes on the heels of Ginnie Mae opening investigation](#) (12 October, Ben Lane, 438k online visitors/mo; Irving, TX)

Roughly one month ago, Ginnie Mae announced that it was launching an investigation into mortgage lenders that were aggressively targeting servicemembers and military veterans for quick and potentially risky refinances of their mortgages.

The investigation came on the heels of a letter from Sen. Elizabeth Warren, D-Massachusetts, who cited a report from the Consumer Financial Protection Bureau, which covered complaints received from veterans about Department of Veterans Affairs mortgage refinancing.

Warren's letter claimed that there may be lenders "aggressively and misleadingly marketing the refinancing of mortgages backed by the Department of Veterans Affairs, generating fees for themselves at the expense of veterans and American taxpayers."

Now, Ginnie Mae and the VA are launching a task force to "address mortgage refinancing issues" surrounding VA loans.

The task force, which is called the "Joint Ginnie Mae – VA Refinance Loan Task Force," will focus on "examining critical issues, important data and lender behaviors related to refinancing loans and will determine what program and policy changes should be made by the agencies to ensure these loans do not pose an undue risk or burden to Veterans or the American taxpayer."

But more specifically, the agencies say that the task force will review the "aggressive and misleading refinancing" marketing practices of certain lenders, and will address "loan churning and repeated refinancing."

Loan churning is the practice of convincing an existing borrower to refinance their mortgage.

When announcing the investigation, Michael Bright, the acting president and chief operations officer of Ginnie Mae, said that the market for VA loans that is “somewhat saturated with lenders and brokers making dozens of calls and sending dozens of letters to veterans” trying to get them to refinance their mortgages.

And now, Ginnie Mae and the VA are working to address the issue.

“Both agencies agree that VA and Ginnie Mae programs work best when they are used by market participants in ways that provide a benefit to Veteran borrowers and, ultimately, lower Veterans’ costs,” Ginnie Mae said in an announcement.

According to Ginnie Mae, the task force has already started its work by examining data and information to “ensure loans provide a net tangible benefit to Veteran-borrowers, and consider establishing time frames regarding recoupment of fees associated with refinancing loans.”

Ginnie Mae said that the task force will also examine the impact of “establishing stronger seasoning requirements for VA-guaranteed loans that are securitized into Ginnie Mae Mortgage Backed Security pools.”

Additionally, Ginnie Mae said the task force will work to “ensure Veterans understand the costs and benefits of refinancing, and ensure robust borrower outreach and education programs are augmented for this purpose.”

The agencies also plan to arrange “joint discussions with individual lenders whose demonstrated origination practices may negatively affect Veteran borrowers or increase program costs and risks.”

The agencies also say that the task force will continue its work until “concrete solutions” are found that will “eliminate lender behavior that is unhelpful to Veterans and harmful to the American taxpayer.”

[Back to Top](#)

2.10 - Citizen-Times: [Disappointed VA employees voice concerns, lack of staffing and support](#) (12 October, Alexandria Bordas, 318k online visitors/mo; Asheville, NC)

OTEEN - Ralliers gathered at Charles George VA Medical Center on Thursday afternoon to express disappointment in the 49,000 vacant staff positions nationwide, which veterans’ supporters said are affecting local VA branches.

Months of delays in appointments, overworked employees and lack of internal support can no longer be ignored, said Brandy Morris, executive vice president of the local American Federation of Government Employees labor union in Asheville.

“Veterans want to come to the VA and not be sent to private doctors because it will take us over a month to treat them,” said Morris, who has worked for the VA for 17 years.

Ralliers also said they were upset with the Trump administration's recent decisions in regards to veteran care.

In August, Trump signed a \$3.9 billion funding bill to save the nearly bankrupt Choice Program, which is a temporary benefit that allows eligible veterans to receive health care in their communities rather than waiting for a VA appointment or traveling to a VA facility, according to the Department of Veterans Affairs.

The Choice Program was created in 2014 after numerous reports revealed an alarming rate of cover-ups in veteran wait times at a handful of VA hospitals across the nation.

This summer, it was determined the Choice Program would no longer be able to offer the temporary benefit because it was running out of money.

Originally, the proposed bill was smaller and would solely fund the Choice Program, without an additional \$1.8 billion for hiring and clinics.

Backlash from veterans organizations, who said the bill prioritized privatized care as opposed to buffing up VA staff, led to the revised \$3.9 billion bill, which Trump signed in August, according to Stars and Stripes. The money is expected to keep the Choice Program afloat for six more months.

But, despite the new bill, there is still dissatisfaction among VA employees.

Paul Stone, a veteran who works at the VA as an electrician, was not inspired by the surge of support for the Choice Program under the Trump administration.

"If veterans had a choice, they would rather see their doctors here, but they don't have a choice so they are forced to see someone else," said Stone, who was holding a sign that said "I Love My VA".

Torre White comes from a family of servicemen and women. She works as a program support assistant with geriatrics at the VA.

It took her months to get hired, despite hundreds of job vacancies posted online, she said.

"There are plenty of openings, but why aren't people getting hired?" she asked. "With so many people applying and wanting jobs, it shouldn't take that long, and now our veterans are not able to get immediate care because of that."

These issues also bother Kay Murray, who has worked as a nurse at the VA for 8 years.

The VA can provide services in-house without the Choice Program if it had the right staffing, she said.

One of Murray's biggest concerns is veteran patients with mental health needs.

A lot of veterans come to the VA because they can trust their doctors, many of whom are veterans, which many not be the case if they go elsewhere, she said.

"The VA is home to veterans, their family, and they come to us wearing their buttons, hats and t-shirts," Murray said. "Half of our employees are veterans too, this is where all of them should be treated."

[Back to Top](#)

2.11 - WEAU (NBC-13, Video): [House members pass Whistleblower Protection Bill](#) (12 October, Ruth Wendlandt, 276k online visitors/mo; Eau Claire, WI)

Washington, D.C. (WEAU) In a bi-partisan vote, House members unanimously passed Representative Sean Duffy's Whistleblower Protection Bill.

The Dr. Chris Kirkpatrick Whistleblower Protection Act ensures no one is retaliated against for coming forward with concerns about waste, fraud, and abuse at the veteran affairs. It also requires the VA to come up with a plan to restrict unauthorized employee access to medical files.

The bill is named after a Wisconsin doctor who worked at the Tomah VA Medical Center, and was fired after he questioned the over-medication of veterans. On the day of his firing, Dr. Kirkpatrick committed suicide.

Representative Ron Kind says he's happy the bill received support from across the aisle. Kind says, "We need people who are working with our veterans who feel confident and safe to come forward when they see things that aren't working the way they're supposed to, when veterans aren't getting the treatment they need, and they deserve, without fear of retaliation without fear of being retired."

Representative Duffy says, "This legislation strengthens protections for patriots-for those who are trying to do the right thing, for those who care about veterans and their safety."

[Back to Top](#)

2.12 - Parkersburg News & Sentinel: [Outrageous: VA culprit deserves more than a lecture](#) (13 October, Editorial Board, 187k online visitors/mo; Parkersburg, WV)

How should a Department of Veterans Affairs manager who defrauded the government, took chances with veterans' health care, then devised a coverup be punished? Readers probably have their own ideas about that.

But according to the federal government, the answer is ... counseling.

One of U.S. Rep. David McKinley's constituents reported to him last year that something was wrong at the Louis A. Johnson VA Medical Center in Clarksburg. McKinley represents much of our area; and many veterans in our region rely on the VA hospital in Clarksburg.

McKinley went straight to the VA. The U.S. Office of Special Counsel, which also had been contacted by a whistleblower from the hospital, looked into the matter.

Investigators found that during a seven-year period, a manager at the hospital engineered a scheme whereby patient data was “intentionally manipulated” at the facility. The purpose was to make it appear at least some veterans were not kept waiting for care as long as actually was the case. In addition, the volume of patient visits was inflated.

Part of the scheme involved nurses being pressured to place patients in unofficial “clinics,” rather than record them as emergency department visits.

Whether any veterans were harmed by the manager’s actions was not reported by the Office of Special Counsel. Obviously, that should be checked.

One ramification of the misconduct was that 602 veterans were charged incorrect co-payments. That cost the VA \$21,070.

However, according to the Office of Special Counsel, the VA “is currently determining how to recoup lost payments.” In other words, the bureaucrats are looking into how they can go back to the 602 veterans and tell them they owe Uncle Sam money.

What about the culprit? According to the Office of Special Counsel, “the VA counseled the manager responsible ...”

That’s it. No punishment, just a good talking to.

We sometimes refer to the bureaucracy in Washington as “the swamp.” That may be a disservice to the snapping turtles, cottonmouth snakes, alligators and quicksand of the real thing.

[Back to Top](#)

2.13 - WAGM (FOX-8): [After Report Shows VA’s Failure to Disclose Medical Malpractice at Togus, Rep. Poliquin Acts to Make Changes](#) (12 October, 35k online visitors/mo; Presque Isle, ME)

Congressman Bruce Poliquin, along with House Conference Chair Cathy McMorris Rodgers (WA-05) and House Veterans Affairs Committee Chairman Phil Roe (TN-01), today introduced the Ethical Patient Care for Veterans Act of 2017. This legislation requires Department of Veterans Affairs (VA) medical professionals to report directly to state licensing boards if they witness unacceptable or unethical behavior from other medical professionals at the VA. The legislation is in response to the alarming USA Today article out yesterday that revealed the VA failed to disclose bad medical practitioners to the public, risking the public’s exposure to these bad actors.

One of the most notorious offenders was Thomas Franchini, a practitioner at Togus who had committed malpractice in 88 separate cases, according to the VA’s conclusions.

“These most recent reports are nothing short of appalling,” said Congressman Poliquin. “Our Maine Veterans depend on their services at Togus and other VA facilities across our State for critical care, and it is absolutely unacceptable for them to ever be subjected to medical

malpractice. We must have accountability at the VA, to ensure our Veterans are always getting the best care possible, and I am proud to be working on the Veterans Affairs' Committee to do that. I'm now pleased to work with Chairwoman McMorris Rodgers and Chairman Roe to help prevent this unacceptable behavior from occurring again."

"These newest reports out of the VA are deeply troubling," said Chair McMorris Rodgers. "Our veterans deserve the best care imaginable, but as we've seen, far too often that's not the case. This bill will help reform the culture at the VA by holding bad actors accountable and keeping them from continuing these mistakes at the VA or elsewhere. We should be rolling out the red carpet to our nation's heroes in Eastern Washington and around the country, and that starts with ensuring that the best and brightest are at the VA caring for our veterans."

"The findings of the USA Today investigation are intolerable," said Chairman Roe. "The committee has long been concerned about VA's settlement agreements, and even held a hearing on the topic last year. While I can appreciate VA's recent decision to more closely vet settlement agreements, malfeasance within the department will not be ignored. It certainly cannot be rewarded and hidden from state licensing boards. As a physician, I find this deeply troubling, and I thank Reps. McMorris Rodgers and Poliquin for their leadership on this issue."

NOTE: Currently, if the VA receives a report of substandard health care practices, it takes at least 100 days to decide whether to refer the matter to a state licensing board. This legislation will require timely reporting to state licensing boards so there is proper notice of these serious allegations.

As reported by USA Today, "the VA — the nation's largest employer of health care workers — has for years concealed mistakes and misdeeds by staff members entrusted with the care of veterans." The article lays out a number of cases where doctors provided poor, unethical, or irresponsible care, and faced zero medical licensing reviews.

By requiring malpractice to be reported to state licensing boards, this legislation ensures that if poor care happens, doctors and clinicians will no longer be shielded by the VA and could face consequences just like they do in private practice.

[Back to Top](#)

2.14 - WAGM (FOX-8): [Rep. Poliquin's Bill to Ensure VA Headstones For Veterans' Families Buried in Cemeteries Advances in the House](#) (12 October, 35k online visitors/mo; Presque Isle, ME)

Today, Congressman Bruce Poliquin had his Veterans bill pass out of committee with unanimous, bipartisan support.

Congressman Poliquin's legislation would ensure that Veterans' family members who are buried at tribal Veterans cemeteries—such as the Houlton Band of Maliseet Indians Tribal Veterans Cemetery in Aroostook County—are provided government furnished headstones, the same treatment as those buried at national and state Veterans cemeteries.

Congressman Poliquin, who represents the Houlton Band of Maliseet Indians and their Tribal Veterans Cemetery in Aroostook County, released the following statement:

“Our Veterans, who served and sacrificed for our Nation and who are now laid to rest in tribal Veterans cemeteries, should have the honor of being buried with their families and all should have access to headstones commemorating their sacrifices,” said Congressman Poliquin. “I’m proud to represent the Houlton Band of Maliseet Indians, who created the first Tribal Veterans Cemetery not only in Maine, but on the entire East Coast. It is a great honor to serve them and to push forward this commonsense fix so all our Veterans and their families can be properly honored when they are laid to rest. I’m extremely pleased to have the unanimous support of my Republican and Democratic colleagues on the Veterans’ Affairs Committee for this commonsense legislation, and I will continue to push this important bill through Congress and onto the President’s desk.”

Clarissa Sabattis, Chief of the Houlton Band of Maliseet Indians, said when the bill was introduced, “The Houlton Band of Maliseet Indians is honored to have the first Tribal Veterans Cemetery, East of the Mississippi. We all know that when a loved one serves in the military, especially when deployed overseas, that the family serves as well. Spouses take on the additional duties and stresses of taking care of their homes, being single parents, raising and comforting their children in times of great stress and ensuring our veterans have a home to return to. Congressman Poliquin’s Bill honors the families and acknowledges the sacrifices made by those who stay behind by providing headstones for the spouses and children of veterans who are buried in tribal cemeteries.”

Under current law, government furnished headstones are only available to Veterans’ eligible spouses and dependents buried in national and state Veterans cemeteries. This bill would authorize the Department of Veterans Affairs (VA) to provide headstones and markers to eligible spouses and dependents interred at tribal Veterans cemeteries.

[Back to Top](#)

2.15 - KOB (NBC-5, Video): [Oregon politician concerned about Roseburg VA medical facility](#) (12 October, 27k online visitors/mo; Medford, OR)

Washington, D.C. – An Oregon congressman is asking the U.S. Department of Veterans Affairs to address “substandard management” at the Roseburg VA hospital.

Congressman Peter DeFazio (D-OR 4th District) said the VA Roseburg Health Care System (VARHS) is a source of concern for constituents, who complained to the governor about the lack of effective and accountable management.

DeFazio claims nothing has changed at VARHS despite repeated outreach with VA leadership, including a direct appeal to VA Secretary David Shulkin last week.

“Poor management has resulted in degraded patient care and difficulty in recruiting and retaining talented medical professionals to help Oregon’s veterans. It’s outrageous that in addition to delays and government bureaucracy veteran care is being hampered by management issues,” Rep. DeFazio said. “Doctors, nurses, and other VA employees are putting their careers on the line to improve the system, risking potential retaliation from the same inadequate leadership. The status quo is entirely unacceptable, and it is time for the VA to stop passing the buck and take immediate action. Our veterans deserve better.”

Rep. DeFazio voiced his concerns while speaking in support of the Dr. Chris Kirkpatrick Whistleblower Protection Act. The legislation would create harsher penalties for those who retaliate against whistleblowers.

According to DeFazio's office, in 2015 35% of whistleblower complaints came from VA employees.

[Back to Top](#)

2.16 - The M Report: [Ginnie Mae and VA Create Refinance Loan Task Force](#) (12 October, Nicole Casperson, 20k online visitors/mo; Dallas, TX)

Ginnie Mae and the Department of Veterans Affairs (VA) recently announced the shaping of the "Joint Ginnie Mae – VA Refinance Loan Task Force," in an effort to address loan churning and repeated refinancing issues.

Specifically, the task force is set to focus on examining critical issues, important data, and lender behaviors related to refinancing loans. In addition, the task force will "determine what program and policy changes should be made by the agencies" as a way to ensure these loans do not pose an "undue risk or burden to Veterans or the American taxpayer."

According to the enterprise, this task force has begun its efforts in two ways. First, by examining data and information to ensure loans provide a "net tangible benefit" to Veteran-borrowers. Second, the task force is considering to establishing time frames regarding "recoupment of fees associated with refinancing loans."

The purpose of the task force is to also determine the effects if implementing stronger seasoning requirements for VA-guaranteed loans that are securitized into Ginnie Mae Mortgage Backed Security pools, according to Ginnie Mae's release.

Furthermore, the task force will "work to ensure Veterans understand the costs and benefits of refinancing, and ensure robust borrower outreach and education programs are augmented for this purpose."

Last year, the Consumer Financial Protection Bureau revealed a snapshot of service member complaints and issues related to VA mortgage refinancing. In light of these issues, the task force will examine aggressive and misleading refinancing propositions.

The release notes that Ginnie Mae and the VA will continue to work together until concrete solutions have been implemented to eliminate lender behavior that is unhelpful to Veterans and harmful to the American taxpayer.

2.17 - KSNW (NBC-3): [Kansas nurse in Puerto Rico to help Hurricane Maria victims](#) (12 October, 9.1k online visitors/day; Wichita, KS)

A Cheney nurse is in Puerto Rico helping victims of Hurricane Maria. Linda Sue Bayless is a provider at the Robert J. Dole VA Medical Center.

As part of the VA's Disaster Emergency Medical Personnel Program System, she signed on to deploy where she was needed most. Bayless left October 4 and is due back on the 18.

Her husband, Greg, says she is now living in a tent and has had no hot water since she arrived. He describes her as working side by side with FEMA, the Red Cross, and Homeland Security. "She is an honorable woman," He said. "She wants to help. She is patriotic. She has been a caregiver her entire life. She wanted to volunteer."

He describes his wife's conditions as "difficult" and she is currently working nights on the 7 p.m. to 7 a.m. shift.

3. Access to Healthcare

3.1 - Newsweek (Video): [PTSD Treatment: How Ai Is Helping Veterans With Post-Traumatic Stress Disorder](#) (12 October, Joseph Frankel, 9.4M online visitors/mo; New York, NY)

There is a real appeal to shouting into the void: the ubiquity of Google search as confessional, the popularity of PostSecret, the draw of confiding in a trusted friend with the hope verging on understanding that our secrets won't be shared all point to this. A group of researchers from the University of Southern California, with funding from the DARPA wing of the Department of Defense, believe that desire might drive a preference among veterans with PTSD to anonymously discuss their symptoms with a computerized avatar.

They found that the service members who volunteered for the study disclosed more symptoms of PTSD when speaking with a computerized "virtual human" than when filling out a symptoms checklist on the military's Post Deployment Health Assessment (PDHA). They also reported more symptoms even when filling out a completely anonymized version of the PDHA. The idea, the researchers suggest, is that people are more willing to disclose their symptoms when they know the data is anonymous.

It's unclear if that will fly in real life. Whether the program will truly help veterans remains to be seen. And its implementation raises questions about medical ethics and the stigma around mental-health in the military and culture at large.

The Institute for Creative Technologies at USC got lots of buzz for its original research, and introducing the world to Ellie, a digital diagnostic tool that strongly resembles, but cannot replace a human therapist. Ellie, an avatar of a woman in a cardigan with olive-toned skin and a soothing voice, listens to the people who come to her, and does what any human sounding board does. She listens to the content of their speech, and scans their facial expressions, tone, and voice, for cues that hint at meanings beyond speech. Ellie's design was decided upon by the research group's art team. As for how Ellie sounds, "she has a very comforting voice," Lucas told Newsweek.

(Unlike a human, of course, this kind of reading is made explicit enough to show in a video.)

Based off their results, Lucas says, the researchers believe that for veterans with PTSD, Ellie combines the best of both worlds: her warm demeanor and sympathetic responses establish the kind of rapport that a therapist would create, and the knowledge that she's not actually a person, and crucially, that she's not built into a chain of reporting, mean you can say whatever you want. This builds off past research this same team did, in which participants more intensely expressed feelings of sadness and reported lower rates of fear when going through a health screening with a virtual human rather than one they were led to believe was controlled by an actual human.

The way Lucas envisions it, Ellie is an economical and efficient solution. "All you need is a webcam, a laptop, and a microphone." She imagines Ellies existing in a kind of kiosk that can be tucked into a local VA. "I know it sounds creepy to put it in a closet, but you could put it in a closet."

And at least one psychiatrist thinks Ellie has potential. "This technology has amazing potential to drill down into the elements of rapport, and whether it differs by patient characteristics; something that is not possible with real life therapists or clinicians. A simple example is whether the sex and age of the avatar alters the effect," says Joseph Hayes, a psychiatrist at University College London.

However, Hayes believes the anonymity that drives the study's result might be impossible in real life. The participants in the study may feel more comfortable disclosing to Ellie because, unlike with the PDHA, which soldiers know will go on their permanent health record, what they say to Ellie will not. But if Ellie were really integrated into a care center, it's hard to imagine that the data she collects wouldn't also be accessible by treating clinicians.

"For an intervention to be possible ultimately, the disclosure would have to be shared with the same commanding officers who have traditionally received the results of the service members PDHA, and entered into their military health record. Once this is made explicit, would disclosure reduce to levels seen previously?" Hayes wrote. "If so, it is a culture change (reducing public stigma—within the military and more broadly) which is truly going to impact on disclosure and provision of appropriate treatment," Hayes wrote.

Lucas and her colleagues have been thinking about this problem, and she's optimistic they can work out a solution. She maintains that since the research is being implemented within the department of defense, it's under different rules than treatments marketed to civilians.

The way Lucas envisions it, even in real life, a session with Ellie can stay fully anonymous. A veteran can go in, talk with 'her', and at the end of the session Ellie can suggest they follow up with a clinician if the person needs further treatment. But, Lucas hopes, that choice will be up to the patient.

With one big exception.

If a therapist or doctor learns of a person's intent to harm or kill, among other acts, they are compelled to break confidentiality and intervene. But Ellie, Lucas maintains, can't be mandated to report these things because she isn't human. Lucas's ideal solution is that, if a veteran comes to Ellie expressing thoughts of self-harm, the program would send out a red flag of sorts to a human clinician who would then be compelled to act.

It has yet to be determined whether that approach is legally, ethically, or practically feasible.

Even if it is feasible, there are still many other problems to tackle when it comes to PTSD in veterans, Hayes says.

"As a clinician, I'd want to know that this technology could effectively detect cases of PTSD, rather than just increasing disclosure of less severe, potentially non-diagnostic, responses to trauma. The bottleneck is not necessarily in the shortage of resources for diagnosis, but a shortage in the resources to deliver effective evidence-based care following diagnosis," Hayes wrote. And while AI technologies that do exactly that are being developed and tested, he thinks it's a long ways away before they can take over that work.

And help is needed.

"Veterans account for 20% of suicides in the US," Hayes said. "Better support systems, beyond the brief provision of therapy may help reduce this shocking statistic."

3.2 - KTVU (FOX-2): [Services available for veterans at Napa Valley College evacuation center](#) (12 October, 2.1M online visitors/mo; Oakland, CA)

NAPA, Calif. (BCN) - The Vet Center, a subsidiary of the U.S. Department of Veterans Affairs, deployed personnel today to the wildfire evacuation center at Napa Valley College from Concord and Fairfield to provide mental health services and paperwork assistance for any displaced veterans.

They were at the shelter today with a trailer set up for three separate counseling sessions to be conducted simultaneously.

"Say you're having a panic attack," readjustment counselor Lori Shepherd said. "You come in here and have a counseling session."

Shepherd said the smoke, smells and sight of burnt buildings can be stressful for veterans who served in Iraq, Afghanistan or other war zones.

"It can definitely be triggering," said Joseph Moglia, a veteran of the U.S. Marine Corps who served in Iraq.

Shepherd and Moglia are available at Napa Valley College for any veterans who have been displaced by the North Bay wildfires and are in need of assistance. They can be reached at (925) 433-3407.

They've also set up an area with seating and a television for veterans at the shelter who just want to spend time with other veterans.

3.3 - The Gazette: [Mayor, nonprofits plead for Colorado Springs landlords to help homeless vets](#) (12 October, Jakob Rodgers, 870k online visitors/mo; Colorado Springs, CO)

Colorado Springs landlords reportedly are spurning federal housing vouchers in favor of renting to higher-paying tenants, thwarting efforts to help homeless veterans get off the streets, city officials and nonprofits say.

Mayor John Suthers, the National League of Cities and local advocates for the homeless called on landlords Thursday to accept the vouchers from veterans needing a place to live rather than taking advantage of the hot rental market.

Suthers stressed that local landlords hold the key to effectively ending veteran homelessness - a goal that has eluded the city for years.

"They're private businesses, they're there to make money and they don't have to engage in this," Suthers said. "But we're just trying to impress upon them that it's part of being a citizen of the community."

As an example, Suthers mentioned one homeless veteran who got a job while using his voucher - allowing him to pay more for rent.

"We're hoping they'll (landlords) see the long view that helping house people is in their interest as well as the community's," Suthers said.

Their message highlighted the latest in a series of meetings at the Apartment Association of Southern Colorado's offices, which seek to woo hesitant property owners.

As Colorado Springs' affordable housing crunch has worsened, rents have climbed to record territory, fed by Colorado's bustling economy and an influx of newcomers seeking cheaper housing outside the Denver Metro area.

In spring and early summer, the city's average monthly rate - not including utilities - was \$986 for a one-bedroom apartment and \$1,523 for a three-bedroom unit.

But the VA's vouchers are capped. For someone here without an income, they are from \$751 a month for a one-bedroom apartment and \$1,355 a month for a three-bedroom unit. Importantly, while those rates can rise with a person's income, they must include the cost of utilities.

That's kept landlords and property owners away, acknowledged Laura Nelson, the apartment association's executive director.

The plight of veterans seeking housing is "truly sad," said Carmen Azzopardi, vice president of multifamily property services for Griffis/Blessing.

Her company was among a few touted by the association as being more open to accepting vouchers.

But Azzopardi said many landlords feel hamstrung by the program's red tape. Many also fear violating the Fair Housing Act by prioritizing veterans above others, and accepting them at reduced rates.

"How can we help, when it's almost like our hands are tied on being able to help?" Azzopardi said.

Elisha Harig-Blaine, principal housing associate of the National League of Cities, disputed that notion.

"I can definitely tell you - it does not violate fair housing," Harig-Blaine said.

Homeless advocates also stressed a willingness to work with landlords and address any issues that arise, including landlords' concerns about renting to vets with felony convictions or past evictions.

The vouchers include a caseworker for each veteran who can help them find jobs, access health care and, if need be, find addiction treatment.

"We want to help you have success," said Erika Huelskamp, who coordinates the VA's local voucher program. "We are just a phone call away. We're here for you, just as much as that veteran."

Fifteen individuals and 13 families are searching for landlords willing to accept their Department of Veterans Affairs vouchers, said Huelskamp.

That's only a fraction of the homeless veterans in need of apartments here, and an even smaller portion of the city's overall homeless community.

People who haven't served in the military also face similar problems using different vouchers, nonprofit leaders say.

The pleas come as Colorado Springs tries to join the growing list of cities that have effectively ended homelessness among veterans.

The goal is to ensure no veterans are forced to live on the streets, and that their homelessness is brief, rare and nonrecurring.

A coalition led by Rocky Mountain Human Services almost succeeded in eliminating veteran homelessness in 2015 by creating an intensely-data driven program unlike anything ever seen in the Pikes Peak region.

Volunteers found people living on the streets. The nonprofit's employees helped them apply for VA benefits and seek housing.

But two main barriers - the city's severe lack of shelter space and affordable housing - kept the coalition from meeting its goal.

One impediment has since been eased.

The opening of Springs Rescue Mission's new shelter in November 2016 helped more people find beds indoors. The facility has routinely accommodated between 260 and 300 people a night.

But the other - a dearth of affordable housing - has only worsened.

[Back to Top](#)

3.4 - Daily Press: [Virginia lawmakers cite payment delays in veterans health program](#) (12 October, Hugh Lessig, 863k online visitors/mo; Newport News, VA)

The Department of Veterans Affairs owes Virginia health care providers millions of dollars for services provided to veterans who sought treatment outside the VA system, says the state's congressional delegation, who want the VA to pay its bills.

At issue is Veterans Choice, a popular but controversial program that allows former service members to seek care in the community if they have to wait too long for an appointment or live too far from a Veterans' Affairs facility.

The 13-member Virginia delegation sent a letter to VA Secretary David Shulkin on Oct. 3 that states "the level of late payments is unacceptable" and adds, "We urge you to fix this problem and immediately develop a long-term solution aimed at ensuring that payments are made within 30 days of receiving an invoice."

Riverside Health Systems reported that 227 of 504 claims under Veterans Choice, totaling more than \$2 million, have languished more than 120 days without payment, the letter states.

Mark Duncan, Riverside's director of government relations, said, "VA related claims have taken an average of 177 days to be paid, or 3.5 times longer than the average of all third-party payers."

In one case, Riverside was reimbursed 961 days — more than 2 ½ years — after a veteran's discharge. Duncan said.

Carilion Clinic, with facilities in Roanoke, Danville, Martinsville and elsewhere, has seen its money owed go from \$28 million to \$58 million over the past year, the letter states. Late payments also hit Wellmont Health System and Lewis-Gale Hospital in southwestern Virginia.

A single dental facility in Northern Virginia is owed \$203,000.

"The situation has gotten so dire that a veteran who had used this facility to get VA-approved dentures ultimately had them withheld due to the Veteran Affairs medical center non-payment," the letter states.

Rep. Rob Wittman, R-Westmoreland, who released a copy of the letter with a news release, said the problem has been brewing across Virginia for months. Lawmakers and hospitals tried to resolve it without writing directly to Shulkin, but that now appears to be the only recourse, he said.

“The whole system needs to be looked at,” Wittman said. “Payments and access and appointments, they’re all related. It’s about people not going through another layer of bureaucracy. This needs to be flattened and simplified so people can quickly get an appointment and providers and quickly be paid.”

The letter points out that health care providers in Virginia “are now evaluating whether they can continue to provide services to veterans under the Choice program.”

Peter Glagola, a spokesman for Riverside, said the system wants to serve veterans, calling it “an honored duty.” But it also wants to be reimbursed in a timely manner. Since 2015 about 3,000 veterans have received care through Riverside via Veterans Choice.

“We want to come up with a solution,” he said. “That’s the key.”

A related problem concerns duplicate payments to third-party providers, the subject of a September report from the VA Inspector General. The IG’s office said it has identified tens of millions of dollars in overpayments across the program. The office is currently auditing Veterans Choice. The congressional letter said these problems could have been avoided through better training and communication.

VA hospitals have struggled to deal with the workload caused by Veterans Choice. In March, officials at Hampton VA Medical Center said they had more than doubled the staff to coordinate non-VA care. Veterans Choice also made the work more complex, they said, because it required coordination with a third party to refer patients outside the VA system, and that required a lot of back-and-forth communication.

VA officials in Washington had no comment Thursday on the congressional delegation letter.

In August 2017, President Donald Trump signed the VA Choice and Quality Employment Act of 2017 which authorized \$2.1 billion in additional funds for Veterans Choice. VA officials said it reflected the agency’s long-term commitment to the program, but the \$2.1 billion was seen as a short-term solution.

3.5 - KLTV (ABC-7, Video): [Veteran says medications from VA repeatedly lost in the mail](#) (12 October, Sophia Constantine, 837k online visitors/mo; Tyler, TX)

An East Texas woman who is a military veteran of over fifteen years is struggling after her medications have been misplaced in the mail twice over the past six months.

Jill Morehouse receives mail order prescriptions from the VA once a month. Each time, a 240-count bottle of Vicodin. Over the past six months, she says two of those prescriptions never arrived.

The first time, she thought it was an honest mistake, lost somewhere at the post office. “But when the same thing happened twice, to the same medication...” she started to believe the medication was being stolen.

Morehouse says she filed a police report both times and contacted her postmaster at the United States Postal services, but says she was told there was nothing they could do.

We reached out to the USPS and Twana Barber, the Regional Communications Specialist provided us with a statement saying in part, “The Postal Service strives to provide exceptional service to our customers with every delivery, and the vast majority of mail reaches its destination on time, safely and securely. In extremely rare occasions, a package may fail to reach its destination or get damaged in processing. We certainly apologize to this customer for any inconvenience they may have experienced and we are committed to working with them until the matter is resolved to their satisfaction.

Following our story, the USPS has reached out to Morehouse to formally apologize.

According to Morehouse, the VA replaced her medication both times. She also tells us her packages have tracking numbers and require a signature upon arrival.

3.6 - The Daily Reporter: [VA Clinic to stay in Spirit Lake](#) (12 October, Seth Boyes, 45k online visitors/mo; Spencer, IA)

SPIRIT LAKE — Anticipation had been building as to where the Sioux Falls Veterans Affairs Medical Center would place its new clinic. Several locations in the region were considered, but Director Darwin Goodspeed with the Sioux Falls VA Health Care System announced Thursday a new clinic will be built in Spirit Lake, near the intersection of Highway 9 and Royal Avenue, just west of the Great Lakes Mall. The announcement was part of the public meeting circuit Goodspeed conducts each quarter.

Ann Miller, Dickinson County Veterans Affairs director, said the new clinic will be under the umbrella of the Sioux Falls Medical Center, as the current clinic is, making Goodspeed the clinic's director. She said Goodspeed is director of several clinics in both Iowa and South Dakota.

Miller said both she and the clinic staff were unaware Spirit Lake had been chosen for the clinic until Goodspeed's announcement.

“I think it's very exciting,” Miller said. “The whole staff at the clinic, you could tell they're very excited about the new facility.”

The current clinic has effectively reached its capacity, according to Miller.

[Back to Top](#)

3.7 - BeyondChron: [New VA Privatization Threat To Vets](#) (12 October, Suzanne Gordon, 39k online visitors/mo; San Francisco, CA)

On Thursday October 5th, the American Federation of Government Employees (AFGE) the union that represents federal employees, held a briefing on the threat to privatize the Veterans Health Administration (VHA), on Capitol Hill in Washington, D.C. Veterans, VHA caregivers, and policy analysts warned Congressional staff and the media on the cost to veterans if more and more VHA care was outsourced to the private sector.

Representatives Julia Brownley (D, CA-26), Mark Takano (D. CA-41) and Anthony Brown (D MD-04) spoke before the panel began, and pledged their support for the VHA and opposition to privatization. Senator Bernie Sanders was supposed to appear but was forced to cancel because of a conflict.

Joe Flynn, AFGE's Treasurer, introduced the panel and Jackie Maffucci, Research Director Iraq and Afghanistan Veterans of America, was its moderator. The first speaker was clinical psychologist Thomas Kirchberg, representing the Association of VA Psychologist Leaders (AVAPL). Kirchberg warned of current efforts to outsource the Compensation and Pension (Comp & Pen) exams that the VHA conducts when veterans make claims for eligibility for VA services, compensation for service connected problems, and pensions.

VA psychologists and medical staff— experts who understand the complex conditions and problems from which veterans suffer — have traditionally conducted these exams. Now, in the name of easing the backlog of claims at the chronically underfunded and understaffed VHA, they are being farmed out to for-profit firms who have little expertise in veterans' health problems and may not conduct comprehensive examinations of veterans.

In an impassioned plea, Kirchberg explained that, "When I sit with a Veteran who has never had the opportunity to tell his or her story he or she may break down and begin weeping, lost in the past, embarrassed, and wanting to get up and leave."

His own voice breaking as he spoke, he said, "I'm able to sit with them and help them so they can regain composure and then in an unhurried way either walk them to a clinic for a warm handoff to a mental health provider or talk with them knowledgeably about a referral. These comp and pen exams are often the first face of the VA for Veterans. The compensation and pension exam should not be a bureaucratic checklist. It's a critical encounter requiring deep knowledge and compassion."

Adrian Atizado, Deputy National Legislative Director for the Disabled American Veterans (DAV), also spoke to the group and raised their concerns about and opposition to privatization. Kathleen Pachomski, President of AFGE Local 3930, and a Registered Nurse at the Memphis VA Medical Center, spoke eloquently about her commitment to deliver high quality care to veterans. Pachomski is also a veteran herself and receives care at the VHA. "I would not get care anywhere else," she stated.

Eric Young, AFGE Council of Prison Locals President, spoke not only as a federal employee opposed to privatization and the denial of due process rights to federal employees but as a Navy veteran.

"I joined the Army and served abroad during Operation Desert Storm.... Frankly, I wouldn't be sitting here today talking to all of you if it wasn't for the VA. Had it not been for the care I received after I got home I would be dead today and that's a fact!" he said.

“If you would have looked at me during that time, you’d have never known how sick I was,” he continued. “To the outside world I looked like a young, healthy soldier returning home, but inside my body was tearing itself up. My blood pressure was sky high, almost at stroke level, and my kidneys were failing.

“Even though I couldn’t understand why this was happening to me, my VA primary care team made sure I was taking the steps I needed to recover. My nurse practitioner literally mothered me through my recovery. She made sure that I went to my appointments and took my medicine. And when I didn’t she chewed me out. The relationship that I developed with my VA healthcare team was more than transactional. It was personal. They didn’t just provide care – they actually cared.”

Finally I spoke about the salami strategy of privatization that I have described in a document entitled Ten Ways to Privatize and Kill the VHA. I concluded my remarks by holding up a bumper sticker produced by the San Francisco based group Fighting for Veterans Health Care (FFVHC).

The bumper sticker asks the public to join to “Save Our VA” “I am not a veteran, “ I told the group. “But I consider the VHA my VA as well as veterans’. I pay for it as a taxpayer. I benefit from its research, teaching and models of clinical care. It is my VA, Our VA, even if we are not veterans. Congress,” Please, Save Our VA.”

The panelists supported Bernie Sanders “Strengthening Veterans Health Care Act of 2017 would allocate \$5 billion to the VA to hire more doctors, nurses and other medical professionals to fill these vacancies and ensure that veterans continue to get the best care in a timely manner.”

They also supported a bill put forward by Representative Anthony Brown. — The VA Staffing and Vacancies Transparency Act of 2017 would require the Secretary of the U.S. Department of Veterans Affairs (VA) to post the number of job vacancies at the VA and report to Congress on what steps the Department is taking to reach full staffing capacity.

[Back to Top](#)

3.8 - The Laughlin Nevada Times: [VA clinic expands services](#) (12 October, Jennifer Denevan, 300 online visitors/mo; Bullhead City, AZ)

The MCPO Jesse Dean VA Clinic is getting some help in providing services to local veterans. The clinic will be expanding services via telemedicine to help ensure veterans are getting the care they need. Some services were recently expanded and more times offered and more services are coming at the end of the year. The big difference comes in expanding the number of slots available for care to be given.

Dr. Monica Rawlinson-Maynor said the clinic will be offering more services for primary care through the telehealth program beginning Oct. 23. The clinic will have three providers that will provide for primary care via telehealth, she continued.

The clinic currently offers services such as teleaudiology, telemental health and telepain, she said. There will be more services coming in soon and an expansion of how often services are offered will soon be available.

She said the clinic currently offers laboratory services, immunizations and do simple procedures such a toenail care and ear care. If patients need help with their glucometer they can get that at the clinic, she added.

Rawlinson-Maynor said staff is aware of the difficulty for veterans to get care due to distance when it comes to having to drive to Las Vegas. This will account for increased access to care to veterans for specialty care, she continued.

Dr. Lowryanne Vick, a nurse practitioner who focuses on telehealth, said starting Oct. 23 there will be more slots available per day and more days per week. The telecardiology should be available starting in December and the telemental health will also be available by December if not sooner, she added.

Some of the services already available at the clinic include teleretinal and it provides eye exams for patients with diabetes. There is teledermatology and that allows for a patient to get care in relation to any skin issues and there is psychiatry and psychology through telehealth, Vick said.

The clinic has a telepain clinic which is run by a pain specialist, Vick said. There is telekinesiology, or TK, and that helps veterans who are in need of assistive devices such as a cane or walker. An evaluation can be done at the local clinic and the device is ordered and sent to the Laughlin clinic. That recently started, she added.

Teleaudiology, as mentioned by Rawlinson-Maynor, can't do screenings as of yet, but patients who've already been screened can still get help such as receiving hearing aids, Vick said. Adjustments can also be performed.

Vick said there is the teleVCamp and that helps patients with cognitive and memory impairment. Those are in place and in the near future, there will be telecardiology and will enhance the mental health services, she continued.

There is a program call VA Video Connect and that program allows patients can access healthcare services from home or out in the community and they use either a smart phone, tablet or desktop computer and the Internet to do a video conference with a provider, Vick said. That can be a challenge with patients who don't have those devices but they can come to the clinic for that care, she added.

Telemedicine is definitely different, but there are strategies the provider can use to help make the visit more personal, Vick said. Little strategies such as how they position themselves in front of the camera and there is a nurse with the patient to help with the personal touch as needed, she continued.

Rawlinson-Maynor said it helps patients to be paired up with a consistent provider, which they will be at the Jesse Dean Clinic. The more patients interact with their provider via telehealth, the more comfortable they will become, she continued.

The schedule is teleretinal is available at 9 a.m., 10 a.m. and 1 p.m. Thursdays and at 1 p.m. Fridays. Teledermatology is available on Mondays at 8 and 8:30 a.m. and Thursdays at 3:30 p.m.

Telepsychiatry is available Tuesdays and Thursdays from 8 a.m. to 2 p.m. Telepain is offered on Wednesdays from 8 a.m. to noon.

Telekinesiotherapy is on Tuesdays from 8 a.m. to noon. The V Camp is on Tuesdays at 9 a.m. and Fridays at 1:30 p.m.

Telepsychology is offered on Tuesdays at 2 and 3 p.m. and on Thursdays from 8 a.m. to noon. Teleaudiology is offered on Mondays from 1 to 4 p.m.

Teleprimary care will be all day Monday, Tuesday and Friday starting Oct. 23. There isn't a set start date for telecardiology but it's anticipated it will be offered on Fridays for half a day.

Vick said the big thing is to expand and offer more times to help provide care because the population is steadily growing in the area.

3.9 - Northeastern Public Radio: [Young Meets With VA Officials To Discuss Veteran Wait Times](#) (12 October, Jill Sheridan, 900 online visitors/day; Fort Wayne, IN)

U.S. Sen. Todd Young (R-Ind.) met with federal Veterans Administration officials to discuss the long waits many veterans face to have claims processed, and says he wants to work directly with the office to make significant changes.

Young says the amount of time veterans have to wait for a claim to be processed is around two years and appeals take even longer.

"One veteran that we discussed today has been on appeal for almost 10 years," he says.

After sitting down with regional VA leaders Thursday, he says that case has finally been resolved but that it shouldn't take a lawmaker's intervention to help get a claim processed. Young says a new federal law may help.

"There is new legislation in place to help these government employees better serve our veterans, that legislation will finally be implemented early next year," Young says.

Young says the problems stem from personnel issues and outdated management processes.

[Back to Top](#)

4. Women Veterans

4.1 - ABC News: [Women vets pose for pin-up calendar to raise money for fellow vets' health care](#) (12 October, Joi-Marie McKenzie, 24.1M online visitors/mo; New York, NY)

Nearly two dozen female veterans traded in their uniforms for sky-high heels in an effort to cheer up their fellow veterans -- and more importantly, raise money to provide financial assistance for veterans' health care needs.

Twenty-one veterans, serving a total of 145 years in all branches of the military, posed for Pin-Up for Vets 2018 calendar. The 1940s-style calendar features a weapons' instructor, a surgery technician, an intelligence officer and a military vehicle operator, among others.

The calendar, which serves as a fundraiser to help veterans' hospitals and health care programs, was started in 2006 by Gina Elise. Her grandfather served in World War II.

"At the time, there were many stories in the news about our troops coming back from Iraq, needing medical care that I felt so strongly that I wanted to do something to support our troops and veterans," she told ABC News.

Elise, 35, was inspired to create a pin-up style calendar because "pin-ups were really a symbol of hope to support troops and veterans."

Jennifer Marshall, who served in the Navy for five years, is part of the 2018 calendar.

"It was wonderful," Marshall said of the photo shoot, held on Hofer Ranch in Ontario, California, over three days last summer.

The veteran said the shoot was made even more special because she could bond with fellow service women.

She continued, "And speaking for the other ladies, everyone has expressed how much it means to them to recapture our femininity, give back to the community and have that long-lasting friendship with other veterans."

Since 2006, the calendars have raised nearly \$60,000 for veteran hospitals to purchase new equipment as well as provide financial assistance for veterans. It's also help fund the non-profit organizations' "50-State VA Hospital Tour," where they hand-deliver many of the calendars to vets.

"Some of these veteran patients are in the hospital for weeks and months and they won't have any visitors," Elise said of why she began visiting hospitals. "It's essential to let our nation's heroes know how much we value them."

"I feel it is my duty ... my responsibility to extend a helping hand to my fellow veteran. "Undoubtedly, there are a lot of people living in this world who are in need of care, time, and attention," United States Marine Corps veteran Tess Rutherford, who is featured in the 2018 calendar, said in a statement. "But for me, I feel it is my duty ... my responsibility to extend a helping hand to my fellow veteran."

Marshall, who is now an actress living in Los Angeles, agreed. She was initially hesitant to be part of the calendar, but after being involved in Pin-Up for Vets since 2015, she is now one of the organization's most active volunteers, visiting a veterans hospital every six weeks.

"Because they mean so much," she explained. "The visits that break my heart are when veterans tell us that we are their first visitor. That is so upsetting to me. It kind of reminds us why these non-profits that go into hospitals ... are so important."

5. Appeals Modernization

6. Strategic Partnerships

6.1 - Lake County News-Sun: [Durbin: Lovell Center ideal 'test case' for sharing health records between VA, active-duty personnel](#) (12 October, Yadira Sanchez Olson, 41k online visitors/mo; Chicago, IL)

U.S. Sen. Dick Durbin met with physicians of the Captain James A. Lovell Federal Health Care Center Thursday to hear what challenges they face while caring for the nearly 67,000 veterans and active-duty military men and women, along with the families of active-duty personnel.

Although his visit to the North Chicago facility was brief, physicians quickly conveyed to Durbin the need for the facility to streamline its technology systems, in order to more efficiently share information between the Department of Defense and the Department of Veterans Affairs.

Durbin, D-Ill., spoke with administrators and a handful of doctors from a variety of departments that included geriatrics, pediatrics, radiology, family medicine, mental health and primary care. They all agreed that communication between the two departments' technology systems takes up time and presents hiccups in things like billing.

In June, U.S. Secretary of Veterans Affairs David J. Shulkin announced that to improve patient safety and care, the VA would be adopting the same Electronic Health Records (EHR) system as the Department of Defense.

On Thursday, Lovell staff asked Durbin to help make the facility the first to make the changeover, hopefully resulting in all patient data residing in one common system to enable seamless care between the departments, officials said.

Physicians told Durbin Lovell would be the perfect test tube to try the new integration, because it is a first-of-its-kind health care center that combines the two departments and integrates medical care.

During Durbin's visit, administration and staff praised the unique facility for its quality care, which they said attracts patients from across the nation with its reputation. But they were forthcoming with its hurdles, too, which they described as mainly centering on technology.

Durbin told them he sympathizes. "The federal government is way too slow at evolving on every level of technology," he said.

At the roundtable discussion Thursday, Lt. Cmdr. Eric Shafer, a Navy cardiologist, expressed his frustration with the current systems, saying his daily work often has him navigating through six different electronic health record systems to get his patient information.

After listening to the doctors, Durbin asked how he could help.

"Let us be your Petri dish," said Navy surgeon Capt. Paul Roach. "It has to be the same system to get standardization across the board from recruit to veteran."

Durbin also toured some parts of the facility Thursday, and before he left he assured the staff that their frustration with the technology was of high priority.

"I'm going to push to make Lovell the test case, because it really does bring under one roof the two different agencies," Durbin said, adding that it will not happen overnight and will be a unique challenge to get right.

Lovell spokesperson Julie Ewart said when the health care center was established, each department had invested in distinct and separate health-record systems. Further, Lovell was originally created as a five-year demonstration project, which did not support adoption of one department's electronic system over the other.

"Instead, several measures were implemented that allow the two EHR systems to 'talk' to each other, enabling Lovell to be a functional medical center without fully resolving the issues associated with operating two EHR systems," Ewart said. "We look forward to the possibility of a new single EHR that will be seamlessly integrated across the VA and the (Department of Defense)."

Other issues brought up at the discussion was more training on policy and procedure for those coming in from different areas in either the VA or DoD.

7. Supply Chain Modernization

7.1 - Stars and Stripes: [BRAC for VA: Lawmakers search for ways to reduce the number of VA facilities](#) (12 October, Nikki Wentling, 1.5M online visitors/mo; Washington, DC)

WASHINGTON — The House Committee on Veterans' Affairs on Thursday initiated what could be a long and politically arduous process to get rid of aging and underused Department of Veterans Affairs facilities nationwide.

Committee Chairman Rep. Phil Roe, R-Tenn., and Rep. Tim Walz, D-Minn., the ranking Democrat, presented a draft bill that would create an 11-member, paid commission to recommend which facilities to close and where the VA should invest. While major veterans service organizations applauded efforts to "right-size" the VA, they opposed the commission-style process, comparing it to the Defense Department's unpopular Base Realignment and Closure program.

There are also concerns that divesting facilities could create gaps in access to VA medical care, causing the department to send more veterans into the private sector.

Roe conceded the proposal, called the Asset Infrastructure Review Act – or AIR – would take “a significant amount of political courage.” The bill is still in its early stages, he said, and would likely change.

“It is an understatement to say the deck is stacked against the AIR Act,” Roe said. “This bill is bold, transformative and controversial. That said, veterans, VSOs and VA employees, and taxpayers alike, deserve more from each of us and to recognize how serious the problem before us is. If there’s any committee in Washington, D.C., that has the political courage to do what is necessary, it’s this one.”

VA Secretary David Shulkin said during a “State of the VA” address in May that dealing with bad infrastructure is one of his top priorities. About 57 percent of the thousands of VA facilities nationwide are more than 50 years old.

The VA is in the process of disposing of or finding another use for 430 vacant or nearly vacant buildings. The department is also reviewing another 784 buildings that are still in use. Regan Crump, a VA assistant deputy undersecretary for health, said Thursday that process would take about 18 months.

Crump said the VA wasn’t certain there was a need for a commission like what’s proposed in the AIR Act but that the agency would need “legislative flexibility” to support its infrastructure review.

The idea to divest VA facilities isn’t new. It’s been proposed by veterans service organization, the Government Accountability Office and the Commission on Care, which was established under former President Barack Obama to broadly examine the future of VA health care.

“We would recognize this as a necessary evil,” said Carl Blake, associate executive editor of Paralyzed Veterans of America. “I don’t know anyone who was involved in BRAC who didn’t think BRAC was in some form evil, and yet it’s probably a necessary process. We don’t oppose what you’re trying to do, but we don’t believe a commission is the right way forward.”

Nearly everyone involved in the hearing stated the importance of involving local veterans when a VA facility is recommended for closure. The draft bill calls for public field hearings.

The bill also requires Shulkin to publish in the Federal Register by Jan. 15 the criteria to be used in choosing which facilities to close, modernize or realign. Veterans advocates warned against the speedy deadline.

Louis Celli, a director with the American Legion, called Thursday’s discussion a first step to “get the conversation started.” Like other organizations, the Legion is against the idea of a commission, which Celli said could be susceptible to corruption.

Walz said Democrats and Republicans on the committee would be working together on the proposal.

“We are working side by side in this, but it’s a journey – and it’s a tough one,” he said. “There’s probably not any more difficult thing in the realm of veterans and veterans’ issues than this topic. We have to get this right.”

[Back to Top](#)

7.2 - Government Executive: [Lawmakers Debate Bringing BRAC to VA Health Care Facilities](#) (12 October, Eric Katz, 852k online visitors/mo; Washington, DC)

House lawmakers are pushing for the Veterans Affairs Department to go through a process to close down or realign underutilized medical facilities, similar to the Base Realignment and Closure process at the Defense Department.

The measure would require the VA secretary to assess the department’s current capacity to provide health care in each of its networks and ultimately recommend facilities to close, modernize or realign. The secretary would by November 2018 pass those suggestions along to a presidentially-appointed, Senate-confirmed commission. That panel would submit its recommendations on to the president the following year, who would then have two weeks to approve of the plan in full, in part or reject it altogether. Congress would then have 45 days to vote down the plan or it would automatically go into effect.

The VA secretary would first have to post guidance on the Federal Register for the metrics by which he would determine whether facilities were underutilized. The secretary must consider whether a site is meeting VA standards, the cost savings from a closure, when those savings would occur, if it would harm VA’s ability to carry out its mission, and input from local stakeholders. The Asset and Infrastructure Review Commission would have 11 members, with each party in Congress suggesting four and the president choosing the rest. The members would have to reach certain qualifications, such as one with experience managing a large, private sector health care system and another with experience in capital asset management in the federal government.

» Get the best federal news and ideas delivered right to your inbox. [Sign up here.](#)

If the president and Congress allowed the commission’s recommendations to move forward, then VA would have three years to implement or begin planning for the closures and modernizations. The bill would require the department to provide “outplacement assistance” to all employees at facilities slated for closure.

At a House Veterans’ Affairs Committee hearing Thursday, lawmakers acknowledged the political difficulty in moving the Asset and Infrastructure Review (AIR) Act forward.

“The deck is stacked against the AIR Act,” said Rep. Phil Roe, R-Tenn., who chairs the committee and authored the draft legislation. “This bill is bold, transformative and controversial. Moving forward will require a significant amount of political courage and let’s face it, members are not known specifically for that.”

Democrats on the panel acknowledged Congress must do something to address VA’s excess and misaligned medical facilities, but expressed some reservations about applying a BRAC process to VA. Rep. Tim Walz, D-Minn, the committee’s ranking Democrat, called it a “top

priority” to give VA more authority to assess and ultimately realign department resources. He was concerned about the emphasis on cost savings, an overly ambitious timeline and the power entrusted to the president. Many of the 1,400 buildings VA has already identified for closure are vacant—fewer than 20 currently provide medical services to veterans, Walz said—meaning the low-hanging fruit will not deliver much in the way of savings.

Veterans service organizations at the hearings voiced similar apprehensions while supporting the larger goal. Any savings, they said, should be reinvested back into the VA system.

“We do not believe the BRAC-like model is the most appropriate way to address capital asset needs,” said Joy Ilem, national legislative director for Disabled American Veterans. She said DAV supports making VA “more nimble,” but added Congress should not move forward with an asset closure plan before first determining the future of the Veterans Choice Program and the role of private care in the department’s health care delivery. She added VA should not close any facility before it opens an alternative building or it establishes a private facility partnership.

Roe said the committee will take up legislation addressing the future of the choice program, which gives veterans struggling to receive care or living more than 40 miles from the closest VA facility, access to private care on the VA’s dime, in three weeks. The pairing of the AIR Act to the new choice bill will enable the committee to identify savings while injecting new VA spending on health care.

Regan Crump, VA’s assistant deputy under secretary for health for policy and planning, said VA is currently assessing its current and future needs for veterans. Achieving its goals, he said, may require “significant capital investments” to accompany the closures of underused facilities.

While some disagreements persist, Walz pledged to work with his Republican counterparts to advance some form of the legislation.

“We are working side by side in this, but it’s a journey,” Walz said, later emphasizing the pressing-nature of the issue. “Time is not on our side. This is one of those things that must be dealt with, it cannot be kicked the can down the road. But among that, it must be done right. We’re not going to get another bite at this thing.”

8. Other

8.1 - Stars and Stripes: [Lawmakers consider pushing VA to sell Pershing Hall, its 5-star Paris hotel](#) (12 October, Nikki Wentling, 1.5M online visitors/mo; Washington, DC)

WASHINGTON — There’s an effort underway in Congress to have the Department of Veterans Affairs sell an 18th century building it owns in Paris that’s leased as a five-star boutique hotel and spa.

Members of the House Committee on Veterans’ Affairs voiced support Thursday for a bill authorizing the sale of Pershing Hall, which was established as a World War I memorial by the American Legion in 1928 and transferred to the VA in 1991. The Legion is asking the property remain under ownership of the federal government for posterity.

“While Pershing Hall is probably a terrific hotel, it makes no sense that the VA keeps a luxury hotel in Paris on its books,” said Rep. Mike Coffman, R-Colo. “The VA needs to focus its time and resources on its core mission: taking care of our nation’s veterans.”

Coffman introduced the legislation, HR 2773, authorizing VA Secretary David Shulkin to sell the property on the condition that whoever buys it agrees to preserve its architecture. The money from the sale and any historical memorabilia inside would be given to the American Battle Monuments Commission, which is responsible for maintaining American military cemeteries, monuments and memorials.

Louis Celli, a director of the American Legion who testified Thursday, said the property has “deeply personal meaning” to the organization.

Above the building’s entrance is the Legion’s wreath and star emblem, in stone and iron. At one time, it was full of fine art, furnishings, plaques and other memorabilia with some tie to WWI. After the VA took over the building, the items were placed in multiple storage areas in the United States and France.

The American Legion got its start in Paris in 1919, created by members of the American Expeditionary Force in WWI. The Legion purchased the property, which had been a townhouse, to recognize the American Expeditionary Forces and Gen. John Pershing and maintain the Legion’s presence in Paris.

Since management was transferred to the VA, the Legion has been disappointed with what’s happened with the building, Celli said.

The group thought it would remain a memorial and space for U.S. veterans in Paris to go for VA aid. Instead, the VA signed a 99-year lease in 1998 with a private French firm that operates the hotel and spa.

Coffman criticized the lease, calling it a bad deal that significantly decreases the property’s market value. Without the lease, the appraised value is about \$82 million, according to the Legion. If the building is sold and the new owner is required to honor the lease, its value could drop to about \$8 million.

The Legion asked that the property be kept under federal control until the lease is complete in 2097.

“We are displeased as to how VA decided to use the building but also understand that America, its people, and the need for memorials and VA assistance will be around in 99 years once the lease is terminated,” Celli said. “Selling this in a fire sale is the wrong thing to do.”

But Republicans and Democrats on the House committee said the VA “should not be in the business of managing hotels.”

Rep. Phil Roe, R-Tenn., chairman of the House committee, said he was uncertain what to do and needed to think about the issue.

“I think we need to be sensitive and aware of that history,” he said.

Coffman previously attempted to have the VA sell Pershing Hall in 2015 to help pay for cost overruns at the under-construction VA hospital in Aurora, Colo., but the legislation stalled.

1.5 - The Washington Post: [Virginia lawmakers say late VA payments jeopardize veterans' care](#) (12 October, Jenna Portnoy, 43.9M online visitors/mo; Washington, DC)

Members of Congress from Virginia say chronic late payments from the Department of Veterans Affairs to doctors are jeopardizing care for the state's aging veteran population. The state's two senators and 11 House members urged VA administrators to fix a system that can leave health-care providers waiting more than four months for payments they should have received within 30 days. The delays can damage credit, they said.

2.3 - Atlanta Journal-Constitution: [Roswell getting \\$21K for veterans adaptive sports](#) (12 October, David Ibata, 11.9M online visitors/mo; Atlanta, GA)

Roswell has agreed to accept \$21,080 from the federal government to purchase equipment and hire instructors for new VA Wheelchair Softball and Adaptive Cycling programs for disabled veterans. The City Council approved a resolution accepting the FY 201 Adaptive Sports Grant from the U.S. Department of Veterans Affairs. The grant does not require local matching funds, according to a staff report to the council.

[Hyperlink to Above](#)

2.4 - The Hill: [New whistleblower protections head to Trump's desk](#) (12 October, Cristina Marcos, 11.8M online visitors/mo; Washington, DC)

The House unanimously cleared legislation on Thursday to ensure protections for federal employees who disclose government waste, fraud and abuse. Passed 420-0, the measure would train federal workers so they understand their protections, as well as enhance penalties for supervisors who retaliate against whistleblowers. The bill is named after Chris Kirkpatrick, a psychologist was fired from a Department of Veterans Affairs (VA) medical center after raising concerns about patients' medications.

[Hyperlink to Above](#)

2.5 - Bangor Daily News: [‘Dangerous surgeon’ at Togus allegedly made mistakes in 88 cases, but VA kept it quiet](#) (12 October, 1.2M online visitors/mo; Bangor, ME)

An explosive USA Today investigation into medical mistakes allegedly made under the watch of the U.S. Department of Veterans Affairs highlighted what the newspaper described as one particularly egregious case in Maine. According to the report, podiatrist Thomas Franchini allegedly made mistakes in 88 cases while working at the Togus VA Medical Center near Augusta, the nation’s oldest veterans’ hospital.

[Hyperlink to Above](#)

2.6 - WFED (AM-1500, Audio): [House passes bill to give TSP participants more withdrawal options](#) (12 October, Eric White, 831k online visitors/mo; Washington, DC)

The Veterans Affairs Department stepped back a proposal to suspend a 50-year-old ethics law. The law, first passed in 1966, requires VA to fire any employee who also works for a school whose students receive VA benefits. The department had planned to completely stop enforcing that requirement by next Monday, since some of its employees also work as adjunct professors at for-profit colleges.

[Hyperlink to Above](#)

2.7 - La Crosse Tribune: [House approves whistleblower bill named for former Tomah VA doc](#) (12 October, 822k online visitors/mo; La Crosse, WI)

The U.S. House passed a federal whistle blower protection bill Thursday named for a former VA psychologist who questioned over-medication of patients at the Tomah VA Medical Center. The Dr. Chris Kirkpatrick Whistleblower Protection Act is designed to protect federal employees who come forward with allegations of waste, fraud and abuse and to set minimum disciplinary measures for supervisors found guilty of retaliation.

[Hyperlink to Above](#)

2.8 - WLOS (ABC-13, Video): [Protesters at Asheville VA say being understaffed is dangerous](#) (12 October, 480k online visitors/mo; Asheville, NC)

Veterans Affairs employees held a rally outside Asheville’s Charles George VA Medical Center on Thursday to protest working conditions. Protesters said low staffing levels are creating risks to patient safety and a hazardous work environment. They said Congress has failed to fill open positions, putting veterans’ health care at risk.

1.1 - USA Today (Video): [VA vows changes on bad health care providers, lawmakers take action after USA TODAY investigation](#) (12 October, Donovan Slack, 37M online visitors/mo; McLean, VA)

WASHINGTON — The Department of Veterans Affairs is pledging to overhaul its reporting policies for bad medical workers and a group of lawmakers is introducing legislation following a USA TODAY investigation that found the VA has routinely concealed shoddy care and staff mistakes.

VA Secretary David Shulkin directed agency officials to expand a nearly 30-year-old policy that limited what medical providers the agency would report to a national database created by Congress to prevent problem medical workers from crossing state lines to escape their pasts and keep practicing.

The agency will report all clinicians going forward, VA Press Secretary Curt Cashour said. Shulkin also asked staff to re-write 12-year-old guidelines for reporting them to state licensing boards in an effort to speed up the process.

“Under Secretary Shulkin, VA’s new direction is to hold employees accountable and to be transparent with our findings and actions,” Cashour said.

The legislation from Rep. Cathy McMorris Rogers, R-Wash., Rep. Phil Roe, R-Tenn., and Rep. Bruce Poliquin, R-Maine, would require VA doctors themselves to report directly to state licensing boards within five days of witnessing unacceptable behavior from fellow doctors.

“These newest reports out of the VA are deeply troubling,” McMorris Rodgers said. “This bill will help reform the culture at the VA by holding bad actors accountable and keeping them from continuing these mistakes at the VA or elsewhere.”

The USA TODAY investigation found the VA has frequently failed to ensure its hospitals reported problem health care providers to state licensing boards. Such reports can be delayed by years. The investigation also found the VA policy on reporting to the national database left out thousands of providers. The agency previously reported only physicians and dentists — no nurses, physicians’ assistants, or podiatrists.

The VA determined one podiatrist at its hospital in Maine harmed 88 veterans, including a woman who after two failed ankle surgeries chose to have her leg amputated rather than endure the pain. Still, the agency didn’t report the foot doctor to the database under its previous policy, and took two years to report him to state licensing boards.

In other cases, USA TODAY found VA hospitals signed secret settlement deals with dozens of doctors, nurses and other health care workers that included promises to conceal serious mistakes — from inappropriate relationships and breakdowns in supervision to dangerous medical errors — even after forcing them out of the VA.

Roe, chairman of the House Veterans Affairs Committee, said the committee has “long been concerned about VA’s settlement agreements, and even held a hearing on the topic last year.”

“The findings of the USA TODAY investigation are intolerable,” he said. “Malfeasance within the department will not be ignored, and it certainly cannot be rewarded and hidden from state licensing boards. As a physician, I find this deeply troubling.”

In response to USA TODAY’s findings, Shulkin directed that any future settlement agreements worth more than \$5,000 be approved by top VA officials in Washington. Previously, local and regional officials made decisions on the deals, which can cut short potentially costly employee challenges of VA disciplinary actions.

On Wednesday, the agency also said it planned to post publicly for the first time data on settlements that are approved. The first tranche of data shows that since President Trump took office in January, the VA has struck agreements with at least 160 employees involving payouts totaling \$4.2 million.

Poliquin said Thursday that USA TODAY’s findings were “appalling” and singled out the revelations about the podiatrist at the Togus VA hospital on the outskirts of Augusta, Maine.

“Our Maine veterans depend on their services at Togus and other VA facilities across our State for critical care, and it is absolutely unacceptable for them to ever be subjected to this kind of medical malpractice,” he said.

At least six patients of the podiatrist, Thomas Franchini, are suing the federal government over the care they received. Despite the VA taking years to tell patients about its findings on his surgeries, the government has argued their claims should be dismissed because they were filed after the three-year deadline for medical negligence claims in Maine. Oral arguments in the case are scheduled October 25.

1.2 - U.S. News & World Report (AP): [Congress OKs Expanded Protections for Federal Whistleblowers](#) (12 October, Hope Yen, 24M online visitors/mo; Washington, DC)

WASHINGTON (AP) — Congress voted Thursday to boost the protection of federal whistleblowers from retaliation, part of a bid to uncover bad behavior at the Department of Veterans Affairs and other government agencies.

The House easily cleared the bill, 420-0. It now goes to President Donald Trump for his signature, having previously passed the Senate in May.

The measure would extend whistleblower protections to federal employees who are in probationary periods and provide training to ensure workers know their rights. It also establishes minimum disciplinary standards for supervisors who retaliate against employees for seeking to disclose wrongdoing.

The legislation, introduced by Sen. Ron Johnson, R-Wis., is named after Dr. Chris Kirkpatrick, a psychologist at the VA Medical Center in Tomah, Wisconsin. Kirkpatrick committed suicide in 2009 on the day he was fired by VA for questioning the over-medication of veterans. A VA investigation later found Kirkpatrick’s concerns had been warranted.

House Speaker Paul Ryan, R-Wis., said the legislation provides much-needed protections to whistleblowers. "No one who stands up for our veterans should be marginalized, let alone targeted and fired," he said.

The bill also would require the VA to put together a plan within six months to prevent supervisors from improperly accessing an employee's medical files in retaliation.

VA Secretary David Shulkin has pledged to bring greater accountability to the government's second largest agency, which provides medical care to millions of veterans. In July, Shulkin began posting employee disciplinary actions and announced that he would require approval by a senior official of any settlement with a VA employee over the amount of \$5,000, citing unnecessary payments to bad employees. A month later, he ordered a review to expand VA reporting requirements for bad workers.

During the 2016 campaign, Trump described the VA as the "most corrupt," promising to "protect and promote honest employees" at VA who expose wrongdoing.

1.4 - Reuters: [Virtual interviewer prods veterans to reveal post-traumatic stress](#) (12 October, Ronnie Cohen, 43.6M online visitors/mo; New York, NY)

Talking – to a computer-generated interviewer named Ellie – appears to free soldiers and veterans who served in war zones to disclose symptoms of post-traumatic stress, a new study finds.

Warriors and veterans were up to three times more likely to reveal symptoms of post-traumatic stress to Ellie, the virtual chatbot, than on an official military survey called the post-deployment health assessment (PDHA), even after being assured the assessment would remain anonymous, researchers report in *Frontiers in Robotics and AI*.

“We believe this could be of value to veterans,” said study leader Gale Lucas, a research psychologist at the University of Southern California’s Institute for Creative Technologies in Los Angeles. “Having a conversation, even if it’s with a computer, would help them open up and really realize they might be having some issues.”

Recognizing psychological battle wounds is a necessary first step toward healing them.

As many as one in five recent combat veterans develops post-traumatic stress disorder (PTSD), an overactive fear memory that triggers disturbing thoughts, feelings and dreams, according to the U.S. Department of Veterans Affairs.

Stigma around mental health problems frequently prevents soldiers and veterans from admitting symptoms or seeking help, Lucas said in a phone interview.

“Allowing PTSD to go untreated can potentially have disastrous consequences, including suicide attempts,” she said.

Since 2004, suicide rates among active U.S. Army personnel have been rising, but the military’s current PDHA assessment identifies only one in seven soldiers who are considering suicide, previous research has shown.

In an effort to identify early signs of psychological scars, Lucas would like for Ellie, who was developed with U.S. Department of Defense grant money, to be available in kiosks set up in Veterans Administration hospitals throughout the nation.

Ellie starts the conversation with simple questions, such as, ‘Where are you from originally?’ and ‘What do you like to do to relax?’ to develop rapport with soldiers and veterans, Lucas said. Then she asks if they have nightmares, feel on guard or experience other telltale signs of PTSD.

“She’s very nonjudgmental, supportive,” Lucas said.

“We’re not trying to make virtual-agent therapists. She’s not giving treatment. All she’s doing is having a conversation, having them think and open up about the mental health symptoms they might have,” she said.

Prior research has shown that establishing rapport and ensuring anonymity are key to war veterans’ admitting that they are experiencing emotional wounds.

But veterans are hesitant to discuss their psychological suffering with other people, Lucas said.

“If they are talking to a human, they feel judged,” she said. “People feel more comfortable opening up to a computer than a human.”

In two studies, Lucas and her team found that Ellie’s questions prompted soldiers and veterans to open up and reveal more of their mental health needs.

In the first, researchers tested 29 active-duty Colorado National Guard service members returning from Afghanistan.

One of every four service members reported post-traumatic stress symptoms on the official PDHA, and one of three reported symptoms when the questionnaire was made anonymous. In conversations with Ellie, far more – three of four – reported symptoms.

In a second study of 132 active-duty service members and veterans, participants were more than twice as likely to report PTSD symptoms to Ellie than on an anonymous survey.

Alan Peterson, a clinical psychologist and professor at the University of Texas Health Science Center in San Antonio, said fear that service members could lose their jobs often impedes their reporting of psychological symptoms.

“In reality, there can be negative career consequences associated with reporting certain symptoms and behaviors,” said Peterson, who was not involved with the study. “This can be especially true for individuals seeking treatment for conditions such as PTSD, if they are not successfully treated into remission and subsequently determined to be fully fit for military duty.”

Making successful treatments available to soldiers would go a long way to reducing the stigma of seeking psychological help, he said.

“Veterans go through a lot for our country, and I really believe that we should take care of them, not just their physical scars, but their mental scars,” Lucas said.

[Back to Top](#)

1.5 - The Washington Post: [Virginia lawmakers say late VA payments jeopardize veterans' care](#) (12 October, Jenna Portnoy, 43.9M online visitors/mo; Washington, DC)

Members of Congress from Virginia say chronic late payments from the Department of Veterans Affairs to doctors are jeopardizing care for the state's aging veteran population.

The state's two senators and 11 House members urged VA administrators to fix a system that can leave health-care providers waiting more than four months for payments they should have received within 30 days. The delays can damage credit, they said.

Congress created the Veterans Choice program in 2014 in response to a scandal exposing excessively long wait times at a Phoenix VA hospital that also had been a problem nationwide.

The program is intended to relieve pressure on VA hospitals by allowing veterans to receive care from private providers if they cannot book an appointment at their local VA facility within 30 days or access a facility within 40 miles of their home.

Since its inception, Veterans Choice has been hobbled by administrative errors, including tens of millions of dollars in overpayments, according to findings of the VA Office of the Inspector General.

“With many health care providers reporting accounts receivable in the millions of dollars, the level of late payments is unacceptable,” the Virginia delegation wrote in an Oct. 3 letter to Secretary of Veterans Affairs David Shulkin.

Rep. Rob Wittman (R-Va.) said Congress requires VA to pay bills in a timely manner.

“Everyone else in society has to do that,” he said in an interview. “If this program is going to work properly, then these bills need to be paid on time.”

Wittman, chairman of the House Armed Services subcommittee on sea power and projection forces, said he has talked to the committee chairman, Rep. Phil Roe (R-Tenn.), about calling Shulkin to testify if VA doesn’t reconcile outstanding bills soon. Virginia is home to 733,000 veterans.

“This is the law,” he said. “This is what you’re supposed to be doing. Why isn’t it getting done?”

VA spokeswoman Paula Paige said in a statement, “VA appreciates the lawmakers’ concerns and will respond to them directly.”

She referred specific questions to a May speech by Shulkin in which he said it takes more than 30 days to process 20 percent of VA claims from 25,000 providers nationwide. An additional \$50 million in charges are older than six months. He blamed the backlog in part on paperwork delays.

The latest stories and details on the 2017 Virginia general election and race for governor. Community care is handled through several federal programs, making it “too complex, and it’s confusing veterans and our employees alike,” he said.

Riverside Health System in eastern Virginia reported that 45 percent of claims totaling \$2 million went unpaid for more than 120 days. Private insurance companies as well as Medicare and Medicaid take about 60 days, said Mark Duncan, Riverside’s lobbyist.

Riverside considers it an honor to care for veterans, but “we need to have the tools the resources to provide that type of service to these folks over the long term,” Duncan said in an interview. “They’ve more than earned that service.”

The letter details a case relayed by the office of Rep. Barbara Comstock (R), who represents Northern Virginia, in which a veteran was denied dentures because VA failed to pay a private provider \$203,000. Comstock’s spokesman said the case has been resolved.

Veterans Choice allows veterans to avoid inconvenient travel to VA facilities in Martinsburg, W.Va., or the District, but VA “must get its house in order,” Comstock said in a statement.

In August, Congress approved \$2.1 billion in emergency funding intended to shore up the program until February.

Last month, Sen. John McCain (R-Ariz.), chairman of the Senate Armed Services Committee, wrote a letter to Shulkin demanding a full accounting of Veterans Choice spending after the Associated Press reported that the program could face another shortfall before the end of the year.

“We said at the time that it was essential, given the growing demand for care under the Choice program, that the VA immediately correct the failures that created such a serious shortfall,” McCain wrote. “It appears as if you have not done so.”

[Back to Top](#)

1.6 - The Washington Post: [‘This is frightening’: Noxious gas has sickened VA workers for two years, with few solutions](#) (12 October, Alex Horton, 43.9M online visitors/mo; Washington, DC)

Staff and patients at a D.C. medical facility for homeless military veterans have endured noxious gas exposure for nearly two years as top hospital administrators, though aware of the problem, have failed to remedy it, according to interviews with staff and documents obtained by The Washington Post.

At least eight clinical workers at the Department of Veterans Affairs Community Resource and Referral Center have tested positive for elevated levels of carbon monoxide, a March internal email said, describing a potentially dangerous condition that restricts oxygen circulation. As many as 30 employees, desperate to avoid further exposure, have sought reassignment or permission to work remotely.

One doctor resigned in protest after VA leaders were unable to produce solutions, clinic staffers said.

“Many of my colleagues, including myself, have experienced some type of illness while working in the CRRC,” one staffer wrote in an August email responding to a VA health official who appeared to play down symptoms of concerned workers. The most recent incident was Oct. 4, staffers said.

The Post reviewed dozens of emails and records, and conducted numerous interviews with clinical workers and others familiar with the problem. What emerged is an unsettling glimpse of VA’s struggle to mitigate a potentially significant health hazard, and raises questions about the agency’s ability to fulfill the promises it has made to improve accountability. The troubled agency was identified early on by President Trump as being in dire need of sweeping reform.

VA spokesman Curt Cashour said the hospital’s leadership “took aggressive steps to look into the problem” once complaints began to circulate. Tests conducted by VA health officials and the local fire department and gas company, among others, “discovered no leaks, hazardous fumes or health risks,” he said, adding that officials continue to monitor the situation.

But those who work at the facility say those tests may not have been performed quickly enough, before the gas dissipated, or if the contractors brought in to conduct them knew which gases to evaluate.

On a given day, the facility is staffed with about 40 employees who serve dozens of patients, all homeless and at-risk veterans who seek care at the clinic. The incidents — numbering in the dozens since winter 2015 — have occurred intermittently and without warning.

Though it remains unclear what's causing the issue, the clinic's staff members have speculated that it could be anything from vehicle exhaust entering the building's heating system intake valves to sewer gas surfacing through sinks and drains. They've reported a range of symptoms, including intense headaches, rashes, stinging eyes, nausea and others — all of which are consistent with sewer gas exposure, as defined by the Centers for Disease Control and Prevention.

Administrators have not only allowed the problem to fester, they have also ordered clinicians back into the building, staffers say.

"I felt devalued. It was like our health wasn't important and our concerns weren't heard," one staffer told The Post, saying morale cratered among those tasked with what they call a rewarding yet grueling effort to help homeless veterans find housing along with primary and mental health care. Those familiar with the facility's troubles spoke on the condition of anonymity, citing their fear of reprisal.

The Community Resource and Referral Center, off Rhode Island Avenue NE, is part of the Washington DC VA Medical Center, the sprawling federal agency's self-proclaimed "flagship" facility. Its acting director, Lawrence B. Connell, has known about the problems there since June, according to emails exchanged among staff. At least two incidents have occurred since then — with 19 verified in all since late 2015, according to partial records obtained by The Post and data provided by the D.C. fire department.

Local firefighters responded to four such calls between February and November 2016. The last time was Nov. 30. One day later, a clinic safety official notified staff that, in the future, they should refrain from pulling a fire alarm if they encounter "noxious fumes" and to alert Washington Gas instead.

A spokesman for the utility company said no gas leak was found.

Connell "has been briefed regularly on these complaints and has been personally involved in the comprehensive, multipronged response involving respected investigators from both inside and outside VA," said Cashour, VA's spokesman. He was a senior adviser to VA Secretary David Shulkin before becoming the medical center's acting director this past summer. Connell accepted the job after his predecessor, Brian A. Hawkins, was removed after an internal investigation found patients receiving treatment at the facility had been endangered by "the highest levels of chaos" created by managerial ineptitude, a VA inspector general's report concluded.

One months-long email chain exchanged among several clinicians reveals a problem so persistent that it had become banal. "Just wanted everyone to know the gas smell is back," a staffer wrote Feb. 21. Another chimed in nine minutes later: "We smell something also in our area." Two hours later a third staffer wrote, "Haven't smelled it in a couple hours but I do have a bad headache."

Two days later, on Feb. 23, a mental health clinician said she briefed then-director Hawkins on the issue, saying unspecified repairs were made.

Hawkins could not be reached for comment.

On March 30, the emails resumed, when the gas smell returned, and again on May 17, when a social worker reported smelling vehicle exhaust.

Nine days later, after another incident, one staff member wrote, "I can only say this is frightening."

Hawkins was gone by then, but the problem was inherited by his successor.

"I raised the issue with Mr. Connell and the staff . . . this morning again," a senior staffer told colleagues on June 10, a day after yet another incident.

It is unclear how many clinic staffers and veterans have been exposed to the gas or what, if any, permanent afflictions they may carry. Staffers say their symptoms seem to improve when they are away from the clinic. The documents don't indicate anyone's current medical status, including the eight who tested positive for carbon monoxide.

One staffer said the patients are thought to be less at risk because they come for appointments and then leave, though they may not make the connection between potential symptoms and their visit to the clinic.

Staff members, however, can inhale the gas for hours on end.

VA safety officials and senior leaders, discussing the issue internally, say they've tried to resolve the problem. They point to numerous air tests for carbon monoxide, carbon dioxide and other gases as indication of their effort.

Two outdoor pipes were adjusted after some speculated that vehicle exhaust was to blame. Access to a dumpster was blocked. Building contractors even dumped water into drains to flush any sewer gas. An environmental liaison for the building's owner, Lincoln Property Company, acknowledged in December that sewer gas was a contributing factor that had been resolved.

A senior VA official visited Oct. 4, when the most recent gas exposure occurred, but it is unclear whether he experienced the problem firsthand.

Staffers at the clinic point to Todd Williams, one of two acting assistant directors of the main VA hospital who report to Connell, alleging that he too has played down the problem.

On Aug. 12, he said in an email that relocating dumpsters and blocking off two parking spots near an intake pipe would "further mitigate risk associated" with vehicle exhaust circulating in the building. "Given these efforts," he wrote, "do we have a timeline for relocation of providers back to CRRC?"

Cashour declined to address questions about Williams's role in resolving the issue.

Williams does not work at the clinic. Leadership on site has been more sympathetic, staffers say. For instance, a nursing manager advised staff to seek doctor's notes if they feared contact with the gas would adversely impact their health, emails show.

Staffers asked for health officials to conduct an epidemiological analysis of symptoms and exposure rates over time.

VA said they completed assessments and found no link between the clinic and health concerns.

[Back to Top](#)

1.7 - The Denver Post: [Dozens of surgeries at Denver VA hospital put off because of doctor shortage, Too few anesthesiologists and competitive market to blame, VA says](#)
(12 October, David Migoya, 4.8M online visitors/mo; Denver, CO)

A shortage of anesthesiologists at Denver's veterans hospital – despite salary offers reaching as high as \$400,000 a year – has forced a delay in dozens of surgeries just months after the institution was tagged with some of the nation's worst waiting lists for care.

Though the hospital employs eight anesthesiologists and eight nurse anesthetists, they're short of the complement needed to meet surgery demands that run about 380 operations a month, a spokeswoman said, noting some staff has left for other jobs as well as taken paternity and maternity leaves.

"Currently we have had approximately 65 to 90 nonemergent surgeries rescheduled or postponed due to a shortage of anesthesiology staff," VA spokeswoman Kristen Schabert said. She offered no examples.

VA data show the average wait time for new-patient surgical appointments at the facilities that make up the Eastern Colorado Health Care System during the 2017 fiscal year that ended Sept. 30 is about 21.6 days, which is slightly better than the national average of 22.7 days. The average wait time at just the Denver facility is 18.6 days.

VA's waiting time in fiscal 2017 for surgery for established patients is 9.5 days, longer than the national average of 5.8 days, according to the VA. It is 8.3 days at the Denver facility.

The latest situation was first reported by FOX-31 News, and it's an extension of a problem that's plagued the Denver facility since the summer.

In July, The Denver Post reported that wait times for primary care medical appointments at veterans facilities in eastern Colorado and the Denver area were among the worst in the nation, and that Front Range veterans have seen little improvement in the three years since a national scandal erupted over the problem.

Colorado congressmen assailed the agency for its continued — and worsening — issues over veteran care, especially after the VA battled other controversies such as the massive delays and cost overruns in constructing a new \$1.7 billion facility in Aurora, which is expected to open in the spring.

Officials of VA's Eastern Colorado Health Care System at the time said critical shortages in medical personnel – including the doctors and nurses that are at the root of the surgery delays faced today – made it difficult to keep up with the growing demand Colorado has seen from an increasing veteran population.

Sometimes, chief of staff Dr. Ellen Mangione said, veterans would rather wait for a familiar face at the VA than be seen more immediately by a doctor outside the system, even when given the choice to do so.

The eastern system had a 16 percent vacancy rate — there were 336 physicians — during the summer crisis, even though it was offering some primary care doctors as much as \$200,000 a year in salary and additional training. Schabert did not immediately have current vacancy figures.

“Our leadership has been supportive and we were able to up our salary offerings to remain competitive,” Schabert said of the search for anesthesiology professionals, “but ... Denver is a competitive market.”

Until hires are made, the eastern system is contracting with temporary outside physicians, known as a “locum,” to fill the gaps, Schabert said.

And the eastern system is no longer among the nation’s worst waiting periods for an appointment to see a primary care physician, VA data show, although it still ranks high with an 11-day average compared with a 4.8-day national average.

It’s been replaced by the VA health care system in Grand Junction, where the average wait for a primary care visit is 18 days, data show. That system is nearly one-tenth the size of Denver’s.

1.8 - Military Times: [Lawmakers take first steps toward a BRAC for VA facilities](#) (12 October, Leo Shane III, 2.1M online visitors/mo; Springfield, VA)

WASHINGTON — House lawmakers took the first steps Thursday toward shutting down hundreds of Veterans Affairs facilities through a process similar to military base closure rounds, saying the move is critical to keep the department from wasting millions of dollars on underused, aging buildings.

But some of the largest veterans groups said they have serious concerns with the proposal, saying it’s ripe for abuse and could tempt VA officials to outsource more veterans’ medical care to private-sector physicians.

Even supporters admitted the plan will be a difficult sell on Capitol Hill.

“This bill is bold, transformative and controversial,” said Rep. Phil Roe, R-Tenn., chairman of the House Veterans’ Affairs Committee. “Moving forward with it will require a significant amount of political courage and, let’s face it, members of Congress are not known for that.”

At issue are the roughly 6,300 facilities owned VA spread across the country. Department officials have said more than 57 percent of those locations are more than 50 years old, and hundreds of others provide little value to veterans care or department management.

VA Secretary David Shulkin in June announced plans to close at least 430 vacant or mostly vacant buildings over the next year, a move that is expected to save about \$7 million annually.

But he also has pushed for further authorities to close other locations, to better match department resources with future needs.

The VA base-closure-style plan — dubbed the Asset and Infrastructure Review Commission — would establish an eleven-member outside panel to recommend facility closings and resource shifts based on facility needs criteria to be established by the VA secretary.

That would involve an in-depth review of VA real estate and health care strategies, complete with public hearings. The final commission recommendations would need to be approved by the president. Congress would have 45 days to override the White House decision if they disagree with the planned closings and moves.

Much like the military base closing commissions, the set-up is designed to separate facility closing choices from political whims. Roe and committee ranking member Rep. Tim Walz, D-Minn., said the commission could also recommend setting up new facilities in underserved areas, using savings from other closings to pay for the new sites.

But veterans groups who testified before Roe's committee on Thursday said they have serious concerns that an outside panel could focus on savings instead of seeking the best care options for veterans, creating major problems for a system already dealing with wait time and access challenges.

Carl Blake, associate executive director at Paralyzed Veterans of America, said his group could support the idea "assuming the intent is to right-size the VA and not simply use this opportunity to reduce the footprint of VA for the purpose of fulfilling a promise for greater community care access and cutting spending."

Officials from Disabled American Veterans said they support a full review of the department's national footprint but aren't convinced the base-closing commission is the right path for that discussion. Officials from the American Legion said their group would not support the plan unless veterans groups had the opportunity to veto recommendations they deem harmful to veterans care.

But even without those concerns, any federal facility closing process faces a difficult path in Congress. Defense Department officials have been petitioning lawmakers for five years to hold another military base closing round, only to have the proposal rebuffed annually.

Government Accountability Office researchers said the last five BRAC rounds have produced nearly \$12 billion in annual federal savings. But the last round conducted in 2005 still has not recouped its original costs, which has lead many in Congress to question the value of such cutbacks.

Roe insisted this plan is different, because the focus isn't on generating savings but instead better preparing the department to respond to veterans needs. The proposal for now is only draft legislation, but he said he hopes to move forward on the issue in coming weeks.

Veterans groups said they would continue to work on the issue with lawmakers but emphasized their skepticism.

Acting VA Deputy Under Secretary for Health for Policy Regan Crump said department officials are not backing the idea of an outside asset commission yet, but do support “the need for more flexibility” with VA facilities.

As the congressional debate continues, VA officials are reviewing another 784 non-vacant but underused facilities to determine if they can close or restructure them in coming months.

[Back to Top](#)

1.9 - Stars and Stripes (Military Update): [VA, Congress crawl toward ending abuse of vet pensioners](#) (12 October, Tom Philpott, 1.5M online visitors/mo; Washington, DC)

In 2012, the Government Accountability Office found more than 200 financial planning firms and estate law offices enticing veterans or their survivors into costly annuities or irrevocable trusts intended to hide or reallocate their assets so they qualify for VA pensions that the claimants wouldn't be eligible for otherwise.

Since then, the Department of Veterans Affairs and Congress have been crawling toward actions to stop the abusive practices, which twist the intent of the pension benefit in ways to help some veterans, put others in financial binds, and generate fees or profits or streams of residents for the schemers.

The crawl toward reform continues. The VA is still working on a draft rule first released for public comment in January 2015. Final publication of the “Net Worth, Asset Transfers and Income Exclusions for Needs-Based Benefits” rule was expected this past summer. However, it remains “in VA’s internal concurrence process,” a VA spokesman said Wednesday.

Meanwhile, the House veterans’ affairs subcommittee on disability assistance and memorial affairs held a first-ever hearing last month on legislation to address financial abuses of the pension program. The Veterans Care Financial Protection Act (now HR 3122) was first introduced in 2014.

The VA pension program exists to help veterans in financial distress if they served at least a day of wartime service, at least 90 consecutive days on active duty and earned an honorable or a general discharge. To be eligible for the basic VA pension, veterans also must have only modest annual incomes or none at all.

They can qualify for more VA financial help, however, if they are disabled and unable to leave their homes unassisted, or they have unmet daily living needs or they face exorbitant medical, assisted care or nursing home costs. The additional financial help is called the VA Aid and Attendance benefit.

“It’s an absolute lifeline for veterans who have significant health problems,” John Katz, the American Legion’s assistant director for pensions at the VA regional office in Philadelphia, told me late last year. “Many people who laid their lives on the line for their country are incapable today of taking care of themselves without housebound benefits or Aid and Attendance, in addition to the nonservice-connected [VA] pension. For them there’s no other way they’d survive.”

About 303,000 wartime veterans and 220,000 survivors draw VA pension benefits. Veteran advocates believe thousands more would qualify if they knew the program existed and applied. What has raised the profile of pensions recently, however, have been the reports of abuse and target marketing by unscrupulous financial planners, lawyers or even care facilities seeking vets who are ill or elderly.

The pension is a needs-based benefit with need determined using thresholds on annual incomes and on assets or net worth. For example, a wartime vet with no dependents can qualify for all or a portion of the basic pension benefit if he or she has income, including Social Security, less than \$12,907 annually. If income is \$10,000, for example, the benefit would be calculated by the maximum annual pension rate of \$12,907 minus \$10,000, for a total of \$2,907 annually.

However, the pension benefit is unique in that it allows veterans to apply medical expenses to offset income calculations and raise the benefit. Even higher amounts are payable if the veteran or surviving spouse is housebound, and more Aid and Attendance dollars are available if claimants need help with daily activities.

A married veteran needing Aid and Attendance can qualify for at least some pension monthly if his or her income doesn't exceed \$25,525. A survivor's pension is smaller but also based on need with consideration too of medical expenses.

The other threshold to determine eligibility is net worth. If assets other than primary residence and vehicle exceed \$80,000, then VA can't assume eligibility without a closer determination. Again, medical-related expenses can be critical. For example, if a veteran with assets totaling \$100,000 moves into an assisted-living facility that costs \$5,000 a month, a VA service officer could determine the asset threshold quickly will be reached and can find the veteran eligible for pension.

Veterans and survivors who believe they might qualify should contact the veterans' service office for their county to fill out required forms. More program information can be found online at: benefits.va.gov/PENSION/index.asp.

A key purpose of regulatory reforms aimed at VA pension benefits is to ensure they are used by low-income veterans or those facing exorbitant medical expenses they can't pay, rather than as a tool to preserve family wealth.

One provision in VA's draft rule would impose a three-year look-back provision on assets to discourage new claimants from hiding assets. Other changes would reset the asset ceiling to the higher and "brighter line" used by Medicaid, and more clearly define medical expenses that can reduce income calculations. The new rule would not leave the threshold on assets open to interpretation as it is now.

Legislative reforms, which show signs of life, take a different approach. As Rep. Matthew Cartwright, D-Pa., testified last month on behalf of his bill, HR 3122, his measure would direct the VA and other federal agencies to work with state officials and outside experts to establish state and federal standards to end "dishonest, predatory or otherwise unlawful practices" that target VA aid and attendance dollars.

"Unscrupulous actors are increasingly exploiting this assistance program by preying on our older veterans' vulnerability," to waste federal dollars and turn "this well-deserved benefit into a financial nightmare for those who can least afford it," said Cartwright.

Some charge veterans “a non-existent application fee to obtain the benefit,” he added. Others collect “consultation fees” with “promises to expedite the application process. Yet another scam is an offer to help veterans qualify for the benefit even when their net worth is too high to qualify.”

In this way, Cartwright explained, financial planners gain control of the veteran’s assets and “move them into an irrevocable trust or annuity, which the elderly veterans often cannot access for many years.”

Increasingly, he said, retirement homes are recruiting veteran residents with promises that they will qualify for VA aid and attendance to cover cost of the home.

“If the A&A claim is later denied, however, the nursing home then demands back payment from the veteran. This is a practice that leaves vulnerable elderly veterans with the undesirable choice of draining their own remaining assets or giving up their new home,” Cartwright said.

He first introduced his bill on learning of companion legislation in the Senate (now S. 1198) from Sen. Elizabeth Warren, D-Mass. The bill now has bipartisan support in the subcommittee. Witnesses for VA and veteran service organizations expressed support. Cartwright promised some changes to reflect concerns from the GAO that it shouldn’t be given a role in establishing the new protection standards given its existing responsibilities for reviewing how the standards are implemented.

With no costs attached, the bill is expected to clear the subcommittee this fall. Full committee action and passage by the House isn’t expected this year.

[Back to Top](#)

1.10 - Public Radio International (Audio): [Meet the women combing through Puerto Rico, searching for veterans in need](#) (12 October, Jasmine Garsd, 1.2M online visitors/mo; Minneapolis, MN)

It’s early in the morning, and the entire city of San Juan, Puerto Rico, seems to be gazing at the sky with concern. It looks like rain but the island just can’t handle any more flooding.

On the highway, under the dark, heavy clouds, a small car makes its way through traffic. In it are four women, Ghislaine Rivera, Mia Lind, Janine Smalley and Katie Blanker, with whom I’m spending the day — it’s Oct. 5.

Our first stop? A school that’s been turned into a hurricane shelter.

Lind, an occupational therapist for the VA Caribbean Healthcare System in San Juan, goes to the door, asking, “Are there any veterans here?”

Every day since the hurricane hit, she and her team have been roaming from shelter to shelter, looking for veterans who need medical attention.

There are somewhere around 75,000 US Army veterans living in Puerto Rico. Most served during the Vietnam War. After Hurricane Maria, many are now living in shelters. Thousands, overall, have been displaced by the storm, and the shelters are packed.

At the school, a supervisor answers: Yes, there's a veteran here.

The VA team finds 70-year-old Luis Torres lying in bed. His dress shirt is wide open and his baseball cap is flipped backward. His bed is surrounded by piles of clothing and some bags of food.

The Air Force veteran was honorably discharged; he has his military ID, but the other paperwork was lost in the storm. "My house ... it disappeared," he says, breaking down in tears.

His teenage son, Andrew Torres, who is also staying here, pulls out his phone to show us pictures of what's left of their house. It's like the roof and the walls were just plucked out. On the second floor, a toilet stands alone in the open.

Janine Smalley takes Luis Torres's vitals. His blood pressure is 130 over 80, so that's "perfect," she says, asking, "Do you take any meds?" Smalley is the VA team's registered nurse and Disaster Emergency Medical Personnel trained by the Federal Emergency Management Agency. She's here from Cleveland, Ohio. She volunteered to come help. She says when she saw what was happening in Puerto Rico, she asked to be sent here.

Meanwhile, Katie Blanker, who also volunteered for this assignment, brings Torres toothbrushes, heating pads and food. Blanker is from Stevens Point, Wisconsin. She's a social worker with the VA and a veteran herself.

Katie Blanker is working in Puerto Rico as a social worker with the VA. She's also a veteran. She's originally from Stevens Point, Wisconsin. Credit: Jasmine Garsd/PRI
Torres cheers up. "Where's the T-bone steak?" he jokes. At least for a few minutes, the mood has lightened up.

Lind says that she, too, had been thinking about steak, just the day before. There is a meat shortage on the island. "I really want to have a meal for my kids that includes beef. That was my goal. To get my kids not canned food. When you have chaos like this, the only right you have is to stay alive. You stay alive, and you survive," she says.

Lind fights back tears. The others from her team hug her. Then she smiles and announces the next neighborhood they're heading to: "Let's go to Rio Grande!"

Let's go "before we're all crying. I was hoping to wait till noon to cry again," Smalley says.

The next shelter is even more packed than the last one.

"May we come in and ask if anyone is a vet?" Lind asks.

A man says there aren't any vets there.

Lind asks the man how he knows.

The man bristles, saying, "I can't force them to talk to you."

Lind thanks him, and the team leaves. Later on, in the parking lot, Lind tells me she suspects some shelters just don't want the VA team coming in. She and her colleagues represent the federal government. And they have to report it if a hurricane shelter isn't providing enough food and water. Or if it's overcrowded.

A lot of these shelters are just repurposed schools, places for people to lie down and rest, with no running water or electricity. This is the new normal. Which is why the last shelter we go to takes us a little by surprise.

The team walks right in. There's a radio blasting pop music. There are kids painting murals. And then there's Benny Molina.

The residents cheer his name as he sits down for a checkup by nurse Smalley. Molina, 61, is a veteran — "National Guard in Riverdale, New Jersey. Specialized in tanks. Driving the tanks," he says.

"Benny that's perfect!" interrupts Smalley. Benny's blood pressure is normal. He jokingly offers to do pushups — in a while — he just had a big meal. The room erupts in laughter.

Ghislaine Rivera, a social worker, asks him what happened to his home. It's gone. Benny lost everything he owned to the storm. The team offers to give him aid packages, with basic supplies, but he refuses. "Right now, we have food and everything ... but some other people are sleeping on the street and they have nothing to eat."

As he fills out his paperwork, Smalley and Blanker take a quick break in the shade. They are red from the heat and visibly tired. They've come a long way, from Ohio and Wisconsin. But, they say, this is a responsibility they have. All of us do.

"We don't know them all, but we owe them all," says Smalley.

"All of the veterans we're here for served for the United States," says Blanker. "This is Americans helping Americans. These veterans were stationed in the US, went to war with the US. I think that's the thing that people forget."

2. Veteran and Employee Experience

2.1 - The Washington Post (PowerPost, Video): [House to vote on bill requiring discipline for officials who retaliate against whistleblowers](#) (12 October, Eric Yoder, 43.9M online visitors/mo; Washington, DC)

Federal agencies would be required to discipline officials who retaliate against whistleblowing employees, and to fire them on their second offense, under a bill up for a House vote Thursday.

The bill, approved by the Senate in May, is one of many arising from the disclosures starting in 2014 of falsified patient records at the Department of Veterans Affairs. The revelations drew a surge of complaints from lower-level employees who said they had suffered workplace reprisal

from managers for pointing out the problems and that managers were not being held accountable for violating the legal protections for whistleblowers.

“While retaliation at the VA has captured the public’s attention most recently, retaliation against whistleblowers is not confined to any one agency,” a Senate report on the bill says, adding that mandatory discipline is designed to “ensure accountability throughout the Federal Government.”

The bill would require at least a three-day suspension of a federal official found to have committed retaliation by an internal government legal process or by a federal judge and firing for a second offense. The time to contest a notice of proposed discipline would be shortened from 30 to 14 days, but once the firing became final, regular appeal rights would apply.

Congress last year enacted a similar requirement applying only to VA officials who retaliate against employees who disclose fraud, waste or misconduct, with at least a 12-day suspension for a first offense and firing for a second. This year, a law shortening and restricting appeal rights for VA employees was enacted, and on Wednesday the House passed a measure somewhat widening whistleblower protections.

The measure requiring firing for retaliation would create an exception to the general rule that agencies have wide discretion over disciplining their employees. Currently, mandatory firing also applies at the Internal Revenue Service under a long-standing policy known as the “10 deadly sins” involving abuse of authority.

The George W. Bush administration attempted to impose mandatory discipline for certain types of misconduct as part of alternative personnel policies at the departments of Defense and Homeland Security, but neither took effect in the face of lawsuits and opposition from Congress.

Also, under the latest bill, agencies would have to give priority to a request for a transfer on behalf of an employee — including one still in a probationary period — who alleges retaliation; it would be an act of retaliation for an agency official to access the employee’s medical records following a disclosure; and more training on whistleblower rights would be required for new employees and for supervisors.

[Back to Top](#)

2.2 - U.S. News & World Report (AP): [Alaska Veterans Affairs System to Add 100 Staff Members](#) (13 October, 24M online visitors/mo; Washington, DC)

ANCHORAGE, Alaska (AP) — The Alaska Veterans Affairs system has announced it's adding 100 staff members.

KTVA-TV reported Wednesday that Dr. Timothy Ballard said the staff is being added in response to negative reviews from both patients and staff.

Ballard said the new positions are focused on mental health care and support functions. The 100 new jobs boost the system's number of staff to 650 at a cost of \$6 million.

Ballard said money to pay the new workers is being repurposed from other places in the budget.

He said the system is also increasing the speed at which it fills vacancies, bringing the wait time down from six months to six weeks.

[Back to Top](#)

2.3 - Atlanta Journal-Constitution: [Roswell getting \\$21K for veterans adaptive sports](#) (12 October, David Ibata, 11.9M online visitors/mo; Atlanta, GA)

Roswell has agreed to accept \$21,080 from the federal government to purchase equipment and hire instructors for new VA Wheelchair Softball and Adaptive Cycling programs for disabled veterans.

The City Council approved a resolution accepting the FY 201 Adaptive Sports Grant from the U.S. Department of Veterans Affairs. The grant does not require local matching funds, according to a staff report to the council.

The Roswell Recreation, Parks, Historic and Cultural Affairs Department will be responsible for the adaptive sports program.

[Back to Top](#)

2.4 - The Hill: [New whistleblower protections head to Trump's desk](#) (12 October, Cristina Marcos, 11.8M online visitors/mo; Washington, DC)

The House unanimously cleared legislation on Thursday to ensure protections for federal employees who disclose government waste, fraud and abuse.

Passed 420-0, the measure would train federal workers so they understand their protections, as well as enhance penalties for supervisors who retaliate against whistleblowers.

The bill is named after Chris Kirkpatrick, a psychologist was fired from a Department of Veterans Affairs (VA) medical center after raising concerns about patients' medications. He committed suicide on the day he was dismissed.

The bill also orders the VA to create a plan for preventing unauthorized access to employee medical records and conduct outreach to employees about mental-health services.

The Senate passed the legislation, authored by Senate Homeland Security and Governmental Affairs Committee Chairman Ron Johnson (R-Wis.), in May. It now heads to President Trump's desk for his signature.

"Future whistleblowers who take a risk to expose wrongdoing and waste in the federal government deserve the respect and support of our nation. I urge the president to quickly sign these important reforms into law," Johnson said in a statement.

Before final passage, House Democrats offered a procedural motion to amend the bill by extending protections to federal workers who reveal wrongdoing by an agency head or political appointee violating rules or regulations regarding travel.

Democrats offered the motion in light of Tom Price's resignation as secretary of Health and Human Services in September after Politico revealed his extensive use of private jets, instead of commercial alternatives, at taxpayers' expense. Politico estimated Price's travel costs at possibly more than \$1 million.

"The resources invested to agencies to fulfill their missions of serving Americans should not be abused or frivolously flaunted for personal gain or convenience," said Rep. Tom O'Halleran (D-Ariz.), who offered the motion.

Rep. Rod Blum (R-Iowa) did not disagree with the substance of the proposal offered by Democrats, but urged swift passage of the underlying whistleblower legislation so Trump could sign it into law as soon as possible.

"Let's not let one good bill get in the way of another," Blum said.

The motion failed along party lines, as is typical in the House when it comes to procedural votes.

The House also passed two noncontroversial bills by voice vote on Wednesday to protect and encourage whistleblowers.

One measure, authored by Rep. Chuck Fleischmann (R-Tenn.), would allow federal agencies to pay up to \$20,000 in cash rewards to workers who report waste. The other, sponsored by Rep. Steve Russell (R-Okla.), would allow whistleblowers outside the intelligence community to disclose classified information to supervisors in their chain of command.

[Back to Top](#)

2.5 - Bangor Daily News: [‘Dangerous surgeon’ at Togus allegedly made mistakes in 88 cases, but VA kept it quiet](#) (12 October, 1.2M online visitors/mo; Bangor, ME)

An explosive USA Today investigation into medical mistakes allegedly made under the watch of the U.S. Department of Veterans Affairs highlighted what the newspaper described as one particularly egregious case in Maine.

According to the report, podiatrist Thomas Franchini allegedly made mistakes in 88 cases while working at the Togus VA Medical Center near Augusta, the nation's oldest veterans' hospital.

"We found that he was a dangerous surgeon," former hospital official Robert Sampson said during a deposition in a federal lawsuit against the department, according to the newspaper.

U.S. Rep. Bruce Poliquin, R-Maine, described the case as "unacceptable behavior" and called the situation "nothing short of appalling" in a Thursday statement.

USA Today's report describes myriad examples: Franchini allegedly drilled the wrong screw into the bone of one patient, severed a tendon in another, conducted unnecessary surgeries and twice failed to properly fuse a woman's ankle, for instance.

Instead of being fired, the newspaper's investigation found, the department didn't report him as a problem doctor or fire him, but rather allowed him to quietly resign and open a private practice in another state.

The Franchini case was revealed as part of an investigation that uncovered about 230 secret settlement deals in which VA officials quietly cut ties with problem doctors and other medical staff across the country, allegedly promising to conceal serious mistakes and allow many of the personnel in question to go into the private sector with unblemished records.

Franchini, who was reportedly placed on leave by the VA in 2010 and resigned soon thereafter, told USA Today he never got to respond to the department's findings that he'd made serious mistakes, and that his attorney submitted two outside reviews that contradicted those findings.

He also said he has performed many surgeries since leaving the VA without complications.

"If I was so bad, I would be bad all the time," he told USA Today.

Six veterans are now suing the VA accusing the agency of fraudulently concealing Franchini's mistakes.

In response to the report, Poliquin, who represents Maine's 2nd congressional district, announced Thursday he is joining fellow Reps. Cathy McMorris Rodgers of Washington and Phil Roe of Tennessee to introduce a bill that would force agency officials to report to state licensing boards if they discover "unacceptable or unethical behavior from other medical professionals at the VA."

"Our Maine veterans depend on their services at Togus and other VA facilities across our state for critical care, and it is absolutely unacceptable for them to ever be subjected to medical malpractice," Poliquin said in a statement. "We must have accountability at the VA, to ensure our veterans are always getting the best care possible, and I am proud to be working on the Veterans Affairs' Committee to do that."

2.6 - WFED (AM-1500, Audio): [House passes bill to give TSP participants more withdrawal options](#) (12 October, Eric White, 831k online visitors/mo; Washington, DC)

[...]

The Veterans Affairs Department stepped back a proposal to suspend a 50-year-old ethics law. The law, first passed in 1966, requires VA to fire any employee who also works for a school whose students receive VA benefits. The department had planned to completely stop enforcing that requirement by next Monday, since some of its employees also work as adjunct professors at for-profit colleges. But it abruptly walked back the regulatory change on Wednesday after

complaints from veterans groups who said the waivers should only be granted on a case-by-case basis. (Federal News Radio)

[Back to Top](#)

2.7 - La Crosse Tribune: [House approves whistleblower bill named for former Tomah VA doc](#) (12 October, 822k online visitors/mo; La Crosse, WI)

The U.S. House passed a federal whistle blower protection bill Thursday named for a former VA psychologist who questioned over-medication of patients at the Tomah VA Medical Center.

The Dr. Chris Kirkpatrick Whistleblower Protection Act is designed to protect federal employees who come forward with allegations of waste, fraud and abuse and to set minimum disciplinary measures for supervisors found guilty of retaliation.

The bill also requires the VA to put together a plan to prevent supervisors from improperly accessing an employee's medical files in retaliation.

Kirkpatrick killed himself in 2009 the same day he was fired after questioning over-medication practices at the Tomah VA, which earned the nickname "Candy Land" because doctors there prescribed such high doses of opiates. Investigations later blamed those prescription practices for the deaths of at least two veterans.

U.S. Rep. Ron Kind, whose district includes the Tomah VA, spoke on the House floor in favor of the bill.

"Dr. Kirkpatrick was dedicated to improving the lives (of) and serving our nation's veterans," Kind said. "The bill before us today will honor the memory of Dr. Kirkpatrick by helping to make sure no one will have to go through what he did."

The bill, introduced by Sen. Ron Johnson, passed the House unanimously and now heads to President's desk.

Johnson, a Wisconsin Republican, said the passage brings the nation "

one step closer to better protecting federal whistleblowers and providing better health care to the finest among us – our veterans."

VA Secretary David Shulkin has pledged to bring greater accountability to the government's second largest agency, which provides medical care to millions of veterans. In July, Shulkin began posting employee disciplinary actions and announced that he would require approval by a senior official of any settlement with a VA employee over the amount of \$5,000, citing unnecessary payments to bad employees. A month later, he ordered a review to expand VA reporting requirements for bad workers.

During the 2016 campaign, Trump described the VA as the "most corrupt," promising to "protect and promote honest employees" at the VA who expose wrongdoing.

2.8 - WLOS (ABC-13, Video): [Protesters at Asheville VA say being understaffed is dangerous](#) (12 October, 480k online visitors/mo; Asheville, NC)

ASHEVILLE, N.C. (WLOS) — Veterans Affairs employees held a rally outside Asheville's Charles George VA Medical Center on Thursday to protest working conditions.

Protesters said low staffing levels are creating risks to patient safety and a hazardous work environment. They said Congress has failed to fill open positions, putting veterans' health care at risk.

"We're trying to get the word out and let Congress know that we're here to support these veterans," Brandee Morris, of AFGE Local 446, said.

Protestors said there are nearly 50,000 open positions at VA centers across the country, and there's no plan in place to fill them.

[Back to Top](#)

2.9 - HousingWire: [Ginnie Mae, VA launch task force to look into lenders targeting veterans for quick refinances - Comes on the heels of Ginnie Mae opening investigation](#) (12 October, Ben Lane, 438k online visitors/mo; Irving, TX)

Roughly one month ago, Ginnie Mae announced that it was launching an investigation into mortgage lenders that were aggressively targeting servicemembers and military veterans for quick and potentially risky refinances of their mortgages.

The investigation came on the heels of a letter from Sen. Elizabeth Warren, D-Massachusetts, who cited a report from the Consumer Financial Protection Bureau, which covered complaints received from veterans about Department of Veterans Affairs mortgage refinancing.

Warren's letter claimed that there may be lenders "aggressively and misleadingly marketing the refinancing of mortgages backed by the Department of Veterans Affairs, generating fees for themselves at the expense of veterans and American taxpayers."

Now, Ginnie Mae and the VA are launching a task force to "address mortgage refinancing issues" surrounding VA loans.

The task force, which is called the "Joint Ginnie Mae – VA Refinance Loan Task Force," will focus on "examining critical issues, important data and lender behaviors related to refinancing loans and will determine what program and policy changes should be made by the agencies to ensure these loans do not pose an undue risk or burden to Veterans or the American taxpayer."

But more specifically, the agencies say that the task force will review the "aggressive and misleading refinancing" marketing practices of certain lenders, and will address "loan churning and repeated refinancing."

Loan churning is the practice of convincing an existing borrower to refinance their mortgage.

When announcing the investigation, Michael Bright, the acting president and chief operations officer of Ginnie Mae, said that the market for VA loans that is “somewhat saturated with lenders and brokers making dozens of calls and sending dozens of letters to veterans” trying to get them to refinance their mortgages.

And now, Ginnie Mae and the VA are working to address the issue.

“Both agencies agree that VA and Ginnie Mae programs work best when they are used by market participants in ways that provide a benefit to Veteran borrowers and, ultimately, lower Veterans’ costs,” Ginnie Mae said in an announcement.

According to Ginnie Mae, the task force has already started its work by examining data and information to “ensure loans provide a net tangible benefit to Veteran-borrowers, and consider establishing time frames regarding recoupment of fees associated with refinancing loans.”

Ginnie Mae said that the task force will also examine the impact of “establishing stronger seasoning requirements for VA-guaranteed loans that are securitized into Ginnie Mae Mortgage Backed Security pools.”

Additionally, Ginnie Mae said the task force will work to “ensure Veterans understand the costs and benefits of refinancing, and ensure robust borrower outreach and education programs are augmented for this purpose.”

The agencies also plan to arrange “joint discussions with individual lenders whose demonstrated origination practices may negatively affect Veteran borrowers or increase program costs and risks.”

The agencies also say that the task force will continue its work until “concrete solutions” are found that will “eliminate lender behavior that is unhelpful to Veterans and harmful to the American taxpayer.”

2.10 - Citizen-Times: [Disappointed VA employees voice concerns, lack of staffing and support](#) (12 October, Alexandria Bordas, 318k online visitors/mo; Asheville, NC)

OTEEN - Ralliers gathered at Charles George VA Medical Center on Thursday afternoon to express disappointment in the 49,000 vacant staff positions nationwide, which veterans' supporters said are affecting local VA branches.

Months of delays in appointments, overworked employees and lack of internal support can no longer be ignored, said Brandy Morris, executive vice president of the local American Federation of Government Employees labor union in Asheville.

"Veterans want to come to the VA and not be sent to private doctors because it will take us over a month to treat them," said Morris, who has worked for the VA for 17 years.

Ralliers also said they were upset with the Trump administration's recent decisions in regards to veteran care.

In August, Trump signed a \$3.9 billion funding bill to save the nearly bankrupt Choice Program, which is a temporary benefit that allows eligible veterans to receive health care in their communities rather than waiting for a VA appointment or traveling to a VA facility, according to the Department of Veterans Affairs.

The Choice Program was created in 2014 after numerous reports revealed an alarming rate of cover-ups in veteran wait times at a handful of VA hospitals across the nation.

This summer, it was determined the Choice Program would no longer be able to offer the temporary benefit because it was running out of money.

Originally, the proposed bill was smaller and would solely fund the Choice Program, without an additional \$1.8 billion for hiring and clinics.

Backlash from veterans organizations, who said the bill prioritized privatized care as opposed to buffing up VA staff, led to the revised \$3.9 billion bill, which Trump signed in August, according to Stars and Stripes. The money is expected to keep the Choice Program afloat for six more months.

But, despite the new bill, there is still dissatisfaction among VA employees.

Paul Stone, a veteran who works at the VA as an electrician, was not inspired by the surge of support for the Choice Program under the Trump administration.

"If veterans had a choice, they would rather see their doctors here, but they don't have a choice so they are forced to see someone else," said Stone, who was holding a sign that said "I Love My VA".

Torre White comes from a family of servicemen and women. She works as a program support assistant with geriatrics at the VA.

It took her months to get hired, despite hundreds of job vacancies posted online, she said.

"There are plenty of openings, but why aren't people getting hired?" she asked. "With so many people applying and wanting jobs, it shouldn't take that long, and now our veterans are not able to get immediate care because of that."

These issues also bother Kay Murray, who has worked as a nurse at the VA for 8 years.

The VA can provide services in-house without the Choice Program if it had the right staffing, she said.

One of Murray's biggest concerns is veteran patients with mental health needs.

A lot of veterans come to the VA because they can trust their doctors, many of whom are veterans, which many not be the case if they go elsewhere, she said.

"The VA is home to veterans, their family, and they come to us wearing their buttons, hats and t-shirts," Murray said. "Half of our employees are veterans too, this is where all of them should be treated."

2.11 - WEAU (NBC-13, Video): [House members pass Whistleblower Protection Bill](#) (12 October, Ruth Wendlandt, 276k online visitors/mo; Eau Claire, WI)

Washington, D.C. (WEAU) In a bi-partisan vote, House members unanimously passed Representative Sean Duffy's Whistleblower Protection Bill.

The Dr. Chris Kirkpatrick Whistleblower Protection Act ensures no one is retaliated against for coming forward with concerns about waste, fraud, and abuse at the veteran affairs. It also requires the VA to come up with a plan to restrict unauthorized employee access to medical files.

The bill is named after a Wisconsin doctor who worked at the Tomah VA Medical Center, and was fired after he questioned the over-medication of veterans. On the day of his firing, Dr. Kirkpatrick committed suicide.

Representative Ron Kind says he's happy the bill received support from across the aisle. Kind says, "We need people who are working with our veterans who feel confident and safe to come forward when they see things that aren't working the way they're supposed to, when veterans aren't getting the treatment they need, and they deserve, without fear of retaliation without fear of being retired."

Representative Duffy says, "This legislation strengthens protections for patriots-for those who are trying to do the right thing, for those who care about veterans and their safety."

2.12 - Parkersburg News & Sentinel: [Outrageous: VA culprit deserves more than a lecture](#) (13 October, Editorial Board, 187k online visitors/mo; Parkersburg, WV)

How should a Department of Veterans Affairs manager who defrauded the government, took chances with veterans' health care, then devised a coverup be punished? Readers probably have their own ideas about that.

But according to the federal government, the answer is ... counseling.

One of U.S. Rep. David McKinley's constituents reported to him last year that something was wrong at the Louis A. Johnson VA Medical Center in Clarksburg. McKinley represents much of our area; and many veterans in our region rely on the VA hospital in Clarksburg.

McKinley went straight to the VA. The U.S. Office of Special Counsel, which also had been contacted by a whistleblower from the hospital, looked into the matter.

Investigators found that during a seven-year period, a manager at the hospital engineered a scheme whereby patient data was “intentionally manipulated” at the facility. The purpose was to make it appear at least some veterans were not kept waiting for care as long as actually was the case. In addition, the volume of patient visits was inflated.

Part of the scheme involved nurses being pressured to place patients in unofficial “clinics,” rather than record them as emergency department visits.

Whether any veterans were harmed by the manager’s actions was not reported by the Office of Special Counsel. Obviously, that should be checked.

One ramification of the misconduct was that 602 veterans were charged incorrect co-payments. That cost the VA \$21,070.

However, according to the Office of Special Counsel, the VA “is currently determining how to recoup lost payments.” In other words, the bureaucrats are looking into how they can go back to the 602 veterans and tell them they owe Uncle Sam money.

What about the culprit? According to the Office of Special Counsel, “the VA counseled the manager responsible ...”

That’s it. No punishment, just a good talking to.

We sometimes refer to the bureaucracy in Washington as “the swamp.” That may be a disservice to the snapping turtles, cottonmouth snakes, alligators and quicksand of the real thing.

2.13 - WAGM (FOX-8): [After Report Shows VA’s Failure to Disclose Medical Malpractice at Togus, Rep. Poliquin Acts to Make Changes](#) (12 October, 35k online visitors/mo; Presque Isle, ME)

Congressman Bruce Poliquin, along with House Conference Chair Cathy McMorris Rodgers (WA-05) and House Veterans Affairs Committee Chairman Phil Roe (TN-01), today introduced the Ethical Patient Care for Veterans Act of 2017. This legislation requires Department of Veterans Affairs (VA) medical professionals to report directly to state licensing boards if they witness unacceptable or unethical behavior from other medical professionals at the VA. The legislation is in response to the alarming USA Today article out yesterday that revealed the VA failed to disclose bad medical practitioners to the public, risking the public’s exposure to these bad actors.

One of the most notorious offenders was Thomas Franchini, a practitioner at Togus who had committed malpractice in 88 separate cases, according to the VA’s conclusions.

“These most recent reports are nothing short of appalling,” said Congressman Poliquin. “Our Maine Veterans depend on their services at Togus and other VA facilities across our State for critical care, and it is absolutely unacceptable for them to ever be subjected to medical

malpractice. We must have accountability at the VA, to ensure our Veterans are always getting the best care possible, and I am proud to be working on the Veterans Affairs' Committee to do that. I'm now pleased to work with Chairwoman McMorris Rodgers and Chairman Roe to help prevent this unacceptable behavior from occurring again."

"These newest reports out of the VA are deeply troubling," said Chair McMorris Rodgers. "Our veterans deserve the best care imaginable, but as we've seen, far too often that's not the case. This bill will help reform the culture at the VA by holding bad actors accountable and keeping them from continuing these mistakes at the VA or elsewhere. We should be rolling out the red carpet to our nation's heroes in Eastern Washington and around the country, and that starts with ensuring that the best and brightest are at the VA caring for our veterans."

"The findings of the USA Today investigation are intolerable," said Chairman Roe. "The committee has long been concerned about VA's settlement agreements, and even held a hearing on the topic last year. While I can appreciate VA's recent decision to more closely vet settlement agreements, malfeasance within the department will not be ignored. It certainly cannot be rewarded and hidden from state licensing boards. As a physician, I find this deeply troubling, and I thank Reps. McMorris Rodgers and Poliquin for their leadership on this issue."

NOTE: Currently, if the VA receives a report of substandard health care practices, it takes at least 100 days to decide whether to refer the matter to a state licensing board. This legislation will require timely reporting to state licensing boards so there is proper notice of these serious allegations.

As reported by USA Today, "the VA — the nation's largest employer of health care workers — has for years concealed mistakes and misdeeds by staff members entrusted with the care of veterans." The article lays out a number of cases where doctors provided poor, unethical, or irresponsible care, and faced zero medical licensing reviews.

By requiring malpractice to be reported to state licensing boards, this legislation ensures that if poor care happens, doctors and clinicians will no longer be shielded by the VA and could face consequences just like they do in private practice.

[Back to Top](#)

2.14 - WAGM (FOX-8): [Rep. Poliquin's Bill to Ensure VA Headstones For Veterans' Families Buried in Cemeteries Advances in the House](#) (12 October, 35k online visitors/mo; Presque Isle, ME)

Today, Congressman Bruce Poliquin had his Veterans bill pass out of committee with unanimous, bipartisan support.

Congressman Poliquin's legislation would ensure that Veterans' family members who are buried at tribal Veterans cemeteries—such as the Houlton Band of Maliseet Indians Tribal Veterans Cemetery in Aroostook County—are provided government furnished headstones, the same treatment as those buried at national and state Veterans cemeteries.

Congressman Poliquin, who represents the Houlton Band of Maliseet Indians and their Tribal Veterans Cemetery in Aroostook County, released the following statement:

“Our Veterans, who served and sacrificed for our Nation and who are now laid to rest in tribal Veterans cemeteries, should have the honor of being buried with their families and all should have access to headstones commemorating their sacrifices,” said Congressman Poliquin. “I’m proud to represent the Houlton Band of Maliseet Indians, who created the first Tribal Veterans Cemetery not only in Maine, but on the entire East Coast. It is a great honor to serve them and to push forward this commonsense fix so all our Veterans and their families can be properly honored when they are laid to rest. I’m extremely pleased to have the unanimous support of my Republican and Democratic colleagues on the Veterans’ Affairs Committee for this commonsense legislation, and I will continue to push this important bill through Congress and onto the President’s desk.”

Clarissa Sabattis, Chief of the Houlton Band of Maliseet Indians, said when the bill was introduced, “The Houlton Band of Maliseet Indians is honored to have the first Tribal Veterans Cemetery, East of the Mississippi. We all know that when a loved one serves in the military, especially when deployed overseas, that the family serves as well. Spouses take on the additional duties and stresses of taking care of their homes, being single parents, raising and comforting their children in times of great stress and ensuring our veterans have a home to return to. Congressman Poliquin’s Bill honors the families and acknowledges the sacrifices made by those who stay behind by providing headstones for the spouses and children of veterans who are buried in tribal cemeteries.”

Under current law, government furnished headstones are only available to Veterans’ eligible spouses and dependents buried in national and state Veterans cemeteries. This bill would authorize the Department of Veterans Affairs (VA) to provide headstones and markers to eligible spouses and dependents interred at tribal Veterans cemeteries.

[Back to Top](#)

2.15 - KOB (NBC-5, Video): [Oregon politician concerned about Roseburg VA medical facility](#) (12 October, 27k online visitors/mo; Medford, OR)

Washington, D.C. – An Oregon congressman is asking the U.S. Department of Veterans Affairs to address “substandard management” at the Roseburg VA hospital.

Congressman Peter DeFazio (D-OR 4th District) said the VA Roseburg Health Care System (VARHS) is a source of concern for constituents, who complained to the governor about the lack of effective and accountable management.

DeFazio claims nothing has changed at VARHS despite repeated outreach with VA leadership, including a direct appeal to VA Secretary David Shulkin last week.

“Poor management has resulted in degraded patient care and difficulty in recruiting and retaining talented medical professionals to help Oregon’s veterans. It’s outrageous that in addition to delays and government bureaucracy veteran care is being hampered by management issues,” Rep. DeFazio said. “Doctors, nurses, and other VA employees are putting their careers on the line to improve the system, risking potential retaliation from the same inadequate leadership. The status quo is entirely unacceptable, and it is time for the VA to stop passing the buck and take immediate action. Our veterans deserve better.”

Rep. DeFazio voiced his concerns while speaking in support of the Dr. Chris Kirkpatrick Whistleblower Protection Act. The legislation would create harsher penalties for those who retaliate against whistleblowers.

According to DeFazio's office, in 2015 35% of whistleblower complaints came from VA employees.

2.16 - The M Report: [Ginnie Mae and VA Create Refinance Loan Task Force](#) (12 October, Nicole Casperson, 20k online visitors/mo; Dallas, TX)

Ginnie Mae and the Department of Veterans Affairs (VA) recently announced the shaping of the "Joint Ginnie Mae – VA Refinance Loan Task Force," in an effort to address loan churning and repeated refinancing issues.

Specifically, the task force is set to focus on examining critical issues, important data, and lender behaviors related to refinancing loans. In addition, the task force will "determine what program and policy changes should be made by the agencies" as a way to ensure these loans do not pose an "undue risk or burden to Veterans or the American taxpayer."

According to the enterprise, this task force has begun its efforts in two ways. First, by examining data and information to ensure loans provide a "net tangible benefit" to Veteran-borrowers. Second, the task force is considering to establishing time frames regarding "recoupment of fees associated with refinancing loans."

The purpose of the task force is to also determine the effects if implementing stronger seasoning requirements for VA-guaranteed loans that are securitized into Ginnie Mae Mortgage Backed Security pools, according to Ginnie Mae's release.

Furthermore, the task force will "work to ensure Veterans understand the costs and benefits of refinancing, and ensure robust borrower outreach and education programs are augmented for this purpose."

Last year, the Consumer Financial Protection Bureau revealed a snapshot of service member complaints and issues related to VA mortgage refinancing. In light of these issues, the task force will examine aggressive and misleading refinancing propositions.

The release notes that Ginnie Mae and the VA will continue to work together until concrete solutions have been implemented to eliminate lender behavior that is unhelpful to Veterans and harmful to the American taxpayer.

2.17 - KSNW (NBC-3): [Kansas nurse in Puerto Rico to help Hurricane Maria victims](#) (12 October, 9.1k online visitors/day; Wichita, KS)

A Cheney nurse is in Puerto Rico helping victims of Hurricane Maria. Linda Sue Bayless is a provider at the Robert J. Dole VA Medical Center.

As part of the VA's Disaster Emergency Medical Personnel Program System, she signed on to deploy where she was needed most. Bayless left October 4 and is due back on the 18.

Her husband, Greg, says she is now living in a tent and has had no hot water since she arrived. He describes her as working side by side with FEMA, the Red Cross, and Homeland Security. "She is an honorable woman," He said. "She wants to help. She is patriotic. She has been a caregiver her entire life. She wanted to volunteer."

He describes his wife's conditions as "difficult" and she is currently working nights on the 7 p.m. to 7 a.m. shift.

3. Access to Healthcare

3.1 - Newsweek (Video): [PTSD Treatment: How Ai Is Helping Veterans With Post-Traumatic Stress Disorder](#) (12 October, Joseph Frankel, 9.4M online visitors/mo; New York, NY)

There is a real appeal to shouting into the void: the ubiquity of Google search as confessional, the popularity of PostSecret, the draw of confiding in a trusted friend with the hope verging on understanding that our secrets won't be shared all point to this. A group of researchers from the University of Southern California, with funding from the DARPA wing of the Department of Defense, believe that desire might drive a preference among veterans with PTSD to anonymously discuss their symptoms with a computerized avatar.

They found that the service members who volunteered for the study disclosed more symptoms of PTSD when speaking with a computerized "virtual human" than when filling out a symptoms checklist on the military's Post Deployment Health Assessment (PDHA). They also reported more symptoms even when filling out a completely anonymized version of the PDHA. The idea, the researchers suggest, is that people are more willing to disclose their symptoms when they know the data is anonymous.

It's unclear if that will fly in real life. Whether the program will truly help veterans remains to be seen. And its implementation raises questions about medical ethics and the stigma around mental-health in the military and culture at large.

The Institute for Creative Technologies at USC got lots of buzz for its original research, and introducing the world to Ellie, a digital diagnostic tool that strongly resembles, but cannot replace a human therapist. Ellie, an avatar of a woman in a cardigan with olive-toned skin and a soothing voice, listens to the people who come to her, and does what any human sounding board does. She listens to the content of their speech, and scans their facial expressions, tone, and voice, for cues that hint at meanings beyond speech. Ellie's design was decided upon by the research group's art team. As for how Ellie sounds, "she has a very comforting voice," Lucas told Newsweek.

(Unlike a human, of course, this kind of reading is made explicit enough to show in a video.)

Based off their results, Lucas says, the researchers believe that for veterans with PTSD, Ellie combines the best of both worlds: her warm demeanor and sympathetic responses establish the kind of rapport that a therapist would create, and the knowledge that she's not actually a person, and crucially, that she's not built into a chain of reporting, mean you can say whatever you want. This builds off past research this same team did, in which participants more intensely expressed feelings of sadness and reported lower rates of fear when going through a health screening with a virtual human rather than one they were led to believe was controlled by an actual human.

The way Lucas envisions it, Ellie is an economical and efficient solution. "All you need is a webcam, a laptop, and a microphone." She imagines Ellies existing in a kind of kiosk that can be tucked into a local VA. "I know it sounds creepy to put it in a closet, but you could put it in a closet."

And at least one psychiatrist thinks Ellie has potential. "This technology has amazing potential to drill down into the elements of rapport, and whether it differs by patient characteristics; something that is not possible with real life therapists or clinicians. A simple example is whether the sex and age of the avatar alters the effect," says Joseph Hayes, a psychiatrist at University College London.

However, Hayes believes the anonymity that drives the study's result might be impossible in real life. The participants in the study may feel more comfortable disclosing to Ellie because, unlike with the PDHA, which soldiers know will go on their permanent health record, what they say to Ellie will not. But If Ellie were really integrated into a care center, it's hard to imagine that the data she collects wouldn't also be accessible by treating clinicians.

"For an intervention to be possible ultimately, the disclosure would have to be shared with the same commanding officers who have traditionally received the results of the service members PDHA, and entered into their military health record. Once this is made explicit, would disclosure reduce to levels seen previously?" Hayes wrote. "If so, it is a culture change (reducing public stigma—within the military and more broadly) which is truly going to impact on disclosure and provision of appropriate treatment," Hayes wrote.

Lucas and her colleagues have been thinking about this problem, and she's optimistic they can work out a solution. She maintains that since the research is being implemented within the department of defense, it's under different rules than treatments marketed to civilians.

The way Lucas envisions it, even in real life, a session with Ellie can stay fully anonymous. A veteran can go in, talk with 'her', and at the end of the session Ellie can suggest they follow up with a clinician if the person needs further treatment. But, Lucas hopes, that choice will be up to the patient.

With one big exception.

If a therapist or doctor learns of a person's intent to harm or kill, among other acts, they are compelled to break confidentiality and intervene. But Ellie, Lucas maintains, can't be mandated to report these things because she isn't human. Lucas's ideal solution is that, if a veteran comes to Ellie expressing thoughts of self-harm, the program would send out a red flag of sorts to a human clinician who would then be compelled to act.

It has yet to be determined whether that approach is legally, ethically, or practically feasible.

Even if it is feasible, there are still many other problems to tackle when it comes to PTSD in veterans, Hayes says.

"As a clinician, I'd want to know that this technology could effectively detect cases of PTSD, rather than just increasing disclosure of less severe, potentially non-diagnostic, responses to trauma. The bottleneck is not necessarily in the shortage of resources for diagnosis, but a shortage in the resources to deliver effective evidence-based care following diagnosis," Hayes wrote. And while AI technologies that do exactly that are being developed and tested, he thinks it's a long ways away before they can take over that work.

And help is needed.

"Veterans account for 20% of suicides in the US," Hayes said. "Better support systems, beyond the brief provision of therapy may help reduce this shocking statistic."

3.2 - KTVU (FOX-2): [Services available for veterans at Napa Valley College evacuation center](#) (12 October, 2.1M online visitors/mo; Oakland, CA)

NAPA, Calif. (BCN) - The Vet Center, a subsidiary of the U.S. Department of Veterans Affairs, deployed personnel today to the wildfire evacuation center at Napa Valley College from Concord and Fairfield to provide mental health services and paperwork assistance for any displaced veterans.

They were at the shelter today with a trailer set up for three separate counseling sessions to be conducted simultaneously.

"Say you're having a panic attack," readjustment counselor Lori Shepherd said. "You come in here and have a counseling session."

Shepherd said the smoke, smells and sight of burnt buildings can be stressful for veterans who served in Iraq, Afghanistan or other war zones.

"It can definitely be triggering," said Joseph Moglia, a veteran of the U.S. Marine Corps who served in Iraq.

Shepherd and Moglia are available at Napa Valley College for any veterans who have been displaced by the North Bay wildfires and are in need of assistance. They can be reached at (925) 433-3407.

They've also set up an area with seating and a television for veterans at the shelter who just want to spend time with other veterans.

3.3 - The Gazette: [Mayor, nonprofits plead for Colorado Springs landlords to help homeless vets](#) (12 October, Jakob Rodgers, 870k online visitors/mo; Colorado Springs, CO)

Colorado Springs landlords reportedly are spurning federal housing vouchers in favor of renting to higher-paying tenants, thwarting efforts to help homeless veterans get off the streets, city officials and nonprofits say.

Mayor John Suthers, the National League of Cities and local advocates for the homeless called on landlords Thursday to accept the vouchers from veterans needing a place to live rather than taking advantage of the hot rental market.

Suthers stressed that local landlords hold the key to effectively ending veteran homelessness - a goal that has eluded the city for years.

"They're private businesses, they're there to make money and they don't have to engage in this," Suthers said. "But we're just trying to impress upon them that it's part of being a citizen of the community."

As an example, Suthers mentioned one homeless veteran who got a job while using his voucher - allowing him to pay more for rent.

"We're hoping they'll (landlords) see the long view that helping house people is in their interest as well as the community's," Suthers said.

Their message highlighted the latest in a series of meetings at the Apartment Association of Southern Colorado's offices, which seek to woo hesitant property owners.

As Colorado Springs' affordable housing crunch has worsened, rents have climbed to record territory, fed by Colorado's bustling economy and an influx of newcomers seeking cheaper housing outside the Denver Metro area.

In spring and early summer, the city's average monthly rate - not including utilities - was \$986 for a one-bedroom apartment and \$1,523 for a three-bedroom unit.

But the VA's vouchers are capped. For someone here without an income, they are from \$751 a month for a one-bedroom apartment and \$1,355 a month for a three-bedroom unit. Importantly, while those rates can rise with a person's income, they must include the cost of utilities.

That's kept landlords and property owners away, acknowledged Laura Nelson, the apartment association's executive director.

The plight of veterans seeking housing is "truly sad," said Carmen Azzopardi, vice president of multifamily property services for Griffis/Blessing.

Her company was among a few touted by the association as being more open to accepting vouchers.

But Azzopardi said many landlords feel hamstrung by the program's red tape. Many also fear violating the Fair Housing Act by prioritizing veterans above others, and accepting them at reduced rates.

"How can we help, when it's almost like our hands are tied on being able to help?" Azzopardi said.

Elisha Harig-Blaine, principal housing associate of the National League of Cities, disputed that notion.

"I can definitely tell you - it does not violate fair housing," Harig-Blaine said.

Homeless advocates also stressed a willingness to work with landlords and address any issues that arise, including landlords' concerns about renting to vets with felony convictions or past evictions.

The vouchers include a caseworker for each veteran who can help them find jobs, access health care and, if need be, find addiction treatment.

"We want to help you have success," said Erika Huelskamp, who coordinates the VA's local voucher program. "We are just a phone call away. We're here for you, just as much as that veteran."

Fifteen individuals and 13 families are searching for landlords willing to accept their Department of Veterans Affairs vouchers, said Huelskamp.

That's only a fraction of the homeless veterans in need of apartments here, and an even smaller portion of the city's overall homeless community.

People who haven't served in the military also face similar problems using different vouchers, nonprofit leaders say.

The pleas come as Colorado Springs tries to join the growing list of cities that have effectively ended homelessness among veterans.

The goal is to ensure no veterans are forced to live on the streets, and that their homelessness is brief, rare and nonrecurring.

A coalition led by Rocky Mountain Human Services almost succeeded in eliminating veteran homelessness in 2015 by creating an intensely-data driven program unlike anything ever seen in the Pikes Peak region.

Volunteers found people living on the streets. The nonprofit's employees helped them apply for VA benefits and seek housing.

But two main barriers - the city's severe lack of shelter space and affordable housing - kept the coalition from meeting its goal.

One impediment has since been eased.
